OBSERVE!

I AM

The Spirit of Health,

and my message is to the Wise. I crown, with a fadeless wreath, those who obey my laws and avail themselves of my counsels. The flowers that I give do not wither, and the fragrance of my roses is perpetual. I bring bloom to the cheek—strength to the body—joy to the heart. The talisman with which I work never fails. Vast numbers have felt its power, and testified to its virtues. It is

BEECHAM'S PILLS,

THE WORLD'S MEDICINE!

A perfect remedy for disorders of the liver, stomach, and digestive organs, accompanied by nervous debility.

WILLS AND BEQUESTS.

The will (dated Aug. 2, 1883), with three codicils (dated Nov. 28, 1885, and April 12 and Aug. 16, 1888), of Mr. George William Petter, late of Bournemouth, and of Messrs. Cassell, Petter, and Co., Ludgate-hill, who died on Sept. 16 last, was proved on Nov. 1 by the Rev. William Dixon Halse Petter, the son, Arthur Petter, the brother, Theodore Albert Mitchell, and William Parren, the executors, the value of the personal estate amounting to upwards of £520,000. The testator bequeaths £50 to the Church Missionary Society; £20 each to Mrs. Fegan's Boys' Home (Southwark-street), the North Devon Infirmary and the North Devon Dispensary at Barnstaple, the British and Foreign Bible Society, the Religious Tract Society of Scotland, the Asylum for Idiots at Earlswood, the Home for Incurables at Putney, the Printers' Pension, Almshouse, and Orphan Asylum, the Newsvendors' Benevolent and Provident Institution, the Booksellers' Benevolent Institution, the Newspaper Press Fund, Dr. Barnardo's Home, and the Orphanage at Stockwell founded by Mr. Spurgeon; £500 each to his sister, Charlotte, and his friend, Thomas Dixon Galpin; £250 to his brother Edwin; £50 each to the children of his brothers Edwin and Arthur, £350 each to Theodore Albert Mitchell and William Parren, an annuity of £250 and 150 shares in Cassell and Co., Ld. to his brother Arthur, and legacies to friends, servants, and others. He devises the advowson and perpetual right of presentation to the rectory and church of St. Leonard, Exeter, to the Rev. James Frederick Sheldon, and his estate called Down Grange, Basingstoke, to his son William Dixon Halse Petter. He gives his wife £1500, his house at Bournemouth for life, and an annuity of £2500 during widowhood, to be reduced to £750 in the event of her again marrying. The residue of his real and personal estate he leaves between his children, William, Horace, Clara, Lillie, and Gertrude, the shares of his daughters and son Horace to be held in trust for them, for life, and at their death to their children as they shall respectively appoint.

The will (dated July 7, 1888) of Mr. John Griffith, late of No. 6, Hanover-terrace, Regent's Park, and formerly of Finsbury-place, who died on Sept. 21, was proved on Oct. 25 by Samuel Clewin Griffith and Daniel Clewin Griffith, the nephews, and Miss Mary Anne Harcourt Griffith, the daughter, the executors, the value of the personal estate amounting to upwards of £178,000. The testator bequeaths £1500 each to Susanna Bateman Tindall and Florence Rosalie Laming; £4000 to Bateman Harcourt; £3000 to Elizabeth Harcourt; £1000, and about £5800 stock of the Gas Light and Coke Company and the Imperial and Continental Gas Company, to be divided between his nieces, Mrs. Fanny Norman, Mary Anne Griffith, and Susanna Clewin Griffith; £1500, on trust, for the children of John Clewin Griffith; £2500 to Elizabeth Cookson Bowyer; £3500 and his house in Upper Bedford-place to Samuel Clewin Griffith; £3500 and his houses in Woburn-square and Torrington-square to Daniel Clewin Griffith; and many other legacies. He gives £30,000 Metropolitan Board of Works Stock, £22,000 of the Two and a Half per Cent Annuities, and all his Railway Securities (with the exception of those of the Baltimore and Potomac Company), upon trust, to pay £250 per annum for two years to his two nephews, his executors, and then an annual payment of £10 each during his daughter's life, and the residue of the income to his said daughter, for life; and at her death, upon further trust, as to the Board of Works Stock and the Two and a Half per Cents, as she shall by will or testament appoint, among his next-of-kin; and as to the Railway Securities as she shall appoint generally. The residue of his property he leaves, upon trust, to pay £4000 each to the London Hospital, Guy's Hospital, the Middlesex Hospital, and St. Mary's Hospital; and £4000 to the British and Foreign Bible Society, if the residue shall be sufficient, and the ultimate residue, if any, to his daughter.

The will and codicil of Mr. George Stovin Venables, Q.C., late of Mitre-court, Temple, and Llysdinan Hall, Brecon, who died on Oct. 6, were proved on Nov. 1 by the Rev. Richard Lister Venables, the brother, Franklin Lushington, and Rowland George Venables, the executors, the value of the personal estate exceeding £146,000. The testator bequeaths £2000 to Franklin Lushington, £200 to Rowland George Venables, £500 to the Rev. Herbert Venables, and many other legacies and annuities. The residue of his real and personal estate he leaves to his brother, the Rev. Richard Lister Venables.

The will (dated March 3, 1885), with a codicil (dated May 4, 1888), of Mr. Arthur Littledale, formerly of Fullford, The Park, Cheltenham, but late of East Cliff House, Bournemouth, who died on Sept. 2, was proved on Oct. 27 by the Rev. Charles Edward Littledale and Captain Henry Charles Littledale, the sons and executors, the value of the personal estate exceeding £143,000. The testator gives all his moveable property and live and dead stock at his mansion house, £1000, and an annuity of £1200 to his wife, Mrs. Emily Denton Littledale; £5000 to each of his daughters, Mrs. Georgiana Emily Tottenham and Mrs. Henrietta Julia Makgill, for their own separate use; and £200 to each executor. The residue of his real and personal estate he leaves to his five sons, Charles Edward, Henry Arthur, Fletcher Castell Hungerford, Herbert Charles Thornton, and Frank Loftus, in equal shares.

The will (dated May 7, 1886) of Mr. Herbert Glendining Bainbridge, formerly of Leamington, but late of Malvern Hall, Solihull, Warwickshire, who died on Aug. 29 last, was proved on Oct. 25 by Herbert William Bainbridge, the son, William Maunsell Reeves, Arthur Torriano Rickards, and Mrs. Rose Bainbridge, the widow, the executors, the value of the personal estate amounting to over £85,000. The testator bequeaths £1000, and all his furniture, plate, glass, &c., to his wife, Mrs. Rose Bainbridge; and £200 to William Maunsell Reeves. The residue of his real and personal estate he leaves, upon trust, to pay the income thereof to his wife, for life or widowhood, she paying each of his sons who have attained twenty-one £200 per annum; but, in the event of her remarriage, she is to receive a fixed annuity of £300. Subject thereto the whole of his property is to be divided between his children in certain shares, the trusts contained in his will as to his business having become void.

The will (dated Sept. 30, 1887), with two codicils (dated March 3 and Aug. 18, 1888), of Mr. William Freer Scholfield, late of No. 55, Onslow-gardens, South Kensington, who died on Oct. 10, was proved on Oct. 25 by the Rev. Charles Richard Scholfield, the son and sole executor, the value of the personal estate being sworn to exceed £74,000. The testator bequeaths all his wines and consumable stores, the use and enjoyment, for life, of his household furniture and domestic effects, and an annuity of £1200 to his wife, Mrs. Mary Champion Scholfield; annuities of £100 to his cousin Emma Hindly and £30 to Anne Headley; and legacies to servants. The residue of his real and personal estate he leaves to his son, the Rev. Charles Richard Scholfield, for his own use and benefit.

The will (dated 1887), and a codicil (dated April 6, 1888), of Mr. John Archibald Tryon, late of Stamford, Lincoln, who died on June 24 last, were proved on Oct. 30, by Daniel John Evans, Joseph Phillips, and Edward Worsfold Mowll, the executors, the value of the personal estate exceeding £19,000. The testator bequeaths £2000 to Daniel John Evans; £1000 each to Joseph Phillips and Edward Worsfold Mowll; £5000 to the Hon. Mrs. Clementina Tryon, wife of Admiral George Tryon; £5000, upon trust, to pay the income to Miss Macleod, for life; £500 to Thomas Peter Greenwood; £500 to his groom, and other legacies. The residue of his real and personal estate he leaves between the daughters of Lieut.-Colonel Tryon and Richard Tryon, share and share alike.

The will (dated Dec. 2, 1881), with a codicil (dated Aug. 5, 1886), of Mrs. Elizabeth Antrobus, late of No. 72, Coronation-road, Bristol, widow, who died on Sept. 21, was proved on Oct. 27 by Christian Philip Sachs, John Goode, and Henry Havard, the executors, the value of the personal estate exceeding £11,000. The testatrix bequeaths £1100 South Indian Railway Stock to her nephew Henry Havard; £1200 Scinde Railway Stock, upon trust, for her brother, Charles Havard, for life; £1762 Annuities, upon trust, for George Havard; £1300 Madras Railway Stock, upon trust, for Edward Havard, for life, and then, upon further trust, for Louisa, his wife; £1500 Bombay and Baroda Railway Stock to his sister Sophia Sachs, upon trust, for her life; and on their respective deaths to the children of Edward Havard. The residue of her property she leaves between Henry, George, and Elizabeth Havard.

The command of the 1st Battalion Durham Light Infantry has been bestowed on Colonel Russell Upcher, who served with distinction in the Zulu war.

By permission of the authorities of the British Museum, Mr. W. St. Chad Boscawen, the Assyriologist, has begun a special series of lectures on the history and antiquities of ancient Babylonia. The subject of the present series is the Creation, Paradise, and Deluge legend. The lectures are supplemented, as usual, by a series of explanatory gallery tours.

MAPLE & CO.

TABLE LINENS.

TABLE LINENS.
During the long-continued depression in trade, many of the best Irish manufacturers have still kept their most skilful weavers employed, with the result that stocks have accumulated, till of necessity they must be realised, even at a serious sacrifice.

TABLE LINENS.—MAPLE and CO. having been consulted by several manufacturers so situated, have bought out for cash, on most exceptional terms, an immense assortment of pure hand-made, soft-finish CLOTHS and NAPKINS, which they are now offering at a very large percentage under value.

TABLE LINENS.—The cases are now being opened out, and comprise a large variety of CLOTHS of a substantial character, fit for everyday family use, and natural bloom till the last. The Cloths are mostly of medium sizes—2 yards by 2¾ yards, from 5s. 11d.; better quality, 8s. 11d.; extra quality, 14s. 9d.

TABLE LINENS.

TABLE LINENS.

TABLE LINENS.—Amongst the stocks are a number of CLOTHS, in both medium and large sizes, of altogether exceptional quality; in fact, some of the finest and most beautiful productions of the Irish looms. These are suitable for best use and special occasions, and should certainly be seen. The prices will be found but little more than usually asked for goods of ordinary character.

TABLE LINENS.—Included in the stocks will also be found a large variety of both CLOTHS and NAPKINS suitable for use in Hotels, Restaurants, Public-houses, &c., and proprietors contemplating renewing these Linens should certainly make an early inspection, or write for samples or quotations. A great saving may be effected by purchasing at once.

TABLE LINENS.—The Stocks also include piles upon piles of DAMASK NAPKINS, as follows: 4s. 6d. per dozen; Dinner Napkins, all fine flax, from 6s. 11d. per dozen; extra large French size, 9s. 11d. per dozen. These goods will be found of remarkably good value, and are sure to please in use.

SHEETINGS.

SHEETINGS.

SHEETINGS.
MAPLE and CO.'S Stock of pure-finish and hand-made Irish, Scotch, and Barnsley LINEN SHEETINGS, as well as assorted, and prices are ruling unusually low. Housekeepers would therefore do well to replenish their stores. Patterns free. A special quality Cotton Sheets, very strong, at 6s. 8d. per pair.

HOUSEHOLD LINENS.

HOUSEHOLD LINENS.

LINENS.—A Complete Set for £8 13s. 9d., consisting of Blankets, Quilts, Table Linen, Sheets, &c., suitable for a house of eight rooms.—MAPLE and CO., London, Paris, and Smyrna.

THE LADIES' COLUMN.

For evening wear in the winter season it is very desirable to have a bodice which protects the chest fairly well. The fullest of full dress undeniably exacts the scantiest of scant shoulder and arm coverings. But occasions exacting such toilettes are very rare at this season of the year, and the ever-growing tendency amongst us to independence of judgment about our costume and to obedience to the dictates of common sense can have its way. It is much less risky to have a bodice cut down only in front than both back and front. It is less than half as dangerous, because it is easy to protect the front of the chest momentarily on perceiving or passing through a draught, by raising the fan or the hand, or turning the back (if covered) in the direction of the danger; but it is not possible to thus counteract the insidious effect of draught when the shoulders are unprotected. The lungs are as close to the surface and as prone to receive a chill at the back of the shoulders as they are at the chest. The moral is, that in winter a bodice cut low at the back should never be worn when it can be helped.

One place in which it is certainly not compulsory—and equally certainly not wise—to wear fully low dresses, is at the theatre. These are most draughty edifices, especially near the stage in the stalls. Frenchwomen wear high though smart bodices to the theatre, as a rule. An attempt was made recently in England by a few women of position to bring the handsome and richly-trimmed tea-gowns, which are so generally used for home dinner dresses, into use for the theatre. The more elaborate tea-gowns, indeed, differ in no respect but a slight looseness in the fit from the Princess robes which were so fashionable a few years ago. However, the movement has not yet succeeded. But the short "tea-jackets," as we call them—in Paris they are confessedly theatre bodices—worn with a nice skirt, are quite fit for opera or for small party wear. They are in every sense bodices, only differing from ordinary costume bodies in being smarter than a walking or morning-dress could possibly be, and yet not at all cut down at the throat, or deprived of a large portion of their sleeves, as even demi-toilette gowns generally are. In a "tea-jacket" the back and sides fit the figure closely, but the front is usually loose, though held in to the waist by a belt, or by a few stitches on to the fitted lining.

Such a jacket was worn, and looked well, in a box at the Empire Theatre on the first night of the new ballet. It was of red plush, with Directoire revers of silk in the same shade, the different sheen of the two materials giving needful variety; the vest was of white lace gathered in slightly to the waist, but, nevertheless, falling easily; the collar was covered with lace, and closed with a diamond fichu-pin. Another, which I inspected recently at a French dressmaker's, was of gold satin brocaded in Oriental tints, in which red predominated: a very handsome material. This was cut with a basque barely reaching below the waist, even at the extreme back; and a vest (which did not quite reach the waist) of finely-pleated plain gold silk, was held in to the figure by a folded "Empire" sash of red silk. The inevitable three buttons of old silver decorated the loose edge of the bodice where it met the vest on either side, and above them revers turned back, faced with red silk, the extreme points of these coming right over the arm. The favourite copper-red, which is this season to be called "terra-cotta" (quite a different hue from the terra-cotta of two years ago), made up well with a dark-blue plush, the latter forming an edging down either side of the fronts, and also a collar, and about half the sleeves, which were slashed out irregularly with the terra-cotta drawn through, so as to have quite a *moyen-âge* effect; while the back and sides, and the vest folded across from either shoulder towards the waist, were all of the soft terra-cotta silk merveilleux. Such bodices go particularly well with plain black lace or dark-coloured silk skirts, especially if a wide moiré or faille sash matching the bodice in tint be added. Such costumes are eminently suitable, not only for the theatre but also for a small evening party, or for an at home or quiet and friendly dinner.

The newest of all new things is in veils. They are more like the quaint "falls" that our grandmothers wore than like anything we have ever donned. The veil, of lace or point d'esprit net, fits quite round the hat, or the high brim of the bonnet, and falls loosely over the whole face; just beneath the chin, it is provided with a running-string of narrow ribbon, which ties round the throat, so that the bottom of the veil forms a full frill or collarette of lace! The small, light veils so long worn are, it appears, to be practically superseded by longer and loosely-hanging ones; indeed, the broad-brimmed hats and high-peaked bonnets now fashionable almost demand that change. But the eccentric arrangement of a throatlet affixed is another novelty. It is very fashionable in Paris, and the London shopkeepers say that these veils are already selling very rapidly here.

Emigration is so easy and simple a method of disposing of surplus population that it is difficult to convince some people that it does not settle the whole question of poverty. But in a new land, men come face to face with the primal conditions of existence. There they learn, however here they may ignore or deny, that capital is needed, as well as labour, for the production of all articles of necessity and use. There they learn that the arts and refinements of life are luxuries obtained only at the price of previous saving of wealth. It is of no use to put human beings down on new soil without the means of cultivating it, and without the will and the ability to do the hard manual labour that is the basis of the social superstructure everywhere. In Australia, in New Zealand, in the far west of America, everywhere the same truth is found—that it is not all men and women that will find a subsistence there, but that it is labourers of either sex in the prime of their productive powers, possessed of health and strength and willingness to do the hard and coarse work of life for whom alone there is room. This specially applies to women.

Lady Carrington, the wife of the Governor-General of New South Wales, has just written over to warn educated women against going to that colony, unless they are prepared to do servants' work. Mrs. Steadman Aldis, wife of the Professor, sent a similar warning from Auckland some time ago. Even domestic servants find that they must work far harder, and do much rougher and more miscellaneous duties, than the better class of servants are asked or will agree to undertake here. They go over thinking they can't do washing, they can't clean boots and windows, and so on; but they soon discover that such objections prevent their getting places at all, although their wages will be higher than at home when they do get into situations. English women who have to support themselves should know that this is the state of the case, according to responsible testimony; and hence that we cannot look to emigration as a perfect panacea for our "over-womaned" difficulty.

The ladies nominated as candidates for the London School Board are only seven in number—far from a due proportion of the fifty-two members, even if all the women candidates were to be elected. They are—Mrs. Ashton Dilke (W. Lambeth), a lady of much ability; Mrs. Evans (Westminster), who has an excellent record as a Guardian for the Strand Union; Mrs. Augusta Webster (Chelsea), who has been a member of the Board for six years, and who is an eminent literary woman, of gracious bearing and excellent temper; Miss Davenport-Hill (City), already for nine years a member; Mrs. Hicks (Marylebone) and Mrs. Besant (Tower Hamlets), both Socialists; and Mrs. Maitland (Marylebone), who comes before the public for the first time.

FLORENCE FENWICK-MILLER.

A meeting of the Mansion House Committee in connection with the Metropolitan Exhibition of the Royal Agricultural Society next year was held on Nov. 5, when it was announced that £320 in addition to £2000 collected at Windsor, had been received towards the required fund of £20,000.

In recognition of his public services during the last three years, a complimentary dinner was given on Nov. 5, by members of the London School Board, to the Rev. Joseph R. Diggle, M.A., the chairman. The gathering took place at the Whitehall Rooms of the Hôtel Métropole, and was presided over by Sir Richard Temple, M.P., the vice-chairman.

A large deputation of the inhabitants of the Ward of Farringdon Without waited on the Lady Mayoress (Lady De Keyser) at the Mansion House on Nov. 5 in order to present to her a full-length portrait of her husband, the Lord Mayor, as an expression of their esteem and their appreciation of the manner in which the duties of the Mayoralty have been carried out during the year. The presentation was made on the part of the subscribers by Mr. Deputy Walter.

The retirement of Dr. G. H. Savage, M.D., from the office of Resident Physician and Medical Superintendent of Bethlem Hospital, to commence private practice in London as a consulting physician for mental disease, has given occasion to a signal demonstration of esteem for his character and services. On Friday, Nov. 2, he was entertained at the Café Royal by the past and present principal officers and resident students of the hospital and others, including the treasurer, Major Copeland (author of the interesting "History of Bridewell," which we lately noticed); Dr. Hack Tuke, joint-editor with Dr. Savage of the *Journal of Mental Science*; Dr. F. Taylor, Professor Stewart, of the Royal College of Surgeons; and Dr. Mickley, Superintendent Physician of St. Luke's Hospital. Dr. Percy Smith, who succeeds Dr. Savage at Bethlem, was in the chair. A testimonial gift, consisting of a large silver bowl and a pair of candelabra, manufactured by Mr. G. Lambert, of Coventry-street, was presented to Dr. Savage, with an illuminated address, declaring high appreciation of his exceptional ability and scientific attainments, and of his energetic and judicious administration, by which steady progress has been effected in the rational and humane treatment of the patients. He entered Bethlem Hospital, with full medical qualifications, as a student in 1866, became one of the resident medical officers in 1872, and has been Superintendent Physician since 1878. He is author of the valuable "Manual of Insanity." The toast of the evening was proposed by Dr. Mickley, and that of "Prosperity to Bethlem Hospital" by Dr. Beach, to which the treasurer responded. Mr. G. H. Haydon, the oldest in continuous service of the officers of the hospital, after bearing his testimony to its admirable management under Dr. Savage, proposed the health of Dr. Percy Smith, who has been three years assistant medical officer, after a distinguished career at St. Thomas's Hospital, and who is now in charge of Bethlem as Resident Physician.

THE FASHIONABLE TREATMENT OF THE PRESENT. THE UNIVERSAL TREATMENT OF THE FUTURE.

All in Search of Health should call at the "Electropathic Institute" of the Medical Battery Co., Ltd., 52, Oxford-st., London, W. (Corner of Rathbone-place), and obtain particulars of

HARNESS' ELECTRO-MASSAGE TREATMENT.

SUFFERERS FROM

NERVOUS DEBILITY, BRAIN FAG,

Sleeplessness, Indigestion, Constipation, Liver and Kidney Disorders, Ladies' Ailments, Hysteria, Rupture, &c.,

SHOULD CONSULT MR. HARNESS TO-DAY,

Or Write for Pamphlet.

NOTE ONLY ADDRESS—

52, OXFORD-STREET, LONDON, W.

PREMATURE OLD AGE!

LOSS of VITAL ENERGY, NERVOUS and GENERAL DEBILITY, and all ORGANIC DERANGEMENTS yield more readily to the healing influences of mild Electricity, as generated by wearing HARNESS' ELECTROPATHIC APPLIANCES, than to any Drug known to Science.

Mr. HARNESS should be consulted at once, either personally or by letter, by all who suffer from

Rheumatism,	Corpulence,	Neuralgia,
Lumbago,	Kidney Diseases,	Female Disorders,
Sciatica, Gout,	Epilepsy,	Liver Complaint,
Nervous Exhaustion,	Paralysis,	Hysteria,
Sleeplessness,	Spinal Weakness,	Consumption,
Brain Fag,	Indigestion,	General and Local Debility,
Hernia,	Constipation,	Functional Disorders, &c.

HARNESS' ELECTROPATHIC APPLIANCES

Promptly, Absolutely, and Permanently CURE.

MEN AND WOMEN

Who wear HARNESS' world-famed ELECTROPATHIC BELT find that it promptly Restores Impaired Vital Energy, Invigorates the Debilitated Constitution, Stimulates the Organic Action, Promotes the Circulation, Assists Digestion, and promptly Renews that Vital Energy, the loss of which is the first symptom of decay. Healing Properties are Manifested in Stimulating the Functions of Various Organs, increases their Secretions, Gives Tone to Muscle and Nerve, Relaxes Morbid Contractions, Improves Nutrition, and Renews Exhausted Nerve Force. Acting Directly on the System, it Sustains and Assists its Various Functions, and thus Promotes the Health and Vigour of the entire Frame.

NEW RUPTURE APPLIANCES.

RUPTURE TREATMENT AND CURE.—Mr. R. HARNESS' New Scientific Method of Cure is confidently recommended as positively the only reliable means ever discovered for the immediate relief and ultimate Cure of Hernia. Sufferers from almost every form of this torturing complaint may have the satisfaction of knowing that a complete cure by Mr. Harness' treatment is not only possible, but in many cases absolutely certain. Read the following CONVINCING TESTIMONIAL, selected from hundreds. Mr. Robert Ford, Cinderdown Villa, Cowleigh-road, North Malvern, writes:—"Oct. 9, 1888. To Mr. C. B. Harness. Dear Sir,—In May last I placed myself under your treatment for Rupture, and after four months' use of your appliances I may now safely say that I am COMPLETELY CURED. And my advice is to those who suffer in a similar way to at once place themselves under your care. It will always be a very great pleasure to me to answer any inquiries with respect to my case and your treatment." You can be carefully examined free of charge, by a skilful surgeon at the Electropathic Institute, 52, Oxford-street, London, W. (corner of Rathbone-place). Don't delay, but call freely if possible.

Pamphlet and Advice Free, personally or by Letter.

If you want to be permanently and speedily Cured, without medicine, and FREE FROM PREJUDICE: call and inspect the original testimonials, and personally examine Mr. HARNESS' numerous Curative Electrical Appliances, all of which are guaranteed genuine.

RESIDENTS AT A DISTANCE, and those unable to call, should write for "Private Advice Form," which will be sent, together with Pamphlet and Copies of Testimonials, post-free to any address on application to

NOTE ONLY ADDRESS— 52, OXFORD-STREET, LONDON, W.

MR. C. B. HARNESS' ELECTRO-MASSAGE TREATMENT

Has now assumed a definite scientific position, and is well worthy of the more serious attention of medical practitioners, but for obvious reasons it cannot be adopted by medical men employed in active practice, as they have neither the time nor the convenience for carrying it out. In making this announcement the Directors of the MEDICAL BATTERY COMPANY (Limited) feel they have met a wide-spread professional and general want. They have specially fitted up suites of rooms exclusively for this treatment, the arrangements of which are replete with every appointment conducive to the comfort of patients.

IMPORTANT NOTICE.

MR. C. B. HARNESS, the company's consulting medical electrician and physician, will be happy to see any lady or gentleman desirous of consulting them, and full information as to the facilities and terms for Electro-Massage treatment will be forwarded on application.

CONSULTATION FREE.

NOTE ONLY ADDRESS—

52, OXFORD - STREET, LONDON, W.

ELECTRIC BATHS.

The Medical Battery Company, Limited, beg to state that their Electric Baths are constructed on the most scientific principles for utilising the transmission of currents of electricity in the treatment of disease. The Baths are luxurious in all their appointments, and it will be readily understood that this constitutional method of using electricity, by which the whole of the body is brought under its influence at one time, must have high pathological value in conditions of chronic disease, particularly those depending upon the presence of specific poisons in the blood, and other disorders in which cutaneous electrisation is specially indicated.

NOTE ONLY ADDRESS—

52, OXFORD - STREET, LONDON, W.

SUPERFLUOUS HAIRS.

LADIES troubled with SUPERFLUOUS HAIRS, MOLES, or other disfigurements should adopt Mr. C. B. Harness' new painless method of removing them by the Electrolytic Action of Electricity.

HARNESS' WORLD-FAMED PATENT ELECTROPATHIC BATTERY BELTS

Are the only guaranteed genuine curative galvanic belts recommended by the leading medical and scientific authorities.

THE FOLLOWING ARE A FEW EXTRACTS from the thousands of unsolicited

TESTIMONIALS

received by Mr. Harness. The public are invited to call and inspect the Originals at the Electropathic Consulting-Rooms, 52, Oxford-street, W.

NERVOUS EXHAUSTION.—"Horatio House, Leeds.—Dear Sir,—I purchased an Electropathic Belt from you in March, and beg to state that it has had a wonderful effect upon the circulation, and in improving the general vitality of the system. Since wearing the Belt I have become quite strong, and can walk miles without fatigue. I am, in fact, completely cured by your treatment."

LUMBAGO.—Mr. J. B. Carse, Station Master, L. B. and S. C. Railway, Clapham Junction Station, S.W., writes:—"I have derived great benefit from wearing your Electropathic Belt. The Lumbago and pains in my back have both ceased."

LADIES' AILMENTS.—Mrs. Osborne, The Hollies, Newark-upon-Trent, writes:—Sept. 27, 1886.—Your Electropathic Abdominal Belt has had a wonderful effect upon the circulation, and in improving the general vitality of the system. Since wearing the Belt I have become quite strong, and can walk miles without fatigue. I am, in fact, completely cured by your treatment."

EPILEPSY.—Arthur Hidwell, Esq., Wood-road, Geddington, Kettering, June 4, 1886, writes:—"I cannot speak too highly of your Electropathic treatment; it has been a great boon to me. I used to have the fits several times a day, but now I have none, and the peculiar sensations incidental to this distressing disease entirely left me after wearing your appliances."

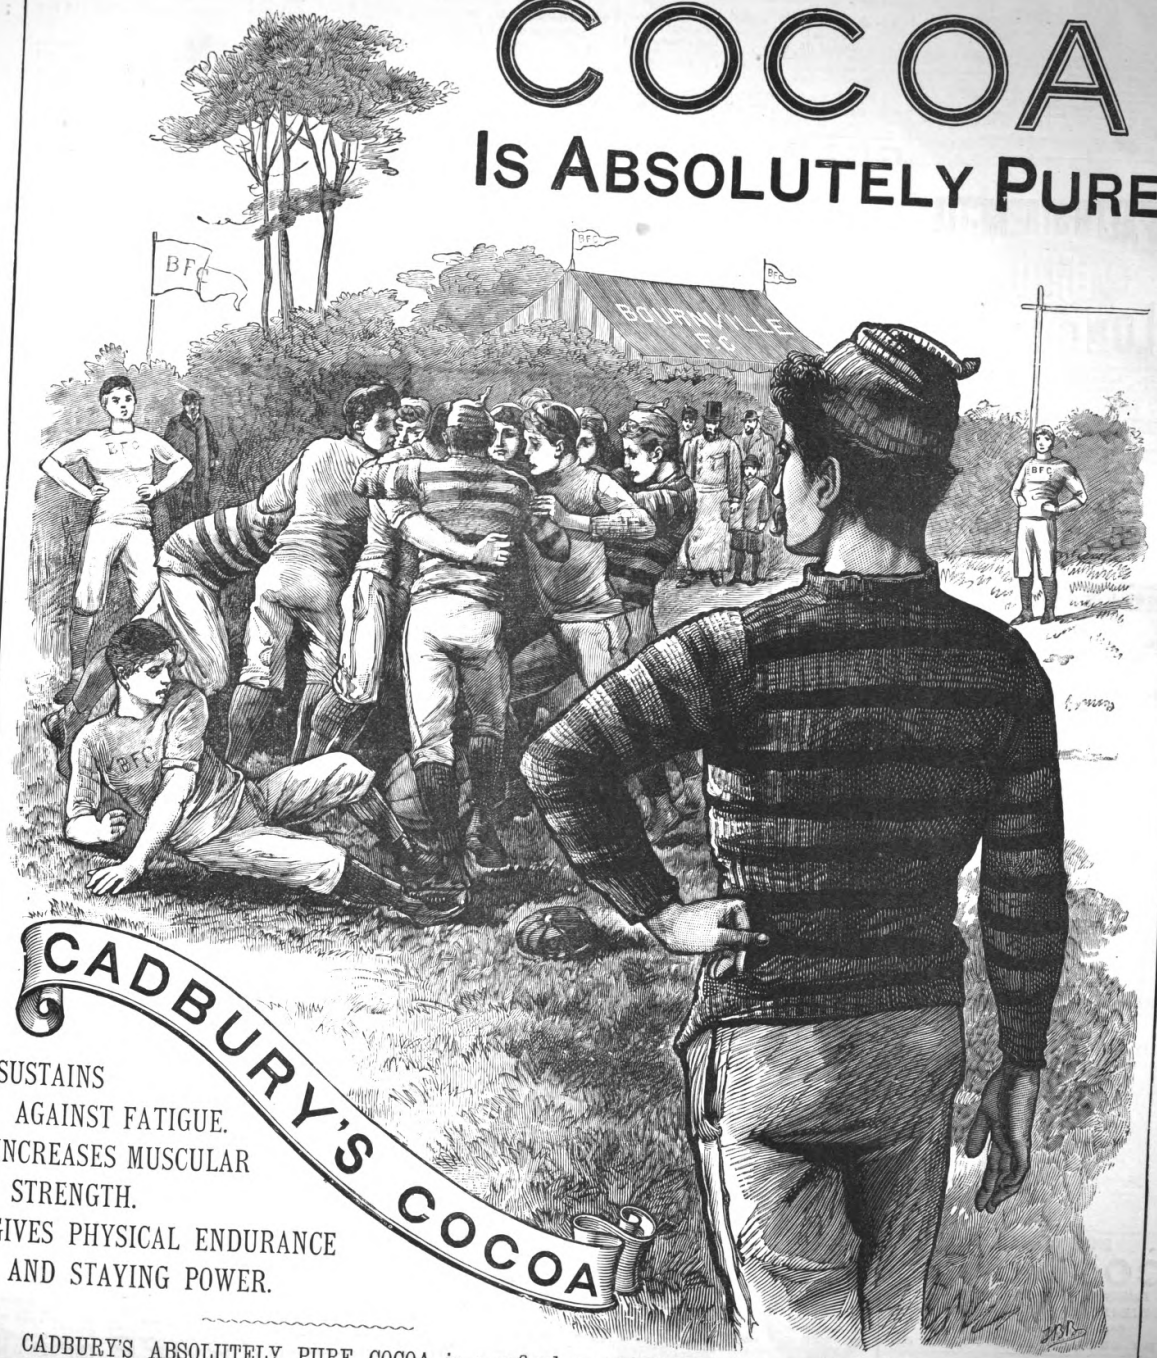
SCIATICA.—Mr. R. J. Watson, Proprietor, *Harwich Free Press*, 13, Market-street, Harwich, writes:—"Harness' Electropathic Belt has completely cured me of Sciatica. After wearing it for a week I got relief, and my appetite has improved, and I am now quite free from pain."

PAIN IN THE BACK.—The Rev. R. Anthim, Vicar of Shipton, King's Bridge, South Devon, writes:—"The pain across the loins has quite left me. My nervous energy is greatly augmented since wearing Harness' Electropathic Belt."

NERVOUS PROSTRATION.—Mrs. Powell, 4, Dulwich-road, London, S.E., writes:—"I am so much better and stronger since wearing your invaluable Electropathic appliances."

SLUGGISH LIVER.—Mrs. M. Anderson, Mortimer-street, *Herne Bay Kent*, writes:—"I was suffering from a torpid, inactive liver, accompanied by Constipation and Indigestion. After wearing the Electropathic Belt I am much better in every way; the functions are regular, my appetite has improved, and the wretched depressed feeling I used constantly to have has completely passed away."

PARALYSIS.—Robert Rothwell, Esq., 9, Cooke-st., Hulme, Manchester, June 4, 1886, writes:—"The Electropathic Belt my father purchased for loss of nerve power and paralysis has made a new man of him, and it was only the other day that he told me he would have been in his grave long ago if it had not been for your valuable Electropathic treatment."



MR. C. B. HARNESS, Consulting Medical Electrician, THE MEDICAL BATTERY CO., LIMITED.

PREPARED BY PICARD FRERES.

Ladies will find this delightful and refreshing TOILET POWDER invaluable as an application for the skin, reducing a too ruddy complexion and heightening a pallid skin to a beautiful tint. Its application absorbs all moisture, and induces that coolness and comfort to the skin so desirable in the ballroom, theatre, or in the open air. Price 1s. per box; per post, free from observation, 1s. 3d. In three tints: Blanche, for fair skins; Naturelle, for darker complexions; and Rachel, for use by artificial light. Of all Chemists and Perfumers.

Depôts: R. HOVENDEN and SONS, 31 and 32, Berners-street, W.; and 91-95, City-road, E.C., London.

DR. DE JONGH'S
KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM
KNIGHT OF THE LEGION OF HONOUR
LIGHT-BROWN COD LIVER OIL

Incontestably proved by Thirty Years' Universal Medical Experience to be
THE PUREST, THE MOST PALATABLE, THE MOST DIGESTIBLE, AND THE MOST EFFICACIOUS
IN CONSUMPTION, THROAT AFFECTIONS, AND DEBILITY OF ADULTS AND CHILDREN.

SELECT MEDICAL OPINIONS.

Sir MORELL MACKENZIE, M.D.,
Physician, Hospital for Diseases of the Throat.
"I have found your Light-Brown Oil much more uniform in character, more uniform in its action, and more easily digested than any other Cod-Liver Oil."

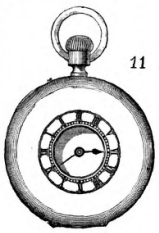
Sir G. DUNCAN GIBB, Bart., M.D.,
Physician to the Westminster Hospital.
"The value of DR. DE JONGH'S Light-Brown Cod-Liver Oil as a therapeutic agent in a number of diseases, chiefly of an exhaustive character, has been admitted by the world of medicine."

Sir JOHN T. BANKS, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider DR. DE JONGH'S Light-Brown Cod-Liver Oil the best of all the specimens of Oil which have ever come under my notice."

Sir GEORGE H. PORTER, F.R.C.S.I.,
Surgeon in Ordinary to the Queen in Ireland.
"I am frequently in the habit of ordering DR. DE JONGH'S Light-Brown Cod-Liver Oil, and consider it a very efficacious remedy."

Sold ONLY in Capsuled Imperial Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s.; by all Chemists and Druggists.
Sole Consignees—ANSAR, HARFORD, & CO., 210, High Holborn, London, W.C.
CAUTION.—Resist mercenary attempts to recommend or substitute inferior kinds.

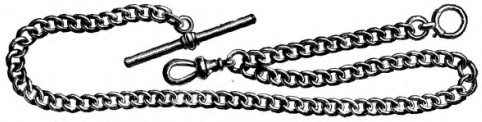
UMBRELLAS.



SAMUEL FOX & Co., Limited, have added to their celebrated frames decided improvements (protected by Letters Patent) which give increased Stability and greater Neatness to the Umbrella.

SAMUEL FOX & Co., Limited, manufacture the Steel specially for all their frames and are thus able to provide exceptional quality at a merely nominal price over inferior makes.

HEALTH-STRENGTH
VIGOUR
·LONG·LIFE·



Guaranteed by the use of HUNT'S FAMILY PILLS. Large numbers of people in robust health can testify to the truth of this assertion, having regulated themselves entirely by these Pills for over 50 years. One pill will invariably relieve, and a little perseverance radically cure, either a Torpid Liver, Costiveness, Indigestion, Pains in the Back or Head, Influenza or Feverish Cold, Rheumatism, Lumbago, Flatulency, or Giddiness. THE NEW PRESIDENT OF THE UNITED STATES, GENERAL HARRISON.

OUR NOTE BOOK.

BY JAMES PAYN.

There are three ladies in America who make a profession of teaching whist. If there were but a fourth—for one cannot imagine any lady playing "dummy"—they would form the most charming rubber in the world. But of course these blessings to civilisation are scattered over the United States, like missionaries: only, instead of forming congregations, they "establish whist-centres." I hope also they have another institution in common with missionary enterprise—that of "making a collection"; for the labourer in every field is worthy of his hire. We learn from the *Milwaukee Sentinel* that that town rejoices in the presence of the most eminent of these three lady professors. The Milwaukee young women, of whom no less than 193 are or have been her pupils, are as distinguished in this branch of science as are our own Girton and Newnham girls in other branches. Their "head"—to use the term employed in "The Princess" for the lady who occupied a somewhat similar position—has written treatises on whist, we are told, "for several railroad companies for issuance in book form." It would therefore seem that these students are so eager to attain proficiency that they even play in the trains. This is diligence indeed; and it is humiliating to reflect that if they followed this wholesome and delightful pursuit in our own country, they might be taken up, under a bye-law, and prosecuted as card-sharpers. I noticed, only last week, an indignant letter from some morose traveller on the Brighton railway demanding to know why this law was not enforced, and the whist-players—the spectacle of whose simple enjoyment had stirred his bile—were not thrown into dungeons. But in Milwaukee—rather a faster place, one would think, than its name suggests—there is Liberty, though no license (unless I have been misinformed) for spirituous liquors. What I would like to read, even more than this professor's treatises, would be her educational experiences.

I have tried to teach young ladies whist myself—of course I played (and I venture to hope there was reciprocity in the stake) for love—but with rather unsuccessful results. They did not say, as I once heard a well-known philosopher observe, when compelled to make up a rubber—"I protest, at starting, against any inference being drawn by my partner from any card I may happen to play;" but it was evidently on that understanding that they proceeded. Unlike him, however, they always professed to know the game: "We are not scientific players, you know, as we want to become; but we have family whist at home." "Do your people play the penultimate?" I once inquired of one of them. "Not that I know of," she answered (very sweetly, but with some of that "amazement" which is so deprecated in the marriage service). "Sophie plays the piano, and Julia the harp; but none of us play the penultimate." It was one of my chief difficulties that I could not prevent my pupils' thoughts from straying from the matter in hand into distant spheres. I could never make them perceive the conventional invitation for trumps. "You didn't notice my ask-for-trumps?" I would sometimes delicately observe, when all had been lost through that neglect. My fair partners would only smile (which, however, I need not say was recompense enough for me) and shake their pretty heads: one of them replied, "I never heard you." My best pupil used to boast that she could "always see a 'picture-peter';" but she couldn't. As for asking for trumps themselves, to give you an idea of how they grasped the meaning of it—not that they were stupid (they were as sharp as needles, only some other magnet than the game of whist was always attracting them)—one of them once said to me, "Why should I have asked; I had plenty of them?" In Milwaukee—whose whist club is, we are told, the largest in the West—its lady professor may not have had these difficulties to overcome; or, as is very probable, she was much sharper with her pupils than I ever dared, or wished, to be; but her experience with them would be very interesting, and, for once, a novel contribution to the great female educational movement.

"Justice to Jurymen" would not be a bad cry to go to the country with—and also the town. There is, very properly, much sympathy expressed for the unemployed, but very little for this unhappy class, who are employed but don't want to be. They are summoned in the most violent and offensive terms that the Law can devise, though (because in this case she is not paid for tediousness) in unusually curt ones, and with a vague threat ("whereof fail not") to conclude with. The affair is so managed that the greatest possible inconvenience is inflicted; there is no name on the summons to indicate to whom you are to state that you are dangerously ill, while "personal attendance" to explain your reason for exemption to the Court is absolutely insisted upon. If one had an infectious disorder, it would be a great temptation to accede to this proposal, and "give it" the Court. If you do go, you are hustled by ushers, and kept "cooling your heels," and much more delicate portions of your frame, in draughts, and told "to wait," or that you are not wanted to-day, but must come to-morrow, and all this with an impertinence of manner that only belongs (with the exception, perhaps, of an underling in a Government office) to a myrmidon of the law. If, on the other hand, you are one of the Elect, you have by no means the great advantages ascribed to persons in that condition. You will be shut up in a box without a lid to it, and have, perhaps, to listen for many days to arguments about the right of way through some moor or wood, where nobody in his senses, one would think, would ever want to go, and in which it is impossible to take the faintest interest—and all for twenty-one shillings by way of recompense. The jury system may be a necessity, for all I know; but the victims who are sacrificed to it, and are the only persons concerned, from the Judge to the doorkeeper, who are not decently remunerated for their services, should at least be treated with civility and shielded from discomfort. It is not a personal matter, for, thank Heaven! I have an infirmity which releases me from this obligation; I am pleading for my fellow-creatures to whom this public service is made so abhorrent that—worse than soldiers who maim themselves to escape the military yoke—some of them will even pretend to have neither creed nor morals in order to evade it. And now—last grain that breaks the camel's back—a Judge has decreed that the consolations of literature (even throughout a right-of-way case) must be denied to jurymen. Once in the box, they are to be spared not one syllable of forensic eloquence—the opening of the counsel, the contests between himself and his learned friend on the other side, the badgering of the witnesses, the summing-up of the Judge. To look at a newspaper is pronounced to be contempt of Court. Well, perhaps there is something to be said against newspapers: the newspaper has speeches in it, and may produce somnolency; but would there be any harm in a juryman who is getting vertigo from a right-of-way case, to refresh himself with a pocket novel and then to vote with his foreman or the majority, whichever seems to promise the quickest way out of his trouble? I notice—if I may say as much without disrespect to any Commission, Parliamentary or otherwise—that when Judges themselves have to act as jurymen they don't seem to like it.

A great poet has told us that in his boyhood he was under the mistaken impression that the tree-tops were "close against the sky," and that when he came to maturity "it gave him little joy" to know that he was farther off from heaven than when he was a boy. It ought (by analogy) to give general satisfaction that the sun has been discovered to be nearer us than we thought it was. By establishing ten stations of observation in the United States, and taking 1472 photographs of the transit of Venus, an American astronomer has found that the parallax is 8847 minutes. She must go much faster than a mile a minute, since the total result of our distance from the great luminary is thus proved to be 92,385,000 miles. Previous British calculation added erroneously 130,000 miles to these figures—a circumstance which was, no doubt, made use of in the late Irish vote for the Presidency, as evidencing our desire to keep the democracy as much as possible in the dark.

In these days of doubt as to the failure or success of marriage, a late matrimonial event at Barnet between two "parties" of an age to know their own minds and with a prolonged experience of the subject in question, has a peculiar attraction and significance. The proportion of their years to one another was exactly what is recommended by the highest authorities, the gentleman being seventy-six and the lady seventy-one; and notwithstanding that they had been dependent on one another's society for half their lifetime they had never complained of *ennui* at home. On the other hand, they had applied for and obtained "out-door relief," which was the cause of their interesting case being made public. This grant in aid was objected to by certain of the parish guardians, on account of their never having been bound together by what an eloquent female writer has termed "the golden chain of matrimonial slavery," with which it was therefore decided they should be, even thus tardily, at once united. As they were unhappily without the means of giving the usual déjeûner, or even providing one for themselves, one of the workhouse authorities kindly undertook to supply a wedding-cake, and another provided a carriage and pair (let us hope with favours) to transport the happy pair to church. An immense congregation witnessed the ceremony, which went off without a hitch save for the absence of a ring, which was, however, ingeniously furnished from a pew curtain. The result of this somewhat unusual alliance will be watched by all those interested in this much-debated question with curiosity. Whatever happens amiss can, at least, never be set down to the ordinary causes of recklessness and precipitancy, or disregard of the advice of friends.

The *Spectator* has a correspondent in New Zealand who sends it a charming anecdote this week of a young Maori's sacrifice to vanity. Someone had given him a pair of boots: but finding them too short, and being unable to force them on, he sliced off his big toes with a hatchet, to harmonise with the length of the other ones, applied some juice of the flax plant (*Phormium tenax*)—the giving the botanical name strikes one as a very pretty touch in such a story—to stop the bleeding, and wore the boots till they (not the boots, but his toes) were healed. No doubt, in a male, such vanity is rare; but I know many a Mary here at home (the name is spelt a little differently, and the sex is feminine, but the character is identical) who endures similar torments every day of her life, not only in her "tootsicums" (as she calls her feet, which are not quite so diminutive as she would have them to be), but in much more vital portions of her dainty frame. To one who is acquainted with the structure of the human body the sight of her waspish waist arouses the tenderest pity; one is inclined—though, of course, one never does, or hardly ever—to put one's arm (twice) round it and murmur: "How can you, *can* you *do* so?" To poke fun at the poor New Zealand dude, who, at least, has his *Phormium tenax*, while such things are being done at home, "in the best circles," without any such mitigation, is surely to strain at a gnat and swallow a camel.

Literature is but a poor calling, so far as its profits are concerned, to any of its professors, but least of all to those whose mission is to make science popular. A few—a very few—scientific men of reputation may command a sale among the rich and learned for great works of a corresponding bulk and price; but those whose humble, but not less useful, task is to teach the secrets of science to the crowd must do so by means of cheap books; and "the crowd," compared with the public that welcome a lighter kind of literature, is not a large one. If the education of their fellow-creatures is not, like virtue, its own reward, its remuneration is still very small; and those who are benefited by it owe them something beside gratitude. The late Mr. R. A. Proctor, the astronomer, is an example of this ill-rewarded class. A petition, I read, has been signed by many distinguished persons in favour of his widow and six children for a Government pension. If there is any pretence remaining of devoting the proceeds of the national bounty to those for whom it was designed, here is surely a claim that should not be disregarded. The total resources of Mr. Proctor's family are said to be but £150. What a mockery it is to call a man a "popular writer," when with all his toil and pains, and an unquestioned economy, such a pittance is all that he can leave behind him!

NEW PRESIDENT OF THE UNITED STATES.

The contest between the "Democratic" and the "Republican" parties, in the United States of America, for the election of delegates of the several States, in proportion to the numbers of the population in each State, to choose the President of the Union for the next four years, has resulted in the victory of the "Republican" party, whose candidate, General Benjamin Harrison, will therefore be elected instead of Mr. Grover Cleveland, and will be installed in office early next year. Benjamin Harrison was born in August, 1833, at North Bend, on the Ohio, and was educated at Cary's Academy, Walnut Hills, Cincinnati, and at the Miami University at Oxford, after which he studied law at Cincinnati two years. At the age of twenty he married Miss Carrie L. Scott, daughter of the Rev. J. W. Scott, of Oxford, Ohio, and has two children. In 1854 Harrison removed to Indianapolis, where he began his work in politics. In 1860 he was elected reporter of the Supreme Court of Indiana. In 1862, when the Union armies had met with reverses in the South, he obtained a Lieutenant's commission, went into camp with Company A of the 70th Indiana Regiment, and in less than thirty days led to the front a regiment of 1000 fighting men. During the Atlanta campaign General Harrison took the place of General Butterfield as Brigade Commander. In the fall of 1864 General Harrison was re-elected reporter of the Indiana Supreme Court; in the same year he became a member of a law firm; and was elected Governor of Indiana in 1880. In January, 1881, General Harrison was elected to the United States Senate, and his term of six years as Senator of the United States established his reputation as a sound statesman and a powerful debater. He is an advocate of Civil Service reform.

THE EX-MAYOR OF CARDIFF.

Sir Morgan Morgan, the ex-Mayor of Cardiff, was on Tuesday, Nov. 6, presented with his portrait, accompanied with a silver dinner-service, subscribed for by numerous friends and fellow-townsmen, in recognition of his many good qualities and efficient services as Chief Magistrate of the borough, as well as of the liberal hospitality which characterised his tenure of office last year. The subscriptions amounted to upwards of £1000, and the presentation was made at the Townhall by the Mayor, Alderman Jacobs, in the presence of a large assembly of ladies and gentlemen. Cardiff is one of the most flourishing towns in the empire, and its population has increased since the last census was taken from 86,000 to upwards of 130,000. A knowledge of this fact was probably one of the circumstances which induced Lord Salisbury to recommend her Majesty to confer upon the ex-Mayor the honour of knighthood, in commemoration of the Jubilee year, and the distinction thus worthily bestowed gave great satisfaction, not only in Cardiff, but throughout the Principality. Sir Morgan Morgan, who practises as a solicitor, is descended from an old Carmarthenshire family, and it is not a little singular that his brother, Colonel Morgan, now fills the offices of the Mayor of the borough and High Sheriff of the county of Brecon—a combination of distinctions to which Mr. Justice Matthew made a graceful allusion in charging the Grand Jury at the last assizes. The Portrait of Sir Morgan Morgan is by Mr. B. F. Marks, of Fitzroy-square, London.

DISASTER AT MONTREUX, SWITZERLAND.

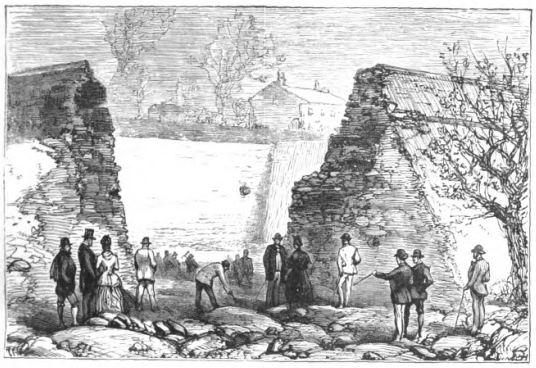
Many English tourists know the charming Swiss Riviera at the head of the Lake of Geneva. They have viewed with delight the shady, flowery gardens of Clarens, with its bright vine-clad slopes, so dear to Rousseau, the noble sweep of the blue lake, the crags and fir-woods of Naye and Jaman, with their scenery "beautiful as a dream," the shining snows of the Dent du Midi in the background, and the stately city of palatial hotels that has risen along the lake at Vernex and Montreux, extending to the historic walls of Chillon. They will be sorry to learn that this favourite abode, on this smiling shore, has been suddenly exposed to dire devastation, and has narrowly escaped destruction on the Clarens-Vernex side. Among recent improvements in this district, besides the cable-rail up to the pretty village of Glion, on the hill immediately overhanging Montreux, is an electric tramway from Vevey, through Montreux, to Chillon. Giving life to the whole region with its cheery horn, and by night with its bright red and green lights, this line has been a great convenience to visitors, and is a pleasing evidence of the progressive spirit of Switzerland.

On an eminence directly above the west end of Montreux, and opposite Glion, at an elevation of about 700 ft. above the lake, is the little village of Sonzier, where the Electric Company has established a reservoir providing the water power to work the dynamos of the company. The reservoir was surrounded by solid walls of limestone, protected outside by a substantial earthwork; but it appears that certain misgivings were entertained latterly respecting the solidity of the structure, and the official commissioned to inspect it reported it to be somewhat insecure, especially if overfilled. Whether or not this contingency occurred is at present undetermined; but on the dismal morning of Nov. 6, in the darkness of five o'clock, a sudden, rushing, thundering noise was heard, and down came the waters of the reservoir, breaking down all barriers, ploughing up broad spaces of vineyard, snapping aged walnut-trees, slicing their way through intervening cottages and hamlets, shaking down solid walls, tossing the unhappy residents out of their beds and burying them under earth, stones, and mud, three mètres deep. Sweeping down some of the main thoroughfares of Montreux, it poured into the lake, narrowly shaving the well-known Hôtel du Cygne and the German Protestant church. When our Correspondent visited the scene of this disaster he was impressed with the wonderful escape the town had made. But for the railway, which was itself covered with rubble and mud, and for some massive intervening walls, which diverted the raging waters, all the front houses of Montreux to the west might have been demolished in an instant.

The authorities seem to have exerted themselves laudably to repair the disaster. The railway was rapidly restored for traffic, and masses of large stones, gravel, and mud were carted from the main street; but there are still great piles of stones, brought down by this water avalanche, while many of the gutted houses threaten speedy collapse, if not promptly removed.

SKETCHES AT A FREE LIBRARY.

MUSIC.



An important addition has been made to musical activity in London by the resumption of the Monday Popular Concerts, which entered on their thirty-first season on Nov. 12. The large attendance at St. James's Hall proved—as on many former occasions—the strong hold which these performances have taken on the London musical public. Their recurrence is as anxiously expected as their temporary cessation is widely regretted. In the midst of much that is meretricious in London music, these concerts serve as wholesome correctives, by excellent performances of works by the great masters in a form of composition free from all admixture of the *ad captandum vulgus*. In addition to compositions that have taken rank as classics, the programmes occasionally offer examples of contemporary productions, so as to afford opportunities for judging of the progress, or otherwise, of creative musical power. In recent seasons the introduction of novelties has, wisely, been somewhat restricted—but few of these being found to stand the test of repetition; while the number of established masterpieces that will bear unlimited rehearing is almost beyond reckoning. The programme of the opening night of the new season was of sterling interest. Beethoven's Third Rasoumowski Quartet, led by Madame Néruda (Lady Hallé), in association with Mr. L. Ries, Herr Straus, and Signor Piatti, and Schumann's pianoforte trio in D minor, respectively opened and closed the concert; the other instrumental pieces of the evening having included three charming movements by Dr. A. C. Mackenzie (from his Op. 37) for violin, with pianoforte accompaniment. Miss Fanny Davies was the solo pianist, her chief performance having been in Beethoven's series of variations in E flat, in a theme from his "Eroica" symphony. These were very artistically rendered by the young lady pianist, who also sustained the principal part in Schumann's trio. The names of the executants in each case sufficiently indicate the merits of the performances. The vocalist was Miss Liza Lehmann, who sang Bach's air, "Willst du Mein Herz?" and two songs of her own composition, with much refinement.

THE ACCIDENT TO THE EMPEROR OF RUSSIA'S TRAIN ON THE AZOV RAILWAY.—FROM PHOTOGRAPHS.

CAPTURED EAST AFRICAN SLAVES AT ADEN.

THE PARNELL INQUIRY COMMISSION.

Our Artist has made further Sketches in the Court of Inquiry held by the three Judges, Sir James Hannen, Mr. Justice Day, and Mr. Justice A. L. Smith, the Special Commissioners appointed under an Act of Parliament to investigate the "charges and allegations" set forth by the *Times* against Mr. Parnell and other Irish members of Parliament connected with the Irish Land League and the Irish National League. The proceedings on Thursday and Friday, Nov. 8 and Nov. 9, were of painful interest, from the appearance as witnesses of several widows whose husbands were murdered by the "Moonlighters" and other agents of the system of agrarian terrorism, and whose sad tales were heard with deep sympathy. One was Mrs. J. H. Blake, of Rathville, near Loughrea, Galway, wife of the agent of Lord Clanricarde, killed in her presence on June 29, 1882; she described how three shots were fired, wounding herself and a servant, and killing Mr. Blake, on the car, and how he lay dead on the road, weltering in his blood, while the people refused to help her. The portraits of three other victims' widows, Mrs. Connors and Mrs. Dempsey, whose cases have been noticed, and Mrs. Lyden, whose case was again referred to in the examinations of other witnesses on Tuesday, Nov. 13, will be found among our Sketches; Lyden was shot, by order of a Land League meeting, for herding cattle on a farm from which a tenant had been evicted. We have not space to describe the evidence given by the numerous witnesses, including three "boycotted" landlords, a sergeant and several constables of the Royal Irish Constabulary, and some farmers and labourers, who had acted with the Land Leaguers or the Fenians, besides Mr. Chester Ives, the special correspondent of the *New York Herald*, who was mentioned last week.

THE RAILWAY ACCIDENT TO THE EMPEROR OF RUSSIA.

The accident that occurred on Oct. 29, near Borki, in South Russia, to the Imperial special train by which the Emperor and Empress, with their children, were travelling homeward from the provinces around the Sea of Azov, was related last week. It occasioned the loss of nearly a dozen lives, and thirty or forty persons were seriously injured, but their Imperial Majesties and the members of their family were unhurt. Two further Illustrations of this disaster are now presented. One is a view of several of the carriages fallen over the left-hand side of the embankment, with a piece of the rail twisted into a sharp curve and lifted above the bed of the railway. The carriages seen in this Sketch are those of Baron Possiet, the Minister of "Ways and Communications" (including railways), the van conveying workmen and materials for repairs to the train, if needful; the van containing the electric light apparatus for the train, with some of the luggage; these carriages preceded the two engines, which were placed together in the middle of the train. One of the engines, decorated with branches of trees and wreaths of foliage, is seen in this Sketch, thrown off the rails, with an engine-tender behind it. The remaining portion of the train is delineated in the second Sketch; it begins with the other engine and tender; there is a van with electric wires, a locksmith's workshop van, a travelling kitchen, a buffet for refreshments, a dining-saloon (in which the Emperor and Empress were at the time), and last came the saloon carriage for the Imperial Princes and Princesses, the saloon carriage for the Emperor and Empress, and one for the Czarewitch. Some of these carriages, it will be seen, were thrown off the rails, and partly down the embankment, while others continued in their right position, which may have been owing to their weight. They did not get lifted on the top of each other, as happens so often in these disasters. But there is no doubt that the rails, which were in bad repair, gave way at first under the carriage of the Minister of State who was officially responsible for the management of all the railways in Russia; and Baron Possiet, as well as the director of this particular line, has incurred the penalty of dismissal. The Emperor and Empress exerted themselves personally on the spot, with great zeal and tenderness, in the relief of their unfortunate fellow-passengers maimed or crushed by this accident; and their Majesties have taken care to provide for those left destitute among the families of the persons killed.

A LITERARY LODGE OF FREEMASONS.

On Thursday, Nov. 8, being the festival of the "Quatuor Coronati," or Four Holy Crowned Martyrs, in the Roman Calendar, the lodge of that name, under the registry of the Grand Lodge of England, met at Freemasons' Hall, for the purpose of installing the new Master and inducting the other office-bearers. The Master-elect, who was Mr. William Simpson, the well-known Special Artist of *The Illustrated London News*, was duly placed in the chair of King Solomon, by the retiring Master, Mr. R. F. Gould, and afterwards invested his subordinate officers. The lodge of the "Quatuor Coronati," which takes its name from the legendary saints of the building trades, was established in 1884; but owing to its first Master, Sir Charles Warren, having been sent to South Africa on military duty at the close of that year, the actual commencement of its Masonic labours only dates from January, 1886. The object of the founders was to provide a centre and bond of union for students of Freemasonry, and its progress has already far outstripped the modest expectations of the little band of authors and artists, for whose fraternal association it was called into existence. At the end of the first year of real work it was decided to establish, under the name of the "Correspondence Circle," a literary society, in close and intimate connection with the lodge. The numbers of the association have increased from 155 to nearly 450 in the past twelvemonth. No persons are admitted to the full membership of the lodge without a literary or an artistic qualification, but this restriction does not extend to the outer or "correspondence" circle. Papers are read at all the meetings, which are printed in the "Transactions" of the lodge. The "Quatuor Coronati" have an admirable treasurer in Mr. Walter Besant, and Mr. G. W. Speth is the indefatigable secretary.

Miss Amelia B. Edwards has been lecturing on Ancient Egypt in the Midlands, in the North of England, and in Scotland.

Mr. John Boyd has been elected Lord Provost of Edinburgh, in room of Sir Thomas Clerk, who retired at the close of the three years' term of office. Mr. Boyd has been a member of the Council for about twenty-five years, and has filled the offices of bailie and treasurer.

The Glasgow International Exhibition was closed on Saturday, Nov. 10, the total number of visitors on the closing day being 117,901. Since the Exhibition was opened, on May 8, by the Prince and Princess of Wales, the visitors have numbered five million and three-quarters. A sum of £120,000 was taken at the gates, besides £15,000 drawn from season-tickets. There is a surplus of £40,000, which will probably be used for promoting art and science in Glasgow.

"MANY A SLIP BETWEEN THE CUP AND THE LIP."

The experience of most of us has often confirmed the truth of this proverb among the various unforeseen accidents besetting all human plans and hopes. It is not uncommon to see the simplest and most innocent purposes suddenly disappointed, and frequently by the unjust intervention of marauders or defrauders seizing that which is just about to be rightfully bestowed on another. This is the temporary misfortune of the child's favourite dog, with his saucer of milk which is unhappily broken, and its contents greedily lapped up by two canine intruders, leaving the child, as well as the bereaved pet Doggy, to mourn over its loss. They have not sufficient courage or strength to drive away those unlicensed devourers of the spilt milk, which might otherwise serve the turn in spite of the ruin of the saucer. The child may, perhaps, be also in some fear of disgrace, on returning to the house, for carelessness in the use of a fragile vessel which was of greater value than the milk. But it is to be hoped that the kitchen or dairy store can yet supply a fresh allowance, under safer guardianship, to satisfy the lawful wants of the dog for which this customary benefit was properly intended.

OBITUARY.

THE EARL OF LUCAN.

Field Marshal Sir George Charles Bingham, third Earl of Lucan, Baron Lucan of Castlebar, and a Baronet of Nova Scotia, Colonel 1st Life Guards, Lord Lieutenant of Mayo, a Representative Peer, died Nov. 10, in his eighty-ninth year. He was eldest son of Richard, second Earl, by Lady Elizabeth Belasyse, his wife, daughter and co-heir of the last Earl of Fauconberg. He entered the Army in 1816, and attained the rank of Major-General in 1851. In the Crimean War he commanded the Cavalry Brigade, and received several distinctions, viz.: Medal with four clasps, the Grand Cross of the Bath, the Legion of Honour, the Medjidieh, &c. He became Lieutenant-General in 1858, General in 1865, and Field Marshal in 1887. His Lordship married, June 29, 1829, Lady Anne Brudenell, daughter of the sixth Earl of Cardigan, and by her (who died April 2, 1877) had issue, two sons and four daughters. The eldest son, George, Lord Bingham (born in 1830, and married to Lady Cecilia Catherine, youngest daughter of the fifth Duke of Richmond, K.G.), succeeds as fourth Earl of Lucan.

We give a Portrait of the late Earl of Lucan, from a photograph by Messrs. Maull and Fox.

MR. COMPTON FERRERS.

Mr. Compton Gerard Ferrers, male representative of the great house of Ferrers, and senior coheir of the barony of Ferrers of Chartley, died on Nov. 6 at 78, Cadogan-place. He was born, May 12, 1818, the third son of the late Mr. Edward Ferrers, of Baddesley Clinton, in the county of Warwick, by Lady Harriet Anne, his wife, second daughter, and eventual coheiress of George, second Marquis Townshend and sixteenth Lord Ferrers of Chartley. He succeeded his brother, Marmion Edward Ferrers, of Baddesley Clinton, in 1884.

HON. MRS. CAULFEILD.

Hon. Annette Caulfeild, younger daughter of Richard, third Lord Castlemaine, and wife of Colonel James Alfred Caulfeild, of Dramcairne, county Tyrone, Comptroller of the Household of the Lord Lieutenant of Ireland, died at Dublin Castle on Nov. 10. The death of this estimable lady is deeply deplored. Her marriage was on Feb. 2, 1858, and its issue one daughter, Constance Elizabeth, now Countess of Ranfurly.

We have also to record the deaths of—

The Rev. James Campbell Home, A.M., for forty years Vicar of Rawcliffe, Lancashire, recently, at Chester.

Mr. Arthur Willmore, landscape engraver, on Nov. 3, aged seventy-four. He was one of the last and best of our line-engravers.

The Palestine Exploration Fund Committee have just received the sum of £500, left to them by the will of the late Robert Mackay Smith, Esq., of 4, Bellevue-crescent, Edinburgh.

Two stained glass windows (executed by Warrington and Co.) have been placed in Lancaster parish church as a memorial to the late Mr. J. P. Chamberlain Starkie.

The Royal Geographical Society opened their winter session on Nov. 12, when Mr. H. H. Johnston, Vice-Consul for the Oil Rivers District, read a paper on the Niger Delta, which was illustrated by numerous dissolving views.

At a conference of the National Fruit-Growers' League, held in the Memorial Hall, Farringdon-street, on Nov. 12, a resolution was unanimously adopted calling upon the Government to give facilities for the establishment of small fruit gardens.

Two important meetings were held on Nov. 12 in the East of London—one at the Limehouse Townhall, presided over by the Archbishop of York; and the other at St. Bartholomew's Hall, Dalston Junction, under the presidency of the Archbishop of Canterbury—in support of the missions of East London. The necessity of increased activity in religious work among the poor of the district, and the importance of enlisting lay assistance were strongly urged by the various speakers, who included, as well as the two Archbishops, the Bishops of Wakefield and Bedford.

An important addition is about to be made to the bibliography of wood-engraving by Mr. W. J. Linton, who is preparing a work to be entitled "The Masters of Wood-Engraving," and which purposes to occupy new ground. While giving an ample account of the books in which wood-engraving has been used, and carefully sifting old judgments through technical knowledge, it also undertakes a history of the art by exhibiting the choicest works from the earliest times. To accomplish this purpose the Library and Print-room of the British Museum have been thoroughly searched for the purest impressions, from which photographs have been taken for re-production by the best facsimile processes. To these will be added copies from unique proofs in the author's possession, the whole forming a collection hitherto unattempted. It will be limited to an edition of 500 copies, signed and numbered, issued to subscribers only. A further edition, on larger paper, of 100 copies, will include such large works as Dürer's "Triumphal Car of Maximilian." As Mr. Linton is himself one of the "Masters of Wood-Engraving," and also an accomplished author, the work cannot fail to be of the highest value and interest.

THE CANADIAN PACIFIC RAILWAY: BANFF.

Our description of the line which crosses the whole breadth of North America, from the Atlantic ports to the Pacific, within British territory, left off at Calgary, of which new town a Sketch by our Special Artist, Mr. Melton Prior, was published last week, along with those of other places, in Manitoba, and on Lake Nipissing, in the long journey westward from Ottawa and from Montreal. The next place deserving of notice, after Calgary, is Banff, situated on the eastern side of the Rocky Mountains and forming the station for the Canadian National Park. This place abounds in medicinal springs, and in addition to the cottages and small hostelries that now exist, the railway company is building a very large and well-appointed hotel, which will offer first-class accommodation. The National Park is 260 square miles in extent, embraces every variety of scenery, and is made accessible by numerous roads and bridle-paths, constructed by the Government at large expense. The rivers and lakes are full of fish, and the forests of game. The average altitude of the valley, which fills most of the park, is 4500 feet, and roads have been built northward to Devil's Lake, a very deep piece of water, hemmed in by precipitous cliffs, and by the Devil's Head, an immense and abrupt peak, so lofty as to be seen far out upon the eastern plains, towering above all the other mountains in its neighbourhood.

Banff is 4200 ft. above the sea, but nestled among mountains rising over 5000 ft. above the hotel, often with snow on their summits and far down the sides of the deep gorges. The sanitarium is on the bank of the Bow River, a stream over 400 ft. wide, of crystal clearness, slightly whitened by glacier water. This river under the hotel breaks through walls of rock 200 ft. high, forming a succession of cascades or rapids 60 ft. in fall, within 140 yards. The views of the snow-clad mountains, the river, the cascades, and whirling pool below makes the situation of the hotel one of the finest ever seen. Trout abound in the river of all angling sizes. A lake-trout was brought in from Devil's Lake, twelve miles off, weighing forty-three pounds. We shall give several Illustrations of the Hot Springs and Sanitarium at Banff.

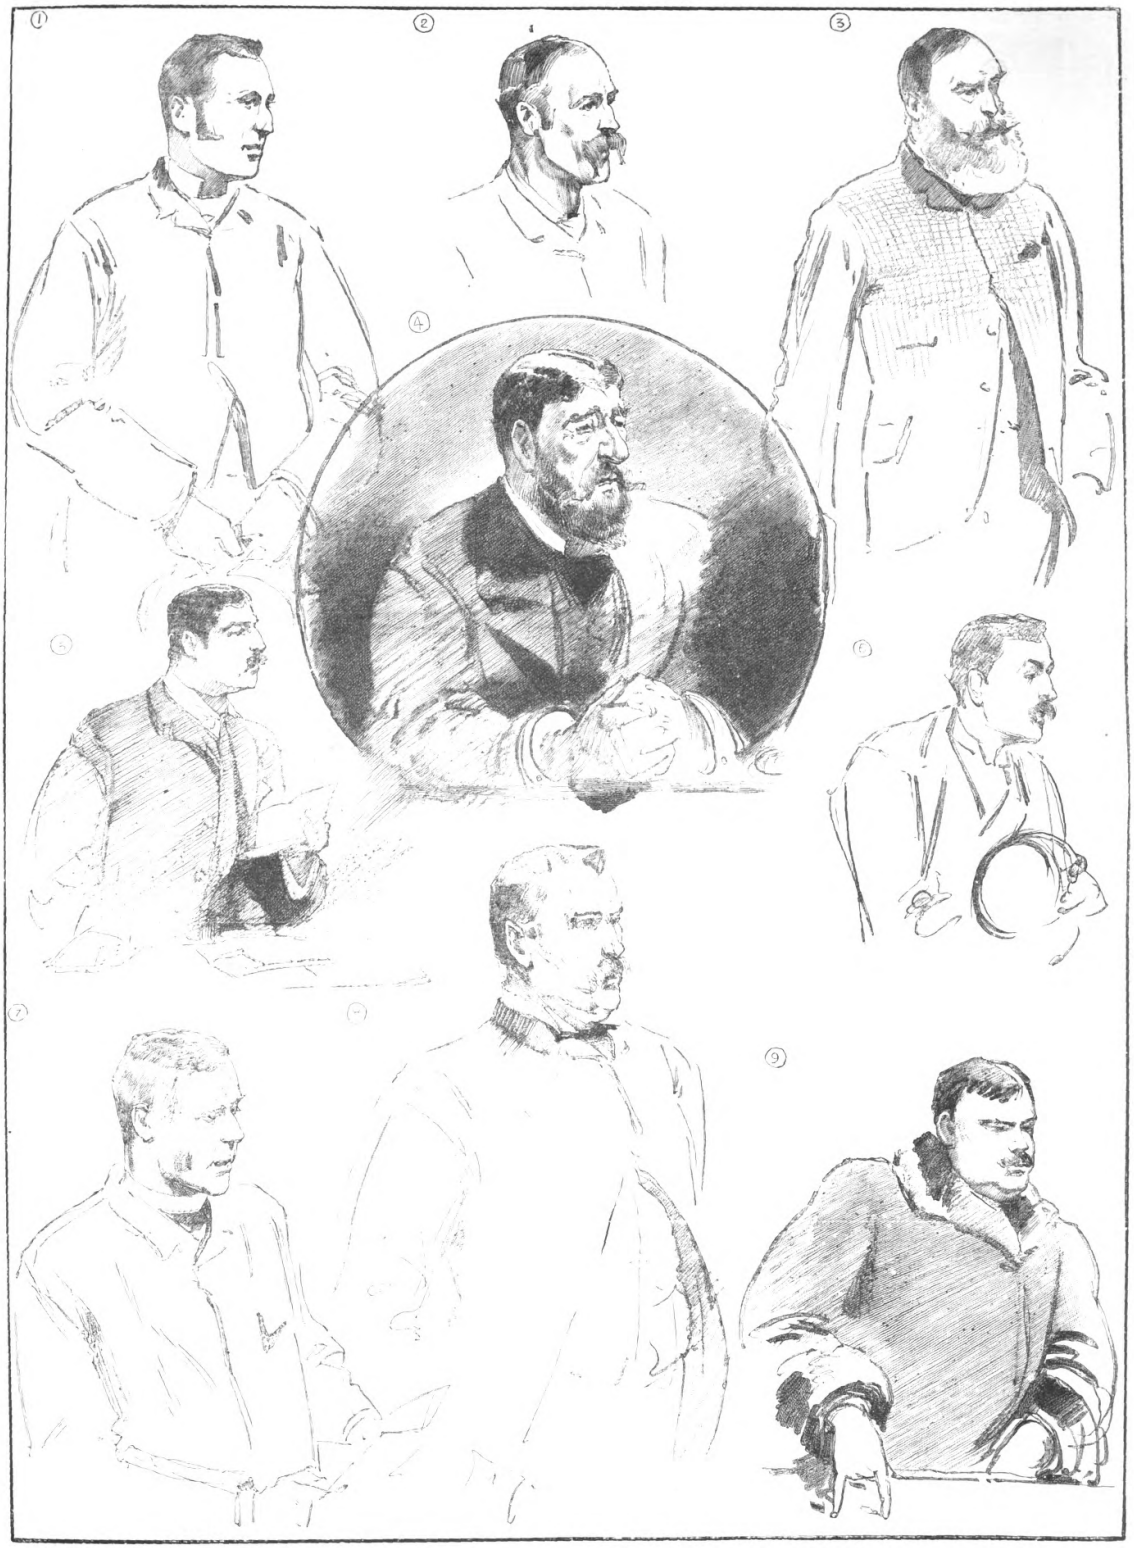
CAPTURE OF SLAVE-DHOWS NEAR ADEN.

The Arab slave trade on the East Coast of Africa is now exciting the attention of several European Governments. We are indebted to Mr. Herbert E. Dudley for a Sketch of a scene at Aden, consequent on the activity of a British cruiser, H.M.S. Osprey, sloop, Commander E. Gissing. On Sept. 15, while on a cruise, the Osprey sighted Mocha, and boarded a small dhow that had been sent from Assab Bay by the Italians to Mocha, for fruit. She then stood up the coast to the north until night, when she turned round and came down slowly, at a distance of about eight miles from the land. At daybreak next morning, the Osprey sighted three dhows ahead, and immediately went in pursuit of them. On getting within range, a gun was fired from the sloop as a signal to the dhows to stop and submit to examination. No notice was taken of this; but the dhows crowded on more sail and endeavoured to escape. A well-aimed shot at the mast of the largest of the three dhows speedily brought her up. By this time the other two dhows were nearly a mile ahead and widely separated, so that the capture of both was by no means easy. But a fortunate shot through the sail of the nearest resulted in her soon being made a prisoner; then the Osprey went in pursuit of the third dhow, and eventually captured her. Taking the last two in tow, her Majesty's sloop steamed back to the first of the dhows. On search being made it was found that the three dhows contained over two hundred slaves, male and female, the larger proportion being Christians from Abyssinia. The prizes were towed to Aden, where the vessels were condemned and the slaves were taken charge of by the authorities.

The Duke of Wellington has consented to become a vice-president of the Royal Westminster Ophthalmic Hospital.

On the evening of Nov. 10 the first through express-train from Paris arrived at Constantinople.

An exhibition of the iron and metal trades is open at the Agricultural Hall, Islington.



Sir Charles Warren has resigned the Chief Commissionership of the Metropolitan Police, to which he was appointed in March, 1886, in succession to Sir Edmund Henderson.

During October the officers of the Fishmongers' Company seized and destroyed at Billingsgate and on board boats lying off that place 76 tons 6 cwt. of fish as unfit for human food.

Lord Lytton, who was elected about a year ago to the Office of Lord Rector of Glasgow University, delivered his rectorial address on Nov. 9. The subject was the principles of action with which Diplomacy was concerned, and his Lordship said that never within his recollection had the peace of Europe been maintained under conditions more onerous than those which now imposed upon its leading States an unrelaxed development of the machinery of war. Five Continental Powers maintained 12,000,000 of fighting men, costing annually 112,000,000 sterling. War was, therefore, sudden and gigantic, having decisive and far-reaching results. Therefore our safety depended upon prudent moderation in our international relations.

The resumption of Mr. John Boosey's "London Ballad Concerts" at St. James's Hall, on Nov. 21, will be welcome to the many who appreciate excellent performances of vocal music—solo and choral—interspersed with violin or pianoforte pieces, rendered by eminent artists.

The opening concert of the Royal Choral Society at the Royal Albert Hall (the inauguration of the eighteenth season of the institution originally known as the Royal Albert Hall Choral Society) has already been briefly mentioned. Mozart's sacred masterpiece, the expiring effort of his genius, the immortal "Requiem," and Rossini's "Stabat Mater," were, as already said, the works performed on the occasion referred to. It would be scarcely possible to find two compositions, each a production of high genius, more opposite in style and treatment. Elevated sublimity is the prevailing characteristic of Mozart's work, while the other is conceived in a more florid style of luxuriant melody in consonance with the most sensuous nature of the surroundings of the Roman Catholic service, to which, indeed, both compositions belong. The vocalists at the concert now referred to were, in the "Requiem," Madame Albani, Madame Scalchi, Mr. E. Lloyd, and Signor Del Puente; the first and third of whom were especially efficient; the same praise being due to the same artists for their performance in the "Stabat," the co-operation of Madame Scalchi in which—particularly her share with Madame Albani, in the duet "Quis est homo"—having resulted in a remarkably fine rendering, on both parts, of that beautiful movement. Another specialty was the magnificent singing of Mr. E. Lloyd in the tenor solo, "Cujus animam." Mr. R. Hilton was very efficient in the bass music of the "Stabat." The choral performances throughout the evening were of the same exceptionally high character as heretofore. Mr. Barnby conducted, and Mr. W. Hodge presided ably at the organ.

AFTER THE BATTLE.—DRAWN BY E. MICHEL.

OUR DESERTED VILLAGE.

Cooped up in London, with the dull, dead leaves drifting about the melancholy squares; with no kindly sun putting in an appearance until long after midday; with a dense canopy of grey mist overhead and the wood pavement greasy with black mud underfoot, how should anyone know of the turquoise-blue sky, of the exhilarating atmosphere, of the quiet, waveless sea, the leaves, the flowers, and the delicious restfulness that prevail in our deserted village? No; we are not at the Riviera, or in Devonshire, or in the Isle of Wight: it is not even mid-summer, or mid-autumn, and we have long since passed the little summer of St. Martin; but here I am, on a lovely November morning, sitting writing at an open window—the sun shining brilliantly, the sea sparkling, the birds singing in the green plantation bordering the cliff over the way, the place surely one of the healthiest in all England—the distance an easy two hours from Holborn Viaduct. You will never believe it when I tell you that our deserted village is within a stone's throw of merry Margate; that it nestles down in a secluded corner of the Island of Thanet; and that now, just because the season is over, because the accepted holiday-time is past—though spring never gave such soft breezes, or summer such sun, or autumn such beauty of foliage—the place is as silent as the grave, the cliffs are as deserted as the Island of Sark, and the streets as empty as those of ancient Sandwich round the corner of this white-cliffed coast. Never yet this year has the sea been warmer or more tempting to the bather; the grass on the lawns of hotels and bungalows is as smooth and undisturbed still as if it had been gone over religiously by the garden-roller; but the tennis-nets have been taken up and the players have gone home. The weather is far more suitable for cricket now than it ever was in the past disastrous summer, with its storms and torrents of rain; and the boys, if they had their own way, would soon pitch the wickets again in the green fields and grassy commons, and reserve football and hockey for the winter of the future, when there is a grip of frost in the air and the east wind has some bluster in it.

A sense of life and exhilaration pervades the place. A sunny smile comes into the pale wan face of the invalid, who is wheeled out every morning to enjoy the sunshine among the arbutus and laurustinus that have been planted in warm dells on the sea-front; the girls—a few of them are still left—toss aside their furs and capes and boas with disgust, and loathing, as they settle down in easy corners, in glass shelters, or on exposed benches to enjoy the companionship of an interesting novel or a lady's newspaper; and only to-day, as I was pottering about the pretty shops that abound at the seaside, a youngster rushed past me at full speed, racing like a young greyhound, so overflowing with the delicious air and the sense of life that he shouted to himself as he passed by, "By Jove, isn't this bracing!" Luckily, our celebrated Mr. Jackson, the dandy horseman who wears a white hat and a rose in his button-hole in honour of this exemplary autumn, does not close his stables or curtail his establishment because November has come and it is currently supposed that the gaiety of the year is over. Not a bit of it. He does not follow the lead of the bathing-machine proprietors, or the boatmen, or the owner of the sea and swimming baths; he takes his cue from the sunshine and the glorious winter weather, and personally provides the only excitement that is now known in our village. If the men do not think it worth while to come down and follow the Thanet harriers, and honestly think it is too hot for hunting when an overcoat is an incumbrance, the girls are ready to trot over to Minster, or make headway for Herne Bay or the Reculvers, or gallop past the pretty farm-houses on the road to the romantic Ville of Sarre; and there is always a smart dog-cart or a light buggy ready for an expedition, should anyone want it, to visit distant Canterbury, lunch at the Rose Inn, and so home in the lovely light of a primrose and orange sunset.

If you have not guessed where our village is, or what it is, or all about it, you may just as well know. Founded some years ago by a celebrated doctor, this neighbour of the most rollicking seaside resort in all England, as much a stranger to jetties, and halfs-by-the-sea, and sing-songs and music-hall freedom and such-like fun as one place can be from another, as pretty as a child's box of Dutch toys, and as soothing as Clovelly, this charming hamlet known as "Westgate-on-Sea" is surely the haven of rest for those who work with the brain and desire occasionally to purge the lungs from the smoke and the dirt that life in modern London inevitably provides them with in black abundance. I have seen Westgate grow and grow from a row of bungalows into the compact little colony that now fronts the healthiest sea-board that can be found "round about the islands." Long before Westgate was the place it now is—long before Royal Academicians came down here to build studios in a north light that makes them chuckle over their friends who pride themselves on the purity of Hampstead, Kensington, Campden Hill, and St. John's Wood; long before great men of science, astronomers, and authorities learned on that heavenly body, the sun, left Wimbledon and London in despair, and chose Westgate as a fitting spot to put up their big telescopes and pursue their observations without an intervening obstacle of foul fog and coal smoke, I knew something of the origin of "bungalow-land"; but the wildest enthusiasts who knew Westgate, then in its primitive state, could scarcely have believed that the idea of its founders would have been so faithfully followed even to completion. Why is it that I am always so reminded of a child's box of toys when I wander about this pretty collection of fantastic villas, white wooden balconies, olive-green barge-boards, fanciful finials, and odd graceful architectural devices with which Westgate abounds? Out of Holland there is surely no cleaner place in the wide world. The balconies and gates and red tiles and white window-sashes look as if they were carefully washed with soap-and-water every morning. The shops might have been constructed for an elaborate doll's-house. An edict seems to have gone forth that no inhabitant may leave scraps of paper blowing about the white streets under pain of banishment. All the wandering leaves are swept up so as not to make any litter on the spotless roads. And now, to make all complete, they have planted a doll's-shrubbery, with ornamental paths, and undulating dells, and in-and-out corners, and leafy surprises, where it will be warm and sheltered in mid-winter, even if the north-east wind blows hurricanes hard over the village of villas.

Westgate, like every other seaside resort, has its times and its seasons. Summer sends up its prices to extravagant sums; winter reduces them to zero. But how is it, I wonder, that people who can afford to be luxurious pack up their traps and are off to the sanitary-doubtful Riviera—with its wearisome journey, its false fashion, and its occasionally murderous winds—when, on such a past October, and at the beginning of such a lovely November, they can find, but two hours' from London, warm blue mornings, mellow and yellow afternoons, and soft purple nights, that cheer the depressed, and give animation to the most jaded spirit? In the morning, a bath of sunshine; in the afternoon, a ramble among the homesteads; at night, a rest that can only be obtained when the roar of restless London is miles away, and nothing is heard but the low music of everlasting waves upon the sandy shore! C. S.

"AFTER THE BATTLE."

The war between France and Germany, eighteen years ago, left memories of stirring actions, and of sadness, of death, of suffering, and of desolation, in so many hearts of both nations, that it is natural still to meet with the works of foreign painters representing scenes occasioned by that great military contest. A pathetic effect is that rendered by M. Michel, in the picture of a quiet woodland nook in the grounds of a rural mansion, where a dead soldier lies, alone and unheeded, having been slain in one of the pursuing skirmishes that are apt to follow a desperate defeat, the body of troops to which he belonged having been scattered for miles over the country, and some of them, in all likelihood, slaughtered or left wounded on the roads or in the fields. Warlike pride may be rebuked by the sight of such a pitiful relic of mortality, abandoned in the silent evening hour, when the fury of combat has passed; a thought of sympathy may be given to his parents and friends in a distant village, who will long be awaiting news of one whom they loved. They will, in all likelihood, never receive an exact account of the manner and the place in which he fell; only that his comrades lost sight of him, and that his fate could scarcely be doubtful. Such sorrowful examples are to be multiplied by tens of thousands in a campaign of a few weeks: the sum of them, added to the huge carnage of celebrated battle-fields, makes up the tale of reputed glory, to the renown of Princes, Statesmen, and Generals, to the misery of the people, and to the exhaustion of the resources of peaceful industry by the cost of immense armies maintained for political rivalry and ambition.

LORD MAYOR'S DAY.

The Civic procession, on the installation of the Lord Mayor, was this year of small proportions, and there was less crowding in the streets than usual. His Lordship was presented by the Recorder to the Lord Chief Justice, Mr. Justice Cave, and Mr. Justice Grantham. Lord Coleridge heartily welcomed Alderman Whitehead, the new Chief Magistrate of London, in the name of the Judges. The Lord Chief Justice remarked that the Courts of Law and the Courts of the City of London had been legally severed; but he expressed an earnest hope that the good feeling which had so long subsisted between the Judges and the Corporation would remain as firm and unbroken as ever.

Lord Salisbury was the principal speaker at the banquet which was given at the Guildhall in the evening. After remarking that Parliament had been compelled to sit on Lord Mayor's Day for the finishing of its ordinary business, he alluded to the approaching elections to the County Councils, a great experiment, which could only be successful by the leaders of the community bringing labour and intelligence to the work. With respect to foreign affairs, there was not, on the surface, much to notice. All those who were charged with the duty of ruling in Europe had an earnest desire to keep the peace. A European war was a terrible hazard, and there was a general impression that in the midst of so much preparation as was exhibited on the Continent, England must not remain unprepared.

Some 3000 of the poorest inhabitants of Whitechapel were, through the generosity of the Lord Mayor (Mr. Alderman Whitehead) and several influential residents at the East-End, invited to the Great Assembly Hall, Mile End-road, where they were liberally regaled with a meat tea, and where a miscellaneous entertainment had been provided for them. The Lord Mayor sent £100 towards defraying the cost, while Mr. Sheriff Newton contributed £50.

HEALTH OF THE PORT OF LONDON.

A report upon the sanitary condition of the Port of London during the six months ending June 30, 1888, has recently been presented to the Corporation by Dr. Collingridge, the medical officer of health for the port. During the half-year 9693 vessels have been visited, and of these 8524 carried the British flag: the next nationality in point of numbers being the Scandinavian, with a total of 422. By far the larger number of these vessels were found to be in a satisfactory sanitary condition, and in only 676, or 6·9 per cent, was it necessary to order cleansing to be carried out. The report contains a detailed account of an outbreak of scarlet fever on the London School Board training-ship Shaftesbury (during which sixteen cases were removed therefrom to the Port Sanitary Hospital), and suggests some important precautionary measures for the future health of the ship. Dr. Collingridge calls attention to the imperfect hospital provision at Gravesend. "The existing wards, excellently constructed as they are, do not give sufficient accommodation for the separation of different varieties of disease." He urges that it is wrong to place smallpox under the same roof as any other disease, and that it is absolutely necessary that another ward should be erected at a safe distance, to be used for smallpox patients only. The total amount of mutton condemned during the half-year amounts to 73,391½ stone, being 1·4 per cent of the whole importation through the docks. Of beef, only 512 sides were condemned; 371 canal-boats have been inspected, and these, although registered for a population of 1313, carried only 952 persons on board. The report makes mention of improvements made in the sanitary condition of Canvey Island, and attention is called to the need of a good artesian well for public use. During the half-year the Port Sanitary Hospital received twenty-three cases.

Mr. J. Broughton Edge has been appointed Judge of County Courts, Circuit No. 58, in Devonshire.

The Archbishop of Canterbury has become a benefactor of the Clergy Pensions Institution, Mowbray House, by contributing £100 to the Augmentation Fund.—Lord Grimthorpe, Mr. W. H. Smith, M.P., and Mr. Henry Hucks Gibbs have made similar contributions.

At the weekly meeting of the Metropolitan Board of Works on Nov. 9, Lord Magheramorne was, for the last time, elected chairman of the board, and said he would do his best to hand over the government of the metropolis to the new County Council with their organisation in good working order.

The first meeting of the Royal Botanic Society since the recess was held on Nov. 10; Mr. J. P. Gassiott, vice-president, in the chair. Among other exhibits upon the table were plants of *abrus precatorius*, the so-called "weather-plant." The secretary, in explaining the action of the plant, said he could not do better than quote the late Michael Faraday, who, during a lecture on "Table-turning," remarked that effects noticed were incorrectly attributed to a certain cause. Thus the movement of the table was ascribed to some mesmeric influence rather than to the unconscious mechanical act of the operators: and thus the action of the weather-plant was put down to atmospheric or other influences at a distance of time or place, rather than to that of the immediate habitat in which the plant might be at the moment. The behaviour of the weather-plants in the society's gardens varied at one and the same time according to the special conditions under which they were growing.

THE LADIES' COLUMN.

Children's hospitals appeal to the best feelings of charity. With regard to them, there can be no question of whether the sufferers should not have provided in health for their own hour of need, no fear of encouraging future improvidence, no suggestion that their illness comes from their own sins or follies. The patient eyes of a helpless child in pain are the most touching sight that can meet one's gaze in this world full of sorrow. No skill or care avails always to cure the pang, alas! we learn in our own homes by the sight of our own loved little ones in sickness. But cure is sometimes, and alleviation is generally, within the reach of the healing art; and how sad it is to think of thousands of little ones pining in pain in wretched homes for want of that aid!

The Children's Hospital in Great Ormond-street, London, has gained in funds by a special effort made in connection with the Queen's Jubilee. A children's fund was raised, to be applied, under her Majesty's sanction, to the purpose of building a new wing. The sum of £6000 was subscribed, and it is to be hoped that a considerable addition to this has been made by the happy thought of the Doll Show for its benefit. The show was held on Nov. 9 in a tent placed on the piece of ground designed for the new wing. Princess Frederica attended to distribute the prizes, and there was a large company.

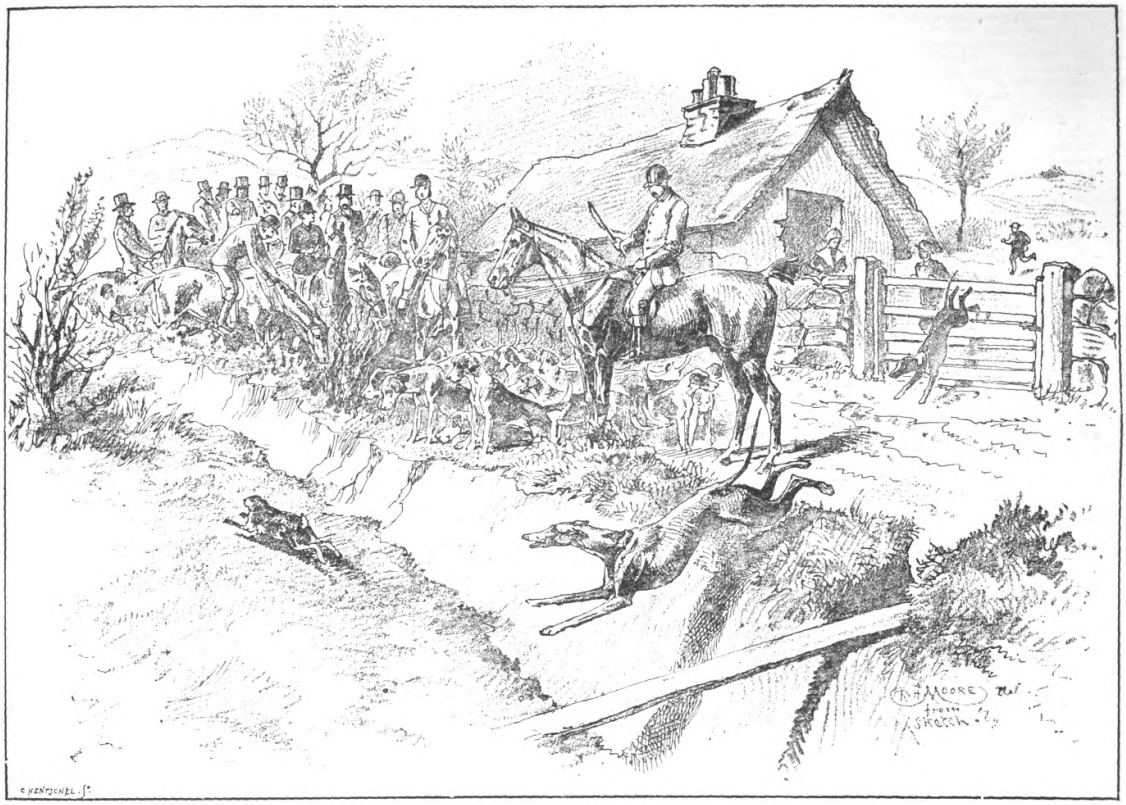
Dolls had been sent to the exhibition from the far ends of the civilised earth—given for the benefit of the charity by kind-hearted persons, for the prizes were few, and the exhibits were all on sale for the benefit of the hospital. From France, Germany, Italy, and America contributions had arrived. A great many dolls (according to an amusing essay by the hon. secretary of the show, Mr. S. Whitford, jun.) are manufactured in Germany, the eyes, however, coming from Birmingham, where orders are sometimes received for £500 worth of eyes at once. The sum spent on preparing these eyes is indeed very large; the material used for dresses alone in one district of Germany, where all the peasant women work at this business, is calculated at £16,000 annually. Some of the dolls in the show were very original. The first prize was given to an old lady for a most complete doll's wardrobe. There was an Arabian bedstead of considerable size, hung with dimity, and dressed with frilled pillow-cases and spotless white sheets and counterpane; even the night-dress case was not forgotten. Inside the bed reposed doliy, in full *toilette de nuit*. Around hung her dresses. There was her party dress, or demi-toilette, with front of white lace insertion run through with red ribbons and red silk pleated back, red shoes, Suède gloves, and long white cashmere opera mantle, trimmed with swan's-down. There was a full ball-dress of pale pink gauze, and there was a walking dress of blue cashmere, with a brown cloth jacket, a fur boa, and a black straw hat trimmed with brown gauze and ivy; a parasol, a jewel-box, and various articles of underclothing. This complete trousseau naturally carried off the palm. Another prize doll was dressed as a country carter, with a properly made linen smockfrock, grey knitted wool stockings, and regular "clod-hopper" boots of leather, laced. The nurses' competition was for dolls dressed in the various hospital uniforms, and very neat and pretty many of them looked. A little girl of eleven, Miss Phipps, won the children's prize for a Bohemian peasant, in red dress and black satin apron; and two other prizes went to dolls all in white, one as a baby in long embroidered clothes and the other as one of about three.

There were much more original dolls than these on some of the stalls, however. There was an admirable eighteenth-century courtier, dressed entirely in knitted silk garments, which were formed with such perfection that the richest of materials could not have surpassed it in effect. He had a long-tailed brown coat with big and curiously-shaped revers, and trimmed round the fronts with a band of gold braid; a long-flapped yellow vest embroidered in flowers with green silk; brown "smalls" and stockings, a black three-cornered hat, and a white tie-wig. A curious couple were "Darby and Joan," made almost entirely of cotton wool. The faces were of this stuff, and it proved curiously capable of imitating the lines and texture of aged flesh. Joan's mob cap, white shawl with black bands, white apron, and black gown were all of the same stuff, the knitting and the pins in her hands alone being of any other material, and Darby was similarly constructed. A genuine big brown sabot formed a nest for "the old woman who lived in a shoe"; a window was cut in the front of the toe, and children clustered on the ledge thereof; a wooden ladder went up inside from the heel, and swarmed with tiny youngsters; and a tiny doll even looked out of the chimney. A Robinson Crusoe was there, all in white fur, cap included; and a black lady near him was clothed in the brightest of Arabian cottons. Some expensive musical and moving dolls were very handsome. Perhaps the best was one very smartly dressed in brocaded silk, with pink silk gathered front, and holding a basket, the lid of which she slowly lifted from time to time as her clockwork moved, when up from out of the basket rose and peeped in the most natural fashion the head of a tiny white dog, who crouched down again as the lid slowly descended once more. A French Marquis, in dove-coloured and pink silk, actually smoked away a cigarette, which he put to and removed from his lips regularly, humming a tune the while. A model Queen Elizabeth and a large complement of brides and ladies in Court dress were mixed with more ordinary costumes.

Princess Frederica performed her part in the ceremony with much dignity and grace. She is very tall and distinguished-looking, though unpretending in manner. She was quietly but well dressed, in a black cashmere gown with moiré Directoire sides, and a black lace tablier, over which fell a jet girdle from the heavily-jetted fitting undervest or plastron of a black plush mantle, which was further trimmed with skunk. H.R.H.'s bonnet was of red gathered crêpe, with aigrette of black Chantilly and black and red osprey, and red strings fastened with diamond pins. A diamond swallow brooch was also pinned into the back of the bonnet. A little boy patient presented the Princess with a bouquet, and the prize winners were then called up by the Secretary of the hospital to receive their awards, after which H.R.H. inspected the stalls.

It is curious to see how rapidly fashions spread, and how easy it soon becomes to obtain articles demanded by its decrees that a short time before were unprocurable. The Directoire style of dress carries all before it at present. Every noticeably handsome costume seen is made according to it. The beautiful big buttons which it requires are, therefore, now to be obtained readily; cut steel and fancy silver are most popular, but enamel and cloth inlaid with silver are also coming into use, and mother-o'-pearl, like old coachman's buttons, suits light materials. Feather boas are another novelty which has been quickly adopted. They are composed of what is called "clipped ostrich feather," which also constitutes a very fashionable edging for mantles. They look like what they are: undressed ostrich feathers with the tips of the fronds clipped. Bands of this kind of trimming encircle hats, whether beneath or above the brim, and occasionally the boa is allowed to take its rise at the back of the hat, thence being coiled two or three times round the throat. These articles are not expensive—under a guinea each for the best quality. FLORENCE FENWICK-MILLER.

CURIOUS INCIDENT OF STAG-HUNTING.



The Sketch by Lieutenant C. M. Gomme, R.H.A., represents an incident which happened last season while the Ward Union Hounds were going to the place where the stag had just been uncarted. A hare crossed the road in front of the pack, followed by a couple of greyhounds in close pursuit. The hounds, astonished at the novelty of the situation, first turned to look at the hare, and then started off in pursuit of the greyhounds; but they were quickly called to order by the huntsman, who at once brought them round, and laid them on the line of the stag in a very masterly manner.

ON THE PLEASURES OF BEING POOR.

In his charming essay on "Old China," Charles Lamb represents his "cousin Bridget" (the *umbra* or *eidolon* which stands for his sister Mary) as lamenting, in their latter days of competence, the good old times when they were not so rich, but, she is sure, considerably happier. "A purchase," she says, "is but a purchase now that we have money enough and to spare. Formerly it used to be a triumph. When we coveted a cheap luxury (and oh, how much ado I had to get you to consent in those times!) we were used to have a debate two or three days before, and to weigh the *for* and *against*, and think what we might spare it out of, and what saving we could hit upon that should be an equivalent." These be words of wisdom. I, for one, am often inclined to think that the poor do not know when they are well off. They are too much given, I fear, to unchristianly feelings of envy, malice, and uncharitableness, because Dives rides in his carriage, and the wife of Dives gets her dresses from Worth; too much given to hanker after riches, though the divine and the moralist are always insisting on their inadequacy to make a man happy. They do not realise the pleasures of being poor—of course I do not mean poor with the poverty that starves in the street and dies in the workhouse, but poor as our wealthy neighbours count those unfortunates whose yearly income lies within a modest three hundred—poor, that is, with the poverty of thousands and tens of thousands in this England of ours, who, nevertheless, are not inscribed on any paupers' list, but pay rates and taxes, and present a decent face to the world.

One may be allowed to doubt whether the rich ever enjoy anything—even their riches. To value a thing sincerely you must first have experienced the want of it, and must have made some sacrifice to get it; when all the good things of life are poured out at your feet without any personal effort of your own, it is surely impossible to feel any pleasure in their ownership. 'Tis when your means are as limited as a Gascon's modesty, when you must prune here and pinch there before you can venture on the smallest purchase beyond your daily regulated expenditure, that you begin to appreciate the joy of possession. Kisses given cheaply are held lightly. The schoolboy who, with the self-denial of a Stoic, saves up a penny a week to buy a fearful pocket-knife—with six blades, a cork-screw, a corn-cutter, a button-hook, and a gimlet—learns to look upon it with a joy as intense as the young mother feels when first handling her new-born babe—with a joy unknown to the man who bids hundreds of pounds for a time-worn Elzevir, and scribbles in payment a cheque upon his banker. Here, then, is one of the pleasures of being poor. Almost everything you acquire brings with it a high satisfaction, because it has been acquired slowly and painfully; and, recalling the efforts you have made of self-denial, patience, and perseverance, you naturally invest the acquisition with the reflected glory of these most admirable virtues.

Let us suppose that you take a saunter down Regent-street, closely examining the shops as you pass along. What a world of speculation immediately opens before you! That diamond parure—how it would become your Kate! That Liberty silk—just the colour for her mother! That edition of Tennyson in morocco—how Alice would revel in it! Well, everything lies at your disposal (in imagination). All the contents of all the glittering windows are yours—for the time being; and you may decide to give away this to one friend and that to another with an entirely liberal hand—you have no occasion to stint your gifts when they cost you nothing; or you may compare them in quality and price with any standard you choose to set up—there is no possible let or hindrance: you are monarch of all you survey. And the best of it is, that you may occupy exactly the same position, and enjoy the same feast of imagination, to-morrow, and the day after, and every day; whereas your rich man can but buy once the thing he covets, and there's an end. Who does not see that the advantage lies with you, my friend? Day after day you enjoy the pleasures of imagination—of anticipation; you renew them as often as you look in the shop-windows; you see everything in a succession of new lights; you can change at will the disposal or distribution of your imaginary gifts, and all this without once putting your hand into your pocket. Lucky man! Even Cræsus could hardly buy up all the wares

THE HUNTING SEASON: AN INCIDENT WITH THE WARD UNION HOUNDS.

in the shops of Regent-street or Bond-street—yet they are yours to do as you like with—to plan imaginary surprises with them for those you love, to expend them in the myriad ways your fertile fancy may suggest.

Meanwhile, you are under no anxiety about their custody. All that responsibility is obligingly taken off your shoulders by the tradesmen who profess to be their proprietors or vendors. According to the old Latin proverb, the penniless traveller (*vacuus viator*) sings before the thief; and you may sing the newest song by Stephen Adams or from the last Savoy opera without fear of burglar, cracksman, magsman or garotter. The "gross inefficiency" of the London police, the defective intelligence of Scotland-yard, the hopeless incapacity of the Home Office—so eloquently demonstrated by the *Morning Jupiter* and the *Evening Juno*—shall not move you even to a momentary spasm. You need no "Griffiths' Safe," no "Chubb's Locks," no electric alarms, no loaded revolvers—you are "vacuus," happy man! and may sleep the sleep of the just. The diamonds and the Liberty silks, the gold plate and the exquisite crystal, the Oriental curtains and the Japanese vases—others are diligently guarding them, and they will all be on show again to-morrow for your behoof. Such, my friend, is the advantage of being poor.

Again; to quote one of those adages which combine "the wisdom of many and the wit of one," you can't eat your cake and have it. When a thing is once your own, the pleasure of anticipating its possession ceases. Cræsus buys the diamond parure, and it no longer interests him. You don't—and have the luxury of daily speculation as to what you will do with it when—yes, *when*—but as the sentence never completes itself you are provided with what is virtually an inexhaustible source of enjoyment! I believe the philosophers have decided that the pleasures of anticipation far surpass those of realisation. When a man is born rich, or—as brewer, contractor, money-lender, company-projector, and the like—has made himself rich, I can't for the life of me see what more he can *be* or *do*. He may grow richer, but the process has no novelty in it; whereas your poor man has always something to wait for and look forward to—has always the diversion that is to be got out of inventing channels for the expenditure of his riches if he ever possess them; and can invariably rely upon the resources of his imagination—for which he cannot be too thankful, since, when it fails us—

> We know not where is that Promethean torch
> That can its light illumine.

It may seem, at first sight, to count against the poor man that he has no stately mansion or fair demesne of his own; but then, you see, he can do what he likes with his neighbour's. He can (in imagination) put in a bow-window where the builder has inserted a square one, or add to the dignity of the elevation by a (supposititious) row of Corinthian pillars or an (ideal) architrave. He may plant an imaginary shrubbery where Lucullus has laid out a lawn, and construct a sunny terrace where Cræsus has built a range of ' bling. He can move Timon's villa (in fancy) to another site, and raise a luxurious summer-palace on the vacated ground. This imaginary kind of architecture costs nothing, and pleases immensely. He is free, moreover, to traverse noble parks—where the trees spread their leafy boughs to protect him from the ardent noon, and the lake shines like a mirror to enchant his gaze, and the deer lift their antlered pride to move his admiration—with the knowledge that he is much better off than their owners; for they cost him neither headache nor heartache—not a tremor of anxiety, not a twinge of conscience. "The misery of those that are born great!" cries Webster's Duchess of Malfi. "The happiness of those that live poor!" say I.

For no hungry relatives hunt you down to wheedle or bully you into giving them of your substance; no expectant heir calculates on the possible result of your next "chill" or latest "fad" in patent nostrums; no philanthropists undermine your happiness with proposals for regenerating humanity (at your expense); obsequious greed fawns not upon you, nor does fulsome servility disgust you with your fellow-men. Scandal leaves you alone; gossip does not trifle with your name and fame; no "interviewer" drags out of you your secret weaknesses. 'Tis true that at church you are shown into the draughtiest seat, that the churchwarden eyes you with apathy and the pew-opener with suspicion; but then, "the plate" passes you by, or if you drop into it a "drachma," there are none to comment upon the smallness of your alms. When you desire the pleasures of reading, there are free libraries at your command. If you wish for an evening with the Dramatic Muse, you can hear in the gallery as well as in the stalls, or some kind friend may send you "an order." Are you athirst for the Freemasonry of Nature? There are green lanes and breezy commons and leafy valleys which will admit you without fees or rites of initiation. The truth is, the world belongs much more to the poor man than to the rich; and the former holds his much larger share of it with a freedom from tribulation which the latter must surely envy. He can say with Horace, "Mea Virtute me involvo, probamque Pauperiem sine dote quæro," and it is good for him to be able to say it. So that if the reader will but consider the subject seriously and comprehensively, balancing advantages (*plus*) against disadvantages (*minus*), I have a conviction that he will acknowledge the wisdom of the American millionaire, who recently expressed his determination "not to die rich"; though, by-the-way, I have not heard that Mr. Carnegie is as sensible as one would wish him to be of "the pleasures of being poor!"

W. H. D.-A.

The Marquis of Salisbury has been elected High Steward of Great Yarmouth, in succession to the late Sir E. H. K. Lacon, Bart.

FOR FAITH AND FREEDOM.*

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIDEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER XXXVII.

BY THE WATERS OF BABYLON.

HUS delivered from the slavery of the fields, I began to work, an unprofitable servant, among those who made and mended the garments of the servants and negroes. On an estate so large as this there is always plenty to be done by the sempstresses and needlewomen. Thus, to every woman is given by the year four smocks, two petticoats, and four coifs, besides shoes which are brought from England by the ships. Those who wait in the house have, in addition, six smocks and three waistcoats. To the men are given six shirts; and to every man and woman a rug or gown of thick stuff to cast about them when they come home hot, so that they may not catch cold—a thing which throws many into a fever. All these things have to be made and mended on the estate.

As for the children, the little blacks, they run about without clothing, their black skin sufficing. The women who are engaged upon the work of sewing are commonly those of the white servants, who are not strong enough for the weeding and hoeing in the fields, or are old and past hard work. Yet the stuff of which the smocks and shirts are made is so coarse that it tore the skin from my fingers, which, when Madam saw, she brought me fine work—namely, for herself. She was also so good as to provide me with a change of clothes, of which I stood sadly in need, and excused my wearing the dress of the other women. I hope that I am not fond of fine apparel, more than becomes a modest woman, but I confess that the thought of wearing this livery of servitude, this course and common dress of smock, petticoat, and coif, all of rough and thick stuff, like canvas, with a pair of shoes and no stockings, filled my very soul with dismay. None of the many acts of kindness shown me by Madam was more gratefully received than her present of clothes—not coarse and rough to the skin, nor ugly and common, befitting prisoners and criminals, but soft and pleasant to wear and fit for the heat of the climate. 'Twas no great hardship, certainly, to rise early and to sit all day with needle and thread in a great room well aired. The company, to be sure, was not what one would have chosen; nor was the language of the poor creatures who sat with me—prison and Bridewell birds, or negro slaves—such as my poor mother would have desired her daughter to hear. The food was coarse; but I was often at the table (when the master was away), and there Madam would constantly give me something from her own table, a dish of chocolata (rightly called the *Indian nectar*) made so thick and strong that a spoon stands upright in it, or a glass of Madeira, if my cheeks looked paler than ordinary. In this country the great heat of the air seems to suck out and devour the heat of the body, so that those of European birth, if they are not nourished on generous diet, presently fall into a decline or wasting away, as is continually seen in the case of white servants, both men and women, who die early, and seldom last more than five or six years.

Briefly, Madam seemed to take great pleasure in my conversation, and would either seek me in the work-room or would have me to the house asking questions as to my former life. For herself, I learned that she was born in Cuba and had been brought up by nuns in a convent; but how or why she came to this place I knew not, nor did I ask. Other gentlewomen of the island I never saw, and I think there were none who visited her. Nor did she show kindness to the women servants (except to myself), treating them all, as is the fashion in that country, as if they were so many black negroes, not condescending to more than a word or a command; and if this were disobeyed, they knew very well what to expect from her. But to me she continued throughout to be kind and gracious, thinking always how she could lighten my lot.

In this employment, therefore, I continued with such contentment as may be imagined, which was rather a forced resignation to the will of the Lord than a cheerful heart. But I confess that I looked upon the lot of the other women with horror, and was thankful indeed that I was spared the miseries of those who go forth to the fields. They begin at six in the morning and work until eleven, when they come home to dinner: at one o'clock they go out again and return at sunset, which, in this country, is nearly always about half-past six. But let no one think that work in the fields at Barbadoes may be compared with work in the fields at home; for in England there are cloudy skies and cold wintry days in plenty, but in Barbadoes, save when the rain falls in prodigious quantities, the skies have no clouds, but are clear blue all the year round: the sun burns with a heat intolerable, so that the eyes are wellnigh blinded, the head aches, the limbs fail, and but for fear of the lash the wretched toiler would lie down in the nearest shade. And a terrible thirst (all this was told me by the girl Deb) seizes the throat, all day long, which nothing can assuage but rest. For the least skulking the whip is laid on; and if there be a word of impatience or murmuring, it is called stark mutiny, for which the miserable convict, man or woman, is tied up and flogged with a barbarity which would be incredible to any were it not for the memory of certain flogging in our own country. Besides the lash they have also the pillory and the stocks, and the overseers carry in addition to their whip a heavy cane, with which they constantly belabour the slaves both white and black. I say "slaves," because the white servants are nothing less, save that the negroes are far better off and receive infinitely better treatment than the poor white creatures. Indeed, the negro being the absolute property of his master, both he and his children, to ill-treat him is like the wanton destruction of cattle on a farm; whereas there is no reason in making the convicts last out more than the ten years of their servitude or even so long, because many of them are such poor creatures when they arrive, and so reduced by the miseries of the voyage, and so exhausted by the hard labour to which they are put that they bring no profit to the master, but quickly fall ill and die like rotten sheep. Like rotten sheep, I say, they die, without a word of Christian exhortation; and like brute creatures who have no world to come are they buried in the ground! Again, the food served out to these poor people is not such as should be given to white people in a hot climate. There is nothing but water to drink and that drawn from ponds, because in Barbadoes there are few springs or rivers. It is true that the old hands, who have learned how to manage, contrive to make plantain wine, and get, by hook or by crook, mobbie (which is a strong drink made from potatoes), or kill-devil, which is the new spirit distilled from sugar. Then, for solid food, the servants are allowed five pounds of salt beef for each person every week, and this so hard and stringy that no boiling will make it soft enough for the teeth. Sometimes, instead of the beef, they have as much salt fish, for the most part stinking; with this a portion of ground Indian corn, which is made into a kind of porridge and called loblollie. This is the staple of the food, and there are no rustics at home who do not live better and have more nourishing food.

*All Rights Reserved.

I do not deny that the convicts are for the most part a most horrid crew, who deserve to suffer if any men ever did; but it was sad to see how the faces of the people were pinched with hunger and wasted with the daily fatigues, and how their hollow eyes were full of despair. Whatever their sins may have been, they were at least made in God's own image: no criminal, however wicked, should have been used with such barbarity as was wreaked upon the people of this estate. The overseers were chosen (being themselves also convicts) for their hardness of heart. Nay, did they show the least kindness towards the poor creatures whom they drove they would themselves be forced to lay down the whip of office and to join the gang of those who toiled. And over them was the master, jealous to exact the last ounce of strength from the creatures whom he had bought. Did the good people of Bristol who buy the sugar and molasses and tobacco of the Indies know or understand the tears of despair and the sweat of agony which are forced with every pound of sugar, they would abhor the trade which makes them rich.

The companion of my sleeping-hut, the girl Deb, was a great, strapping wench, who bade fair to outlast her ten years of servitude, even under the treatment to which, with the rest, she was daily subjected. And partly because she was strong and active, partly because she had a certain kind of beauty (the kind which belongs to the rustic, and is accompanied by good-humour and laughter), she would perhaps have done well, as some of the women do, and ended by marrying an overseer, but for events which presently happened. Yet, strong as she was, there was no evening when she did not return worn out with fatigue, her cheeks burning, her limbs weary, yet happy because she had one more day escaped the lash, and had the night before her in which to rest. If it is worth noting, the women were from the outset the most willing workers, and the most eager to satisfy their taskmasters; the men, on the other hand, went sullen and downcast, thinking only how to escape the overseer's whip, and going through the work with angry and revengeful eyes. I think that some great mutiny might have happened upon this estate—some wild revenge—so desperate were these poor creatures and so horrible were the scourgings they endured, and the shrieks and curses which they uttered. Let me not speak of these things.

There are other things which make residence in Barbadoes, even to the wealthy, full of annoyances and irritations. The place is filled with cockroaches, great spiders, horrid scorpions, centipedes, and lizards. There are ants which swarm everywhere and there are clouds of flies, and at night there are moskeetoe and merrywings, which by their bites have been known to drive new-comers into fever, or else into a kind of madness.

In the evenings after supper there reigned a melancholy silence in the village, the people for the most part taking rest with weary limbs. Sometimes there would be a quarrel, with horrid oaths and curses and perhaps some fighting; but these occasions were rare.

From the house there came often the noise of singing, drinking, and loud talking when other planters would ride over for a drinking bout. There was also sometimes to be heard the music of the theorbo, upon which Madam played very sweetly, singing Spanish songs; so that it seemed a pity for music so sweet to be thrown away upon this selfish crew. It made me think of Humphrey, and of the sweet and holy thoughts which he would put into rhymes, and then fit the rhymes with music which seemed to breathe those very thoughts. Alas! In the village of Bradford Orcas there would be now silence and desolation! The good old Squire dead, my father dead, the young men sent to the Plantations, no one left at all but the Rector and Madam his sister-in-law, and I, alas! a slave. Perchance at that moment the Rector might be slowly drawing his bow across the strings of his violoncello thinking of those who formerly played with him; or perhaps he would be sorrowfully taking out his cases and gazing for a little consolation upon the figures of his goddesses and his nymphs. Only to think of the place, and of those who once lived there, tore my poor heart to pieces.

One evening, when there was a great noise and talking at the house, while we were sitting upon our beds with no other light than that of the moon, Madam herself came to the cottage.

"Child," she said, "nothing will do but that the gentlemen must see thy beauty. Nay, no harm shall happen while I am there: so much they know. But he hath so bragged about thy beauty and the great price he will demand for ransom that the rest are mad to see thee. I swear that not the least rudeness shall be offered thee. They are drinking, it is true; but they are not yet drunk. Come!"

So I arose and followed her. First, she took me to her own room, where she took off my hood and threw over me a long white lace mantilla, which covered my head and fell over my shoulders and below the waist.

She sighed as she looked at me.

"Poor innocent!" she said. "If money could buy that face, there is not a man in the room but would give all he hath and count it gain. Canst thou play or sing?"

I told her that I had some knowledge of the theorbo, Therefore she brought me hers, and bade me sing to the gentlemen and then retire quickly. So I followed her into the living or keeping room, where a dozen gentlemen were sitting round the table. A bowl of punch was on the table, and every man had his glass before him, and a pipe of tobacco in his hand. Some of their faces were flushed with wine.

"Gentlemen," said Madam, "our prisoner hath consented to sing one song to you, after which she will ask permission to bid you good-night."

So they all clapped their hands and rapped the table, and I, being indeed terrified, but knowing very well that to show fear would be the worst thing I could do, touched the strings and began my song. I sang the song which Humphrey made, and which he sang to the officers at Taunton when the Duke was there.

When I finished, I gave back the theorbo to Madam, curtseyed to the gentlemen, and quickly stepped back to Madam's room, while they all bellowed and applauded and roared for me to come back again. But I put on my hood and slipped out to the cottage, where I lay down beside Deb, and quickly fell asleep. (It is a great happiness, in these hot latitudes, that, when a new-comer hath once got over the trouble of the merrywings, he falleth asleep the moment he lies down, and so sleeps through the whole night.)

But in the morning Madam came to see me while I was sewing.

"Well, Child," she said, laughing, "thou hast gotten a lover who swears that he will soon have thee out of this hell."

"A lover!" I cried. "Nay!—that may God forbid!"

"'Tis true. Young Mr. Anstiss it is. While thou wast singing he gazed on thy pretty face and listened as one enchanted. I wonder—but no!—thou hast no eyes for such things. And when thou wast gone he offered the master four times the sum he paid for thee—yea, four times—or six times—saying that he meant honourably, and that if any man dared to whisper anything to the contrary he would cut his throat."

"Alas! Madam. I must never marry—either this Mr. Anstiss or any other."

"Tut—tut. This is foolish maid's nonsense. Granted you have lost your old lover, there are plenty more. Suppose he hath lost his old sweetheart, there are plenty more—as I doubt not he hath already proved. Mr. Anstiss is a very pretty young gentleman; but the master would not listen, saying that he waited for the lady's friends."

And so passed six weeks, or thereabouts, for the only count of time I kept was from Sunday to Sunday. On that day we rested; the negroes, who are no better than heathens, danced. The white servants lay about in the shade, and drank what they could; in one cottage only on that godless estate were prayers offered.

And then happened that great event which, in the end, proved to be a change in my whole life, and brought happiness out of misery, and joy out of suffering, though at first it seemed only a dreadful addition to my trouble. Thus is the course of things ordered for us, and thus the greatest blessings follow upon the most threatening juncture. What this was I will tell in a few words.

It was about the third week in September when I embarked, and about the third week in November when the ship made her port. Therefore, I take it that it was one day about the beginning of the year 1686, when Madam came to the work-room and told me that a ship had arrived carrying a cargo of two hundred rebels and more, sent out to work upon the Plantations, like myself, for the term of ten years. She also told me that the master was gone to the Bridge in order to buy some of them. Not, she said, that he wanted more hands; but he expected that there would be among them persons of quality, who would be glad to buy their freedom. He still, she told me, looked to make a great profit out of myself, and was thinking to sell me, unless my friends in England speedily sent proposals for my ransom, to the young planter who was in love with me. This did not displease me. I have not thought it necessary to tell how Mr. Anstiss came often to the estate, and continually devised schemes for looking at me, going to the Ingenio, whence he could see those who sat in the work-room, and even sending me letters, vowing the greatest extravagance of passion—I say I was not displeased, because there was in this young gentleman's face a certain goodness of disposition clearly marked; so that even if I became his property I thought I might persuade him to relinquish thoughts of love, even if I had to trust myself entirely to his honour and tell him all. But, as you shall hear, this project of the master's was brought to naught.

As for the rebels, I was curious to see them. Some I might remember; to some I might perhaps be of a little use at the outset in guarding them against dangers. I did not fear, or think it likely, that there would be any among them whom I might know or who might know me. Yet the thing which I least suspected, and the least feared—a thing which one would have thought so unlikely as to make the event a miracle—nay, call it rather the merciful ordering of all—that thing, I say, actually happened.

The newly-bought servants arrived at about five in the evening.

I looked out of the work-room to see them. Why, I seemed to know their faces—all their faces! They were our brave West Country lads, whom I had last seen marching gallantly out of Taunton town to victory and glory (as they believed). Now—pale with the miseries of the voyage, thin with bad food and disease, hollow-cheeked and hollow-eyed, in rags and dirt, barefooted, covered with dust, grimy for want of washing, their beards grown all over their faces—with hanging heads, stood these poor fellows. There were thirty of them; some had thrown themselves on the ground, as if in the last extremity of fatigue; some stood with the patience that one sees in brute beasts who are waiting to be killed; and in a group together stood three—oh! merciful Heaven! was this misery also added to my cup?—they were Robin, Barnaby, and Humphrey! Robin's face, heavy and pale, betrayed the sorrow of his soul. He stood as one who neither careth for nor regardeth anything. My heart fell like lead to witness the despair which was visible in his attitude, in his eyes, in his brow. But Barnaby showed still a cheerful countenance and looked about him, as if he was arriving a welcome guest instead of a slave.

"You know any of them, Child?" Madam asked.

"Oh! Madam," I cried; "they are my friends—they are my friends. Oh! help them—help them!"

"How can I help them?" she replied coldly. "They are rebels, and they are justly punished. Let them write home for money if they have friends, and so they can be ransomed. To make them write the more movingly, the master hath resolved to send them all to work in the fields. 'The harder they work,' he says, 'the more they will desire to be free again.'"

In the fields! Oh! Robin—my poor Robin!

CHAPTER XXXVIII.

HUMPHREY'S NARRATIVE.

With these words—"Oh! Robin! Robin!"—the history, as set down in my Mistress's handwriting, suddenly comes to an end. The words are fitting, because her whole heart was full of Robin, and though at this time it seemed to the poor creature a sin still to nourish affection for her old sweetheart, I am sure—nay, I have it on her own confession—that there was never an hour in the waking day when Robin was not in her mind, though between herself and her former lover stood the dreadful figure of her husband. I suppose that, although she began this work with the design to complete it, she had not the courage, even when years had passed away and much earthly happiness had been her reward, to write down the passages which follow. Wherefore (and for another reason—namely, a confession which must be made by myself before I die) I have taken upon myself to finish that part of Alice Eykin's history which relates to the Monmouth rising and its unhappy consequences. You have read how (thanks to my inexperience and ignorance of conspiracies, and belief in men's promises) we were reduced to the lowest point of disgrace and poverty. Alice did not tell, because till afterwards she did not know, that on Sir Christopher's death his estate was declared confiscated, and presently bestowed upon Benjamin by favour

DRAWN BY A. FORESTIER.

I, being indeed terrified, but knowing very well that to show fear would be the worst thing I could do, touched the strings and began my song.

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

of Lord Jeffreys; so that he whose ambition it was to become Lord Chancellor was already (which he had not expected) the Lord of the Manor of Bradford Orcas. But of this hereafter.

I have called her my Mistress. Truly, all my life she hath been to me more than was ever Laura to Petrarch, or even Beatrice to the great Florentine. The ancients represented every virtue by a Goddess, a Grace, or a Nymph. Nay, the Arts were also feminine (yet subject to the informing influence of the other sex, as the Muses had Apollo for their director and chief). To my mind every generous sentiment, every worthy thought, all things that are gracious, all things that lift my soul above the common herd, belong not to me, but to my Mistress. In my youth it was she who encouraged me to the practice of those arts by which the soul is borne heavenwards—I mean the arts of poetry and of music: it was she who listened patiently when I would still be grating of myself, and encouraged the ambitions which had already seized my soul. So that if I turned a set of verses smoothly, it was to Alice that I gave them, and for her that I wrote them. When we played heavenly music together, the thoughts inspired by the strain were like the Italian painter's vision of the angels which attend the Virgin—I mean that, sweet and holy as the angels are, they fall far short of the holiness and sweetness of her whom they honour. So, whatever my thoughts or my ambitions, amidst them all I saw continually the face of Alice, always filled with candour and with sweetness. That quality which enables a woman to think always about others, and never about herself, was given to Alice in large and plenteous measure. If she talked with me, her soul was all mine. If she was waiting on Madam, or upon Sir Christopher, or upon the Rector, or on her own mother, she knew their inmost thoughts and divined all their wants. Nay, long afterwards, in the daily exercise of work and study, at the University of Oxford, in the foreign schools of Montpellier, Padua, and Leyden, it was Alice who, though far away, encouraged me. I could no longer hear her voice; but her steadfast eyes remained in my mind like twin stars that dwell in heaven. This is a wondrous power given to a few women, that they should become as it were angels sent from heaven, lent to the earth a while, in order to fill men's minds with worthy thoughts, and to lead them in the heavenly way. The Romish Church holds that the age of miracles hath never passed; which I do also believe, but not in the sense taught by that Church. Saints there are among us still, who daily work miracles, turning earthly clay into the jasper and the precious marble of heaven!

Again, the great poet Milton hath represented his virtuous lady unharmed among the rabble rout of Comus, protected by her virtue alone. Pity that he hath not also shown a young man led by that sweet lady, encouraged, warned, and guarded along that narrow way, beset with quag and pitfall, along which he must walk who would willingly climb to higher place! And all this apart from earthly love, as in the case of those two Italian poets.

More, I confess, I would have had, and presumptuously longed for it—nay, even prayed for it with such yearnings and longings as seemed to tear my very heart asunder. But this was denied to me.

In September, 1685, ten weeks after the fight of Sedgemoor, we, being by that time well tired of Exeter Prison, were tried by Lord Jeffreys. It was no true trial, for we were all advised to plead guilty, upon which the Judge bellowed and roared at us, abusing us in such language as I never thought to hear from the bench, and finally sentenced us all to death. (A great deal has been said of this roaring of the Judge, but I am willing to excuse it in great measure, on the ground of the disease from which he was then suffering. I myself, who had heard that he was thus afflicted, saw the drops of agony upon his forehead, and knew that if he was not bawling at us he must have been roaring on his own account.) So we were marched back to prison and began to prepare for the last ceremony, which is, I think, needlessly horrible and barbarous. To cut a man open while he is still living is a thing not practised even by the savage Turk. At this gloomy time my cousin Robin set a noble example of fortitude which greatly encouraged the rest of us. Nor would he ever suffer me to reproach myself (as I was continually tempted to do) with having been the cause of the ruin which had fallen upon the whole of our unfortunate house. Nay, he went further, and insisted, and would have it, that had I remained in Holland he himself would have joined the Duke, and that I was in no way to blame as an inciter to this unfortunate act. We knew by this time that Sir Christopher had been arrested and conveyed to Ilminster Jail, and that with him were Dr. Eykin, grievously wounded, and Barnaby; and that Alice, with her mother, was also at Ilminster. Mr. Boscorel, for his part, was gone to London in order to exert whatever interest he might possess on behalf of all. With him went Madam, Robin's mother; but she returned before the trial, much dejected, so that we were not encouraged to hope for anything from that quarter. Madam began to build some hopes at this time from Benjamin, because he, who had accompanied the Judges from London, was the boon companion every night of Lord Jeffreys himself. But it is one thing to be permitted to drink and sing with a great man at night, and another thing to procure of him the pardon of rebels (and those not the common sort, but leaders and captains). That Benjamin would attempt to save us, I did not doubt; because in common decency and humanity he must needs try to save his grandfather and his cousins. But that he would effect anything—that, indeed, I doubted. Whether he did make an attempt, I know not. He came not to the prison, nor did he make any sign that he knew we were among the prisoners. What he contrived, the plot which he laid, and the villainy with which he carried it out, you have already read. Well, I shall have much more to say about Benjamin. For the moment, let him pass.

I say, then, that we were lying in Exeter Jail expecting to be called out for execution at any hour. We were sitting in the courtyard on the stone bench with gloomy hearts.

"Robin—Humphrey—lads both!" cried a voice we knew. It was the Rector, Mr. Boscorel himself, who called us. "Courage, lads!" he cried (yet looked himself as mournful as man can look). "I bring you good news—I have this day ridden from Ilminster (there is other news not so good)—good news, I say: for you shall live, and not die! I have so far succeeded that the lives are spared of Robin Challis, Captain in the Rebel Cavalry; Barnaby Eykin, Captain of the Green Regiment; and Humphrey Challis, Chyrurgeon to the Duke. Yet must you go to the Plantations—poor lads!—there to stay for ten long years. Well, we will hope to get your pardon and freedom long before that time is over. Yet you must, perforce, sail across the seas."

"Lad," cried Robin, catching my hand, "cease to tear thy heart with reproaches! See! none of us will die, after all."

"On the scaffold, none," said Mr. Boscorel. "On the scaffold, none," he repeated.

"And what saith my grandfather, Sir?" Robin asked. "He is also enlarged, I hope, at last. And how is the learned Dr. Eykin? and Alice—my Alice—where is she?"

"Young men," said the Rector, "prepare for tidings of the worst—yes; of the very worst. Cruel news I bring to you, boys; and for myself"—he hung his head—"cruel news, shameful news!"

Alas! you know already what he had to tell us. Worse than the death of that good old man, Sir Christopher; worse than the death of the unfortunate Dr. Eykin and his much-tried wife; there was the news of Alice's marriage and of her flight, and at hearing this we looked at each other in dismay, and Robin sprang to his feet and cried aloud for vengeance upon the villain who had done this thing.

"It is my own son," said Mr. Boscorel: "yet spare him not! He deserves all that you can call him, and more. Shameful news I had to tell you. Where the poor child hath found a retreat or how she fares, I know not. Robin, ask me not to curse my own son—what is done will bring its punishment in due time. Doubt it not. But of punishment we need not speak. If there were any way—any way possible—out of it! But there is none. It is a fatal blow. Death itself alone can release her. Consider, Humphrey, consider; you are not so distracted as your cousin. Consider, I say, that unhappy girl is Benjamin's lawful wife. If he can find her, he may compel her to live with him. She is his lawful wife, I say. It is a case in which there is no remedy; it is a wickedness for which there is no help, until one of the twain shall die."

There was indeed no help or remedy possible. I will not tell of the madness which fell upon Robin at this news, nor of the distracted things he said, nor how he wept for Alice at one moment and the next cursed the author of this wickedness. There was no remedy. Yet Mr. Boscorel solemnly promised to seek out the poor innocent girl, forced to break her vows for the one reason which could excuse her—namely, to save the lives of all she loved.

"They were saved already," Mr. Boscorel added. "He knew that they were saved. He had seen me; he had the news that I brought from London; he knew it; and he lied unto her! There is no single particular in which his wickedness can be excused or defended. Yet, I say, curses are of no avail. The Hand of God is heavy upon all sinners, and will presently fall upon my unhappy son—I pray that before that Hand shall fall his heart may be touched with repentance."

But Robin fell into a melancholy from which it was impossible to arouse him. He who, while death upon the scaffold seemed certain, was cheerful and brave, now, when his life was spared, sat heavy and gloomy, speaking to no one; or if he spoke, then in words of rage and impatience.

Mr. Boscorel remained at Exeter, visiting us daily until the time came when we were removed. He brought with him one day a smooth-tongued gentleman in sober attire who was, he told us, a West Indian merchant of Bristol, named George Penne. (You have read, and know already, how great a villain was this man.)

"This gentleman," said Mr. Boscorel, "is able and willing, for certain considerations, to assist you in your exile. You have been given (among many others) by the King to one Mr. Jerome Nipho, who hath sold all his convicts to this gentleman. In his turn, he is under bonds to ship you for the Plantations, where you will be sold again to the planters."

"Sirs," Mr. Penne looked from one to the other of us with compassionate eyes, "I have heard your melancholy case, and it will be to my great happiness if I may be able in any way to soften the rigours of your exile. Be it known to you that I have correspondents in Jamaica, Barbadoes, and Virginia, and that for certain sums of money these—my friends—will readily undertake to make your servitude one merely in name. In other words, as I have already informed his Reverence, I have bought you in the hope of being useful to you (I wish I could thus buy all unhappy prisoners), and I can, on paying my friends what they demand, secure to you freedom from labour, subject only to the condition of remaining abroad until your term is expired, or your friends at home have procured your pardon."

"As for the price, Humphrey," said Mr. Boscorel, "that shall be my care. It is nearly certain that Sir Christopher's estates will be confiscated, seeing that he died in prison under the charge of high treason, though he was never tried. Therefore we must not look to his lands for any help. What this gentleman proposes is, however, so great a thing that we must not hesitate to accept his offer gratefully."

"I must have," said Mr. Penne, "seventy pounds for each prisoner. I hear that there is a third young gentleman of your party now in the same trouble at Ilminster; I shall therefore ask for two hundred guineas—two hundred guineas in all. It is not a large sum in order to secure freedom. Those who cannot obtain this relief have to work in the fields or in the mills under the hot sun of the Spanish Main; they are subject to the whip of the overseer; they have wretched food; they are worse treated than the negroes, because the latter are slaves for life and the former for ten years only. By paying two hundred guineas only you will all be enabled to live at your ease. Meanwhile, your friends at home will be constantly endeavouring to procure your pardon. I myself, though but a simple merchant of Bristol City, can boast some influence, which I will most readily exert to the utmost in your behalf"——

"Say no more, Sir," said Mr. Boscorel, interrupting him; "the bargain is concluded. These young gentlemen shall not be subjected to any servitude; I will pay you two hundred guineas."

"I would, Sir"—Mr. Penne laid his hand, which was large, white, and soft, the hand of a liar and a traitor, upon his treacherous heart—"I would to Heaven, Sir," he said, "that I could undertake this service for less. If my correspondents were men of tender hearts, the business should cost you nothing at all. But they are men of business: they say that they live not abroad for pleasure, but for profit; they cannot forego any advantage that may offer. As for me, this job brings me no profit. Upon my honour, gentlemen, profit from such a source I should despise: every guinea that you give me will be placed to the credit of my correspondents, who will, I am assured, turn a pretty penny by the ransom of the prisoners. But that we cannot help. And as for me—I say it boldly in the presence of this learned and pious clergyman—I am richly rewarded with the satisfaction of doing a generous thing. That is enough, I hope, for any honest man."

The fellow looked so benevolent, and smiled with so much compassion, that it was impossible to doubt his word. Besides, Mr. Boscorel had learned many things during the journey to London; among others that it would be possible to buy immunity from labour for the convicts. Therefore, he hesitated not, but gave him what he demanded, taking in return a paper, which was to be shown to Mr. Penne's correspondents, in which he acknowledged the receipt of the money, and demanded in return a release from actual servitude. This paper I put carefully in my pocket with my note-book, and my case of instruments.

It was, so far as my memory serves me, about six weeks after our pardon was received when we heard that we were to be marched to Bristol, there to be shipped for some port or other across the ocean. At Taunton we were joined by a hundred poor fellows as fortunate as ourselves; and at Bridgwater by twenty more, whose lives had been bought by Colonel Kirke. Fortunate we esteemed ourselves; for everywhere the roads were lined with legs, heads, trunks, and arms, boiled and blackened in pitch, stuck up for the terror of the country. Well; you shall judge how fortunate we were.

When we reached Bristol, we found Mr. Penne upon the Quay, with some other merchants. He changed colour when he saw us; but quickly ran to meet us, and whispered that we were on no account to betray his goodness in the matter of ransom, otherwise it might be the undoing of us all, and perhaps cause his own imprisonment. He also told me that the ship was bound for Barbadoes, and we should have to mess with the other prisoners on the voyage, but that it would all be made up to us when we arrived. He further added that he had requested his correspondents to entertain us until money should arrive from England, and to become our bankers for all that we should want. And with that he clasped my hand tenderly, and with a "God be wi' ye!" he left us, and we saw him no more.

(To be continued.)

Sir John Hardy Thursby, of Ormerod House, Burnley, who was High Sheriff of Lancashire in the Jubilee year, has presented to the town of Burnley twenty-eight acres of land near the centre of the town as the site for a public park. The value of the land is estimated at over £25,000.

A fine picture of "The Ascension," the work of Mr. Cave Thomas, who has been occupied with it two or three years, has been placed above the altar in Christ Church, Stafford-street, Marylebone. The artist, who has treated this religious theme somewhat in the manner of Raffaelle's "Transfiguration," represents the Saviour's figure in the upper part of the picture, rising above a golden cloud, below which are the Apostles, grouped around a rock at Bethany, St. Peter and St. John foremost; Christ is surrounded by angels, with wings of iridescent hues. The picture, which is of large size, 15 ft. high and 8 ft. 6 in. wide, is much admired as a work of art. Mr. Cave Thomas also painted the lunette picture in this church, and the twelve heads of the Apostles at the Russian Church in Welbeck-street.

Her Majesty's surveying-ship Egeria, under the command of Captain P. Aldrich, R.N., has, during a recent sounding cruise and search for reported banks to the south of the Friendly Islands, obtained two very deep soundings of 4295 fathoms and 4430 fathoms, equal to five English miles, respectively, the latter in latitude 24 deg. 37 min. S., longitude 175 deg. 8 min. W., the other about twelve miles to the southward. These depths are more than 1000 fathoms greater than any before obtained in the Southern Hemisphere, and are only surpassed, as far as is yet known, in three spots in the world—one of 4655 fathoms off the north-east coast of Japan, found by the United States steam-ship Tuscarora; one of 4475 fathoms south of the Ladrone Islands, by the Challenger; and one of 4561 fathoms north of Porto Rico, by the United States ship Blake. Captain Aldrich's soundings were obtained with a Lucas sounding machine and galvanised wire. The deeper one occupied three hours, and was obtained in a considerably-confused sea, a specimen of the bottom being successfully recovered. Temperature of the bottom, 33·7 deg. Fahr.

Ready December 3,

OUR CHRISTMAS NUMBER

CONSISTING OF A

COMPLETE STORY by D. CHRISTIE MURRAY,

Entitled "PAUL JONES'S ALIAS,"

Illustrated by A. FORESTIER.

"TWO CHRISTMAS EVES." By MASON JACKSON.

ILLUSTRATIONS by G. D. LESLIE, R.A., A. FORESTIER, STANLEY BERKELEY, LUCIEN DAVIS, E. HOPKINS, A. QUINTON, W. WEEKES, G. P. JACOMB-HOOD, LOUIS WAIN, and others.

THREE PRESENTATION PICTURES IN COLOURS,

Printed in the Finest Style of Chromo-Lithography:

A DAUGHTER OF EVE. By L. WALLER.
A HUNTING WE WILL GO. By C. J. GARLAND.
CHARMING KATE. By FLORENCE GRAVIER.

VERSES TO THE ILLUSTRATIONS. By JOHN LASH LATEY.

ONE SHILLING; Inland Parcel Post, Threepence.

INGRAM BROTHERS, 198, STRAND, W.C., LONDON.

Now ready,

ILLUSTRATED LONDON ALMANACK FOR 1889.

SIX PICTURES IN CHROMO.

1.—TOM TITS.
2.—ROBIN REDBREASTS.
3.—DOROTHY.
4.—THE CAPTIVE.
5.—MICHAELMAS GEESE.
6.—WAITING FOR DINNER.

Monthly Calendars—Tables of Duration of Sunlight—Diagrams of Duration of Moonlight—Highwater Tables—Festivals, Seasons, Terms, Symbols, &c.—Astronomical Occurrences for 1889—Eclipses, &c.
By JAS. GLAISHER, Esq., F.R.S., &c.

ILLUSTRATED THROUGHOUT.
In Pictorial Cover,
Price ONE SHILLING; Postage, Twopence-Halfpenny.

Published at the Office of THE ILLUSTRATED LONDON NEWS, 198, Strand. Post-Office Orders, &c., Payable to INGRAM BROTHERS.

Ready November 26,

THE CHILDREN'S ANNUAL,

FATHER CHRISTMAS,

CONSISTING OF A

CHILDREN'S STORY, entitled "The Golden Horseshoes."

By HORACE LENNARD. Illustrated by GEORGE CRUIKSHANK.

Superbly Printed on Superfine Paper.

WITH A PRESENTATION PICTURE,

Entitled "RED RIDING HOOD."

Painted by G. HILLYARD SWINSTEAD, and accepted for Exhibition by the Royal Academy.

ONE SHILLING; Inland Parcel Post, Threepence.

INGRAM BROTHERS, 198, STRAND, W.C., LONDON.

POSTAGE FOR FOREIGN PARTS THIS WEEK.

NOVEMBER 17, 1888.

Subscribers will please to notice that copies of this week's number forwarded abroad must be prepaid according to the following rates:—To Canada, United States of America, and the whole of Europe, THICK EDITION, *Twopence-halfpenny;* THIN EDITION, *One Penny.* To Australia, Brazil, Cape of Good Hope, China (via United States), Jamaica, Mauritius, and New Zealand, THICK EDITION, *Threepence;* THIN EDITION, *One Penny.* To China (via Brindisi), India, and Java, THICK EDITION, *Fourpence-halfpenny;* THIN EDITION, *Three-halfpence.*

Newspapers for foreign parts must be posted within eight days of the date of publication, irrespective of the *departure* of the mails.

NOVELS.

In Far Lochaber. By William Black. Three vols. (Sampson Low and Co.).—Word-painting of romantic landscape, of sea-views and cloud-views, of mountain, moor, and wood, of loch and river, and the varied atmospheric effects of sunlight in the changeful, rainy climate of the West Highland shores, is practised by this author with continued success. He keeps also a fair stock of the different types of Scottish life and character—from the Lowland townsfolk, farmers, and Kirk elders or ministers, to the chivalrous lairds of ancient lineage, usually retired military men from India, who are, perhaps, a survival of the Waverley period, with their gillies and other retainers of the primitive Celtic race, speaking a quaint and scanty dialect of English and plenty of native Gaelic. These materials afford piquant contrasts of social condition and behaviour, which Mr. Black can exhibit with humorous effect; while he is enabled, by the steam-boat and railway travelling of the modern West Highland tourists' route, to shift the scenes with much ease and convenience. It is not, in these days, "a far cry to Lochiel"; and "Far Lochaber," the adjacent district north of Ben Nevis, has been rendered very accessible. Fort William and its neighbourhood, where Alison Blair goes to stay with her aunts and uncle and cousins, suit the purposes of the novelist. A girl may incautiously embark on the loch in a small sailing-skiff with a reckless and stupid boy, and may be saved from capsizing in a squall by the gallant dexterity of Captain Macdonnell. The chief utility of the mountain-path is to lead her into perils, those of being caught in a thunder-storm, or lost in a fog on the verge of a precipice, or even—as in another recent novel—spraining her ankle, so that the desirable young gentleman may help her in distress, and may wrap her up in his own coat. Such adventures, besides admitting of picturesque description, are good narrative business, serving to make the hero and heroine feel that they belong to one another. It is a fine healthy way of bringing about the union of hearts, instead of the mutual exchange of sentimental reflections, or the comparison of drawing-room and ball-room experiences, attending the intimacy of some other young persons. Neither Alison nor Ludovick Macdonnell is much addicted to morbid self-introspection; and their companions, her Cousin Flora and Cousin Hugh, are high-spirited, active, cheerful, and delightful. Their parents, Dr. and Mrs. Munro, are very kind; but the most amusing person in the family is Aunt Gilchrist, a fiery little Scotchwoman with the warmest heart, the sharpest tongue, and the most innocent fits of petulance or rage when suffering from peripheral neuralgia, but who is an angel of goodness to Alison, and endows her with a sufficient fortune. All this is pleasant; and the cruel tricks of the sly and malicious Johnny, the boy-fiend of the village, are somewhat atoned by his devotion to Alison's service; but Far Lochaber is not the home of her birth. She is the daughter of a gloomy and fanatical Free Kirk minister in a dismal, smoky, grimy, manufacturing town of Lanarkshire, where a hideous, brutal elder, Mr. Cowan, and his cunning wife, are scheming to get her married to their son James, an idiotic candidate for the ministry. The worst of Alison's difficulties is that her noble Ludovick, a frank and manly young fellow, heir to his father's modest lairdship at Oyre, is a Roman Catholic like his Highland ancestry, and thereby fearfully obnoxious to all her Free Kirk folk. This situation presents, in a modified form, the same domestic problem as that of "A Daughter of Heth." We are not aware that the dread and dislike of Romanism prevailing among Scotch Presbyterians are more acrimonious in the Free Kirk than among the "U. P.'s" or the adherents to the Establishment in that country. Alison Blair, though at Kirk o' Shields a dutiful assistant to her father, and so demure there in her behaviour that her lively cousin has nicknamed her "Miss Dimity Puritan," does not bore her Highland friends with theological controversy. In fact, she does not object to play cards, to dance and sing and enjoy all innocent fun. She has, indeed, like several eminent literary Agnostics of this day, had her orthodox creed unaccountably sapped by "a patient study" of Paley and Butler, who would be surprised to know, in the present uneasy age, what an amount of scepticism their arguments are said to have produced. Dismissing these questions, which Mr. Black, a novelist of much tact, only touches very lightly, we observe that the stern and cruel opposition of the Free Kirk persuasion to Alison's Lochaber love is the mainspring of his interesting story. It arrives at a forcible situation by the peculiar facilities for love-matches through the Scottish process of legal marriage; Alison being of full age, she and Ludovick go one morning, with two witnesses, to the office of the Sheriff Depute, and sign a declaration, which is duly registered, and they are husband and wife. But a peremptory summons from her father calls her back that very day to Kirk o' Shields, where she is treated in a manner that we can hardly understand. Why should she consent to be handed over to Mrs. Cowan, taken away to Portobello, near Edinburgh, and kept a close prisoner until her lover, who is now her lawful husband, recaptures the helpless victim? Such an outrage might have been supposed impossible in the case of a young woman of independent spirit. Mr. Black seems, indeed, better acquainted with the laws of Scotland than we can pretend to be; and we learn something from his account of the conference with an Edinburgh lawyer. It appears that a husband so married can do no more to vindicate his rights than to sue his wife for a decision whether the contract of marriage is to be adhered to; and, when he could not discover her abode to serve notice of action upon her, the Court might be asked to summon her father, as a party to the concealment of her abode. The Rev. Mr. Blair would go to prison for contempt of Court if he obstinately stuck to the conspiracy; but Ludovick is dissuaded from so harsh a prosecution. Fortunately, by the sharpness of the boy Johnny, and by putting James Cowan, the booby divinity student, in terror for his precious life, the search for Mrs. Ludovick Macdonnell is at length successful, and she is carried off by the man of her choice. The tale hereby comes to a happy ending, saddened only by the early death of her sister Agnes, a consumptive, delicate girl, addicted to fond spiritualistic dreams, whose short life was never cheered by a visit to "Far Lochaber."

The Weaker Vessel. By D. Christie Murray. Three vols. (Macmillan and Co.).—This novel is one of those stories in which the troubles and efforts of the principal personages are related by a confidential friend and helper, writing in his own person. The second-best man, John Denham, living at first in chambers near Gray's Inn, but afterwards the Paris correspondent of a daily newspaper, ultimately the lucky holder of an easy and well-paid Government office, and the happy husband of a bright young lady named Clara, tells us what happened to Walter Pole. That gentleman, before Denham knew him, was rash enough to contract a secret marriage with a certain Adelaide, a half-Frenchwoman, of violent temper and bold manners, profligate in her conduct, and with a taste for drink. He separated from her, after a month or two; but allowed her a part of his income, while he went into society as a supposed bachelor. His introduction to a family named Delamere, keeping up an establishment of fastidious gentility in South Kensington, leads to distressing trials of a mutual affection which cannot be legitimately indulged. Mr. Delamere, an elderly widower, is finely portrayed, with much of the humour of Dickens, as a sort of æsthetic Pecksniff, an eloquent but hollow and empty lecturer on the moral teachings of Art and Beauty, and a collector of pictures, statuary, Japanese ware, and Old Worcester china. His relative and disciple, Sebastian Dolmer Jones, is an arrant coxcomb, whose affectations are still more ridiculous, and Pole, a very manly fellow, regards them both with civil contempt; but Mary Delamere, a sensible, graceful, noble-minded young woman, makes too deep an impression on his heart. Though he, being sternly upright and honourable, never thinks of showing his love, and for some time avoids visiting the house, Mary is in love with him, which is soon detected by her friend Clara Grantley. Pole and Denham are together in a house-boat up the Thames, about the time of the Henley Regatta, when Pole's secret becomes known to his companion by a meeting with the fierce and vindictive Adelaide. A caricature figure is that of her unscrupulous ally, one Goldsmith, a Jewish solicitor and money-lender, who presently concocts a scheme to extort money from Pole. The unexpected deaths of several persons have left Walter Pole next heir to a peerage and estates in Devonshire worth £20,000 a-year. Goldsmith, aware of this and of the declining health of old Lord Wolborough, brings to Pole a certificate of the death of his wife Adelaide, and of her burial in Kensal-green Cemetery. These documents have been obtained by falsely giving her name, "Adelaide Pole," to a woman run over by a cab in the street, who died in St. Bartholomew's Hospital. The intention of the conspirators is to allow Walter Pole to contract a bigamous marriage with Miss Delamere; and, when he is rich, as he will soon be, to plunder him by threats of exposure. Their wicked design makes some approach to success; for Walter Pole, believing himself free, and kindly encouraged by old Lord Wolborough, after revealing the fact of his former unhappy marriage, is regularly engaged to Mary Delamere. But John Denham, engaged about the same time to Clara, accidentally sees Adelaide in Paris, recognises the unworthy wife of his friend, the woman supposed to have died three or four months before, and hastens to London with this terrible intelligence. It is borne with great fortitude by Mary and by Walter Pole; there is no scene, but letters are exchanged at the breaking off of the engagement. He compels Goldsmith, by terror of a horsewhipping, as well as by menaces of criminal prosecution, to confess the infamous trick that has been practised on him. Then, having come into the title and fortune expected, he, now Lord Wolborough, offers his wife £5000 a year, on condition of her never molesting him again; he travels abroad, and gambles prodigiously, losing £12,000 at écarté in one sitting. In the meantime, Denham and Clara are happily settled, while Mr. Delamere's pretensions are destroyed by a host of creditors; he sells off his art-treasures, and meanly borrows money of Lord Wolborough, to the indignation of Mary, who quits her father to join a sisterhood of lady nurses. The least probable incident of the story ensues, which is that the abandoned Adelaide, Lady Wolborough, preferring her revenge to the £5000 a year for life that is offered her, after getting a short enjoyment of luxury and pride by using her husband's name, insists on living in his house; which being denied, she refuses to touch his splendid allowance, sinking into the most squalid destitution. This is incredible, but it serves to inflict upon her the dire retribution which she is considered to deserve; being actually knocked down by a street vehicle, like the poor woman who died in the hospital, and suffering extreme misery, in one of the vilest slums of London, with an incurable injury to the spine, till she is rescued by "Sister Constance," Miss Delamere, with the aid of John Denham and a beneficent Dr. Mason. The wretched woman, however, remains for some time ignorant that Sister Constance is Mary Delamere, whom she had never before seen, but for whom she has conceived an intense hatred. When, at length, she is allowed—being not far from a dying condition—to go down to Wolborough Court, and to call herself its mistress, there are several passionate and pathetic scenes, ending with an almost tacit act of forgiveness, described with much power, and without any gushing excess in the language of emotion. It is scarcely needful to add that Mary Delamere, who had once been ironically called by her own father "the weaker vessel," being a woman of far stronger moral nature than any man, finally becomes the wife of Walter, Lord Wolborough, and the story closes with a serene prospect of domestic love and peace.

TESTIMONIAL PRESENTED TO SIR BACHE CUNARD, BART., BY THE MEMBERS OF HIS HUNT, MARKET HARBOROUGH, LEICESTERSHIRE.

LA MANDOLINATA.

The title means only a piece of music played on a mandolin the mandolin is an Italian variety of the guitar, as the banjo i an American variety, ascribed to the music-loving negroes o the Southern States, whose characteristic performances wer copied long ago, with a higher degree of artistic refinement by our old popular favourites, the Ethiopian Serenaders and Christy Minstrels. The Southern gift of spontaneous song which Nature has bestowed, with the frequent endowment of a fine voice, on the people of the Neapolitan provinces, though not in every district, obtains a suitable accompanying instrument in the mandolin. This vies with the Welsh or the Irish harp, if not of equal fame as a national symbol, in its association with the lyric strains which are cherished for ages in the memory of an imaginative race—the emotional essence of past experience, more profound than that of any recorded history, in the lives of preceding generations. New songs and new tunes, indeed, may from time to time be invented, or rather inspired, by the unfailing sentiments of love, regret, and pity, the tender wishes, the ardent longings, the youthful desires, the romantic hopes or dreams, the sad incidents of separation, of inconstancy, and of untimely death, which always and everywhere, among mankind, draw forth the utterance of natural feeling. The heart itself is an instrument which manhood and womanhood, at the susceptible period of life, must ever carry about with them, and which is played upon, just in the same way, by striving affections, as it was a thousand years ago—as when Catullus warbled his devotion to Lesbia; as in the isles of Greece, "where burning Sappho loved and sang"; as it was, no doubt, from the days of Adam and Eve, in the ever-renewed mutual relations of the human family. Imaginative emotion will find vent in poetry and music; and some little skill in these arts arises among the savage tribes of Africa or Polynesia, as well as in the ancient cultured civilisation of Europe. It is "the one touch of Nature that makes the whole world kin"; and this Italian lady in the picture, gracefully performing her sweet "Mandolinata," is doing the same that thousands of her sisters are doing, with strings more or less attuned to perfect melody, in different regions of the globe.

FOX-HUNT TESTIMONIAL.

A testimonial was presented to Sir Bache Cunard, Bart., of Nevill Holt, Market Harborough, Leicestershire, on Nov. 1, which is regarded with much interest in fox-hunting circles. The members of Sir Bache Cunard's Hunt subscribed to make him a gift that should testify their appreciation of the manner in which he has hunted the South Leicestershire country during the past ten years. It was decided by the contributors that the testimonial should take the form of a life-size fox, to be produced in the highest style of art, and to be cast in solid silver. The commission was intrusted to Mr. Rowland Ward, F.Z.S., of Piccadilly, who modelled the fox from life, representing the attitude just as reynard is drawing across an opening from covert to covert, and on the alert, as though in recognition of some suspicious sound or incident. The original model has been cast in solid silver, 519 ounces of the valuable metal being used. The figure has the merit of strong truthfulness to nature, and the work has a degree of artistic power which renders it superior to ordinary productions of the silversmith.

INTERNATIONAL TRADES CONGRESS

On Nov 10 the concluding sitting of this congress was held in St. Andrew's Hall—Mr G Shipton presiding, and M. Anseele (Ghent) acting as foreign chairman. Messrs. Broadhurst, Burt, Fenwick, Crawford, and Abraham were present. After a long discussion, taken part in by several English and foreign delegates, the following resolution was carried by four nationalities to two and passed; but the voting of the English delegates was, for the resolution, 11; against it, 31:—"This Congress is of opinion that, owing to the concentration of capital, and the relative weakness of trades' unions in proportion to the number of workers, it is impossible to further reduce the hours of labour without the aid of the State; and that in every case eight hours per day should be the maximum number of hours worked." On the motion of Mr. Burt, M.P., seconded by Mr. J. Wilson (Durham), it was resolved that—"Seeing that the huge armaments maintained by the Governments of Europe constitute a standing menace to the peace of the world, and impose terrible financial burdens on the industrial classes, this Congress recommends the democracy to give a mandate to their representatives to substitute the principle of arbitration for war in the settlements of disputes between Governments." — Miss Simcox (London) moved, and M. Keüfer (Paris) seconded, a resolution, which was carried, "regretting the absence from the Congress of any representatives of German, Austrian, or Russian trade unions"; and desiring to convey to the workers of those countries "the profound sympathy of the delegates with the difficulties against which they had to contend." It was announced that the next International Congress would be held in Paris in 1889, and the Congress closed with a few valedictory words addressed by the president to the foreign delegates.

A concert, with a full programme, is announced to be given at the Holborn Townhall on Nov. 28 in aid of the funds of the Machine Battery Tower Hamlets Rifle Brigade.

A species of bottle-nosed whale, with her calf, was captured on Nov. 10 by the fishermen in Ballycotton Bay. The whale measured 29 ft., its girth being 19 ft.

In opening the new drill-hall of the 2nd City of London Rifles, which has been erected in Farringdon-road, the Duke of Cambridge said no man had a stronger feeling for the Volunteers than he had, and nothing that he could do to support its interests and efficiency should be wanting.—At the Rainham Ranges, Essex, on Nov. 10, the prominent rifle shots of the City of London Volunteer Regiments competed for the Gold Badge of the City of London Rifle Association and the rifle championship. Some excellent scores were made. The competition was decided by an aggregate of two "shoots" at Queen's First Stage distances, one in the spring and the other on Nov. 10. At the close of the contest Sergeant J. J. Kellher, of the London Rifle Brigade, was declared the winner with the fine aggregate of 183 points—90 and 93. The Silver Badge was taken by Sergeant Tayton, London Rifle Brigade, with 180 (90 and 90), and the Bronze Badge by Private Elkington, London Rifle Brigade, 177 (91 and 86).

LA MANDOLI

KIESEL.

HIGHLAND INDUSTRIES.

There can be no doubt that the modern Fair Trade movement owes its origin as much to the fear of centralisation and its effects as it does to the calculations of mere economic profit and loss. Many who have not studied the political merits of Free Trade versus Fair Trade are yet sufficiently satisfied that it is ruinous for a country to allow its rural population to decay for lack of profitable employment. They perceive that the first essential of a nation's welfare is the physical health and strength of its individual units. Such health and strength obviously depend largely upon the preservation of a prosperous peasantry. The fate of other countries in which the population was allowed to become altogether urban rises before thoughtful eyes; hence many are ready to give countenance to any movement which promises to restore prosperity to our rural industries. While it may be true that wheat can be got from America at a cheaper rate than it can be grown in Britain, such thinkers argue that the doubtful gain to the nation's pocket means a certain loss to the national health; and they would prefer to pay a trifle more for their loaf in order to see a larger population thrive in the country districts.

Students of æsthetics, again, do not cease to express their regret at the decay of ancient handicrafts in consequence of the increase of machine manufacture. They point to the pottery of Greece and Etruria and to the brass-work of Hindustan, all hand-made, and all, even the humblest article, bearing the individual grace born of loving artist fingers; and they compare these with the uncouth pots and the tasteless mouldings turned out by the gross by modern machinery. As the slightest sketch by the human hand contains an interest not to be found in the finest photograph, the apostles of culture argue that much of the picturesque charm of life has been lost in substituting for human handwork the monotonous philistinism of machinery products; and they would be glad to welcome any prospect of return to the more individualistic methods of bygone days. To people of taste the grey cathedral, growth of long and patient labour, and bearing in window mullion and in column capital the thoughtful handwork of individual men, naturally appears fairer and better than the spick and span new chapel turned out to pattern by steam machinery. And in the same way the carven platter of ancient use is preferred to the coarse and gaudy crockery which has taken its place.

The social economist, too, is beginning to look askance on the vaunted advantages gained by means of the labour-saving apparatus of modern invention. While relieving multitudes from painful toil, this new force, Steam, he is beginning to perceive, has not relieved these multitudes from the necessity of toiling, but has merely taken from them the means of livelihood. The weaving, for instance, which once afforded employment and daily bread to many a prosperous village throughout the land, is now performed by steam-power in the hands of a very few capitalists. The power of steam, the social economist contends, has been a benefit, not to the working population at large, but to the few individuals who have succeeded in securing its monopoly; and he begins to regard a return to more primitive methods of production as the only effective means of lessening the great and ominous multitudes of our unemployed. It would be better, he considers, to have fewer fortunes made by wholesale manufacturers, if by such means the country could be covered again with small handicraftsmen, each happy in the perfection and the reward of his work.

And there can be no doubt that in many departments the production of the individual craftsman is immensely superior to the work turned out by crank and piston. The keen and true steel blades hammered on the anvil of Andrea Ferrara were something very different from the bayonets which bent double against Arab ribs in the Soudan; and everyone knows by experience how the shaggy tweeds woven in the cottage hand-looms of the island of Harris outwear the steam-made cloths of Yorkshire. For the sake of common honesty and simple economy, therefore, the revival of rural industries is an object greatly to be desired.

A return, however, to the fiscal laws of forty years ago is not within the horizon of practical politics. A tax upon corn would mean an immediate rise in the price of bread, while the consequent general rise in wages would be less perceptible and much slower in arriving—a state of affairs which no Government would be bold enough to face. Encouragement to the strengthening of peasant population by this means must, therefore, for long be laid aside as hopeless. Equally impracticable appears the direct crusade of æstheticism and the higher socialism against the employment of steam. A great institution is not likely to disappear simply because it disagrees with the sentiments of a few theorists. What is desirable, therefore, both for reasons of taste and of economics, is the discovery and encouragement of rural means of livelihood which will not be affected, as agriculture has been, by foreign importation, and which will be able to hold their own against the competing powers of machinery. Some of these means, possible to crofter and cottar, have already been pointed out—such as the keeping of bees, the breeding of fowls and rabbits, and the growing of flowers and fruit. And recently public notice has been drawn to further possibilities in the same direction by the exhibition of home-made goods in the Townhall of Inverness.

The movement of which this is the outcome, inaugurated some four years ago by the Duchess of Sutherland and the Marchioness of Stafford, has already attained conspicuous success, and promises to result in a revival of many of the ancient home-industries of the Highlands. Goods spun, woven, and knitted by crofters' wives and daughters from the fleeces of their own sheep are there to be seen; while spinning-wheels, picture-frames, baskets, fishing-rods, and pieces of rustic furniture indicate possibilities of remunerative employment for more than the mere leisure hours of the crofters themselves. Some idea may be had of the benefit which might accrue from the development of such domestic industries, from the fact that last year, the second of the exhibition, the sum of £150 was earned in this way by one parish alone, containing a population of little over 1200.

Many products, those bordering upon the arts for instance, such as wood-carving, are, it should be remembered, impossible to machinery, and are therefore in no fear of being undersold by that competitor; while other home-made goods, like the Harris tweeds and Shetland shawls, by their intrinsic beauty, durability, and excellence, can well hold their own against all comers. Even were these goods unable to make their way into the open market, it should be kept in mind that, a hundred-and-fifty years ago the Highland communities were all but self-contained, manufacturing, each for itself, nearly the whole of the materials necessary for life; and there are many good reasons to be advanced for a return, in some degree, to these simple methods of provision. By the revival of the old Highland industries much may be done in the near future to render many a forsaken village once more prosperous and populous; and already the happy result of the movement inaugurated among these northern glens affords proof that attention has been successfully directed to the subject.—G. E.-T.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

H M Prideaux.—We like the game and have marked it for insertion at earliest opportunity. The demands on our space have so much increased that the delay is unavoidable.

H Risdig (Hatten, Holland).—1. R to Kt 4th, K to R 7th; 2. R to Kt sq, P to Kt 7th; 3. Q mates. The variations you will be able to discover for yourself.

W Parsons.—Problem much better, but still not satisfactory. For instance, if 1. P to R 4th, B takes P; 2. Kt takes B (ch), K moves; 3, either Kt or Q can mate. Generally speaking, the play is not smart enough.

Columba.—Problem does not stand examination. If Black defends by P takes P, 2. P to Q 4th (ch), K to B 4th; 3. Kt or R mates.

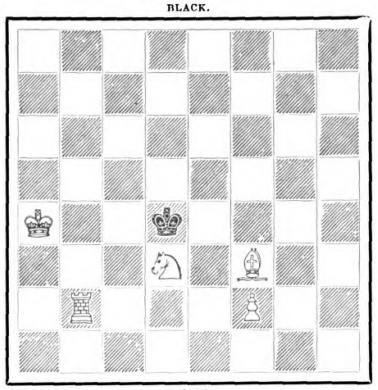
J W Pybus.—We cannot decipher your diagrams. If you used plain initials for White and encircled ones for Black, we could then give you our opinion of your problems.

W Biddle.—Your problem contains many neat ideas, and shall be published in due course.

E F F.—Yes; first move is sufficient, if right. The solution you give of No. 2326 is wrong.

Correct Solutions of Problem No. 2321 received from G B Hewett (Middle Colaba); of No. 2323 from Joseph T Pullen (Launceston); of No. 2321 from Hughes Morris (Cardiff), A G Bagot, and Charles Etherington; of No. 2325 from L A W, Noordwijk (Holland), F W Ensor (Cardiff), W S (Sheffield), P C (The Hague), Cholwell, A G Bagot, Dr Gustav Waltz (Heidelberg), Janet, Paul Von Szeliski (Vienna), Joseph T Pullen, and A W Hamilton Gell (Exeter).

Correct Solutions of Problem No. 2326 received from Julia Short, L Desanges, Howard A, E Casella (Paris), W S (Sheffield), Jupiter Junior, J Ross (Whitley), D Methoy (Galway), Martin F J Blackie, F C Cook (Earlsfield), A W Hamilton Gell (Exeter), J Hall, Dawn, A Newman, Dr F St. Peterhouse, J Dixon (Colchester), G V (Brompton), Wilson (Grange-on-Sands), Columba, Mrs Kelly (Lifton), F G Tucker (Pontypool), E L Nisbett, R F N Banks, Dane John, R Worters (Canterbury), J B Tucker (Leeds), J Gistrin (Reims), Thomas Chown, W R Baillie, T Roberts, E Louden, James Sage, C S, Cholwell, Dr Waltz (Heidelberg), Shadforth, Alpha, A G Bagot, E Phillips, G J Veale, J Coad, and Percy Ewen.



SOLUTION OF PROBLEM No. 2324.

WHITE.	BLACK.
1. B to Q 4th	
2. Mates accordingly.	Any move

PROBLEM No. 2328.

By Hereward.

BLACK.

WHITE.

White to play, and mate in four moves.

CHESS BY CORRESPONDENCE.

A well-contested game between Messrs. G. B. Fraser, of Dundee, and Mr. G. F. Barry, of Dublin, played in the correspondence tourney organised by Mr. Fraser.

(Steinitz Gambit.)

WHITE (Mr. F.)	BLACK (Mr. B.)
1. P to K 4th	P to K 4th
2. Q Kt to B 3rd	Q Kt to B 3rd
3. P to K B 4th	P takes P
4. P to Q 4th	Q to R 5th (ch)
5. K to K 2nd	P to Q 4th
6. K Kt to B 3rd	

A move introduced by Mr. Prisoe to obviate the common adoption of the later form of the Steinitz attack, which after 6, P takes P, White must submit to by reason of Mr. MacDonnell's suggested reply of Q to K 2nd (ch).

6.	B to K Kt 5th

If Black had now played Q to K 2nd, instead of the text move, White was prepared to leave the beaten track, and continue with P to K 5th, which yields a fairly good game.

7. P takes P	Castles
8. Q B takes P	B takes Kt (ch)

Black might, we think, have given check, here, with Rook with more effect.

9. K takes B	Q to K B 3rd
10. P to K Kt 3rd	Kt tks Q P (ch)
11. K to Kt 2nd	P to K R 4th
12. B to Q 3rd	P to K Kt 3rd
13. R to K B sq	Q to Kt 2nd
14. B to K 3rd	Kt to R 3rd
15. B takes Kt P	P to Q B 4th
16. B takes R P	

Perhaps an imprudent capture, but too tempting to resist. White is exposed thereby to a very sharp and dangerous attack.

16.	B to Q 3rd
17. B takes Q Kt	

A premature exchange, which adds to White's embarrassment.

17.	P takes B
18. Kt to K 4th	B to K 4th
19. P to Q B 4th	P to K B 4th
20. Kt to Q B 5th	Q R to K Kt sq
21. Q to K B 3rd	Q to K R 2nd
22. Q R to K sq	B to Q 3rd
23. P to Q Kt 4th	P to K B 5th

Threatening the deadly move of Kt to K B 4th.

24. Kt to K 4th	B to K 4th
25. P to K R 4th	

A hazardous looking rejoinder; but the only thing left to avert immediate disaster.

25.	Kt to K B 4th
26. B to K Kt 4th	K to Kt sq
27. B takes Kt	Q takes B
28. Kt to Kt 5th	B to Q B 2nd

Had Black replied with 28. R takes Kt, then White's proper answer would be R takes B.

29. K R to B 2nd	Q to Q 2nd
30. K R to K 2nd	P takes P
31. Q to K B 7th	Q to Q B sq
32. R to K 6th	

This Rook is well posted, and contributed in a large measure to the successful issue of the contest.

32.	R to K B sq
33. Q to K Kt 7th	P to Q 6th
34. Kt to K B 3rd	B to B 5th
35. Q to Q 4th	P to Q 7th
36. R to K R sq	

The Pawn cannot, of course, be taken without loss.

36.	K R to R 4th
37. R to K B sq	K R to B 4th
38. Q to K 4th	B to Q B 2nd
39. Kt takes P	R takes R
40. Kt takes R	R to B 7th (ch)
41. K to Kt sq.	R to B 5th
42. Q to Kt 6th	

The only move to maintain the hold.

42.	R to K B sq
43. Kt to K 3rd	R to Kt sq
44. Q to K 4th	Q to K B sq
45. Kt to K B 5th	B to Q sq
46. P to Q 6th	Q to B 2nd
47. R to K 7th	B takes R
48. P takes B	R to K sq
49. Q to K 5th (ch)	K to R sq
50. Q to Q 5th	Q to K B 3rd
51. P to K R 5th	P to Q R 3rd
52. P to K R 6th	Q to Q B 6th
53. K to Kt 2nd	Q to K 8th
54. Q to Q 8th (ch)	K to R 2nd
55. Q to Q 4th (ch)	

All this ending is played on both sides with great precision.

55.	K to R sq
56. P to K R 7th	Q to K 7th (ch)
57. K takes P	Q to K 8th (ch)
58. K to B 4th	Q to B 8th (ch)
59. K to Kt 5th	Q to K Kt 7th (ch)
60. K to B 6th	R to B sq

If instead, 60, R to K R sq, then 61, Q to Q 4th (ch), K to R 2nd; 62, P queens, Q to Kt 7th (ch); 63, Q to Q 4th, Q takes Q; 64, Kt takes Q, R takes Q; 65, K to B 7th, and wins.

61. Q to Q 8th,	and wins.

Efforts, which we hope to see successful, are being made to arrange a match between Lancashire and Yorkshire. The stimulus given to the latter county by the Bradford Congress makes it probable that the breakdown of the negotiations which happened last year will not be repeated on this occasion.

A selection of games played in the Masters' Tournament of the Bradford Congress has just been issued from the office of the *British Chess Magazine*. The value of the book entirely centres in the copious notes by Mr. W. H. Pollock appended to each game, many of them suggestive of the brilliancy so frequent in his play. The work done here raises him into the very front rank of analysts, and a study of it will be of the greatest service to everyone who seeks to improve his own style of play.

A new chess club has been started at Honiton, and meets at the Dolphin Hotel every Friday evening; Mr. Sydney Meymott is hon. sec.

The City of London Club tournament is now steadily progressing at the rate of a round per week. In the leading section Mr. Loman stands first, closely followed by Messrs. Block and Ross. In the second and third sections the leaders are Messrs. Stibel, Serraillier, Hennell, Smith, Coupland, Jones, Nelson, Evans, and Hirschmann.

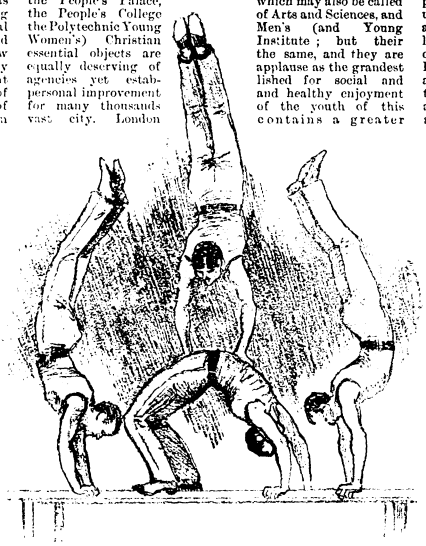
THE BELLES-LETTRES.

In the volumes of agreeable autobiographical reminiscences which Voltaire is pleased to call his "Commentaire Historique," that admirable wit observes, with respect to his abortive effort to study law, that his inclination for poetry was greatly strengthened by his disgust at the mode in which jurisprudence was taught in the law schools; and he adds: "This alone sufficed to turn me aside to the cultivation of the *belles-lettres*." Recalling this passage to my mind the other day, I could not help lamenting the decay into which the *belles-lettres* have fallen, the disrespect with which they are treated by a restless and impatient generation, and the unhappy prominence given to pursuits which have not the same sterling qualities of distinction and excellence to recommend them. You may see men of undoubted respectability taking to the study of history, and cackling, like a hen over her first egg, if they find in the yellow manuscripts of some spiteful foreign emissary a statement which reflects on the virtue of Queen Bess, or if they unearth the gratifying fact that their pet hero was born, let us say, on a Monday morning, whereas all previous scribes had represented him as coming into the world on Monday evening! And there are others who call themselves scientists, and compile elaborate disquisitions on the æra of the sea-weed, or discourse on cycles and epicycles and the equilibrium of worlds; but none, so far as I can see, get any nearer than their ancesters got to a solution of the two great mysteries of the "Whence" and the "Whither." And there are unhappy wights who make a study of politics, of political economy, of the Sugar Bounties, and the irrepressible Irish Question, and grow red in the face over tithes, rent-charges, ground-rents, perpetual pensions, and similar affairs, going down to their graves before their time, done to death by interminable talk and ponderous bluebooks. There are others—deadly enemies to their species—who concoct sensational or "realistic" novels, and give feeble-minded persons the shivers with lurid pictures of murder and mystery in African deserts or Hansom cabs or railway trains; heaping horror upon horror, as the giants of old heaped Pelion upon Ossa, until the shuddering intellect reels, staggers, and falls beneath the damnable burden that is pressed upon it! Oh, my friends, what a relief to escape from all these conspiracies against one's peace of mind, and to find a pleasant and secure refuge in the blessed haven of the *belles-lettres!*

Wise in their day and place were our ancestors—in the eighteenth century, *par exemple*—when, with abundant leisure at their command, undisturbed by the iniquities of psychological research or the worry of social problems, and free from the incubus of the fiction of the shambles and the dissecting-room, they sought the terrace i' the sunshine, or the oriel that opened on Brown's latest creation in landscape-gardening, crossed one well-shaped leg over the other, smoothed down their ruffles, and abandoned themselves to the fascination of old Montaigne's shrewd gossip or Cowley's scholarly reflections. They had also—lucky men!—their *Tatlers* and their *Spectators;* the urbane humour of Steele, and the refined suavity of Addison. I wonder, by-the-way, whether the author of "Sir Roger de Coverley" is much read now-a-days. Yet what a fascination there is in his easy style and his graceful way of putting things! Your modern essayist cannot affirm that two and two make four without a preliminary flourish of fireworks. Like soda-water, indeed, all the sparkle and effervescence are in his initial paragraphs—the residuum is so flat and savourless as mortally to offend the palate. In the old *belles-lettres* you meet with no such *tours de force*. There are no rockets—but, then, there are no sticks. Look at Addison's delightful paper on the "Uses to which One can turn One's Enemies." A writer of to-day would begin with erudite references to Corsican vendettas or Japanese feuds, and fatigue the ingenuous reader at the outset with his ingenious surprises; but Addison starts with as pleasant an amble as that of a well-trained palfrey:—"I have been very often tempted to write invectives upon those who have detracted from my works or spoken in derogation of my person; but I look upon it as a particular happiness that I have always hindered my resentments from proceeding to this extremity. I once had gone through half, but found so many motions of humanity rising in me towards the persons whom I had severely treated that I threw it into the fire without finishing it." And so he goes on, in the same light and airy fashion, leading you easily up to the moral he wishes to impress upon you, while you feel inexpressibly soothed by the melodious flow of a stream so pellucid and so sweet.

In the same mood, though with more glitter of antithesis and pomp of imagery, wrote Hazlitt and De Quincey; and, in our own time, though with greater incisiveness, Matthew Arnold. I presume to recommend these humane critics to the intelligent person whose gorge rises at "detective" stories, and whose intellectual industry is not equal to the study of the Cyclopædia. For myself, I would rather read the critical essays of a Jeffrey or a Macaulay, with all their alleged "want of insight," than those of Tinto or Verdigris, with their sham raptures, their egotistical rhetoric, and their insufferable air of superiority. Ye Gods! how these men pat Milton on the head, put Dryden through his paces, and sneer at the author of "Childe Harold"! I prefer *les grands seigneurs* of literature, who behaved to each other—and to their readers—with such high-bred courtesy and so much old-world grace, to the swashbucklers who think of nothing but thrust and parry, and count their imaginary victims like so many Bobadils.

The great charm of the *belles-lettres* I take to be their geniality, their sanity, their refinement. They refresh one with their reasonable views of life, their blandly humorous comments on men and things, their polite estimates of authors and their books, their prevailing atmosphere of light and sweetness. James Russell Lowell, in his delightful essays "My Study Windows"; Holmes, in "The Autocrat of the Breakfast-table"; Helps, in "Friends in Council"; and Henry Taylor, in his "Notes From Life"—these excellent writers perpetuate the best traditions of the *belles-lettres*. Go back to an earlier generation, and you will find much that is happily in accordance with their temper in Conversation Sharpe's "Essays in Prose and Verse." The elder Disraeli is now much derided by the orthodox historical inquirer, whose dreadful mission it is to "reverse the verdicts of history"; but you may pass an hour by the winter fireside over the chatty pages of his "Curiosities of Literature," and be none the worse for it. Go farther back still, and what better companionship can you desire than my Lord Shaftesbury's "Characteristics"! I am speaking here of English writers only: if I crossed the Channel. I should find in the *belles-lettres* an almost inexhaustible field of survey. The sum of it all is that, if you wish for a sound mind and a clear conscience—if you would enjoy the precious possession of tranquillity and contentment—if you would secure the love and confidence of your wife, your children, and your mother-in-law—if you would sleep the sleep of innocence, unvexed by grisly phantoms from the realms of the Sensational—if you would live as blameless a life as Homer's Ethiopians or Sir Thomas Malory's "King Arthur"—you will shun the temptations with which designing publishers surround you, and give yourself up to the pure and wholesome pleasures of the *belles-lettres*.



NEW BOOKS.

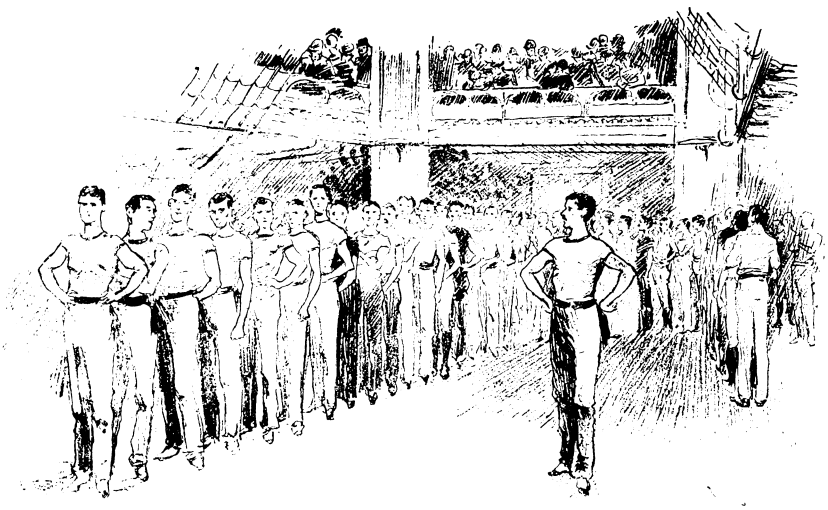
Reminiscences of J. L. Toole. Related by Himself, and Chronicled by Joseph Hatton. Two vols. (Hurst and Blackett).—The eminent comedian, and generally sympathetic and agreeable actor, whose sayings and doings, public and private, are Boswellised by a knowing personal friend in these two volumes, is an established popular favourite and a gentleman deservedly enjoying high social esteem. There is no anecdote here told of him that will at all diminish the regard in which he has long been held, not only as an ornament to the London stage and an example of the respectability of his profession, but as a worthy and amiable man. Yet we can hardly say that much has been added by this book to the information possessed by ordinary playgoers, and by those accustomed to hear or read of current theatrical affairs during the past thirty years. Mr. Toole's position as a dramatic artist is to a certain degree unique and independent; it has been attained more by the individual impersonation of new comic characters, which owed their original creation as much to him as to the writers of the plays, than by improving on the interpretation of old parts which had gathered a traditional record of former performances. It is different with such an actor as Mr. Irving, whose thoughtful original renderings of Shakspeare cannot escape being implicitly compared with those of an imposing procession of famous actors, and even being judged with reference to old critical standards. The same remark might apply to comedians of the old school, within the memory of this generation, dealing with the still abiding conceptions of authors like Goldsmith, Sheridan, and Colman. Whatever is good in modern dramatic art is no doubt capable of being studied analytically by some commentator with sufficient insight into the essentials, motives, and complex workings of the infinitely diversified play of feelings in human nature. The study of these in comedy, and even in farce, may be as profound, and is certainly as difficult, as in heroic or romantic tragedy: but our critical literature has made little provision for it, and Mr. Hatton's undertaking is not so ambitious. He does not attempt to show why or how Mr. Toole is a great actor in his own line of characters; or in what special qualities Mr. Toole, on the stage, differs from Mr. Buckstone or Mr. Charles Mathews and several other comedians within our remembrance. But he draws the portrait of Mr. Toole, fairly and pleasantly, without excessive gushing eulogy, as a clever, diligent, and successful member of the theatrical profession, who has borne his merited success with discreet modesty, and whose genial temperament, with his relish of harmless fun, makes him a delightful companion. We hope that many successful men in other professions are equally good fellows; and it is possible that many whose business is not funny can amuse their private acquaintance with jokes and droll little stories quite equal to those reported of Mr. Toole. The practical jokes, indeed, though innocent and honest tricks of their kind, were now and then performed at the expense of strangers with a freedom scarcely permitted to merry gentlemen in the ordinary walks of life: but Mr. Sothern was as bad as Mr. Toole in slapping the back of an unknown old man dining at a chop-house and calling him "George." This and several other stories have already been printed in some English and American papers, which Mr. Hatton explains; but not a few of his readers may agree with us in wishing that they had never been printed. It must, however, be allowed that professional actors, who undergo the severe mental strain of artificially sustaining fictitious parts every working night of their lives, are more in need than other men are of permission to give vent to their natural high spirits in sudden outbursts of queer demeanour, or in extemporised mystifications. They are apparently, like sitters in a congregation in sermon-time, or like people listening to a long trial in a court of law, often disposed to laugh, in spite of their sober judgment, at the very smallest hints of the ludicrous; for most of the jokes, outside the theatre, which are stated to have caused such great diversion to Mr. Toole and his comrades, would provoke but a feeble smile in common conversation. Although Mr. Toole, in private life, breathes the air of pleasantry, no comedian that ever enraptured an audience can possibly be such a genuine humourist off the stage, as he is in his artistic performance; nor can any tragedian, at home or at his club, be so grand and sublime. It is, therefore, no wonder if Mr. Hatton's collection of drolleries, which might be called Tooleries, be found to contain much that is of an extremely mild quality, and that would scarcely be presented, apart from Mr. Toole's memoirs, as select specimens of wit and humour. The book is amusing, nevertheless, by its consistent exhibition of a sprightly, kindly, and vivacious character, accompanied by others, his equals or superiors in talent and in public distinction, with whom he has always lived on terms of cordial friendship. Mr. John Lawrence Toole, a person, as every Londoner is aware, of the late City Toastmaster, was born in March, 1832, in St. Mary Axe; he began life as clerk in a wine-merchant's office, but saw plays at the East-End theatres, and joined an amateur dramatic club, where he showed talents that won the notice of Mr. Charles Dillon, and gained him an engagement at Dublin in 1852. He was afterwards at the Edinburgh Theatre, under Mr. Robert Wyndham; but in September, 1856, came to London and played at the Lyceum with Mr. Dillon in "Belphegor." In 1851, he was engaged by Mr. Benjamin Webster for the Adelphi, when Wright retired; and Webster, a great actor and great manager, probably contributed much to perfect Toole as a dramatic artist. Paul Bedford, too, was there, and Toole's frequent association with him must have developed his genius for fun. One of his greatest original successes was in the Caleb Plummer of the dramatised version of Dickens' "Cricket on the Hearth," produced at the Adelphi in 1862; it proved that Toole was not merely a comic actor, but a genuine sympathetic humourist, thoroughly in the vein of Dickens at his best. We have often wished that we had more of Dickens adapted for the stage, with Toole for his congenial interpreter. He was afterwards at the Queen's Theatre, with Mr. Alfred Wigan, the company including Mr. Henry Irving; and in 1869 went to the Gaiety, where he played with Phelps and Charles Mathews. In Mr. H. J. Byron's interesting domestic drama, "Dearer than Life," Mr. Toole gave another proof of his real power in the serious, natural, simple representation of human feeling, in the part of Michael Garner. The half-pathetic, half-comic part of the Cheap Jack in "Uncle Dick's Darling," produced in 1869, was also written for him by Mr. Byron; but the inspiration was evidently that of Dickens. Toole was born for this interesting and instructive line of dramatic work, not for mere farcical effects, however clever and successful he may be in them. He now rose to high distinction; and in 1874, on his going to America, received the signal compliment of a public banquet, presided over by Lord Rosebery, followed by another at Birmingham, with Mr. George Dawson in the chair. The account of his later doings is given in a discursive and incidental manner, in detached fragments here and there scattered through the second volume, in reports of talk between himself and Mr. Hatton during an excursion to York and Whitby, intermixed with descriptions of places, with reprints of speeches and newspaper articles, and with various personal and social reminiscences: but the regular playgoer who is attached to Mr. Toole can supply the missing links. In 1879 the Folly Theatre, in King William-street, Charing-cross, became Mr. Toole's house, which has been officially styled "Toole's Theatre" since 1882. Everybody knows it well; no one likes it better than his Royal Highness the Prince of Wales, who has occasionally had Mr. Toole as his guest at Sandringham. This is a going concern, and we hope it will go on, with Mr. Toole in full force, to the end of the nineteenth century. It is unnecessary here to dwell on the merits of the chief plays, "A Fool and his Money," "Not such a Fool as he Looks," "The Upper Crust," "The Birthplace of Podgers," "Trying a Magistrate," the burlesque of "Claudian," "The Butler," and "The Don," with which Mr. Toole is identified. Mr. Hatton's minute inventory of the furniture and adornments of Mr. Toole's dressing-room at the theatre, and of his house somewhere near Piccadilly, can be yet more easily dispensed with. His book is, nevertheless, rather entertaining; and its contents are so mixed that every reader who has ever cared for any particular actor or actress in our times will find some cherished "reminiscence" awakened by its perusal. Macready, Phelps, Sheridan Knowles, Buckstone, Mathews, Robson, Webster, Keeley, Wright, Paul Bedford, Fechter, G. V. Brooke, Sothern, Irving, Miss Ellen Terry, Mrs. Kendal, and Mrs. Bancroft, with others not forgotten, are brought into these sketches of the theatrical world. Their portraits ornament many pages, and must always be pleasant for those to see to whom their living faces were familiar on the stage, which has lost the great majority of them, years and years ago.

The second part of Mrs. Charles Hetley's *Native Flowers of New Zealand* (Sampson Low, Marston, and Co.) fully sustains the well-deserved credit obtained by the first part. In this number the most attractive plants depicted are some of the ratas (Metrosideros), the handsomest of the climbing New Zealand plants. The white rata is confined to the northern part of the North Island, where it is often seen clinging to the trunks of the Kauri pine and other large forest trees. The shrubs classified under the name of Senecio form an important family in the New Zealand flora, and the flowers of some of the varieties are extremely beautiful, especially that named after Dr. Hector, and discovered by him in the province of Nelson. The large proportion of white-flowered plants in New Zealand cannot fail to attract attention, but it does not enter into the scope of Mrs. Hetley's catalogue to discuss the cause. The illustrations are in the best style of modern chromo-lithography, and do honour to the printers and publishers.

THE POLYTECHNIC YOUNG MEN'S CHRISTIAN INSTITUTE.

It is a long distance across London from east to west—from Mile-End-road to Upper Regent-street—and there are certain obvious differences between that noble popular institution, the People's Palace, which may also be called the People's College and the Polytechnic Young Men's) Christian Institute; but their essential objects are the same, and they are equally deserving of applause as the grandest agencies yet established for social and personal improvement and healthy enjoyment for many thousands of the youth of this vast city. London contains a greater number, and a greater diversity of classes and characters, than any other city in the world ever contained, of young persons above the ordinary school age who are employed in various ways, who have their free hours of leisure, and whose chief want has been that of opportunities for the true education which is combined with recreation of mind and body—the only true education for adults, in general: systematic exercises, both intellectual and physical; the pursuit of knowledge, itself a great delight; the acquirement of skill, which is even more delightful: and the comradeship, in study and in sport, of their fellow-collegians, learning from the same instructors, and playing in the same clubs. These secular benefits, with the means of obtaining a higher culture and more complete than seemed until lately within the range of possibility for those not born to the advantages of fortune, are now provided for adolescence, in the lower middle classes and in the working classes, by perfectly organised institutions on a magnificent scale, which are about to be multiplied in other parts of London.

ON THE PARALLEL BARS.



To provide technical and scientific instruction in the useful arts, accompanied with actual workshop teaching and practice, in harmony with ordinary trade customs of apprenticeship and employment, is an object successfully combined with advanced general education.

The Young Men's Christian Institutes, of which there are many in London and its suburbs, have contributed greatly to the general movement, and are, while professedly seeking to associate broad religious principles with full self-culture and innocent diversion, conducted in no spirit of bigotry, and certainly in no ascetic spirit. They prove, in the most practical manner, by actual performance, that Christianity, rightly understood, is consistent with every wholesome form of social pleasure and with every personal predilection for any kind of study or taste or mental exertion, and for any bodily exercise, athletic or graceful, conducive to "a sound mind in a sound body." These objects, without the slightest pretension to impose a test of religious belief on its members, are strenuously maintained by the great institution in Regent-street. It owes its present prosperity to one benefactor, Mr. Quintin Hogg, who has for years past been spending on it not only very large sums of money, out of his own purse, but also continuous labour, thought, and care, inspired solely by zeal for human welfare from the highest Christian motives. This gentleman (we henceforth borrow an article from the *Times* of April 23 in the present year), the youngest son of the late Sir James Weir Hogg, once Chairman of the East India Company, and brother of Lord Magheramorne, is the head of a firm of merchants in Rood-lane, and for twenty-four years—in fact, ever since he left Eton—he has devoted his days to his business and almost every one of his evenings to work among the boys and young men of London. At first he started with a ragged-school in the Drury-lane district, which, after a while, was changed into a working boys' home. In 1873 there was added to this an institute founded "for the purpose of endeavouring to withdraw elder boys from evil surroundings." It was in Endell-street, midway between Drury-lane and Seven Dials, that this institute was first opened, and shortly afterwards it was transferred to Long-acre, occupying part of the building formerly the Queen's Theatre. Six or seven years ago, the old Polytechnic Institution, associated in our memory with recollections of the diving-bell and Professor Pepper, ceased to exist, and the building came into the market. Mr. Quintin Hogg came forward and bought it, paying for it, and for the cost of enlarging it and fitting it up, over £60,000. In its new quarters, it became a great social club for young lads of the artisan class, a great institute of technical education, a day school for middle-class boys; and its advantages were extended this year by the addition of another large house a few doors off for the accommodation of young women. Mr. Hogg not long ago took Merton Hall, Wimbledon, with about twenty-seven acres of land attached, and this ground is now turned into one of the finest playgrounds in England. Every Saturday afternoon in summer hundreds of the lads are employed in playing cricket or lawn tennis, and one of Mr. Hogg's principal lieutenants is Mr. J. E. K. Studd, a cricketer of Cambridge fame. The success of the Polytechnic Christian Institute has been astonishing. More than 10,000 boys and young men have their names on its books, and already the second house has 800 young women upon its list, most of them the sisters or the friends of the members of the institute. The cost of maintenance amounts to between £14,000 and £15,000 a year, the receipts from fees to about £9000, and the deficit, which thus amounts to between £5000 and £6000 a year, has been till now entirely met by Mr. Quintin Hogg. He has, roughly speaking, spent £100,000 upon his scheme, and he cannot continue much longer to meet the large deficit in the same way. His desire is to find help which shall enable the institute to be placed upon a permanent footing. The Commissioners of City Charities have undertaken to give the Polytechnic an endowment of £2500 a year on two conditions:—(1) That he should obtain a long lease of his premises; (2) that he should raise a sum of £35,000 by private subscriptions. The trustees of the Portland estate have given Mr. Hogg a formal promise of a ninety-nine years' lease. Mr. Hogg has already appealed to various friends of his own, and has succeeded in raising about £18,000. Mr. W. M. Campbell—Mr. Hogg's partner, and a Governor of the Bank of England—has given £10,000; Messrs. J. A. Denny and E. M. Denny, £1000 each; Mr. Gurney Shepherd, £1000; and an anonymous friend, £2000. There still remains, however, about £17,000 to be raised. Mr. Hogg feels constrained to appeal to the public to save this flourishing and most useful institution.

The Polytechnic Institute is remarkable for the elaborate system of technical instruction which is open to its members. They are admitted on payment of a subscription of 3s. per quarter, which entitles them to the free use of the library, social rooms, and gymnasiums, and admission to all the entertainments; while for the technical classes small fees have to be paid. The classes are of two kinds, science and art classes, which are held in connexion with the Department at South Kensington; and industrial classes, which are more or less related to the City and Guilds of London Institute of Technical Instruction, and to the London Trades Council. The industrial classes, again, are subdivided into classes of mechanics and into "practical trade classes" for apprentices and young workmen, and it is these last which are the special feature of the institute. Among them we find classes for various branches of engineering, for cabinet-making and carpentry, including such subordinate departments as the making of staircases and hand-railing; we find classes in wood and stone carving, in tailor's cutting, in sign-writing, and in practical watch and clock making; classes in carriage-building, in printing, in land surveying and levelling, in plumbing, and in toolmaking, and many other trades. In all these cases it is a condition that no one is to be admitted who is not already engaged, say as an apprentice, in the trade. In the engineering-room, where there is machinery worked by a central gas-engine, a dozen young men may be seen forming a screw, or adapting some roughly-cast bolt to the required purpose, and the room is full of iron lathes and other small machines, every detail of which has been made and finished on the spot by the boys.

The variety of other classes is very great, including English grammar and literature, geography and history, arithmetic and mathematics, Latin, Greek, French, and German, chemistry and natural philosophy, and drawing. It should be stated that the fees for the classes vary from 2s. 6d. to 10s. 6d. per quarter to members of the institute, non-members being allowed to attend on payment of an increased fee. Mr. H. J. Spooner lectures on geometry and machine-drawing, Mr. L. J. Butler on carriage-building, Mr. Andrew Clark, F.R.C.S., on first aid to the injured, Mr. Hasluck on elocution, Mr. Herrmann on watch and clock making, Messrs. Horton and Wilson on shorthand-writing, Mr. H. L. Ramsay on sign-writing, Mr. George Scarman on upholstery, cutting, and draping, Messrs. Charles Mitchell and Young on building construction, Mr. H. W. Richards on brick-cutting; and in the ladies' department, Mrs. Elliot Scrivener on dressmaking and dress-cutting. The results are shown by the success of the Polytechnic pupils in the different technical examinations. The system has been highly commended by the London Trades Council, and by two Royal Commissions of Inquiry.

The visitor to the Polytechnic, any weekday evening, will find every room occupied by numbers of lads and young men, from seventeen years old upwards, either harmlessly amusing themselves or studying in class. There is a refreshment and reading room, where some boys are having tea or supper, some are reading the newspapers, some are playing chess or draughts. One great room in the summer is a swimming-bath; in the other seasons of the year, comfortably carpeted and arranged with chairs and

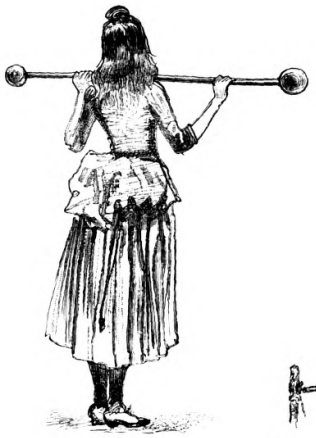
tables, it is the chief reading-room. In another room we find a debating society. In a hall where the chemical lectures used to be delivered, and where now Mr. Hogg holds his Sunday services and classes, a number of youths are going through military drill. In the larger hall, the gymnastic instructor is taking his class through their exercises. Nearly a hundred lads are there, most of them in flannels, and are forgetting the workshop and the counter in the physical delight of exercise. The gymnasium, in which our Artist made his Sketches, is under the direction of Colour-Sergeant Elliott, late of the Scots Guards. There are squad and mass exercises every evening; and instruction is given in single-stick, fencing, handling the dumb-bells and Indian club, and the bar-bell, exercises on the horizontal bar, the parallel bars, with the rings, on the trapeze, and in other ways. The girls' gymnasium is open on Tuesdays and Thursdays to members of the Young Women's Branch of the institute, which is located at 15, Langham-place, and is open every evening, except Sunday. The Polytechnic swimming-bath is also reserved one night in the week for the female members of the institute, who have admission to the lectures, concerts, and entertainments, and the privilege of joining any of the classes at greatly reduced fees, while many suitable classes are held for young women only.



Among the various societies for young men connected with the Polytechnic are the Debating Society or "Parliament," the Athletic Club at Merton, the Cycling Club, the "Ramblers" for pedestrian excursions, the Harriers who meet at Willesden, the Company of Rifle Volunteers (4th Middlesex or West London), the Volunteer Artillery Battery (No. 7 of 1st City of London), the Medical Staff Corps, the Military Band, the Orchestral Society, the Choir and Choral Society, the Chess and Draughts Club, the Sketching Club, the German Society, the French Society, the Engineering Society, and the Electrical Society, besides a Total Abstinence Society, and the "Christian Workers' Union."

BUILDERS IN THE SAND.

The near approach of the winter season is heralded this morning by the chill east wind and the thin ice which coats the pools left by the receding tide a few hours gone by. To-day we are strolling along a sandy flat of Scottish sea-coast, not far removed from that engineering triumph, the Forth Bridge itself. Pleasant memories of bygone days revive in the mind when we approach the "Shell-bed"—as the sandy stretch is termed. One constant feature of the beach has won for it the familiar "Ferry" name. The sea-line at high-water mark is always indicated by a clear, glistening line of shells, whole and broken alike, torn from the sandy depths below, and brought up by the play of the waves. I presume the tides and currents of the bay cast up the shells on the beach and favour the formation of this unbroken and uniform line of shell-débris. Beyond this high-water mark you come upon the sand-dunes of the coast. The tough grasses which find a home and habitation in the sand bind the loose wind-blown particles together and thus aid in the work of land-making. The "Shell-bed" on the Firth of Forth reminds me of a pleasant prospect in scenes far removed from this Scottish estuary. Away in Devonshire, and stretching from Dawlish towards Exeter, is such another sandy beach as that which lies before us this winter morning. Only, the Devonshire coast wants that background of pines that stands out so prominently against the light brown of the sand. But for the funereal setting of its firs and pines, and for the hills of Fife in the foreground, the Dawlish prospect might be regarded as being closely imitated on these northern shores.

We descend from the shelly ridge towards the lower confines of the beach. In a moment or two, we find ourselves amid the damp sand which, cut into miniature valleys by the rills from the land, betokens the recent ebb of the sea. As we walk over the yielding sand we see the burrows of the *Solens*, or "razor-shells," whose cast-off products litter the shore at the high-water line. Your "razor-shell" is a skilful burrower, and by means of his fleshy foot contrives to mine swiftly and effectively below the surface of the sand, so that pursuit and capture, save by means of the fisherman's iron hook, is a sheer impossibility. As we traverse the beach nearer still to the sea, we notice the débris thrown out by the worms, which, after airing themselves amid the waves when the tide is in, turn tail and tunnel downwards. They are, in reality, living tunnel-makers, for they pass the sand through their bodies as they work below, and hence you see the internal casts of their digestive systems in the familiar "sand-worms," or coils, which litter the shore. These are the "fairy ropes" of the children. The old legend of Michael Scott, wizard *par excellence*, tells us how, having engaged the Evil One as a servant, he found it a condition of his own safety to keep his diabolical servitor fully employed. The proverbial mischief into which idle hands are said to fall, was therefore averted by Michael the Wizard setting his fiend to weave ropes out of the sea-sand; and the futile labours of his Satanic Majesty, adds the legend, are to be seen after every receding tide.

FIG. 1. TEREBELLA AND ITS TUBE.

There, in the distance, is a fisherman digging in the sand for bait. When you look into his can you see a wriggling mass of green and brown worms, each with a big thickened head and a narrower body. This is the lobworm, dear to the hearts of sea-fishers. Along the sides of its body you see the gills existing in the shape of curious tufts, which are really complex loops of blood-vessels, wherein the impurities of worm-organisation are got rid of, and its blood purified by exposure to the oxygen of the sea. But the "lob" is not an architect in any sense. Scan the sand around you, and notice that, rising from its smooth surface, your eye can detect numberless feathery-like tufts. You borrow the fisherman's spade, and remove at one operation half-a-dozen or more of these tufts. Then when you single them out from among the mass with your fingers you see that each tuft is really the top of a tube, and that inside this tube dwells a worm-tenant which is doing its best to escape into the sand by the lower end of its dwelling-place. This is the *Terebella*, a worm which ranks among the most common of all the architects of the sand. Look at the tube closely (Fig. 1). Its composition is varied enough. It consists of a series of odds and ends in the way of particles, and the heterogeneous materials of the tube account for the rugged appearance of the structure. The bulk of this worm's house is built of grains of sand, but you also note how it has seized upon pieces of broken shells, and even minute pebbles as building-stones. These materials are all duly glued together by means of a natural marine cement, which resists the action of the water, and defies the damp to disintegrate the tenement of the Terebella. The tuft at the top of the tube, which is modelled in sand, is really the outer investment or covering of the gills and feelers which the head of the worm bears. The gills are plume-like, and the feelers, or tentacles, act as purveyors in the commissariat department. They sweep food-particles into the mouth, and possibly filter from the sea or sand around the matters necessary for the nutrition of the worm-frame.

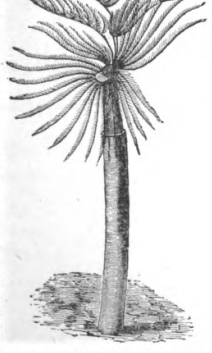

FIG. 2. SABELLA AND ITS TUBE, SHOWING THE PLUME-LIKE GILLS.

But in our shovelful of sand there are worm-tubes of another description. You now disinter a tube of smoother and more regular aspect than those of the Terebella. This second tube is composed of sand particles alone, cemented together to form a symmetrical structure, which impresses us by contrast with the rougher build of the Terebella's dwelling-place. The smooth tube (Fig. 2) is the abode of the *Sabella*, another familiar worm-architect of our sandy shores. I know of nothing more beautiful than the plume-like gills of the Sabella-worm. They spring from its head-extremity, together with its feelers, in curved array and present us with truly feathery sprays, wherein the blood of the animal courses in closely-placed vital streams, to be exposed to the air contained in the native water of the worm. Extremely sensitive are these gills and tentacles, as you may demonstrate in the case of yet another worm-architect. On this stone I have picked up is a hard, dense tube of carbonate of lime, or, in plain language, hard chalk. This is the *Serpula's* habitation. I place the stone and its tube in this rock pool. In a moment you see the beautiful gill-plumes to be protruded from the tube, and to wave backwards and forwards in the water. This is the respiratory or breathing-play of these animals, and the slightest touch sends the gills into the tube. Worm susceptibilities have been offended by the prying curiosity of humanity, and a natural plug (which is merely a thickened tentacle) closes up the mouth of the Serpula-tube until such time as its denizen, recovering from its fright, once more spreads its gill-plumes abroad in the pellucid pool. The worm-architects teach us a lesson in "habit" as applied to living nature. Each species adheres to its own way of life and materials—the Terebella to its shells and particles; the Sabella to its sand alone; and the Serpula to its limy investment. There is "more than meets the eye" in these persistent and regular building-habits—more, perchance, than the mind can explain as things are. But at least we may discover that what we call "habit" in anything, is but a name for the regular repetition of ways, tendencies, and methods, which, at first of chance character, have become stereotyped to form the fixed history of living things.

ANDREW WILSON.

WOODLAND HARVESTS.

When the cultivated produce of the earth has been garnered, and the harvest in the general acceptation of the word is over, man thinks but little, comparatively, of what is left to be scattered to the four winds of heaven. The crops from field and garden, orchard and vineyard, occupy so much of his attention that he is too apt to disregard that aftermath, as it were, of wild beauty and utility which often carries a distinct souvenir of summer far into the autumn and early winter. He is indifferent to the quality and quantity of the provender which may be found by the furred and feathered denizens of the countryside, and stored up so cunningly in their myriad ingenious little homes. Except by the philosopher, the naturalist, the artist, or kindred spirits, the later untended products of hedgerow and coppice, breezy common and forest glade, appear to be of little worth. Nor are they, perhaps, financially speaking; but, happily, we are not all financiers, in the commercial sense, and the woodland harvests possess such infinite charms, not only for the eye but for the heart, that it is no wonder the autumn, be it early or late, always calls up a tender, sympathetic emotion in the human mind. Few are wholly insensible to its influence; but, nevertheless, it claims scarcely more than a passing glance from the majority, and perhaps a sigh for the departed glories of long days and bright skies. Those, however, who know how better to value Nature's meanest gifts and beauties, find interminable pleasure in what *is* set *before them* in the fall. Not, of course, that one underrates the importance of good yields of corn and root crops, for "out of nothing cometh nothing," and if the kindly fruits of the earth fail to appear in due season in fair abundance, the whole nation suffers, from high to low. When disastrous years in this respect occur we feel how dependent life is upon the outcome of man's industry on the soil. Albeit he does not live by bread alone, yet when that is taken from him and, as it were, he has to subsist upon the husks, he may be excused for that deep anxiety in the matter of harvest which now and then blinds him to the attractions of the gorgeous spectacle remaining in the fields and woods when his principal work there for the time being is finished. But, given an easy mind on the vital question, and let his skill and farmcraft but be answered by an average reward, he should then be ready to welcome the woodland harvests in a calm and appreciative mood.

Who, to wit, can behold the wealth of berry beauty decking the coverts and the lanes in October without delight? Prominent among the rest, the rowan-trees are ablaze with colour, and the clusters of the little coral beads mingling with the greenery as it pales and yellows, reddens or purples, make a series of pictures which, in Nature's gallery, claim and receive posts of honour; for, be it remembered, this is the period for the annual exhibition of her artistic treasures. Her show is second to none in merit: skilled alike in the execution of the finest details and breadth of general effect, it dazzles and entrances. Look again, for instance, at that study of the wayward bramble fringing the pathway up the slope! What an example is it of graceful line in its curves and involutions! There can be no fitter herbage for a wild foreground than the tangled complications of the blackberry-bush, either growing alone or mingling with the russet fronds of the common bracken. Its sprays and shoots carry the eye, without an effort, through the intricacies of grass, and across the broken, tufted, gravelly bank. How it wanders, at its own sweet will, hither and thither: and what a rich promise of sweet juices is afforded by its fruit! The tones taken on by these productions from their tiny formation out of the pink and creamy blossom up to their full maturity turn them into very jewels as they sparkle in the sunlight amongst the variegated leafage. It is a sort of casket and depository, a concentration of the riches of the harvest, for assuredly no item in it is gathered with greater zest.

The hips and haws may seem at first equally as worthy of solicitude. Judged by their smooth, ruddy, and shining coats, they might be thought to offer as succulent a flavour as the blackberry; but, save for the birds, we fear they must take a second place, except in point of beauty. The contribution granted by the wild rose to the woodland harvest makes up in show what it lacks in flavour, resembling in this many of *Pomona's* highly cultivated gifts. Autumn is a grand artist, a stupendous colourist, and tinges with her magic brush all growths so cunningly, that experience alone dispels the idea that everything in the shape of a berry must be edible. Then, besides those succulent blackberries aforesaid, there is more fruity produce from the wild orchard, all of which belong legitimately to the woodland harvest-time. There is the wild strawberry asserting itself with the justifiable pride of its garden-sheltered brother; the crab-apple, suggesting in many a sunny spot that we have been put back to the time of the white-heart cherry; the sloe by the same token reminding us of a crippled crop of late damsons; and since it seems impossible altogether to exclude the thought that these good and pretty things are nice to eat, we pass on by a natural sequence to the nuts, from the tiny wild hazel up to the graceful fringed filbert-clusters on to the sumptuous walnut and chestnut. The beauty of every one of these is undeniable, and, at least to youthful palates, unquestionable in the matter of taste. But we are not here considering the grosser side of the feast: it is rather the banquet for the eye and mind to dwell on that is in our thoughts. Nor would we particularise from the botanist's point of view each specimen of the berry tribe, for their number is infinite, and no one much more lovely in aspect than another, though not a few are deadly enough in their loveliness. The commonest and most conspicuous often yield equal, if not greater, attractions, to the appreciative gaze than the curious and rare. As an example, is it possible to conceive a more exquisitely perfect natural untended growth than the acorn? Its design absolutely seems to be without a flaw, and little wonder is there that it should have inspired poets from time immemorial with pretty fancies. Could fairies be provided with a more deftly-chased specimen of sylvan art out of which to quaff their draughts of morning dew than the acorn cup? What chalice better suited to grace the festive gatherings of Oberon and Titania's fairy trains? The delicacy of its colouring, too, will vie with the workmanship of its chiselling and embossments. That faint tinge of bronze, which partially creeping across its sunny-most side, seems to gild the prominent elevations of its repoussé work whilst leaving the silvery-greenish tones in the depths of its intricacies untouched, makes it appear to be constructed of the richest ore. And further, when we remember what mighty strength and utility is symbolised in that smooth and polished egg-shaped kernel, we do not envy the man who can stoop to gather a ripened acorn from the ground among the fallen leaves without some thought of the treasure he is storing, a treasure as beautiful as it is full of meaning. Inferior to this gem of the woodlands as is, of course, the beech-mast, it must not be overlooked, and if not always a very conspicuous feature when hanging on its parent bough, it nevertheless duly plays its part in the harvest of the later autumn.

But it is the leafage after all—the sprays of fern and bramble, the flags and many-hued grasses, the quaintly-shaped red-brown tendrils and twisting climbing plants, ivy, mistletoe, what not—which go to the completion of this eye festival of the woodlands. The pretty fashion, fortunately, has spread of adorning our rooms and tables with vases and flower-stands filled with trailing and clustering examples of wild growths of every description. The æsthetic taste of the time has led to the recognition that, at least for the inhabitants of populous cities, the untended garden of Nature may be drawn upon for decorative purposes with even a larger success than the formal lawn, flower-beds or borders, conservatory or hot-house. Not that meadow, grove, or thicket will compare exactly in their flower-shows with the purely horticultural displays of autumn; they will never, at any season, perhaps, do this. Still, it is not that the stubble-field, hedgerow, brake, and spinney are devoid of floral garniture. Plenty of wild flowers and blossoms here and there remain to spangle and begem the deepening or paling mellow of the dying foliage; but Nature means their place in the galaxy of beauty to be taken by their fruit, the berries; for in the main she has the happy artistic knack of deepening all her tones and shades of colour with the declining year, thus enriching, step by step, her whole aspect, even, as one may say, up to her very death; even until the first keen frost sweeps each bough and twig clean of the last remnants of its summer garb, leaving naught but the—

Bare ruin'd choirs, where late the sweet birds sang.

W. W. F.

Sir Lowthian Bell, F.R.S., has been appointed vice-chairman of the Organising Committee of the Imperial Institute in the place of the late Sir John Rose.

The members of the Honourable Artillery Company have decided to place themselves under the Volunteer Act, accepting the assurance of the Prince of Wales that their ancient privileges and precedence would be maintained.

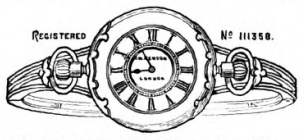
Colonel the Hon. Paul Methuen, C.B., C.M.G., of the Scots Guards, who commanded the Bechuanaland Field-Force in 1885, has been selected for the post of Adjutant-General in South Africa, under Lieutenant-General Smyth, in command of the forces there.

The Queen has approved of the following Colonial appointments:—The Earl of Onslow to be Governor of New Zealand, on the retirement of Lieutenant-General Sir W. Jervois; Sir Henry Arthur Blake, Governor of Newfoundland, to be Governor of Queensland; Sir Terence O'Brien, Governor of Heligoland, to be Governor of Newfoundland; Mr. Arthur Cecil Stuart Barkley, Chief Commissioner of the Seychelles Islands, to be Governor of Heligoland; Mr. William Frederick Haynes Smith, Attorney-General of British Guiana, to be Governor of the Leeward Islands.

At St. John's College, Cambridge, William Nicholas Roseveare, B.A., Edward Hamilton Acton, B.A., Frederick William Hill, B.A., Thomas Darlington, B.A., and Henry Frederick Baker, B.A., have been elected into fellowship. Dr. Glaisher, Professor Thomson, and Dr. Gaskell have been elected representative members of the General Board of Studies for four years, from Jan. 1, 1889.—The Right Rev. William Stubbs, D.D., Bishop Designate of Oxford, has been elected to an honorary fellowship in Oriel College. Mr. William Paton Ker, M.A., of All Souls', has been elected to a fellowship in that college.

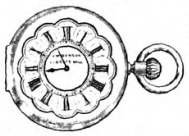
At the Brompton Hospital, the first entertainment of the twenty-second annual season took place on Nov. 6, under the direction of Mdlle. Alice Roselli. An excellent programme of music and recitations was provided and well carried out by Mdlle. Alice Roselli, Miss Blanche Renwick, Madame Isabel Fassett, Mr. William Nicholl, Mr. Bavett, Mr. Gilbert Campbell, Mr. Meade, Miss Bessie Byrne, Miss Mary Carmichael, and Mr. Lazarus, with Mr. Henry Bird as accompanist. There were many encores most kindly acceded to, but we have only space to mention the charming duo "When daisies pied," by Mdlle. Alice Roselli and Mr. Lazarus, and "I'm a Roamer," by Mr. Gilbert Campbell.

The French Minister of Marine and the Colonies has issued a statement showing the actual condition of the French colonies. The total area of these colonies (Algeria and Tunis not being included) is given at 2,000,000 square kilomètres, and the population 22,000,000, not including the Congo region. As to the commercial relations of these colonies with the mother country, Martinique and Guadeloupe are those which do the most business. Each of them sends 17,000,000 francs'-worth of merchandise to France. French India comes next with 16,000,000f.; then follow St. Pierre and Miquelon with 15,000,000, mostly cod and cod-liver oil; Senegal, 14,000,000; Réunion, 10,000,000; Guiana, 5,000,000; and all the other colonies about 8,000,000. Algeria and Tunis are not included in this; if their exports to France are added they would bring the total up to 100,000,000f. If, besides, the exports of French colonies to other countries be taken account of, it would bring the total value of French colonial exports up to a sum of 227,000,000f. Another 200,000,000f. represent the total imports of the French colonies, so that the entire trade of the French colonial empire amounts to about 18,000,000 sterling, just about equal to the value of the trade between Great Britain and Canada.



"BY a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that

EPPS'S (GRATEFUL, COMFORTING) COCOA



a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

WILLS AND BEQUESTS.

The will (dated March 5, 1886) of Mr. Alfred Backhouse, J.P., late of Pilmore Hall, Darlington, and Dryderdale, Wolsingham, who died on Sept. 2, was proved on Oct. 24 by Edmund Backhouse, Edward Backhouse Mounsey, and James Edward Backhouse, the executors, the value of the personal estate amounting to upwards of £370,000. The testator bequeaths £5000, the use, for life, of his household furniture and effects, and an annuity of £8000 to his wife, Mrs. Rachel Backhouse; £5000 each to Thomas Edward Mounsey, Ada Mounsey, Elizabeth Mounsey, and John Wilfred Mounsey; £1000 to each executor; £1000 each to the British and Foreign Bible Society and the Darlington Hospital and Dispensary; an annuity of £150 to his brother-in-law, William Mounsey; and £20,000 to his nephew Edward Backhouse Mounsey—but this sum is not to be paid till after the death of testator's wife. He gives, devises, and bequeaths all his colliery property, as to one half thereof, to his nephews and nieces, Thomas William Backhouse, John Edward Backhouse, Arthur Backhouse, and Mary Agnes Backhouse; and as to the other half thereof, to his nephews and nieces, Edward Backhouse Mounsey, John Wilfred Mounsey, Lucy Elizabeth Mounsey, Anna P. Mounsey, and Mary Emma Mounsey; certain freehold, leasehold, and copyhold lands and premises in the counties of Durham and York, to his wife, for life, and then to his nephew James Edward Backhouse; and other real estate in the said counties to his nephew Edward Backhouse Mounsey. The residue of his real and personal estate he leaves, as to one moiety thereof, between Thomas William Backhouse, John Edward Backhouse, Arthur Backhouse, and Mary Agnes Backhouse; and the remaining moiety between Edward Backhouse Mounsey, John Wilfred Mounsey, Lucy Elizabeth Mounsey, Anna P. Mounsey, and Mary Emma Mounsey.

The will (dated March 22, 1888) of the Hon. Mrs. Mary Byron, wife of the Hon. and Rev. William Byron, late of No. 17, Portland-place, who died on Oct. 2, was proved on Nov. 6 by the Hon. and Rev. Augustus Byron, Edward Thornton, and John Watson, the executors, the value of the personal estate amounting to upwards of £125,000. The testatrix, after reciting sundry indentures of settlement, devises all her lands and premises in Nottinghamshire and Derbyshire upon trust for her sister, Anne Adelaide Burnside, for life, and then to her stepson, George Anson Byron; and all premises at Radcliffe-on-Trent, and all property comprised in the second "Realty Settlement" to her sister, absolutely. She bequeaths £47,000, with the option of an annuity of £2000 in the place thereof, to her husband; £3000, upon trust, for her nephew, William Elliott Burnside; £200 per annum during the life of her husband, and at his death £10,000, to the trustees of the settlement of her stepdaughter, Edith Mary Noel; and other legacies. The residue of her property she leaves to her said sister, Anne Adelaide Burnside.

The will (dated Nov. 11, 1887), with a codicil (dated May 3, 1888), of Mr. John Edward Bartlett, D.L., J.P., late of Peverel Court, Stone, Aylesbury, who died on Aug. 1, at Buxton, was proved in the District Registry of Oxford, on Sept. 26, by Mrs. Sarah Emily Bartlett, the widow, Frederick Napier, the Rev. John Llewellyn Roberts, and Henry Hearn, the executors, the value of the personal estate exceeding £102,000. The testator gives the "Kirkland Family Plate" and certain jewels to his daughter, Sybilla Mackenzie Kirkland Bartlett; £600, all his furniture, plate, pictures, &c., and Peverel Court to his wife, Mrs. Sarah Emily Bartlett; £100 to each executor; £10,000 each to his sons Edward Noel Napier Bartlett, John Francis, Charles Frederick, and Alfred James; £9000 each to his daughters Lilian Emily and Florence Mary; £6000 to his daughter Sybilla, and also all the money and securities standing to the account of the "John Edward Bartlett Trust Fund" at the Aylesbury Branch of the Bucks and Oxon Bank; but one half only of these sums is to be paid during the life of his wife. He devises the advowson of Spratton, Northampton, to his son Edward; also certain lands and hereditaments in Buckinghamshire between him and his sons John and Alfred; and all his lands in the county of Salop to his son Charles. The residue of his property he leaves, upon trust, to pay such a sum as will, with the income of certain property which his wife is entitled to for life, make up £2000 per annum; and the ultimate residue to his wife absolutely.

The will (dated Dec. 14, 1863), with a codicil (dated April 27, 1868), of Mr. John Newman, D.L., J.P., late of Brand's House, Hughenden, Buckinghamshire, who died on Aug. 17, was proved on Oct. 13, in the District Registry at Oxford, by Henry Williams and Samuel Newman, the son, the executors, the value of the personal estate being sworn to exceed £101,000. The testator leaves all his property, both real and personal, unto his five children, Samuel, Frederick, William Henry, Mrs. Mary Anne D'Arcy, and Mrs. Elizabeth Williams, in equal shares, as tenants in common; but any sums advanced to them in his lifetime are to be brought into hotchpot.

The will (dated Nov. 13, 1885) of Mr. Robert Crossley, late of Arden House, Halifax, Yorkshire, who died on Sept. 20, was proved on Nov. 2 by James Nicholl and John Leach, the executors, the value of the personal estate exceeding £26,000. The testator bequeaths £500 to his grandson, Robert Wallis Crossley; certain shares in coal mines to his daughter-in-law, Mary Alice Crossley, and to Robert Wallis Crossley; £25 to each executor; and other legacies. The residue of his property he leaves, upon trust, to pay the jointure mentioned in his marriage settlement to his wife, and the residue of the income to his three daughters, Sarah Jane Crossley, Mrs. Lois Wainman, and Mrs. Martha Elizabeth Kirkby, or the survivor of them; and upon the death of the survivor of them, as to the capital as well as the income, as the survivor shall appoint, with the exception of certain premises in Waterhouse-street and Crossley-street, Halifax, which he gives to his said grandson, Robert Wallis Crossley.

The will (dated Oct. 23, 1876), with three codicils (dated March 10, 1878; Jan. 12 and Sept. 26, 1886), of Ernest Louis Henri Hyacinthe Arrighi De Casanova, Duc de Padoue, an ex-Minister of the late Imperial Government, late of No. 16, Place des Etats-Unis, Paris, and of Corsica, who died on March 28 last, was proved on Nov. 2 by Marie Marguerite Adela Burat, Duchesse de Padoue, the lawful widow, the value of the personal estate in England exceeding £24,000. The testator states that, Providence having refused him a son, he desires expressly that his title should be transmitted to his grandson, Ernest De Caraman, to whom he gives, by way of preciput and extra portion, all his property in Corsica, 30,000f. in the event of the title being revived in his favour, and all his souvenirs of the Imperial family; and he desires him to carry on the traditions of the family, and to remain the protector of his relatives, especially those with the name of Arrighi De Casanova. He bequeaths an annuity of 25,000f. to his wife, for life or widowhood, but in the event of her marrying again she is only to receive the sum secured to her by her marriage settlement; 30,000f. to Captain Ernest Arrighi De Casanova; 10,000f. to Joseph Arrighi De Casanova; 10,000f. to Pierre Ernest Guelfucci; 10,000f. each to his grandson and granddaughter, Charles and Elizabeth De Caraman, and legacies to his servants. The testator does not name any executor or residuary legatee.

The will (dated Sept. 11, 1885) of Mr. Arthur Ditchfield, late of No. 12, Taviton-street, Gordon-square, who died on Sept. 14, was proved on Nov. 5 by John Lewis Roget, the sole executor, the value of the personal estate exceeding £23,000. The testator bequeaths his etchings after Charles Jacque and his lithographs by French artists to the trustees of the British Museum, for the benefit of the nation; and certain of his oil and water-colour paintings by celebrated artists to the trustees of the National Collection at the South Kensington Museum. He gives £1000 each to the Artists' Orphan Fund and the Artists' General Benevolent Institution, and specific gifts and annuities to relatives. The residue of his property he leaves to his sister, Mrs. Frances Roget.

The will (dated May 1, 1886) of Mrs. Emily Cuno, formerly of No. 25, East Cliff, Dover, but late of No. 6, Dalberg-road, Brixton, who died on Sept. 27, was proved on Nov. 1 by the Hon. John William Mansfield and Charles Thomas Arnold, the executors, the value of the personal estate exceeding £17,000. Subject to a gift of £100 to the Hon. Mr. Mansfield, the testatrix leaves all her property to Henry Mansfield Cuno, her adopted son.

The will (dated June 24, 1886) of General Morden Carthew, C.B., late of Denton Lodge, Harleston, Norfolk, who died on Sept. 4, was proved on Oct. 23, at the District Registry, Norwich, by Mrs. Mary Carthew, the widow, and Morden Carthew-Yorstoun, the son, the executors, the value of the personal estate exceeding £9000. The testator gives £200 and all his household furniture to his wife; and legacies to servants. The residue of his property he leaves, upon trust, for his wife, for life, and on her decease as to £1000, upon trust, for his daughter Mrs. Emily Jane Dashwood; the income of £2000 to his daughter Mary till she marries, and then she is to receive £1000; £2000 to his son Ewart; and the ultimate residue between his daughters, Mrs. Jemima Fanny Ruton and Mrs. Rigg, and his daughter-in-law, Mrs. Matilda Carthew.

Mr. Thomas Lewis, Principal Clerk of the Pay Office, Supreme Court, has been appointed Deputy-Assistant Paymaster-General for Supreme Court business, in place of the late Mr. G. E. Skinner.

At a meeting of the Royal National Life-Boat Institution, held on Thursday, Nov. 8, its silver medal and a copy of the vote, inscribed on vellum, were voted to Mr. J. O. Williams, honorary secretary of the Holyhead branch, in acknowledgement of his valuable services for many years in the New Brighton, Milford, and Fishguard life-boats, in addition to assisting in other ways to save life from shipwreck. Rewards amounting to £240 were granted to the crews of life-boats belonging to the institution, and those of shore-boats for saving life from shipwrecks on our coasts. Payments amounting to £4404 were made on the 293 life-boat establishments of the institution. Among the contributions recently received were £4 17s. 9d., proceeds of the sale of a newspaper on board the R.M.S. Coptic, per Mr. W. J. Rae; £2 10s. 6d., offertory after Harvest Festival at West London School, Ashford, per the Rev. Hugh J. Flynn, D.D., Chaplain; and 15s., proceeds of a concert given by the boys and girls of the National School, Leigh, Reigate, per Mr. J. R. Goodchild, head-master. Reports were read from the district inspectors of life-boats on their recent visits to life-boat stations.

KURD RUGS, 6s. 6d. each.

For "The Silent Member," see page 598, Institute of Painters in Oils, page 600.

THE SILENT MEMBER.

The eloquent Home Rule advocacy of Mr. Gladstone at Birmingham has made no impression upon the Prime Minister or the Marquis of Hartington, whose firm alliance in support of Liberal Unionist principles and the present Unionist Government has been cemented by frequent interviews and by their appearance together at the noteworthy Nonconformist banquet given in their honour as joint Leaders of the Conservative and Liberal Unionist party. Lord Salisbury has meantime found legislative business slack in the House of Lords. A Tuesday's sitting has sufficed the Lords each week. As an instance of the ease with which ticklish questions may be dealt with when a Conservative Ministry is in power, it may be mentioned that the Oaths Bill, fostered by Earl Spencer on the Thirteenth of November, was read a second time without opposition from the Government bench.

The Home Secretary was the chief Ministerial actor in the House of Commons on the Twelfth of November. There is in the Parliamentary manner of Mr. Henry Matthews, as he approaches the table with the studied grace of a *jeune premier* not in his first youth, and employs action and gestures which might have been taught by the late Mr. John Ryder, of histrionic fame, something that suggests experience in amateur theatricals. The right hon. gentleman certainly had a dramatic point to make at the sitting in question. He announced the resignation by Sir Charles Warren of the arduous post of Chief Commissioner of Police; the resignation of the gallant officer being directly due, as the Home Secretary stated the following day, to the official remonstrance addressed to him on the publication of the article on police administration in *Murray's Magazine*. A duly qualified civilian would be the fittest successor of Sir Charles Warren.

Mr. Gladstone's reappearance as Leader of the Opposition on the Thirteenth of November was the signal for the customary salvo of cheers from the Home Rulers. There was a lively discussion on Mr. Jennings's motion for a reduction of £500 in the vote of £153,315 for the Supreme Court of Judicature. The complaint is at the Royal Courts of Justice that the staff is undermanned. But, in his zeal for economy in national expenditure, Mr. Jennings laboured to show that the utmost extravagance existed and that sinecures abounded. Lord Randolph Churchill (who thinks "lawyers are paid five or six times as much for their services as laymen") vigorously supported his benchman. With good reason did the noble Lord animadvert on the absence of the great majority of members whilst important votes were under consideration, and he warmly inveighed against what he alleged to be the extravagant expenditure described by the hon. member for Stockport. Mr. Labouchere spoke to the same effect. Sir Richard Webster and Mr. W. H. Smith lifted their voices in favour of the existing state of things, as is the invariable custom of Ministers on such occasions, whichever Party happens to be in power. But the vote was only saved by a majority of nineteen—148 against 129 votes—Mr. Gladstone and most of the Opposition voting with Mr. Jennings. The Tory-Democratic group of members (of whom Lord Randolph Churchill is chief) will undoubtedly strengthen their position in the country by this resolute advocacy of public economy.

BIRTH.

On Nov. 5, the wife of Patrick Henderson, her Majesty's Consul at Cadiz, of a daughter.

DEATH.

On Oct. 31, at her residence, 6, Barkham-terrace, Ann Hewett, aged 86, widow of the late Captain William Hewett, R.N.

*** *The charge for the insertion of Births, Marriages, and Deaths, is Five Shillings.*

THE COURT.

Divine service was performed at Balmoral Castle on Sunday morning, Nov. 11, in the presence of the Queen, Princess Beatrice, and the Royal household. Her Majesty, who is in good health, has taken walks and drives nearly every day. It has been officially announced that the Court is to arrive at Windsor on the morning of Friday, Nov. 16.

Nov. 9 was the forty-seventh anniversary of the Prince of Wales's birthday, and the event was commemorated at Sandringham by a dinner to the labourers and artisans and by a ball in the evening. The Prince and Princess, accompanied by Prince Albert Victor and the three Princesses, were present at Divine service on Sunday morning, Nov. 11, at the church of St. Mary Magdalene, in the park, the ladies and gentlemen of the household being in attendance. The Prince left Sandringham on the 12th by special train for Derby. He has been the guest of Lord and Lady Hindlip, and during the Derby races was present at them each day. The Princess, accompanied by Prince Albert Victor, left Charing-cross Station for Dover in the evening en route for Copenhagen, to be present at the twenty-fifth anniversary of the accession to the throne of her father, the King of Denmark.

Madrid has been much agitated by large bodies of students and workmen making hostile demonstrations against Señor Canovas.

The new Canadian Ecclesiastical College, in Rome, was inaugurated on Nov. 11 by a splendid *fête* and a banquet, at which the Cardinal-Vicar presided.

At the Hotel Mont Doré, Bournemouth, a new wing, a winter garden, and an extensive covered lawn-tennis court, have been opened in connection with the hotel. The cost of these elaborate additions is from £20,000 to £30,000.

Pears' Soap

I have found it matchless for the hands and complexion
Adelina Patti

Since using Pears' Soap I have discarded all others.
Lillie Langtry

For preserving the Complexion, keeping the skin soft, free from redness and roughness, and the hands in nice condition, it is the finest Soap in the world.
M. Fortescue

Good Complexion! AND Nice Hands!

NOTHING adds so much to personal attractions as a bright, clear complexion, and a soft skin. Without them the handsomest and most regular features are but coldly impressive, whilst with them the plainest become attractive; and yet there is no advantage so easily secured. The regular use of a properly prepared Soap is one of the chief means; but the Public have not the requisite knowledge of the manufacture of Soap to guide them to a proper selection, so a pretty box, a pretty colour, or an agreeable perfume too frequently outweighs the more important consideration, viz.: *the Composition of the Soap itself*, and thus many a good complexion is spoiled which would be enhanced by proper care.

A most Eminent Authority on the Skin,
Professor Sir Erasmus Wilson, F.R.S.,
Writes in the JOURNAL OF CUTANEOUS MEDICINE:—

"THE use of a good Soap is certainly calculated to preserve the Skin in "health, to maintain its complexion and tone, and prevent its falling "into wrinkles. PEARS is a name engraven on the memory of the "oldest inhabitant; and PEARS' Transparent SOAP is an article of the "nicest and most careful manufacture, and one of the most refreshing "and agreeable of balms for the Skin."

TO persons whose skin is delicate or sensitive to changes in the weather, winter or summer, PEARS' TRANSPARENT SOAP is invaluable, as, on account of its emollient, non-irritant character, *Redness, Roughness and Chopping are prevented, and a clear appearance and soft velvety condition maintained, and a good, healthful and attractive complexion ensured.* Its agreeable and lasting perfume, beautiful appearance, and soothing properties, commend it as the greatest luxury and most elegant adjunct to the toilet.

Testimonial from
Madame Adelina Patti.
"I HAVE found PEARS' SOAP matchless for the Hands and Complexion."
Adelina Patti.

PEARS' Transparent SOAP. TABLETS & BALLS: 1s. each. Larger Sizes, 1s. 6d. and 2s. 6d. *(The 2s. 6d. Tablet is perfumed with Otto of Roses.)* A smaller Tablet (unscented) is sold at 6d. PEARS' Transparent SOAP.

Tourist Tickets are issued enabling the holder to visit All the principal places of interest.

FOR FULL PARTICULARS see Time Book and Handbills to be obtained at Victoria, London Bridge, or any other Station, and Offices, where Tickets may also be obtained:—West-End General Offices, 28, Regent-circus, Piccadilly, and 8, Grand Hotel-buildings, Trafalgar-square; Hays' Agency, Cornhill; and Cook's Midland Agency Office.
(By Order) A. SABLE, Secretary and General Manager.

NOT KNOW WHAT TO DO IN A BLACK FOG? Why, take a seat on the Stage Coach now running between Ilfracombe and Barnstaple. The state of the atmosphere will prevent you from seeing the railway and the telegraph-poles, and enable you to "forget the unreading of the hideous town," as Mr. Morris has it in "The Earthly Paradise"; and you can play at being your own grandfather (or your grandmother if you like) just as comfortably as if you were sitting at home in your best Chippendale armchair, with your feet on the brass fender in the wainscoated back parlour of that dear little red-bricked house of yours, taking snuff, and reading the "Gentleman's Magazine" for the "year one" by the light of a tallow candle. N.B.—Mr. Punch means to try it himself.—Vide "Punch," Jan. 31, 1880.

VALUABLE DISCOVERY for the HAIR.—"If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed. "The Mexican Hair Renewer" is sold by Chemists and Perfumers every where, at 3s. 6d. per Bottle.

NEW MUSIC.

A CASKET OF VOCAL GEMS FOR 1s.
W. MORLEY and CO.'S NEW SERIES of SONG-BOOKS.
Popular Modern Songs.
Full music size. Suitable for all.
Post-free 13 stamps each volume.

Sole Consignee—W. DOYLE, 35, Crutched-friars, London, E.C.

WIRE ADDRESS—"EXCELSUS," LONDON.
FREDERICK SPENCER,
STOCK and SHARE DEALER,
NO. 155, FENCHURCH-STREET, LONDON, E.C.,
OPERATES in every class of ENGLISH RAILS, STOCKS, BONDS, and GOVERNMENT SECURITIES. Opens Speculative Accounts on the most favourable terms, with cover from 1 per cent. Special dealings in Americans. Handsome profits have resulted from my last recommendations. Enormous profits are often made by gaining sound information. Bargains wired the moment of operating.

£5	commands	£500 Stock.
£10	"	£1000 "
£20	"	£2000 "
£30	"	£3000 "
£50	"	£5000 "
£75	"	£7500 "
£100	"	£10,000 "

With no further liability whatever.
A client, by depositing £10 margin with me to secure against loss, may buy 100, 200, £900 Brighton A at, say, 120. Supposing the stock advances to 125, and he then sells, he makes a clear profit of £50; while, if the stock happens to recede, he could make no loss unless he sold, till it fell back a point—that is to say, 119—and then he would lose his £10 cover only, and have no further liability. In other words, he stands to win an unlimited amount, but can only lose the amount of his cover.

FREDERICK SPENCER'S
GUIDE FOR SPECULATORS GRATIS.
GUIDE FOR SPECULATORS GRATIS.
GUIDE FOR SPECULATORS GRATIS.

MY ADVICE and FORECASTS of the Markets are generally reliable, and operators who follow my selections will be invariably enabled to secure for themselves golden returns. Being always on the spot, it only stands to reason that my advice must be worth following.
The "Evening News," Jan. 20, 1888, says:—"We have received a copy of the 'Guide for Speculators,' published by Mr. Frederick Spencer, of 155, Fenchurch-street, E.C. This little book contains some useful information with regard to Stock Exchange dealings; and, in addition, shows the highest and lowest prices and dividends paid for the last five years on most of the leading English railways and Government securities."
"Stock Exchange Times," Feb. 4, 1888, says:—"This gentleman in his circulars evidently does not prophesy, like some of the sporting tipsters, after the event. A great many of his prognostications have been verified, and his judgment in all matters pertaining to stocks and shares appears to be very sound. Those who wish to act on his suggestions should write to him for his last circular to 155, Fenchurch-street, E.C."

A COUNTRY DEPARTMENT is under special management, where clients living at a distance can depend upon having their interests well watched. Telegrams dispatched showing any change that may occur. Telegrams are sent daily free, giving the leading quotations.

FREDERICK SPENCER advised the purchase of BRIGHTON A when they were 123. They have since been 133. Profit of £166 with £10 temporary deposit.

FREDERICK SPENCER advised CALEDONIANS when they were 108. They have since been 118; profit of £112 10s. on £10 temporary deposit.

FREDERICK SPENCER'S advice is so very correct that he receives daily hundreds of inquiries as to the future movements of various stocks.

FREDERICK SPENCER DEALS in EVERY DESCRIPTION of STOCK EXCHANGE SECURITY at Market Prices, and charges no Commission.

FREDERICK SPENCER'S Offices are fitted up with all the latest improvements, and there are PRIVATE CONSULTING-ROOMS with competent men to advise.

FREDERICK SPENCER'S
GUIDE for SPECULATORS GRATIS.

Canadian Pacifics	99 .. 99⅝	£17 10
		£367 10

FREDERICK SPENCER,
STOCK and SHARE DEALER,
NO. 155, FENCHURCH-STREET, LONDON, E.C.

I HAVE HAD some large dealings in the Stocks I advised in my last Circular, and many of my clients have done remarkably well by following my tips.
The American Market has been exceedingly firm, and some very important advances have taken place since I wrote. I must confess that my tips in Sheffs and Milwaukees have been almost more than verified.

MANY operators ask "how it is my tips are always so correct?" and "how is it that I so seldom make mistakes?" It is simply this: I never advise operations in any Stock until I have myself carefully and calmly studied its movements for some considerable time previously, and when I consider I am thoroughly an fait, then I give my opinion to the public as to its future movements, and it is by so doing that many of my clients are able to make such grand profits.

I AT this very moment have a client on my books who bought Lake Shores several months ago at 92¾. They are now over 105. This alone shows a profit of £132 10s. for a temporary deposit of £10.
To those of my clients who visit the City I shall be pleased to show my books to prove this assertion.
It has been truly said: "The Stock Exchange is the place to make a fortune," providing the speculator quietly studies the markets before dealing.
I ask, How is it that so many of our country squires, with but small, limited incomes, are keep ng up such large establishments, &c.? Why, because most of them speculate on the Stock Exchange; and, although most of them deny it, it is, moreover, a fact.

SPECIAL ADVANTAGES of DEALING WITH ME.
1. Being a dealer, not a broker, clients by transacting their business with me save the brokers' commissions—a very great consideration.
2. I do not charge commission of any description.
3. Clients' liabilities never exceed the amount of their cover, but there is no limit to the amount of their profits.
4. I give clients advice gratuitously, either by letter, telegram, or personally.
5. I deal at close market prices, and immediately wire full particulars.
6. I open speculative accounts from 1 per cent. cover.

I HAVE issued a very carefully compiled book, entitled "Guide to Speculators," which will be found of very great service to operators. I shall be pleased to forward a copy post-free.

£10	Commands	£1000 stock.

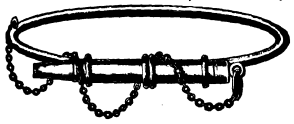
WIRE ADDRESS—"EXCELSUS," LONDON.

THE INSTITUTE OF PAINTERS IN OILS.

SECOND NOTICE.

The West Gallery contains some of the most distinctive works in the exhibition, although the distinction aimed at does not always soar very high. Mr. J. J. Shannon's star has risen very rapidly, but not in any way out of comparison with his deserts. He has an appreciative eye, a ready hand, and a sense of beauty both of form and colour; but his admirers will do well to rest content with the display of those qualities. His two works, Mrs. White (10) and "Rose Pink" (53), display his powers and his shortcomings in a very marked way. The former, which is only a portrait *en buste*, is brilliant and full of life; but it has a suggestion of vulgarity, which, by-the-way, is not now-a-days considered a very serious drawback to a pretty woman. "Rose Pink" is a more ambitious work—a seated full-length figure of a lady prepared for a walk, but so arranged that the artist evidently considers her dress more interesting than her face. If we are to have portraits which force themselves upon the attention, and which would never be the quiet, unobtrusive companions of our solitude, we honestly confess our preference for such works as Mr. T. B. Kennington's portrait of Madame G. (98) and Mr. Solomon J. Solomon's Mrs. Ernest Löwy (116) in their black dresses, which serve as a foil to bring out the brilliancy of the flesh-tones and to give vivacity to the face. There are two other portraits also in this gallery which are well deserving of attention: those of Baron Gevers (147) and of the Comte de Saint-Genys (156), both by Mr. Hubert Vos, who betrays, perhaps involuntarily, his Dutch origin in his direct treatment and subdued colour. Amongst the figure-subjects Mr. John Reid's "Our Fisher-Folk" (154), a group of Cornish fishermen and their belongings, is an instance of strong drawing and bright colour; but, whilst admitting its cleverness, one cannot but feel that it aims at something almost too dramatic than such a group would naturally suggest, whilst it is too essentially prosaic to move one's inner feelings. On the other hand, M. Fantin-Latour's renderings of scenes from two of Wagner's operas, the "Rheingold" (121) and "Siegfried" (175), are amongst the best attempts at imaginative painting in this room. The figure of Brunhilda, in the former, is most delicately conceived, and the poet's idea of the maiden's doom is depicted with full appreciation of the main idea. M. Fantin's mastery of colour is becoming more noticeable, and he now treats himself and his admirers to a somewhat more extended palette. Mr. Horace Fisher's "Pigeons' Breakfast" (1) is a bright scene which may be assigned to an Italian village where the costumes are bright, the streets narrow, and the sun dazzling. These ingredients are well mixed by Mr. Fisher, who produces them with a pleasant result; but, in spite of costume and sunshine, the figures of the girls are not so bright and piquant as that of Miss Alba Stefani (18) as depicted by Mr. Melton Fisher. Into his "Between Whiles" (159)—illustrating the duties of the serving brothers in a monastery—Mr. Dendy Sadler manages to throw a good deal of humour and character by means of strong painting; whilst Mr. Edgar Giberne, in his "Little Bo-peep" (31), has a similar aim in view, but relies upon far slighter materials. In landscapes the Institute is generally fairly well provided, and, although we miss one or two well-known names, their places are supplied by new-comers eager to attract public notice. Mr. George Wetherbee's "Autumn" (43) is a simple treatment of a woman carrying faggots, conceived in the French spirit of Jules Breton. The colour and sentiment of this poor toiler, whose summer seems to have been so short, are alike admirable, although somewhat sad. Very different thoughts are suggested by Mr. Ernest Parton's "Dreary Day" (29), full of light and rest among the trees, of which the leaves do not obscure the brightness. This is quite Mr. Parton's best work, less complicated in arrangement and colour, and more definite in conception than his "Home Amongst the Trees" (427), or his tangled study of "Lilies and Rushes" (576), which, nevertheless, have the charm of recalling sunny days spent amid the backwaters of the Thames. Mr. Helcke's "Evening" (91) goes back to a somewhat sadder view of the field and sedgeland across which the "swinked" toilers are slowly wending their homeward way. Almost as much praise is due to Mr. David Murray's "Eventide" (102), which shows a very distinct effort to get free of the mannerism of much of his recent work. These evening shades have also inspired Mr. Fred. Cotman with an excellent treatment of "St. Ives" (158)—that of Huntingdonshire, not Cornwall—and is especially interesting as affording comparison with Mr. Robert W. Allan's very fine rendering of the Dutch town of "Middelburg" (148), as well as with that of another town amid the flats—"Sandwich" (167), as depicted by Mr. T. Pyne. To these should be added Mr. Aumonier's "Sussex Lane" (189), with its horses going to the pound; Mr. Adrian Stokes' "On the Cornish Towans" (86); and Mr. Sidney Moore's exceedingly delicate work, both in figure and landscape, "In dewy morn she came this way" (72).

East Gallery will not detain us long, although some of the pictures are quite above the ordinary average of these exhibitions. No two artists are more distinct in method and purpose than are Mr. John Burr and the Hon. John Collier; and it is, therefore, curious to see what each sends as a typical study. "An Artist's Model" (474) by the first named is a clever, but somewhat laborious, handling of an old woman in a poke-bonnet, whose age-worn face makes for her a fortune amongst artists of Mr. Faed's following. Mr. Collier's study (487) is that of a young girl with a profusion of fair hair falling over her bare shoulders, which should have afforded the artist the opportunity of practically applying the theory of painting of which he is one of the recent professors. But in this face, as in the portrait of Mrs. Alfred Eckersley (443), he seems to have fallen away from that brilliancy and transparency which marked some of his earlier works. We are not sure if we do not prefer Mr. Herman Herkomer's portrait of Miss Margaret Jex-Blake (577) as a work; but it must be taken into account that the latter has aimed rather at showing strength of character than mere facial beauty and elegance in his picture. Miss B. M. Latham's study (568), although obviously only a beginner's work, shows no little promise in the arrangement of drapery and case of attitude. The colour is a trifle cold, and we are left in doubt as to what the artist's capacities are in rendering the face, which in this case is only suggested in the gloom. Whilst willing to hope that in his "Salome" (587) Mr. E. A. Storey has given play to his imagination, it is rather too realistic in its treatment to take a place beside such ideals as Mr. Henry Stock's "Sin Piercing the Heart of Love" (590), which hangs close by. The figure of the thorn-crowned youth in an uneasy chair conveys very obscurely the artist's meaning as explained in the text; but even more difficult is it to understand by what circuitous route the dart of the cruel monster is to reach the heart of the sufferer. Mr. Stock in his other imaginative work, "A Soul Contemplating the Grass of the Field" (462), represents a young child picking ox-eyed daisies. There is more pathos and direct appeal to sentiment in such a work as Mrs. Arthur Hacker's "Children's Prayer" (537) at the side of their peasant mother; but Mr. Phil Morris's "Rose on the Thorn" (550), whilst displaying a certain technical ability, reminds one too forcibly of an unnatural union of Tissot and Mason. A young girl swinging under a may-tree, surrounded by "dappled hinds," such as we have seen before, is Mr. Morris's work. The landscape-painters in this room, as in the other, seem to have found the evening effects this year more attractive than any other. Mr. Alfred East's "Evening after a Storm" (426), with its purple tints upon the sea, is a somewhat artificial study, and hardly so attractive as his "Moonrise" (540)—a subject which, in spite of the difficulties it presents to the colourist, also tempts Mr. Alexander Harrison (567), and is even more powerfully handled by Mr. Arthur Severn (468) in his study of "Ilex-trees." There is plenty of atmosphere and movement in Mr. Edwin Hayes' "Fishing Fleet off Granton" (477), which is quite the best sea-piece in the exhibition; though for richness of colour and fanciful resource Mr. Stuart Lloyd's "Lobster-Fishers" (469) will obtain perhaps more admiration. We should also mention Mr. C. E. Johnson's "Wintry Wind" (422), Mr. James Webb's "Sunshine and Showers" (521), Mr. Alexander Harrison's "Purple and Gold" (504), Mr. Keeley Halswelle's "Autumn Tints" (531), and Mr. Frank Walton's "Padstow Point" (582), as works of no little merit, and showing some effort to break away from the ordinary style of their respective artists.



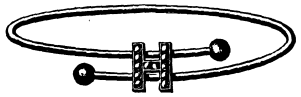
Mr. Daniel O'Connell French, Q.C., of the Northern Circuit, has been elected a Bencher of the Honourable Society of the Middle Temple, in succession to the late Mr. James Anderson, Q.C., one of the Official Referees. Mr. French was called to the Bar at the Middle Temple in 1872, and was created a Queen's Counsel in 1885.

The Company of Clothworkers have resolved to contribute £2500 towards the North London Technical Institutes, to be apportioned thus:—£2000 towards an institute in Islington, where the Company have a considerable estate as trustees of the Packington Charity as well as in their own corporate right; and £500 towards one in Hackney, where they also possess property, limited, however, to specific charitable trusts.

Persons desirous of seeing chrysanthemums in their prime should hasten to see the excellent show in the Inner Temple Gardens, now open to the public.—The November show of chrysanthemums, primulas, fruit, and vegetables in connection with the National Chrysanthemum Society recently held at the Aquarium, was the largest and most attractive exhibition ever held under the auspices of the society.—The annual chrysanthemum shows hold a prominent place among the regular attractions of the Crystal Palace, and a fine display was recently exhibited there.

Dr. Frithjof Nansen's daring attempt to cross Greenland from east to west on snow-shoes has proved successful. A letter from Mr. Sverdrup, who accompanied Dr. Nansen, has been received. The writer says:—"The journey from the east coast to Godthaab took forty-six days. Landing on the east coast was difficult, owing to the ice-packing and the strong current. Worked twelve days before reaching land. Landed sixty miles further south than calculated. Travelling on the inland ice in the direction of Christiansbaab commenced on Aug. 15. Having arrived at a height of 7500 ft., a snowstorm from the north forced us to make for Godthaab. Greatest height reached, 10,000 ft.; thermometer, 40.50 deg. Arriving at a fjord, a boat was built partly of the tent-canvas, in which Nansen and the writer rowed to Godthaab, where we arrived after four days' rowing."

GOLDSMITHS' ALLIANCE
(LIMITED),
JEWELLERS, WATCH AND CLOCK MAKERS,
11 & 12, CORNHILL, LONDON, E.C.



Fine Gold Pencil-Case Bangle, price £3 5s.

NESTLE'S FOOD
AN ENTIRE DIET FOR INFANTS.

Supplies all the elements necessary for the complete nourishment and growth of the human frame.
Nestle's Food, being partly composed of milk, is complete and entire in itself, and requires simply the addition of water to make it instantly ready for use. It is not merely an auxiliary, like other Infants' Foods, which require milk to be added in preparing for use.
Recommended by the highest medical authorities as the nearest equivalent to Mother's Milk.
Pamphlet, with Medical Testimonials, sent post-free, on application to H. NESTLE, 9, Snow-hill, London, E.C.

Allen & Hanburys' "Perfected" COD-LIVER OIL.

"Is as nearly tasteless as Cod-Liver Oil can be."—Lancet.
"Has almost the delicacy of salad oil."—Brit. Med. Journal.
"No nauseous eructations follow after it is swallowed."—Medical Press.
"It can be borne and digested by the most delicate; it is the *only* oil which does not 'repeat'; and for these reasons the most efficacious kind in use. In capsuled Bottles only, at 1s. 4d., 2s. 6d., 4s. 9d., and 9s.
Sold Everywhere.

BYNIN, LIQUID MALT, forms a valuable adjunct to Cod-Liver Oil, being not only a highly-concentrated and nutritious Food, but a powerful aid to the digestion of all starchy and farinaceous matters, rendering them easy of assimilation by the most enfeebled invalid. BYNIN, being liquid, is entirely free from the inconvenient treacle-like consistence of ordinary Malt Extract; it is very palatable, and possesses the nutritive and peptic properties of malt in perfection. It is a valuable ailment in Consumption and Wasting Diseases. In Bottles, at 1s. 9d. each.

CIGARS OF JOY
ASTHMA
COUGH-BRONCHITIS

These CIGARETTES give immediate relief in the worst attack of ASTHMA, COUGH, CHRONIC BRONCHITIS, INFLUENZA, and SHORTNESS of BREATH. Persons who suffer at night with coughing, phlegm, and short breath, find them invaluable, as they instantly check the spasm, promote sleep, and allow the patient to pass a good night. They are perfectly harmless, and may be smoked by ladies, children, and most delicate patients.
In Boxes of 35 Cigarettes, 2/6, from all Chemists and Stores. Each genuine box bears the name WILCOX & CO., 239, Oxford Street, London. Post-free.

HEADING THE POLL BY 212 VOTES.

(From "Modern Truth.")

The great success and popularity of an article has now been confirmed by a Post-Card Competition inaugurated by that old, well-known, popular, and influential paper, "The Chemist and Druggist," a copy of which reaches each week nearly, if not quite, every dealer in medicine in the United Kingdom and the Colonies, besides having a large circulation on the Continent and in the United States. The publishers of this paper recently conceived the idea of ascertaining from the Trade the most popular preparation for outward application now being manufactured and sold. With this object in view, they invited a Post-Card Competition, each dealer to name on said post-card the preparation for outward application which was most popular with his customers.

The publishers received 635 post-cards, with the following results:—

St. Jacobs Oil	384	Bow's Liniment	7
Elliman's Embrocation...	172	Perry Davis's Pain Killer	7
Holloway's Ointment	32	Vaseline	4
Allcock's Porous Plaisters	19	Cuticura	2

while eight other outward applications had one vote each.

It will thus be seen that St. Jacobs Oil was named by 384 different dealers as being the most popular remedy sold for outward application, leaving 251 (less than half) to be divided among fifteen other remedies; showing conclusively, if further evidence were wanted, that St. Jacobs Oil to-day stands pre-eminent among all other proprietary medicines for outward application. In fact, the sales of St. Jacobs Oil are more than double those of any other proprietary medicine in the world, and ten times greater than those of all other liniments and embrocations.

This wonderful success rests on the solid foundation of merit (acknowledged everywhere) which St. Jacobs Oil possesses, combined with systematic, original, and dignified advertising, which has always characterised the announcements of the proprietors. It is advertised only for such ailments as it will cure, and hence it possesses the confidence of all classes of people, and has become a household word in every civilised country.

The popularity of St. Jacobs Oil has become the subject of comment by almost the entire press of the country; in many instances the leading articles of large and influential papers have been devoted to the details of what seem to be almost magical cures effected by the use of St. Jacobs Oil in local cases, coming under the immediate attention of the publishers. St. Jacobs Oil is endorsed by Statesmen, Judges, the Clergy, the Medical Profession, as well as by people in every walk of life.

The publishers of one of the leading society papers of London have taken to analysing some of the leading patent medicines, also to investigating their published testimonials, with the result of creating quite a commotion among certain proprietors. Injurious effects likely to follow the use of patent medicines, published testimonials given from addresses which only exist in the mind of a clever writer in the company's employ, are fully exposed. Suits for heavy damages have been threatened by the proprietors of the remedies thus exposed. Injured innocence puts on a bold front, but the publishers of the paper in question do not frighten easily; they have taken up a question of vital interest to the public, and they propose to turn on the full light of intelligent investigation. One most excellent feature of this exposure is, that the public are enabled to discriminate between worthless nostrums and those really good remedies. The publishers evidently take this view of the question, for their last investigation is a most flattering one for the proprietors of that noted remedy St. Jacobs Oil. The following is the report, headed:—"The Verdict of the People of London on St. Jacobs Oil."

Mr. William Howes, civil engineer, 66, Red Lion-street, High Holborn, W.C., was afflicted with rheumatism for twenty years. Sometimes his hands swelled to twice their natural size; his joints were so stiff that he could not walk, and his feet so sore that he could not bear any weight on them. Nothing relieved him till he applied St. Jacobs Oil. The result was marvellous. Before using the contents of two bottles all pain left him, and he is now in perfect health.

Mr. C. H. Palmer, Secretary of the Conservative Defence Association, and Overseer of the District of Islington, said:—"For a long time I have been a great sufferer from neuralgia in my face and head, and rheumatism in my limbs. After trying various remedies without obtaining relief, I procured a bottle of St. Jacobs Oil, the use of which completely removed every trace of pain."

Mr. Edward Peterson, electric light engineer, of 36, Whetstone-park, W.C., said:—"There can be no two opinions respecting the value of St. Jacobs Oil. I was completely used up with rheumatism in my arms and shoulders; a few good rubbings with that famous Oil drove all pain away."

Mr. Henry John Barlow, of 4, Staple's Inn Buildings, Holborn Bars, W.C., said:—"I had rheumatism in my feet and legs, which became so bad that I was hardly able to walk. St. Jacobs Oil removed all pain, and completely cured me."

Mrs. Wolfsberger, Matron of Moore-Street Home for Poor Crippled and Orphan Boys, 17, Queen-street, Edgware-road, said:—"That St. Jacobs Oil has been used in the Home, and that it is powerful in relieving neuralgia and general rheumatism."

Mr. Charles Cartwright, of 7, Alfred-place, Bedford-square, W.C., said:—"Having for years been a great sufferer from rheumatism in my limbs, I used St. Jacobs Oil, which cured me directly, after other remedies had signally failed."

Henry and Ann Bright, Hon. Superintendents of the North London Home for Aged Christian Blind Women, say:—"That St. Jacobs Oil has proved unfailing; that rheumatism and neuralgia have in every case been removed by using the Oil, and many old ladies, some of them ninety years old, instead of tossing about in agony, now enjoy good nights' rest through its influence."

Mr. N. Price, of 14, Tabernacle-square, Finsbury, E.C., said:—"My wrist, that I had strained two years before, and which had given me pain without intermission, yielded like magic to the application of St. Jacobs Oil."

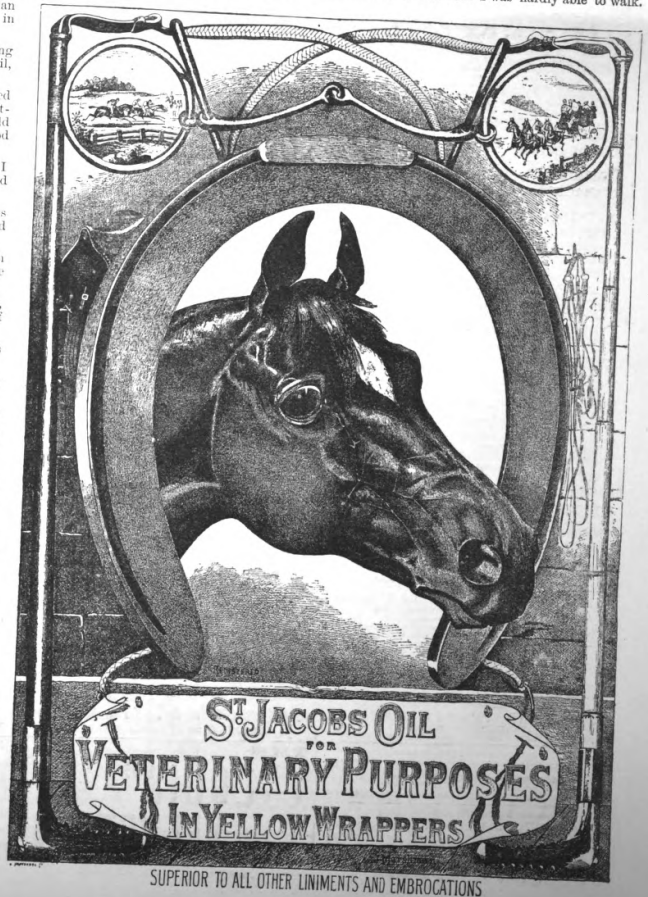
Mr. J. Clark, of 21, South Island-place, Brixton-road, said:—"Although I was not able to rise from a sitting position without the aid of a chair, I was able to stand and walk after the application of St. Jacobs Oil."

Mr. J. Wilkinson, 88, Pentham-road, South Hackney, suffered from rheumatism in his feet and legs for twenty years. The contents of one bottle of St. Jacobs Oil drove away all pain, and brought about an effectual cure."

Robert George Watts, M.A., M.D., M.R.C.S., of Albion House, Quadrant-road, Canonbury, N., said:—"I cannot refrain from testifying to the very great efficacy of St. Jacobs Oil in all cases of chronic rheumatism, sciatica, and neuralgia."

Rev. Edward Singleton, M.A., 30, Bournevue-road, Streatham, said:—"St. Jacobs Oil removed all pain directly."

Rev. W. J. Caulfield Browne, M.A., Rector, Kittsford Rectory, said:—"My parishioners, under my recommendation, use St. Jacobs Oil."



Mr. E. J. Feusey, Brixton Rise, London, was treated for sciatica by eminent medical gentlemen in private practice, and in the Convalescents' Home, Bexhill-on-the-Sea, near London. He obtained no relief, but the contents of one bottle of St. Jacobs Oil practically cured him.

Mr. Thomas Charles Pullinger, the well-known bicycle-rider, of 16, High-street, Lewisham, says:—"I have found St. Jacobs Oil has done my leg a power of good. I shall continue to recommend your valuable embrocation to my fellow cyclists, as I consider it a splendid article for rubbing down with while training."

Mr. G. Smith (of Handsworth Friary Football Club, 18, Carlyle-road, Handsworth, Birmingham), says:—"Not long ago I received a severe sprain in my ankle, which wholly disabled me from walking. I used St. Jacobs Oil regularly for one week to the ankle, by which time the swelling and pain had wholly disappeared, and I was able to walk. I have, therefore, no hesitation in recommending your Oil to football-players, as well as all persons suffering from pain."

This journal concludes its article as follows:—"It is a source of the greatest satisfaction to us, in conducting these investigations, to be able to report a medicine which is so highly endorsed as the above-mentioned."

The curative powers of St. Jacobs Oil are simply marvellous. It is wholly an outward application. It conquers pain quickly and surely. It acts like magic. It penetrates to the seat of the disease. It cures even when everything else has failed. It has cured thousands of cases of rheumatism and neuralgia which had resisted treatment for the greater part of a lifetime. It has cured people who have been crippled with pain for more than twenty years. After the most thorough and practical test, St. Jacobs Oil has received Six Gold Medals at different International Exhibitions for its marvellous power to conquer pain. It is used extensively in the leading Hospitals and Dispensaries of the metropolis and provincial cities, and also on board her Majesty's Troop-ships and the Cunard Steam-ship Company's Fleet. Put up in white wrappers for human use, price 2s. 6d. per bottle, of all dealers in medicine throughout the world, or sent post-free by the proprietors, The Charles A. Vogeler Company, 45, Farringdon-road, London, E.C. The Oil is also sold in yellow wrappers with such ingredients added as are particularly adapted for use on horses, cattle, and dogs. If there should be any of our readers who have never used St. Jacobs Oil, we most strongly advise them to procure a supply in case it should be required. We believe that it is the most valued and possesses the greatest merit of any preparation for outward application ever offered to the public.

FLORILINE. For the Teeth and Breath. Is the best Liquid Dentifrice in the world: it thoroughly cleanses partially-decayed teeth from all parasites or living animalculæ, leaving them pearly white, imparting a delightful fragrance to the breath. The Fragrant Florline removes instantly all odours arising from a foul stomach or tobacco smoke: being partly composed of honey, soda, and extracts of sweet herbs and plants, it is perfectly delicious to the taste, and as harmless as sherry. Sold by Chemists and Perfumers everywhere, at 2s. 6d. per Bottle.

DIABETES MELLITUS (Zuckerharnruhr) Thoroughly Cured. Warranted through thousands of successful treatments. Send full particulars, with 20s. fee, to Dr. IHLAU, Chemnitz (Saxony).

"ANY DOCTOR WILL TELL YOU" there is no better Cough Medicine than KEATING'S LOZENGES. One gives relief; if you suffer from cough, try them but once; they will cure, and they will not injure your health; they contain only the purest and simplest drugs, skilfully combined. Sold everywhere, in 13½d. Tins.

ADVICE TO MOTHERS.—Are you broken in your rest by a sick child, suffering with the pain of cutting teeth? Go at once to a chemist and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor sufferer immediately; it is perfectly harmless; it produces natural, quiet sleep by relieving the child from pain; and the little cherub awakes "as bright as a button." Be sure and ask for Mrs. Winslow's Soothing Syrup, and see that "Curtis and Perkins, New York and London," is on the outside wrapper. No mother should be without it. Sold by all Medicine Dealers, at 1s. 1½d.

NURSES (MALE).—The Hamilton Association for Providing Trained Male Nurses, 22, South Audley-street, London, W., supplies Experienced Male Attendants, with Hospital Training, for medical, surgical, and mental cases in town or country. For terms and particulars apply to the Medical Superintendent as above.

GOLDEN HAIR.—Robare's AUREOLINE produces the beautiful golden colour so much admired. Warranted perfectly harmless. Price 5s. 6d. and 10s. 6d., of all principal Perfumers and Chemists throughout the world. Agents, R. HOVENDEN and SONS, 31 and 32, Berners-st., W.

CAUTION.
BENGER'S Food differs entirely from any other Food obtainable. When mixed with warm milk it forms a delicate nutritious cream, in which the curd is reduced to the same flocculent digestible condition in which it exists in human milk, so that hard indigestible masses cannot form in the stomach.

It may be had of Chemists, &c., everywhere, or will be forwarded free by Parcel Post direct from the Manufacturers.

GOLD MEDAL AWARDED INTERNATIONAL HEALTH EXHIBITION

BENGER'S FOOD

Tins, 1/6, 2/6 & 5/-

ROMPING, ROLLICKING RODERICK,
With his Sea Chest, 8 in. by 3 in.

Containing three Suits of Clothes, five Hats, all to take on and off. A SLOOP, "THE PINAFORE," 8 in. long, with sails, rudder, crew, cargo, small boat, oars, &c., and a well-written Booklet, called "He would be a Sailor," by Mrs. Hayes.

The whole Toy comprising upwards of SIXTY ARTICLES, the like of which has never before been seen for ONE SHILLING.
4d. Extra for Packing and Carriage.

GIVEN AWAY,

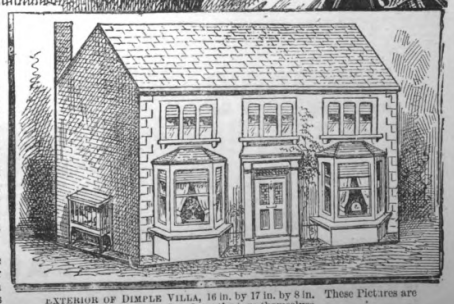
A beautifully Illuminated Toy-Book, twelve pages, large size, with a score of brightly-coloured Illustrations for the Children, sent gratis and post-free to applicants.

Samples of many thousands of unsolicited Testimonials:—

"Oct. 2, 1888.

"THE COUNTESS OF ABERDEEN is charmed with the new Toys brought out by Messrs. Hinde, and begs that fifty assorted specimens of the new Toys may be sent addressed to the care of Miss Lumsden, Children's Hospital, Aberdeen; fifteen to the Cripples' Nursery, Regent's Park, London; twelve to the care of Miss Bain, Ivy Cottage, Methlick, Aberdeenshire; and twenty-three to the care of Mrs. Greenhalgh, Haddo House Cottage Hospital, Tarves, Aberdeenshire."

"Banister's Hall-avenue, Southampton.
"Sept. 28, 1888.



"Please send to the above address 'A Sailor Boy' Doll, with his Chest, and if it gives only one half the pleasure 'Dollie Daisie Dimple' did to my Eva and Daisy, it will be a shilling well laid out.
"From WILLIAM BOROUGH HILL."

HINDE'S NEW PATENT.

A Beautiful Doll's House

For ONE SHILLING.

A real Doll's House with rooms, frontage, 1 ft. 4 in. The Drawing-room is 8 in. wide by 10 in. long, and very lofty, 11 in. high. A most attractive double-fronted Residence, known as "DIMPLE VILLA." Imitation Red Brick and Stone Facings, Bay Windows, Green Venetian Blinds, Bright Colours, &c. A practical two-roomed house to put furniture in. The interior decorations all in the modern style, Dados, Bright Wall Papers, &c. Can be taken to pieces and packed flat for transit or storage, and can be rebuilt in a few seconds. This Toy is sure to be a favourite with little girls, and all old friends of "DOLLIE DAISIE DIMPLE." It is quite a large Doll's House, and takes the place of a Doll's House usually costing ten times the money. Price ONE SHILLING complete.

EXTERIOR OF DIMPLE VILLA, 16 in. by 17 in. by 8 in. These Pictures are all taken from the toys themselves.

The Three Toys, One Shilling each, may be had of all important Toy Houses in the World. The GIRL DOLL, One Shilling; the BOY DOLL, One Shilling; and the DOLL'S HOUSE, complete, One Shilling, and 4d. extra on each article for packing and postage; 6d. extra on two articles, and 8d. on the three, to any address in United Kingdom or Continent. Cash by Postal Note preferred. Applicants should write very distinctly their Postal Address. Last year several hundred toys were returned by the Post Office "address not known."

HINDE'S LONDON SAMPLE ROOM, 1a, CITY-ROAD, FINSBURY, LONDON, E.C.
Though found quite unnecessary, the Patentees still adhere to their practice of Money Willingly Returned if any Dissatisfaction. Drapers will find these Toys an Attractive Christmas Novelty.

"THE GUN OF THE PERIOD." TRADE MARK. REGD.
HONOURS, PARIS, 1878; DIPLOMA & MEDAL, SYDNEY, 1879; AND CALCUTTA, 1883-4.

With intercepting Safety Bolt, rendering an accidental discharge impossible.

G. E. LEWIS'S TREBLE GRIP, combined with Anson and Deeley's *Locking*, Cocking, and Automatic Safety Bolt, is the most perfect weapon ever placed in the hands of the sportsman. The opening of this gun cocks it, and bolts the triggers and tumblers automatically. Prices from 20 to 40 guineas. A special plain quality, £16. Express Rifles, from 12 guineas. "The Gun of the Period," wherever shown, has always taken honours. Why buy from Dealers when you can buy it at half the price from the Maker? Any gun sent on approval on receipt of P.O.O., and remittance returned if, on receipt, it is not satisfactory. Target trial allowed. A choice of 200 *guns, rifles*, and revolvers, embracing every novelty in the trade.—G. E. LEWIS, Gun Maker, 32 and 33, Lower Loveday-street, Birmingham. Estab. 1850.

HIMROD'S
CURE FOR ASTHMA
Established nearly quarter of a century.

Prescribed by the Medical Faculty throughout the world. It is used as an inhalation, and without any after bad effects.

Among the thousands of testimonials the following will be read with interest:—

"The only relief I could get."—"If I had known it earlier."—Lord Beaconsfield
(In his dying moments).

"I have tried every remedy ever invented, and HIMROD'S CURE is the only one in which I have absolute confidence."—Emily Faithfull.

"This is an excellent remedy for asthma."—Sir Morell Mackenzie,
(In his clinical lecture at the London Hospital and Medical College).

"I have used all remedies—HIMROD'S CURE is the best. It never failed."—Oliver Wendell Holmes.

Trial samples free by post. In Tins at 2s. 3d.
British Depot—36, Holborn Viaduct, London.
And also of Newbery & Sons, Barclay & Son, Lynch & Co., Sangers, and all Wholesale Houses.

COUGHS, COLDS, ASTHMA, BRONCHITIS, and NEURALGIA.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the "Times," July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in cholera was Chlorodyne.—See "Lancet," Dec. 31, 1853.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Extract from the "Medical Times," Jan. 12, 1866:—"Is prescribed by scores of orthodox practitioners. Of course, it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, Rheumatism, &c.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in Cholera, Dysentery, Diarrhœa, &c.

DR. J. COLLIS BROWNE'S CHLORODYNE.—CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government stamp. Overwhelming medical testimony accompanies each Bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. Sold in Bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

UMBRELLAS.

SAMUEL FOX & Co., Limited, have added to their celebrated frames decided improvements (protected by Letters Patent) which give increased Stability and greater Neatness to the Umbrella.

SAMUEL FOX & Co., Limited, manufacture the Steel specially for all their frames and are thus able to provide exceptional quality at a merely nominal price over inferior makes.

WESTERHAM HILL-CLIMBING COMPETITION WON ON A WHIPPET SAFETY BICYCLE, AUG. 18, 1888.

In the Competition, held by the Catford Cycling Club up this Hill, Mr. W. Chater Lea, of the North-road C. C., won on a WHIPPET, beating the second man by 23 1-5th seconds. Out of fifteen competitors, only five succeeded in riding the hill at all, out of which the FIRST and THIRD rode WHIPPETS.

THE PARNELL INQUIRY COMMISSION: SKETCHES IN COURT.

OUR NOTE BOOK.

BY JAMES PAYN.

In the New York Supreme Court the question of "What's in a name?" has been settled—and quite rightly—in a contrary sense to that of Shakspeare's reply to it. A rose by any other name may smell as sweet, but a literary work does not sell so well signed by an ordinary name as one which has that of a popular author below it. Such a fortunate person, it seems, in America, is one Mr. Halsey, who adopted for his pseudonym the title of "Old Sleuth," accompanied by a woodcut of an ancient countryman intended to represent a detective in disguise. This addition is a novelty in letters. If I had to begin my own time again I should dearly like to be pictorially represented. Nothing characteristic of my present appearance would, I fear, prove very attractive. It would be (almost) ridiculous to adopt Phœbus Apollo, or even Hyacinth "with nymphs"—as the picture catalogues have it—for my literary trade-mark. The very best I can think of would be an ancient citizen (certainly not countryman) "with gout flying about him," and even that has a touch of Kensal-green, or, at all events, of the New-road, in it. However, Mr. Halsey was very well satisfied with his "Old Sleuth," and, moreover, so pleased his readers that an enterprising publisher thought it worth while to issue a whole volume of "Old Sleuth" stories (written by somebody else) without his leave or license. It is good to read the remarks of the Chief Justice upon this "high-handed outrage" (not in Utica but in the Empire City itself), and satisfactory to find that acts of literary piracy committed by one citizen upon another are not looked on in the United States in the same light as when committed on aliens. There are, it seems, the germs of justice there, though it cannot be said to grow with the celerity of mustard seed, so as to overshadow the earth.

The times in which we are told our young men shall see visions, and our old men dream dreams, have (as might naturally be expected) been anticipated by a female scientist of renown, hailing from the Great Republic. Anna Bonus Kingsford, M.D., of Paris, President of the Hermetic Society—an unknown institution to me, but presumably one that objects to too much ventilation; in which case it has my sympathy—and author of "The Perfect Way in Diet," has been publishing her dreams. In her rôle of "Medical Man" (or whatever may be its female synonym) she is, of course, free to dream as much as she likes; but in the character of story-teller, in which she also appears, I think it a grievance which affects the whole literary profession. Our work is hard enough as it is, without our having to contend with a rival who has only to go to sleep to produce romances. It is an attribute that turns the whole question of literary production topsy-turvy. "A little more slumber, a little more folding of the hands to sleep," used to be destruction to it: but the longer Dr. Anna Bonus Kingsford sleeps, the more work she produces. The old injury to labour caused by the introduction of machinery sinks into insignificance compared with this *amazing gift of hers*. She considers that her "*abstinence from flesh meats during the last fifteen years*" has *something to do with it*. *I hope she will remain under that conviction*; for, considering what she dreams under the influence of "butter, cheese, eggs, and milk" only, I tremble to think what tremendous stories—throwing Messrs. Stevenson and Haggard altogether into the shade—she would turn out if she took to pork chops for supper. Even now she can dream pretty much as she likes by altering her habitat. In her own residence (thank Heaven!) she confesses that she does not possess this power in its highest perfection, the situation being "too flat and humid"; but when she goes to Paris or Switzerland "the necessary magnetic or psychic tension" never fails to exert itself; before many weeks have elapsed her "diary is once more rich with the record of her nightly visions," and then she begins to send them to the magazines. As to verse, like Coleridge, she has never been able to write a complete poem out of dreamland; her memory always fails her after a certain amount of rhymes, "however luminous and recent was the impression on her mind." This I exceedingly regret. I wish she could produce whole epics which would occupy her entire slumbers, and leave no time for the stories which she dreams with such fatal facility, and which handicap to such cruel disadvantage her fellow-labourers in the field of fiction. In her recently published "Dreams and Dream Stories" there are no less than thirty-two of them. I trust this gifted lady is now at home, and will remain there.

A good deal of dreaming has been done by scientific persons, but always when they have been awake. The only example I can call to mind of a real dream coming to anything practical, in either art or science, was that which happened to Dr. Chladin, the inventor of the euphon. The harmonica was the popular instrument in his time, by which sounds were produced by rubbing glass tubes in a straight line with a wet finger; and he felt confident that a better music could be obtained by rubbing them circularly. For years he cogitated how to make this improvement, but without success. "On June 2," however, "1789, being tired with walking, he went to sleep in his arm-chair, and scarcely had he closed his eyes when the image of just such an instrument as he wished for seemed to present itself before him, and he awoke as if he had been struck by an electric shock." He made at once a series of experiments on the lines thus suggested to him, which resulted in the production of the euphon, which cut out the harmonica altogether.

"The Weather-Plant and the Earthquake" has now become a frequent newspaper heading, and reminds one of the titles of the old fables, or those to be found in Mr. Burnand's charming version of "Sandford and Merton." It is not a fable, of course; but I notice that the weather-plant has got into the second stage of scientific repute. In the first, a novelty of this kind is always described as one of the greatest discoveries of the age; in the second, it is decidedly less extraordinary; and in the third, it is no discovery at all, but was very well known (under another name) to our grandmothers. It is now asserted that the prescience of this interesting plant is uninfluenced by the atmosphere at any distance of time or place, and merely arises from "the immediate habitat in which it may be at the moment." It might, in fact—after all the crowing about it—be almost called a weather-cock. Still—to be just—how similar is the conduct of this depreciated vegetable to that of the animal Man! *He* is affected by what is near to him, but not at all by things remote—not even by earthquakes; and *his* "behaviour varies"—(if he dwells in a glass-house, like the weather-plant, for instance, he dares not throw stones)—"according to the special conditions in which he lives."

The case of Michael Brannagan and Peter Murphy, aged respectively forty-four and twenty-one *at the time of their trial*, but imprisoned for the last nine years (as it would seem) unjustly, promises to be a *cause célèbre*. No one who has had the misfortune to be in the jury-box—a situation only less deplorable than that of being in the dock—at any criminal trial will probably have failed to hear the Judge remark that "circumstantial evidence is really more to be depended upon than direct, because all suspicion of malice is excluded, &c." The observation is certainly not new, but it is quite true. The proverb "Murder will out" is almost universally accepted; but there are a hundred murders undiscovered for two wrongful convictions upon circumstantial evidence. They are very rare indeed, and when it is attempted to give instances—just as people exclaim "Pitt" or "Kean" to illustrate the fable of hereditary genius—everyone cries "Jonathan Bradford," and generally stops there.

The gentleman who lay drunk in the street with his sword beside him, which another, quarrelling with a friend, snatched up, and passing it through his body left it there and took to his heels, is another favourite illustration. The famous case before Lord Justice Dwyer, where the foreman of the jury saves the prisoner from the gallows by starving out the other eleven because he happens to be the man who committed the murder (a justifiable homicide, though it didn't look like it) himself, is another. The details are most dramatic. The Judge's warning to the jury that unless they found the prisoner guilty "the blood of the murdered man would lie at their doors"; the prisoner's averment that he had no witnesses, and his observation, on acquittal, "You see, my Lord, that God and a good conscience are the best witnesses"; and the subsequent statement of the true state of the case, by the foreman to the Judge, in confidence, are most interesting reading. Again, the son who was hanged, for the murder of his father with a hammer, chiefly on the evidence of his footprints, which were really those of his sister, who had worn his shoes for that very purpose, and was the homicide herself. And, finally, the terrible miscarriage of justice in the case of William Shaw, over whose felon's grave in Edinburgh "a pair of colours" was ordered to be waved by a repentant Magistracy in token of his innocence, and "to make reparation to his memory and his surviving relations."

When one has called to mind these incidents—all of long ago—there only remain a few more to add to them from the whole annals of crime. But when a mistake *has* been made, and supposing it can be remedied—and in these days, so far as I can gather, only one case has been irremediable—it certainly seems monstrous if nothing but "the Queen's pardon" (as if it were the Victoria Cross!) is given to the unhappy victim of judicial error. Would that recompense you, most innocent reader, or me, for nine years of wrongful punishment and exclusion from all human joys—down to tobacco? I trow not. The public pay for a good many legal mistakes with marvellously little grumbling, and they ought to pay for a mistake of this kind handsomely, and without grumbling at all.

A Lord Mayor's feast is a great spectacle, and should not be missed by anyone who has the opportunity of partaking of it, and to whom the varieties of human life are interesting; but as a dinner—well, some of us have had better ones. It is, indeed, impossible that a really good dinner can be provided for 800 persons—which I read was the number of guests entertained at the Guildhall on the last Lord Mayor's day—or for 400, or perhaps even for 100. "The more the merrier, the fewer the better cheer," is a proverb, the former part of which is very questionable, but the latter undeniably true. For good cheer and good talk eight is, in fact, the greatest number of our fellow-creatures that should be set down to any dinner-table. But the bill-of-fare at the Mansion House is interesting in itself from the mere magnitude of it: "700 quarts of turtle soup, 100 turkeys, 250 fowls, 200 dishes of game," and so on. Also the exceptional paucity of some things (doubtless for culinary reasons), such as "two turbot," which, as a provision for 800 guests, seems to trench upon the miraculous. Funniest of all, though there are "50 pine-apples and 250 lb. of grapes," there are no nuts. Can no one guess why? Well, then, I will tell you. The cracking of nuts disturbs the after-dinner oratory.

The accusations of the wholesome literature societies against "highwayman stories" are, no doubt, well founded, though I think they are exaggerated. The natures that are attracted by the violent delights of robbery and manslaughter are not imaginative, nor given to literature of any kind. Stories which treat of actual vice, though disgusting to cultured minds, are very attractive (however well-meaning folk may maunder to the contrary) to coarse ones; but crime, in my opinion, is under very small obligations to letters. It ought, of course, to be under none at all; but the steps taken by the societies in question to prevent it are, to say the truth, not calculated to effect their object. The "pure literature" they furnish is of such a very milk-and-watery character that, so far from winning readers from their pabulum of lawless peril, it attracts no one. One is almost tempted to say of it what the poet sang of the **æsthetic lover of sunflowers, that "if he's content with a** vegetable love, it will certainly not do for *me!*" It is surely possible to be moral, and yet not so deadly dull. The same difficulty seems to obstruct the success of the teetotallers. They exclaim, "No alcohol!" but the drinks they offer in place of it are all of them more or less sickly and distasteful, and too much like "the excellent substitutes for butter at breakfast." If a drink could be concocted with no spirit in it, but which was really attractive to the palate, half the temperance battle would be won. Why is not a reward offered for its discovery? Similarly, why do not the pure literature societies, instead of producing stories which remind one of the immortal parody upon Hans Christian Andersen ("And lo, in the morning, the foot of the peasant had trodden on the flower that the child had planted upon his mother's uncle's grave"), get Mr. Stevenson, or somebody (No, my cynical friend: "Terms will *not* be sent on application"), to supply them with stories for the masses that shall be pure as snow, but not so soft and cold, and with a fine flavour of adventure in them?

THE COURT.

The Queen, accompanied by Princess Beatrice with Prince Alexander Albert and the infant Princess of Battenberg, and Princess Alice and the young Duke of Albany, arrived at Windsor Castle on Nov. 16 from Balmoral. The Queen held a Council on the 17th at Windsor Castle. The Ministers attending included Lord Cranbrook and Lord Lathom, with Mr. Lennox Peel, the Clerk of the Council. The Queen and Princess Beatrice drove out in the afternoon, attended by the Dowager Duchess of Roxburghe, and honoured the Dowager Lady Churchill with a visit, at Coppins, near Iver. The Marquis and Marchioness of Salisbury arrived at Windsor Castle, and had the honour of dining with her Majesty. The Hon. Lady Biddulph had the honour of being invited. Lord Salisbury had an audience of the Queen after dinner. On Sunday morning, the 18th, her Majesty and the Royal family, and the members of the Royal household, attended Divine service in the private chapel. The Very Rev. the Dean of Windsor officiated.

The Queen left Windsor Castle on the morning of the 19th, accompanied by Princess Louise and Prince and Princess Henry of Battenberg, and proceeded by train to Port Victoria, where her Majesty went on board the Victoria and Albert yacht to receive the Empress Frederick and the Imperial Princesses. The Queen and Prince of Wales, with the Empress Frederick and the Imperial Princesses, then proceeded by train to Windsor and drove to the castle. The Empress Frederick and her three youngest daughters left Berlin early on the previous day for Flushing. The Emperor William accompanied his mother to the station, where he took a very cordial and affectionate leave of her. The *Daily Telegraph's* correspondent says:—"The parting between mother and son was of the warmest description. Kaiser William kissed his Imperial mother's hand as he received her on the platform, and then her cheeks no less than five times. Their Majesties repeatedly embraced one another before the train started." The Empress and her three daughters reached Flushing shortly after ten at night, and immediately embarked on board the British Royal yacht Victoria and Albert, which had arrived, with the Prince of Wales on board, in the morning. The vessel left at twenty minutes past eleven for Port Victoria. We give on another page a Portrait of the Empress Frederick and an Illustration of the landing of her Imperial Majesty at Port Victoria.

The Prince of Wales concluded his visit to Derbyshire on Nov. 15. In the morning his Royal Highness, accompanied by Lord Hindlip, left Doveridge Hall for Burton-on-Trent for the purpose of inspecting Messrs. Allsopp's brewery. The Prince was loyally received in Burton. He then proceeded to Derby, and joined the 2.50 train for London. The Prince, accompanied by Prince George (who had arrived from Athens in the morning), left Marlborough House on Saturday evening, the 17th, and embarked at Port Victoria for Flushing, to meet the Empress Frederick.—The Princess of Wales, Prince Albert Victor, and Princess Victoria of Wales arrived at Copenhagen on the 14th, to take part in the Jubilee festivities. They were received at the railway-station by the Queen of Denmark, the Crown Princess, Princess Marie, and the Czarewitch. The members of the British Legation and Baron Mohrenheim were also present. The festivities at Copenhagen were brought to a close by a ball held in the Casino on Tuesday evening, the 19th. The guests numbered about 1000, and included the Ministers, the members of the Diplomatic Body, all the principal officials, and the élite of Copenhagen society. At ten o'clock the Royal family and their illustrious guests entered the ball-room, the Princess of Wales being conducted by the Czarewitch, and Princess Victoria of Wales by the Crown Prince of Denmark. After an overture by the orchestra the King opened the ball with the Princess of Wales.

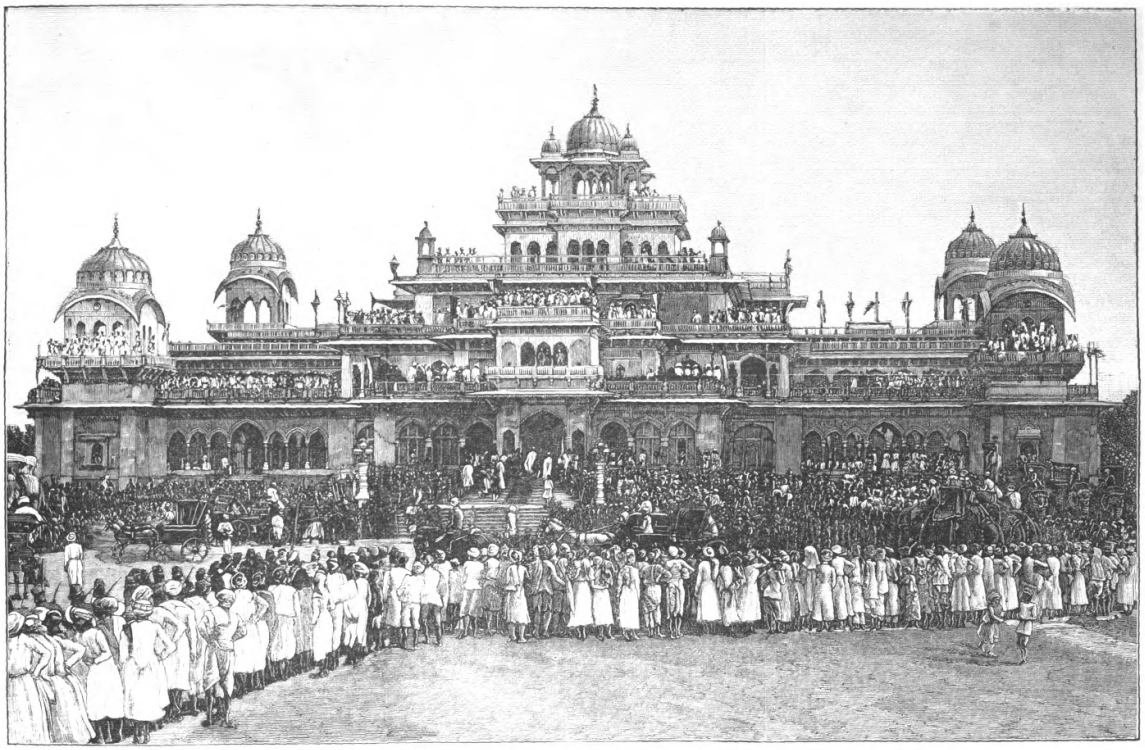
The annual return of the London Scottish Volunteers for 1888 shows that under the altered conditions of the capitation grant the corps possesses 776 officers and men earning the full allowance of 35s. a year. The Queen's Westminster have 852, the London Rifle Brigade 672, the Artists 756, the Post-Office 799, the London Irish 816, and the Inns of Court 219. All the returns, with the exception of the Irish, are below those of last year, when the easier musketry terms were in force.

The latest wonder of Regent-street is the sign of the "Arts and Crafts Exhibition Society," which hangs from a splendid pole over the rather obscure entrance to the New Gallery. It will be recognised at once as the work of the president, Walter Crane. A winged figure, upon one side, the Society's Evangel, heralds the union of Art and Craft. On the other, the Artist and Craftsman (the two being so slightly distinguished as to avoid all possibility of offence to the latter) strike hands upon a vow of friendship. The Exhibition closes on Dec. 1.

The author of "Hartas Maturin," a novel reviewed by us on Nov. 10, asks us to correct an "error"—we should rather say, a misapprehension of his purpose—which could only have arisen from the obscure and equivocal construction of the story. Our summary description of the central point of the imaginary situation was this:—"Dr. Maturin has murdered his first wife; and immediately on her death, the soul of this woman has become the soul of a new-born female infant, belonging to another family." The novelist, Mr. H. F. Lester, tells us now that he did not speak of this transmigration of souls "as a fact." Nor did he speak of the murder of the doctor's wife "as a fact"; it is all imagination, of course, alike the natural and the supernatural incidents. But the vision by which the young lady, eighteen years afterwards, experiences what happened to her predecessor, is related in the manner of ordinary narrative; and the reader is supplied, by an eloquent Spiritualist prophet, with a theory of "re-incarnation," to explain how and why she had such a vision or second-sight. Mr. Lester says, "A scientific explanation of the events in the book is also given"; but we have failed to find it, and do not understand how any supposed incidents which are not facts, but mere fancies, can ever be scientifically explained.

THE PARNELL INQUIRY COMMISSION.

The Court of Inquiry held by Sir James Hannen, Mr. Justice Day, and Mr. Justice Smith, the Judges under the Special Commission appointed to examine the charges of the *Times* against Mr. Parnell and other members of the House of Commons, associated with the Irish Land League and the Irish National League, has continued its sittings at the Royal Courts of Justice. The Attorney-General, Sir Richard Webster, and Sir Henry James have called more witnesses, and they have been cross-examined by Sir Charles Russell, Mr. Lockwood, and other Counsel, and by Mr. T. Harrington, Mr. Davitt, and Mr. Biggar, who appear in person. At the sitting on Friday, Nov. 16, the proofs of murders and other crimes and outrages in Galway being exhausted for the present, the Court proceeded to investigate those which were perpetrated in Kerry. One of the witnesses from Galway was Lady Mountmorres, widow of the unfortunate nobleman who was cruelly murdered on Sept. 25, 1880, in the neighbourhood of his residence, Ebor Hall, near Cong, owing to the machinations, as is alleged, of the Clonbur branch of the Land League. Her Ladyship's Portrait is given among our Artist's Sketches in Court, which present also those of some other Galway witnesses, average types of the farmers and peasantry, and of the process-servers and Irish Constabulary. The circumstantial narratives of cruel murders by shooting, and of midnight visits to lonely farm-houses, where the tenants were dragged from their beds, savagely kicked and beaten, and usually shot in the legs, for disobeying the orders of the Land League, have a horrible sameness, these outrages being apparently regulated by a set of rules, or "Plan of Campaign," which prevailed over wide districts of the country. Those who were shot in the legs had, in some instances, to have a limb amputated, and were maimed for life. On Tuesday, Nov. 20, in the Kerry examinations, one witness was Miss Lizzie Curtin, daughter of the unfortunate tenant of Castle Farm, near Tralee, who was killed on the night of Nov. 13, 1885; she described also the inhuman persecution since endured by herself and her sisters. In addition to Galway and Kerry, five other counties of Ireland, where crimes and outrages have prevailed, are to be made the subject of inquiry.



THE ALBERT HALL, JEYPORE, INDIA.

This noble edifice has been built for the Maharajah of Jeypore, entirely under the superintendence and from the designs of Colonel Swinton Jacob, R.A., having been the work of many years. It is of white marble, and the exterior and interior pillars, walls, and screens are enriched with carvings of marvellous beauty. It is worthy of note that every piece of carving is different and unique, and that for each carving a number of various designs were modelled of full size, so as to judge of the effect when completed, and the most beautiful of them were then selected to be sculptured in the pure white marble by the intelligent native workmen. For years past a band of draughtsmen have been employed in making designs for this purpose from the carvings of most exquisite art which adorn the famous architectural monuments of India, those of Delhi having yielded by far the richest store of examples. Many recent travellers in Rajpootana have admired these designs, which, now that the scaffoldings are down, stand revealed in all their beauty; also the white marble domes which crown the hall, giving it a peculiarly Oriental effect. The opening ceremonial took place when the Political Agent, Colonel Walton, went down in State from Mount Abu to invest the Maharajah with the insignia of the Grand Cross of the Star of India, and all the city of Jeypore was en fête. A grand Durbar was held in the new Albert Hall; and next day there was a State dinner in the principal hall of the building, followed by an elaborate nautch, with the electric light, and by a grand display of fireworks in the pretty gardens in front of the building. The road from the Residency to the city, for a mile and a half, was illuminated by yellow Chinese lanterns, hanging from the trees, looking just like pendant golden fruits; while all the terraces and prominent parts of the Albert Hall were gaily ornamented with tulip-shaped illuminated paper lanterns. The whole was like a scene out of fairyland; and a lady visitor has sent us a photograph of the building.

THE NEW DEAN OF CHICHESTER.

The Very Rev. Francis Pigou, D.D., who has succeeded Dr. J. W. Burgon in the deanery of Chichester, was educated at Trinity College, Dublin, and was ordained in 1856. He has been Vicar of Halifax, Yorkshire, and Rural Dean, since 1875, and held an honorary canonry in the Chapter of Ripon Cathedral; he was also one of the Queen's Chaplains, and Chaplain to the 2nd West York Yeomanry Cavalry and to the Rifle Volunteers. He is the author of several volumes of sermons and theological treatises, the most recent being "A Manual of Confirmation."

Mr. Beecham, the well-known proprietor of Beecham's Pills, has issued this year a Christmas annual, one of the most extraordinary penny publications ever issued. Tales by first-class authors like "Ouida," Jessie Fothergill, George R. Sims, R. E. Francillon, R. M. Ballantyne, G. Manville Fenn, and others, appear; and a new quadrille is given.

OPENING OF THE NEW ALBERT HALL, AT JEYPORE, INDIA.

THE SILENT MEMBER.

The joint action of England and Germany in a strong endeavour to suppress the Slave-trade in East African waters did not escape comment when the House of Lords met on Tuesday, the Twentieth of November. There was no absolute necessity to refer to it. The Prime Minister so clearly and amply explained this international arrangement, in reply to Lord Harrowby's thoughtful interpellation, at the reopening of the Session, that there was really nothing to add. But Earl Granville felt it due to his position as Leader of the Opposition in the Lords to hint that all was not smooth sailing with regard to the negotiations with France as to the right of search—a point on which Lord Salisbury returned a satisfactory answer. Then, again, the Earl of Dunraven, his zeal unexhausted in the "Sweating" Commission, deemed it incumbent on him to practically repeat the warning note to Lord Harrowby respecting the possible danger of military operations in East Africa. In his admirably lucid and cogent style, Lord Salisbury convinced their Lordships that this country would confine itself to naval operations in East African waters.

Beneath the apparently placid demeanour of cherubic Baron Halsbury there lurks a pugilistic force of character which induced the Lord Chancellor, on this same Twentieth of November, to rise and lustily defend himself from the accusations of nepotism brought against him in the Commons by Lord Randolph Churchill, in the debate on the Court of Judicature vote. With respect to the general question of the administration of the Royal Courts of Justice, it may here be said that, though some sinecures may exist, the undoubted services rendered to the public by the efficient staff, and rendered, too, with a readiness and politeness that might well be emulated in other Civil Service offices, have not received their due meed of recognition in Parliament. Lord Halsbury had no difficulty in furnishing a common-sense reason for his appointments; and Lord Esher and Lord Coleridge loyally supported the Lord Chancellor.

The illness of Mr. Bright and Mr. Arthur Balfour has occasioned anxiety and regret; but, happily, good reports as to the progress of both right hon. gentlemen were forthcoming when we went to press. The death of Colonel Duncan, one of the most estimable of Conservative members, has been generally deplored.

The absence of Mr. Balfour during the debate on the five millions vote (regrettable though the cause was) undeniably denuded the discussion of some of its anticipated vivacity, for it deprived Mr. Gladstone of the excitement and baiting requisite for a thoroughly lively retort. But it was soon evident that Mr. Gladstone retained all his old power of drawing a full House. For the first time this autumn the House of Commons was full on Monday, the Nineteenth of November. Peers and strangers crowded their respective galleries. The gallery facing the Opposition side was lined with hon. members, whose gaze was fixed upon the pale, deeply-lined resolute face of the veteran Leader, who, within a twelvemonth of his eightieth year, is still in the possession of the best of health, mental and physical, and whose eloquent voice was never clearer than it was that afternoon. Fresh from his Paddington panegyric of the Ministry and all its works, and not discomfited in the least by Mr. Smith's response that the Public Prosecutor would not commence criminal action against the unmasked offenders of the Metropolitan Board of Works, Lord Randolph Churchill snugly curled himself up and industriously curled his moustache in his corner seat behind the Treasury bench. The Marquis of Hartington, hat drawn down over his head, as usual, was driven by Sir George Trevelyan to the very verge of the front Opposition bench. Mr. Labouchere, Mr. Bradlaugh, and a strong gathering of Irish members were among the most expectant of Mr. Gladstone's large audience. It devolved upon the Solicitor-General for Ireland to introduce the Bill to facilitate the purchase of land in Ireland by increasing the grant applicable for that purpose by five millions sterling. Mr. Gladstone, who expressed his regret at Mr. Balfour's absence and ab its cause, was in his best vein. The gist of his amendment was that, in lieu of granting the £5,000,000, the Land Courts should be empowered to "reduce or cancel the arrears of rent found to be excessive, after the example of the legislation recently and beneficially applied to crofters' holdings in Scotland." Mr. Gladstone's energy was extraordinary, his delivery exceptionally forcible. In the course of a long speech (to which Mr. Goschen had no difficulty in replying in a cogent and logical argument), Mr. Gladstone ironically twitted Lord Hartington with his alliance with Lord Salisbury, and roused the enthusiasm of the Home Rulers by his earnest appeal to the Government to avert "the lamentable sufferings caused by recent evictions." The most notable feature of the second and concluding night's discussion was the smart triangular duel between the Marquis of Hartington, on the one side, and Mr. Dillon and Mr. John Morley on the other. In the division, with the aid of its Liberal Unionist wing, the Government scored a majority of 84—330 against 246 votes.

The Christmas Number of our illustrated contemporaries have made their appearance. The *Lady's Pictorial* contains a story by Mr. Oscar Wilde, "The Young King," with designs by Mr. J. Bernard Partridge; "Glenlogie," by Helen Mathers; "For Whose Sake?" by John Strange Winter; and other tales, by Mrs. Edward Kennard and Ella Hepworth Dixon; with verses by Mr. Clement Scott. The coloured picture, "Ladylove," is a copy of a beautiful painting by V. Carcos; and Louis Wain supplies a party of cats on a merry-go-round. "Holly Leaves," the Christmas publication of the *Illustrated Sporting and Dramatic News*, presents much literary entertainment, and is accompanied by a coloured picture after Sir J. E. Millais' "Panchinella." Messrs. Cassell's Christmas annual, called "Yuletide," carries with it a large oil-colour print of the well-known picture, "At Last," by Mr. Arthur Stocks, with two smaller pictures, by Thomas Boys, and a school-room of cats, "Miss Tabby's Academy," by Louis Wain. The *Pictorial World* Christmas Number has a large supplement printed in oil-colours, entitled "Shall I carry you?"

THE VERY REV. FRANCIS PIGOU, D.D.,
THE NEW DEAN OF CHICHESTER.

THE RIGHT REV. ALFRED EARLE, D.D.,
THE NEW BISHOP OF GUILDFORD (COADJUTOR, LONDON).

THE RIGHT HON. THE EARL OF ONSLOW, K.C.M.G.,
THE NEW GOVERNOR OF NEW ZEALAND.

THE EARL OF ONSLOW.

The Colony of New Zealand has certainly no cause, and probably no disposition, to object, like the Australian province of Queensland, to the recent nomination of a Governor on behalf of her Majesty the Queen. Lord Onslow has occupied, since February, 1887, the useful post of Under-Secretary of State for the Colonies in the Administration of Lord Salisbury; and that department has been conducted by his chief, Lord Knutsford, and by himself, in a manner very satisfactory to our Colonial fellow-subjects. The Right Hon. Sir William Hillier Onslow, Bart., Knight of St. Michael and St. George, fourth Earl of Onslow, was born March 7, 1853, son of George Augustus Cranley, who was grandson of the Hon. Thomas Cranley, second son of Thomas, Viscount Cranley and Earl of Onslow; he is thus grand-nephew to his immediate predecessor, Arthur George, third Earl of Onslow, who died without surviving male issue in 1870. The earldom was created in 1801, but the barony of Onslow in 1716; the first Baronet was Lord Mayor of London in 1649, and the baronetcy was conferred upon him at the restoration of Charles II. Several of this family, in the eighteenth century, were distinguished in Parliamentary life and Ministerial offices, and one was Speaker of the House of Commons from 1727 to 1761. The present Lord Onslow was educated at Eton, and at Christ Church, Oxford, succeeded to the Peerage in 1870, and was twice appointed a Lord-in-Waiting of the Queen's household. He is married to a daughter of the late Lord Gardner, and has three children, the eldest, Lord Cranley, being twelve years of age.

The annual Christmas sale at the Royal School of Art Needlework—of which Princess Christian is president—has been held at the School in the Exhibition-road, South Kensington. The excellent work for which this school is renowned has been especially well represented on this occasion.

THE NEW BISHOP OF GUILDFORD.

The Right Rev. Alfred Earle, D.D., who has been appointed a Coadjutor to the Bishop of London (with the title of Bishop of Guildford), and also Rector of St. Michael's, Cornhill, was educated at Magdalen Hall, Oxford, where he obtained a Lusby scholarship; he was ordained in 1858 by the Bishop of Salisbury (Dr. Hamilton). His first curacy was that of St. Edmund's, Salisbury; in 1863 he was instituted to the rectory of Monckton Farleigh, Wilts, and in 1865 to the vicarage of West Alvington, Devonshire. He was appointed a Prebendary of Exeter and Archdeacon of Totnes in 1872, and Examining Chaplain to the Bishop of Exeter in 1879. In 1885 he was promoted to a canonry in Exeter Cathedral.

Lord Dufferin is making a farewell tour through parts of the Punjaub, the North-West Provinces, and Bengal, prior to his departure from Calcutta.

THE PLAYHOUSES.

Mr. George Manville Fenn, indefatigable and industrious man, who has been steadily working these twenty-five years past on journals and novels and plays, and who, so far as we know, has never written one line or sentiment that he or anyone else would regret, finds in Mr. J. H. Darnley a pleasant partner. They succeeded well enough with "The Barrister": they have succeeded even better with "The Balloon," a wild specimen of hearty, wholesome, and good-humoured extravagance that happily will bring the authors of it fame, credit, and capital. The new farcical play has been tried at a matinée at Terry's Theatre, and it made the audience laugh so heartily one dull November afternoon that it is pretty sure to be put up at some good theatre and with a capital cast. It would suit Mr. Charles Wyndham or Mr. Charles Hawtrey; for the leading character, a young doctor who thinks he has accidentally poisoned his prospective mother-in-law, is a rattling part, containing some admirably-written speeches. At the matinée Mr. Charles Glenney, Mr. Charles Groves, Miss Gabrielle Goldney, Miss Susie Vaughan, and Miss Florence Wood all did well, and the play only wants a little expansion to fit it into an evening programme. The best of it is that honest fun is here associated with innocent intention. Playgoers must get sick of the married man who goes on the spree, becomes an amateur rake, and returns repentant to the bosom of his family. Farcical comedies require a new motive and fresh treatment, and both Mr. Fenn and Mr. Darnley have proved that they can be bright and amusing without having recourse to rank stupidity or low vulgarity.

Whilst on this subject it may be well to revert to a senseless farce called "That Telegram," recently produced at the Globe, which illustrates the want of respect for the stage and its mission shown by some irresponsible authors. Mr. Sapte, junior, thinks it funny to show us a self-indulgent, conceited prig, who deceives the wife who loves him, and chuckles at the idea of carrying on a clandestine correspondence with an abandoned woman. That a thorough-paced scoundrel can hoodwink the woman who trusts him and not be found out is the humorous idea of Mr. Sapte's farce. In point of fact there is no fun in it whatever. He takes the vulgar exceptions of accepted morality and placards them as the truth. He does *not* hold the mirror up to Nature, but a cracked looking-glass up to viciousness. His moral is: "Go it, you boys; deceive, cheat, and break hearts, but do not be found out! Tell a lie and stick to it." Now, in the opinion of many people all this is not funny but exactly the reverse. To chaff at sin on the stage is to condone cruelty. No one objects to strayings from the path of virtue on the stage as illustrations of modern life; it would be ridiculous to write farces or any plays whatever if nobody erred: but it is inconceivably vicious when the gay dogs do not repent, or when the deceived women do not forgive. To quote Shakspeare as a precedent for the new school of dramatists who paint life, not as it is, but as they distort it, is a piece of impertinence. It is *not* nature to be gratuitously offensive and cruel to good women; and to make it out funny to deceive and not to be found out, is to distort nature. It is argued that no serious moral exists in farce. Rubbish! Whatever we put before the public, farce or tragedy, travels to the mind and leaves there an impression, good or evil. Is it, after all, a clever thing to tell young rakes how they may easily deceive their wives and go scatheless—in fact, how funny it is to trick a confiding woman? But, in this case, the farce is as ill-written as it is low-toned.

Surely it is not taking too high a ground to protect the stage as far as possible from the corruption of vulgarity that is creeping into its very soul? We do not want all the thoughtful people to leave the theatre and hand it over to unprincipled smartness or unadulterated rowdiness. At the Strand, for instance, has been produced a burlesque wholly indefensible in tone and idea. It is considered funny there to caricature existing turf characters on the stage, and to turn Mr. C. H. Fox, M. Alias, and Mr. Clarkson, the wig-makers and costumiers, into the Gilrays and Rowlandsons and "H. B.'s" of our time. There is such a fever of personality abroad that society is asked to go to the play in order to see the members of the Jockey Club and various celebrities on the turf "taken off" behind the footlights. Once start this idea, and there will be no end to it. The stage will become an illustrated daily newspaper. Is this what the dramatic reformers demand when they clamour for actuality and realism? The theatre is bear-garden enough already without introducing there political animosity and social strife. We go to the play to be amused, not to abuse our neighbours; to get out of the world, not into it again. Imagination is the gift that the theatre should stimulate; not reality. Caricatures we can see enough of in the comic and personal papers without turning public men into stage puppets. Luckily for the dignity of the stage the burlesque called "Atalanta" was a pronounced failure, and the indignation of the audience has caused a thorough change of policy. In justice to Mr. Lewis Wingfield it should be said that he was not responsible for the hideous combination of modern sportsman and Greek swell, the racing attire and the petticoat. He was overruled, and now that he has his way the characters in the last act will be sensibly altered. But after all, is taste really so low as the authors of "Atalanta" would have us believe? Do we go to the play to have our ears tortured with such barbarous Cockney rhymes as "Atalanta" and "can*t*er," "Atalanta" and "instan*t*er," "Atalanta" and "ban*t*er," and such like atrocities, at which the Byrons and Talfourds and Broughs and Reeces would have shuddered and rebelled. What "r" sound can be found in the Greek "Atalanta," except in the ears of a Cockney writer? We may just as well have "yaas" for yes, or any other barbarism. Or do we go to the play to hear music murdered and an old Greek legend misapplied? Poor Miss Marie Linden, miserable Mr. F. Wyatt, unhappy Miss Alma Stanley, to be connected with such deplorable childishness! Of all sad sights, perhaps the saddest is to see clever artists paid to perpetrate inconceivable folly.

As a relief, we have had a very respectable, and in many respects creditable, version of "The Lady of Lyons" at the new Shaftesbury Theatre, where, on the first night, the iron curtain refused to budge an inch, and necessitated the prompt dismissal of the audience. Mr. Forbes Robertson gave a highly intelligent rendering of Claude Melnotte; and Miss Wallis was refreshing, after a series of milk-and-water, powerless Paulines. The audience woke up, as if from a lethargic dose, when Miss Wallis began to act. For the last few years we have been whispering and dawdling on the stage, not acting. What would the modern playgoer say if he could suddenly see an Adelaide Neilson? How he would open his eyes and stare with astonishment!

A notice of "Hands Across the Sea," and an Illustration of a scene in it, are given in another part of this Paper.

Our Portrait of the late Sir Richard Baggallay is from a photograph by Mr. G. Jerrard, of Claudet's Studio. That of Lord Onslow is from one by Messrs. James Russell and Sons, of 17, Baker-street, who furnished also those of the new Bishop of Guildford and the new Dean of Chichester.

OBITUARY.

THE EARL OF DEVON.

The Right Hon. William Reginald Courtenay, twelfth Earl of Devon, and a Baronet, P.C., D.C.L., died on Nov. 18, at Powderham Castle. He was born April 15, 1807, and succeeded at his father's decease, in 1859, to the representation of one of the most illustrious families in Europe. His Lordship sat in the House of Commons as M.P. for South Devon from 1841 to 1849, was Secretary to the Poor Law Board from 1852 to 1858, Chancellor of the Duchy of Lancaster from 1866 to 1867, and President of the Poor Law Board from 1867 to 1868. He married, Dec. 27, 1830, Lady Elizabeth Fortescue, daughter of Hugh, first Earl Fortescue, K.G., and by her (who died Jan. 27, 1867) had issue, three sons and one daughter, Viscountess Halifax. The only survivor, Edward Baldwin, Lord Courtenay, formerly M.P. for Exeter and East Devon, now thirteenth Earl of Devon, was born May 7, 1836, and is unmarried. The late Lord was educated at Westminster and Christ Church, Oxford, and was a Chairman of Quarter Sessions for Devonshire.

RIGHT HON. SIR RICHARD BAGGALLAY.

The Right Hon Sir Richard Baggallay, Knight, P.C., M.A., Lord Justice of Appeal, died on Nov. 13, aged seventy-two. He was the eldest son of Mr. Richard Baggallay, of Kingthorpe House, Upper Tooting, and was educated at Caius College, Cambridge. He commenced his forensic career in 1843, when he was called to the Bar at Lincoln's Inn, and soon obtained extensive practice. In 1861 he became Q.C., was

THE LATE SIR RICHARD BAGGALLAY.

Solicitor-General in 1868 to 1874, Attorney-General in 1874-5, and Lord Justice of Appeal from 1868 to 1885. The honour of knighthood was conferred on him on his appointment as Solicitor-General in 1868. Sir Richard married, Feb. 25, 1847, Marianne, youngest daughter of the late Mr. Henry Charles Lacy, M.P., of Withdean Hall, Sussex, and leaves a large family.

BARONESS WILLOUGHBY D'ERESBY.

The Right Hon. Clementina Elizabeth, Baroness Willoughby D'Eresby (in her own right), who died at Grimsthorpe Castle, in the county of Lincoln, on Nov. 13, was born Sept. 2, 1809, the eldest daughter of Peter Robert, nineteenth Baron Willoughby D'Eresby (which title was created by writ, July 26, 1313), by Clementina Sarah, his wife, daughter and sole heiress of James Drummond, first Lord Perth, and succeeded to the barony of Willoughby D'Eresby, the abeyance of which was terminated in her favour by Royal letters patent in 1871. Her Ladyship married, Oct. 8, 1827, Sir Gilbert John Heathcote, Bart., afterward Lord Aveland, and leaves by him (who died Sept. 6, 1867) one son and two daughters (the eldest, Clementina, was married, in 1869, to Admiral Sir George Tryon, K.C.B.). The only son, Gilbert Henry, Lord Aveland, now twenty-second Baron Willoughby D'Eresby, married, in 1863, Lady Evelyn Elizabeth Gordon, second daughter of the tenth Marquis of Huntly, and has four sons and six daughters.

VISCOUNT PORTMAN.

The Right Hon. Edward Berkeley Portman, M.A., first Viscount, and Baron Portman, of Orchard Portman, Somerset, in the Peerage of the United Kingdom, died at his seat, Bryanston House, near Blandford, Dorset, on Nov. 19, after a short illness, in his ninetieth year. He was born, July 9, 1799, the eldest son of Mr. Edward Berkeley Portman, of Bryanston and of Orchard Portman, by Lucy, his first wife, daughter of the Rev. Thomas Whitby, of Creswell Hall, Staffordshire, and was created Baron Portman, by patent, Jan. 27, 1837, and advanced to a viscountcy March 28, 1873. The deceased nobleman was educated at Eton and at Christ Church, Oxford (B.A., 1821; M.A., 1826), and represented Dorsetshire in Parliament in the Liberal interest, 1823 to 1832; and Marylebone, 1833. He was Lord Warden of the Stannaries in Cornwall and Devon; a Justice of the Peace for Middlesex, Somerset, and Dorset; and Lord Lieutenant of Somerset, 1840 to 1864. His Lordship married, June 16, 1827, Emma, third daughter of Henry, second Earl of Harewood, and leaves by her (who died Feb. 8, 1865) three sons and one daughter. His eldest son, William Henry, now second Viscount Portman, M.P. for Dorset 1857 to 1885, married, in 1855, Mary Selina Charlotte, daughter of William Charles, Viscount Milton, and has a large family.

THE BLACK MOUNTAIN EXPEDITION.

Two officers with the Hazara Field-Force employed during the month of October in subduing the hostile league of highland tribes among the mountains above the left bank of the Upper Indus, on the northern frontier of the Punjaub, have sent home Sketches which are this week published in our Journal. The whole force, under the chief command of General M'Queen, was divided into four separate columns, which advanced into the hill country by different routes, as we have already explained with reference to our former Illustrations.

The Fourth Column marched up the banks of the Indus; and Captain R. S. Macleod, of the 29th Punjaub Infantry, contributes the Sketches of part of their operations. The first scene is that of the action near Kotkai, on Oct. 4, at the very beginning of the campaign; when that village, perched on the rock shown in his Sketch, was captured by the men of his own regiment, who had ascended the high ground seen to the right hand, forcing the pound and the loopholed walls held by the enemy, till they reached the terraced fields, surrounded by rocks and bushes, on the summit of the ridge commanding Kotkai. They were supported, below, by the fire of Gatling guns, and of the 34th Bengal Pioneers and the Royal Irish Regiment. On the opposite side, to the left hand in this view, beyond the rocky ravine through which the river here flows in deep rapids, some of the enemy appear firing from the high river-bank. Captain Macleod's second Sketch represents the fortified village of Maidan, the stronghold of the hostile fanatics, blown up on Oct. 13 by the Fourth Column of troops, the place having been abandoned by the enemy on the approach of the British force. After blowing up the front bastions and gate, the village was entered and set on fire; the mine threw up an immense shower of stones, with a huge cloud of dust. The troops lying down amidst the stones in the foreground are the Royal Irish, the 4th Punjaub Infantry, the Royal Artillery and 34th Pioneers, and the 29th Punjaub Infantry. The ground in front of the village was intersected with low stone walls, crossing each other to form small enclosures, like the squares on a chessboard, and scattered over with large round stones.

The operations of the Third Column are illustrated, on another page, by the Sketches of Lieutenant W. J. L. Beynon, of the Royal Sussex Regiment, which have been forwarded to us by his father, General Beynon. The following is an extract from Lieutenant Beynon's letter, dated Oct. 10:—

"We have been making roads and raids in all directions. Having made a road through the woods to a certain point, we leave a picquet there, and descend on to some village, which we promptly burn, and then retire to the camp. It is during these retirements that we generally lose most men, as the natives are awfully good at following up, and can take advantage of every cover. One sees no one, but the bullets go over one's head, and you hear the report within, perhaps, fifty yards of you. I got fired at from about twenty yards off, the sparks from the discharge falling within a few feet of me. I found that the top of my head was showing above the skyline, in a space made by two mules having moved apart. How the fellow did not hit me I cannot make out. I managed at night to get shelter in a sort of cow-shed. There are no side walls, and there is great danger of sliding down the 'khud'; but we are better off than other fellows, who have had to make shelves for themselves on the side of the hill. The whole side of the hill is cut up into shelves by the men, who lie in rows; and so they go to bed."

It seems that these two columns of troops were not very far apart on Oct. 13; for, in the first of Lieutenant Beynon's Sketches, we observe Colonel Sunderland's staff-officers, among the ruins of a tower, burnt the day before, above the village of Abu, watching the conflagration at Maidan, in the valley below. There are two or three Illustrations of the affair of Oct. 5 on the Samalbut spur of the Black Mountain; in one of them, hard to the fight, appear several men of the 78th Highlanders, forming General M'Queen's escort; in another, men on the rocks are signalling with flags to announce the news to the camp near Oghi. The position of General Channer's entrenched camp and surrounding regimental encampments at the foot of the mountains, with the village of Kulikka, is shown in another Sketch; half-way up the mountain-side within view is the spot where Major Battye and Captain H. B. Urmston were killed in the skirmish of last May or June. In the remaining Sketches, Lieutenant Beynon drolly illustrates the peculiar sleeping accommodation of his party, as mentioned in his letters, the men lying on shelves of earth cut by themselves in the steep hillside.

We shall give Illustrations next week of the visit of the Prince of Wales to Messrs. Allsopp's Brewery at Burton-on-Trent.

At St. George's Hall, Langham-place, on Monday, Nov. 26, Messrs. Reed and Grain will produce a new piece, entitled "The Bo'sun's Mate," written by Walter Browne, the music by Alfred J. Caldicott.

Entertainments are given weekly at the Brompton Hospital, greatly to the delight of the inmates. The one provided on Tuesday, Nov. 13, was by Miss May Woolgar Mellon (the clever daughter of a gifted mother), assisted by several friends; and consisted of scenes from "My Sweetheart," and the comedietta of "My Milliner's Bill," in both of which Miss Mellon acted and sang with charming effect, her companion in each piece being Mr. Sidney Paget, who proved himself a worthy partner. In the first piece a very little girl, Ivy Glassby, made a pretty little "boy," and efforts of the trio called forth repeated rounds of applause. Some excellent singing and recitations were given by Mr. Sidney Herberte-Basing and Mr. E. V. Wright; and the Misses Gray added to the enjoyment of the audience by their finished pianoforte playing.—The entertainment on Tuesday evening, the 20th, was given by Madame Dukas, and consisted of an excellent selection of music by that talented lady, and various members of her "Ladies' Choir," assisted by Mr. Richard Hope, with Mr. Walter Van Noorden as conductor. The programme included—"I'm but a simple Peasant Maid," brilliantly sung by Madame Dukas; "Sing, Sweet Bird" was given by Miss Julia Dunhall; as was "A Wee Wifie" by Miss Emily Farmer. There were several encores.

THE EMPRESS FREDERICK OF GERMANY.

LANDING OF THE EMPRESS FREDERICK AT PORT VICTORIA, ON MONDAY, NOV. 19.

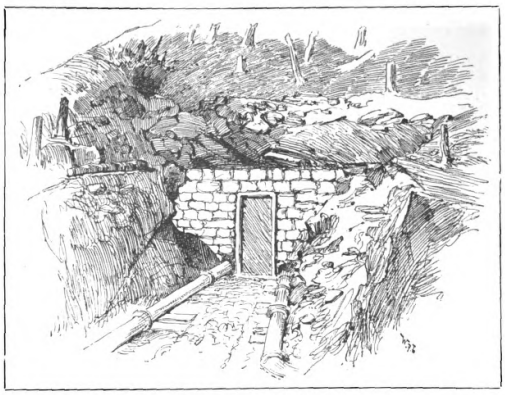
THE CANADIAN PACIFIC RAILWAY HOTEL AT BANFF.

MOUNT STEPHEN, THE SUMMIT OF THE ROCKY MOUNTAINS, BRITISH COLUMBIA.

THE CANADIAN PACIFIC RAILWAY: SKETCHES BY OUR SPECIAL ARTIST, MR. MELTON PRIOR.

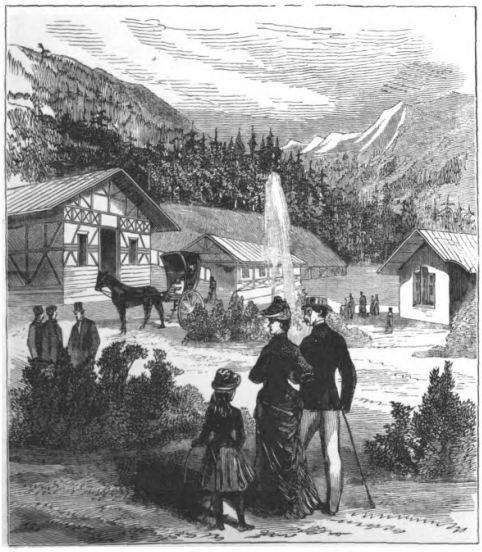
CANADIAN PACIFIC RAILWAY: BANFF AND BRITISH COLUMBIA.

Our series of Illustrations of the magnificent work completed under the auspices of the Dominion of Canada, by which a continuous line of railway traffic is established from the Atlantic to the Pacific ocean ports, was brought on last week to Banff, on the banks of the Bow River, close to the Rocky Mountains and to the frontier of the province of British Columbia, 2342 miles west of Montreal. Banff is situated in a district of romantic and picturesque mountain, river, and lake scenery, of great extent, reserved for the "Canadian National Park"; and it is the site of medicinal hot springs, charged with sulphur and iron and salts of great healing efficacy for many bodily ailments. These springs arise in the Sulphur Mountain, which is 4500 ft. in height; the flow of water is about 1,200,000 gallons a day, and its temperature at the source is 115 deg. Fahrenheit.



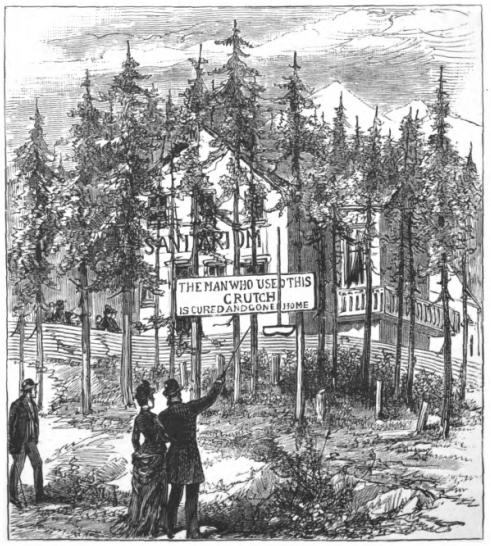
The Banff Sanitarium, under the charge of Dr. R. G. Brett, M.D., Medical Director, is a large building of three storeys, beautifully situated, which has comfortable rooms, attentive servants, well-furnished tables, and broad piazzas, with agreeable walks in the grounds, provision for cricket, lawn-tennis, and other games, and delightful rides and drives in the neighbourhood. Its site being 5400 ft. above the sea-level, the air is pure and bracing, while the mountains afford shelter from cold or rough winds, and there is almost an entire absence of clouds or mists.

The Canadian Pacific Railway Hotel at Banff contains more than two hundred rooms, with ice-cold mountain-spring water throughout the house and bath-houses supplied from the upper hot spring brought down 800 ft. in iron pipes. Several hundred feet below this spring are two others, within a hundred feet of each other. One is in a cave, or grotto, about 25 ft. in diameter, with a vaulted dome. It is entered by a tunnel a hundred feet long, and lighted by a natural opening at the apex, about two feet by three. In the grotto is a swimming-bath, surrounded by pretty stalactites, with water about 5 ft. deep boiling up from the sandy bottom; temperature, 95 deg. Cold water pours from one of the shell-shaped stalactites in sufficient quantity to make a cold shower. A hundred feet from this is another large pool, 20 ft. across, about the same size, and, being in the open air, the warm water can be seen boiling up through the sands. Both this and the cave springs have streams flowing from them as large as a first-class fire-engine could pump. The cave spring discharges at its outlet without colouring the soil along the rivulet; while the other makes a deposit as white as lime. This deposit is a magnesiate of lime, impregnated with iron and sulphur.



The mineral waters differ from each other, not only in the temperature of the waters, but also in their chemical composition. The temperature of the different springs varies from 85 deg. to 125 deg. Fahrenheit. They have proved of the most striking benefit to those suffering from various forms of rheumatic affections, scrofulous tumours and skin diseases, malarial poisoning of long standing, anæmia, and the troubles which have their seat in weakness of constitution or general debility. By allaying muscular and nervous irritability through their soothing influences on the peripheral nerves, sciatica and other neuralgias are greatly benefited. Owing to the saline qualities of some of the springs, certain complaints of the kidneys and liver, renal and biliary calculi, and catarrhal affections of various mucous membranes, are successfully treated.

The railway passes up the valley of the Bow River, from Banff, ascending the eastern slope of the Rocky Mountains range, and entering the province of British Columbia, which is part of the Dominion of Canada. Passing the Summit Station, just a mile above the level of the sea, with three small green lakes in rocky recesses, it proceeds through the Kicking Horse Pass; here the streams begin to flow westward to the Pacific Ocean. "Ten miles beyond the summit of the pass," says a descriptive writer, "we round the base of Mount Stephen, a stupendous mountain rising directly from the railway to a height of more than 8000 ft., holding on one of its shoulders, almost over our heads, a glacier whose shining green ice, 500 ft. thick, is slowly crawling over the edge of a sheer precipice of dizzy height, from which falling fragments of ice are dashed to atoms below. We look down from the railway, clinging to the mountain-side, upon the river valley, which here, suddenly widening, holds between the dark pine-clad mountains a mirror-like sheet of water, reflecting each peak and cliff with the most startling effect." Some distance beyond is the wide, forest-covered valley of the Columbia River, with the mountains of the Selkirk Range, to be illustrated in the next Sketches by our Special Artist.



British Columbia (including Vancouver, Queen Charlotte, and other islands along the coast) is that portion of Canada which looks out on the Pacific Ocean. It is the only British territory on the western or Pacific Ocean side of the North American continent. There is abundant proof of the existence of great mineral wealth in British Columbia. Gold, coal, silver, iron, copper, galena, mercury, platinum, antimony, bismuth, molybdenum, plumbago, mica, and other minerals have been discovered in different parts of the province; copper being very widely distributed. The rich valley of the Lower Fraser, or New Westminster district, is the largest compact agricultural district. It is on the mainland shore, opposite the south-eastern portion of Vancouver Island. The surface of the lower part of the valley is little above the sea-level. This is the only large tract of choice agricultural land, on the mainland of the North Pacific slope, that lies actually upon the ocean, with a shipping port in its midst. A navigable river cuts it through, which is sheltered at its mouth. The Canadian Pacific Railway, as already said, runs through the district. The river is full of salmon and other food-fish, and the district abounds with game. The delta lands and the clay loams can hardly be equalled for strength and richness, yielding great yields with comparatively careless cultivation. Much also of the interior is good farming land, and some highland districts afford very fine pasturage. The climate of British Columbia, in general, is much more temperate than the climate of any part of Canada lying east of the Rocky Mountains. Behring's Straits, between America and Asia, are so narrow and shallow that not much of the icy Arctic current flows along the British Columbia coast. The Rocky Mountains, in British Columbia, trending north-westerly, keep off the cold north winds. Other causes of the temperate climate are the existence of a warm ocean current in the Pacific Ocean, which flows towards the coast; the prevalent warm south-westerly winds from that ocean, which blow over the country; and also the north and south direction of the principal valleys, up which warm air from the south is drawn. The forests yield a vast supply of timber, and the fisheries are of great value. The population of British Columbia is now about eighty thousand; its capital is Victoria, in Vancouver Island.

SOURCE OF HOT SPRINGS AT BANFF.

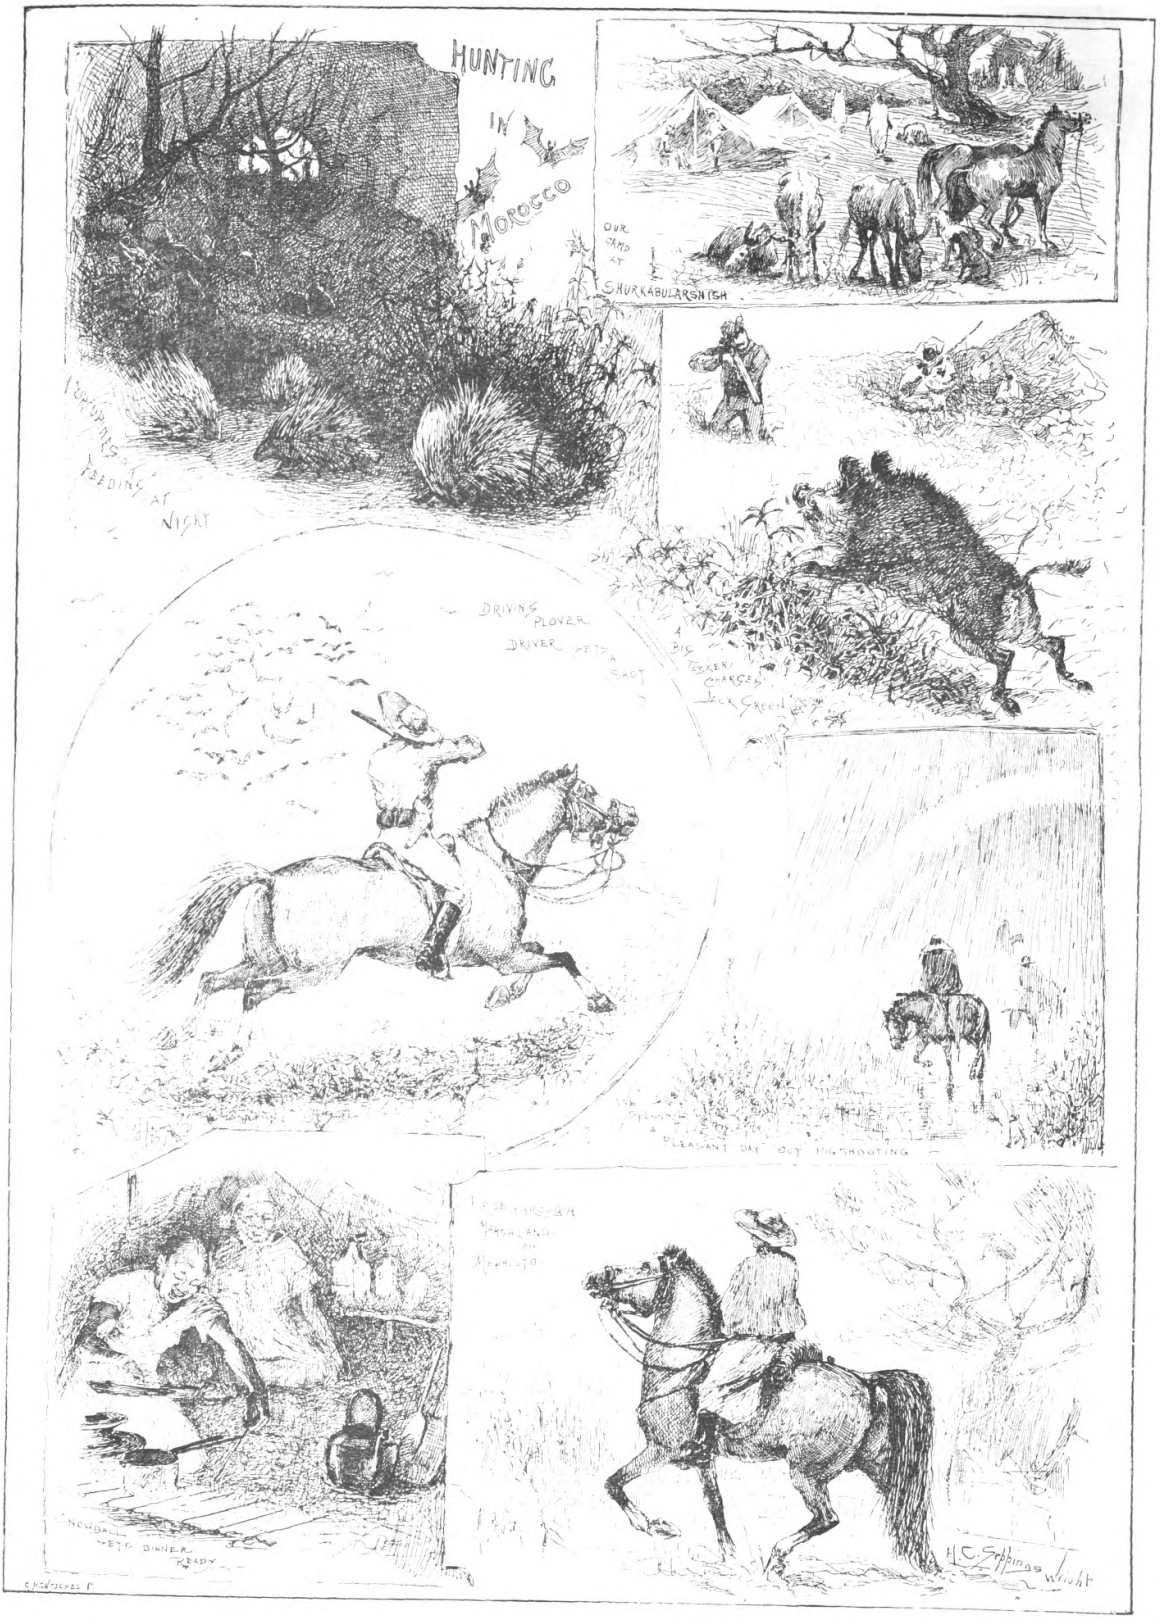
SKETCHES IN MOROCCO.

The military expedition performed this year by the Sultan of Morocco for the subjugation of the rebellious tribes in the mountain country of the interior has been repeatedly noticed. A French artist, M. Gabriel Nicolet, who accompanied the expedition some days, and who saw the reception of the Sultan at Mequinez after his return, and when he visited certain famous Mussulman shrines to give thanks for his success, has furnished several drawings illustrative of those remarkable scenes. The one now presented is that of a portion of the Sultan's army marching up the rocky pass of the Oued (Wady) Mlouïa, beneath the high mountain called the Djebel Tsougt, near which a fierce battle was fought with the warriors of the Aïtchoukmans tribe, and the troops of his Highness were in some peril of defeat.



In the provinces of Morocco nearer to the sea-coast, and usually accessible with entire safety to European visitors from Tangiers, the sports of wild-boar hunting, and of shooting quail, plover, and wild ducks, are enjoyed without interruption. We have received from an English artist and tourist, Mr. A. H. Berens, of London, the Sketches that appear on another page. He started from Tangiers, with three friends, on a hunting and shooting excursion. They encamped first at Shurfa Bulaishish, where the horses and mules were tethered, the tents were pitched, and the party made themselves comfortable, while their Arab servants duly engaged in evening prayer. Dinner was prepared by their skilful cook, a black man, and they dined and rested well. On the morrow they went to look for the wild boar. An enraged beast of that kind, when found and approached by the sportsmen, made a furious charge, but was effectually stopped by a shot from the Artist's rifle. On their return to the encampment, our friends were much inconvenienced by a tropical downpour of rain. Another day was employed in the pursuit of feathered game. Our correspondent rode a long way through the marsh-land, intent on making a good bag; he found plenty of duck and teal, but getting over such bad ground was a tedious experience. Plover were abundant on the plain; and he managed, by driving them up the wind, to bag several dozen of these birds. After the day's sport, and resting an hour or two in camp, he took a quiet nocturnal stroll, and got a sight of a family of porcupines feeding together, which he was careful not to alarm or disturb.

The Lord Mayor has become President of the Thames Church Mission.—The Lord Mayor and Lady Mayoress have consented to their names being added to the list of the general committee of the Irish Distressed Ladies' Fund, and contributions on behalf of the fund will be received at the Mansion House.

The fourth great terrier show (in conjunction with the Fox Terrier Club) has been held in St. Stephen's Hall, Westminster, adjacent to the Royal Aquarium, and there were upwards of 1000 entries, embracing terriers of all classes or denominations, the whole exhibition being arranged and conducted by Mr. Charles Cruft. The Grand Challenge Cup has been gained by Mr. A. H. Clarke, of Nottingham.

Mr. W. Crookes, F.R.S. has presented to the Department of Science and Art a collection of sixty-eight radiometers and similar instruments for permanent exhibition in the science galleries at the South Kensington Museum. They illustrate the steps by which Mr. Crookes was led to the construction of the radiometer, and to the production of motion and of phosphorescence by streams of electrified molecules in high vacua. Many of the instruments are of great historical interest.

Inanimate pigeon shooting when introduced into this country was rather pooh-poohed, then tolerated, and now bids fair to become quite a popular amusement. Messrs. Cogswell and Harrison, of New Bond-street and the Strand, London, have lately brought out a new trap, the "Swiftsure," which throws a composition pigeon or saucer in a variety of ways—in fact, it may be considered as the finest thing of the kind yet introduced. The "Swiftsure" was pitted against the American at the Royal Artillery Club, Woolwich, the hon. secretary reporting thus:—"The 'Swiftsure' was excellent and superior to the American; the former trap threw the pigeons much farther and better."

FOR FAITH AND FREEDOM.*

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIBEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER XXXIX.

was a numerous company gathered together on the deck of the ship. By their dress they were country lads; by their pale cheeks they were prison birds, like ourselves; by their dismal faces they were, also, like ourselves, rebels condemned to the Plantations. Alas! how many of these poor fellows have returned to their homes, and how many lie in the graves of Jamaica, Virginia, and Barbadoes? As for preparations for a voyage, not one of us could make any, either of clothes or of provisions. There was not among the whole company so much as a change of clothes; nay, there was not even a razor, and our faces were already bristling horribly with the beards which before long made us look like so many Heydues.

Among them I presently discerned, to my great surprise and joy, none other than Barnaby. His coat of scarlet was now so ragged and stained that neither colour nor original shape could be discerned, his ruffles and cravat of lace were gone, and the scarlet sash which had formerly carried his hanger was gone also. In a word, he was in rags and covered with the dust of the road. Yet his jolly countenance showed a satisfaction which contrasted greatly with the dejection of his companions. He sniffed the scent of tar and ropes with a joy which was visible to all, and he contemplated the ship and her rigging with the air of one who is at home.

Then he saw us and shouted to us while he made his way roughly through the rest.

"What cheer, ho! Humphrey, brave lad of boluses?" never did any man grasp the hand of friend with greater vigour. "This is better, I say, than the accursed prison, where one got never a breath of fresh air. Here one begins to smell salt water and tarred rope, which is a downright wholesome smell. Already I feel hearty again. I would willingly drink a tankard or two of black beer. What, Robin, what? We are not going to be hanged after all. Lift up thy head, therefore: is this a time for looking glum? We shall live to hang Judge Jeffreys yet!—what? Thy looks are but poorly, lad. Is it the prison or is it thy disappointment? That villain, Benjamin! Hark ye, Robin,"—some men's faces look black when they threaten but Barnaby's grew broader, as if the contemplation of revenge made him the happier—"Hark ye, this is my business. No one shall interfere with me in this. Benjamin is my affair. No one but I myself must kill Benjamin; not you, Humphrey, because he is your cousin; nor you, Robin, because you must not kill Alice's husband even to get back your own sweetheart." Barnaby spoke wisdom here: in spite of Robin's vows he could not get Alice for himself by killing her husband, unworthy though he was. "Benjamin," he went on, "may call her wife, but if he seek to make her his wife, if I know Sis aright, he will meet his match. As for her safety, I am certain that she is safe. For why? Wherever there are folks of her religious kidney, there will she find friends. Cheer up, Robin! Soon or late I will kill this fine husband of hers."

But Robin shook his head.

Barnaby then asked if I knew whither we were bound. I told him Barbadoes, according to the information given me by Mr. Penne.

"Why," said Barnaby rubbing his hands, "this is brave news, indeed. There is no place I would sooner choose. 'Tis a small island, to begin with: give me a small island, so that the sea runneth all round about and is everywhere within easy reach. Where there is the sea there are boats; where there are boats there are the means of escape. Cheer up, my lads! I know the Spanish Main right well. Give me a tight boat, I care not how small, and a keg of water, and I will sail her anywhere. Ha! we are bound to Barbadoes, are we? This is truly brave news!"

I asked him, next, what kind of place it was?

"It is a hot place," he replied. "A man is always thirsty, and there is plenty to drink except water, which is said to be scarce. But the merchants and the planters want none. They have wine of the best, of Spain and of France and of Madeira. Cider and strong ale they import from England. And drinks they make in the country—perino and mobbie—I remember—grippo and plantain wine and kill-devil. 'Tis a rare country for drink, and many there be who die of too much. Hold up thy head, Robin; we will drink damnation to Benjamin yet. But 'tis I who shall kill him. Courage, I say. What? Our turn will come!"

I told him, then, what had been done with Mr. George Penne—namely, the ransom bought by the Rector for us all, and the letter which I carried to Mr. Penne's correspondent.

"Why," he said, with some discontent, "we shall not be long upon the island after all, and perhaps the money might have been better bestowed. But 't was kindly done of the Rector. As for the banishment, I value it not one farthing. One place is as good as another; and, for my own part, I love the West Indies. We shall have our choice among them all, because, where there are boats and the open sea, a man can go whithersoever pleaseth him best. The voyage out"—he glanced round him—"will, I fear, be choking work—the rations will be short, there will be neither drink nor tobacco, and at nights we shall lie close. A more melancholy company I never saw. Patience, my lads; our turn will come."

Well, 't was a special mercy that we had with us one man, at least, who preserved his cheerfulness, for the rest of the company were as melancholy as King James himself could have desired. Indeed, to look back upon the voyage is to recall the most miserable time that can be imagined. First of all, as I have said, we were wholly unprepared for a voyage, having nothing at all with us. Then we had bad weather at the outset, which not only made our people ill, but caused the biscuit to be mostly spoiled, so that before the end of the voyage a few peas with the sweepings of the biscuit-room, and sometimes a little tough beef, was all our diet, and for drink nothing, not so much as a pannikin of beer, but water, and that turbid, and not too much of it.

As for me, I kept my health chiefly by the method common among physicians—namely, by watching the symptoms of others. But mostly was I concerned with the condition of Robin. For the poor lad, taking so much to heart the dreadful villainy which had been practised upon Alice, never once held up his head, and would talk and think of nothing else but of that poor maid.

"Where is she?" he asked a hundred times. "Where hath she found a shelter and a hiding-place? How shall she escape the villain who will now do what he pleases since we are out of his way? And no help for her—not any until she die, or until he dies! And we cannot even send her a letter to console her poor heart! Humphrey, it drives me mad to think that every day carries us further from her. If I could but be with her to protect her against her husband! Humphrey, Barnaby said well: I could not get her back to me over the dead body of her husband. But to protect her—to stand between her and the man she hath sworn to obey!"

There is no more dangerous condition of the mind than that which we call despair. It is, I take it, a disease, and that of the most dangerous kind. I have observed many men in that condition. With some, the devil enters into them, finding all the doors open and unguarded; nay, he even receives a warm welcome. With others it is as if the body itself was left without its armour—a cheerful and hopeful mind being certainly an armour against disease, capable of warding off many of those invisible arrows which are always flying about the air and striking us down with fevers, agues, calentures, and other pains and grievous diseases.

I marvel that more of the men on board were not sick; for, to begin with, the water soon became thick and swarmed with wriggling creatures difficult to avoid in drinking; and then, though during the day we were allowed to be on deck (where the air was fresh even if the sun was hot), at night we were terribly crowded below, and lay too close for health or for comfort. However, we finally made Carlisle Bay and the port of St. Michael's or the Bridge. And I must say this for Barnaby, that he maintained throughout the whole voyage his cheerfulness, and that he never ceased to make his plans for escape, drawing on a paper, which he procured, a rough chart of the Spanish Main, with as many islands as he could remember. Of these there are hundreds, some desolate and safe for fugitives, some with neither water nor green trees, and some with springs and woods, wild fruit, land turtles on the shore, fish in the sea, and everything that man can desire.

We made the land, after I know not how many weeks, one day in the forenoon.

"Barbadoes," said Barnaby, pointing to a little cloud far away on the horizon. "Well; of this job I am wellnigh sick. To-morrow, if the wind holds, we shall have sailed round the island, and shall beat up for Carlisle Bay. Well, it is lucky for us that we have this letter of Mr. Penne's. We will go—I know the place well—to the sign of the Rock and Turtle, kept by old Mother Rosemary, if she lives still, or, if she be dead, by one of her daughters—she had fifty daughters, at least, all buxom mulatto girls. There will we put off these filthy rags, have a wash in a tub of fresh water, get shaven, and then with smooth chins and clean shirts we will sit down to a dinner such as the old woman knows how to make, a potato-pudding and Scots collops with Rhenish wine, and afterwards a cool cup of beveridge, which is nothing in the world but squeezed limes, with sugar and water, fit for such a womanly stomach as yours, Doctor. With this, and a pipe of tobacco, and perhaps a song and (when your Worship hath gone to bed) a dance from one of the girls—I say, my lad, with this I shall be ready to forget Sedgemoor and to forgive Judge Jeffreys. When we are tired of Barbadoes, we will take boat and sail away. I know one island, at least, where they care nothing for King James. Thither will we go, my lad."

Well; we found us at our port, and how we fared, was not quite as Barnaby expected and hoped, as you shall hear. But I must admire the cunning of the man Penne, who not only took from Alice—poor child!—all her brother's money, amounting to two hundred and fifty pounds or thereabouts (which you have read), on the pretext of bestowing it for the advantage of all, but also received two hundred guineas from Mr. Boscorel on the same pretence. This made in all four hundred and fifty pounds. And not one penny—not a single penny—of this great sum did the man spend upon the purpose for which it was given him.

You have heard how the merchants and planters came aboard the ships which put in with servants and slaves, and how these are put for sale, one at a time. As was the sale described by Alice, just such was ours: though, I take it, our lads were not so miserable a company as were those on board her ship. Pale of cheek they looked, and dejected, and some were sick with various disorders, caused by the confinement of the prison or the sufferings of the voyage. They put us up one after the other, and we were sold. I forget what I myself fetched, and indeed it matters not, save that many jests were passed at our expense, and that when one was put up—as Robin, for instance—who had been a Captain in the rebel army, the salesman was eloquent in praise of his rich and illustrious family who would never endure that this unfortunate man should continue in servitude. But Barnaby put his tongue in his cheek and laughed.

When the sale was concluded, we were bundled into boats and taken ashore to the barracoon, of which you have heard from Alice. Here the same officer as read to her party the laws concerning servants and their duties, and the punishments which await transgressors, read them also to ourselves.

"Faith," Barnaby whispered, "there will be great scoring of backs before many days are done, unless their bark is worse than their bite."

This business dispatched, I thought it was time to present my letter. Therefore I stepped forward, and informed the officer who, by reason of his gown and wig and the beadles who were with him, I judged to be some lawyer, that, with my cousin and another, I held a letter which should hold us free from servitude.

"Ay, ay," he said. "Where is that letter?"

So I gave it to him. 'Twas addressed to one Jonathan Polwhele, and enjoined him to receive the three prisoners, named Humphrey Challis, Robin Challis, and Barnaby Eykin, to pay for them such sums as would reasonably be required to redeem them from servitude, and to advance them such moneys as they would want at the outset for maintenance, the whole to be accounted for in Mr. Jonathan Polwhele's next despatches to his obedient, much obliged servant, G. P.

"Sir," said the officer, when he had read the letter through, "this epistle is addressed to one Jonathan Polwhele. There is no merchant or planter of that name on the whole island."

He gave me back the letter. "If this," he said, "is all you have to show, there is no reason why you and your friends should not march with the rest."

Truly, we had nothing else to show. Not only was there no one named Polwhele on the island, but there never had been anyone of that name. Therefore it was plain that we had been tricked, and that the man George Penne was a villain. Alas! poor Barnaby! Where now were his cool cups and his pipe of tobacco? Then the officer beckoned to a gentleman—a sober and grave person—standing near, and spoke to him.

"Gentlemen," said the merchant, "permit me to read this letter. So, it is the handwriting of Mr. George Penne, which I know well. There is here some strange mistake. The letter is addressed to Mr. Jonathan Polwhele; but there is no one of that name in the place. I am myself Mr. Penne's correspondent in this island. My name, gentlemen, is Sefton, not Polwhele."

"Sir," I said, "do you know Mr. Penne?"

"I have never seen him. He consigns to my care, once or twice a year, a cargo of transported servants, being rogues and thieves sent here, instead of to the gallows. He ships them to my care, I say, as he hath shipped the company arrived this morning; and I sell them for him, taking for my share a percentage, as agreed upon, and remitting to him the balance in sugar and tobacco."

"Is there no letter from him?"

"There is a letter in which he advises me of so many rebels consigned to me, in order to be sold. Some among them, he says, were Captains and officers in Monmouth's army, and some are of good family, among whom he especially names Robin and Humphrey Challis. But there is not a word about ransom."

"Sir," I said, knowing nothing as yet of Alice and her money, "two hundred guineas have been paid to Mr. Penne by the Rev. Philip Boscorel, Rector of Bradford Orcas, in the county of Somerset, for our ransom."

"Nothing is said of this," he replied gravely. "Plainly, gentlemen, without despatches from Mr. Penne I cannot act for you. You have a letter. It is written by that gentleman; it is addressed to Mr. Polwhele; it says nothing about Barbadoes, and would serve for Jamaica or for Virginia. So great a sum as two hundred guineas cannot have been forgotten. I exhort you, therefore, to patience until other letters arrive. Why, two hundred guineas would have gone far to redeem you all three, and to maintain you for a great while. Gentlemen, I am grieved for you, because there is, for the present, no help for it, but that you must go with the planter who hath bought you, and obey his orders. I will, however, send to Mr. Penne an account of this charge, and I would advise that you lose no time in writing to your friends at home."

"Heart up, lad!" cried Barnaby, for I turned faint upon this terrible discovery and would have fallen but he held me up. "Patience! our turn will come."

"Write that letter," said the merchant again. "Write that letter quickly, so that it may go with the next vessel. Otherwise, the work is hard, and the heat is great." So he turned and left us.

"Courage, man!" said Barnaby. "To every dog his day. If now, for five minutes only I could have my thumb on Mr. Penne's windpipe and my fingers round his neck! And I thought to spend the evening joyfully at Mother Rosemary's! Courage, lad! I have seen already," he whispered, "a dozen boats in the bay, any one of which will serve our turn."

But Robin paid no heed, whatever happened. He stood up when his name was called, and was sold without showing any emotion. When we found that we had been tricked he seemed as if he neither heard nor regarded.

When all was ready we were marched, twenty in number, along a white and dusty road, to our estate. By great good fortune—rather by Providence—we were all bought by the same master. He was, it is true, a bad man; but to be bought all together was a happiness which we could not expect. He bought us all because he understood that we belonged to the same family (and that one of position), in the hope of receiving substantial ransom. This man rode with us, accompanied by two overseers (these were themselves under the same sentence) who cracked their whips continually, and cursed us if we lagged. Their bark was worse, we afterwards found, than their bite; it was only in the master's presence that they behaved thus brutishly, and in order to curry favour with him and to prevent being reduced again to the rank of those who served in the field. There was no doubt, from the very outset, that we were afflicted with a master whose like, I would hope, is not to be found upon the island of Barbadoes. Briefly, he was one whose appearance, voice, and manner, all alike proclaimed him openly to all the world as a drunkard, a profligate, and a blasphemer. A drunkard he was of that kind who are seldom wholly drunk and yet are never sober; who begin the day with a glass and go on taking more glasses all day long, with small ale for breakfast, strong ale and Madeira for dinner, a tankard in the afternoon, and for supper more strong ale and Madeira; and before bed another tankard. As for compassion, or tenderness, or any of the virtues which a man who holds other men in slavery ought to possess, he had none of them.

Let me speak of him with no more bitterness than is necessary. We have, I think, all forgiven him, and he hath long since gone to a place where he can do no more harm to any, but awaiteth judgment—perhaps, in the sure and certain hope of which the funeral service speaks—but this is open to doubt.

When we were arrived at the estate, the Master dismounted, gave his horse to a negro, and ordered us to be drawn up in line.

He then made a short speech. He said that he had bought us, rebels and villains as we were, and that he meant to get his money's worth out of us or he would cut us all to pieces: other things he told us, which I pass over because they were but repetitions of this assurance. He then proceeded to examine us in detail. When he came to me he cursed and swore because he said he had been made to pay for a sound, proper man, and had got a crookback for his bargain. I told him that, with submission, he might find the crookback, who was a physician, a more profitable bargain than many a stronger man.

"What?" he roared. "Thou art a physician, eh? Wouldst slink out of the field-work and sit idle among bottles and boluses? John"—he turned to one of the overseers—"pay particular attention, I command thee, to this learned physician. If he so much as turn round in his work make his shoulders smart."

"Ay, ay, Sir," said the overseer.

"And what art thou, Sirrah?" He turned next to Barnaby. "Another learned physician, no doubt—or a Divine, a Bishop likely, or a Dean at the least?"

"As for what I was," said Barnaby, "that is neither here nor there. For what I am? I suppose I am your servant for ten years, or until our pardons are sent us."

"Thou art an impudent dog, I dare swear," returned the master. "I remember, now. Thou wast a Captain in the rebel army, once a sailor. Well, take care, lest thou taste the cat."

"Gentlemen who are made to taste the cat," said Barnaby, "are apt to remember the taste of it when their time is up."

"What?" he cried. "You dare to threaten? Take that—and that!" and so began to belabour him about the head. I trembled lest Barnaby should return the blows. But he did not. He only held up his arm to protect his head, and presently, when the master desisted, he shook himself like a dog.

"I promise you I shall remember the taste of that wood," he said quietly.

The master looked as if he would renew the cudgelling, but thought better of it.

*All Rights Reserved.

DRAWN BY A. FORESTIER.

"Sixty pounds a-piece, Gentlemen, will purchase your freedom. Till then, the fields. And no difference between white and black; but one whip for both." We made no reply, but took the hoes which were given out to us.

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

Then, without more violence, we were assigned our quarters. A cottage or hut was given to us. We were served with a hammock and a rug each; a panikin, basin, spoon and platter for each; a Monmouth cap; two shirts, common and coarse; two pairs of canvas breeches, and a pair of shoes for each so that we looked for all the world like the fellows who live by loading and unloading the ships in the port of Bristol. Yet the change after the long voyage was grateful. They served us next with some of the stuff they call loblollie, and then the night fell and we lay down in our hammocks, which were certainly softer than the planks of the ship, and then fell fast asleep in spite of the humming and the biting of the merrywings, and so slept till the break of day.

CHAPTER XI.

WITH THE HOE.

Before it was daylight we were aroused by the discordant clang of a bell: work was about to begin.

In these latitudes there is little twilight; the day begins as it ends, with a kind of suddenness. I arose, being thus summoned, and looked out. Long rays of light were shooting up the sky from the east, and, though the stars were still visible, the day was fast breaking. In a few moments it became already so light that I could see across the yard—or what the Italians would call the piazza—with its ragged bonannow-leaves, the figures of our fellow slaves moving about the huts, and hear their voices. Alas! sad and melancholy are the voices of those who work upon his Majesty's Plantations. Two old negresses went about among the newcomers carrying a bucketfull of their yellow mess, which they distributed among us, and giving us to understand that this bowl of yellow porridge, or loblollie, made out of Indian corn, was all we should have before dinner. They also gave us to understand in their broken English, which is far worse than the jargon talked by some of our country people, that we should have to prepare our own meals for the future, and that they would show us how to make this delectable mess.

"Eat it," said Barnaby; "a pig is better fed at home. Eat it, Robin, lest thou faint in the sun. Perhaps there will be something better for dinner. Heigho! only to think of Mother Rosemary's, where I thought to lie last night! Patience, lads!"

One would not seem to dwell too long on the simple fare of convicts, therefore I will say, once for all, that our rations consisted of nothing at all but the Indian meal and of salt beef or salt fish. The old hands and the negro slaves know how to improve their fare in many ways, and humane masters will give their servants quantities of the fruits such as grow here in great abundance—as plantains, lemons, lymes, bonannows, guavas, and the like. And many of the black slaves have small gardens behind their huts, where they grow onions, yams, potatoes, and other things which they cultivate on Sundays. They are all great thieves also, stealing, whenever they can, poultry, eggs, and fruit, so that they grow fat and sleek, while the white servants daily grow more meagre, and fall into diseases by reason of the poorness of their food. Then, as to drink, there are many kinds of drink (apart from the wines of Spain, Portugal, Canary, Madeira, and France) made in the country itself, such as mobbie, which is a fermented liquor of potatoes; and perino, from the liquor of chewed cassavy root; punch, which is water and sugar left to work for ten days; rum, which is distilled in every Ingenio, and is a spirit as strong as brandy, and said to be more wholesome. Those who have been long in the island, even the servants, though without a penny, know how and where to get these drinks; and since there is no conseoler, to the common sort, so good as strong drink, those who are able to drink every day of these things become somewhat reconciled to their lot.

"Come out, ye dogs of rebels and traitors!" It was the loud and harsh voice of the master himself, who thus disturbed us at our breakfast. 'T was his custom thus to rise early, and to witness the beginning of the day's work. And 't was his kindly nature which impelled him thus to welcome and encourage his newly-bought slaves. "Come out, I say! Ye shall now show of what stuff ye are made. Instead of pulling down your lawful King, ye shall pull up your lawful master and make him rich. If ye never did a day's work in your lives, ye shall now learn the how by the must. Come forth, I say, ye lazy, guzzling skulkers!"

"Ay, ay," said Barnaby, leisurely scraping his bowl, "we are like, indeed, to be overfed here." He rolled sailor fashion out of the hut.

"Barnaby," I said, "for God's sake say nothing to anger the master! There is no help but in patience and in hope."

So we, too, went forth. The master, redfaced as he was, looked as if he had been drinking already.

"So," he cried, "here is the learned physician. Your health, Doctor. And here is the gallant Captain, who was once a sailor. The air of the fields, Captain, will remind you, perchance, of the quarter-deck. This young gentleman looks so gallant and gay that I warrant he will ply the hoe with a light and frolick heart. Your healths, gentlemen. Hark ye now. You are come of a good stock, I hear. Therefore have I bought you at a great price, looking to get my money back and more. Some planters would suffer you to lie at your ease cockered up with bonavist and Madeira till the money comes. As for me, I shall now show you what you will continue to do, unless the money comes. Therefore you will at once, I doubt not, ask for paper and pen and presently write. Sixty pounds a-piece, gentlemen—not one penny less—will purchase your freedom. Till then, the fields. And no difference between white and black; but one whip for both."

We made no reply, but took the hoes which were given out to us and marched with the rest of the melancholy troop.

There were as many blacks as whites. We were divided into gangs; with every gang a driver armed with a whip; and over all the overseers, who, by their severity, showed their zeal for the master. The condition of slavery hath in it something devilish, both for those who are slaves and those who are masters. The former it drives into despair, and fills with cunning, dishonesty, treachery, and revenge. Why, the black slaves have been known to rise in rebellion, and while they had the power have inflicted tortures unheard-of upon their masters. The latter it makes cruel and unfeeling; it tempts them continually to sins of all kinds: it puts into their power the lives, the bodies—nay, the very souls—of the poor folk whom they buy. I do maintain, and conceal not my opinion, that no man ought, in a Christian country, to be a slave except for a term of years, and then for punishment. I have been myself a slave, and I know the misery and the injustice of the condition. But it is idle to hope that the planters will abandon this means of cultivating their estates, and it is certain that in hot countries no man will work except by compulsion.

The whip carried by the driver is a dreadful instrument, long, thick, and strongly plaited, with a short handle. It is coiled and slung round the shoulders when it is not being used to terrify or to punish, and I know well that its loud crack produces upon the mind a sensation of fear and of horror such as the thunder of artillery or the sight of the enemy charging could never cause even to a coward. The fellows are also extremely dextrous in the use of it: they can inflict a punishment not worse than the flogging of a schoolboy; or, with no greater outward show of strength, they will cut and gash the flesh like a Russian executioner with the cruel instrument which they call the knout.

For slight offences, such as laziness or carelessness in the field, the former is administered; but for serious offences, the latter. One sad execution (I cannot call it less) I myself witnessed. What the poor wretch had done I know not, but I can never forget his piercing shrieks as the whip cut into the bleeding flesh. This is not punishment: it is savage and revengeful cruelty. Yet the master and the overseers looked on with callous eyes.

They marched us to a field about half a mile from our village or camp, and there, drawing us up in line, set us to work. Our task was with the hoe, to dig out square holes, each of the same depth and size, in which the sugar canes are planted, a small piece of old cane being laid in each. These holes are cut with regularity and exactness, in long lines and equally distant from each other. It is the driver's business to keep all at work at the same rate of progress, so that no one should lag behind, no one should stop to rest or breathe, no one should do less than his neighbours. The poor wretches with bent bodies streaming with their exertions, speedily become afflicted with a burning thirst: their legs tremble; their backs grow stiff and ache; their whole bodies become full of pain; and yet they may not rest nor stand upright to breathe a while, nor stop to drink, until the driver calls a halt. From time to time the negroes—men and women alike—were dragged out of the ranks and laid on the ground, three or four at a time, to receive lashes for not making the holes deep enough or fast enough. At home, one can daily see the poor creatures flogged in Bridewell; every day there are rogues tied to the cart-wheel and flogged wellnigh to death; but a ploughman is not flogged for the badness of his furrow, nor is a cobbler flogged because he maketh his shoon ill. And our men do not shrick and scream so wildly as the negroes, who are an ignorant people and have never learned the lord self-restraint. It was horrid also to see how their bodies were scarred with the marks of old floggings and branded with letters to show by whom they had been bought. As for our poor fellows, who had been brave recruits in Monmouth's army, they trembled at the sight and worked all the harder; yet some of them with the tears in their eyes, to think that they should be brought to such a dismal fate and to herd with these poor, ignorant, black people.

'T was the design of the master to set us to the very hardest work from the beginning, so that we should be the more anxious to get remission of our pains. For it must not be supposed that all the work on the estate was so hard and irksome as that with the hoe—which is generally kept for the strongest and hardest of the negroes, men and women. There are many other employments: some are put to weed the canes, some to fell wood, some to cleave it, some to attend the Ingenio, the boiling-house, the still-house, the curing-house; some to cut the maize, some to gather provisions, of bonavist, maize, yams, potatoes, cassavy, and the like. Some for the smith's forge; some to attend to the oxen and sheep; some to the camels and assinegoes, and the like: so that had the master pleased he might have set us to work better fitted to English gentlemen. Well, his greediness and cruelty were defeated, as you shall presently see. As for the domestic economy of the estate, there were on it 500 acres of land, of which 200 were planted with sugar, 80 for pasturage, 120 for wood, 30 for tobacco, 5 for ginger, and as many for cotton wool, and 70 for provisions—viz. corn, potatoes, plantains, cassavy, and bonavist—with a few for fruit. There were ninety-six negroes, two or three Indian women with their children, and twenty-eight Christian servants, of whom we were three.

At eleven o'clock we were marched back to dinner. At one we went out again, the sun being at this time of the day very fierce, though January is the coldest month in the year. We worked till six o'clock in the evening, when we returned.

"This," said Robin, with a groan, "is what we have now to do every day for ten years."

"Heart up, lads!" said Barnaby; "our time will come. Give me time to turn round, as a body may say. Why, the harbour is full of boats. Let me get to the port and look round a bit. If we had any money now—but that is past praying for. Courage and patience! Doctor, you hoe too fast: no one looks for zeal. Follow the example of the black fellows, who think all day long how they shall get off with as little work as possible. As for their lash, I doubt whether they dare to lay it about us, though they may talk. Because you see, even if we do not escape, we shall some time or other, through the Rector's efforts, get a pardon, and then we are gentlemen again; and when that moment arrives, I will make this master of ours fight, willy-nilly, and I will kill him, d'ye see, before I go home to kill Benjamin."

He then went on to discourse (chiefly with the hope of raising our spirits or because it cheered his mind just to set them forth) upon his plans for the means of escape.

"A boat," he said, "I can seize. There are many which would serve our purpose. But a boat without victuals would be of little use. One would not be accused of stealing, yet we may have to break into the store and take therefrom some beef or biscuit. But where to store our victuals? We may have a voyage of three or four hundred knots before us. That is nothing for a tight little boat when the hurricane season is over. We have no compass either—I must lay hands upon a compass. The first Saturday night I will make for the port and cast about. Lift up your head, Robin. Why, man, all bad times pass if only one hath patience."

It was this very working in the field by which the master thought to drive us into despair, which caused in the long run our deliverance, and that in the most unexpected manner.

(To be continued.)

Mr. Richard Arthur Bosanquet, youngest son of the late Mr. Samuel Richard Bosanquet, of Dingestow Court, Monmouth, and Ruth Rivers Thompson, eldest daughter of Sir A. Rivers Thompson, K.C.S.I., late Lieutenant-Governor of Bengal, were married on Nov. 15 at St. Jude's, South Kensington. Mr. W. F. Courthope accompanied the bridegroom as best man. The bride was given away by her father. There were seven bridesmaids—Misses Dora, Rachel, and Bertha Rivers Thompson, sisters of the bride; and Miss Bosanquet, Miss Lloyd, and Misses Ethel and Lilian Bosanquet, nieces of the bridegroom.

Science teaches us that salt meat has considerably less nutritive power than fresh meat. The same principle applies in a higher degree to liquid extracts of meat, or so-called beef-tea, or bonillons. According to analysis by Dr. Rudolf Sendtner, published by the Royal Analytical Institute of Munich, most of these liquid extracts contain only a very small proportion of real extract of meat, but an enormous quantity of salt; and Dr. Sendtner obtained as a result that the Liebig Company's extract of meat contains no added salt, and, consequently, that beef-tea made from this company's extract is of great nutritive value.

"HIS FIRST VISIT TO THE FLOCK."

The sweet little stranger, the most innocent of human lambs, whom the sheep are looking at with natural surprise, has been carried to the field by the shepherd's wife, bringing perhaps her husband's dinner. Laid on the grass and carefully wrapped up in shawls, guarded by the faithful dog who is the trusty and familiar friend of the flock, this tender babe will slumber in safety, and the fresh air will do him good. We are told, by the title of the picture, that it is "his first visit," and he is scarcely yet old enough to notice the difference between sheep and dog. Happy is the child whose infant experiences are those of pastoral life, not of street gutters, rattling wheels, a chimney-smoke sky, a din of coarse, brawling voices, and the sordid strife of town! This picture, by Mr. S. G. Carter, was much admired at the Institute of Painters in Oil Colours' last exhibition.

The official returns of the Queen's Edinburgh Rifle Brigade for the year which closed on Oct. 31, show that the corps has the large number of 2404 officers and men on the roll, of whom 2380 are efficients. The total of officers and sergeants earning the extra capitation grant is 212, and 32 officers have passed in tactics.

The three-days' military fête at the Royal Aquarium—the proceeds of which go towards the erection of a drill-hall for the 2nd London Rifle Volunteers—was brought to a conclusion on Saturday evening, Nov. 17, in the presence of a large audience. In the various competitions, such as boxing, fencing, tugs-of-war, both volunteers and regulars took part; and the concluding item in a long programme was a display of mimic warfare. This gave great satisfaction.

Miss Grace Hawthorne has kindly given permission for a ticket benefit at the Royal Princess's Theatre for all morning and evening performances from Monday, Nov. 19, to Friday, Nov. 30, on behalf of the Christ Church East London Half-penny Dinners. All tickets bought direct of Mrs. Priscilla Jay, Christ Church Vicarage, Watney-street, E., will benefit the charity. Last year over 40,000 dinners were provided for £131 12s. 5d., including all working expenses and a new cooker.

The Copley medal of the Royal Society has this year been awarded to Professor Huxley, in recognition of his investigations into the morphology and histology of vertebrate and invertebrate animals, and for his services to biological science in general during many past years; the Rumford medal is to be given to Professor Tacchini, renowned for his researches in solar physics; and the Davy medal to Mr. Crookes, for his researches on the electric discharge in high vacua.

Mr. Arnold Morley, M.P., presided over a large gathering at the Lambeth Baths on Nov. 17, when the twenty-seventh series of winter meetings was opened. He expressed his sympathy with a movement the object of which was the recreation and social amelioration of the people. He was glad to observe in South London a general desire to establish free libraries, polytechnic institutions, people's parks, and picture galleries. Mr. Causton, M.P., Mr. W. A. M'Arthur, Mr. J. H. Raper, and Mr. G. Howlett also addressed the meeting.

Ready December 3,

OUR CHRISTMAS NUMBER

CONSISTING OF A

COMPLETE STORY by D. CHRISTIE MURRAY,

Entitled "PAUL JONES'S ALIAS;"

Illustrated by A. FORESTIER.

"TWO CHRISTMAS EVES." By MASON JACKSON.

ILLUSTRATIONS by G. D. LESLIE, R.A., A. FORESTIER, STANLEY BERKELEY, LUCIEN DAVIS, E. HOPKINS, A. QUINTON, W. WEEKES, G. P. JACOMB-HOOD, LOUIS WAIN, and others.

THREE PRESENTATION PICTURES IN COLOURS,

Printed in the Finest Style of Chromo-Lithography:

A DAUGHTER OF EVE. By L. WALLER.
A HUNTING WE WILL GO. By C. T. GARLAND.
CHARMING KATE. By FLORENCE GRAVIER.

VERSES TO THE ILLUSTRATIONS. By JOHN LASH LATEY.

ONE SHILLING; Inland Parcel Post, Threepence.

THE CHILDREN'S ANNUAL,

FATHER CHRISTMAS,

CONSISTING OF A

CHILDREN'S STORY, entitled "The Golden Horseshoes."

By HORACE LENNARD. Illustrated by GEORGE CRUIKSHANK.

Superbly Printed on Superfine Paper.

WITH A PRESENTATION PICTURE,

Entitled "RED RIDING HOOD."

Painted by G. HILLYARD SWINSTEAD, and accepted for Exhibition by the Royal Academy.

ONE SHILLING; Inland Parcel Post, Threepence.

INGRAM BROTHERS, 198, STRAND, W.C., LONDON.

POSTAGE FOR FOREIGN PARTS THIS WEEK.

NOVEMBER 24, 1888.

Subscribers will please to notice that copies of this week's number forwarded abroad must be prepaid according to the following rates:—To Canada, United States of America, and the whole of Europe, THICK EDITION, *Twopence-halfpenny*; THIN EDITION, *One Penny*. To Australia, Brazil, Cape of Good Hope, China (viâ United States), Jamaica, Mauritius, and New Zealand, THICK EDITION, *Threepence*; THIN EDITION, *One Penny*. To China (viâ Brindisi), India, and Java, THICK EDITION, *Fourpence-halfpenny*; THIN EDITION, *Three-halfpence*.

Newspapers for foreign parts must be posted within eight days of the date of publication, irrespective of the *departure* of the mails.

SCIENCE JOTTINGS.

WINTER LIFE.

Now that the "sere and yellow" season is almost on the wane, life in the fields appears to be settling down into its winter moods and tenses. Bare fields and naked branches will soon be the normal state of things out-of-doors, and only the evergreens will remain to remind us of the rosy time of year. The puzzle of life includes among its many details the consideration of the manner in which plants which do not die down after a single season's life, contrive to husband their vital resources, and to survive through winter's cold until the next spring calls forth their energies anew. From a thought such as this, one's mind careers forth to make further inquiries about animals that seem to repose during the cold season in that state of life to which learned folk apply the term "hibernation." The cold season is the zero-time of vitality. When we think of the results which winter naturally brings to Life's children, we may gain some idea of the effects upon this "fine old world of ours" of glacial epochs and ice ages, which, after all, were but winters on a big, if somewhat erratic, scale. Seasonal variations, to use an apt term of science, mean much, or everything, to animals and plants. Cold and heat are Nature's chief conditions, under which all her children live and flourish, or, contrariwise, succumb and perish. Life in one phase may be extinguished by cold; the advent of winter is the death-warrant for many animals and plants. Others, again, have learned to tide over the cold and the snow. They have acquired a more determined vitality than their less robust and more transient neighbours, and they contrive to husband resources and to eke out subsistence until the warmer days bring them once again into their safe havens. The difference between living things which are annuals, to use the gardener's term, and those which are perennial, to my mind, merely expresses the result of some fortunate habit or other on the part of the temporary and persistent organisms respectively. Once upon a time, they contrived to tide over the cold season, in twos and threes, and by virtue of transmitted vigour, have come to number their days in years, in place of months.

What is true of plants holds good of animals also. A juvenile friend of mine, who, like most children, is a most pertinent questioner about Nature's ways and works, asked me lately, as a person likely to know, "Where do the flies go to in winter?" I am afraid my somewhat evasive reply disappointed my interrogator, and invested him with a certain amount of disrespect for the universality and completeness of scientific knowledge, which I trust he will amend and correct as the days pass over his head. In truth, he might as well have asked me "Where all the pins go to?" in so far as the possibility of an accurate reply is concerned. That flies must hibernate somewhere and somehow is evident. Knowing that *Omne vivum ex vivo*, as old Redi put it three hundred years ago, is a rule of Nature which seems to want even the proverbial exception, one must presume, logically, that the flies of each year transmit their likeness onwards to the next. You cannot, on the clear principle of *Ex nihilo nihil fit*, get a fresh crop of flies out of nothing. Therefore, either parent insects or preserved eggs (in a zoological sense) must see each winter and spring out and over, and must wake up into active life in the summer, when the social nuisances buzz about our ears, tickle our noses, scratch our furniture with their tongues, and drown themselves in the cream by way of adding insult to injury. I read the other day of some prying human being who, in the course of an investigation in his housetops, came upon crowds of lethargic flies clustered on the rafters of his domicile. Doubtless, these were the survivors of the fly-paper, spider, and towel-crusades of summer. There is more in such a discovery than meets the eye. Instinct, blind, it may be, but all the more unerring on that account, led these belated flies to hide themselves in a place where their winter slumbers were unlikely to be disturbed. Save when a cistern has to be cleaned out (a duty which, unfortunately, Paterfamilias is not given to regard at all as a necessity for health) humanity, unlike the cats, rarely ventures towards the tiles. The winter sleep of the flies is undisturbed. Comatose as a drugged man, the fly adheres to the rafters, and snores all through the cold. Life dies down, but is not extinguished. Then, when the warm weather arrives, fly-anatomy receives a physiological fillip. The heart begins to beat more quickly, and fly-nature awakes to the notion that "things are getting lively," as the boys say. Then hunger asserts its universal sway. Cautiously, one by one, we can imagine the half-frozen flies thawing themselves in the sunshine. We know how they do appear at first, by twos and threes, and how they gradually increase in numerical strength by leaps and starts. And so, in a week or two, the rafters will be deserted, and the beginnings of a fresh summer-population will make their advent from the crop of eggs that has been deposited and developed with all the industry inherent in the reviving colony.

Science may lead us, by aid of parallels, a little nearer still towards this problem of habit as influencing the successful tiding over of life's hard times and seasons. For one thing, we know of many instances and examples of living things surviving the extremes of heat and cold. There are germs you may boil for lengthened periods, but which revive and multiply when they cool down. There are plants which flourish in dreary Arctic wastes amid perpetual ice and snow. All we seem to require for recovery from untoward conditions, as the fashionable physician puts it to his gouty patient, is "Elasticity of constitution"; and it is not to be denied that some animals and plants fully illustrate this desirable constitutional quality. There is a group of animalcules, for example, known as the *Rotifera*, or "wheel-animalcules." They were first made known to science by old Leeuwenhoek, a Dutchman, who was among the first to take to grinding microscope-lenses. He found them in the débris of the gutters on his house-roof, and figured their "wheels," from which the animalcules derive their name. These "wheels" do not revolve, however, but are simply discs fringed with vibrating threads or cilia, and by their aid the animalcules swim freely in their native waters. Experiment has shown us that these wheel-bearers possess an "elasticity of constitution" to be admired and envied. You can dry them up from the microscope-slide on which they are careering in all their activity. You may keep them for weeks, months, or even years in this desiccated state, dried and parched as mummies: yet, upon the application of a little moisture, they resume all the functions of life with renewed vigour. Now, a wheel-animalcule is much more than a speck of protoplasm. It is a highly-organised animal, with nerves, digestive apparatus, and so forth, all complete. In what state or condition it exists as the dried atom, I know not. Science calls this state one of "dormant vitality"; but that, of course, is a mere name, and explains nothing. Yet the case of the "wheel-bearers" teaches us a lesson regarding life at large. Somehow or other they have succeeded in resisting heat and cold, dryness, and other conditions injurious to life at large. Their higher and lower neighbours, who live on through winters to succeeding springs and summers, have only imitated the "wheel-bearers" afar off, in that they resist the chill which sends countless numbers of their fellows to their graves.

ANDREW WILSON.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

W HERTZMAN (Aberdare).—Your problem is neat, but very elementary in idea. It is a position of a type as old as the hills.

MRS W J BAIRD.—Further examination of your problem leads us to think it scarcely does you justice. We should like that in three moves in exchange.

W PARSONS.—In both problems White's play is what we would call "brutal." Black has no resources le ding to other interesting mating positions, and White just carries out what he threatens.

DR LAW (Sheffield).—Thanks for problem, which shall receive due attention.

DR HOULSWORTH (Birmingham).—No; Black replies by 1. P to K 3rd.

LIEUTENANT-COLONEL LORAINE.—J. Wade, Tavistock-street, Covent-garden, W.C.

B W LA MOTHE (New York).—Many thanks for corrected diagram. The other was under grave suspicion, but we had not exhaustively examined it.

BLAIR H COCHRANE.—1. Q to R 8th.

E B SCHWANN.—Apply to D. Nutt, Strand, W.C.

J DE H LARPENT.—1. There is no customary remuneration. 2. It *is* not approved of. 3. The solution is quite unnecessary.

BERNARD REYNOLDS.—A casual inspection of your problem favourably impresses us, and it is marked for further examination with a view to publication.

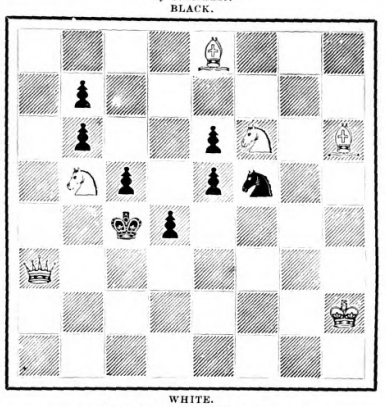
G J SLATER.—They are very acceptable, and shall have early publicity.

C E, DR D, AND OTHERS.—The chess matter goes to press so early that questions requiring a reply one week should reach the office not later than eight days before.

CORRECT SOLUTIONS OF PROBLEM No. 2324 received from W Von Beverhoudt and J W Shaw (Montreal); of No. 2325 from Charles Etherington, J G Hankin, R Elliott (Wellington), and Joseph T Pullen (Launceston); of No. 2326 from Lieutenant-Colonel Loraine (Newcastle-on-Tyne), J G Hankin, W H Reed (Liverpool), John G Grant, T G (Ware), W R Hamblin, Bernard Reynolds, W Von Beverhoudt, and Joseph T Pullen.

CORRECT SOLUTION OF PROBLEM No. 2327 received from E B Schwann, Jupiter Junior, E Casella (Paris), L Desanges, E Phillips, Howard A, J Ross (Whitley), T G (Ware), Chelwell, A Newman, Martin F, Dr Waltz (Heidelberg), John S Mouret (Boulogne-sur-Mer), James Saze, C S, Paketis, Shadforth, R Worters (Canterbury), Mrs Kelly, W E Cartwright, J Gastrin (Reims), Carsiake W Wood (Plymouth), J W Wasich, W R Hamblin, F C Cook (Kerley), E Louden, T Roberts, J Cood, D McCoy (Galway), Rev Winfield Cooper, W Von Beverhoudt, E Gardner (Corgarff), F G Tucker (Pontypool), J D Tucker (Leeds), E Field (Surbiton), H E K (Brighton), J Hartley Smith, F W Emson (Cardiff), Bernard Reynolds, C E P, Rev Leonard Matson (Bedford), D T (Bushey), Peterhouse, C F Pattison, R Elliott, John G Grant, W H Reed (Liverpool), J J B (Hallingbury), J Hall, W R Baillem, Julia Short, W J (Victoria), A W Hamilton Gell (Exeter), R F N Banks, Dane John, J Blackie, Dawn, G Harris, Lieut.-Col. Loraine, Percy Ewen, H S B (Bushey), R H Brooks, Columbus, J Thomas (Grimsby-on-Sands), J Hepworth Shaw, Thomas Chown, E S Sisbett, Joseph T Pullen, J G Hankin, Mary Cogens Hardy, Maurice E Fitzmaurice, A W Newitt, T H Wilson, Hereward, G J Veale, J Dixon (Colchester), E Lucas, Dr. Law (Sheffield), Blair H Cochrane, and Bontcher (Bourne End).

SOLUTION OF PROBLEM NO. 2325.



WHITE.	BLACK.
1. Q to B 6th	K to B 3rd
2. Kt to K 4th (ch)	K to K 4th
3. Q to Q 5th. Mate.	

If Black play 1. P takes Kt, then 2. Q to Q 8th (ch); if 1, Kt takes Q, then 2. Kt to B 7th (ch); if 1. K to Q 2nd, then 2. Q to Q 4th; and if 1. P to K 3rd, then 2. Q takes P (ch), &c.

PROBLEM NO. 2329.

By F. HEALEY.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS AT CLIFTON.

The following skirmish was played between MR. PRIDEAUX and MR. BOORNE.

(Vienna Game.)

WHITE (Mr. P.)	BLACK (Mr. B.)	WHITE (Mr. P.)	BLACK (Mr. B.)
1. P to K 4th	P to K 4th	12. Q to B 3rd	
2. Kt to Q B 3rd	Kt to Q B 3rd	White has now a good attack, and he maintains it to the end.	
3. P to B 4th	P takes P	12.	Q takes R (ch)
4. Kt to B 3rd	P to K Kt 4th	13. K to Q 2nd	Q takes R
5. P to Q 4th		14. R takes Q	Kt to Q B 3rd
B to Q B 4th is the usual move.		15. Kt to Kt 5th	Kt to K 3rd
5.	P to Kt 5th	16. B to Q B 4th	Castles
6. P to Q 5th	P takes Kt	17. Kt takes B (ch)	K to Q sq
7. B takes P	P takes P	18. Q to B 8th (ch)	K to B 2nd
8. B takes Kt P	Q Kt to K 2nd	19. Kt to Kt 5th (ch)	K to Kt 3rd
A bad square for the Kt, shutting both Q and B out of play.		20. Q to Q 6th	P to Q R 4th
9. P to Q 6th	P takes P	Black might still have made some fight by R to Q sq. If, then, Q takes K Kt, P to Q 4th, P takes P, B to K 3rd, &c.	
10. B takes Q P	Q to Kt 3rd	21. Q takes Kt	P to Q 3rd
Another useless move. Kt to Kt 3rd is the natural and correct play.		White mates in three moves.	
11. K R to B sq	Q takes Kt P		

CHESS IN HERTFORDSHIRE.

Game played at Ware, between MR. F. N. BRAUND and another AMATEUR.

(Muzio Gambit.)

WHITE (Mr. B.)	BLACK (Amateur.)	WHITE (Mr. B.)	BLACK (Amateur.)
1. P to K 4th	P to K 4th	22. P to K 5th	
2. P to K B 4th	P takes P	White's Pawns are more than a match for Black's piece.	
3. Kt to K B 3rd	P to K Kt 4th	22.	Kt to Q sq
4. B to B 4th	P to Kt 5th	23. R takes R	Kt takes R
5. Castles	P takes Kt	24. Kt to K 4th	Q Kt to K 3rd
6. Q takes P	Q to B 3rd	25. P to B 3rd	P to R 3rd
7. P to Q 3rd		26. K to B 2nd	Kt to Kt 4th
The Russian attack.		Very weak; White has it all his own way now.	
7.	P to Q 4th	27. Kt takes Kt	P takes Kt
8. B takes Q P	P to B 3rd	28. K to B 3rd	Kt to K 3rd
9. B to Kt 3rd	B to Q 3rd	29. K to Kt 4th	K to Q 2nd
B to K 3rd is the correct move.		30. P to R 4th	P takes P
10. Kt to B 3rd	B to K 3rd	31. P takes P	K to K 2nd
11. B takes P	B takes Q B	32. P to R 5th	P to Kt 3rd
12. Q takes B	Q takes Q	33. K to B 5th	Kt to Q sq
13. R takes Q	Kt to Q 2nd	34. P to B 4th	Kt to B 2nd
B takes B is preferable, followed by Kt to K 2nd, Castles, and Kt to Q 2nd.		35. P to Q 5th	P takes P
14. P to Q 4th	B takes B	36. P takes P	P to R 4th
15. B P takes B	P to Q R 3rd	37. P takes P	P takes P
16. Q R to K B sq	Castles	38. K to B 4th	Kt to R 3rd
Giving up a P to no purpose.		39. K to K 4th	Kt to B 2nd
17. R takes P	Kt to R 3rd	40. K to Q 4th	Kt to R 3rd
18. K R to B 4th	Q R to B sq	41. K to B 4th	Kt to Kt 5th
19. P to Q Kt 4th	R takes R	42. P to K 6th	K to Q 3rd
20. R takes R	R to B sq	43. K to Kt 5th,	and wins.
21. P to K Kt 3rd	Kt to B 2nd		

On Saturday, Nov. 17, Mr. Blackburne gave a blindfold performance at the British Chess Club, engaging simultaneously eight of its members. Mr. Blackburne was in good form, and succeeded in winning five games and drawing three.

An extensive show of foreign and British cage-birds has been held at the People's Palace in Mile End-road.

In reply to the request of Lord Knutsford, the Acting-Governor of Queensland, Sir Arthur H. Palmer, has telegraphed an explanation of the grounds of the objection entertained by the Colonial Government to the appointment of Sir H. A. Blake.

THE LADIES' COLUMN.

Very touching and yet dignified are the words with which the Empress Frederick prefaces the newly-published record of her husband's career, which has been prepared, at her request, by Mr. Rennell Rodd. At the moment of the landing on our shores, probably for a protracted stay, of that Royal daughter of the Queen who, thirty years ago, left England as a bride, there appears this touching record, in which, without one word of complaint for her lot, the widowed lady all unconsciously calls upon the sympathies of her own people:—"Those in humbler walks of life who are denied many of the blessings enjoyed by the rich, to whose lot fall the so-called good things of this world, are often apt to imagine that their burden is the hardest to bear, that struggles, and pains, and tears are only for them. These, perhaps, will think differently when they read. . . . They will be able to enter in some degree into the depths of regret and disappointment felt by a Ruler who loved his people at being unable to carry out the long-cherished plans for their welfare that he had so much at heart. . . . Grief and pain come alike to all; broken hearts are to be found in palaces as well as in cottages, and the bond of brotherhood seems strongest when love and pity unite all hearts." Alas! that in the mysterious arrangements of this world of trial it is precisely that "depth of regret and disappointment" which has befallen the noble writer of these touching words! The Empress refers to her husband, for whom all disappointment and sense of loss are over now. Must we not, in that bond of sisterhood which she claims, feel sorrow for the disappointment of her whose generous ideals and hopes have ever been apparent, and to whom the larger opportunities of the highest station in a realm are closed for ever? Because of her sex, Empress Victoria has doubly missed that power—her younger brother taking her place on one throne, her son on another; and a rare character and high moral and intellectual culture seem to be brought to naught. So in the palace as in the humbler home, opportunities evade a woman's hand; and, from Royal ladies downwards, many of us must feel with Madame De Staël when she uttered that mournful saying—"Of all the faculties born in me, the only one that has been exercised to the full is that of sorrow!"

The time is now here when women ratepayers will be called on to exercise their most important franchise in London and in various other large towns in which School Boards were elected immediately after the passing of the Education Act. The School Boards, whether from the point of view of the functions they discharge or the money they expend, are very important representative bodies, and every woman who has a vote should regard it as a duty to give some attention to returning suitable persons to be members of those Boards. Of course, where there is a lady candidate, the voters of her own sex will give special attention to her qualifications, and vote for her if they find no reason against doing so in her personality or opinions.

It is a curious circumstance that while the *Lady's Pictorial* can always be relied upon to consider justly the wider interests of the sex which it represents, another sixpenny "ladies' paper" appears to think that it commends itself to its readers by frequently assuring them of their stupidity, incompetence, and inconsiderable value. Last week an article in that journal declared that the exercise of the school suffrage by women in America proved that the female voters cared for nothing but theological disputes, and tried to destroy religious liberty. At home, however, we have had sufficient experience of women's voting for School Boards to know the falsity of such a suggestion; for though, when religious questions are uppermost, women as well as men naturally vote in accordance with their individual convictions, there has been no ground whatever for the supposition that the women voters have, as a class, used their power under clerical dictation. This week, that same journal declares that "a very considerable proportion of the women who have been elected on previous Boards have been wordy spouters"—a statement as untrue to fact as it is vulgar in phraseology. The Duke of Argyle mentioned the other day that the late Lord Lawrence told him that one of the good points of the ladies on the Board over which he presided was that "they did not talk as much as the men"; and, as a fact, it so happens that the irrepressible and incessant talkers of that Board have throughout been of what is supposed to be the more taciturn sex! A reference to the fairly full reports of the Board meetings which appear week by week in the *School Board Chronicle* would indubitably prove this fact to demonstration; but, of course, I speak from personal knowledge. A record was once kept of the speaking of perhaps the most verbose member of the Board at a committee, and it was found that he joined in the debates four times as often as all the four ladies present put together—a sixteen-woman power of speech! At the same time, nearly all the ladies who have been members have been capable of speaking very well, and, when occasion demanded, of producing great effect by their speeches, which, of course, is a very desirable power, inasmuch as members meet in the board and in the committees in order to discuss questions and so influence each other's votes.

Now is the time when nimble fingers may be set to work to make dainty little gifts for Christmas and New-Year's offerings. The dolls' dresses described in this column last week would afford hints to mammas and aunties for novelties for the little ones. The modern tendency to scatter decorative trifles about our rooms affords opportunity for gifts to housewives, while little nick-nacks for personal use can be made for gentlemen. For instance, either a cushion for the study easy-chair, a boot cupboard for the dressing-room, made of plain deal enamelled and then painted, a hanging case to hold the shaving materials, or an embroidered loose cover for a book would be a nice gift for a young lady to present as the work of her own hands to her husband or father.

A very comfortable cushion for a weary head to rest upon while the evening paper or an interesting book beguiles the busy brain from thoughts of the day's work, is shaped like a melon. It is made by cutting out half-a-dozen pieces of silk, satin, or cretonne into a long oval shape, and running them together with a piping of some contrasting colour or a flat piece of ribbon covering the join between each section; at the end the pieces narrow enough to all meet and join, beneath a large full "cabbage" bow of ribbon or cord matching the trimming. The stuffing can be feathers, "mill-puff" (bought at the upholsterer's), or paper torn up very small. Such head-cushions should not be too fully stuffed; it is a good plan to try them under your own head, and fill as much as is comfortable. (By-the-way, if the intended user pomades his hair, a loose pinafore-cover of artistic muslin that will wash is advisable.) The hanging case for shaving materials is a single shelf about a foot long, procured from the carpenter, and neatly covered in plush, with a strip of plush strengthened by American leather forming a back to nail on the wall. A loose plush pocket at either end hangs down from the shelf, one end taking brush and comb, the other a folding mirror; while the soap-dish and razor-case incidental to the interesting toilet operation in view stand on the shelf.

SKETCHES IN MOROCCO: MARCH OF THE SULTAN'S ARMY THROUGH THE PASS OF THE MLOUÏA.

"HIS FIRST VISIT TO THE FLOCK."

PICTURE BY S. J. CARTER, IN THE EXHIBITION OF THE INSTITUTE OF PAINTERS IN OIL-COLOURS.

RAMSGATE AND THE ISLE OF THANET AS A WINTER RESORT.

For the last two or three years I have been going to write this article; but I have put it off, from time to time, in order to be quite certain that I was not yielding to a sudden impulse, the result of which might be to mislead those whom I particularly hoped to benefit. I had long considered Ramsgate as one of the finest winter seaside resorts, for a certain class of persons, to be found within a measurable distance of London. It is not everyone who can afford to spend their time and money in wintering abroad; yet there are many "whom Providence has not blessed with affluence" (as an old form of advertisement used to put it), but for whose happiness—that is, for whose health (which is very nearly the same thing)—the purest air is essential; while for their business, which must be attended to "first," in order that they may take their pleasure "afterwards," proximity to, or residence in, London for the greater part of the week is absolutely necessary. For those who like to take London with them wherever they go, there is Brighton always handy; but neither Brighton air nor Brighton life agrees with everybody, though for a number of busy people the advantages it has to offer are considerable.

Residence at Brighton means a repetition of town life, more or less, only with better air to enable you to continue the round of gaiety and festivity. *Chacun à son goût*, and this, according to the schoolboy's translation with which we are all familiar, reminds me that even for a certain variety of gouty persons Ramsgate is an excellent place in the winter.

Some folk like to talk about "going out of England for the winter." These can be accommodated at Ramsgate, which, being in the Isle of Thanet, may be spoken of as not in England any more than are the Isle of Wight, the Isle of Man, or the Scilly Islands. And it has one great advantage over these islands, that you can get to it from London without any chance of an unpleasant sea-passage. The River Stour kindly makes Ramsgate an island, and the new Local Government Bill has given Thanet as much Home Rule as it wants for the present, though the people of Ramsgate are still a down-trodden and oppressed race, who only wait their opportunity to rebel against the tyranny of sleepy old Sandwich and throw off the yoke of the Sandwich-men for ever. Not a license can be granted, scarcely a wrong can be remedied, little, in fact, can be effected for the benefit of Ramsgate, without the express sanction of Sandwich! And what is Sandwich?—a dear old Anglo-Dutch place, quiet as an oyster in its bed, where two men in a street make a crowd, and where ancient mansions with ancient gardens and old fruit-trees can be obtained for that very equivocal price known as "an old song." Anyone who "cannot sing the old song" will not find himself welcomed as a purchaser at Sandwich. But it is a Cinque Port, it is a curiosity, its Townhall is remarkable for its genuine Elizabethan decorations, and among the many attractions which the Isle of Thanet has to offer to its visitors is the novelty of one of the best golf-grounds in England, which is to be found on the three or four miles' stretch of sandy flats between Sandwich and Deal. Already golf is bringing enthusiastic players from all quarters to wake up Sleepy Sandwich.

Real Ramsgate weather—which means a glorious morning with a west wind or a south-west, or even a mild east wind with a little north in it—from which shelter is easily attainable—or a south wind with a delicate touch of east, just to remind us that we are only mortal, commences in September, and, with an interval of uncertainty about February and March, lasts right up to the middle of May; and of all the months, October, November, December, January, and April, are the best.

Rain is not frequent at Ramsgate: this corner of Thanet escapes it, to a great extent. When it does rain, it makes up for former parsimony, and comes down handsomely. Directly the rain is over the promenades are dry, and, if still "spitting," you can put on any old waterproof and walk dry shod on East or West Cliff. The air is so pure that, in the rain, you will get your "whet" for your appetite before dinner. Now and again there is a very heavy fall of snow, when the aspect of the piers and harbour is most picturesque, and the air is crisp and bracing. In the town the snow-clearers are at work within an hour of the cessation of the snowfall, and the traffic in the streets is never inconveniently impeded. The drainage is most satisfactory, water is abundant, and its quality excellent.

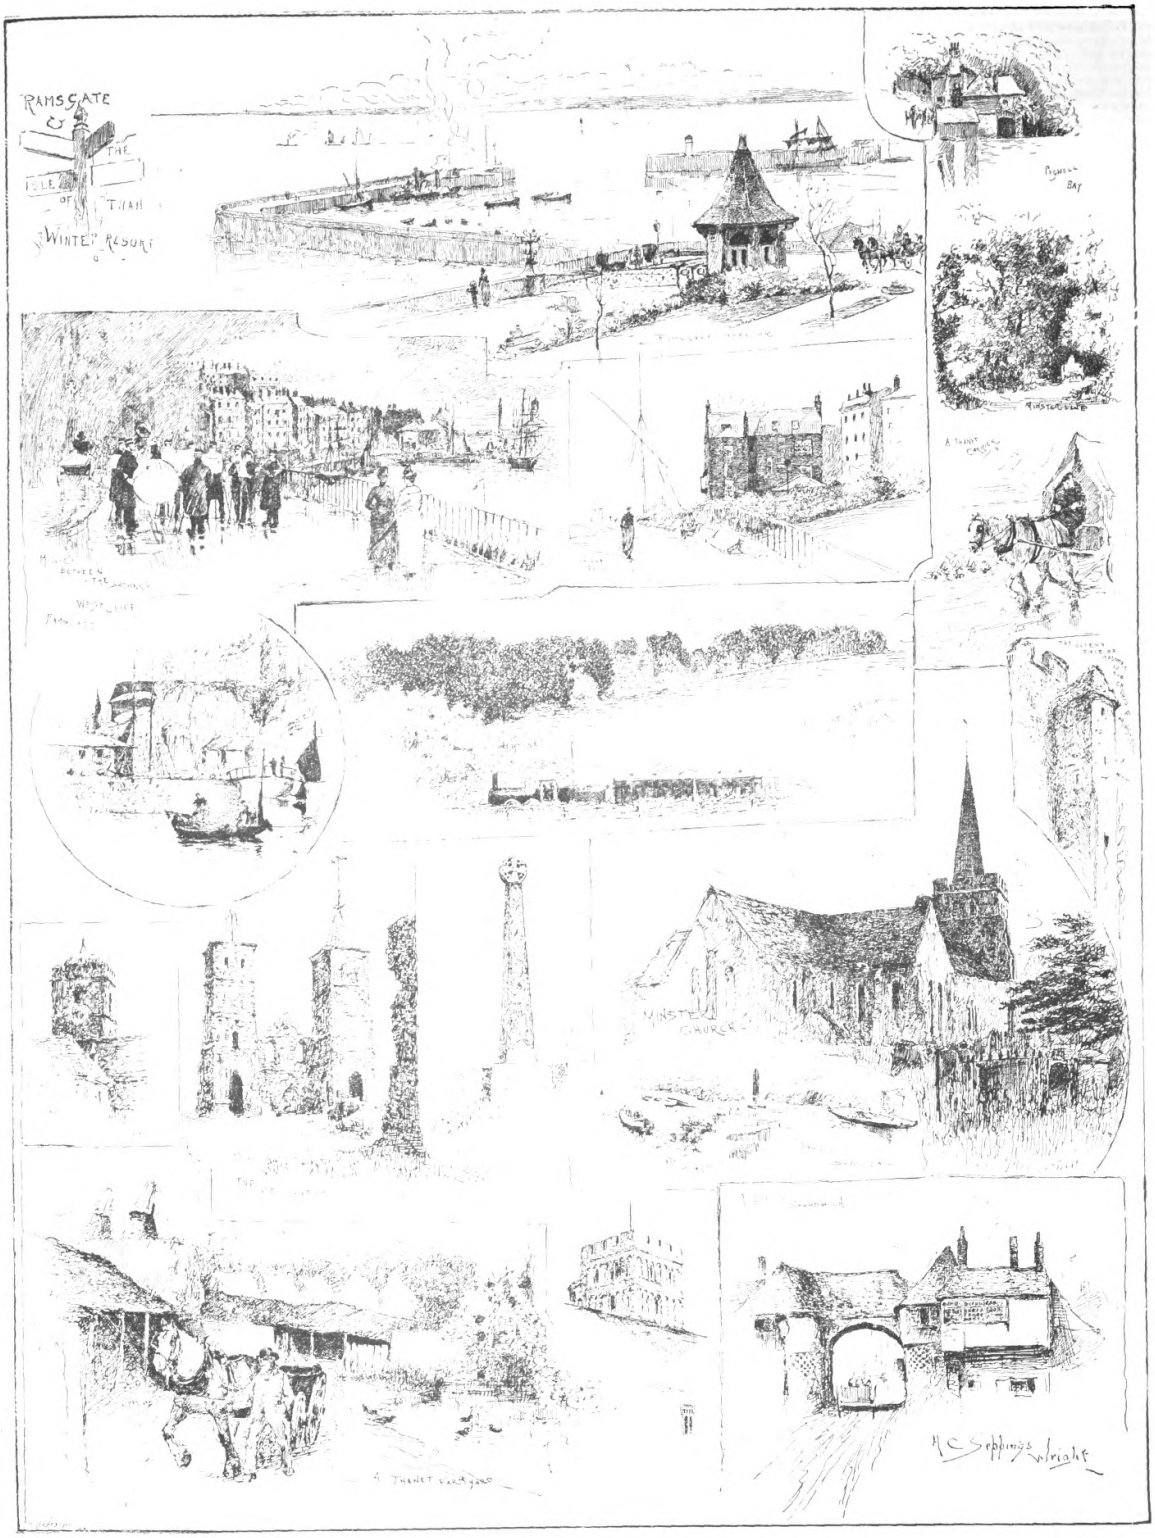
Every day in "typical Ramsgate weather" the residents might join in the opening chorus of "Masaniello":—"Behold! Behold! how brightly breaks the morning!" with perfect truth. So they can at Westgate, only they'll have to dance and clap their hands as well. On these mornings, the colour of the sea is as bright a blue as that of the Mediterranean, and the rippling waves glitter in the golden sunlight. I have frequently been disappointed with the colour of the Mediterranean; but, not expecting so much from the Channel, I have never been disappointed with the sea at Ramsgate. And then, what variety! What changes in the scene are effected by the cloud-shifters! For the invalid there are the promenades of the West and East Cliff, the Marina, the East and West Pier, and round about the harbour, always amusing, with its shipping in the outer and inner basin, the different yachts, the foreign fishing-boats, the picturesque costumes of sailors of many nationalities; on the quay there is the bustling life of a seaport town in miniature, and the view of Ramsgate from the end of either pier is of a quaint irregularly built town, which for the most part has preferred to remain old-fashioned and comfortable, and has very little to show on its sea-front, at all events, of the work of the cheap and vulgar villa builder. There are plenty of comfortable old-fashioned hostelries, which like to call themselves hotels, but are "inns;" and on the East Cliff is the now well-known Granville Hotel, "all of the modern type," with every luxury and comfort, its billiard-rooms, reading-rooms, lawn-tennis courts, and baths of every description. Excellent residences, too, with and without stabling, which, as Ramsgate, thank Heaven! is never likely to become fashionable, can be obtained for the winter months at very reasonable prices. It is a bit of a sporting place, is Ramsgate, and provides its due contingent to the Thanet Harriers, a well-hunted pack that gives the youthful sportsman plenty of amusement, and provides for the middle-aged heavy-weight a good excuse for pounding about over the fields, and getting a good two hours and a half gallop in the morning between early breakfast and lunch-time. And what a country to ride over, when, late in October and through November and December, so many of the fields are bare and, by the kind permission of the farmers, you can ride more or less straight for two or three miles, and this without blowing your horse up-hill or bringing him on his nose down-hill, and where there is no more formidable obstruction that an occasional sheep-hurdle, which you needn't take unless you like, as there is generally a longer and a safer route—you have to beware of "roots"—which skirts the hurdles and still keeps you within touch of the hounds. For health few things are better than a gallop with Ambrose Collard and the Thanet Harriers between eleven and two on a fine winter morning in typical Ramsgate weather.

The harriers offer the resident or the visitor a grand chance of seeing the island. Among their meets are Sea Mark, Sarre, and Birchington, which is next door to Westgate; yet, oddly enough, the name of Westgate is not on any sign-post that I've ever come across, and they are well off for sign-posts in the island. Why ignore Westgate? Is it that Westgate is just a bit too modern and fashionable for Thanet, and Thanet hasn't quite accustomed itself to the novelty? At all events, the name of Westgate is not written up on any indicating arm, but, instead, you will read "Garlinge," which is the name of the old village hidden away behind Westgate, of which the latter is only in reality a department; and the traveller unacquainted with the locality may despairingly relinquish his search for Westgate, under the impression that it may have disappeared into the sea. The harriers meet at Acol, Hengrove, Minster, Cliff's End and Manston, the two last-mentioned places being within easy walking distance of Ramsgate. Sometimes they go so far afield as what is called the Herne country, which is towards Herne Bay. Here, of course, the visitor may expect to meet Herne the Hunter, but I have never heard of his being out with the pack.

The pedestrian can have a good time, and the cyclist a famous turn of it, as there are few better roads for wheels than those which take you around by Sarre and Canterbury and back by Wingham and the picturesque little villages through which you can pass between Sarre and Ash, after crossing the River Stour at Grove Ferry, and, after Ash, to Sandwich, and so along the Sandwich flats back to Ramsgate. And all so interesting! Whether you are anxious to discover the exact spot where Julius Cæsar waded in the sea like an early shrimper, or where a Roman contingent put in at Whitstable and astonished the natives, or if you wish to dispute with the Pegwellians as to whether the handsome cross they have erected in a field belonging to Lord Granville actually marks the exact place where St. Augustine—having recovered from his voyage and safely landed with his missionary clergy from Rome—advanced to meet the heathen Saxon King and his Christian Queen; or if, as an archæologist, you are interested in Richborough Castle, in the old Roman camp, or in the old churches—and those of Ash and Minster are, I believe, among the oldest in England—or whether you be a geologist, or naturalist, you will find plenty to occupy your attention in the course of any walk in and about the Isle of Thanet. There is, perhaps, a dearth of trees in the island, but you enjoy them more when you do see them for this very reason; and yet at Quex, at Cleeve Court, at West Cliff (Mr. Warre's property), Manston, and notably at Minster, where the lanes are shady avenues under big trees, at Stone, at East Cliff (the late Sir Moses Montefiore's, now in the possession of Mr. Montefiore Sebag), at Cliff's End (now taken by Dr. Cottle, I believe, who has prescribed this for himself), and many other places, there is a large variety of very fine trees, and when out riding you will come on clumps of firs in most unlikely places; while for fruit and vegetables, both in quality and quantity, few places are better supplied than Ramsgate. Apropos of Pegwell, let no one boast of a knowledge of shrimps until he has had them fresh, and freshly potted, from Pegwell. Then, as to excursions, "the rover is free" to choose; and the union of the London, Chatham, and Dover and South-Eastern systems on the west affords plenty of opportunities for exploring Deal, Sandwich, and St. Margaret's Bay, en route to Dover. The line, after leaving St. Lawrence, runs through this *pays Hollandais* between Minster and Sandwich, quite a Dutch picture of meadow, plain, sea, wind-mills, with the onion-crowned tower of a Sandwich church in the distance. Then after Deal the scenery changes, gradually undulating and here and there wooded, finishing with a triumphal curve of the railway-line which skirts Dover and affords a picturesque view of the town, castle, and sea. From Dover to Shorncliffe the railway passes under Shakspeare's Cliff—here take breath, and get a little inspiration from the *genius loci*—and along by the sea for the greater part of the way, a delightful little run. From Shorncliffe to Hythe is about twenty minutes' drive, and Hythe well repays a visit. By one train in the day, *aller et retour*, you can go to Shorncliffe and back, from Ramsgate, without changing carriages, and this allows you four hours at Shorncliffe, which will include the above-mentioned visit to Hythe. "If I were not Alexander I would be Diogenes." If I were not at Ramsgate I should choose Hythe. Of course, even Ramsgate is not Paradise for everyone. Consult your physician—several of them, if you like—only, if you do so, out of a spirit of fairness, include Dr. Hicks, the *doyen*, I believe, of the Ramsgate doctors—the "Dean of the Faculty"—and don't forget the eminent practitioner whose sensible article in the *Fortnightly*, on "The wear and tear of London life," attracted considerable attention, and who, rather fancy, will have a few words to say in favour of Ramsgate, in certain cases, as a winter resort. Much may be said on behalf of Westgate, Birchington, and Margate, and generally of the Isle of Thanet, at various seasons. Mr. Norman Lockyer informs me that, away from "The Rockies," there is no such clear atmosphere at night as at Westgate, where he has built his observatory. He tells me also that during the most severe winter, the temperature at Westgate was always sixteen degrees above that of London. Westgate faces the north: therefore, as he himself put it to me, Ramsgate must be still warmer. Ramsgate suits some; Margate others; Westgate another set; and Broadstairs, betwixt and between, suits a lot of people in what is called "the season." Those who are unable to visit the seacoast of Thanet in the winter will do so in the summer, when Westgate is the aristocratic resort, being entirely free from cheap "trippers." If I were a moderately-endowed Cræsus, I would rather possess an estate at Ramsgate on the West Cliff, with wood, lawn, garden, and a beautiful view of the sea (the exact spot was picked out years ago by Welby Pugin, and is still vacant—O the lucky chance!) than be fixed to any other part of England; and, failing this, I would be somewhere in the island—say, in the neighbourhood of Quex, which sounds rather like Central Africa—thorough country, with plenty of fine old timber, open fields, winter galloping to your heart's content, and within an easy walk, or easier drive, of Westgate Station and of most of the principal places in the island.

How about sea-fogs? Well, our sea-fogs are better than any other sea-fogs, and at Ramsgate, I'll answer for it, there's no coal smoke in them. Sometimes the sea-fogs confine themselves to the sea and draw the line, very clearly defined, at the coast. At other times, sea-fog comes ashore. Then beware! Light the fires, close the windows, and prepare to receive sea-fog, *voilà l'ennemi!* Yet he is generally an early visitor, and will have come and gone before you are up even for an early breakfast; and the late breakfaster, at half-past nine or ten, will hardly know that the sea-fog has been there, unless he walks out on to the lawn. Be ready to meet sea-fog, respect your enemy, don't underrate him, and you will conquer.

As a rule, after an early morning sea-fog in October, which will occur when there has not been any rain for some time, the sun comes out, illumines the scene, the "gauzes" are cleared off, and, after the mysterious prologue, the beautiful day drama begins, and probably the second act, about midday, will be a scorcher. Venetian blinds down, windows open, sun-shades necessary, exercise delightful; the flies, suddenly revived, as buzzy as ever, insects humming and all alive O! until just on four o'clock, when, as the sun goes to bed, so you must take the hint and retire to your fireside, to read, write, study, and with a little after-dinner sociability, spend some of the pleasantest evenings of the whole year. Dense white mists in the island are rare, but twice within ten years I have lost my way in one, four miles away from Ramsgate.



Ramsgate does not offer you a town-life, but rest and refreshment. There is no fashionable parade; you can dress as you like and do as you like; it is a country life and a seaside life, and those who are fortunate enough to possess a house with a garden such as the unique Gothic "Grange," built and laid out by the celebrated Welby Pugin, to whose master hand is also due the adjacent Catholic Church of St. Augustine, a perfect model of pure Gothic, or West Cliff Lodge, the residence of Captain Hammond, are, to my mind, especially if their work as well as their pleasure keeps them at Ramsgate, of all mortals most enviable.

Birchington-on-Sea, to judge by its name, ought to be entirely devoted to schools; but it isn't, it is all Bungalows. Westgate is chiefly a summer resort—a charming place, a fashionable place, but in winter somewhat bleak, for it faces north, as also does Margate. But Ramsgate faces south, and there are parts fronting the sea, sheltered from the north, and partially from the east wind (I speak from personal experience), which, in certain cases, and uncertain ones, too, are, during the winter months, an excellent substitute for the Riviera or St. Moritz. And to some persons, to be sent to St. Moritz, or any other winter resort abroad, would be simply banishment, as "home-sickness" would neutralise the effect of the driest and purest air and most equable climate. I have no interest in cracking up Ramsgate; on the contrary, there is nothing to be gained by overcrowding, but I like to write in praise of a place which has done me and mine so much good; and then, I feel perfectly sure that, unless Ramsgate totally changes its character in every way, it never can become a merely fashionable seaside lounge.

It is seventy-five miles from town, so it can't be reached in an hour; but it can be reached in exactly two hours by the "Granville Express," on the London, Chatham, and Dover line, which has the advantage over the South-Eastern in running to Ramsgate as its terminus (the South Eastern only looking in and turning back again to go on to Margate,—poor taste, in my humble opinion) and also in having its station right on the sands, so that the jaded visitor from London can be refreshed immediately on his arrival with a full view of the sea, instead of being landed at the back of the town, unable to tell what the place is like until he has gone right through the main thoroughfare to get at what he longs for—"The sea, the sea, the open sea!" The business man whose family is residing here can get down in two hours on Saturday afternoon all the year round, and if he doesn't mind rising early on Monday morning—should stern necessity require his presence in London—he can leave at eight o'clock a.m. by the L. C. & D. line, and be in his office by half-past ten. If he can take from Saturday till Tuesday, or better, from Friday till Tuesday, he will have two days for riding or walking, and on every other Monday, from October to February, there is a meet of the Thanet Harriers, which will shake him up, and give him health and strength to bear the fog and fuss of London life. In the summer there is a capital Sunday morning train at half-past ten, which, after setting down at Herne Bay, Westgate, Margate, and Broadstairs, arrives at half-past twelve, and in the winter the eleven a.m. "boat express" from Victoria drops passengers for Ramsgate at Faversham, where there is a train in waiting that picks them up and lands them in Ramsgate at one sharp—sharp as one's appetite for lunch—and you've all the afternoon before you, which, in winter, means a good walk from two till four, and inhaling pure air all day and night too. The nights are usually lovely, and often comparatively warm. There are excellent schools, Church of England and Dissenting, Roman Catholic College for Boys and Convent School for Girls, which information will be of use to families contemplating residence and to those who want an excuse to run down and see their boys and girls at school; and from what I see of them all out walking, I should say the pupils are the very embodiment of health. I must add that there are first-rate boys' schools at Margate.

Of course, those in feeble health must be careful how they parcel out their day, for the duration of the sun-warmth in winter is limited to the time between eleven and three; and after three, unless in very exceptional weather, it is better to remain indoors. When patients go to a foreign watering-place they take with them an introduction to a doctor who knows the climate and who will prescribe certain treatment. London physicians are just beginning to find out Ramsgate as a winter resort. It is the old story of Naaman the Syrian. The waters of far, far away are to work miracles; but what is well within reach is a "well" to be let alone, and, being within reasonable means, it is despised. "If the Prophet had told thee to do some great thing"—— Yes, the old story. But when he says, "try Ramsgate; only be circumspect and take advice from those who know the place thoroughly," then the patient, who looks forward to the excitements of change of living, of language, and society, foresees only dullness at so old-fashioned a place as Ramsgate, with which, it may be, he is totally unacquainted, confounding it with the August season of cheap-trippers, donkey-boys, and the humours of Frith's picture "On the Sands," turns up his nose at the idea, and makes for the Riviera, where he catches a chill, or for St. Moritz, in reaching which place he takes cold on the road, and afterwards regrets most heartily that he did not for once and ever give up foreign cooking, excitement, and novelty for wholesome living, quiet, good air, exercise, and the golden rule of early to bed and fairly early (according to health and strength) to rise, and so get double the benefit for half the money, at this old-fashioned, homely wintering place called Ramsgate. By-the-way, there is a good club and plenty of "Society," especially County society, for residents or visitors who cannot live without that sort of thing. But for those who have had enough of "Society" in London and elsewhere, a good library like Fuller's, a club which provides all the papers and where there is a quiet game of whist or billiards every afternoon and evening, are distractions quite sufficient to make life pass pleasantly enough, even for those whose forced visits to London are angelic—i.e., few and far between. Think, too, how much reading may be done down here during the winter! How valuable is the daylight to an artist! As regards visits to London, to go there and back with six hours for business in town is easy enough; but what Ramsgate is not provided with is a train at half-past four, to land one in London at half-past six, in time for dressing and dinner. The absence of this may, from one point of view, be a blessing; but, as a great convenience, it would be a boon to those who have not absolutely forsworn London life. So much for bachelors and family men; the ladies will soon discover amusement. I have incidentally mentioned Ash as being well worth a visit. Before going there read J. R. Planché's "A Corner of Kent," which pretty well exhausts the subject. To those who, like myself, have to be up in London half the week for work, three days out of the seven at Ramsgate are simply the elixir vitæ. Eureka! "Is life worth living in the winter in England?" "Yes," I reply, "at Ramsgate."

RAMSGATE
THE
ISLE
OF
THANET
WINTER RESORT
H. C. Seppings Wright

A PALATIAL OFFICE.

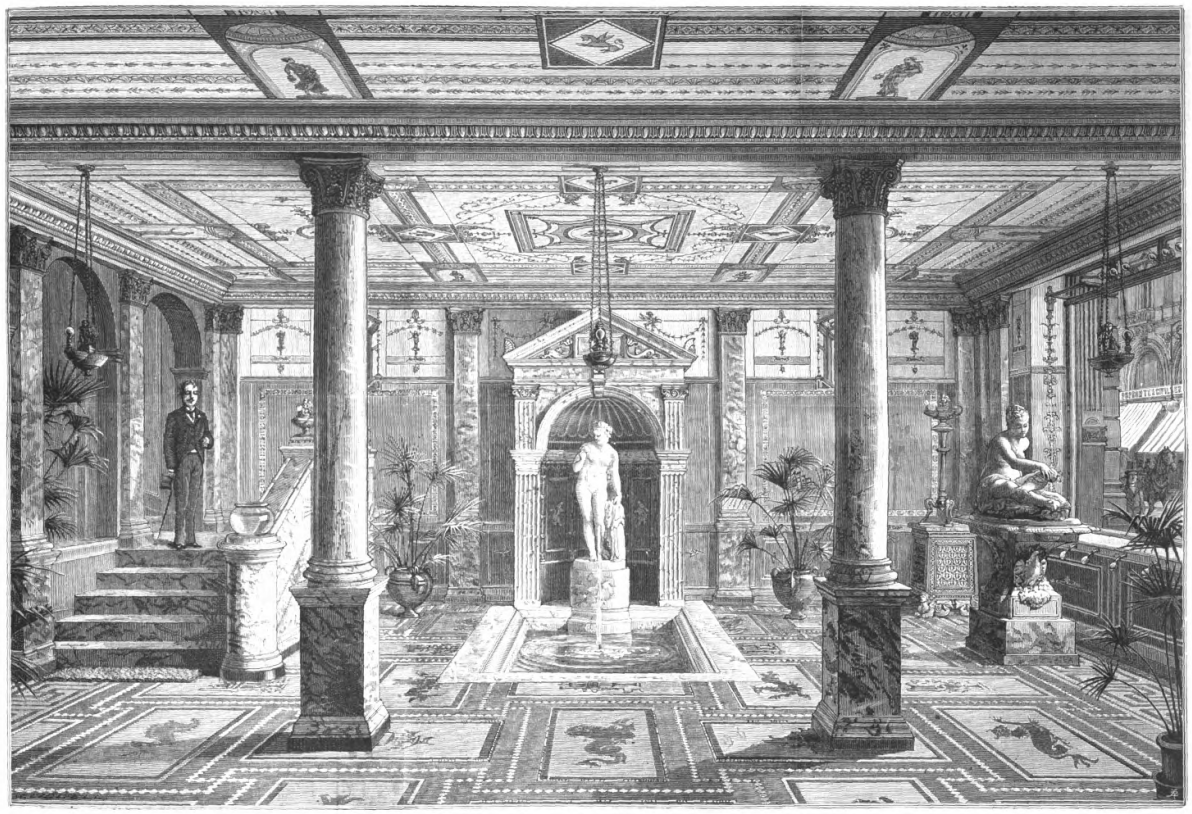
NEW BUILDINGS OF MESSRS. A. AND F. PEARS, IN NEW OXFORD-STREET.

Having passed through many phases of publicity, largely assisted by pictorial art, the limitless enterprise of Messrs. A. and F. Pears—which entered a perpetually extending renaissance when a fresh access of energy was directed, some years ago, to the enlargement of the Isleworth factory—has now reached the highest grade of artistic advertising in one of the grandest architectural works that signalised in London the Jubilee Year of Queen Victoria. In the completion of the sumptuous premises which now add a welcome adornment to New Oxford-street, the proprietors of Pears' soap may also be said to anticipate the centenary of their own useful and, in a commensurate degree, successful establishment, which dates, as we are reminded by an inscription on the facia of the new edifice, from 1789. The colossal proportions of this modern manufactural enterprise have been attained, no doubt, by a persistent course of advertising, in which art to be an adept a man requires genius; and that the tact shown in the conduct of this immense business, being as energetic as it is refined, is capable of taking infinite pains, and is therefore, according to the best definition of the word that ever was given, *genius* in its most practical manifestation, no one who has observed the system of publicity pursued in advertising Pears' soap will venture to deny. That excellence of some kind is primarily requisite in the thing to be successfully advertised, all experience has shown to be an incontrovertible proposition. Before any system of advertising was adopted, Pears' soap had, by pre-eminence of detergent and cosmetic qualities, gained an extensive notoriety for itself; and its earliest advertisements, properly so-called, were unsought and gratuitous. Physicians versed in the pathology of cutaneous disorders, among the first of these voluntary witnesses being Erasmus Wilson, tendered such evidence as would have almost sufficiently advertised as well as certified the medical virtues of Pears' soap for all time. This, indeed, would have ensured a wide celebrity among heads of families, officers of hospitals, and the whole medical profession. Moreover, it is now near upon half a century since one of the genial authors of the "Bon Gaultier Ballads" hit upon the humorous fancy of ascribing, in one of the prettiest and wittiest of those emanations of delicate fun, the softness of Helen's rounded arms of snow to Pears' transparent soap, a secret casket filled with the fragrant tablets being discovered by the searching eyes of Paris in the bower of the faithless fair, who accounts for her possession of the treasure by declaring it to have been a gift from Venus. Poetical liveliness and a sportive fancy having thus aided the advancement which the real merit of this dainty merchandise had so far made for itself, it remained for the art of the painter, encouraged by the acumen of the connoisseur, to do the rest, with such help as capital, enterprise, and mechanical skill can afford. And this, let the sneerers say, if they will, is advertising. Art is advertising, Messrs. Pears will doubtless allow; for it would be vain to deny that Signor Foccardi's comical piece of pictorial sculpture, "You Dirty Boy," one of the gems of the Paris Exhibition of 1878, is an advertisement. Truly it is one of an illustrious processional galaxy, wherein Sir John Millais' lovely child-picture, "Bubbles," holds a bright, conspicuous place. Acquired at a princely price, this last-named masterpiece has lately been reproduced by the agency of consummate skill in colour-printing, and the result splendidly justifies the lead taken by Messrs. Pears in artistic advertising, which many have followed, though none have succeeded in passing or even in catching them up. So, then, it may and will be said, that the palatial building in New Oxford-street is an advertisement—the most magnificent within the scope of legitimacy—but an advertisement nevertheless, in spirit and effect.

The new edifice has been raised under the superintendence and in accordance with the design of Mr. William B. Catherwood, 87, Gower-street, the architect to Messrs. A. and F. Pears, the builders being Messrs. Holland and Hannen, of Duke-street, Bloomsbury. The front presents a noble elevation of Italian character, in which the main structural materials strike the view with a pleasing effect of well-harmonised solidity. They are, in fact, Portland stone and small Dutch red bricks, beautifully laid in five courses to the foot. Each of the massive lower stone piers is based on grey Aberdeen granite. The tint is varied where Aberdeen granite is elsewhere employed. For instance, the pillars of the portico, a finely carried feature of the building, are pink, as are some of the supports and details in the superstructure. This blending of hues throughout aids the fulfilment of a manifestly dignified intention. So much for the exterior of the new building, which being at once an office, a warehouse, and a trophy, is equally utilitarian and ornamental, as being designed to please both the eye of business and the eye of taste, not disdaining even the policy of spectacular additions *ad captandum vulgus;* but so dainty, so refined, and so original, that the *vulgus* may feel flattered at being captured with so delicate a skill. We may now pass in at the portico, observing first that this handsome entrance is a walnut lobby with double doors folding back on either side, decorated with carved panels of bronze and ebony. In front of these doors, which when not put to their use of closing the portal, fold on the exquisitely neat brickwork—as close and fine as if it were of the Holbein period, and reminding one of the famous specimens at Hampton Court—are wrought-iron gates of dwarf height, as serving to guard the doors when thrown back for a clear passage. Above the low gates, and matching them in the praiseworthy workmanship which endows with artistic validity all the adornments of the building, is a wrought-iron grill or ornamental grating; and this method of filling an open space is used for each unglazed light, flanked by red granite pillars with grey bases on either side the portico. We have now entered a sumptuous atrium, that wants but a sprinkling of rose-leaves to suggest a picture of Roman magnificence worthy the eye and hand of an Alma Tadema. This hall or vestibule, Pompeian in general character, though of necessity modified to meet the practical requirements of its modern purpose, is the work of Mr. C. E. Birch, painter, of 19, Bloomsbury-street, who has successfully sought models of classic authority for all his bronzes, marbles, mosaics, and other accessories; and has, moreover, applied to the realisation of a subsidiary structure, effectively worked into his design, the prevalent form and features of a hemicycle which is in a suburb of Herculaneum, just outside the city, and in a street leading thereto. The street is known as the Street of Tombs. Messrs. Pears' idea of decorating the vestibule, which is a remarkable feature of these new premises, is the appropriate distribution of antique statuary, mingled with such modern works of sculpture as follow in expression the forms or mythic ideas of antiquity. That the hall should in a manner symbolise the happy union of soap and water was a contingency to be looked for as a thing of course. Hence it occurs that the salient object on which Mr. C. E. Birch has exercised great consideration and elaborate skill of inventive design is a sunken bath placed with reference to the Pompeian character of the atrium—that is to say, so little removed from the centre as to come within the site where the impluvium would be if, instead of being a covered chamber, the hall or vestibule were the interior court of a dwelling in the buried city, where Roman luxury invoked the arts of Greece and other lands. In such case, the sunken bath or tank, instead of being covered by a ceiling, would be open to catch the rain-water from the compluvium above, as illustrated in the Pompeian Court at the Crystal Palace. This sunken bath is so effectively floored with a lustrous aqua-tinted mosaic, by Messrs. Rust and Co., of 290, Wandsworth-road, in accordance with the design, and under the direction of Mr. Birch, that it communicates the desired tinge of pure, translucent blue to the water with which this ornamental bath or fountain is supplied, and in which, in true antique fashion, gold-fish disport themselves. Hollowed in the marble wall at the head of this bath is the hemicycle, a coved niche, likewise lined with mosaic, and occupied with a marble replica of Thorwaldssen's Venus, holding the apple awarded her by King Priam's shepherd-son. To a fanciful view, the small sphere poised in the tapering fingers of the goddess might be a ball of Pears' soap. Another type of Venus, the Medicean, stands opposite the hemicycle or rather on one side a door which immediately faces that exquisite restoration of ancient grandeur, and corresponds in form and character therewith, as likewise with three other doors, making, with the hemicycle, a symmetrical four-sided arrangement, east, west, north, and south.

The restoration of the hemicycle very faithfully and usefully illustrates, in the precision of its elegance, down to the minutest details, the changed conditions of the Greek architecture when subordinated to the luxurious requirements of Imperial Rome. Metal-work of a rich and elaborate character largely assists in the decoration of the vestibule, the ceiling and walls of which are adapted from the house of Lucretius and other houses. The bronzes chiefly noticeable are the standards supporting incandescent lights, the hanging boats likewise bearing *lucernæ* which, though copied from the ancient lamps fed with oil, are lit by electricity, in obedience to the exacting demands of a scientific civilisation. These and the bronze ornaments of the doors, as also the marble-topped open-work pedestals which, serving in addition, as warmers, form the bases of tripodal standards or candlesticks for electric lighting, are taken from objects that, having been dug up from sites of ancient buildings, are deposited in the public museums of London and Naples. They have been executed to the design of Mr. Birch, by Mr. W. Shrivell, of Castle-street, Endell-street, who has also furnished the wrought-iron balconies, window-grills, bronze fanlight grill, and column-caps, and bases in the front elevation. The pavement is partly of figured marble, and partly of mosaic, the patterns being those usually remarked in that class of mosaic work termed by the Romans "opus musivum," being composed of small cubes of coloured glass or enamel, the same as noticeable in the floor of the bath. This beautiful method of mosaic-paving was, anciently, distinguished by name from the "opus lithostrotum," or ordinary pavement of a Roman causeway.

From its surroundings and peculiar contour, the hemicycle runs some risk of being designated a temple, though this it certainly is not, but rather a sheltered seat, which, in its original situation, though here adapted as a niche for the accommodation of a statue, would have been an alcoved bench by the wayside, much frequented by lovers. Beyond the bath, which is a little towards the right as we enter, springs a staircase of the beautiful Fiore di Pesco marble, of which material, now very rare, the pedestals to the columns and pilasters of Grande Antique Cipollino, which are exceedingly handsome, are also made. The marble used for the carved face of the hemicycle, for the balustrading of the staircase, and for the



MESSRS. PEARS' BUSINESS OFFICES, NEW OXFORD-STREET.

doorways, three in number, is Italian onyx, which has an ivory-tinted ground, and pink veins deepening to purple. All the marble-work in the vestibule is carved to the drawings of Mr. Birch, by Mr. James Houghton, of Great Portland-street.

An inspection of the vestibule thus elaborately designed and fitted will be but preliminary to an examination of the entire building, adapted to the many requirements of a vast place of business. Having ascended the lower flight of marble steps, the visitor proceeds up the staircase leading to the first floor, on which are situate the counting-house and rooms adjoining. But, while yet below stairs, we shall have observed that a ware-room at the back of the vestibule is partitioned from it by a screen of glazed mahogany. The counting-house, or office, on the first-floor, of large capacity, resembles that of a bank or insurance office, and is arranged for the accommodation of forty-two clerks, besides the heads of departments, who have their desks in open compartments in the several angles of the room. The employment of typewriters, mechanically perfect, supersedes in great measure the use of "Gillott and Goosequill," manual calligraphy being reserved for signatures alone. A system of intercommunication is here organised which employs various modern resources. Each chief, that is to say, can draw the attention of another by touching one of the ivory buttons ranged beside him. Having thus placed himself in communication with whomsoever he desires to confer, he has but to select the proper speaking-tube from a row at his right hand. From the counting-house, and from the lobby by which it is approached, admission is found to the handsome suite of rooms occupied by a member of the firm, who by an elaboration of the same appliances as those provided to his office-staff, can, without quitting his chair, place himself in communication with any of their number. His sanctum sanctorum lies beyond a waiting-room, in which latter the visitor may have leisure to admire several original works of art, composing a gallery familiarised to the public by reproductions employed in mural advertising. Examples of these are arrayed in the advertising department, which lies beyond the counting-house at the rear. The several apartments in communication with the large office on the first floor, but of a more private character, have the aspect of rooms in a modern mansion, combining the most recent and most ingenious devices for the insurance of comfort and the economy of time, with the chaste elegance of decoration indicative of the pure domestic architecture introduced by the brothers Robert and James Adam, whose noble efforts helped so prominently in dragging the art of the eighteenth century out of the mire. Though these brothers—whose relationship gave significance to the name of their fine work, the terrace overlooking the Thames, called the Adelphi—preceded by more than half a century the revival which we see in its advanced development on the ground floor of Messrs. Pears' new building, that is to say in the marble entrance hall, it may be urged that both the styles which really met in the accommodation of Greek and Roman architecture were in the ornamental design of modern periods combined by the Flaxman and Wedgwood school with the classicism of the Brothers Adam. There is consequently no anomaly in the blending of domestic decoration, such as we find in the upper rooms at Messrs. Pears', with the severely learned antiquity exemplified with so splendid and accurate a reference to Roman pomp in the vestibule. On our way up to the first floor, opportunity will be found of observing that the Pompeian decoration of the vestibule is continued in the painting of the walls. Once reached, the office or counting-house affords much to admire in the perfection of its electrical and other appointments, which, as regards the communications between heads of departments, are the work of Mr. Julius Sax, 108, Great Russell-street, Bloomsbury. The arrangement of the upper floors affords convincing evidence that the personal comfort of everyone employed on the establishment has been carefully considered. The installation of the electric light upon the Thomson-Houston and incandescent systems throughout the premises is by Messrs. Laing, Wharton, and Down, of New Bond-street; and the hydrants throughout the building are by Messrs. Merryweather and Sons, Long-acre. These offices may well be designated one of the great sights of London as well as one of its adornments.

All have, in truth, brought their highest faculties of knowledge, tact, and skill to bear with united energy and unremitting patience on the design and completion of this truly palatial structure—a monument of commercial enterprise unrivalled in any part of the world. An architectural staff and an army corps of artificers have followed the commands of a competent general, whose triumph they are well entitled to share. The magnificent building we now see, in the place of a capacious but plain structure which was appropriated to the business of co-operative stores, is the sun or centre of a system apparently planned with a view to demonstrate the policy of advertising without stint or bound, in all cases where the merit of the thing to be advertised is transcendant of its kind. Of what use to the world, it may be asked, would be the greatest boons

MESSRS. PEARS' BUSINESS OFFICES, NEW OXFORD-STREET: THE ENTRANCE HALL.

ever extended to its universal, everyday services if to the world they should remain unknown? It has been said, and truly said, that the excellence of Pears' soap, its salubrity, its pure and beneficial cosmetic qualities were perceived by a discerning minority in the early days of its manufacture. Of this there can be no doubt; but if to the majority — to the world at large — the thing was comparatively unknown, all its acknowledged superiority, certified and emphasised by the few, availed it little. To the multiplicity of "men and cities" far exceeding the number of those known to Ulysses—to the capitals of friendly countries and of rising colonies in every quarter of the globe—the value of this often imitated but nevertheless inimitable product required to be made fully known. Had not this been done, had not the worth of Pears' soap been extensively and continually proclaimed, there might never have been justification for any such edifice as that which has arisen to beautify one of the leading thoroughfares in the Metropolis of the world. To Messrs. A. and F. Pears the credit of having elevated advertising to a high level of pictorial art has long been due. To this they will now have added the crowning honour of having raised it to a foremost rank of architecture.

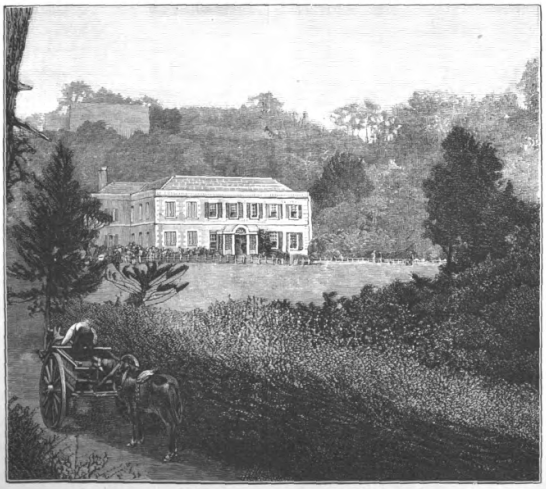
ART NOTES.

The Dudley Gallery Art Society, which holds its exhibitions at the Egyptian Hall, Piccadilly, does not make that rapid advance in favour amongst artists which one might have anticipated. Mr. Walter Severn is a capable President, and the Council includes a certain number of good men and true, who may be trusted to act fairly towards exhibitors. Under these circumstances, the wonder is that the average of the paintings exhibited is not higher. Mr. Carlile Macartney sends half-a-dozen landscapes and views, in which his sympathy with sea and sky is to be seen in such works as "The Sunset over the Sea" (127) and "The Incoming Tide" (106); whilst another artist of the same name, Mr. S. P. Macartney, contributes some clever, though rather cold, specimens of Swiss (80) and Cornish (123) scenery. Mr. A. Helcké has two fine bits of colouring, "A Midsummer Evening" (115) and "An Autumn Morning" (142). Mr. Audley Mackworth sends a bold, but somewhat crude, attempt to represent "Steel Forging" (131). Mr. Edgar Giberne shows greater versatility and scope than usual; his portrait of Mrs. Giberne (16) is very refined and delicate in tone, whilst his "Kelp Gatherers" (25) are broadly painted, and with a fine sense of colour. The animal painters at the Dudley are fairly well represented by Miss Moody's "Love's Young Dream and Love's Awaking" (71), the story of a kitten and puppy; and by Miss Dora Carpenter's "Dress Rehearsal" (46), in which an almost aristocratic Toby is being got ready for the performance of Punch, and seems to be fully cognisant of his fall in the world. Miss Carpenter's other picture, "Give Me a Penny, Please" (5), also shows a sympathy with dog-life as well as some skill in representing it on canvas.

At the Gainsborough Gallery (25, Old Bond-street) there is on view what the Berlin people may fitly describe as a "colossal" picture. It represents the late Emperor Frederick III. lying in state, surrounded by a group chosen from among the best known of those who were admitted to the sad ceremony. The interest of a picture of this description lies rather in its subject than its execution, the painter's art being limited to making the scene as little ghastly and the grouping as effective as possible. The dead Emperor, lying in his uncovered coffin, looks peaceful after his long struggle for life. By the side the widowed Empress kneels, dressed in deep mourning, and, immediately behind stands her son on whom the cares of the great Empire have fallen. Behind him are ranged Prince Bismarck, Count von Moltke, General von Blumenthal, and General von Pape, in their various uniforms; Moltke's face alone showing any sign of deep feeling. On the other side of the coffin are the Court Chaplains, reciting the prayers of the Church, but forming a by no means impressive group. The picture will doubtless attract a considerable number of persons, for whom such lugubrious sights have a sort of fascination; but the subject as treated seems to us to invade too much the sanctity of sorrow at such a moment. The artists who have co-operated in the work are Herren Hirsch, Aglita, Vieweg, and Schmidt. All of whom occupy a recognised position in contemporary German art.

Six numbers have now appeared of Mr. M. B. Huish's English edition of *Japanese Art* (Sampson Low, Marston, and Co.), and we are therefore in a better position to judge of the scope and aim of this publication. The promise of the earlier numbers has been well sustained; in fact, the October part contains, under the title of a "Travelling Writing Set," by M. Edmond de Goncourt, the story of the forty-seven Ronins, Japanese heroes who sacrificed their lives for their lord. But it is not so much for tales of Old Japan that we commend this publication to our readers as for the remarkable and liberal supply of plates illustrative of Japanese art in all its branches. We should be glad to think that "Japanese Art" was to be found in every Mechanics' Institute, public library, or reading-room where workmen meet together, for its effects upon our industrial arts might be most advantageous. We are not blind admirers of everything Japanese, simply because it comes from Japan, but because we recognise in Japanese art, combined with sense of proportion and a love of Nature, that quality of imagination and inventiveness which are too often absent from the products of English manufactures. In these illustrations the workers in metal and wood, the designers of textile and decorative goods, will find an inexhaustible store-house of suggestions and fancies which might with advantage be allowed to leaven our often too prosaic and solid work.

JAMESTOWN, ST. HELENA.



The island of St. Helena, in the South Atlantic Ocean, nearly sixteen degrees south of the Equator, and distant some 1200 miles from the African coast, has an historical renown from being the abode of Napoleon in his captivity until his death, in 1821. It was discovered by the Portuguese navigators in 1501, and was afterwards held by that nation and next by the Dutch; but has belonged to England since 1763. For a long time its administration was intrusted to the East India Company. The present Governor is Mr. W. Grey-Wilson, who has permitted us to publish a View of the Government House, from a photograph by Mr. Benjamin Grant. This fine mansion is usually called Plantation House, as in the East India Company's days the grounds were cultivated for the Company by a large gang of slaves. Chinese labourers were afterwards employed in the grounds and gardens, which contain a great variety of trees, plants, and shrubs belonging to the semi-tropical or to the temperate zone, with English flowers blooming in perfection. The situation is very healthy and pleasant, 1960 ft. above the sea-level, and commanding views, inland, of the main ridge of hills running east and west across the island, which is only ten miles long and five or six miles broad. Diana's Peak rises to the height of 2700 ft. The fertile valleys and wooded hills of the interior present more agreeable scenery than the wall of lofty cliffs surrounding the island. We give a View also of Jamestown, taken from an elevation of 600 ft. on the road leading to Napoleon's tomb; and the Cathedral Church, rebuilt in 1852, is shown behind the Governor's house. St. Helena has lately been appointed a coaling-station for steam-ships, instead of Ascension; and the construction of four new batteries of heavy guns, in addition to the defences of Jamestown, has been nearly completed.

JAMESTOWN, ST. HELENA.

NEW BOOKS.

The Unknown Horn of Africa: an Exploration from Berbera to the Leopard River. By F. L. James, M.A., F.R.G.S. (G. Philip and Son).—The map of Africa, which often comes before the mind's eye without the trouble of opening an Atlas, shows an eastward projection of triangular shape, between the Indian Ocean and the Gulf of Aden, outside the entrance to the Red Sea, below the 11th and 12th degree of latitude, and extending southward nearly to the equator. This region, which is called Somali Land, bordering westward on the country of the Gallas, beyond Abyssinia and Shoa, approaches farther down the sea-coast towards the lands of the various Wasuahili nations, heretofore connected with the dominion of Zanzibar, and recently comprised in the schemes of the British and German East African Companies. The Somali port of Berbera, just opposite Aden, has become a British dependency; but many European travellers have failed to get into the interior, or rather, we lament to say, have not been able to get out of it alive. The Italian expeditions of Sacconi and Porro, in 1883 and 1885, ended in the massacre of their leaders and followers, while Haggenmacher and others met with obstacles that prevented their adding much to our knowledge of the country. The author of this volume, and of another book, "The Wild Tribes of the Soudan," which we noticed on its publication, was one of a party of gentlemen, consisting of himself and his brother, Mr. W. D. James, Mr. D. Percy Aylmer, and Mr. E. Lort Phillips, who had previously travelled in the southern part of the Soudan beyond Kassala, and were joined this time by Mr. J. Godfrey Thrupp, a surgeon of South African experience. Mr. F. L. James was at Berbera in March, 1884, and then made inquiries with a view to his project of a journey inland almost due south, at least as far as the large river called the Webbe Shebeyli, or the Leopard River, the outlet of which is known to Zanzibar traders. In November of that year, the whole party having assembled at Aden, where they were received with much kindness by the Resident, General Blair, V.C., and by Mrs. Blair, they began to make arrangements for the expedition. In this design, at that time, they were encouraged by Major Hunter, C.B., the British Consul for the Somali coast, while Mr. Walsh, then newly-appointed British Agent at Berbera, expressed his hearty good wishes for their success, though he disapproved of their buying or hiring camels from certain local tribes. Mr. James and his companions, however, relying on the advice of an intelligent and trustworthy Somali headsman from Aden, named Dualla Idrees, who spoke English and had been with Stanley on the Congo, engaged from among those tribes, at Berbera, in December, a train of sixty camels, with a sufficient number of men, and five women to serve as cooks, tent-keepers, or "lady-helps." They were led by their chief, Mohammed Addah, with a lieutenant named Abdeelah. It is evident, throughout the narrative, that the intrigues of other Somali chiefs and tribes, not far from Berbera, who were jealous of the lucrative employment given to those preferred by Dualla and by Mr. James, caused all the annoyance and hostility which were encountered in this expedition. The actual position of the travellers, and the probability of their being attacked and slaughtered by the natives of the interior, were so falsely represented by those men at Berbera to the official agents of the British Government, that Lord Granville, on Dec. 30, telegraphed orders to stop Mr. James's party. But Mr. James's party were already on their way, far beyond the Berbera jurisdiction, and chose to go on at their own risk, having incurred much trouble and expense, and feeling sure that Major Hunter had either been deceived by some misrepresentations or had changed his mind without due cause. The expedition must be pronounced successful, as they were not greatly delayed anywhere; reaching the Webbe Shebeyli, near Barri, on Feb. 18, after a toilsome journey of fifty-nine days from Berbera, crossing the dreadful desert of the Haud, where the camels had no water for thirteen days. The Englishmen rode ponies or mules. But there seems to have been real danger of a sanguinary conflict with a large army of the Dollol and Ougass Elmi tribes at Gerloguby, in the Ogadayn country; and it was averted rather by the terror of fire-arms, with which those people were utterly unacquainted, than by the actual superiority of the Englishmen and their followers in defensive fighting-force. We can hardly believe that so small a party, with their rifles, carbines, shot-guns, and revolvers, which only a few of them had been trained to use effectively, would have long been able to hold a "zereeba" of mimosa fence against several thousand spearmen like the Zulus or the warriors of the Soudan. Mr. James and his comrades, while they met threatening demonstrations with unflinching courage, did nothing to provoke hostility even in Ogadayn; and in other parts of Somali Land, with Sultan Owd at Burao, on the river called the Tug Dayr, and with the Hawiyah Sultan at Barri, where the people on the banks of the Webbe Shebeyli appear to be of a settled and pacific disposition, their intercourse was friendly and agreeable. It is probable that the best way of approaching that district, in the heart and centre of Somali Land, would not be from the Berbera coast, but from Madisha or Magadoxo, carrying portable boats to ascend the great river. The climate there, indeed, is pestilential at some times of the year, after the floods; but there must be plenty of big game, which was scarce on the desert route, elephant, lion, hippopotamus, crocodile, and rhinoceros; and one would rather avoid running the gauntlet of the treacherous northern tribes. These travellers came back safely by a different route, through Harradiggit, arriving at Berbera on April 15, and all is well that ends well. The volume contains many beautiful illustrations, from drawings and photographs, and fine coloured plates representing birds, of which, and other matters of natural history, there is a scientific account.

GOVERNMENT HOUSE, ST. HELENA.

The Eulogy of Richard Jefferies. By Walter Besant (Chatto and Windus).—Among the most deservedly popular authors we have at the present day, one of the wholesomest, brightest, and most engaging of the band of living English novelists, Mr. Besant is further distinguished by his chivalrous loyalty to the literary profession, and his discernment of its true interests. In various personal efforts and discussions, rejecting the appeals to a vague sentiment of ideal claims on public indulgence which might become as disparaging to real merit as the ancient customs of private patronage, he has endeavoured to show the way towards conciliating the individual welfare of competent and diligent writers for the general book-market with the strictly commercial principles of the publishers' business. At the same time, he is not less zealous in his desire that literary talent, which is of different kinds, should be guided and trained and encouraged in the special direction, for each writer, most suitable to particular capacities and opportunities, so as better to serve the reading world, and so as to save the waste of time and labour that results in necessary disappointment. All whose duty it is, for the purpose of recording or noticing the vast multitude of new publications, to examine them in a spirit of honest criticism, will certainly agree in considering that many worthless books, especially of fiction, are the mistaken work of persons likely to be well able to produce good and useful books of some other kind. We could mention several of the worst novels, romances, narrative and dramatic poems, and attempts at fancy or humour, that have appeared in our times, written by men of high intellectual eminence, scholars and professors of great academical or philosophical accomplishments, statesmen, diplomatists, orators, lawyers, and military commanders, whose mental powers, applied to their own proper studies, raised them to positions of influence and just renown. And so it is among those who make writing their sole occupation. The mere faculty of correct and graceful expression is a very common acquirement, and the improvement of general education should hereafter bring it within the reach of everybody who will take pains to learn it. Style is mainly the natural outcome of clear and forcible and harmonious thought; but such thought, whether it be imaginative or logical, or confined to the historical or descriptive statement of facts, must be the fruit of well-digested information, accurate observation, or personal experience: and Mr. Besant constantly tells us, very truly, that this is the case with novelists and humourists—we would add, with poets—as it is with every writer of a scientific treatise or a work of history. In the volume now before us, which is a generous and sympathetic, a wise and truthful, account of the short life and unequal performances of a man of rare, almost unique genius, the late Richard Jefferies, the finest of English prose authors on the aspects of rural nature, Mr. Besant abundantly illustrates the above remark. Jefferies was one whose native talents of observation, meditation, and description, applied to all things he saw, animated, or vegetating, or mere physical effects, in the fields, the hills, and the woods, the air and clouds, or the sea, were never surpassed by any writer—not by Wordsworth, not by Ruskin, not by the American. Thoreau—and were unapproached by the German Jean Paul, or by Rousseau, in their eloquent panegyrics of Nature. He attempted to compose novels. If those crude and feeble tales, which his sincere admirers have perused with regret, had ever contained the slightest evidence of dramatic power to make the imaginary persons feel, speak, and act like real human beings, or any mastery over plot and incidents, or any movements of life-like tempers and humours in mutual action, or acquaintance with the habits of society, Mr. Besant would gladly claim Jefferies as a brother novelist, and would render ample justice to faculties so like his own. But it is no such thing; and we must confess the utter failure of Jefferies' attempts in that line; of the forgotten "Scarlet Shawl," "Restless Human Hearts," and "World's End," with the weakness of the narrative parts of several of his later works—after extracting the descriptions of nature from "Bevis," "Wood Magic," "After London," and "Amaryllis at the Fair." When some judicious editor shall have extracted all these wonderful and truthful passages, rejecting all the inadequate efforts of fiction, a volume will be compiled worthy to accompany those better writings of Jefferies which we already possess. These are destined, we believe, to a literary immortality, so long as readers of our language care for the scenes most characteristic of the South of England, for the meadows, hedge-rows, and copses, the downs, the pieces of old forests, the streams and pools, the pastures and cornfields, the farm-houses and cottages, the village churches, and for every plant, tree, or weed, or blade of grass, every wild animal, bird, or insect that inhabits our native land. They who have emigrated to America or Australia do care for these English country sights; and their children will care for them, if Londoners and other townsfolk in Great Britain should become indifferent to them. We, therefore, doubt not that "The Gamekeeper at Home," "The Amateur Poacher," "Wild Life in a Southern County," "Round about a Great Estate," "Nature near London," "Life of the Fields," and "The Open Air," will delight many readers of future generations, as well in the United States and in the British Colonies as here, along with "White's Selborne," which lacks the vein of idyllic poetry and the profoundly meditative sentiment of Jefferies. The biographical portion of Mr. Besant's volume might be condensed into a short paragraph, but is sufficiently detailed, and is inspired by the kindest feelings of personal regard for one whom he never met, but whose writings he had long admired. Richard Jefferies, born in November, 1848, the son of a farmer at Coate, near Swindon, was a local newspaper reporter, with fair literary ambition, whose early publications, as we have seen, were not of the kind in which he was qualified to attain success. In 1877, he removed to near London, and began to write, in the *Pall Mall Gazette*, the *Standard*, and the *St. James's Gazette*, his incomparable descriptions of rural scenes, and produced volumes which were published till 1880 by Messrs. Smith and Elder, but latterly by Messrs. Cassell, Sampson Low, Chatto and Windus, Longman, and other firms. He also wrote in Longman's and other magazines; he wrote "The Pageant of Summer;" and Mr. Besant, giving a large portion of that noble prose-poem, rightly declares, "I know nothing in the English language finer, whether for the sustained style, or for the elevation of thought which fills it." The author lived in his last years at several places in Surrey and Sussex, being never much of a traveller, and worked industriously to support a wife and two children; but was, during five years or more, tormented and exhausted by a painful disease, which finally, in August, 1887, put an end to his life. In a village churchyard near Worthing, "in the gentlest, sweet, soft, sunny rain, he was borne along the path to his grave in the grass." We feel sure that his works, or the better part of them, will long survive his career of severe toil and struggle, which Mr. Besant has related in a manner to be highly approved and to be received with sympathy by the lovers of Nature, and of Literature as the interpreter of Nature.

The Duke of Richmond and Gordon has resolved to grant from the rents for 1888 the same abatements to his tenants generally as were given from the rents of last year—namely, 25 per cent in the Huntly and Glenlivet districts, and 20 per cent in the Fochabers district.

BENSON'S BOND-STREET NOVELTIES.

J.W.Benson (Queen's Jeweller By Royal Warrant)

25, OLD BOND-STREET, W.

"Daintiest of possible presents."—World. TO BE OBTAINED ONLY OF J. W. BENSON.

Pearls and Brilliants, £12.

Brilliants, £10.

Diamond Entwined Hearts, £6.

Diamond and Whole Pearls, £4.

Hand-painted Ivory Miniature, Entourage of Diamonds, £15. Scarf Pins, from £8 8s.

MAPLE & CO

TOTTENHAM-COURT-ROAD, LONDON, W.

THE LARGEST AND MOST CONVENIENT

FURNISHING ESTABLISHMENT IN THE WORLD.

MAPLE and CO., Manufacturers of DINING-ROOM FURNITURE. The largest assortment to choose from, as well as the best possible value. Three more houses have just been added to this important department. Half a century's reputation.

MAPLE and CO.'S NEW SPECIMEN DINING-ROOMS, decorated and fully appointed with furniture in pollard oak, brown oak, Chippendale mahogany, antique carved oak, American walnut, and other woods, are now open to the public, and should be seen by all intending purchasers.

THESE ROOMS are not only helpful as showing the effect of the furniture when arranged in an apartment, but also most suggestive as regards decorative treatment, as well as a guide to the entire cost of furnishing in any selected style.

THE SEVILLE LADY'S EASY CHAIR,
In Saddlebags of rich Persian design and colourings, mounted on velvet, £3 15s.

DINING-ROOM FURNITURE.

MAPLE and CO. devote special attention to the production of high-class DINING-ROOM FURNITURE that will afford permanent satisfaction in wear. The numerous recommendations with which Messrs. Maple and Co. have been favoured by customers who have used the furniture for years is a pleasing testimony to the excellence of the articles.

MAPLE and CO.—DINING-ROOM SUITES.—The LICHFIELD SUITE, in solid oak, walnut, or mahogany, consisting of six small and two elbow chairs in leather, dining table with patent screw, also Early English sideboard with plate glass back; and fitted with cellaret, 16 guineas.

MAPLE and CO.—DINING-ROOM SUITES.—The STAFFORD SUITE, comprising six small chairs, two easy chairs in leather, telescope dining table, sideboard with plate glass back and cellaret, and dinner waggon, in light or dark oak, walnut or ash; very substantial in character: 23 guineas.

FURNITURE FOR EXPORTATION.

VISITORS as well as MERCHANTS are INVITED to INSPECT the largest FURNISHING ESTABLISHMENT in the world. Hundreds of Thousands of Pounds' worth of Furniture, Bedsteads, Carpets, Curtains, &c., all ready for immediate shipment. Having large space, all goods are packed on the premises by experienced packers—very essential when goods are for exportation so as to insure safe delivery. The reputation of half a century.

INDIAN CARPETS.

INDIAN CARPETS AT IMPORTERS' PRICES.—MAPLE and CO. receive all the Finest Qualities of INDIAN CARPETS direct from their Agents, and sell them at Importers' Prices, thus saving buyers of Indian Carpets at least two intermediate profits.

MAPLE and CO. have also a great number of really fine Indian Carpets, measuring about 12 ft. by 9 ft., which they are offering at the low price of 7 guineas, as well as a varied assortment of other sizes at proportionate prices.

PERSIAN CARPETS AT IMPORTERS' PRICES.—All these goods are bought by MAPLE and CO.'S Agents in Persia, and sold at Importers' Prices, thus saving purchasers of Persian Carpets at least two intermediate profits.

TO BUYERS of ORIENTAL CARPETS.—MAPLE and CO. offer exceptional facilities to buyers of ORIENTAL CARPETS. The goods are exhibited in ware-rooms, some of which are more than a hundred feet long, so that the very largest carpets can be fully displayed and minutely examined.

TURKEY CARPETS.

A TURKEY CARPET is, above all others, the most suitable for the Dining-room, its agreeable warmth of colouring enhancing the effect of the furniture and decorations, and indicating alike the good taste and comfortable circumstances of its possessor.

TURKEY CARPETS AT IMPORTERS' PRICES.—MAPLE and CO. are not only the Largest Importers of TURKEY CARPETS, but, having a Branch House at Smyrna, with Agency at Ouchak, the centre of the weaving district, are able to exercise close supervision over the whole process of manufacture which is the only way that excellence of colouring and workmanship can be guaranteed. In this way, Maple and Co. save Turkey Carpet buyers at least two intermediate profits.

MAPLE and CO.—PARQUETERIE

MAPLE and CO.—PARQUETERIE FLOORING for Dining, Billiard, or Smoking Rooms; also for Ball-rooms, Public Halls, Vestibules, as well as for surrounds to central carpets. Maple and Co. are now showing all the New Designs and Combinations of Wood at Greatly Reduced Prices.

THE SEVILLE SUITE IN SADDLEBAGS AND VELVET.

THE SEVILLE SETTEE, Persian Design and Coverings, mounted on velvet, £7 10s.

MAPLE and CO., Upholsterers by Special Appointment to Her Majesty the Queen. The reputation of half a century. Factories: Beaumont-place, Euston-road; Southampton-buildings, Liverpool-road; Park-street, Islington.

HUNDREDS of THOUSANDS of POUNDS' WORTH of Manufactured GOODS ready for immediate delivery. All Goods marked in plain figures for net cash—a system established 50 years.

MAPLE & CO., London, Paris, and Smyrna.

MAPLE and CO., Upholsterers by Special Appointment to her Majesty the Queen. The system of business is as established fifty years ago—namely, small profits on large returns for net cash. Acres of show-rooms for the display of first-class manufactured furniture.

MAPLE'S FURNISHING STORES are the largest in the world, and one of the sights of London. Acres of show-rooms. The highest class of furniture, carpets, and curtain materials. Novelties every day from all parts of the globe. Half a century's reputation.

MAPLE and CO., Timber Merchants and direct importers of the finest Woods, Manufacturers of Dining-Room and other Furniture by steam power and improved machinery. Tottenham-court-road. Factories: Beaumont-place, Euston-road; Southampton-buildings; Liverpool-road; Park-street, Islington; &c.

THE SEVILLE GENT.'S EASY CHAIR,
In Saddlebags of rich Persian design and colourings, mounted on velvet, £5 10s.

BED-ROOM SUITES.

500 IN STOCK.

MAPLE and CO.—BED-ROOM SUITES. The WHITBY SUITE, in solid ash or walnut, consisting of wardrobe with plate-glass door, toilet table with glass affixed, washstand with marble top and tile back, pedestal cupboard, and three chairs, £10 10s. Illustration free.

MAPLE and CO.—BED-ROOM SUITES. The SCARBOROUGH SUITE, in solid ash or walnut, including wardrobe with plate-glass doors, and new-shaped washstand, £12 15s.; or, with bedstead and spring bedding, £17 10s. Designs and full particulars free.

MAPLE and CO.—BEDSTEADS.

MAPLE and CO. have seldom less than Ten Thousand BEDSTEADS in stock, comprising some 600 various patterns, in sizes from 2 ft. 6 in. to 4 ft. 6 in. wide, ready for immediate delivery—on the day of purchase, if desired. The disappointment and delay incident to choosing from designs only, where but a limited stock is kept, is thus avoided.

POSTAL ORDER DEPARTMENT. Messrs. MAPLE and CO. beg respectfully to state that this department is now so organised that they are fully prepared to execute and supply any article that can possibly be required in Furnishing, at the same price, if not less, than any other house in England. Patterns sent and quotations given free of charge.

ART EXHIBITIONS.

At the Burlington Fine Arts Club (17, Savile-row) there is to be seen, by the kind courtesy of the committee, an exceedingly interesting collection of works by John Sell Cotman, perhaps the last survivor of the once famous Norwich School. It was not, however, as an oil-painter like the two Cromes, Starke, and others, that Cotman has earned distinction. He remained throughout his career almost wholly a water-colour artist, and his occasional excursions into oil-painting will add nothing to his fame. At the same time, Cotman was not only a painter by profession but an architect by instinct; and if in his later years he turned more to imaginative work, it can scarcely be held that his reputation is due to that period of his career, although, strangely enough, in his earliest work here exhibited, "A Backwater in Park" (1), attributed to the year 1798, he at that time was attracted chiefly by water and foliage. If this date be correct it coincides with the year in which, at the age of sixteen, Cotman left his father's house at Norwich and came to London; and it may thus be regarded as the one specimen still recognisable of his own untutored pencil. His earlier works show how quickly he fell under the influence of Girtin, and in such works as the noble "View of Durham" (4), with the castle and cathedral hanging over the then bright and rushing river, we find that all his efforts were directed towards composition and drawing. The colour is in every sense subordinate to the rest of the work; and this is also the case in the view "On the Greta" (7), which, unless we are mistaken, shows almost as it now stands the well-known posting house, "The Morritt Arms," little changed to-day externally from what it was seventy years ago. In the busy scene of "Norwich Market-place" (13), in 1805, we can trace Cotman's greater confidence in himself, not only in arrangement but in the use of colour; but even here the long nave of St. Peter's Church and the row of picturesque houses in bright sunlight have evidently more attractions for him than the groups of stalls and market-people with which the foreground is crowded. We should not omit to notice in this picture—one of the most striking in the exhibition—the care and knowledge with which Cotman treats his horses and cattle. In spite of his London life and training, he could still take interest in things pertaining to the country; and now and again similar touches of Nature appear in what would otherwise be little more than architectural studies. Passing by "St. Luke's Chapel" (20) at the north-east corner of Norwich Cathedral, and "Ely Cathedral" (22), as seen from what is now known as the Park, we pass on to a very simple study of a "Draining Mill" (25) in the Lincolnshire Fens, which seems to mark a turning-point in Cotman's career. It gives almost the first suggestion of pure landscape painting, of which two more complete instances are to be found in "Bishopgate Bridge, Norwich" (26), from the river bank, and "Mousehold Heath" (31), which, although painted as early as 1810, shows that he was already beginning to feel Turner's influence in the use of colour. Possibly it was the same influence which induced him to try his hand at sea-painting, of which the "Boats off Yarmouth" (37) and a schuyt in full sail "Off the Dutch Coast" (41) are conspicuous examples of Cotman's power to render water in motion. His visit to Normandy stimulated his love of architecture still more, and with it a love of details, always subordinated to the general effect. The view of "Mont St. Michel" (43) as approached from Pontorson is a very remarkable study of aerial effect, and must rank very high among the artist's works. In such works as "The Hôtel de Ville, Ghent" (51), "Malines" (57), and others, the love for Gothic buildings and architectural effect is again prominent; but when he comes back to England we find—as in the "Framlingham Castle" (56) and, in a less degree, in the "Rochester Castle" (50)—his love of Nature once more dominant. In the latter, moreover, we trace the tendency, which increases in later years, to employ bright and positive colours to depict effects which were only strong by comparison, and of which the importance would by any other artist of equal eminence have been reduced in works of so small dimensions. This tendency, which can only be attributed to Turner's influence, became more and more marked as time went on, until it reaches a climax in such works as "The Blue Afternoon" (63), painted in 1831.

One of the most attractive works in the whole series is the scene on the Avon, near Bristol, described as "Blasting St. Vincent's Rock" (76), and it throws a curious light on Cotman's habits, as well as on his powers, to find that this picture was made, not from Nature, but from a sketch by the late Rev. J. Balwer, of which the original is here exhibited. Another interesting picture is that of "Charing-cross with Charles I.'s Statue" (83), which, however, suggests that the artist was sadly cramped, and endeavoured to get too much on to his paper by narrowing the distances between old Northumberland House and the Golden-cross Hotel.

In addition to the water-colours, there is a fine collection of Cotman's drawings in black and white—in pencil, sepia, chalk, &c. Among those especially noteworthy are "A Wreck off Yarmouth" (102), "A View of Norwich" (109) from the river near St. Anne's Staithe, and "A Moonlight Scene" (114) representing a storm at sea, with a fishing-boat on the crest of a wave. Altogether, the exhibition is very illustrative of the artistic career of one who will always hold high rank among English water-colour painters, and the committee of the Burlington Fine-Arts Club are to be congratulated on the success of their efforts to bring a painter's life, as shown in his works, before the public.

Mr. Mendoza's Exhibition of "Black and White" at the St. James's Gallery (King-street, St. James's), is now the only display of the kind, unless exception be made in favour of the *remote* room at Burlington House, so seldom entered by those who throng to see the pictures. The St. James's Gallery, on the present occasion, shows very fairly the wide range of method and medium admissible under the term "black and white"—from Mr. James Webb's sea-pieces in oils to Mr. Lamotte's specimen of a pure line engraving, "A Daughter of Eve" (90), and even Miss E. A. Cooper's very careful and finely-finished drawing, in *sanguin*, entitled "Friends" (28). Of children's portraits, however, the palm is borne away by Mrs. Alice Bach's portrait-study (49), a face in which childish moulding of feature is preserved with a very considerable touch of character. Miss Cohen also sends a delicately-painted, somewhat pensive face (81), and Mr. Alma-Tadema a finely-drawn profile-study (99). Animal drawing is represented by Mr. S. T. Dadd's "Our Noble Ancestor" (179), a litter of terrier puppies viewing their stuffed progenitor with mingled awe and contempt; and Mr. Caldwell's "Distinguished Foreigner" (103), an aristocratic black poodle being received by his English friends, and the same artist's "Litigation" (11), kittens and puppies struggling for a bone with considerable vigour. In landscape work the exhibition is particularly well furnished. Mr. Nelson Drummond would, perhaps, achieve more marked effect if he were less versatile; but, in any case, his "Incense-Breathing Morn" (194), in every sense an imaginative work, deserves high praise, as does his "Misty Morn" (10) on one of the reaches of the Thames. Miss J. R. Thomas's "Canal at Bruges" (188) is an even more striking instance of how a spot can be poetised without loss to its reality. There is in such a work far more of the hazy atmosphere of the Low Countries than in Mr. Barraud's "Belfry of Ghent" (111), or even Mr. A. Webb's "Dordrecht" (6)—finely drawn as is this last-named. Among the other attractions of this little exhibition may be mentioned Mr. R. F. Hensman's "Alone" (17) and Miss Wyman's "Gaslight Study" (31)—the former a seated and the latter a standing female figure having much in common; Mr. C. Whymper's "Grouse-driving" (18); Mr. Appleton's mezzo-tint of Fanny Kemble (58) from Sir T. Lawrence's sketch; Mrs. Tadema's two studies from her picture (98); Sir F. Leighton's pencil sketches (110 and 138), both studies of old men's heads; a head (116) in India ink by Mr. James Hayllar; Miss Anna Alma-Tadema's minutely-accurate "Harebells" (150); Mr. G. S. Walter's spirited sea-piece "On the Edge of the Goodwins" (175); Mr. Clough Bromley's etchings, of which that of "Goring on the Thames" (203) is the brighter and more successful; Miss M. Gemmell's portrait of Mrs. W. Cunard (195) and Mr. C. J. Fox's study of South Coast scenery (212), in which the trees and foliage of the foreground are especially well executed.

Messrs. Alexander Baird and Son, of Kelvinbridge, Glasgow, send a few samples of their new Christmas and New-Year greeting cards of chaste design.

The Board of Trade have received through the Foreign Office the undermentioned rewards, which have been made by the United States Government to certain of the officers and crew of the British steam-ship Bavarian, in recognition of services rendered by them to the shipwrecked crew of the American schooner Eddie Pierce on Sept. 26 last:—A gold watch and chain to the master, Archibald W. Ball; a gold medal and 50 dols. to the chief officer, George W. Muir; and a sum of 10 dols. to each of the seven seamen, John Oliver Johnstone, James Byrne, James Henry Spencer, Arthur M'Guire, James Burns, John Hurley, and Thomas Jones.

PETER ROBINSON { MOURNING WAREHOUSE, REGENT-STREET, LONDON.

"HANDS ACROSS THE SEA."

We sometimes laugh at French dramatists for their ludicrous ignorance of English life, manners, and customs. Although we are only separated from Paris by a short journey, the Englishman on the stage is still invariably represented with weeping whiskers and a Scotch plaid suit. Englishwomen are represented as coarse, vulgar, and badly dressed; and it is not too much to say that, so far as our domestic life is concerned, the Japanese know more about us than the average educated Frenchman. But, on the other hand, how foreigners must laugh at us, if ever they trouble to study our stage or look at our modern plays! Clever and observant men like Mr. Sidney Grundy, Mr. Henry Pettitt, and many more seem to be under the impression that the foreigner—be he Russian or French-man—possesses a deadly influence with women. Granted a woman of unimpeachable character and blameless life—a virtuous wife, a good mother—she has only to be left alone with a man with a foreign accent in order to be insulted with vulgar protestations of affection and treated to scenes of violence. The stage foreigner, as presented to the gaze of admiring Englishmen, is an individual who is always in dress clothes, and is perpetually bribing ladies'-maids to admit him into my lady's chamber after dark, when he is not expected, and is certainly not wanted. Many years ago, in two plays, Sardou made use of this scene of violence towards an innocent woman. He used it in "Nos Intimes" ("Peril"), and he used it in the "Maison Neuve." But in both cases the wife, though innocent, had been extremely imprudent, and at least suggested to a very vain man that his attentions, if offered, would not be wholly displeasing. This, in fact, is the very essence of the situation, which has wholly escaped the attention of the English dramatists who annex it. It is enough for them that the wife is innocent, and that she is within an approachable distance of some convenient French windows. Put any average Englishwoman in Paris, and whether introduced or not to her aggressor, she is sure, sooner or later, to be attacked by a foreigner in evening dress, who considers that, if she is the rabbit he is the snake, and that he can assuredly fix her with his glassy eye and fascinate her in five minutes. One would have thought that such situations would have been reserved for the cheap literature devoured by emancipated school-girls and hysterical waiting-maids; but they occur so often on the modern stage that it is worth while calling attention to them, in the hope that in the future some motive may be dis-covered for these nocturnal acts of violence. Scarcely, how-ever, have we recovered from the shock of Mr. Sidney Grundy's Russian, in "The Dean's Daughter," when we find his partner, Mr. Pettitt, giving us another foreigner of the same pattern—this time a Frenchman—in "Hands Across the Sea." A young English lady, happily married, who has a positive detestation for flirtation, and who seldom leaves her husband's side, is "marked down," as it were, by one of these determined creatures. Unless the man is a born fool, he must know that his efforts to captivate would in this instance be absolutely useless; but it is enough for him that his victim is within reach. "Once on board the lugger!" used to be the cry of the old transpontine villain. "Once within the French windows!" is the echo of the modern stage villain. Of course, improbable or not, it leads up to the well-worn catastrophe. "You shall love me!" "I won't! Leave the house!" "I sha'n't! You don't know what devotion means!" "I don't want to!" Then over go the tables and chairs, down goes the bell-rope and enter the infuriated husband, who saves his fainting darling when her strength is almost spent! From that instant the rest of the play is all plain-sailing. The husband assaults the villain, and they snarl at one another. A few minutes after, the French villain is found murdered, and the crime is at once fastened on the innocent husband, who is known to have a deadly hatred of the murdered man. Will it be believed that Mr. Pettitt has actually used this motive again, and successfully? It has been done at the Adelphi scores of times; it has been done at Drury-Lane; it has been done by innumerable authors at the Princess's: but up it comes again, smiling, in the new Australian drama that is a very bright, well-arranged and successful one, but when examined will be found to have very little colonial flavour about it, unless local colour is given by an old settler who continually—in the warmth of his heart—shouts out: "Ad-vance, Australia!" Mr. Pettitt knows more about the building up of a play than most of his companions. He has in him, very strongly, the dramatic faculty. The pity of it is that he does not take a little more trouble, and write a play that would be really worthy of his unquestionable talent. One scene in the new drama is as well arranged and dramat-ically effective as anything that Mr. Pettitt has ever done; but it is comparatively wasted here. We allude to the meeting of husband and wife on board ship—the husband a rescued convict, the wife a passenger—both dying to speak to one another, but both compelled to silence. An author who could suddenly stumble on a scene like that ought to write a better play than "Hands Across the Sea." But the answer will be—What does it matter? As much money is made by bad plays as by good plays; the stalest effects are the safest; rubbish, as some call it, has a mercantile value; and cheap melodramatic audiences are not so mighty particular. With such reasoning the critic has, naturally, no sympathy whatever. It may be true or it may be false; all he desires is that a clever man should show his muscle and not shirk any encounter. Scores of dramatists could not write a play of real artistic value if they were paid for it. They can botch and patch and re-arrange, but they cannot create. We believe Mr. Pettitt can, if he only tries, do much better work than is found in these hurriedly prepared dramas for an ill-stocked market. But he turns back contentedly to the farmer's daughter pursued by the graceless villain, to the ridiculous foreigner who thinks that every innocent woman will fall at his feet, and to the innocent man discovered on his enemy's corpse. With these he rings the changes, and the public applaud him. There is no better melodramatic actor even now after these long years of service than Mr. Henry Neville. Old Time has passed him by. He is still young, active, interesting, and enthusiastic, and the author is lucky who has such a willing worker to aid him. Mr. Neville never sulks with his part, or puts obstacles in the way, or hinders the dramatic scheme in which he is concerned. Invariably he gives his best work, and his influence is both wholesome and inspiriting. Conscientious also, very pleasant, and ever earnest is Miss Mary Rorke, who is one of our popular actresses who is constantly improving. She does not go back: she advances. Mr. E. W. Garden and Miss Webster are excellent in a couple of not very well written or conceived comedy characters; and good service was done in minor characters by Mr. Julian Cross, Mr. Abingdon, Mr. Bucklaw, and Mr. Edmund Gurney. The best and most ambitious acting, however, was shown by Mr. R. Pateman, whose death-scene, though pain-fully realistic, was extremely clever. It has been urged, on behalf of Mr. Pettitt, that the most extravagant incidents in this drama were derived from actual life and a story in itself so extraordinary that it was not believed, even in Paris. That may be so. But the extravagant accidents in life do not always make the best dramas. Things on the stage need not always be probable, but they must be possible to the intelligence and understanding of the ordinary spectator. Mr. Grundy's Dean may have existed somewhere or other; but he is not typical of the ordinary sober dignitary of the Established Church. There was once a Bishop who was a thorough-paced scoundrel; but to represent a Bishop as a blackguard would be a dramatic absurdity.

Mr. G. W. Taylor has offered the sum of £50,000 to found a Congregational college affiliated to the Melbourne University, the offer being dependent on a similar amount being subscribed by the colony.

The Countess of Meath, at a drawingroom held by Mrs. Goodhart at Canterbury on Nov. 17, gave an address which resulted in the formation of another branch of the Children's Ministering League. Mainly through the exertions of Lady Meath, there are now established in various parts of the world 500 branches of the league, with a membership of 15,000.

Application has been made to Mr. Justice Chitty, in the Chancery Division, for the distribution of the late Rev. William Wight's estate among the next-of-kin. By his will, which has been declared void, Mr. Wight provided for the establish-ment of a "College of Social and Domestic Science for Ladies" on novel and eccentric lines. His Lordship made a decree as requested.

The Lord Mayor presided on Nov. 19 at the annual meeting of the Working Lads' Institute, Whitechapel, and, in moving the adoption of the report, said he felt that it was an admir-able institution, and he was glad to see that the educational process going on included shorthand and French. Prizes for progress at the evening classes were afterwards distributed, and a swimming-cup, presented by the Lord Mayor, was awarded. The building is now complete, it having been com-menced five years ago. The second wing consists of a large swimming-bath, a gymnasium, and a lecture hall.

The twelfth annual distribution of prizes to pupil-teachers connected with the Westminster Teachers' Association took place on Nov. 17, at the Westminster Townhall, under the presidency of Mr. Burdett-Coutts, M.P. There were also present on the platform the Duchess of Teck and Princess Victoria of Teck, Baroness Burdett-Coutts, and the Rev. J. Diggle (the chairman of the School Board). The prizes, about forty in number, were distributed by the Duchess of Teck. They consisted of handsomely-bound books and various valuable articles, and were awarded for religious knowledge, needlework, French, drawing, and general knowledge.

A concert in aid of the funds of Princess Frederica's Con-valescent Home was given on Nov. 16 at Prince's Hall, under the patronage of Princess Christian and Princess Frederica. The report of the committee states the object of the home to be the providing of fresh air, rest, and good food for poor married women, with their infants, who, after the birth of their children, are in want of care and comfort. Patients of all nationalities and religious denominations are admitted; and during the period of three weeks, which they stay in the Home, clothing of every description is found for both mother and child. The committee earnestly request donations and subscriptions to enable them to carry on the good work. The concert was well attended.

THE MANUFACTURING

GOLDSMITHS' & SILVERSMITHS' COMPANY,

Show-Rooms: 112, REGENT-STREET, LONDON, W. (Adjoining Stereoscopic Company)

They beg to notify that their only London retail address is 112, REGENT-STREET, W.

"A SUCCESSFUL BUSINESS."

"We know of no enterprise of recent years which has been crowned with greater success than the Goldsmiths' and Silversmiths' Company, of 112, Regent-street, who, just eight years ago, opened their show-rooms to place the productions of their workshops direct before the public, thus saving purchasers the numerous intermediate profits which are ob-tained by 'middle-men' on high-class goods. Such has been the appreciation by the public that the Company have now the largest business in England, and are quite supplanting the old-fashioned houses that pride themselves upon having been established so many decades, but have utterly failed to keep pace with the times, and find it impossible to depart from their long credit system, entailing bad debts, for which cash buyers have to compensate."—Court Journal.

Fine Diamond Lyre Brooch, £15.

Fine Diamond and Pearl Swallow Brooch, in best Morocco Case, price £5.

Fine Diamond Spider Brooch, £10.

ILLUSTRATED CATALOGUE POST-FREE.

ILLUSTRATED CATALOGUE POST-FREE.

ADVICE TO MOTHERS.—Are you broken in your rest by a sick child, suffering with the pain of cutting teeth? Go at once to a chemist and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor sufferer immediately; it is perfectly harmless; it produces natural, quiet sleep by relieving the child from pain; and the little cherub awakes "as bright as a button." Be sure "Curtis and Perkins, New York and London," is on the outside wrapper. No mother should be without it. Sold by all Medicine Dealers, at 1s. 1½d.

WILLS AND BEQUESTS.

The will (dated Feb. 21, 1882) of Mr. Thomas Harrison, J.P., late of West Hill, Stalybridge, Lancashire, who died on Aug. 12, at Llandudno, was proved on Oct. 16 at the Manchester District Registry by Tom Harrop Sidebottam, James Sidebottam, William Sidebottam, Adam Dugdale, and William Harrison, the son, the executors, the value of the personal estate being sworn to exceed £110,000. The testator bequeaths £15,000 to his daughter, Mrs. Amy Agnes Dugdale; and £10,000 to his daughter, Mary Emily Harrison, upon trust, to pay the income thereof to them, for life, and at their death, as to the capital as well as the income, to their respective children as they shall appoint. The residue of his real and personal estate he leaves to his son, William Harrison, absolutely.

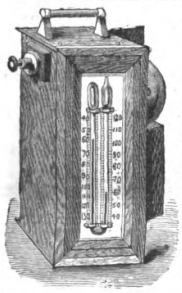
The will (dated May 28, 1888) of Mr. Thomas Best, late of Liverpool and Highlee, Druids'-cross-road, Wavertree, near Liverpool, merchant, who died on July 13 last, was proved on Nov. 7 by William Rodger, Henry Rushton, and John Graham Rodger, the executors, the value of the personal estate amounting to upwards of £94,000. The testator bequeaths all his furniture, plate, carriages, horses, wines, &c., and the income of £50,000 to his wife, Mrs. Caroline Augusta Best, for life, and at her death the sum of £50,000 to be equally divided between his three sisters, Baroness Jessie Wallace Von Podewils, Mrs. Agnes Elizabeth Fair, and Mrs. Annie Kirby; £4000, upon trust, for each of his said sisters, for life, and then to their children; and annuities of £200 each to his brother, James Rodger Best, and his wife, Henrietta Best. The residue of his real and personal estate is to follow the same trusts as the sum of £50,000 before mentioned.

The will (dated March 31, 1886) of Mr. William Eschauzier, late of Gibraltar, who died on Aug. 27 last, at Barcelona, Spain, was proved on Nov. 10, by Anthony John Terry and William Eschauzier, the nephew, the executors, the value of the personal estate exceeding £62,000. The testator gives 5000 dollars each to the Superioress of the Hermanos de la Cruz and the Hermanitas de los Pobres, in Seville; 30,000 dollars, his house in Seville, and all his furniture and effects, to his nephew William Eschauzier; 20,000 dollars each to his nephews, Edward, Francis, Ambrose, and Louis; 25,000 dollars each to his nieces, Mary and Rosary; 10,000 dollars for distribution among the poor of Seville and Havannah; 10,000 dollars to Anthony John Terry; and numerous other legacies and annuities. The residue of his property he leaves, as to five one-hundredths, to the Vicar Apostolic of Gibraltar, for building and maintaining Roman Catholic churches in Gibraltar; sixty-five one-hundredths to the trustees of the will of John Gavino, for Gavino's Asylum; and thirty one-hundredths among certain Roman Catholic charities in Gibraltar.

The will (dated Oct. 20, 1881) of Mrs. Frances Jane Bond, late of No. 24, Devonshire-place, W., widow, who died on Oct. 11 last, was proved on Nov. 8 by Edward Bourchier Savile and Charles Cornelius Savile, the nephew, the executors, the value of the personal estate exceeding £44,000. The testatrix bequeaths £5000 to her brother, Charles George Martin O'Callaghan; £3000 to her nephew, Henry Tyrone Savile; and £2000 each to the six other children of her late sister, Mrs. Mary Savile; £10,000 to her niece, Frances Eleanor Savile, and all her jewels and trinkets; £200 each to her brothers-in-law, Edward Bourchier Savile and Henry Bourchier Osborne Savile; £50 to the Welbeck-street Infirmary, and £300 to her maid. The residue of her real and personal estate she leaves between her nephews and nieces, the children of her late sister Mrs. Mary Savile.

The will (dated July 21, 1888) of Colonel Arthur Swann Howard Lowe, late of Gosfield Hall, Essex, who died on Aug. 12 last, was proved on Oct. 5 by Arthur Courtauld Willoughby Lowe, the son, one of the executors, the value of the personal estate exceeding £26,000. The testator leaves his old family diamond ring to his wife, Mrs. Louisa Ruth Lowe, for life, then to his son Arthur, with remainder as an heirloom to the tenant for life of Gosfield Hall. All the rest and remainder of his property he leaves, upon trust, for his wife, for life or widowhood, she allowing his two sons £1000 per annum each, and on her death or remarriage the residue is to go to his two sons, as she shall by deed or will appoint, and in default thereof he gives £60,000 to his son Edward Aubrey Courtauld Lowe, and the ultimate residue to his son Arthur Courtauld Willoughby Lowe.

The will (dated Oct. 19, 1886) of Mr. Thomas Parr Perry, late of Lympston, Devon, who died on Sept. 30 last, was proved on Nov. 10 by George Knox Whitehead, the nephew, and Mrs. Sophia Whitehead, the executors, the value of the personal estate exceeding £25,000. The testator bequeaths to the Clergy Orphan Corporation, whose schools are at Canterbury and St. John's Wood, all the money standing in his name in the Three per Cent Consolidated Annuities; £200 to Mrs. Clementina Dent; £100 each to Flora Pierce and her sisters, Mary and Annette; and his house called Brook Cottage, with the furniture and contents thereof, to his nephew, George Knox Whitehead. The residue of his property he leaves, upon trust, for his said nephew and Sophia, his wife, and, on their deaths, to their children.



The will (dated May 16, 1888) of Lady Alexandrina Charlotte Mabella Cecil, wife of Lord Brownlow Thomas Montague Cecil, late of Marine Parade, Dover, who died on Oct. 17, was proved on Nov. 13 by Lord Brownlow Cecil, the sole executor, the value of the personal estate exceeding £7000. The testatrix bequeaths certain stocks and shares, upon trust, for her husband, for life, and at his death she gives £300 each to Margaret Boult, Margaret Bainbrigge, Grace May, Maria Evans, Laura Gillespie, and Nathalie Cumont; £350 each to her god-daughters Lady Laura Cecil, Edith Bainbrigge, and Cecil Cassels; £50 to the Church Missionary Society; £25 each to the Mission to Deep Sea Fishermen, the National Life-Boat Institution, and the Girls' Orphanage, Northampton; £50 to the Sailors' Orphan Girls' Home, Hampstead; £19 each to the Cripples' Home, Regent's Park, and the Colonial and Continental Church Society; £10 each to the Dover Hospital, the Christ Church Mission Church, Dover, and the Soldiers' Home, Dover; and £5 to the East Cliff Mission, Dover, and other legacies; and the remainder of such stocks and shares between Lady Laura Cecil, Edith Bainbrigge, and Cecil Cassels. The residue of her property she leaves to her husband.

His Excellency the Viceroy of India and the Marchioness of Lansdowne left London on Nov. 16 for Brindisi, where they joined the mail-steamer for Bombay.

During Thursday night, Nov. 15, and the following morning, a severe gale prevailed over Scotland, the north of England, and Ireland, causing great damage to shipping and loss of life amongst seamen. Inland, considerable damage to property was caused at Glasgow, Edinburgh, and other places.

Cardinal Lavigerie has written to Cardinal Manning, a member of the committee of the British and Foreign Anti-Slavery Society, expressing high regard for the society, and enclosing for it, out of the Pope's bounty, an order on Paris for 50,000 f. (£1975).

The Countess of Aberdeen presided on Saturday, Nov. 17, at a meeting consisting chiefly of ladies, held at Mr. P. W. Bunting's, 11, Endsleigh-gardens, to discuss the election of women to county councils. Lady Aberdeen urged that women had been of much use on boards of guardians and that they ought to sit on the councils. Resolutions in support of the candidature of Lady Sandhurst and Miss Cobden were passed and for the appointment of a committee.

INVALIDS' TEMPERATURE ALARM AND INDICATOR

(Patent) Automatic, Reliable, Durable.

Invaluable for Sick-Room or Ward, where variation of temperature is injurious. The heat of the room is denoted by the thermometer, which at a given temperature causes the bell to ring until either the temperature is raised or the alarm checked. The battery will last for years, and may then be renewed at a small cost. Can be supplied to give an alarm at any temperature. Price-lists on application.

HEALTH-STRENGTH VIGOUR LONG-LIFE

Guaranteed by the use of HUNT'S FAMILY PILLS. Large numbers of people in robust health can testify to the truth of this assertion, having regulated themselves entirely by these Pills for over 50 years. One pill will invariably relieve, and a little perseverance radically cure, either a Torpid Liver, Costiveness, Indigestion, Pains in the Back or Head, Influenza or Feverish Cold, Rheumatism, Lumbago, Flatulency, or Giddiness. THEY RESTORE BRIGHTNESS TO THE EYE, CLEARNESS TO THE COMPLEXION, SHARPNESS TO THE INTELLECT, AND ENERGY TO BOTH MIND AND BODY. To Ladies they are invaluable. Sold everywhere, in boxes, 1s. 1½d. and 2s. 9d. Wholesale Agents, WILCOX & CO., 239, Oxford Street, London, Post-free.

CORPULENCY.

Recipe and notes how to harmlessly, effectually, and rapidly cure Obesity without semi-starvation dietary, &c. "Sunday Times" says:—"Mr. Russell's aim is to *eradicate*, to *cure* the disease, and that his treatment is the true one seems beyond all doubt. The medicine he prescribes *does not lower but builds up and tones the system.*" Book, 116 pages (8 stamps).

MUSIC.

Mr. Henschel inaugurated, on Nov. 20, a new series (the third) of his excellent "London Symphony Concerts" at St. James's Hall. These performances give a special musical importance to our London winter season, particularly in the absence of any opera, and the discontinuance (as usual at this period) of the Promenade Concerts. Mr. Henschel's first programme was of strong and varied interest, and consisted entirely of instrumental music, the widespread taste for which is now sufficient to gain acceptance for selections limited to that class of compositions. The chief feature of the opening concert was Beethoven's seventh symphony (in A), the only novelty announced having been a "Suite" by Grieg, from the music to Ibsen's dramatic poem, "Peer Gynt." The several movements of this work are, respectively, entitled: "In the Morning," "The Death of Ases," "Anitra's Dance," and "In the Hall of the Mountain King." Of the merits of the music there will, we believe, be another opportunity before long of speaking, when the work may be more favourably placed than at the end of a sufficiently-long programme.

The first of the two concerts at which Madame Patti was announced to appear before her departure for a tour in South America was given at the Albert Hall on Nov. 20. Nearly every seat in the spacious building was occupied, and there was an excellent entertainment, Madame Patti having for coadjutors Madame Patey (who replaced Madame Trebelli), Mr. Edward Lloyd, Signor Foli, Miss Nettie Carpenter (violin), with Mr. Ganz conducting a full orchestra. The extremely familiar programmes offer nothing calling for detailed comment. It will, therefore, suffice to say that the prima donna was, as usual, in excellent voice. Messrs. Lloyd and Foli, Miss Carpenter, and an orchestra under Mr. Ganz, likewise took part in the proceedings. On such an occasion, the interest, of course, was almost entirely centred in Madame Patti herself, who was accorded a most enthusiastic leave-taking.

Mr. John Boosey's London Ballad Concerts at St. James's Hall were resumed on Wednesday evening, Nov. 21, when a varied and attractive programme was prepared.

We have already recorded the opening of the thirty-first series of the Popular Concerts at St. James's Hall on the evening of Nov. 12. The first of the Saturday afternoon performances took place on Nov. 17, when Sir Charles Hallé appeared as pianist, his solo performances having been in Chopin's "Nocturne" in E major from Op. 62 and his "Barcarolle" in F sharp major, which were rendered with that refinement of style for which the pianist has long been eminent. He and Lady Hallé (Madame Néruda) were worthily associated in an appreciative performance of Brahms's duet sonata in A (Op. 100); the lady violinist and MM. Ries, Straus, Gibson and Piatti having rendered Mendelssohn's string quintet in B flat (Op. 87) with fine effect. Sir Charles and Lady Hallé and Signor Piatti contributed to the performance of the closing piece of the day, Beethoven's pianoforte trio in D major (from Op. 70). More or less familiar vocal pieces were well sung by Miss L. Lehmann, accompanied by Mr. Frantzen. At the second evening concert of the series, on Nov. 19, Lady Hallé (Madame Néruda) was again the leading violinist, the occasion having brought back Mdlle. Janotha as solo pianist. Miss Elsa was the vocalist, and Dr. Engel the accompanist.

The sixth of the present series of Saturday afternoon concerts at the Crystal Palace took place on Nov. 17, when Sir Arthur Sullivan's dramatic cantata, "The Golden Legend," was performed; its many repetitions since its first production at the Leeds Festival of 1886 proving the strong and sustained attraction which it possesses, alike for metropolitan and provincial audiences. The solo vocalists on the recent occasion now referred to were Miss Emily Spada, Madame Belle Cole, Mr. E. Lloyd, Mr. B. Foote, and Mr. A. Black, all of whom were efficient in their respective degrees. The lady first named appeared in sudden replacement of Madame Nordica, who was to have sung, but was unavoidably detained by her American engagement.

DEATHS.

On Nov. 8, 1888, at Woolwich, Lieut.-Col. Ernest Henry Manningham-Buller, commanding 2nd Battalion Rifle Brigade, youngest son of the late Sir Edward Manningl a n-Buller, Bart., of Dilhorne, Staffordshire, aged 49.

On Oct. 18, at 32, St. Petersburg-place, Bayswater, of pluro-pneumonia, Jane Christiana (Janet), second daughter of the late Alexander Thom, Esq., formerly Acting Deputy-Inspector-General of Hospitals, Bombay, and P.M.O., Mauritius.—Indian and New Zealand papers please copy.

BROWN'S BRONCHIAL TROCHES.
Sold by all Medicine Dealers.

BROWN'S BRONCHIAL TROCHES.
Sold at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES
are perfectly safe.

BROWN'S BRONCHIAL TROCHES reach directly the affected parts, and give almost immediate relief. All suffering from irritation of the throat and hoarseness will be agreeably surprised at the almost immediate relief afforded by the use of Brown's Bronchial Troches. The demulcent ingredients allay pulmonary irritation, and after public speaking or singing, when the throat is wearied and weakened by too much exercise, their use will give renewed strength to the vocal organs. For public speakers, singers, and those who overtax the voice, they are useful in relieving an irritated throat, and will render articulation easy. Sold by all Medicine Dealers, at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES.

BROWN'S BRONCHIAL TROCHES.
Sold Everywhere.

BROWN'S BRONCHIAL TROCHES.
Prepared by John I. Brown and Sons, Boston, United States.

BROWN'S BRONCHIAL TROCHES for clergymen's sore throats. Public speakers and singers will find them beneficial in clearing the voice before speaking or singing, and relieving the throat after any unusual exertion of the vocal organs, having a peculiar adaptation to affections which disturb the organs of speech. Few are aware of the importance of checking a cough or "slight cold" in its first stages. That which in the beginning would yield to a mild remedy, if neglected soon attacks the lungs. The Troches give sure and almost immediate relief. They may be had of any Medicine Dealer, at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES
Cure Coughs.

BROWN'S BRONCHIAL TROCHES

Beware of imitations, and insist upon having AIR-GUNS bearing my Trade-Mark, a Swiss Cross.

For the **BATH** AND **TOILET.**

RANDAL CRESSWELL'S ELECTRIC SPONGE

AN HONEST REMEDY. TRY IT!

STARTLING DISCOVERY IN MEDICAL SCIENCE FOR RAPIDLY RESTORING WASTED NERVOUS POWER TO THE HUMAN SYSTEM, STRENGTHENING THE WEAK AND FORTIFYING THE STRONG. (BY ROYAL LETTERS PATENT, No. 4,456.)

AN important and ingenious invention by means of which every man, woman, and child may enjoy the luxury of a REAL ELECTRIC BATH whenever the customary "morning dip" is taken, and the ordinary toilet ablutions be invested with a vitalising, invigorating influence which they never before possessed. Randal Cresswell's Electric Sponge is the ordinary Bath Sponge in outward appearance, but it is of very superior quality, being, in fact, the best sponge in the market, and contains concealed in its interior a small primary battery from which the current of Electricity is obtained. The battery is of perfectly unique construction, cannot get out of order, and does not add materially to the weight or detract from the pliability of the Sponge. By simply wetting the Sponge and applying it to the skin the Electric current can be conveyed to any part of the body, and although the current is sufficiently powerful to withstand any of the ordinary tests, such as ringing a bell or deflecting the needle of a galvanometer, it gives no shock or unpleasant sensation and it is guaranteed to be absolutely harmless to the most delicate infant. Every Sponge is rigidly tested before being sent out, and is guaranteed to be exactly as represented, viz., a genuine ELECTRIC SPONGE, suitable for the bath or toilet.

The mild, continuous current of
ELECTRICITY,
As conveyed to the system without any shock or unpleasant sensation by
RANDAL CRESSWELL'S ELECTRIC SPONGE,
INVIGORATES THE DEBILITATED CONSTITUTION,
STIMULATES THE ORGANIC ACTION,
PROMOTES THE CIRCULATION,
ASSISTS DIGESTION,
AND RENEWS WITHIN US THAT VITAL ENERGY, THE LOSS OF WHICH IS THE FIRST SYMPTOM OF DECAY.

ORGANIC INACTIVITY,
NERVOUS DEBILITY,
RHEUMATISM,
DEPRESSION,
NEURALGIA,
LASSITUDE,
LUMBAGO,
SCIATICA,
GOUT,
All fly before the invigorating effects of
ELECTRICITY,
As imparted to the system by
RANDAL CRESSWELL'S ELECTRIC SPONGE.

BEWARE of the numerous fraudulent appliances which are constantly being advertised at extortionate prices, and in which there is nothing Electric but the name; they are absolutely devoid of any Electrical properties whatever. The "ELECTRIC SPONGE" is the only genuine and simple form of applying Electricity, and it costs no more than the ordinary Bath Sponge of similar size and quality.
Ask your medical man.

WRITE FOR
"How to distinguish a Genuine Electrical Appliance from a Sham."
FREE ON APPLICATION.

Price 15/- Post Free.

NO QUACKERY HERE.
For more than a century Physicians and Scientists have been seeking a mode of applying Electricity locally. The Electric Sponge supplies this long-felt want. It is endorsed by the entire Medical profession.

LADIES AND GENTLEMEN, YOU ALL USE A SPONGE, WHY NOT TRY THIS ONE? IT IS THE BEST IN THE MARKET, AND POSSESSES PROPERTIES NEVER POSSESSED BY A SPONGE BEFORE.
Price 15/- post free

The ELECTRIC SPONGE, of which the above engraving is a reduced fac-simile, is a full-sized Bath Sponge, and will be forwarded, securely packed and free by post, with full directions for use, to any part of the World, on receipt of Post Office Order or Cheque value **15s.**, crossed "& Co.," and payable to THOMAS YOUNG. We guarantee the **"ELECTRIC SPONGE"** to be a genuine Electric appliance, and undertake to return all money sent us if it is not as represented. What can be fairer? **No other vendor of so-called Electric appliances dare make such an offer.** So try the "Electric Sponge," it costs no more than the ordinary Bath Sponge of similar size and quality. Ask your Chemist to supply you, and, if he cannot, apply direct to the

"CLARISSE."—BY CONRAD KIESEL.

OUR NOTE BOOK.

BY JAMES FAYN.

I confess that Russian novels generally fail to interest me. The characters in them appear to be less of flesh and blood than of wood—and of a very hard kind of wood; and even the initial difficulty of mastering their names I find considerable. I am sure I should have felt the inconvenience of associating with a young person whose name was in fourteen syllables. How could one have whispered it, when circumstances demanded secrecy? And how much time it would have wasted that might have been better spent! That sesquipedalian patronymic, her surname, she could, of course, have exchanged for my brief one; but her Christian name would have been alien to the tongue of love. I feel the same obstacle in the endeavour to interest myself in the heroine of a Russian novel. I dislike all foreign names—if we had a really "strong Government" they would not be permitted anywhere—but in the country of the Czar they are intolerable. Even Count Tolstoi's genius as a story-teller has, on this account (and some others), failed to greatly attract me; and now it seems, if we are to believe one who has recently "interviewed" him, he is going to still further test the fidelity of his admirers by writing a novel "exposing the illusion of romantic love." The heroine, while retaining for us English readers her polysyllabic disadvantages, will not be allowed to adore her beloved object, but only to feel for him the attraction which is "born of identity of sentiment, similarity of ideal, and the friendship of the soul." This is what vulgar people, when wishing to describe something very delicate but rather insipid, call "veal without bacon." But the Count means to go much farther than the exposing an illusion. His object, he says, will be "to fill the reader with horror at the results of entertaining romantic love at all." I do not think he will succeed; but he is not the first who has attempted the same sort of thing. Jean Pierre Camus, Bishop of Bellay, wrote stories "to inspire horror and disgust of love." "I should like to see them," says Southey, rather drily (in his "Commonplace Book"); but though, perhaps, the greediest reader in the world, he could never get hold of the interesting volume.

A gentleman is in trouble with respect to a charge of conspiring with another gentleman to obtain a little money under false pretences. The matter is *sub judice*, and, of course, I have not a word to say against one who may be as innocent as the driven snow. But the evidence for the prosecution is most noteworthy. The accused is alleged to have represented himself, by advertisement, as an agent for the stage. He had a company on hand ("Jones and Co., of Wales") and places in it to fill, for which (as was natural enough) he expected premiums. Theatrical aspirants, male and female, apply to him in shoals. They make appointments with him, and rehearse their parts. One applicant is a Roderigo, another is a Jessica. He is nothing if he is not critical, and is so good as to underscore the lines they ought to emphasise. Some of them are as "promising" as the agent himself—sucking Irvings and budding Miss Terrys. They exert themselves in these private performances to the uttermost in a little parlour in Sussex-street, S.W. But as it is now, alas! alleged, solely for the delectation of the accused. Their artistic host is declared not to have been a theatrical agent at all, but only a collector of premiums. There never was—in the form, at least, of a dramatic company—a "Jones and Co., of Wales." Science assures us that force is never lost, and though I often fail to understand her I am the last person to contradict her. Supposing, therefore, the story of the prosecution is a correct one, what has become of all those histrionic exhibitions—the fury of Othello, the wit of Falstaff, the pathos of Desdemona? To act to empty boxes must be bad enough, but to simulate the noblest emotions of the human heart, for the sole benefit of a gentleman who is simulating a theatrical agent, must be distressing, indeed.

I am not as a rule enamoured of sea-stories; there is a monotony about the ocean which seems to affect not only those who make their business in great waters, but those who write about it afterwards. Whoever has taken a long voyage with the same companions gets uncommonly tired of nine-tenths of them; and the same thing happens to me with the characters of a nautical novel. When a master of the craft (I am not, of course, alluding to the ship's captain) takes the matter in hand, the result, however, is different, and Captain Marryat and Mr. Clark Russell can make even sea-stories attractive. It is not wonderful that both should have taken in hand so tempting a subject as "The Phantom Ship." With Marryat's novel of that name we have most of us made acquaintance; it is not written upon his usual lines, nor can it be called a great success; but it is a powerful story. Mr. Clark Russell's recent book, "The Death Ship," with which it is interesting to compare it, is something much more than this. If the proverbial jealousy of persons in the same way of business would permit me I should describe it as a work of genius. "If it is not genius" (to pilfer a saying from a dying man), "it is its cousin german!" But why the Vanderdecken should the author have killed Imogene? Had I known of his murderous intention when he first introduced her to me he would have lost a reader, and I an enthralling story.

A native of Honolulu having been condemned to death for murder, has chosen to accept the alternative, offered him by science, of being inoculated for leprosy, and has caught it. The Government will, probably, "catch it" too, for having permitted the experiment; but surely not upon good grounds? The question does not go on all fours at all with that of vivisection. In this case there is no compulsion in the matter. It was desirable that it should be proved whether leprosy was contagious or not, and the criminal gladly ran his chance. So far as I know, there has been no instance of a similar alternative being offered to a man sentenced to death since the two criminals in Edinburgh were put into what they were told were beds in which men had died of cholera—but where, in fact, nothing of the kind had occurred—to prove the effect of fancy in producing disease. One of them—presumably the one that had the most imagination—developed the cholera, and the other was not "a penny the worse." I suppose most people in Honolulu, or elsewhere, would rather be vaccinated for anything than be hanged, not excepting even one of our own anti-vaccination agitators. If the operation did not "take" he would be all right, and if it did and he perished, as he had always said he should, he would prove his theory.

If there is nothing new under the sun, it was at least made certain, the other day, that the "Complete Letter-Writer" is not quite so complete as it was supposed to be. The best editions, I believe, contain samples appropriate to every circumstance of human life, inclusive of how to express oneself on breaking off our engagement with the young person we had promised to marry. But this, though performed with the greatest delicacy, was not accomplished on such lofty grounds as it has been of late in real life. A very religious young man, indeed, has composed the following appeal (for his own use):—"Dear Susan and Christian Sister,—I feel with regards marrying you, Susan, which is a very great responsibility on your part, and also on mine, which I find was too hasty; but the Lord will forgive me, and I trust you will—won't you, Susan? . . . I have been putting your love with mine from time to time, and find yours has been a great deal stronger than mine." He also offers his Christian Sister the sum of eight pounds not to proceed with the action for breach of promise. I wonder whether this is the sort of affection which Count Tolstoi proposes to substitute for "romantic love"? There is a great deal of the piety about it which he so desiderates, though it is hardly what one would call "natural piety."

Another action at law illustrative of the same subject occurred almost simultaneously at Westminster. In this case, however, the young gentleman was the injured person, and sought to recover of the lady who had jilted him certain marriage gifts, mostly in the ironmongery line, though she spoke of them generally as "sticks." "I will see you," said she to the once beloved object—well, we will not use her words, but she went "the whole length of the expression," as the phrase goes (though, indeed, it is a very brief one), "before I will part with a stick." With that inconsistency which belongs to her charming sex, while clinging to these objects of personal property with a pertinacity that would seem to prove their value, she nevertheless maintained that her swain had bought them all in "job lots" at sixpence each. The whole affair as a love-match may be said to have "gone off," and with a very unpleasant odour. And yet, though there was decidedly less of the religious element than in the former case, there was quite as little of that romance about it which the Court finds so objectionable, and to be the real cause of all the failures in matrimony.

I read that one of the evil results of the cold summer is that oysters have not grown fat. To judge by the price put upon them, however, I should think the fishmongers have. For my part, I don't care one threepenny-bit (which is what the best "natives" now cost apiece) whether these bivalves are fat or lean: they are beyond my means. "If they be not food for me, What care I how fat they be?" to alter a little what Sir John Suckling wrote of another kind of dainty. There is (or, alas! was) a sort of exhilaration derived from many oysters similar to that given by champagne, which, however, I have known to be taken with them. The last great oyster-feast I remember, I partook of at a public supper-room in the company of an old gourmand well known at the clubs, but whom nobody suspected of wearing a wig. After six dozen of them—feeling, I suppose, the need of taking something or another off before renewed exertions—he took off his head-covering and hung it, to my "hushed amaze," on the peg at the end of the partition that separated us from the next box. He never spoke of this imprudence to me, then or afterwards, but tacitly trusted to my honour not to reveal it during his lifetime; and I did not abuse his confidence. The whole expense—of the oysters—on that occasion was not more than a sovereign. The author of the "Physiologie du Goût" tells us he once attempted to give his friend Lapeste, who was passionately fond of these esculents, what he protested he had never had—"enough of them"; but when his guest had eaten thirty-two dozen the host grew impatient and ordered dinner. Those *hors d'œuvres*, at present prices, would have cost him £4 16s.

A talented young friend sends me a sonnet from the French—not generally a very acceptable sort of goods; but this particular sample is not only meritorious in itself, but very significant of the friendliness and charity with which "our lively neighbours" regard any annexation of territory made by perfidious Albion. The author of the poem is, I understand, a certain Count Borelli, formerly Colonel of the Légion Etrangère which served in Tonquin, so that he ought to understand the subject:—

ON DUTY IN BURMAH.

They bade me go. I went, alert and gay,
Past lotus fields and river banks new dress'd
And fishers fishing a calm lake—all rest.
My soldiers marched until the close of day,
Then near, from out the bamboos where it lay,
Peeped a high-reeded pagoda's gilded crest;
Bright parrots perched, where each had built its nest,
On mat-thatched huts that smiled along the way.
Great fan-leaved palms swayed lilly in the breeze;
While, darting from the medlar's shade profound,
A brilliant pigeon mounted, circling round;
The litchi fruit gleamed gold among the trees.
Below the cactus flamed, and still amidst these
The village slept. I burnt it to the ground.

The last sentence has certainly all the charm attributed to the Unexpected.

In my last "Notes" I wrote somewhat playfully of the late volume published by Dr. Anna Kingsford, under the mistaken impression that its authoress was still living. I ought, of course, to have known better; but in the book itself I found no hint of its being a posthumous work, and thereby fell into an error which I regret no less because it was a natural one.

THE COURT.

The Empress Frederick and her daughters remain the guests of the Queen at Windsor Castle, whence they occasionally make excursions in the Great Park and country around the palace. On Nov. 21 the Empress received an address from the Mayor and Corporation of Windsor. The deputation was introduced to her Imperial Majesty's presence by Count Seckendorff. The Marquis of Lorne arrived at the castle. Mdlle. Faber du Faur and Mdlle. De Perpigna dined with her Majesty and the Royal family; and the ladies and gentlemen of the household joined the Royal circle in the evening. The Queen went out with the Empress Frederick and Princess Louise (Marchioness of Lorne) and Princesses Sophie and Margaret of Prussia. Princess Louise (Marchioness of Lorne) and the Marquis of Lorne left the castle. The German Ambassador also left. Admiral Sir Alexander Milne and Major Edye were received by the Queen on the 22nd. They presented her Majesty with the Jubilee offering of the Navy and Royal Marines, consisting of models of the Britannia and the Victoria—the former a typical line-of-battle-ship when the Queen ascended the throne, and the latter the most recently constructed armour-clad battle-ship at the time of the Jubilee. Her Majesty expressed her admiration of these beautiful gifts, and of the workmanship they displayed. Other gifts were subsequently accepted. The Queen drove out in the afternoon, accompanied by the Empress Frederick and Princesses Sophie and Margaret of Prussia. The Duchess of Teck and Princess Frederica of Hanover (Baroness Von Pawel Rammingen) visited her Majesty. Sir Robert Collins arrived at the castle, and had the honour of dining with the Queen and the Royal family. Baron Reischach had the honour of being invited. The Queen drove out in the afternoon of the 23rd, accompanied by the Empress Frederick and Princess Beatrice and Princess Margaret; and her Majesty went out with the Empress Frederick on the morning of the 24th. The Queen received, as a gift from Field-Marshal the Duke of Cambridge, a marble bust of himself, sculptured by Mr. George G. Adams, F.S.A., who had the honour of submitting it to her Majesty's inspection. In the afternoon the Queen drove out, accompanied by the Empress Frederick. Mr. and Mrs. Goschen arrived at the castle, and had the honour of dining with their Majesties and the Royal family. Baron Reischach had the honour of being invited. Her Majesty and the Empress Frederick, with the Royal family and the members of the Royal household, attended Divine service in the private chapel at Windsor on Sunday morning, the 25th. The Dean of Windsor officiated, assisted by the Very Rev. C. J. Vaughan, D.D., Dean of Llandaff and Master of the Temple, who afterwards preached the sermon. The Queen drove out in the afternoon, accompanied by Princess Victoria of Prussia. Princess Christian of Schleswig-Holstein, with Princesses Victoria and Louise of Schleswig-Holstein, visited her Majesty. The Right Hon. G. J. Goschen and Mrs. Goschen and Count Seckendorff had the honour of dining with the Queen and the Royal family. On the 26th the Queen drove in her pony-carriage, accompanied by the Empress Frederick, and proceeded to the drive in the vicinity of George IV.'s Gateway, whence, sheltered by the ornamental shrubbery, the party witnessed some interesting feats of military dexterity performed by the Queen's Indian Equerry. Her Majesty received intelligence of the safe arrival of her grandchildren, Princess Margaret and Prince Arthur of Connaught, at Bombay, where they were met by the Duke and Duchess of Connaught. The new Austrian Ambassador (Count Deym), the Chilian Minister, the Nicaraguan Minister, and the Marquis of Salisbury, K.G., arrived at the castle. The Marquis of Salisbury had an audience of her Majesty. The Austrian Ambassador was introduced to the Queen, and presented his credentials, as Ambassador, to her Majesty. The Chilian Minister (Don Carlos Antunez) and the Nicaraguan Minister (Dr. Adan Cardenas) were respectively introduced, by the Marquis of Salisbury, to her Majesty, upon appointment as Ministers to the Queen's Court. On the 27th the Queen, accompanied by the Empress Frederick, travelled to town from Windsor Castle, in order to pay a visit of condolence to the family of the late Duchess of Sutherland at Stafford House. Accompanied by her daughters, and attended by the suite, the Empress Frederick left the castle in the afternoon and walked through the principal streets of Windsor to Eton College, whence her Imperial Majesty and party subsequently returned to the palace.

The Princess of Wales, with Prince Albert Victor and her daughters, left Copenhagen on the evening of Nov. 22 by special train for Korsör, en route to England, viâ Fyen, Jutland, and Germany. King Christian, the Queen, and the Danish Princes and Princesses, accompanied their visitors to the Copenhagen railway terminus, where the Danish Ministers, the Corps Diplomatique, the Court dignitaries, and local authorities were assembled. After taking a cordial farewell of her parents and relatives, the Princess, with her family, entered the train, and left amidst the cheers of the assemblage. The streets leading from the palace to the terminus, the public buildings and squares, and the railway terminus were splendidly illuminated. The Princess, accompanied by Prince Albert Victor and Princess Victoria, arrived at Marlborough House on the 24th from Denmark. Their Royal Highnesses proceeded to Sandringham in the afternoon. On Sunday, the 25th, the Prince and Princess, Prince Albert Victor, and Prince George, with Princesses Louise, Victoria, and Maud, were present at Divine service in the morning at the Church of St. Mary Magdalene, Sandringham Park. The Rev. F. Hervey, Rector of Sandringham, and Domestic Chaplain to the Prince and Princess, officiated, assisted by the Rev. J. N. Dalton, Canon of Windsor, who preached the sermon. On the 26th the Comte and Comtesse de Paris and Princess Hélène arrived at Sandringham on a visit to the Prince and Princess. The Duke of Cambridge also arrived at Sandringham. The Prince of Wales, Princes Albert Victor and George, the Comte de Paris, the Duke of Cambridge, and other guests have commenced shooting.

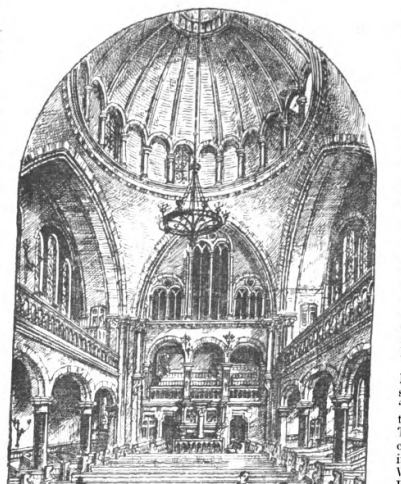
Prince and Princess Christian have returned to Cumberland Lodge from Germany.

Lord Brassey has presented a beautiful service of communion plate for use in the Savoy Chapel in memory of Lady Brassey, who was for many years a member of the congregation.

By the accidental mistake of one photograph for another we last week described the portrait of the Rev. G. H. Sumner, D.D., late Archdeacon and Canon of Winchester, the new Bishop of Guildford, as that of the Rev. Alfred Earle, late Archdeacon of Totnes and Canon of Exeter, whose appointment to a suffragan bishopric in the diocese of London was at first announced in connection with the title of "Bishop of Guildford," but who is to bear the new title of "Bishop of Marlborough."

THE LATE EARL OF DEVON.

The death of this nobleman, who was personally held in much esteem and had filled offices of public usefulness, was recorded in the "Obituary" last week. The Right Hon. William Reginald Courtenay, of Powderham Castle, near Exeter, was born in 1807, eldest son of the tenth Earl of Devon, and of one of the most ancient noble families in England. An ancestor of this family, among the Crusaders, was elevated to the throne of the Eastern empire at Constantinople. They long exercised great hereditary influence in the county of Devon, but this has from various causes declined. The late Earl was educated at Christ Church College, Oxford, where he gained a fellowship; he served as one of the inspectors of the Poor Law Board, and in 1852 was appointed by Lord Aberdeen's Government to the secretaryship of that department. He was, as Lord Courtenay, M.P. for South Devon from 1841 to 1849, acting with the Peelite party as a Liberal-Conservative. In 1859, he succeeded to the peerage; in 1866, joining Lord Derby's Government, he became Chancellor of the Duchy of Lancaster, and afterwards President of the Poor Law Board. He long performed, with much care and diligence, the functions of Chairman of the Quarter Sessions for Devonshire, and a statue was erected to his honour in the city of Exeter. His Lordship married a daughter of the late Earl Fortescue, and has left a son to succeed to the earldom. The Portrait is from a photograph by Messrs. Fradelle and Young.



THE LATE EARL OF DEVON.

NEW WELSH PRESBYTERIAN CHAPEL.

The Welsh Presbyterian congregation, whose pastor is the Rev. R. E. Morris, formerly worshipping in Nassau-street, Soho, whither they emigrated from Jewin-crescent, City of London, some thirty-five years ago, have erected a new chapel in Charing-cross-road, Shaftesbury-avenue, on a site of about 4400 superficial feet. The greater part is occupied by the chapel, the front of which is towards Charing-cross-road. In plan this building is cruciform, the central space being covered by a dome, and the arms by pointed vaults. Beneath the dome, and in the crown of it, are ornamental arcades pierced with numerous windows, casting a flood of light down into the middle of the chapel. This arrangement naturally results, on the exterior, in an octagonal lantern-tower, about 30 ft. in diameter. In the centre of the tower a ventilating shaft is carried up, with an arrangement for exhausting the air from the building, while fresh air is supplied by a number of Tobin ventilators in different parts of the building. The chapel seats about 500; and there is a provision for a future gallery behind the pulpit, which will give space for a good organ and thirty additional sittings.

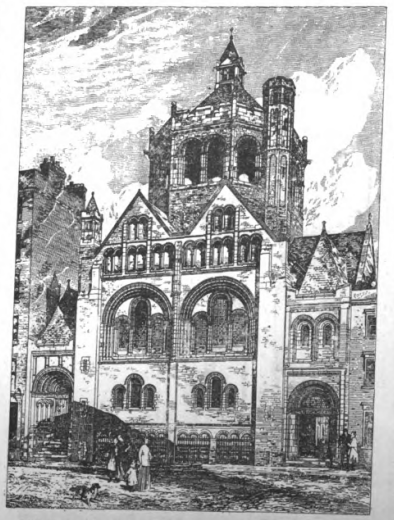
Under the chapel is a school-room or lecture-hall which will seat from 350 to 400 persons. Communicating with this are various class-rooms and offices, and a kitchen, with the necessary appliances for tea-meetings. These last occupy the basement storey of that part of the building which has a frontage towards Shaftesbury-avenue. This, which only joins the chapel by a passage on each floor, is treated as a distinct feature in the design. The ground floor is taken up with the minister's and deacons' vestries, the main entrance from the avenue, two staircases, and a ladies' room with lavatory adjoining. The first-floor contains a reading-room and library, and the floor above has a large and well-lighted room, divisible into two, to be used for such purposes as may be decided upon hereafter by the church. The upper floor and the attic form a house for the caretaker.

The chapel is faced externally with hammer-dressed Yorkshire stone; the architectural details are in Ancaster stone. The interior is lined with light-red Fareham bricks, with dressings of Ruabon bricks and of Corsham stone. The style of the building is the later Romanesque, such as prevailed towards the end of the twelfth century; and the work is carried out everywhere in a thoroughly substantial and permanent manner. The architect is Mr. James Cubitt; Messrs. Peto Brothers are the builders.

WELSH PRESBYTERIAN CHAPEL IN SHAFTESBURY-AVENUE.

CRYSTAL PALACE PIGEON, POULTRY, AND RABBIT SHOW.

The twentieth yearly National Show of these fancy birds and beasts, including cavies or guinea-pigs, was held at the Crystal Palace from Monday, Nov. 19, to the following Thursday. The aggregate number of living creatures exhibited was 6815, or nearly 500 more than the show of last year, while the varieties and sub-varieties of breeds and curiosities of crossings have so increased that the classes have risen from 437 in 1887 to 480 in 1888. This shows how subtle are the differences between the many families and groups of pigeons, cocks and hens, and rabbits. Some of them are natural groups, others are the artificial result of close, scientific, and experimental breeding study of minute peculiarities of structure, size, colour, and habits. Of poultry, there are the Spanish, the Cochins, the Brahmas, the Houdans, the Hamburghs, the Polish, the Dorkings, the French, the Bantams, the Game, the Minorcas, the Malays, the Andalusians, the Leghorns, the Black Javas and Orpingtons, the Wyandottes, and several others; besides ducks, geese, and turkeys. The pigeons comprise pouters, carriers, tumblers, fantails, turbits, barbs, dragons, Norwich croppers, Antwerps, Jacobins, trumpeters, nuns, runts, ruffs, frills, blondinettes and satinettes, and sundry toy varieties; to which magpies were added. Among the rabbits, only mentioning the "Belgian hares," were lop-ears, Dutch, Angoras, Himalayans, Flemish giants, fawn-coloured, silver, silver-grey, silver-brown, and silver-cream; while the cavies included Peruvian guinea-pigs, Abyssinian, tortoise-shell, black and white, short-haired and long-haired; some of which, and some of the fantail pigeons, are represented in our Artist's Sketches. About thirty judges were employed to decide the merits of candidates for prizes in the many classes of poultry, pigeons, rabbits, and cavies; and the mere lists of their awards and commendations would fill several columns. Mr. J. Jennings and Mr. J. E. Aldred were the judges of rabbits, which were exhibited to the number of 427; Mr. Kempster Knight was the judge of guinea-pigs. Some of the finest poultry was sold at high prices.



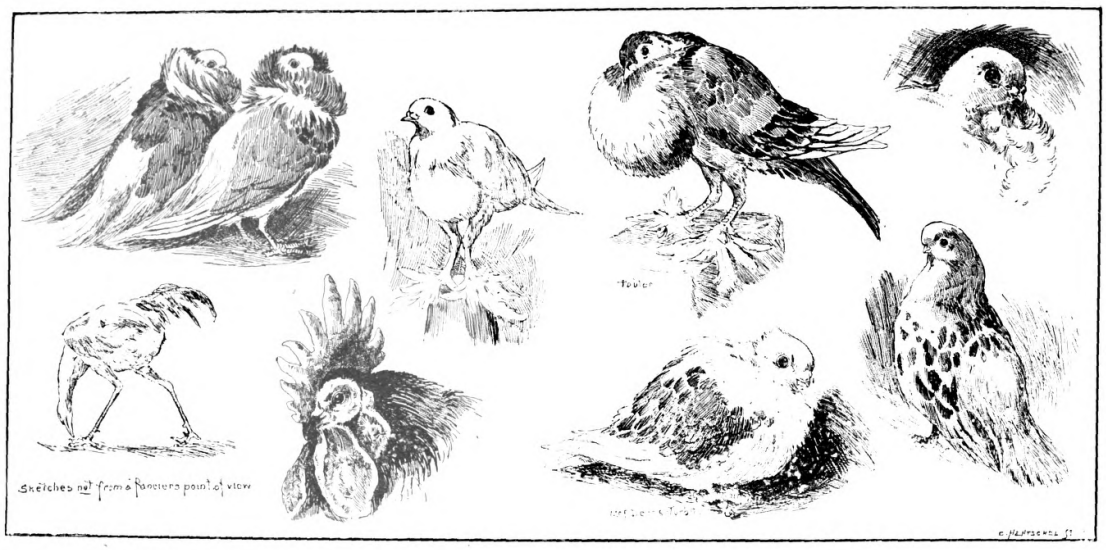
We append lists of the pigeons, and of the rabbits and guinea-pigs, which appear in the Sketches on another page. They are here numbered in the order in which they stand from the left to the right-hand side of the page, not including those in the upper Engraving, of which we give no special list:—

PIGEONS.

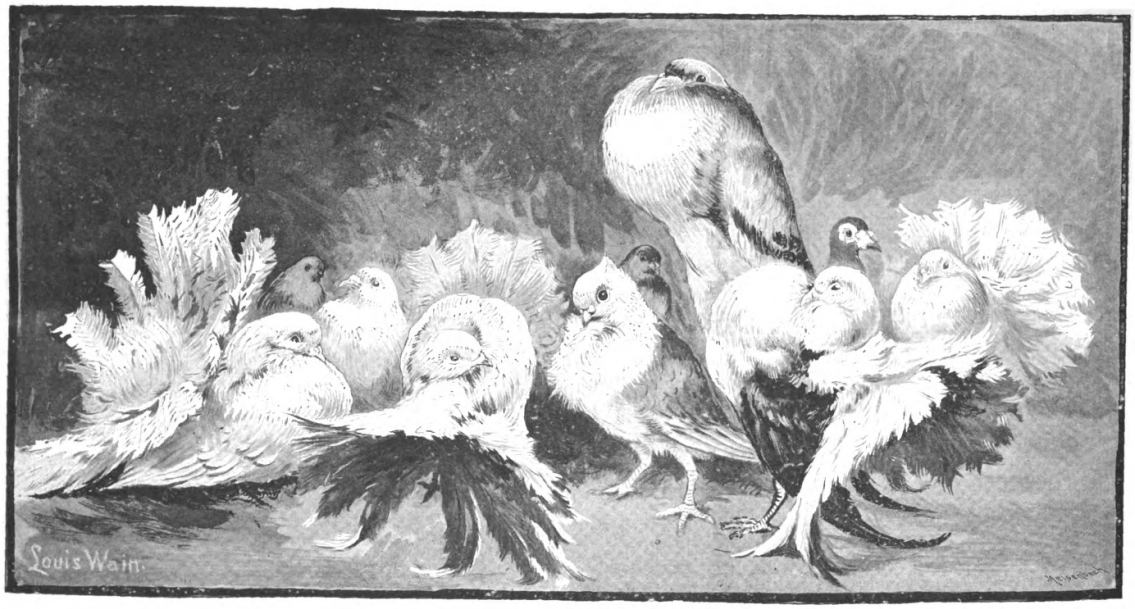
1. Mr. W. Stevenson's White Fantail, cock.
2. Mrs. J. F. Loversidge's White Fantail, hen.
3. Mrs. H. Chapman's Fantail hen (3rd prize).
4. Mr. A. M. Sutcliffe's Silver Blue Turbit (1st prize).
5. Mr. W. Law's Blue Pied Pouter (1st prize and Cup).
6. Mr. W. Stevenson's white and black hen Fantails (1st and 2nd prizes).
7. Mr. J. Moore's White Fantail hen (2nd prize).

RABBITS AND GUINEA-PIGS.

1. Mr. F. Graveley's female Peruvian Guinea-pig (1st prize, Medal).
2. Mr. W. Read's Peruvian Guinea-pig, female.
3. Mr. J. G. Ravenor's Peruvian Guinea-pig.
4. Mr. M. Humphrey's Flemish Giant Buck Rabbit (1st prize, Cup).
5. Mr. C. A. House's Abyssinian Tortoise-shell Cavy (2nd prize).
6. Mr. W. C. O. Ellis's Peruvian Guinea-pig.



WELSH PRESBYTERIAN CHAPEL IN SHAFTESBURY-AVENUE.



THE PLAYHOUSES.

It is the fashion with modern audiences, in these impatient times, to visit the sins of the players entirely on the unfortunate author. If a scene drags purely by bad playing, if a character is assumed by someone who thoroughly misunderstands it, if actors and actresses are found hopelessly floundering about and casting appealing glances at the prompter; when the inexperienced eye can at once detect bad casting, insufficient rehearsals, and the absence of a head-piece in the direction of the stage, there is but one scapegoat—the author. People in the stalls shudder, and murmur "What rubbish!"; the stern censors in the pit catcall and cry "Get on!"; boys in the gallery "Boo-hoo!" and chuckle at the thought that there will be some "author-baiting" by-and-by—that is to say, that some miserable gentleman will be called out to be execrated because the players do not know their words or understand their parts. A very good example of this want of discrimination was shown in the case of a play called "The Alderman," adapted by Mr. James Mortimer from "L'Héritage de M. Plumet," a once famous French comedy of the lighter kind—not exactly a farcical comedy, as we understand the term now-a-days—but a bright piece with an occasional touch of serious interest. Originally Mr. Mortimer produced "The Alderman" at a Criterion matinée. On the whole, it was exceedingly well played. Mr. George Barrett made a study of the good-natured old gentleman who firmly believes that he has a will of his own, but is, in reality, swayed by the last voice. A scene between Mr. Brandon Thomas and Mr. Julian Cross—who appeared as two old soldiers, pathetically fond of their niece and ward—was so well acted that it touched the house, and displayed considerable emotional faculty on the part of the players. In fact, the comedy was so promising that it might well have been selected for an actor like Mr. Toole, and his clever little company; but submitted to an unfortunate cast the little play goes all to pieces. Mr. Ashley—otherwise an excellent actor—is wholly unsuited to the Alderman: he plays it as light comedy instead of strong character. The two old soldiers who made one audience cry make another audience laugh when the characters are taken by Mr. Frank Kinghorne and Mr. W. H. Pennington. A bright ingénue, who could be played to perfection by an actress like Miss Fanny Brough, is turned into a smart Yankee "gal" who interlards her conversation with American facetiæ that sound as if they were borrowed from the amusement corner of a family paper. With the exception of Mr. Royce Carleton, who has a head on his shoulders, and Miss Gabrielle Goldney, who bids fair to be an excellent comedy actress, there is scarcely one in the cast who even approximately approaches the author's idea. The consequence is that the play falls to pieces, and the author's work is condemned instead of his, or the manager's, want of judgment in collecting people to play characters for which they are ill suited, either physically or mentally. According to our present system, actors and actresses are taught to go on the stage, and play themselves, whilst they recite words written by other people. They seldom dream of disguising their own personality for the purpose of the play, which is one of the provinces of the actor. Why are they called actors? They certainly do not act anything or become anybody. They are simply Mr. So-and-So in another wig or Miss So-and-So in another gown. It is quite right to condemn "The Alderman," and "A White Lie" also, for the matter of that, as played at the Jodrell Theatre, but not because they are bad plays, or could not be made good ones. They should be condemned because the acting displayed in them is quite beneath what the public has a right to expect at a high-priced theatre. It is a perfect farce to charge West-End prices for common provincial goods. If theatres like the Jodrell are ever to succeed the prices should be reduced 50 per cent. It is difficult to believe that the company at the Jodrell can cost so much as to necessitate the same charges as are made at the Lyceum, the Haymarket, or the Court.

Another instance of conspicuous bad playing is found in Mr. Jocelyn Brandon's English version of Daudet's "L'Arlésienne." It is so easy to shrug the shoulders and talk of "rubbish," and say that "the public will not stand this sort of thing," when the play has had no chance given it of success. This delightful play, thanks to good acting and Bizet's enchanting music, has more than once been brilliantly successful in Paris. But there it was finely acted and beautifully done. We do not say this simply because it is a French play, for many French plays are execrably performed. But we do maintain that if the passionate mother had been played by Mrs. Kendal, and if the romance had been realised by such a stage-manager as Mr. Hare, if the acting had been forcible and the direction capable, a very different tale might have been told. But because "The Love that Kills" is badly cast, badly acted, badly directed, and clumsily misunderstood by almost everyone concerned, the whole weight of the failure is put on the wrong shoulders. Mr. Jocelyn Brandon has done his work well enough; it is not his fault. We do not believe at all in the introduction of the fatal Arlesian woman. The whole dramatic idea, the whole beauty of the play, vanishes when she appears. But young authors have to yield to vulgar prejudice. The people who influence them show that they know about as much of poetry as of Greek roots. There is little use in pointing out the individual instances of bad playing in this pretty play. The poetic key was never once touched. The whole thing was out of tune, and no patching or piecing could make it better.

Mr. Alfred Calmour's "Widow Winsome," produced and excellently played at a Criterion matinée, is a graceful and pretty fancy enough, but is, we fear, too delicate in structure and scarcely original enough in idea to bear the tossing of a modern tide of criticism. The angry father, who protects his daughter's honour, and, at the same time, induces her to marry for money; the young spark, who is reformed to virtuous ways and a decent life by the sight of an angel face; the innocent maiden, who feels that by means of her purity she can have influence over a handsome gallant who is recklessly going to the dogs; the proud lady of fashion, who makes open advances to a handsome youth, and who proves the truth of the old adage, "Hell has no fury like a woman scorned;"—all these have figured before in many a well-known and well-worn comedy, so that Mr. Calmour's play sounds more like an echo of what has been than a promise of something new and startling—some fresh thought, some original idea. We discard old comedy, not because it is uninteresting, but because it is ineffective; and, truth to tell, Mr. Calmour's play leaves us exactly where we were before he wrote the "Widow Winsome." He had the advantage of a strong cast, and some excellent players—the ripe old comedy manner of Mr. William Farren, the picturesque and gallant appearance of Mr. Conway, the merry touches of Mr. Fred Thorne, the flashing eyes and aristocratic manner of Miss Gertrude Kingston, the neat playing of Mr. George Giddens. Mr. Cyril Maude and Miss Laura Linden were of the greatest advantage to the author, whose plays have never suffered from insufficient representation. But the play owed its greatest charm to the acting of Miss Kate Rorke, who brought the first act to a close with an outburst of passionate acting, as good as anything she has ever done. There was nothing flimsy or artificial about it.

THE PRINCE OF WALES AT ALLSOPP'S BREWERY, BURTON-ON-TRENT.

THE PRINCE OF WALES AT ALLSOPP'S BREWERY.

His Royal Highness the Prince of Wales, from Monday, Nov. 12, to Thursday, the 15th, was the guest of Lord and Lady Hindlip, at Doveridge Hall, near Uttoxeter. Lord Hindlip, formerly Mr. S. C. Allsopp, M.P. for Taunton, is the head of the great firm of Messrs. Samuel Allsopp and Sons, brewers, of Burton-on-Trent. The Prince of Wales ended his visit to Doveridge Hall by going to Burton, with his host and hostess and several friends—the Duchess of Manchester, Earl Dudley, Lady Randolph Churchill, Lady Florence Dunconbe, Count Kinsky, and Mr. Sassoon being of the party—to see the famous brewery. General Teesdale attended his Royal Highness. At the Uttoxeter railway station, from which they travelled to Burton by a special train, six hundred school-children were assembled on the platform to sing "God bless the Prince of Wales!" At Burton, where the train arrived at noon, the Mayor of that town, Councillor Harrison, with the Mayoress, met his Royal Highness; but no address from the Municipality was presented. The Chief Constable of Staffordshire, the Hon. Captain G. A. Anson, was also present. Several directors of the great brewing firm (which is a Limited Liability Company)—namely, the Hon. George Allsopp, M.P., Captain H. Townshend, Mr. J. T. Poyser, and Mr. J. C. Grinling—received their visitors at the railway station, and they all walked to the brewery, a few hundred yards distant. Flags were displayed over the principal buildings in the town, and the church bells were set ringing; the people in the street, and on the railway bridge, greeted his Royal Highness with cheers; but it was not a formal public visit to the borough of Burton-on-Trent.

The privileged visitors and others in the brewery offices were made aware of the Prince's arrival by vigorous cheering from without, and the explosion of a hundred and one fog signals, given as a "brewery salute," in the adjoining yard. Almost immediately afterwards, his Royal Highness was received at the entrance to the offices by the officials of the company—Mr. J. Ogden, the secretary, and Councillor Auty, who were presented to the Prince by the Hon. George Allsopp. The tour of inspection was at once entered upon, those in attendance upon his Royal Highness including the directors and the officials of the company already referred to, Councillor Stirk (head-brewer), Mr. T. C. Martin, Mr. Wood (cashier), Mr. E. Grinling, Mr. Starey (malting department), Mr. Strachan (engineer), Mr. H. G. Anderson, and Captain the Hon. G. Anson. The Hon. Percy Allsopp, M.P., another of the directors, was prevented from joining the party through, we regret to say, ill-health, and it is feared that his illness is of such a nature that his absence from England for a month or two will be rendered necessary. Leaving the offices by the rear, and passing through the racking-room, the party proceeded along the yard to No. 13 malting-room, where Mr. Poyser explained to his Royal Highness the details of the withering process which the grain was then undergoing, and after an examination of the room in which the barley is screened, a move was made, under the guidance of the head-brewer, Councillor Stirk—who from this part took over the duties of guide—to the mash-room, in which were located eight tuns, each containing something like 160 quarters. Here a brief but exceedingly interesting ceremony took place. His Royal Highness, approaching the mash-tun, commenced a brew of pale ale by turning on the water and the malt. After the mashing apparatus had been duly inspected, a move was made to the wort-coppers—the warm atmosphere of which department induced his Royal Highness to divest himself of his ulster. In this department there are ten receptacles, each of which is capable of containing a hundred barrels. Returning through the mash-room, the grinding mills, of which in the particular room visited there are two, each of which grinds 25 quarters per hour, next received attention, and his Royal Highness compared the ground malt with that which was about to undergo the grinding process. Retracing their steps, the party crossed the bridge, passed through the fermenting-room, and gained the "round" room (where, it was pointed out, the "rounds," about 200 in number, hold each 120 barrels), and then, taking a glance at the coolers and refrigerators, descended into union-room "A." His Royal Highness had meantime, with the assistance of the Hon. George Allsopp, made some additional investigations into the operation of brewing. The Prince, together with the other members of the party, having satisfied his curiosity over the barm-tub, traversed the bridge again, and arrived at union-room "B," which contains more than 1400 casks. Proceeding by way of the centre stairs, the hop-room was reached, and here some time was spent in an examination of something like 2000 bales and pockets of magnificent hops, his Royal Highness especially making a minute inspection of the valuable growth. At length the racking-room was regained, and by means of an iron staircase the company ascended to the stores, with their contents of 30,000 barrels. The hydraulic hoists, by which the barrels are conveyed to the loading stage above, and vice-versâ, demanded a little attention, and the party were then escorted to the western end of the stores. Here a table had been deposited, and on it dainty morsels of cheese, crisp celery, and small loaves and biscuits were displayed, while sample glasses of various kinds of ale were handed round, these being drawn by Mr. Booth, ale storekeeper. The Prince partook of a glass of bitter eight months old, sampled a portion of the ale which was brewed specially for Captain Sir George Nares for use in the Arctic expedition fifteen years ago, and tasted some double stout three months old. With the bitter ale his Royal Highness appeared particularly pleased, and his approbation found expression in the remark, addressed to the Duchess of Manchester, "This is delicious!" while the ale of a greater age also came in for a share of the Royal favour. The distinguished visitors enjoyed with evident relish this novel interval in the morning's proceedings, sampling the various brews with the keen sense of connoisseurs; and it is matter for congratulation, not less for Messrs. Samuel Allsopp and Sons, Limited, than for the town at large, that the ales were in the condition which is best described as "the pink of perfection." The Royal inspection of the brewery was now at an end. It occupied fully an hour and a half, but notwithstanding the fatigue which "doing" an enormous brewery like that of Messrs. Samuel Allsopp and Sons must necessarily involve, his Royal Highness did not experience the slightest inconvenience. His interest in the brewery never for a moment waned, and as each department was entered he manifested a keen desire to be made acquainted with its every detail. Between three and four thousand of the general public were admitted by ticket to the brewery premises, and during his progress from room to room the Prince was cheered again and again, while from the workpeople and staff similar demonstrations of loyalty proceeded all along the route, as it were; his Royal Highness's reception inside the brewery was, in fact, as cordial and enthusiastic as it was outside, and he repeatedly returned the salutations. The public were distributed in sections throughout the buildings, and thus every facility was afforded for a glimpse of the Heir Apparent. Upon leaving the stores the Prince was conducted up the spiral staircase to the board-room, and, with the other visitors, entertained at luncheon by Lord Hindlip. The table, of a horseshoe form, was adorned with valuable plate and beautiful floral decorations. The inside edges were bordered with miniature ferns, and from the floor in the centre rose a group of graceful palms, whose sombre hues were here and there relieved by the delicate bloom of the arum lily. Immediately opposite his Royal Highness reposed, on a piece of prettily-designed electro-plate, a charming bouquet composed largely of Roman hyacinths intertwined with ferns, and down the table on each side beautifully-arranged bouquets, palms, ferns, and orange-trees were judiciously disposed. The fireplace was for the occasion turned into a miniature conservatory—palms and maidenhair ferns, primulas and begonias, being freely distributed thereabout; while over the mantelpiece hung a splendid painting of his Royal Highness, represented as the Grand Master of Masons in England. Immediately over the entrance to the board-room, on the inner side, was an artistically-arranged crescent of flags, and the doors were hung with rich tapestry. Mr. J. T. Poyser's office, which closely adjoins the board-room, had been fitted up in an elegant manner as a ladies' boudoir. The furniture was of the Queen Anne pattern, and was upholstered in rich crimson velvet. It was also furnished with arras hangings, a beautiful Indian screen, and a choice overmantel, while a magnificent bouquet rested on an occasional-table. The corridor by which the boudoir is approached was made gay with a number of small shrubs. The Hon. George Allsopp placed his private room at the disposal of the Prince.

Perhaps one of the most pleasant incidents in the scene within the brewery occurred just as his Royal Highness was preparing to leave. A number of the staff and employés had gathered in the offices near the principal entrance, and sang "God bless the Prince of Wales," Mr. J. Tomlinson taking the solo, and the chorus being rendered in the heartiest manner possible by all present. The Prince passed out during this interesting manifestation of loyalty, and appeared much impressed by it. The arrangements for the inspection of the brewery were made by Councillor Stirk, while the plants for the Prince's room were supplied by Mr. H. Barker, Horninglow-cross.

There was again a large crowd of people on the railway bridge as the Prince returned to the station, and when the train started for Derby, with the saloon carriage to be transferred there to a Midland Railway train for London, "brewery salutes" of fog signals were fired, in Messrs. Allsopp's brewery. His Royal Highness, in taking leave of Lord and Lady Hindlip, and of the Hon. George Allsopp, again expressed his satisfaction at having inspected the great establishment which is renowned all over the world.

There has been an excited sitting in the French Chamber, owing to M. Wilson, the son-in-law of M. Grévy, resuming a seat he had not occupied for nearly a year. The members generally manifested their objection to M. Wilson's presence, and the excitement was increased when the adjournment of the Chamber was moved. The sitting was subsequently suspended, and the President left the chair; but on his resuming it, three-quarters of an hour afterwards, M Wilson was still in his seat, and the discussion of the Budget was proceeded with.

The Emperor William opened the German Reichstag on Nov. 22. His tone was confident as to the preservation of peace, and he alluded with satisfaction to the English union with him to suppress the African slave trade. The Reichstag have elected the Conservative Deputy Herr von Levetzow its President, the National Liberal Dr. Buhl First Vice-President, and the Imperialist Baron von Unruhe-Bomst Second Vice-President. The Emperor, on the 24th, entertained his princely guests at supper in the Old Palace, Berlin; and on Sunday, the 25th, their Majesties attended a memorial service in the Garrison Church in this city. Archduke Ferdinand d'Este has taken his departure for Vienna. On the 26th the Emperor received the President and Vice-Presidents of the Reichstag. His Majesty is suffering from a slight cold.

M. Hertenstein, President of the Swiss Confederation, died on Nov. 27 from the effects of a surgical operation.

St. Petersburg was splendidly decorated on Nov. 26 in honour of the Czarina's birthday. A family breakfast was given at the Anitchkoff Palace; but only the Danish Minister and his family were invited.—On the same day the King and Queen of the Hellenes, accompanied by the Duke of Sparta, Princess Alexandra, and the Grand Duke Paul of Russia, were present at a celebration of the "Te Deum" in the Russian church, at Athens, in commemoration of the birthday of the Empress of Russia. Their Majesties subsequently lunched with the Russian Minister.

A banquet was given by the Sultan in the Yildiz Palace on Nov. 26 in honour of Sir William White, British Ambassador.

The Hon. Michael Herbert, British Chargé d'Affaires at Washington, married, on Nov. 27, Miss Belle Wilson, daughter of Mr. Richard Wilson, at St. Bartholomew's Church, New York. There were a thousand invitations, and a brilliant gathering. Mr. Arthur Herbert was the bridegroom's best man.—The sculling-race between Teemer and O'Connor for £1000 took place on the Potomac River, over a course of a mile and a half and return, on Nov. 24, O'Connor winning by ten lengths.

Mr. Russell Lowell, ex-American Plenipotentiary for England, left Liverpool for New York on Nov. 22, in the Cunard steamer Pavonia.

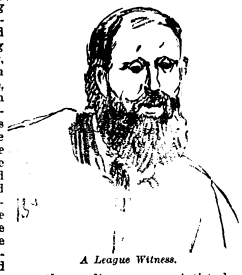
Colonel R. N. F. Kingscote represented the Prince of Wales at the funeral, on Nov. 24, of Viscount Portman.

The Bishop of London has opened a building erected in Old Nichol-street, Shoreditch, to serve as church, mission-room, and club for that densely-populated district.

Sentence of five years' penal servitude has been passed at the Newcastle Assizes upon Charles Richardson and George Egdell, who pleaded guilty to a burglary at Edlingham Vicarage in 1879, for which two men—Brannigan and Murphy—have wrongly suffered nearly ten years' penal servitude.

The Lord Chancellor on Nov. 28 unveiled the marble bust to the memory of the late Sir George Jessel, Master of the Rolls, erected on a pedestal close to one of the columns outside the Lord Chief Justice of England's Court in the Royal Courts of Justice.

Mr. Walter Browne's little play called, "The Bo'sun's Mate," at St. George's Hall, is not quite up to the level of what is usually expected at the German Reed entertainment. Thin, invertebrate, and amateurish, it is, no doubt, a creditable effort for a first attempt; the old-fashioned dresses pleased the eye, and Mr. Caldicott's music is pretty enough; but the capital little company has to labour to get a laugh, and the love-story dramatically illustrated is not very new or amusing. However, Mr. German Reed, Miss Fanny Holland, Miss Kate Tully, Mr. Ernest Laws, and Mr. Walter Browne, the author, work with a will, sing brightly, dance cheerfully, and Mr. Corney Grain comes on at the right minute to make the people roar with laughter with his sketch of "John Bull Abroad."



THE PARNELL INQUIRY COMMISSION.

The Judicial Commission appointed to investigate the "charges and allegations" set forth in the *Times* against Mr. Parnell and other Irish members of the Land League and the National League held further sittings at the Royal Courts of Justice on Wednesday, Nov. 21, on Thursday and Friday, and several days in the following week. The Judges are Sir James Hannen, Mr. Justice Day, and Mr. Justice A. L. Smith. The first business on the Wednesday was to pass sentence on Mr. Edward Harrington, M.P., who is proprietor of a local newspaper, the *Kerry Sentinel*, for an act of contempt of Court brought under the notice of the Judges by the Attorney-General on the day before. This was the publication, on Nov. 14, of an article in which the Judges were said to be "showing the measles now," and were accused of "manifest prejudice," "evident bias," unfairness, browbeating of witnesses, and permitting the police to swear falsely without reproof; and it was added, "The Commission is the creature of the Government and the *Times*' conspirators." It was stated next day by Mr. R. T. Reid, the Counsel for Mr. Edward Harrington, that his client had refused to follow his advice or to offer any apology; and Mr. Edward Harrington, when called on by the Court, replied that he had nothing to say, and that he would accept the responsibility. The Judges then retired for ten minutes' consultation; and, on their return into court, the President, Sir James Hannen, said that, although personally they would have been inclined to pass over mere insults addressed to themselves, it was their painful duty to impose a punishment for such a serious contempt of their authority, and he therefore sentenced Mr. Edward Harrington to pay a fine of £500 to the Queen.

Sullivan, a Process-Server.

The examination of witnesses in support of the allegations made by the *Times* against the Land League and the National League, in "Parnellism and Crime," was continued by the Attorney-General, Sir Henry James, and Mr. Atkinson; and they were cross-examined by Sir Charles Russell, Mr. Lockwood, Mr. Reid, Mr. T. Harrington, and sometimes by Mr. Davitt and Mr. Biggar. One of the witnesses on the Tuesday and Wednesday was Miss Lizzie Curtin, now post-mistress at Wicklow, but who was living with her father and mother at Castle Farm, in Kerry, in November, 1885, when her father was killed in fighting with a gang of Moonlighters who attacked his house. This young lady and her sister, Miss Nora Curtin, with their brother George, bravely struggled with the dastardly assailants, and afterwards gave evidence at the trial, for which the whole family were boycotted and exposed to cruel insult and persecution. The appearance of Lizzie Curtin and George Curtin before the Commissioners of Inquiry therefore excited no little interest among the audience; our Artist has sketched their portraits, and likewise that of Miss Nora Fitzmaurice, of Ahabeg, Lixnaw, in Kerry, who described the murder of her father, on Jan. 27, 1887, when she was with him going on a car to Listowell fair. Her father was murdered because he had taken a portion of land from which her uncle had been evicted, and he had been denounced by a resolution of the Lixnaw branch of the Land League published in the *Kerry Sentinel*. After her father's death, when Miss Fitzmaurice went to church, fifty or sixty of the congregation walked out, and she was afraid to go to church any more—the same treatment that Miss Curtin and her sister had endured. The evidence of Mr. Maurice Leonard, a Justice of the Peace, agent for Lord Kenmare's estates in Kerry, and formerly assistant to Mr. S. M. Hussey, the most extensive land-agent in that part of Ireland, occupied considerable time on Wednesday and Thursday. It was of some importance as proving the intimidation exercised by the Land League over tenants who were not only quite able, but very willing and anxious, to pay their rents, and who frequently wrote letters to the agent begging that the rent might be paid secretly, and that he should pretend to be taking legal proceedings against them, as if they had not paid, so as to deceive the Land League, of which they were in terror for their lives. A district inspector of police, Mr. Huggins, produced a number of ferocious threatening letters and placards, in which notice was given that particular persons, who disobeyed the orders of the League, would be shot by "Captain Moonlight," and there was a long list of actual outrages in Kerry. Mr. Teahan, of Tralee, cattle-dealer and hotel-keeper, a shrewd, hard-headed, indomitable man, who had made money at the mines in South Africa, gave an amusing account of his own conflict with the Land League. The inquiry was resumed on Tuesday, Nov. 27, which was the twentieth sitting, and it will probably not be finished by the end of the year.

A League Witness.

Mr. Monro, C.B., has been appointed Chief Commissioner of the Metropolitan Police.

Mr. Frank Whittaker Bush, Q.C., has been elected a Bencher of Lincoln's Inn, in place of the late Mr. E. Bazalgette, Q.C.

Lord Brassey opened a Mid-London Exhibition of Art and Manufactures on Nov. 27 in the lecture-hall of the Congregational Church, City-road.

The bulletin on Tuesday night, Nov. 27, regarding the condition of Mr. Bright was of a favourable character. The doctors reported an improvement in the state of the lung, and an accession to the general strength, while the constitutional complaint was somewhat better.

An Exhibition of Women's Art Industries and Inventions was opened on Nov. 26 at Hastings by Mrs. Lucas Shadwell, in the absence of Viscountess Hampden, who was prevented from undertaking the ceremony by a domestic bereavement. Viscount Hampden, who is Lord Lieutenant of the county, gave an address

A Hard Witness.

Sir R. Blennerhasset's Steward.

Sergeant Hennessy, Royal Irish Constabulary.

Mr. Atkinson, Q.C.

Matt. Harris, M.P.

"Silence!"

An Objecting Witness.

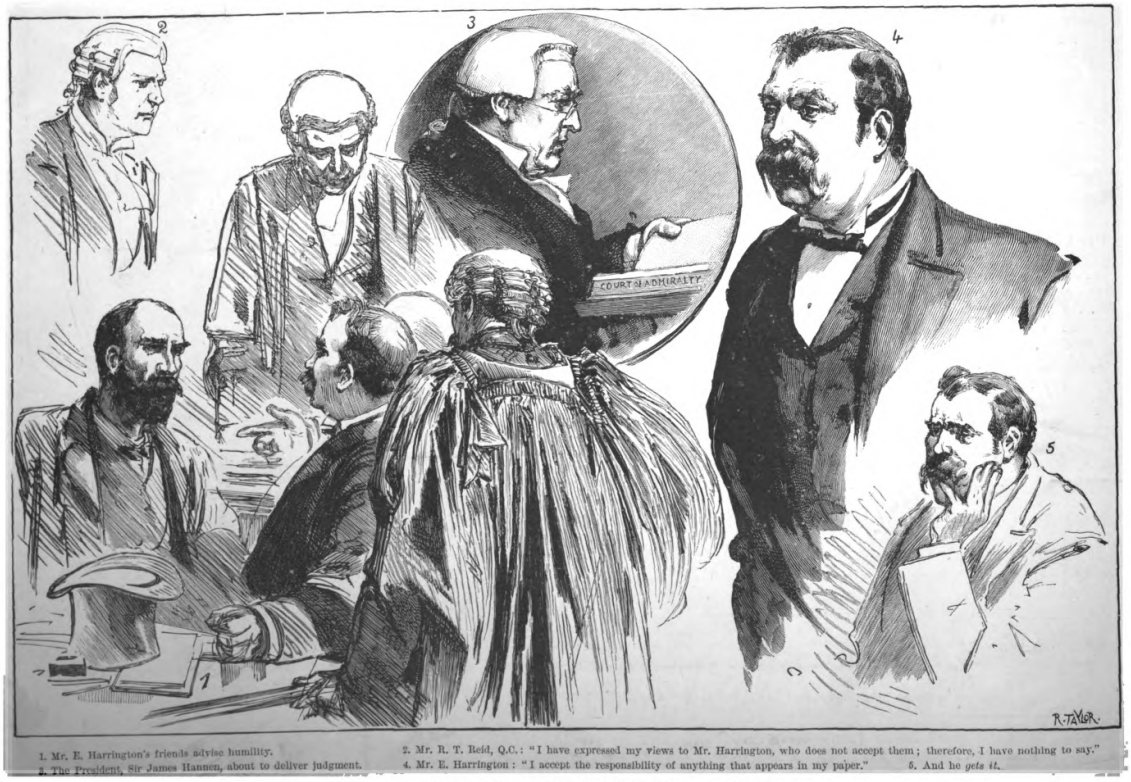
Witnesses—Galway Women.

THE PARNELL INQUIRY COMMISSION: SKETCHES IN COURT.

Miss Lizzie Curtin

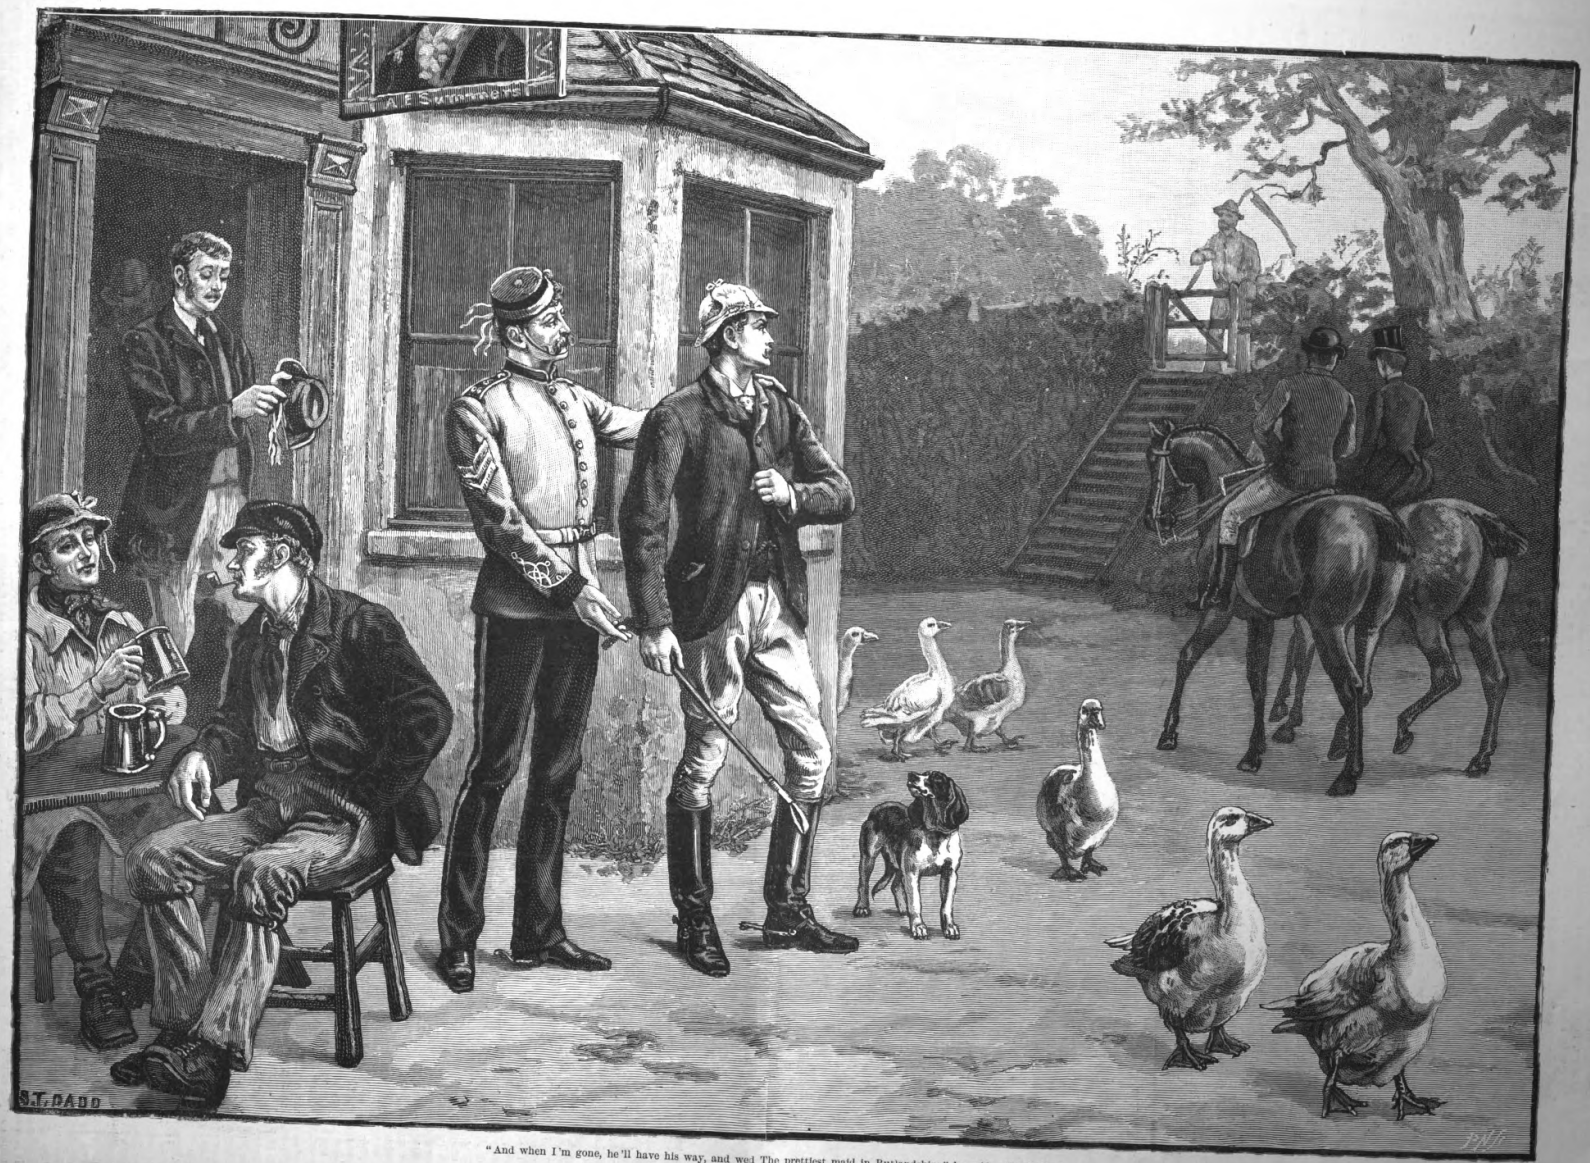
Miss Nora Fitzmaurice.

George Curtin.



"I know nothing about the Ligue."

Pat Heming.



One of the Royal Irish Constabulary.

1. Mr. E. Harrington's friends advise humility. 2. Mr. R. T. Reid, Q.C.: "I have expressed my views to Mr. Harrington, who does not accept them; therefore, I have nothing to say."
3. The President, Sir James Hannen, about to deliver judgment. 4. Mr. E. Harrington: "I accept the responsibility of anything that appears in my paper." 5. And he *gets it.*

CONTEMPT OF COURT: MR. EDWARD HARRINGTON, M.P., FINED £500.

THE PARNELL INQUIRY COMMISSION: SKETCHES IN COURT.

"And when I'm gone, he'll have his way, and wed The prettiest maid in Rutlandshire," he said.—*Old Ballad.*

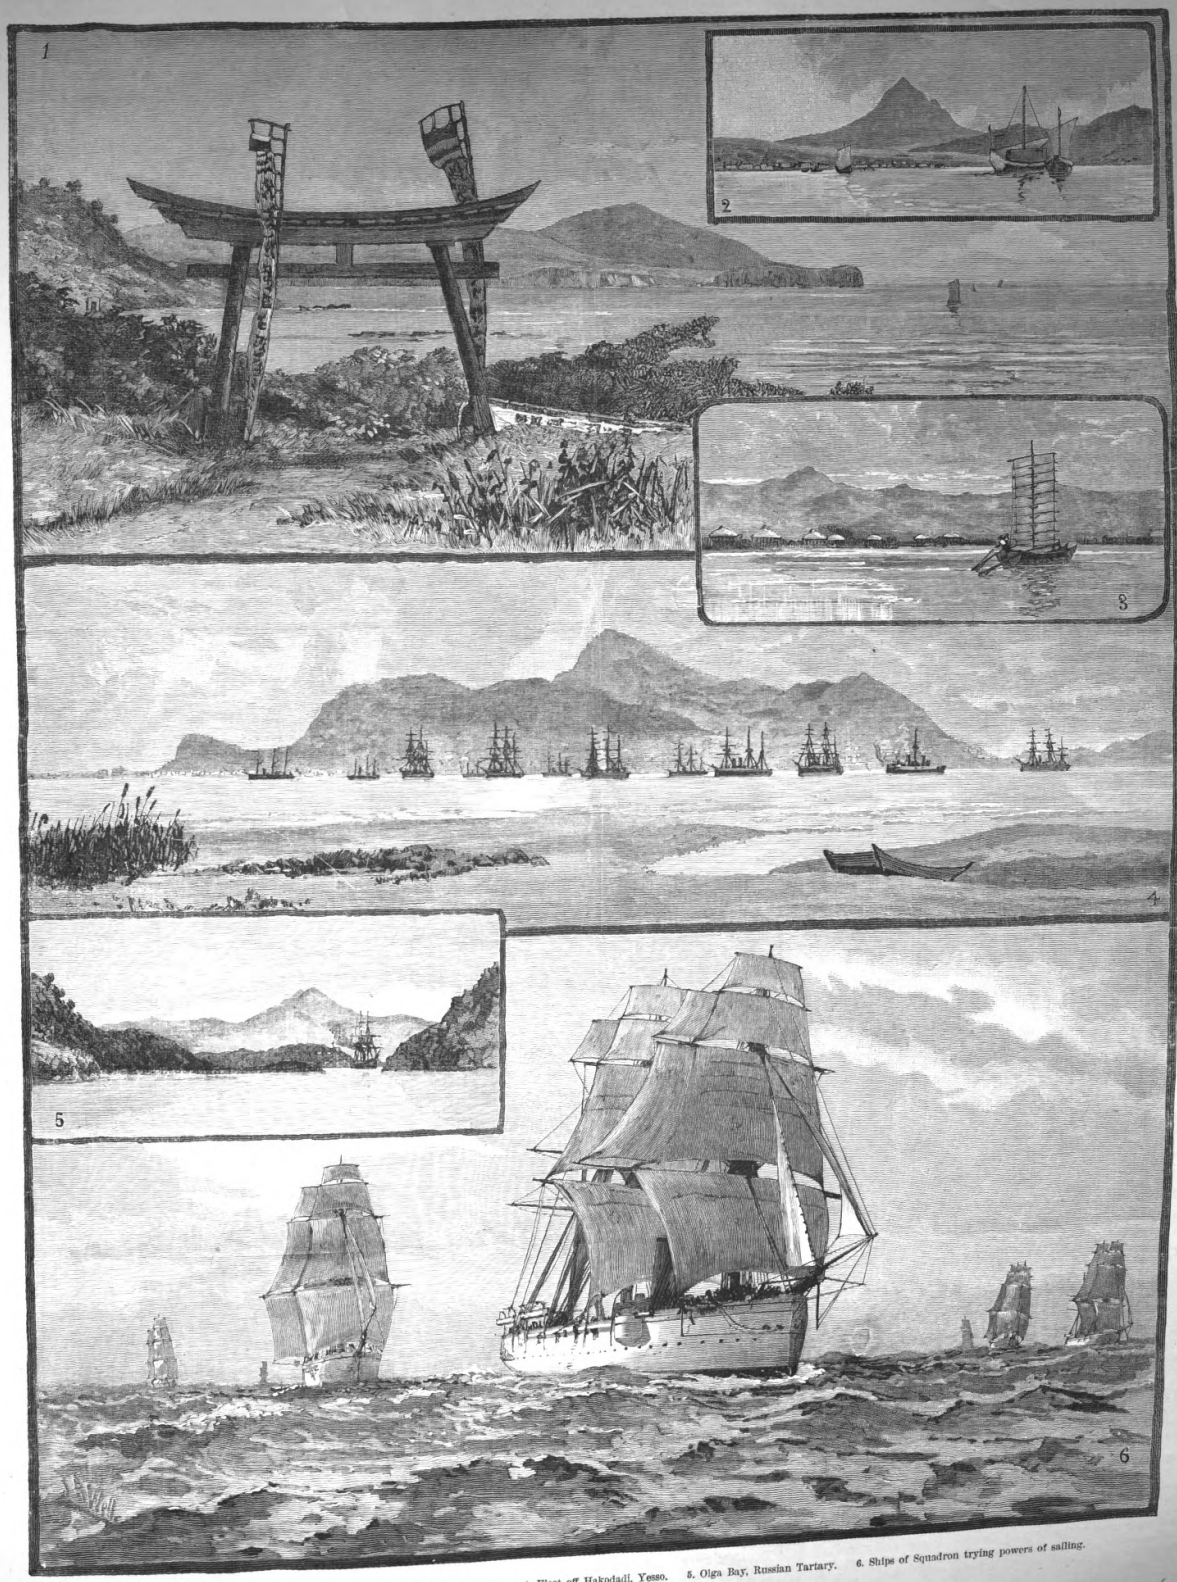
"LOVE AND GLORY."—DRAWN BY S. T. DADD.

JAPAN, COREA, AND RUSSIAN TARTARY.

The political rumour of a Russian Protectorate being about to be established over the Kingdom of Corea, which was formerly under nominal dependence on the Chinese Empire, but has long resisted foreign intrusion, adds somewhat to the interest of our Sketches of the coasts of that peninsula and of Russian Tartary, and of Yesso, the most northerly large island belonging to Japan. These Sketches were made by Lieutenant G. A. Cox, R.M.L.I., on board H.M.S. Cordelia, a ship of the British naval squadron on the China station, during its northern cruise this year. The squadron, consisting of the Impérieuse, Leander, Cordelia, Sapphire, Constance, Heroine, Mutine, Swift, Linnet, Wanderer, Alacrity, and Porpoise, is seen in one Sketch lying in the harbour of Hakodadi, or Hakodate, which is one of the Treaty Ports of Japan, on the south coast of the island of Yesso, but is of diminished commercial importance. A few miles distant from Hakodadi, across the Tsugaru Strait, on the shore of Niphon or Hondo, the largest Japanese island, is the little port and town of Awomon, noted for the manufacture and sale of a peculiar sort of rough lacquer-ware, something of a curiosity. The chief town of Yesso, on the west coast fronting the Russian maritime provinces of Asia, is Sapporo, or Satzuporo, up a river that flows into the Ishikari Bay; and the seaport for this town is Otérrauni, sometimes written Otaru, which is now connected with the city by a short single line of railway. A view of the head of the bay at Otérrauni, with a grotesque signalling apparatus of wooden posts and beams, on which some words of the Japanese language are inscribed, is given in one of the Sketches. The Russian Asiatic mainland coast is about 250 miles distant; it is geographically a portion of Eastern Tartary, and contains, besides the fortified naval port of Vladivostock and the Amur River, the nearer harbours of Castries Bay, Port Lazareff, Olga Bay, Peter the Great's Bay, and Possiet Harbour. The large island of Saghalien, to the north of Japan, has been annexed to the Russian Empire, whose dominions southward border also on Corea, including nearly all the mainland opposite to the Japanese islands.

NEW BOOKS.

Correspondence of Daniel O'Connell. Edited by W. J. Fitzpatrick. Two vols. (Murray).—In the present situation of Irish politics, those who have felt called upon to form some opinion with regard to the manner in which the Home Rule agitation has been conducted, during the past eight or nine years, should find the contents of these volumes interesting and instructive. The elders among us can personally remember the efforts of that great Irishman, unquestionably an earnest patriot and a champion of civil and religious liberty, who first raised the banner of Repeal of the Union, and whose prosecution and imprisonment, in 1844, excited much popular sympathy. The feeling then entertained concerning Daniel O'Connell by many English Liberals who did not think his main object either desirable or practicable, and who may not, if still living, have altered their view of that question, was not entirely derived from admiration of his energy and commanding genius. It was, in a great measure, from their approbation of the humane, the peaceable and law-abiding spirit in which he had carried on a purely political struggle of enormous force, and his resolute avoidance of everything likely to occasion the perpetration of outrages and acts of violence, or to incite the peasantry to a social war of classes. Daniel O'Connell, in this sense, consistently displayed a loyalty to the permanent interests of civilised and Christian society, which was perhaps due as much to the natural benevolence of his heart, and to his sincere religious sentiments as a devout member of the Catholic Church, as it was to his sagacious perception of the best way to serve his cause. With reference to agrarian outrages, committed in 1833 by the gangs of "Whitefeet," who resembled the "Moonlighters" and followers of "Rory of the Hills" lately infesting some parts of Ireland, we find him writing to a Dublin journalist: "Give a caution to the atrocious Whitefeet. They have played the game which the enemies of Ireland wished them to play. The execration of every good or honest man is upon their crimes; the vengeance of God will sooner or later be executed upon their wickedness—the last and worst of those villainous miscreants who have given strength to the enemies, and weakened the friends, of Ireland. But still I do not despair of my country." Again, towards the height of the contest, he wrote: "There can be only one way of stopping Repeal—namely, by involving it in any breach of the peace or violation of the law;" and his latest public act, in December, 1846, was to insist on excluding from the Repeal Association men who would not disclaim the idea of resorting to physical force. This example is deserving of remembrance; and the present collection of his private letters will, on the whole, not only enhance the esteem for O'Connell's personal character, which was admirable in the private relations of family and friendship, but also confirm a high estimate of his rare ability as a politician, notably of his tact and discernment of fitting means. His integrity cannot be doubted except on the supposition that he did not believe Repeal to be an attainable end, and that he wilfully practised a delusion to extract money from his misguided countrymen. But he evidently did believe in the success of his endeavours, and hoped to fulfil his promises. He might be excused for so large an expectation, because he had succeeded marvellously in the tasks of obtaining Catholic Emancipation, some reduction of the Irish Church Establishment, a Reform of the Irish Corporations, and the relief of Irish tenants from the burden of tithes, against the most vehement opposition from parties in Ireland, but with the assistance of the English Liberal Party. These were just and reasonable demands; and it was for the sake of the two last-mentioned practical reforms that O'Connell, from 1834 to 1841, lent his support to Lord Melbourne's Ministry, putting so long in abeyance, but never disavowing, his original and ultimate purpose, the Repeal of the Union. In the collection of his private letters, mostly addressed to the late Mr. Patrick Vincent Fitzpatrick, his confidential friend in Dublin and treasurer of the funds subscribed to maintain those political efforts, we find nothing to justify the imputation of mercenary motives. O'Connell, born in 1775, was in middle life when he gave up a professional practice worth nearly £4000 a year to devote himself to politics; he was put to enormous expense in contested elections, and in the trial of election petitions; he refused offices of dignity and emolument, such as the Mastership of the Rolls; and though he received personal assistance from the offerings of the people, as Grattan did from the Irish Parliament, and Cobden from the Anti-Corn-law League, it is certain that his pecuniary sacrifices were larger than any such compensation. The perusal of these letters, especially of his frank and unstudied communications to private friends, allows the reader to believe in his substantial integrity, and in the sincerity of his public action; and though, in dealing with the Whigs of the Melbourne period—for he was in direct hostility to Lord Grey—there was an admixture of diplomatic craftiness, he cannot be said to have behaved treacherously or deceitfully towards them. Mr. W. J. Fitzpatrick, the editor of this correspondence, and the author of a biography of Bishop Doyle and a book on the state of Ireland before the Union, does not pretend here to narrate the history of O'Connell's life and times, but merely inserts brief notices of important events, and provides, in the foot-notes of the pages, sufficient particulars concerning the many Irishmen, hardly known by name to us in England, who are incidentally mentioned in the letters. We presume that the editor is not a relative of Mr. P. V. Fitzpatrick, as there are several different families of that name; but he has performed his task with much care and diligence, having had the materials entrusted to him by the families of those to whom O'Connell was in the habit of writing, some of whom were persons of high rank and character. The collection is a valuable addition to our knowledge of those times, and to our acquaintance with a great man, whom one is even inclined to regard as a good man, allowing for the conditions of stormy struggle in which he lived and laboured, and for the ideas by which he was prompted to unsuccessful action.



The Holy Places of Jerusalem. By Professor Hayter Lewis (Murray).—The author is Emeritus Professor of Architecture in University College, and one of the executive committee of the Palestine Exploration Fund. He has made repeated visits to Jerusalem, and may be considered one of the first "experts" on all questions relating to the archæology of the Holy City. The subjects principally treated upon are the Dome of the Rock, the Aksa, the Golden Gate, the Holy Sepulchre, Siloam, and Jeremiah's Grotto. A special interest has lately been felt with regard to Jeremiah's Grotto, which is just outside of the Damascus Gate. Those who are doubtful about the authenticity of the present Holy Sepulchre are inclined to believe that the real place of the crucifixion was on the knoll over the Grotto of Jeremiah. General Gordon believed in this as the true site, and Major Condor is an advocate for the same view. Professor Hayter Lewis thinks that there is as yet no reason for renouncing the old site. The greater part of his book is devoted to the Dome of the Rock, and the various theories connected with it. On this, as well as on all the subjects dealt with, the very latest information and discoveries are brought forward. It is not only a work of learned research by a competent authority, but is, at the same time, from the collection of data, a most useful treatise on the archæology of Jerusalem. It is beautifully illustrated, principally with subjects which bear on the questions of architecture.

Plymouth Armada Heroes: The Hawkins Family. By Mary W. S. Hawkins (W. Brendon and Son, Plymouth).—Last July or August, in our comments on the tercentenary celebration, at Plymouth, of the defeat of the Spanish Armada, we suggested that the people of that town, who have erected a statue of Sir Francis Drake on the Hoe, should do equal honour to the memory of their worthy fellow-townsman, Sir John Hawkins, a sailor and sea-warrior of merit scarcely less than Drake, and one whose part in that great historical victory was quite as important. Miss Mary Wise Savery Hawkins, of Hayford Hall, Buckfastleigh, Devon, a lineal descendant, as shown by the pedigree annexed to this volume, from Sir John Hawkins and his son, Sir Richard Hawkins, who also fought against the Armada, and who was subsequently captured by the Spaniards, on the South American coast, and kept nine years a prisoner, has compiled a book that we wanted. Englishmen at this day can have no better reading than the biographical memoirs of a family, not merely a single person, though he was most eminent on that signal occasion, whose services during the sixteenth century, and for some years later, contributed to the strength and independence of this country, and laid the foundations of its maritime power and its commercial prosperity. It was, all that time, a Plymouth family, holding the most considerable local position. William Hawkins, merchant and shipowner, who sent out probably the earliest English expedition to the Southern Seas, and who personally made three voyages to Brazil, was twice Mayor of Plymouth in the reign of Henry VIII., and represented the borough in Parliament. His two sons—the eldest, Captain William Hawkins, "Governor" of Plymouth, builder of the fortifications of that port, and one of the most active naval commanders—the second, Admiral Sir John Hawkins, Treasurer and Comptroller of Queen Elizabeth's Navy—also held the office of Mayor, and Sir John sat for Plymouth in the House of Commons; and Sir Richard Hawkins, after his return from the Spanish captivity, was M.P. for the borough two years, and Mayor in 1604. These claims on local remembrance appear sufficient to entitle the worthies of the Hawkins family to some peculiar token of regard at Plymouth, though we are not aware that any of their descendants are now residing in the town. Their claim on national regard is undeniable, and imparts to the handsome volume before us, though not issued by a London publisher, a degree of wide public interest that must be promptly acknowledged; but in doing justice to Sir John Hawkins, his brother William, and his son Richard, who were all in the great Channel fight of 1588, we would not disparage the performances of Drake. It is, however, to be observed that, from 1573 until after the defeat of the Armada, Sir John Hawkins was charged with administrative duties similar to those of our Lords of the Admiralty; and that the construction and equipment of her Majesty's fleet, composing the most powerful part of the force commanded by Lord Howard of Effingham, had been the work of Sir John Hawkins, who also held, as well as Drake and Frobisher, a Vice-Admiral's command of one squadron in the actual engagements. After a week spent in manœuvring and fighting from near the Eddystone up to Calais, the reserve force, under Lord Henry Seymour and Sir William Winter as Admirals, joined Howard of Effingham, the Lord High Admiral, and brought indispensable assistance. No one commander is entitled to the main credit of the achievement, but Hawkins deserves as much credit as any other. The exploits of Drake, however, at other times and on other seas and coasts, may be reputed more brilliant than those of his contemporaries, striking as these manifold feats of skilful seamanship and warlike prowess were, and unsurpassed in the naval glories of any other nation. We should like, if there were space, to repeat in detail all that is related in this book of the brave deeds of John and Richard Hawkins, before and after the mighty conflict with the Armada; to review also the diligent labours and prudent official management of John Hawkins at the Queen's dockyards, and at the naval ports of England; to notice their constant efforts of local usefulness at Plymouth, and the incidents of their domestic life. These interesting particulars will be found in the work compiled by the lady who has the honour to bear their name; and she further tells us of a third William Hawkins, nephew to Sir John and cousin to Sir Richard, an indefatigable sailor and traveller in the time of James I., regarded by her as the true founder of our Indian Empire. He landed at Surat, in August, 1608, with a commission to establish an English factory, the Portuguese being already there; he visited the Court of the Great Mogul, the Emperor Jehanghir, at Agra, married a Christian Armenian young lady there, and stayed about three years. Dying on the voyage home, this William Hawkins left a brief account of the Mogul Court, which is curious reading; but we peruse with still greater interest that given by Richard Hawkins of his adventures on the coasts of Peru and Chili in 1594. The greatest of the family, Sir John Hawkins, died in 1595, at sea, off Porto Rico, having served his country forty-three years. Of him, in this volume, we have three portraits; the frontispiece, a photographic reproduction of an oil-painting, which is in the possession of Mr. Christopher Stuart Hawkins, father of the author; secondly, that of a beautiful bust, in basso relievo on ivory, belonging to the Rev. B. D. Hawkins, and thirdly, that of a miniature painted by Peter Oliver, to which is attached the jewel given to the Admiral by Queen Elizabeth, with a lock of her hair; this miniature and jewel are now the property of Lady Rosebery. The volume contains other illustrations, and is bound in white, with a broad red cross, the Royal Arms, and the initial letters "E.R." for the Queen whom these valiant Plymouth gentlemen served in her time of need so well. The late Rear-Admiral Abraham Mills Hawkins, who died in 1857, had done good service in the French war, and he was grandfather of the lady to whom we are indebted for this acceptable book.

B.C. 1887: A Ramble in British Columbia. By J. A. Lees and W. J. Clutterbuck (Longmans).—It is a mild chronological joke, but it suggests a startling promise of very remote archæological information, to play with two initial letters and last year's A.D. number, as the lively authors of this volume do in its title-page, which presents, however, a more acceptable recommendation—namely, that Messrs. Lees and Clutterbuck are the identical "Two of Them," who narrated, once upon a time, the entertaining travels of "Three in Norway." British Columbia, the most westerly province of the vast Dominion of Canada, beyond the prairies and the Rocky Mountain range, some 3500 miles from the Atlantic seaports, has of late been rendered accessible by the Canadian Pacific Railway, and is a country of interest unsurpassed in North America for its grand and romantic highland scenery. The part of it which last year was traversed, as we read, by three English gentlemen here calling each other "Jim," "Cardie," and "The Skipper," is quite off the railway line, being situated to the south of the Kicking Horse Pass, where the railway, from the east, makes its entrance into British Columbia. It is the great valley between the Rocky Mountains and the Selkirk Mountains, containing the sources and upper streams of the Columbia River, which begins here by flowing in a north-west direction, and of the Kootenay River, which begins, not less remarkably, with a southward course; for, when these rivers get past the Selkirk range, it is curious to observe, each river has changed its direction to the reverse; and the Kootenay is there flowing towards the north, into the lake which it forms, while the Columbia is there flowing due south. The southerly bend of the Kootenay enters the United States' territory at the 49th degree of latitude, and even approaches near to the line of the Northern Pacific Railway on the shore of Pend d'Oreille Lake; but the better portion of the places described in this book are within the Canadian Dominion. They comprise, besides the Upper Kootenay, two of its highland tributaries, the Elk River, namely, and the Mooyie, which joins it above the Kootenay Lake; also, in the opposite quarter, to the north, the upper course of the Columbia River is followed to where it meets the view of railway passengers on the Canadian Pacific line. These topographical details, aided by reference to the map, are sufficient for the reader to understand what is the subject of "B.C. 1887."

Round about New Zealand. By E. W. Payton (Chapman and Hall).—The unique peculiarity of New Zealand in geographical position, and in physical conditions and natural history, not to speak of the Maori race, must always make it a separate subject of study, entirely apart from our Australian Colonies. In those conditions, which are eminently agreeable and favourable to English settlers, New Zealand is, of course, what it was ten or twenty years ago; but colonial progress is rapidly effecting great changes in social and economic statistics, in railways, harbours, and towns, in farming and trade, and in many affairs of public and private life. Hence it is really useful that a new book should be published, at tolerably frequent intervals, describing the more recent aspects of each of the principal British Colonies; and Mr. Payton, who passed three or four years in wandering about New Zealand, from his arrival in 1883, should give us serviceable information. A large part of his volume, indeed, is occupied by descriptions of the aqueous volcanic region; the hot sulphuretted springs of Ohinemutu, and the famous cascades and silica terraces of Rotomahana, since destroyed by the Tarawera eruption; also the wild shores of Lake Taupo, and the interior of "the King Country." All this has been repeatedly put before us by other visitors and writers—for example, by Mr. Kerry Nicholls, whose account of such matters is extremely precise; but Mr. Payton adds the report of an inspection of Tarawera and Rotomahana after the eruption. We look more eagerly, however, for something new and important concerning the cities of Dunedin Christchurch, Wellington, and Auckland, with the social and commercial life of which they are the centres, and the agricultural, pastoral, and mineral resources of the colony. It is with disappointment that we lay down the book, having failed to obtain from it any considerable addition to our previous knowledge; yet there are doubtless many readers to whom it will be interesting, and the illustrations have some merit.

By-Ways in Book-Land. By W. Davenport Adams (Elliot Stock).—One of our contributors lately commented with genial humour, and with some truth of observation, on the decline of the ancient taste for the "Belles-Lettres," both prose and verse. It cannot be denied that many readers now seem to value books for what can be got out of them, whether knowledge of events, of people and things, or trains of argument and fresh views, or objects of imaginative interest; but not so much for the graceful manner and style of expression. This difference is the same with that between the man who eats his dinner that he may not starve or be hungry, but may keep up and increase his strength, and the epicure who relishes fine meat and cookery. We are more hungry, and less dainty. But there still remain among us not a few amateurs of exquisite literature for its own sake; and this little volume is one of the most recent, one of the neatest and aptest, manifestations of that turn of mind. It contains nearly thirty short essays on literary subjects, beginning with the pleasure of using the paper-knife in cutting open the pages of a new volume; and there is one, too, on "the outsides of books." The insides, however, and the inmost characteristic qualities, of some old favourites, especially the poets, the dramatists, the idyllists, the wits and humourists, and the dealers in sportive fancies, are handled with delicate critical appreciation. There is even something yet to be said about Shakspeare—namely, about his patriotic love of England; and something also of "Don Quixote"—the English reception of that book, and certain parodies or imitations of it in English. "Elections in Literature," "The Praise of Thames," "The Season in Song," "The Recess in Rhyme," "Peers and Poetry," and "Parson Poets" are titles of much promise, which is fulfilled by the brief chapters so designated in this pleasant collection.

1. Oterraunai Bay, Yesso, Japan. 2. Awomon, Japan. 3. Port Lazareff, Corea. 4. Fleet off Hakodadi, Yesso. 5. Olga Bay, Russian Tartary. 6. Ships of Squadron trying powers of sailing.

CHAPTER XLI.

ON CONDITIONS.

This servitude endured for a week, during which we were driven forth daily with the negroes to the hardest and most intolerable toil, the master's intention being so to disgust us with the life as to make us write the most urgent letters to our friends at home; since, as we told him, two hundred guineas had been already paid on our account (though none of the money was used for the purpose), he supposed that another two hundred could easily be raised. Wherefore, while those of the new servants who were common country lads were placed in the Ingenio, or the curing-house, where the work is sheltered from the scorching sun, we were made to endure every hard-ship that the place permitted. In the event, however, as you shall hear, the man's greed was disappointed and his cruelty made of none avail.

In fact, the thing I had foreseen quickly came to pass. When a man's mind lies in a lethargy of despair, his body, no longer fortified by a cheerful disposition, presently falls into any disease which is lurking in the air. Diseases of all kinds may be likened unto wild beasts: invisible, always on the prowl, seeking whom they may devour. The young fall victims to some, the weak to others; drunkards and gluttons to others: the old to others; and the lethargic, again, to others. It was not surprising to me, therefore, when Robin, coming home one evening, fell to shivering and shaking, chattering with his teeth, and showing every external sign of cold, though the evening was still warm, and the sun had that day been more than commonly hot. Also, he turned away from his food, and would eat nothing. Therefore, as there was nothing we could give him, we covered him with our rugs; and he presently fell asleep. But in the morning, when we awoke, behold! Robin was in a high fever: his hands and head burning hot, his cheek flushed red, his eyes rolling and his brain wandering. I went forth and called the overseer to come and look at him. At first he cursed and swore, saying that the man was malingering (that is to say, pretending to be sick, in order to avoid work); that, if he was a negro instead of a gentleman, a few cuts with his lash should shortly bring him to his senses; that, for his part, he liked not this mixing of gentlemen with negroes; and that, finally, I must go and bring forth my sick man or take it upon myself to face the master, who would probably drive him afield with the stick.

"Sir," I said, "what the master may do I know not. Murder may be done by any who are wicked enough. For my part, I am a physician, and I tell you that to make this man go forth to work will be murder. But indeed he is light-headed, and with a thousand lashes you could not make him understand or obey."

Well, he grumbled, but he followed me into the hut.

"The man hath had a sunstroke," he said. "I wonder that any of you have escaped. Well, we can carry him to the sick-house, where he will die. When a new hand is taken this way he always dies."

"Perhaps he will not die," I said, "if he is properly treated. If he is given nothing but this diet of loblollie and salt beef, and nothing to drink but the foul water of the pond, and no other doctor than an ignorant old negress, he will surely die."

"Good Lord, man!" said the fellow, staring. "What the devil dost expect in this country? It is the master's loss, not mine. Carry him between you to the sick-house."

So we carried Robin to the sick-house.

At home we should account it a barn, being a great place with a thatched roof, the windows open without shutter or lattice, the door breaking away from its hinges. Within there was a black lying on a pallet, groaning most piteously. The poor wretch, for something that he had done, I know not what, had his flesh cut to pieces with the whip. With him was an old negress mumbling and mouthing.

We laid Robin on another pallet, and covered him with a rug.

"Now, man," said the overseer, "leave him there, and come forth to your work."

"Nay," I said, "he must not be left. I am a physician, and I must stay beside him."

"If he were your son I would not suffer you to stay with him."

"Man!" I cried. "Hast thou no pity?"

"Pity!" The fellow grinned. "Pity! quotha. Pity! Is this a place for pity! Why, if I showed any pity I should be working beside you in the fields. It is because I have no pity that I am overseer. Look here"—he showed me his left hand, which had been branded with a red-hot iron. "This was done in Newgate seven years ago and more. Three years more I have to serve. That done, I may begin to show some pity. Not before. Pity is scarce among the drivers of Barbadoes. As well ask the beadle for pity when he flogs a prentice."

"Let me go to the master, then."

"Best not; best not. Let this man die and keep thyself alive. The morning is the worst time for the master, because last night's drink is still in his head. Likely as not you will but make the sick man's case and your own worse. Leave him in the sick-house, and come back to him in the evening."

The man spoke with some compassion in his eyes. Just then, however, a negro boy came running from the house and spoke to the overseer.

"Why," he said, "nothing could be more pat. You can speak to the master, if you please. He is in pain, and Madam sends for Dr Humphrey Challis. Go, Doctor. If you cure him, you will be a lucky man. If you cannot cure him, the Lord have mercy upon you! Whereas, if you suffer him to die," he added, with a grin and a whisper, "every man on the estate will fall down and worship you. Let him die! Damn him! Let him die!"

I followed the boy, who took me to that part of the house which fronts the west and north. It was a mean house of wood, low and small, considering how wealthy a man was the master of it, on three sides, however, there was built out a kind of *loggia*, as the Italians call it, but of wood instead of marble, forming a cloister or open chamber, outside the house. They call it a verandah, and part of it they hang with mats made of grass, so as to keep it shaded in the afternoon and evening, when the sun is in the west. The boy brought me to this place, pointed to a chair where the master sat, and then ran away as quickly as he could.

It was easy to understand why he ran away, because the master at this moment sprang out of his chair and began to stamp up and down the verandah roaring and cursing. He was clad in a white linen dressing-gown and a great linen nightcap tied round his head. On a small table beside him stood a bottle of beer, newly opened, and a silver tankard.

When he saw me he began to swear at me for my delay in coming, though I had not lost a moment.

"Sir," I said, "if you will cease railing and blaspheming I will examine into your malady. Otherwise I will do nothing for you."

"What?" he cried. "You dare to make conditions with me, you dog, you!"

"Fair words," I said. "Fair words. I am your servant, to work on your plantation as you may command. I am not your physician, and I promise you, Sir, upon the honour of a gentleman, and without using the Sacred Name which is so often on your lips, that if you continue to rail at me I will suffer you to die rather than stir a little finger in your help."

"Suffer the physician to examine the place," said a woman's voice. "What helps it to curse and to swear?"

The voice came from a hammock swinging at the end of the verandah. It was made, I observed, of a kind of coarse grass loosely woven.

The man sat down and sulkily bade me find a remedy for the pain which he was enduring. So I consented, and examined his upper jaw, where I soon found out the cause of his pain in a good-sized tumour formed over the fangs of a grinder. Such a thing causes agony even to a person of cool blood, but to a man whose veins are inflamed with strong drink, the pain of it is maddening.

"You have got a tumour," I told him. "It has been forming for some days. It has now nearly, or quite, reached its head. It began about the time when you were cursing and insulting certain unfortunate gentlemen, who are, for the time, under your power. Take it, therefore, as a Divine judgment upon you for your cruelty and insolence."

He glared at me but said nothing, the hope of relief causing him to receive this admonition with patience, if not in good part. Besides, my finger was still upon the spot, and if I so much as pressed gently I could cause him agony unspeakable. Truly, the power of the physician is great.

"The pain," I told him, "is already grown almost intolerable. But it will be much greater in a few hours unless something is done. It is now like unto a little ball of red-hot fire in your jaw, in an hour or two it will seem as if the whole of your face was a burning fiery furnace, your cheek will swell out until your left eye is closed, your tortures, which now make you bawl, will then make you *scream*, you now walk about and stamp; you will then lie down on your back and kick. No negro slave ever suffered half so much under your accursed lash as you will suffer under this tumour—unless something is done."

"Doctor," it was again the woman's voice from the hammock, "you have frightened him enough."

"Strong drink," I went on, pointing to the tankard, "will only make you worse. It inflames your blood and adds fuel to the raging fire. Unless something is done the pain will be followed by delirium: that by fever, and the fever by death. Sir, are you prepared for death?"

He turned horribly pale and gasped.

"Do something for me!" he said. "Do something for me, and that without more words!"

"Nay, but I will first make a bargain with you. There is in the sick-house a gentleman, my cousin—Robin Challis by name—one of the newly-arrived rebels, and your servant. He is lying sick unto death of a sunstroke and fever caused by your hellish cruelty in sending him out to work on the fields with the negroes instead of putting him to light labour in the Ingenio or elsewhere. I say, his sickness is caused by your own devilish barbarity. Wherefore I will do nothing for you at all—do you hear? Nothing! nothing!—unless I am set free to do all I can for him. Yea; and I must have for him such cordials and generous diet as the place can afford, otherwise I will not stir a finger to help you. Otherwise—endure the torments of the damned, rave in madness and in fever. Die and go to your own place. I will not help you. So—that is my last word."

Upon this I really thought that the man had gone stark, staring mad. For, at the impudence of a mere servant (though a gentleman of far better family than his own) daring to make conditions with him, he became purple in the cheeks, and seizing his great stick which lay on the table, he began belaboring me with all his might about the head and shoulders. But I caught up a chair and used it for a shield while he capered about, striking wildly and swearing most horribly.

At this moment the lady who was in the hammock stepped out of it and walked towards us slowly, like a Queen. She was without any doubt the most beautiful woman I had ever seen. She was dressed in a kind of dressing-gown of flowered silk, which covered her from head to foot; her head was adorned with the most lovely glossy black ringlets; a heavy gold chain lay round her neck, and a chain of gold with pearls was twined in her hair, so that it looked like a coronet; her fingers were covered with rings, and gold bracelets hung upon her bare white arms: but she wore man's shoes to protect her feet from the chigoes. Her figure was tall and full, her face inclined to the Spanish, being full and yet regular, with large black eyes. Though I was fighting with a madman, I could not resist the wish that I could paint her, and I plainly perceived that she was one of that race which is called quadroon, being most likely the daughter of a mulatto woman and a white father. This was evident by the character of her skin, which had in it what the Italians call the *morbidezza*, and by a certain dark hue under the eyes.

"Why," she said, speaking to the master as if he had been a petulant school-boy, "you only make yourself worse by all this fire and fury. Sit down, and lay aside your stick. And you, Sir"—she addressed herself to me—"you may be a great physician, and at home a gentleman; but here you are a servant, and therefore you are bound to help your master in all you can without first making conditions."

"I know *too* well," I replied. "He bought me as his servant, but not as his physician. I will not heal him without my fee; and my fee is that my sick cousin be attended to with humanity."

"Take him away!" cried the master, beside himself with rage. "Clap him in the stocks! Let him sit there all day long in the sun! He shall have nothing to eat or to drink! In the evening he shall be flogged! If it was the Duke of Monmouth himself, he should be tied up and flogged! Where the devil are the servants?"

A great hulking negro came running.

"You have now," I told him quietly, "permitted yourself to be inflamed with violent rage. The pain will therefore more rapidly increase. When it becomes intolerable, you will be glad to send for me."

The negro dragged me away (but I made no resistance), and led me to the courtyard, where stood the stocks and a whipping-post. He pointed to the latter with a horrid grin, and then laid me fast in the former. Fortunately, he left me my hat, otherwise the hot sun would have made an end of me. I was, however, quite easy in my mind. I knew that this poor wretch, who already suffered so horribly, would before long feel in that jaw of his, as it were, a ball of fire. He would drink, in order to deaden the pain, but the wine would only make the agony more horrible. Then he would be forced to send for me.

This, in fact, was exactly what he did.

I sat in those abominable stocks for no more than an hour. Then Madam herself came to me, followed by the negro fellow who had locked my heels in those two holes.

"He is now much worse," she said. "He is now in pain that cannot be endured. Canst thou truly relieve his suffering?"

"Certainly I can. But on conditions. My cousin will die if he is neglected. Suffer me to minister to his needs. Give him what I want for him and I will cure your"—I did not know whether I might say "your husband," so I changed the words into—"my master. After that I will cheerfully endure again his accursed cruelty of the fields."

She bade the negro unlock the bar.

"Come," she said. "Let us hear no more about any bargains. I will see to it that you are able to attend to your cousin. Nay, there is an unfortunate young gentlewoman here, a rebel, and a servant like yourself—for the last week she doth nothing but weep for the misfortunes of her friends—meaning you and your company. I will ask her to nurse the sick man. She will desire nothing better, being a most tender-hearted woman. And as for you, it will be easy for you to look after your cousin and your master at the same time."

"Then, Madam," I replied, "take me to him, and I will speedily do all I can to relieve him."

I found my patient in a condition of mind and body most dangerous. I wondered that he had not already fallen into a fit, so great was his wrath and so dreadful his pain. He rolled his eyes; his cheeks were purple; he clenched his fists; he would have gnashed his teeth but for the pain in his jaws.

"Make yourself easy," said Madam. "This learned physician will cause your pain to cease. I have talked with him and put him into a better mind."

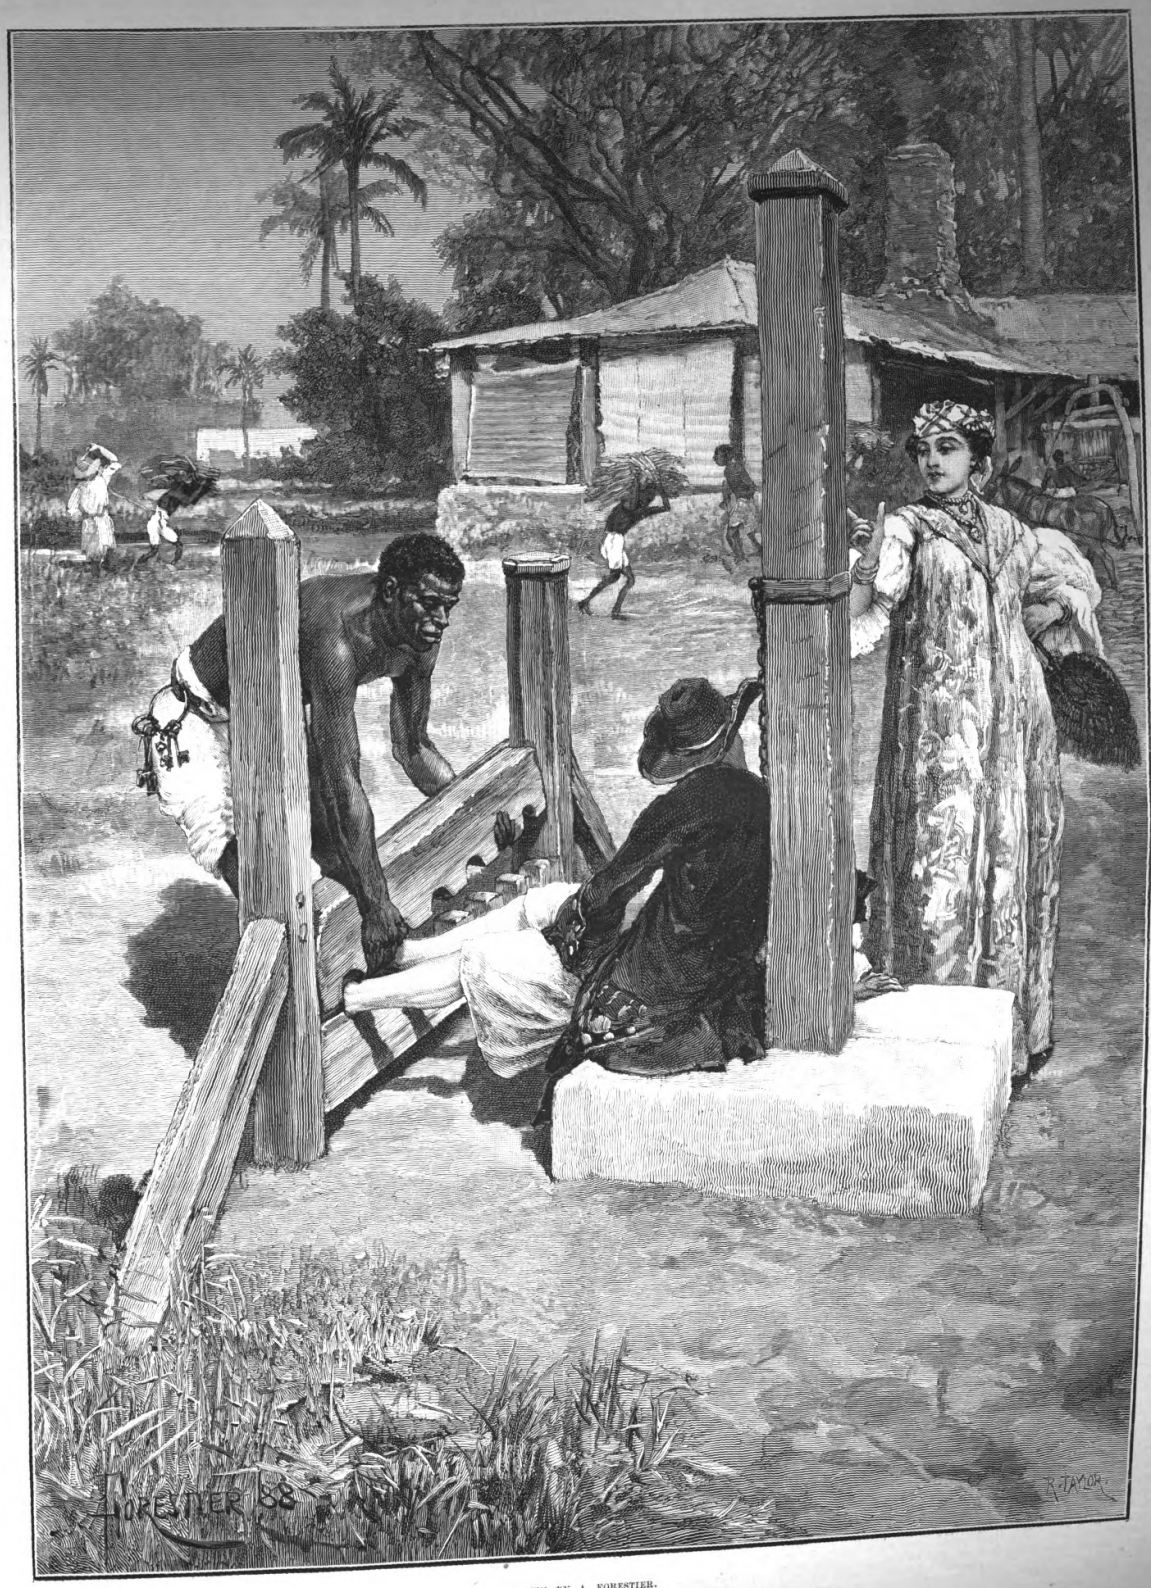
The master shook his head as much as to say that a better mind would hardly be arrived at without the assistance of the whipping-post; but the emergency of the case prevented that indulgence. Briefly, therefore, I took out my lancet and pierced the place, which instantly relieved the pain. Then I placed him in bed, bled him copiously, and forbade his taking anything stronger than small-beer. Freedom from pain and exhaustion presently caused him to fall into a deep and tranquil sleep. After all this was done I was anxious to see Robin.

"Madam," I said, "I have now done all I can. He will awake at noon, I dare say. Give him a little broth, but not much. There is danger of fever. You had better call me again when he awakes. Warn him solemnly that rage, revenge, cursing, and beating must be all postponed until such time as he is stronger. I go to visit my cousin in the sick-house, where I await your commands."

"Sir," she said courteously, "I cannot sufficiently thank your skill and zeal. You will find the nurse of whom I spoke in the sick-house with your cousin. She took with her some cordial, and will tell me what else you order for your patient. I hope your cousin may recover. But, indeed"——she stopped and sighed.

"You would say, Madam, that it would be better for him and for us all to die. Perhaps so. But we must not choose to die, but rather strive to live as more in accordance with the Word of God."

"The white servants have been hitherto the common rogues and thieves and sweepings of your English streets," she said. "Sturdy rogues are they all, who fear naught but the lash, and have nothing of tenderness left but tender skins. They rob and steal; they will not work, save by compulsion; they are far worse than the negroes for laziness and drunkenness. I know not why they are sent out, or why the planters buy them, when the blacks do so much better serve their turn, and they can without reproach beat and flog the negroes, while to flog and beat the whites is by some accounted cruel."



"All this, Madam, is doubtless true; but my friends are not the sweepings of the street."

"No, but you are treated as if you were. It is a new thing having gentlemen among the servants, and the planters are not yet accustomed to them. They are a masterful and a wilful folk, these planters of Barbados; from childhood upwards they have their own way, and brook not opposition. You have seen into what a madness of wrath you threw the master by your opposition. Believe me, Sir, the place is not wholesome for you and for your friends. The master looks to get a profit not from your labour, but by your ransom. Sir"—she looked me very earnestly in the face—"if you have friends at home—if you have any friends at all—entreat them—command them—immediately to send money for your ransom. It will not cost them much. If you do not get the money you will most assuredly die, with the hard work and the fierce sun. All the white servants die except the very strongest and lustiest. Whether they work in the fields, or in the garden, or in the Ingenio, or in the stables, they die. They cannot endure the hot sun and the hard fare. They presently catch a fever, or a calenture, or a cramp, and so they die. This young gentlewoman who is now with your cousin will presently fall into melancholy and die. There is no help for her, or for you—believe me, Sir—there is no hope for any of you but to get your freedom." She broke off here, and never at any other time spoke to me again upon this subject.

In three weeks' time, indeed, we were to regain our freedom, but not in the way Madam imagined.

Before I go on to tell of the wonderful surprise which awaited me I must say that there was, after this day, no more question about field-work for me. In this island, there was, at the moment when we arrived, a great scarcity of physicians; nay, there were none properly qualified to call themselves physicians, though a few quacks: the sick servants on the estates were attended by the negresses, some of whom have, I confess, a wonderful knowledge of herbs—in which respect they may be likened to our countrywomen, who, for fevers, agues, toothache, and the like, are as good as any physicians in the world. It was, therefore, speedily rumoured abroad that there was a physician upon my master's estate, whereupon there was immediately a great demand for his services, and henceforth I went daily, with the master's consent, to visit the sick people on the neighbouring estates—nay, I was even called upon by his Excellency the Lieutenant-Governor himself, Mr. Steed, to treat him for a complaint from which he suffered. And I not only gave advice and medicines, but I also received my fee just as if I had been practising in London. But the fees went to my

She bade the negro unlock the bar. "Come," she said, "let us hear no more about any bargains."

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

master, who took them all, and offered me no better diet than before. That, however, mattered little, because wherever I went I asked for, and always received, food of a more generous kind and a glass or two of wine, so that I fared well and kept my health during the short time that we remained upon the island. I had also to thank Madam for many a glass of Madeira, dish of chocolata, plate of fruit, and other things not only for my patient Robin, but also for myself, and for another, of whom I have now to speak.

When, therefore, the master was at length free from pain and in a comfortable sleep, I left him, with Madam's permission, and sought the sick-house in a most melancholy mood, because I believed that Robin would surely die whatever I should do. And I confess that, having had but little experience of sunstroke and the kind of fever which followeth upon it, and having no books to consult and no medicine at hand, I knew not well what I could do for him. And the boasted skill of the physician, one must confess, availeth little against a disease which hath once laid hold upon a man. 'Tis better for him so to order the lives of his patients while they are well as to prevent disease, just as those who dwell beside an unruly river (as I have seen upon the great river Rhone) build up a high levée, or bank, over which the flood cannot pass.

In the sick-house the floor was of earth without boards; there was no other furniture but two or three wooden pallets, on each a coarse mattress with a rug; and all was horribly filthy, unwashed, and foul. Beside the pallet where Robin lay there knelt, praying, a woman with her head in her hands. Heavens! there was, then, in this dark and heathenish place one woman who still remembered her Maker!

Robin was awake. His restless eyes rolled about; his hands clutched uneasily at his blanket; and he was talking. Alas! the poor brain, disordered and wandering, carried him back to the old village. He was at home again in imagination, though we were so far away. Yea; he had crossed the broad Atlantic, and was back in fair Somerset, among the orchards and the hills. And only to hear him talk, the tears rolled down my cheeks.

"Alice," he said. Alas! he thought that he was again with the sweet companion of his youth. "Alice; the nuts are ripe in the woods. We will to-morrow take a basket and go gather them. Benjamin shall not come to spoil sport. Besides, he would want to eat them all himself. Humphrey shall come, and you, and I. That will be enough."

Then his thoughts changed again. "Oh! my dear," he said—in a moment he had passed over ten years, and was now with his mistress, a child no longer. "My dear, thou hast so sweet a face. Nowhere in the whole world is there so sweet a face. I have always loved thy face; not a day but it has been in my mind—always my love, my sweetheart, my soul, my life. My dear, we will never leave the country; we want no grandeur of rank, and state, and town; we will always continue here. Old age shall find us lovers still. Death cannot part us, oh! my dear, save for a little while—and then sweet heaven will unite us again to love each other for ever, and for ever"——

"Oh! Robin! Robin! Robin!"

I knew that voice. Oh! Heavens! was I dreaming? Was I, too, wandering? Were we all back in Somerset?

For the voice was none other than the voice of Alice herself!

CHAPTER XLII.

ALICE.

"Alice!" I cried.

She rose from her knees and turned to meet me. Her face was pale; her eyes were heavy and they were full of tears.

"Alice!"

"I saw you when you came here, a week ago," she said. "Oh! Humphrey, I saw you, and I was ashamed to let you know that I was here."

"Ashamed? My dear, ashamed? But how—why—what dost thou here?"

"How could I meet Robin's eyes after what I had done!"

"It was done for him, and for his mother, and for all of us. Poor child, there is no reason, indeed, to be ashamed."

"And now I meet him and he is in a fever, and his mind wanders; he knows me not."

"He is sorely stricken, Alice; I know not how the disease may end; mind and body are sick alike. For the mind I can do nothing; for the body I can do but little: yet with cleanliness and good food we may help him to mend. But tell me, Child, in the name of Heaven, how camest thou in this place?"

But before anything she would attend to the sick man. And presently she brought half-a-dozen negresses, who cleaned and swept the place, and sheets were fetched and a linen shirt, in which we dressed our patient, with such other things as we could devise for his comfort. Then I bathed his head with cold water, continually changing his bandages so as to keep him cool: and I took some blood from him, but not much, because he was greatly reduced by bad food and hard work.

When he was a little easier we talked. But Heavens! to think of the villainy which had worked its will upon this poor child! As if it was not enough that she should be forced to fly from a man who had so strangely betrayed her, and as if it was not enough that she should be robbed of all her money—but she must also be put on board, falsely and treacherously, as one, like ourselves, sentenced to ten years' servitude on the Plantations! For, indeed, I knew and was quite certain that none of the Maids of Taunton were thus sent abroad. It was notorious, before we were sent away, that, with the exception of Susan Blake, who died of jail-fever at Dorchester, all the Maids were given to the Queen's ladies, and by them suffered to go free on the payment by their parents of thirty or forty pounds apiece. And as for Alice, she was a stranger in the place, and it was not known that she had joined that unfortunate procession. So that if ever a man was kidnapper and villain, that man was George Penne.

It behoves a physician to keep his mind under all circumstances calm and composed. He must not suffer himself to be carried away by passion, by rage, hatred, or even anxiety. Yet, I confess that my mind was clean distracted by the discovery that Alice herself was with us, a prisoner like ourselves; I was, I say, distracted, nor could I tell what to think of this event and its consequences. For, to begin with, the poor child was near those who would protect her. But what kind of protection could be given by such helpless slaves? Then was she beyond her husband's reach; he would not, it was quite certain, get possession of her at this vast distance. So far she was safe. But then the master, who looked to make a profit by her, as he looked to make a profit by us—through the ransom of her friends! She had no friends to ransom her. There was but one, the Rector, and he was her husband's father. The time would come when the avarice of the master would make him do or threaten something barous towards her. Then she had found favour with Madam, this beautiful mulatto woman, whom Alice innocently supposed to be the master's wife. And there was the young planter, who wished to buy her with the honourable intention of marrying her. In short, I knew not what to think or to say, because at one moment it seemed as if it was the most Providential thing in the world that Alice should have been brought here, and the next moment it seemed as if her presence only magnified our evils.

"Nay," she said, when I opened my mind to her, "seeing that the world is so large, what but a special ruling of Providence could have brought us all to this same island, out of the whole multitude of isles—and then again to this same estate out of so many? Humphrey, your faith was wont to be stronger. I believe—nay, I am quite sure—that it was for the strengthening and help of all alike that this hath been ordained. First, it enables me to nurse my poor Robin—mine, alas! no longer! Yet must I still love him as long as I have a heart to beat."

"Love him always, Child," I said. "This is no sin to love the companion of thy childhood, thy sweetheart, from whom thou wast torn by the most wicked treachery"—but could say no more, because the contemplation of that sweet face, now so mournful, yet so patient, made my voice to choke and my eyes to fill with tears. Said I not that a physician must still keep his mind free from all emotion?

All that day I conversed with her. We agreed that for the present she should neither acknowledge nor conceal the truth from Madam, upon whose good-will was now placed all our hopes. That is to say, if Madam questioned her she was to acknowledge that we were her former friends; but if Madam neither suspected anything, nor asked her anything, she should keep the matter to herself. She told me during this day all that had happened unto her since I saw her last, when we marched out of Taunton. Among other things I heard of the woman called Deb, who was now working in the canefields (she was one of a company whose duty it was to weed the canes). In the evening this woman, when the people returned, came to the sick-house. She was a great strapping woman, stronger than most men. She was dressed, like all the women on the estate, in a smock and petticoat, with a thick coif to keep off the sun, and a pair of strong shoes.

She came to help her mistress, as she fondly called Alice. She wanted to sit up and watch the sick man, so that her mistress might go to sleep. But Alice refused. Then this faithful creature rolled herself up in her rug and laid herself at the door, so that no one should go in or out without stepping over her. And so she fell asleep.

Then we began our night-watch, and talked in whispers sitting by the bedside of the fevered man. Presently, I forgot the wretchedness of our condition, the place where we were, our hopeless, helpless lot, our anxieties and our fears, in the joy and happiness of once more conversing with my mistress. She spoke to me after the manner of the old days, but with more seriousness, about the marvellous workings of the Lord among His people; and presently we began to talk of the music which we loved to play, and how the sweet concord and harmony of the notes lifted up the soul; and of pictures and painting, and Mr. Boscorel's drawings and my own poor attempts, and my studies in the schools of medicine, and so forth, as if my life was, indeed, but just beginning, and, instead of the Monmouth cap, and the canvas breeches, and common shirt, I was once more arrayed in velvet with a physician's wig and a goldheaded cane.

Lastly she prayed, entreating merciful Heaven to bestow health of mind and enlargement of body to the sick man upon the bed, and her brother, and her dear friend (meaning myself), and to all poor sufferers for religion; and she asked that, as it had been permitted that she should be taken from her earthly lover by treachery, so it might now be granted to her to lay down her life for his, so that he might go free and she die in his place.

Through the open window I saw the four stars which make the constellation they call the "Cruseroes," being like a cross fixed in the heavens. The night was still, and there was no sound save the shrill noise of the cigala, which is here as shrill as in Padua. Slave and master, bondman and free, were all asleep save in this house, where Robin rolled his heavy head, and murmured without ceasing, and Alice communed with her God. Surely, surely, I thought, here was no room for doubt? This my mistress had been brought here by the Hand of God Himself, to be as an angel or messenger of His own, for our help and succour—haply for our spiritual help alone, seeing that no longer was there any help from man.

(To be continued.)

NEW TALE BY MR. RIDER HAGGARD.

The first Instalment of a New Serial Story, of absorbing interest, entitled CLEOPATRA *(being an Account of the Fall and Vengeance of Harmachis, the Royal Egyptian, as set forth by his own hand), written by* H. RIDER HAGGARD *expressly for this Paper, will be given in the Number for Jan. 5, 1889, beginning a New Volume.*

Ready December 3,

OUR CHRISTMAS NUMBER

CONSISTING OF A

COMPLETE STORY by D. CHRISTIE MURRAY,

Entitled "PAUL JONES'S ALIAS,"

Illustrated by A. FORESTIER.

ASTRONOMICAL OCCURRENCES FOR DECEMBER.

The MOON is near Mercury on the morning of the 2nd. She is near Jupiter on the 3rd; she is near Venus on the evening of the 5th; and very near Mars on the evening of the 6th. She is near Saturn during the night hours of the 22nd, and morning hours of the 23rd, being to the left of the planet the whole night. The planet will be on the meridian or due south 22 minutes after 3h on the morning of the 23rd, and the Moon 21 minutes later, and she is near Jupiter on the 31st. Her phases or times of change are:—

New Moon on the	3rd at	6 minutes after	1h in the morning.
First Quarter	„ 10th „	46 „	6 „ „
Full Moon	„ 18th „	41 „	10 „ „
Last Quarter	„ 26th „	0 „	6 „ „

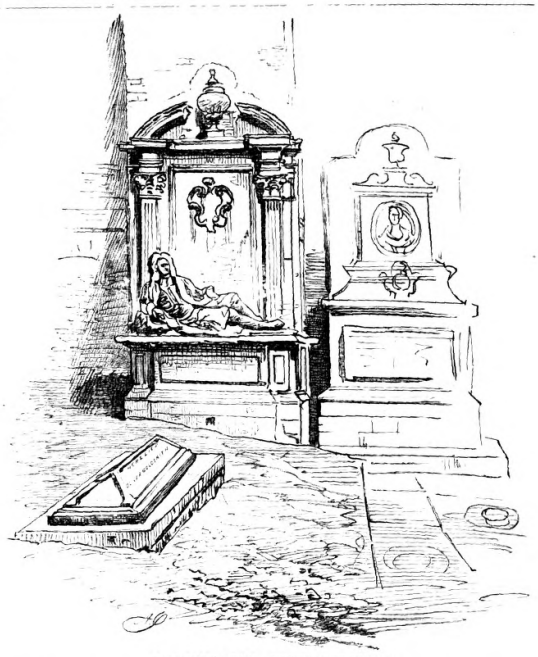
She is nearest the Earth on the 3rd, the most distant from it on the 16th, and nearest again on the 31st.

MERCURY rises on the 5th at 6h 41m a.m., or 1h 11m before sunrise; on the 10th at 7h 5m a.m., or 50 minutes before the Sun rises; on the 15th at 7h 29 a.m., or 35 minutes before sunrise; on the 20th at 7h 50m a.m., or 15 minutes before the Sun rises; on the 22nd at 7h 58m a.m., or 8 minutes before sunrise. He sets on the 26th at 3h 34m p.m., or 21 minutes before sunset; and on the 31st at 3h 53m p.m., or 6 minutes before the Sun sets. He is near the Moon on the 2nd; in descending node on the 10th; is near Jupiter on the 17th; at greatest distance from the Sun on the 20th, and in superior conjunction with the Sun on the 28th.

VENUS sets on the 1st at 6h 12m p.m., on the 8th at 6h 29m p.m., on the 18th at 6h 58m p.m., on the 28th at 7h 30m p.m., and on the 31st at 7h 38m p.m. She is near the Moon on the 5th.

MARS sets on the 1st at 7h 29m p.m., on the 9th at 7h 33m p.m., on the 29th at 7h 45m p.m., and on the 31st at 7h 47m p.m. He is at the least distance from the Sun on the 3rd, and near the Moon on the 6th.

JUPITER sets on the 1st at 4h 16m p.m., or 24 minutes after sunset; on the 8th at 3h 54m p.m., or five minutes after sunset. He rises on the 8th at 7h 54m a.m., or 1 minute before sunrise; on the 18th at 7h 27m a.m., or 37 minutes before the sun rises; on the 28th at 6h 58m a.m., or 1h 10m before the Sun rises, and on the 31st at 6h 49m a.m., or 1h 19m before sunrise. He is near the Moon on the 3rd; in conjunction with the Sun on the 8th, and near the Moon again on the last day.



SATURN rises on the 1st at 9h 19m p.m., on the 7th at 8h 56m p.m., on the 17th at 8h 15m p.m., on the 27th at 7h 34m p.m., and on the 31st at 7h 17m p.m. He is near the Moon on the 22nd.

SKETCHES IN THE TEMPLE.

Will not the time soon arrive for the Council of Legal Education, or some newly constituted authority, to assume the title, dignity, and powers of an English University of Law, in which the Honourable Societies of the Inner Temple and the Middle Temple, of Lincoln's Inn and Gray's Inn, shall be Colleges, possessing as they do large endowments, Governing Benchers, ample means of professional teaching, valuable scholarships in trust, noble precincts and buildings, with claims of historical antiquity and of past service equal to those of the Colleges of Oxford and Cambridge? In effect, but not in title and dignity, this University may be considered to exist and to exercise some of its functions, though the organisation of its teaching department is actually less complete than it was three or four centuries ago, when the students residing in the Inns received systematic instruction, and were exercised in "moots," or debates of nice legal problems, while they could obtain authorised tutors, instead of becoming, as now, the private pupils of counsel in chamber practice. We do not know but that it may hereafter seem good to revive part of the ancient methods, and to entrust the "Inns of Court" with more direct superintendence of the studies, in addition to their faculty of admitting members at the customary "calls to the Bar." Leaving the propriety and expediency of such measures to the wisest heads of that useful profession, and to the Legislature which will at any time be inclined to give effect to their recommendations, we present a few Sketches of "the Temple," or rather the two Temples, as we have done with Lincoln's Inn and Gray's Inn, looking at them only from a lay visitor's point of view, as picturesque features of London scenery, and as places full of interesting literary and personal associations, connected with the lives and the works of many illustrious Englishmen who dwelt in their chambers, and paced their quiet courts and pleasant gardens, or sallied forth into Fleet-street or the Strand, on their way to Court or to City, amidst the bustle of former generations.

MIDDLE TEMPLE LANE.

GOLDSMITH'S TOMB, TEMPLE CHURCHYARD.

It was in the reign of King Edward I., the religious Order of Knights Templars having been abolished by the Pope, that their former abode was leased to the students and professors of the common law, who then removed from several of the "hospitia curia," or hostels, previously occupied by them in Holborn. The Temple precinct, extending from Fleet-street to the Thames, and from Whitefriars to Essex House in the Strand, had been bestowed on the Templars by Henry II., having been part of the grounds of the ancient Royal Palace of Bridewell. The monastery of the Knights Templars, renowned for their valour in the Crusades, the heroes of Jaffa and Jerusalem, of Gaza and Ascalon, of Tiberias, of Acre and Mount Carmel, of Syria and Egypt, and the Lords of Cyprus, was a splendid residence, for the Order was immensely rich. They built the Temple Church in 1185, that is to say, the existing Round Church, through which the quadrangular Gothic edifice, built in 1240, is now entered. It is one of four Round Churches in England, the others being

THE CLOISTERS, INNER TEMPLE.

NO. 1, MIDDLE TEMPLE LANE.

at Cambridge, Northampton, and Maplestead in Essex, imitating the form of that of the Holy Sepulchre at Jerusalem. The interior is surrounded by an arcade of Early English arches, with a series of heads, which have been restored. On the paved floor are the mail-clad effigies, not of Knights Templars, but of "Associates" of the Order, who were buried underneath these tombs; one is Geoffrey De Magnaville, Earl of Essex, who died in 1144, and who took an active part in the

THE TEMPLE CHURCH.

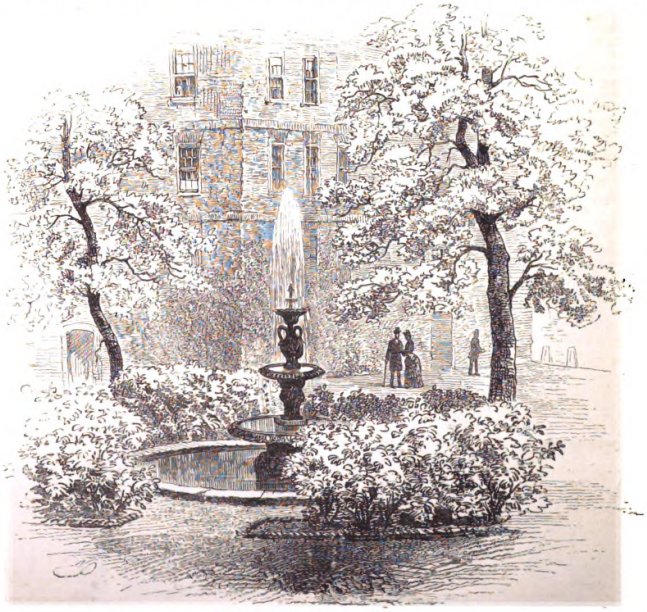
civil war against King Stephen; another is supposed to be William Marshal, Earl of Pembroke, Protector of the Kingdom in the minority of Henry III., with two of his sons, one of whom defeated the Welsh Prince Llewellyn, and married the King's sister; there is also the monument of Gilbert, Lord De Ros, who died in 1245. Many of the monuments of eminent lawyers have been removed from the lower part of the church to the triforium; and there are some outside the church, among which is that of Oliver Goldsmith, who died April 9, 1774, at No. 2, Brick Court, Middle Temple, where he lived in

MIDDLE TEMPLE HALL.

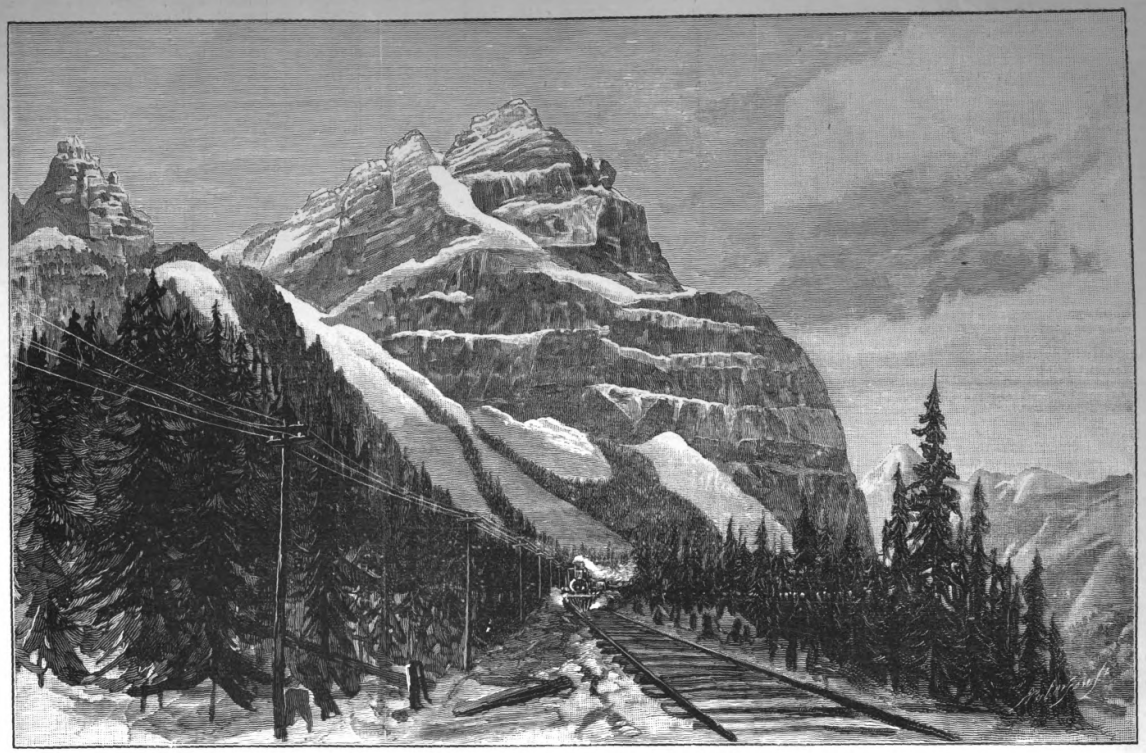
rooms over those of Blackstone, author of the "Commentaries," and was often visited there by Dr. Johnson, Edmund Burke, and Sir Joshua Reynolds.

The Middle Temple, to the west of the Inner Temple, is entered, from near Temple Bar, by the Middle Temple-lane, at the bottom of which, formerly, were the Temple Water-stairs, to take a wherry for conveyance on the river, which was then done as readily as you now take a cab in the street. Brick Court is passed to the right, and some quaint old houses to the left, with the entrance to the courts of the Inner Temple. The Hall of the Middle Temple, built in the early part of Queen Elizabeth's reign, from 1562 to 1574, under the superintendence of Mr. Edward Plowden, the Treasurer, is one of the finest edifices of its kind. The interior, nobly proportioned, 100 ft. long, 40 ft. wide, and 47 ft. high, has a roof of dark oak, richly carved, and windows emblazoned with the arms of distinguished members of this Society; it is adorned with a beautiful screen of carved oak, erected in 1575, at the lower end, and with Vandyke's fine portrait of Charles I. on horseback, with other portraits of seventeenth-century Kings and Queens, and with a collection of armour. It is interesting to remember that Shakspeare's "Twelfth Night" was acted in this hall before Queen Elizabeth on Feb. 2, 1601, when Shakspeare was, no doubt, present, if he was not one of the performers.

Beyond the Hall, to the west, are Fountain Court and Garden Court, and the Middle Temple Library, opened in 1861 by the Prince of Wales. The fountain has of late been somewhat altered, but has existed nearly two hundred years, and is a favourite with many persons of literary taste, not only for its pleasantness and gracefulness, but also for the frequent mention of it by esteemed authors. Dickens, in "Martin Chuzzlewit," makes it the place where Tom Pinch was accustomed to meet his sister Ruth, "the brightest and purest-hearted little woman in the world," and where that good fellow John Westlock had the good fortune to find her lingering in a happy hour. "Softly the whispering water broke and fell, and roguishly the dimples twinkled and sparkled on its sunny face, as he stole upon her footsteps. O foolish, panting, timid little heart!—why did she feign to be unconscious of his coming? Merrily the fountain leaped and danced, and the smiling dimples expanded more and more, until they broke into a laugh against the basin's rim and vanished." So we have a charming idyll even among "the smoky shrubs," as Dickens calls them, "the slow vegetation of Fountain Court," the chirping sparrows bred in Temple chinks and crannies, the grimy old houses and the worn flagstones, the dry and dusty channels of the law. "Old love-letters," he says, "shut up in iron boxes, among heaps of family papers, in the neighbouring offices, might have stirred and fluttered with a moment's recollection of their ancient tenderness," as Ruth met her lover there. Chaucer was a student of the Temple; Cowper, Charles Lamb, Thackeray, Tennyson dwelt in its chambers; but here is a fairer presence. Will the Hon. Society of the Middle Temple allow the readers of Dickens to set a white marble statue of sweet Ruth Pinch at the brink of the fountain? We do not think they will,

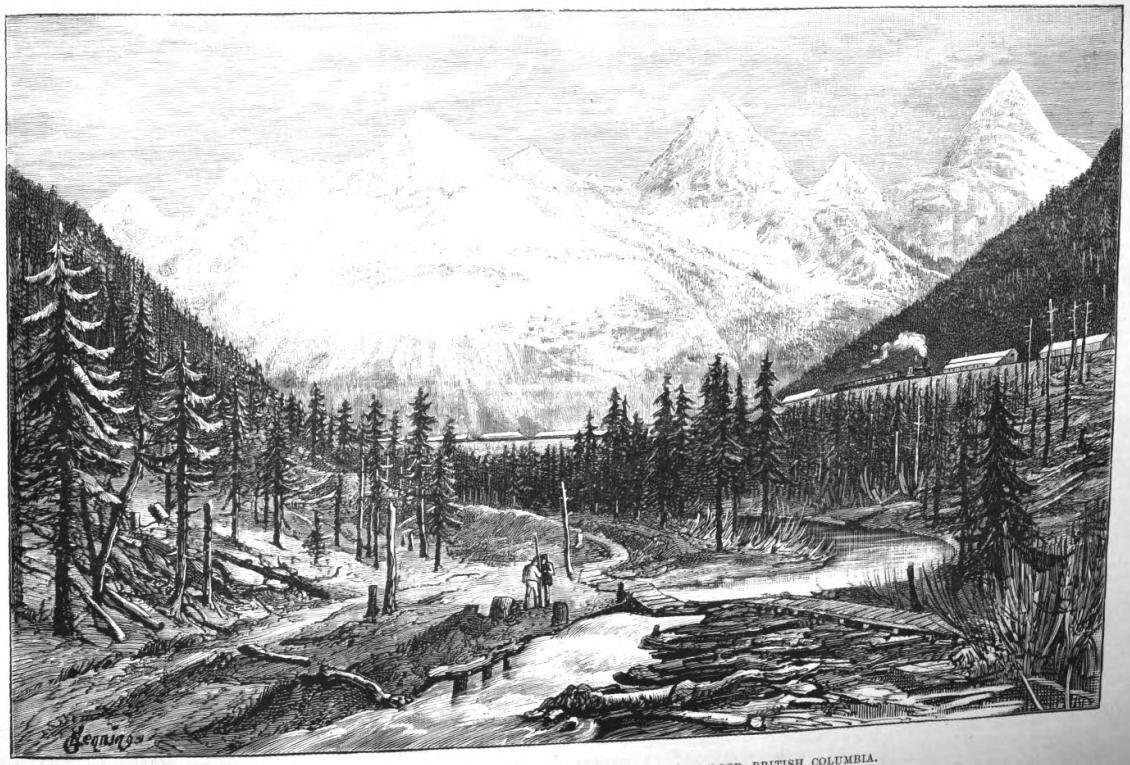


No. 2, BRICK-COURT, MIDDLE TEMPLE, WHERE OLIVER GOLDSMITH DIED.



though Shakspeare has been in their Hall, where the representative of his Viola has spoken the maidenly words:—

> By innocence I swear, and by my youth,
> I have one heart, one bosom, and one truth.



Of the Inner Temple, which is more extensive and which boasts grander new buildings for chambers, with a much larger garden, and a new Hall of good architectural style, much could be said if we had space to print it here. The old Hall, used until the present century, was the Refectory of the Knights Templars' Monastery; King John and King Henry III. had dined in that hall. The cloisters, destroyed by a fire in 1678, were rebuilt from a design by Sir Christopher Wren; upon which occasion, says Roger North, in his "Life of Lord Keeper Guildford," the students were reproved for neglect of the good old custom of "walking in evenings there, and putting cases." We occasionally see one or two of those young gentlemen passing through the cloisters, but have not overheard them discussing abstract questions of law, as they were expected to do in former times; and the "Moots" are now kept up only at Gray's Inn.

THE FOUNTAIN, MIDDLE TEMPLE.

MOUNT STEPHEN, EAST SIDE; ROCKY MOUNTAIN RANGE, BRITISH COLUMBIA.

THE SELKIRK MOUNTAIN RANGE, NEAR THE GLACIER HOUSE AND THE LOOP, BRITISH COLUMBIA.

THE CANADIAN PACIFIC RAILWAY: SKETCHES BY OUR SPECIAL ARTIST, MR. MELTON PRIOR.

CANADIAN PACIFIC RAILWAY: BRITISH COLUMBIA.

Our Special Artist, Mr. Melton Prior, in choosing subjects for his Sketches of the long railway line from Montreal to Vancouver, nearly three thousand miles, has preferred the wild and romantic highland scenery of British Columbia to the vast plains that extend from Winnipeg to the foot of the Rocky Mountains. One view of Mount Stephen, the highest summit of this range in Canadian latitudes, named from Sir George Stephen, President of the Canadian Pacific Railway Company, was presented in our last publication. Another view, from the eastern side, is now put before our readers. The railway station called Stephen is 5290 ft. above the sea-level, and here the waters begin to flow in two opposite directions: the streams running eastward having to join either the Athabasca or the Saskatchewan, and the latter finally to be discharged into Lake Winnipeg and Hudson's Bay; while those of the westward slope meet with the Columbia River, the Fraser River, or the Thompson River, whose issue is in the Pacific Ocean. Mount Stephen rises 8240 ft. above the railway.

Passing from Stephen down the tremendous ravine of the Kicking Horse, with a gradient of 220 ft. to the mile, the Columbia River is reached and crossed, and behind its valley rises another jagged and formidable range, the Selkirks, which are the second of the four mountain ranges that separate the plains from the Pacific Ocean. The ascent of the Selkirks is begun by a gradually-rising line along the sides of the high embankments which inclose the beautiful valley of the Beaver River. The engineering to bring the line from the vale to the heights is admirable. A bridge 1200 ft. in length is crossed in one place; in another, a trestle 295 ft. above a mighty torrent sweeps for 750 ft. in a graceful curve; at every minute the train passes over some splendid structure which resists or overleaps the force of mountain floods and avalanches. For miles one sees new bridges, and, in the gulch far below them the wrecks of splintered wood and twisted iron which show where slides of rock and ice destroyed the line in the winter before the points of danger had been learned. Now, huge bulwarks of rock and timber, sheds and tunnels insure the prevention of another such mischief. The summit reached, we see prodigious mountains rising a mile in sheer ascent beside the track, and at Rogers we pass two lines of snow-clad peaks, of which that on the right incloses a vast amphitheatre whose walls rise 9000 feet above the valley, and inclose a glacier of shining green, blue, and white, with which none in Switzerland is to be compared in size and beauty. Down the western slope the train runs by an imposing system of loops, which, coiling the track about as if it were a pile of rope, stretches nearly seven miles to gain two miles in distance and a few hundred feet in elevation. "The scenery now," says a writer, "is grand beyond the power of language to paint. One glacier forms upon another. To our right we pass the summit, and two miles on reach Glacier House, a beautiful Swiss châlet, in front of which are beautiful fountains throwing up icy streams. Here, apparently a few hundred yards away to our left, is a monster glacier with its foot not far above the level of the road. With a glass, we see mighty fissures cracking its surface. It bends over the mountain like a falling curtain. We are told it is a mile and a half wide, nine miles long, and 500 feet deep. Mount Sir Donald is watching its slow descent. Far above the snow, his peak, shaped like a diamond drill, pierces the blue sky over 6000 feet above us. We have to bend our heads back to look upon his pinnacle. They give us a half-hour to look, and eat a first-rate lunch."

The Duchess of Albany has become patroness of the Sanitary Institute.

The sale by auction of the steamer Great Eastern was concluded at New Ferry, Liverpool, on Nov. 24. The auction occupied five days, and, generally speaking, fair prices were obtained, the total receipts being £58,000. The vessel was purchased by the venders for £16,000.

The north transept of Salisbury Cathedral has received the addition to its stained glass of a window from the studio of Mr. Taylor, of Berners-street, the gift of Mrs. Middleton, in memory of her husband.—A stained window of five lights, surmounted by a rose, has been recently placed in the parish church of Long Crendon, Bucks. The window is the gift of Mr. Herbert Dodwell, and has been erected in memory of his mother, at a cost of £350.

A statue of the Queen-Empress in marble, intended to be placed in Government House, Singapore, has just been completed by Edward Geflowski, the well-known Polish sculptor. The figure is above lifesize, and is the result of a commission intrusted to him by the Secretary of State for the Colonies. The money was subscribed by the Chinese residents in Singapore, to commemorate the Jubilee of her Majesty. The statue has attracted many admiring visitors to the Colonial Office, where it is now being exhibited. The Queen wears her State robes, with the usual insignia of Royalty; and the likeness is at once pleasing and dignified. As she stands with the orb in one hand and the sceptre in the other, she conveys fully to the spectator the idea of the Queen-Empress. Medallion portraits of the Prince and Princess of Wales occupy the sides of the pedestal.

The trustees of the People's Palace, with the view of spreading an interest in the question of technical education, organised two conversaziones, the first of which was held on Nov. 24. The programme included, besides gymnastic displays in the gymnasium and a concert in the Queen's Hall, an exhibition in the new technical schools, which were recently built by the Drapers' Company. All the different departments of the schools were open for inspection, and the boys of the technical day school were to be seen by visitors at work at the bench, vice, lathe, &c. Experiments were also performed by the boys in the chemical and electrical laboratories, and boys were to be seen at work on various kinds of drawing, wood-carving, and modelling. Many hundreds visited the Palace on Saturday evening, and great interest was displayed in the various departments.

General Franklin and Mr. Somerville P. Tuck, the American Commissioners to the Paris Exposition of 1889, have issued a special circular to American artists at home and abroad. Applicants for space are desired to fill out the blanks accompanying the circulars, and to return them at once to the Commission at 1, Broadway, New York city. Only works of art executed since 1878 can be admitted: and copies, even in a different medium, will not be received. Artists residing in the United States must have their exhibits in New York by Feb. 15, 1889. Exhibitors residing in Europe must have their exhibits at Paris by March 20, 1889. A jury of artists will be chosen to examine and pass upon the works submitted. This jury will include, so far as possible, representatives of the four classes of exhibitors, painters, sculptors, architects, and engravers. One section of this jury will sit in New York, and the other in Paris; their decisions will be subject to revision by the Commission. The names and addresses of the agents appointed to receive exhibits in New York and Paris will be made known hereafter.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

R D F (St. Andrews).—Your question shall be answered next week. We have not had time for necessary reference.

COLUMBUS.—We intended to point out that the double mate in main play was a fatal flaw. If it is never knowingly admitted into any problem meant for publication.

DELTA.—There seems some error in your game with "Indian Amateur" (Muzio Gambit). As near, after Black's seventh move, White can continue—8, Q takes K B P (ch), K moves; 9, Q takes B, mate. Have you not omitted something?

A NEWMAN.—No. 1 can be solved in two moves by 1. Q to R 5th (ch). No. 2 is much too simple.

CHESS EDITOR, "EVENING NEWS" (Manchester).—Thanks for the regularity with which your interesting column is forwarded.

J DIXON.—(1) The sacrifice is unsound, and is never attempted except against young players. (2) Consult some treatise on the game, which will explain the points you ask about.

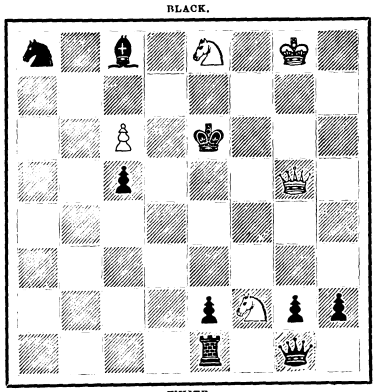
W GLEAVE.—Very neat, but rather too easy. We shall be glad to hear from you again.

SIGNOR ASPA.—Next week.

PROBLEMS received with thanks from J Pierce, J Amygdalis, and W Parsons.

CORRECT SOLUTIONS OF PROBLEM No. 2326 received from H S B (Burley), John S Moorat (Boulogne), J Bryden (Wimbledon), H S B (Shooter's-hill), P C (The Hague), R H Brooks, Charles Etherington, and C E P (of No. 227, from E J Winter Wood, W J Cross, A Starrin (Chiswick), A Quidnunc (Burley), A S (The Hague), Herbert Taylor, Dr F St, W F Payne, Mark Taylor (Gravesend), W P Welch, W H Hayward, Coxwell-road Chess Club, J Bryden, H E Maxted (Bow Minster), J Osmond, A H Mole, W H D (Woburn), W R, P C, A N Tongue (Pinchley), and James Marquis.

CORRECT SOLUTIONS OF PROBLEM No. 2328 received from R Worters (Canterbury), E Phillips, W H Reed (Liverpool), W Von Beverhoudt, E Casella (Paris), Jupiter Junior, Howard A, T H Wilson (Grange-over-Sands), Charles Wormall, B Bretto (Galway), John S Moorat (Boulogne), Julia Short (Exeter), G J Veale, W H Hallett, Dr Gustav Waltz (Heidelberg), W F Payne, E J Winter Wood, Rev. Winfield Cooper, Lieutenant-Colonel Loraine (Newcastle), W H Hayton, John A, A Newman, Dawn, J Bryden J Dixon, Bernard Reynolds, R F N Banks, Mariner F Plymouth, Pakela, J F Moon, E Louden, E B Schwann, T G (Ware), Alquin (Burton), T Roberts, Dr F St, E Lucas, Shadforth, J D Tucker (Leeds), C E P, James Pigg, C S, R H Brooks, W E Cartwright, W Heitzmann, L Desanges, Martin F, J Coad, and Mrs. Kelly.



SOLUTION OF PROBLEM No. 2326.

WHITE.	BLACK.
1. Q to B 4th	Any move
2. B to Kt 8th	Any move
3. Mates.	

PROBLEM No. 2330.

By W. T. PIERCE.

BLACK.

WHITE.

White to play, and mate in two moves.

CHESS IN SCOTLAND.

Offhand skirmish at the Dundee Chess Club between Messrs. G. B. FRASER and JOHN KENNEDY.

(Vienna Opening.)

WHITE (Mr. F.)	BLACK (Mr. K.)	WHITE (Mr. F.)	BLACK (Mr. K.)
1. P to K 4th	P to K 4th	12.	Q to R 5th (ch)
2. Q Kt to B 3rd	Q Kt to B 3rd	13. K to R 2nd	Castles
3. P to K B 4th	P takes P	14. P to Q 4th	Q B takes Kt (ch)
4. Kt to Q 5th		15. P takes Q B	B to Q 3rd
A novelty, the invention of Mr. Fraser. Its soundness, however, looks questionable.		16. Q B takes P	B takes B
4.	Q to R 5th (ch)	17. Q takes B	Kt to K B 3rd
5. K to K 2nd	B to Q B 4th	18. Q to K B 3rd	P to Q 3rd
Black, apparently, would get a safer game by Kt to Q 5th (ch); 6, K to Q 3rd, Kt to K 3rd; 7, Kt to K B 3rd, Q to R 4th; 8, P to Q B 4th, P to Q B 3rd, &c.		19. P to Q Kt 3rd	Q to R 4th
		20. P to Q R 4th	P to Q R 3rd
		21. P to Q Kt 4th	
6. Kt to K B 3rd	Q to B 7th (ch)	The winning move.	
7. K to Q 3rd	Kt to K 4th (ch)	21.	Q to Kt 3rd
8. K to B 3rd	K takes Kt	22. P takes P	P takes P
9. Q takes Kt	Q to Q 5th (ch)	23. K to Kt 3rd	Q to Kt 2nd
10. K to Kt 3rd	P to Q Kt 4th	24. Q to B 5th (ch)	K to Kt sq
11. P to Q R 3rd	B to Q Kt 2nd	More chances are afforded by interposing the Rook.	
12. P to Q B 3rd		25. R to R 5th	Q takes P (ch)
A brief examination will demonstrate that the capture of Q B P would be imprudent.		26. Q takes Q	Kt takes Q
		27. B takes P	K to Kt 2nd
		28. K R to Q R sq, and wins.	

BLINDFOLD CHESS.

One of eight games played simultaneously at the British Chess Club on Nov. 17.

(Centre Gambit.)

WHITE (Mr. Blackburne).	BLACK (Mr. Michael).	WHITE (Mr. Blackburne).	BLACK (Mr. Michael).
1. P to K 4th	P to K 4th	16. Q takes R	B takes Q
2. P to Q 4th	P takes P	17. R takes Q	B takes Kt
3. Q takes P	Kt to Q B 3rd	18. R to Q 7th	B to Kt 5th
4. Q to K 3rd	B to Kt 5th (ch)	19. R takes P	K to B sq
5. B to Q 2nd	Q to K 2nd	We think the Pawn might have been maintained by R to Kt sq.	
6. B to Q 3rd	Kt to K B 3rd	20. R takes P	R to K sq
7. Kt to K B 3rd	P to Q 4th	21. R takes R	K takes R
8. B takes B	Q takes B (ch)	22. P to B 3rd	B to B sq
9. Q Kt to Q 2nd	Castles	23. R to B 7th	B to Q 2nd
10. P to Q B 3rd	Q to Q 3rd	24. P to Q Kt 4th	K to Q sq
Q takes Kt P looks tempting, but would give a player like Mr. Blackburne the very beauty of a very strong attack.		25. R to Kt 7th	K to B sq
		26. R to Kt 5th	K to B 2nd
11. Castles	R to K sq	27. R to B 5th	K to Kt 3rd
12. K R to K sq	P takes P	28. K to B 2nd	P to Q R 4th
13. Kt takes Kt	Kt takes Kt	29. P to Q R 3rd	P takes P
14. B takes Kt	B to K B 4th	30. B P takes P	P to K Kt 3rd
15. Q R to Q sq	R takes B	31. K to K 3rd	P to R 4th
There seems to be nothing better. Q to Kt 3rd or B 3rd would yield no advantage.		32. P to R 4th, and the game was drawn.	

"Vademecum der Kombinations—Praxis." Leipzig, Von Adolf Roegner.—This is a collection of 120 endings from actual play, comprising examples from nearly all the great masters. Most of them are familiar brilliancies, but they are here usefully brought together, and the volume should take a place in every chess library. Some deficiencies, of course, are inevitable; but we think Mr. Mason might have been better represented, and Mr. Pollock's ending against Mr. Lee in Simpson's Handicap ought certainly to have had a place.

A new chess club has been started at Salisbury under the presidency of Dr. Coates, which it is hoped may prove attractive to players in the city and neighbourhood. Though the club is a small one it reckons among its members two ex-Presidents of the Oxford University Chess Club. The secretary is Mr. Woodrow.

Another chess column has commenced in the pages of a new contemporary, called *Information*.

Sir Algernon Borthwick, M.P., presented the prizes of the West London Rifles at the head-quarters at Kensington, on Nov. 24.

Mr. Samuel Pope, Q.C., Recorder of Bolton, has been elected Treasurer of the Hon. Society of the Middle Temple, in succession to Sir Henry James, Q.C., M.P.

ASPIRATIONS.

In the early years of life the most joyous moments, perhaps, are those spent in day-dreams of the future. A young man is full of hopes stimulating to action. Difficulties only serve to strengthen his resolution. He does not mean to be daunted, scorns the word "impossible," and not even what Beattie calls the "unconquerable bar" of poverty checks his generous enthusiasm. "What man has done man may do" is his motto, and there are even moments when he is not without a secret hope that he may do more. He will build up the fortunes of his family, paint like Turner, write poetry like Tennyson, lead an army to victory with the swift certainty of Marlborough, or move the world by his persuasive oratory. On the drudges who are content to earn their daily bread, to live and love, to die and be forgotten, the ambitious youth looks with something like contempt. He at least is resolved not to form one of the common herd, whose names never appear in print, save in the list of bankrupts or, finally, among the deaths in the *Times*:

Mrs. Browning, in her "Rhapsody of Life's Progress," has powerfully described the youthful enthusiasm which overrides all obstacles, and accounts no action impossible:—

> And we run with the stag, and we leap with the horse,
> And we swim with the fish through the broad water-course;
> And we strike with the falcon and hunt with the hound,
> And the joy that is in us flies out with a wound.
> * * * * * * *
> Then we act to a purpose—we spring up erect:
> We will tame the wild mouths of the wilderness steeds;
> We will plough up the seas in the ships double-decked,
> We will build the great cities and do the great deeds.

Aspirations such as these are frequently lost when a young man has to face the dull realities of life. What room is left for them when from morning until night he has to toil at a profession, or sit upon a high stool in a city office? By degrees the bright vision fades, he learns how to run in an official rut, and—

> Custom lies upon him with a weight,
> Heavy as frost, and deep almost as life.

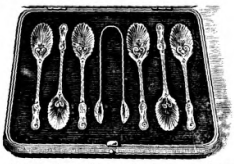
But there are men—have we not all known them?—whom circumstances cannot conquer; they seem urged onwards by an irresistible force, and such men the world gazes at with wonder, and calls "heroes." It is possible, of course, that this intense vitality, which moves on to its mark with a magnificent disregard of obstructions, may be far from praiseworthy. It may override morality; it may, as in the case of the First Napoleon, prove a frightful and desolating scourge; it may give birth to fatal counsels, as in the case of Strafford and of "poor, grey, old, little Laud." With its direction for good or evil I have nothing to do just now: what I want to point out is, how the aspirations of a man possessed with a great purpose will sweep him along with the strength of a strong current. He cannot linger on his course: he must conquer or die. We see this as strongly in men like Luther and Columbus, like Livingstone and Gordon, as in Julius Cæsar or in Oliver Cromwell. To this spirit we owe all our great discoveries. It was this that sent Sir John Franklin to the "White North." It is this which has caused Stanley to disappear—let us hope not for ever!—in the heart of Africa. To aspirations after some far-off good, and the results they may not live to realise, we owe the self-sacrifice of the missionary and of the philanthropist. These men are resolved that something shall be gained from life before life ends—some good deeds done, some fruitful seed sown: and they feel as Hamlet felt when he exclaimed—

> What is a man,
> If his chief good and market of his time
> Be but to sleep and feed? A beast—no more.
> Sure, He that made us with such large discourse,
> Looking before and after, gave us not
> That capability and godlike reason
> To fust in us unused?

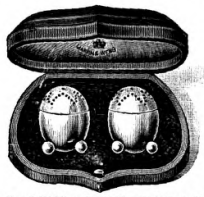
There are, it is to be feared, thousands of people who know nothing of that capability; who never exercise that godlike reason. They do the day's work with the regularity of a machine: they eat, they sleep, they marry, they die; and, if thinking is a proof of life, cannot be said to have lived at all. There is no one so greatly to be pitied as the man or woman who is without aspirations. Better to strive and fail—yes! to strive fifty times and to fail as often—than to live without an aim. Then, at least, you are conscious of having done your utmost; and if the victory is denied to you, the wholesome strength that comes from effort will save you from fainting in the field. But if success should come, who, in this overpayment of delight, will grudge the toil that has won it? And defeat itself sometimes means victory. That is what it meant when Sir John Moore died at Corunna; when Nelson died at Trafalgar; when Milton, in blindness and poverty, was left alone with his high imaginings; when Scott, in old age, with the loss of wealth, the death of his wife, and a deadly disease to fight against, showed, as he could never show before, the nobility of his nature; when Lincoln fell by the hand of an assassin; when Gordon, to the discredit of his country, died at the post of duty.

There are vocations in life in which success can be secured by sheer plodding, and without the high ambition I have attempted to describe. Fortunes may be won without it, but what man ever prospered in love, in the acquisition of knowledge, in statesmanship, or in literature who was not goaded onwards by his aspirations? It is easy to descant upon the evils of ambition, and to say with Wolsey that "by that sin fell the angels"; easy, too, is it to describe the blessings of content—which are neither few nor small; but ambition may be in the highest degree honourable, and content may, in some cases, indicate stupidity.

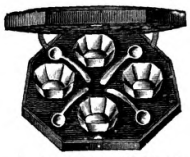
Probably no man is daily conscious of the aspirations which, in reality, mould his conduct. He is the creature of habit, and often goes on his way without knowing it. His feet move still towards the goal, though his eye may not see it, and I suppose there are few moments in life more delightful than the moments in which a long-cherished object is realised. It was at Rome, in 1764, that the idea of writing his great work entered the mind of Gibbon. "It was," he writes, "on the day, or, rather, the night of June 27, 1787, between the hours of eleven and twelve, that I wrote the last lines of the last page in a summer-house in my garden. After laying down my pen I took several turns in a *berceau*, or covered walk of acacias, which commands a prospect of the country, the lake and the mountains. The air was temperate, the sky was serene; the silver orb of the moon was reflected from the waters, and all Nature was silent. I will not dissemble the first emotion of joy on the recovery of my freedom, and, perhaps, the establishment of my fame. But my pride was soon humbled, and a sober melancholy was spread over my mind by the idea that I had taken an everlasting leave of an old and agreeable companion, and that whatsoever might be the future date of my history, the life of the historian must be short and precarious."



How natural was Gibbon's joy on this fulfilment of a great aspiration! how natural, too, his sadness on feeling that his vocation was gone, and that life was swiftly going! Alas! our noblest aspirations often fail to satisfy when they are attained, and in the very moment of victory we feel that the best prizes earth has to bestow are not free from vanity and vexation of spirit!



MAPPIN & WEBB'S ARTISTIC AND USEFUL CHRISTMAS PRESENTS.



Two Solid Silver Salts and Spoons, in Case, £2 18s.

Richly Chased Solid Silver Sugar or Pap Bowl ... £1 15s. 0d.

THE BEAUTY OF THE SKIN
ENHANCED BY
POUDRE D'AMOUR,
PREPARED BY PICARD FRERES.

Ladies will find this delightful and refreshing TOILET POWDER invaluable as an application for the skin, reducing a too ruddy complexion and brightening a pallid skin to a beautiful tint. Its application absorbs all moisture, and induces that coolness and comfort to the skin so desirable in the ball-room, theatre, or in the open air. Price 1s. per box; per post, free from observation, 1s. 3d. In three tints: Blanche, for fair skins; Naturelle, for darker complexions; and Rachel, for use by artificial light. Of all Chemists and Perfumers.

Depôts: R. HOVENDEN and SONS, 31 and 32, Berners-street, W.; and 91-95, City-road, E.C., London.

Silver Cases. BENSON'S "FIELD" Gold Cases.
£15 £25

And at 28, ROYAL EXCHANGE, E.C.; and 25, OLD BOND-STREET, W.

OBITUARY.

GENERAL SIR CHARLES ELLICE.

General Sir Charles Henry Ellice, G.C.B., late Adjutant-General to the Forces, died suddenly, at Brook House, Bury St. Edmunds, on Nov. 12. He was born in 1823, the second son of General Robert Ellice, and nephew of the Right Hon. Edward Ellice, of Invergarry, in the county of Inverness, M.P. for Coventry. He was educated at Sandhurst, and he entered the Army in 1839, became Captain in 1845, Major in 1849, Lieutenant-Colonel in 1851, Colonel in 1854, Major-General in 1855, Lieutenant-General in 1873, and General in 1877. He was Colonel 1st Battalion Berkshire Regiment, 1874 to 1884; and of the 1st and 2nd Battalions South Wales Borderers, 1884 to 1888. The distinguished General served with the Coldstream Guards in Canada, 1840 to 1842; on the North-West Frontier of India, 1855 to 1856; and in the Indian Mutiny, 1857 to 1858. He commanded the troops at the defeat of the Jhelum mutineers in 1857, when he was dangerously wounded, having had his horse killed under him. For his services he received two medals with clasps, and the decoration of C.B. He was made K.C.B. in 1873, and G.C.B. in 1882. He commanded the South-Eastern District, 1863 to 1868; was Quarter-master-General at head-quarters, 1871 to 1876; and Adjutant-General of the Forces, 1876 to 1882. Sir Charles married, in 1862, Louisa Caroline, elder daughter of Mr. William Henry Lambton, of Biddick-hill, Durham, brother of John George, first Earl of Durham.

SIR RONALD F. THOMSON.

Sir Ronald Ferguson Thomson, G.C.M.G., C.I.E., lately Envoy Extraordinary and Minister Plenipotentiary to the Court of Persia, died at The Hall, Dulwich, on Nov. 15, aged fifty-eight. He entered the Diplomatic service as Attaché at Teheran in 1848; was acting Consul and in charge of mission there in 1859, attended the Persian Ambassador to England in 1860. Appointed Oriental Secretary at Teheran in 1862, and Secretary of Legation in 1863; was in attendance upon the Shah during his Majesty's visit to England in 1873, and was Envoy Extraordinary and Minister Plenipotentiary to the Court of Persia and Consul-General at Teheran from 1879 to 1888. He was made a K.C.M.G. in 1884, G.C.M.G. in 1888, and C.I.E. in 1880. Sir Ronald was the only son of the late Mr. David Thomson, of Orkie, Fifeshire.

COLONEL DUNCAN, M.P.

Colonel Francis Duncan, C.B., D.C.L., LL.D., M.P. for Finsbury (Holborn Division), died at his residence, The Common, Woolwich, on Nov. 16. He was born in 1836, the son of the late Mr. John Duncan, was educated at Aberdeen University (M.A. in honours, 1855; Hon. D.C.L., King's College, Canada, 1861; Hon. LL.D., Aberdeen, 1874; Hon. D.C.L., Durham, 1882), entered the Royal Artillery in 1855, became Captain 1864, Major 1874, Lieutenant-Colonel 1881, and Colonel 1885, and was Instructor in the School of Gunnery 1877 to 1882. He served with distinction with the Egyptian Army 1883 to 1885 (third class Osmanieh), and in the Nile Expedition (mentioned in despatches, medal, and bronze star). He represented the Holborn Division in Parliament since 1885 as a Conservative. Colonel Duncan was made a C.B. in 1885.

We have also to record the deaths of—

Sir David William Barclay, Bart., on Nov. 23, in his 85th year. His memoir will appear in our next issue.

Miss Fanny Macaulay, after a few days' illness, at Brighton, on Nov. 10, aged eighty. She was the only surviving sister of Thomas Babington, Lord Macaulay, the distinguished statesman, orator, historian, and poet.

Lieutenant-Colonel Henry Aston, late 10th Bombay Native Infantry, on Nov. 13, aged eighty-four.

The Rev. William Lyster Cartwright, M.A., Vicar of Brockenhurst, suddenly, on Nov. 4, aged fifty-two.

Major-General Claude Malet Ducat, late Bombay Staff Corps, at Charmont, near Dorset, on Nov. 11, aged fifty-five.

The Ven. John Hodgson Iles, M.A., Archdeacon of Stafford, and Canon Residentiary of Lichfield, on Nov. 13, aged sixty-one.

Captain George Bayly, Elder Brother of Trinity House, at 8, Kempsholt-road, S.W., on Nov. 13, in his eighty-third year.

Lieutenant-Colonel Granville William Puget, late of the 34th (the Border) Regiment, on Nov. 17, at 46, Redcliffe-square.

Lieutenant-Colonel Trevor Goff, on Nov. 17, at Everton Grange, Lymington.

The Rev. George Frederick Fessey, M.A., at his residence, 5, Glenfall-terrace, Cheltenham, on Nov. 11, aged eighty-one. He was formerly Vicar of Redditch and Rural Dean.

Mrs. Ireland, suddenly, at her residence, Sandford-place, Cheltenham, on Nov. 18. She was the daughter of the late Sir William Earle Welby, Bart., and widow of the late Mr. Thomas James Ireland.

The Rev. Richard Okes, D.D., Provost of King's College, Cambridge, at the Provost's Lodge, on Nov. 25, in his ninety-first year. The deceased gentleman, who graduated in Classics in 1822, was appointed Provost of King's in 1850. A year later he served the office of Vice-Chancellor.

Maria Lady Mansel, on Nov. 18, at her residence, Wrotham Heath House, Kent, aged eighty-one. She was the widow of Sir John Bell William Mansel, Bart., of Wrotham Heath, Kent, and Masteilo, Carmarthenshire, and sister of the late Sir Henry Dymoke, of Scrivelsby, Hereditary Champion of England.

Major-General John Mitchell, late Royal Marines, at The Mount, Totnes, near Devon, on Nov. 9, in his eightieth year. He entered the Army in 1827, and attained the rank of Major-General in 1864. He served with his regiment in the Crimean War of 1855, and also at the surrender of Kinbourn (medal with clasp and Turkish medal).

Mr. John William Jameson, at his residence, Ardmore, Booterstown, in the county of Dublin, on Nov. 7, aged forty-two. He was the eldest son of Mr. James Jameson, of Delvin Lodge, Balbriggan, in the county of Dublin, and Glencormack, in the county of Wicklow, by Lucy, his wife, daughter of Mr. William Cairnes, of Stameen, in the county of Meath.

Mr. David Souter-Robertson, of Lawhead, in the county of Lanark, of Whitehill, in the county of Linlithgow, and of Cookstone, in the county of Forfar, on Nov. 10, aged eighty-six. He was educated at Edinburgh, and was a Justice of the Peace for Lanarkshire, Buteshire, Forfarshire, and Linlithgowshire, and a Deputy-Lieutenant for the two former counties.

Mr. William Maccall, who died Nov. 19, at Bexley Heath, aged seventy-six, was author of "The Elements of Individualism," and other treatises of religious philosophy, and of many works, especially in modern literary biography and criticism, treating of eminent French, German, and Italian writers. He was a personal friend of Carlyle.

The Rev. Peter Edward Boissier, M.A., recently, at Clifton, near Bristol, in the ninety-eighth year of his age. He took his Bachelor's degree at Christ Church, Oxford, in 1812, when he obtained a third class in the then newly-founded Classical Honour Schools, his name appearing side by side with those of the late Lords Bathurst, De La Warr, and Ellenborough, and the late Mr. Justice Coleridge. From 1835 down to 1859 Mr. Boissier held the incumbency of St. Peter's, Malvern Wells, of which he was also the founder at a time when the establishment of new district churches was neither common nor easy.

Captain John Ward, R.N., on Nov. 12, at Round Oak, Greenham, Newbury. He served in the Baltic in command of H.M.S. gun-boat Hind, and in the Pembroke on the Haiwich station. He married, in 1853, Annie Huskisson, daughter of Sir Roger Therry, a Judge of the Supreme Court of Sydney, New South Wales.

Major Purcell O'Gorman, who represented Waterford city in Parliament up to 1879, at his residence, Springfield, in the county of Kilkenny, on Nov. 24, after a short illness. The gallant Major, whose gigantic figure and marked individuality made him a notable person in the House of Commons, was in his seventieth year. He previously served in the 90th Light Infantry, and gained distinction during the Crimean Campaign.

Major-General Charles Elphinstone Rennie, late Essex Regiment (44th), at The Barons, Twickenham, suddenly, on Nov. 11, in his forty-ninth year. He entered the Army in 1858, and became Major-General (honorary) in 1885. He served in the campaign of 1860 in the north of China, including the action of Sinho, and the storm and capture of the Taku Forts (medal with clasp).

Lady Vere Catherina Louisa Cameron, at 22, Eccleston-square, on Nov. 15, aged eighty-five. She was the third daughter of the Hon. George Vere Hobart, by Janet, his second wife, daughter of Colonel Alexander Maclean, and was half-sister of the fifth and sixth Earls of Buckinghamshire. Her Ladyship married, in 1832, Mr. Donald Cameron of Lochiel, but was left a widow in 1859.

Colonel William Henry Charles Wellesley, eldest surviving son of the Hon. and Rev. Gerald Valerian Wellesley, D.D., by Emily Mary, his wife, eldest daughter of Charles, first Earl Cadogan, and nephew of Arthur, the first and great Duke of Wellington, K.G., recently, aged seventy-five. His services in the Army extended over fifty years, of which twenty-seven years were spent in active service in the Crimea and in India.

Lieutenant-Colonel Ernest Henry Manningham Buller, commanding second battalion Rifle Brigade at Woolwich, on Nov. 9, aged forty-nine. He was the youngest son of Sir Edward Manningham Buller, first Baronet of Dilhorne, Staffordshire (brother of John, first Lord Churston), by Mary Anne his wife, daughter and heiress of Major-General Coote Manningham, entered the Army in 1855, and became Lieutenant-Colonel in 1885. He served in the Zulu War of 1879, and also served under Sir Evelyn Wood in the Boer War of 1881. He was three times mentioned in despatches and received a medal with clasp.

The Lord Mayor presided on Nov. 22 at the annual distribution of prizes at the Birkbeck Institute. The Earl of Northbrook, president of the institution, presented the prizes.

"Benson's Bond-street Novelties" is the title of a unique little book just issued by Mr. Benson, of Old Bond-street. All wishing to have a souvenir of the season should write for a copy of this little book, which is issued gratis.

Mr. A. Goring Thomas will publish before Christmas, through Messrs. J. B. Cramer and Co., an album of twelve new English songs—ten solos and two duets—each separately dedicated to a well-known singer. The words throughout are by Mr. Harold Boulton, co-editor of "Songs of the North."

THE LADIES' COLUMN.

Fashions in hair-dressing are changing. The fringe is no longer the great feature of the coiffure. Indeed, it has to a considerable extent departed altogether, only a few stray curly rings of tresses falling along the top of the forehead, just to soften the effect. Even this is frequently dispensed with; women with intellectual foreheads, and who do not mind risking looking a little severe, turn the hair straight up, not straining it off the forehead, but prettily rolling it over a pad just above the roots. Many faces are best suited by a style, whether of hair-dressing or of head-covering, which goes nearly straight up above the face; a slope rising by degrees, like a small hillock, from the brow to the middle of the head, is rarely becoming. In trying that style of turning up the hair, therefore, it should be borne in mind that the front roll should not be set too far back on the head. After drawing the front hair back over the pad, the end of that hair and the back hair twisted together can be arranged in a few coils, or turned over pads to make rolls, on the top of the head; or for a young woman with plenty of hair it can be combed backwards and dressed *à la Catogan*. For this, all the hair is plaited in one thick loose coil, the end of which is turned up once against the top part of the plait, so that it reaches the nape of the neck, where the two portions of the plait are secured together, either by a proper slide of tortoiseshell or of jet or of steel, or else by a tie of narrow ribbon, or a bow of velvet. The latter must be black for outdoor wear, but may be white or coloured for evening dress.

For an "Empire" evening gown, there is a distinctive sort of coiffure: a few curls fall on the forehead, the hair is thence drawn flat to the extreme top point or back of the crown, and there is formed into a large double bow, or close, high cluster of loops. A flat bandeau of gold, or of velvet with a diamond star on it, can then be laid across the head; or a tiara may be worn; or a string of pearls may be twisted along the base of the bow of hair, or a small half-wreath of flowers can be placed in the same situation.

Hair-dressing and head-gear have always a natural relation. These new fashions in coiffures are all particularly suited to the new styles of chapeaux. Hats and bonnets both have flat crowns, so that there is small room within them for the top twists and frizzles of the style of doing the hair that is departing. But while the crowns of the newest bonnets rest almost flat on the head, the brims are high and open, and the front roll of hair looks well beneath them. The *Catogan* is particularly suitable for the broad-brimmed hats with the crowns covered with feathers that are now most fashionable.

The Empire evening gowns are specially fitted for the display of fine brocades, and accordingly there is a good supply of those beautiful fabrics in the market. The short bodice, with the broad sash, placing the waist only a few inches below the arm-pits, and the perfectly straight petticoat descending thence to the ground, demands an exceptionally rich and handsome material, without which the style looks "skimpy." There is an interesting exhibition of brocades now open at 3, Bruton-street, from which it appears that English manufacturers are making a most commendable effort to meet the demand in this direction. The gallery contains specimens of antique brocades, some being actually in the form of dresses. One has a white ground dotted over with baskets of many-coloured flowers, and this is made up as a sacque, and trimmed round the bottom with a narrow ruche of pink silk, all faded and frayed and ancient-looking, while the rich brocade itself looks quite fresh still. Side by side with these old fabrics there are specimens of modern productions, a large proportion of which are made in Spitalfields. One of these is an exquisite silver brocade, very much like that worn by the Princess of Wales at the Jubilee service; and there are others so full of colour without glare that Burne-Jones might paint from them. The texture is firm and solid—what one might call *important*—and yet soft; and altogether, the Spitalfields firm which has manufactured these fine fabrics deserves to succeed.

There is a peculiar beauty, a softness and harmony, in the old specimens, produced partly by mere efflux of time, toning and mellowing tints, but partly also by the costly character of the material. This is an age when cheapness is glorified. But fine silks can never be low-priced; and cheap ones can, therefore, never be fine. It is to be hoped that the revival of the beautiful brocade patterns and styles of a hundred years ago will not be checked by the springing into existence of vulgar printed imitations. Certainly, anyone who wants an Empire gown should be prepared to pay a proper price for a fabric suitable for the style. The Empress Josephine, it is recorded, was most extravagant in dress: no wonder, when there were such temptations as old brocades in her day!

For ball dresses there are many new thin materials. Plain nets are superseded by striped ones, some of the stripes being lacelike, and others with a rather coarse-barred pattern. Net, black or white, dotted all over with coloured chenille, makes an effective dress with a satin bodice of the same tint as the spots. The fashion of having a silk or satin bodice with a thin and airy confection in the way of skirt is still in full vogue, and I learn that at the recent county ball at Sandringham this style was almost universally adopted by the younger women. Flowers are very much used on ball skirts, trails being carried across the fronts, and epaulettes or shoulder-straps are formed of the same kind of blossoms.

Charity is women's special province, and, according to their means, most of them strive to occupy it. The pupils of the Scientific Dress-Cutting Association have formed a Dorcas Society amongst themselves for the benefit of the Children's Hospital, and from fifty to a hundred young ladies give two hours of an evening once a week, after taking their dress-making lessons, to manufacturing simple and useful little garments with that end in view. Miss Grace Hawthorne's matinées of "The Love that Kills" all this week have been for the benefit of Mrs. Jay's halfpenny dinners in the East-End; and a portion of the profits of the highly-successful evening production "Hands Across the Sea" have been given by the generous manageress to the same object. Mrs. Jay has been a model of economy in her dinner scheme, as she has provided over 40,000 dinners at a cost of considerably less than a penny each, though it exceeded the halfpenny charged to the diners, who were mostly very poor children.

The Local Government Board should call in Mrs. Jay's assistance, as it appears that the gentlemen of that body have come signally to grief over a cooking recipe for which they have made themselves responsible. According to the *Shields Daily News*, that masterful central bureau has issued to the guardians the following recipe for workhouse soup:—Quantity of each ingredient for a gallon: beef, 16 oz.; bones, 24 oz.; barley, 8 oz.; split peas, 8 oz.; oatmeal, 8 oz.; onions, 8 oz.; carrots, 16 oz. The guardians are under the impression that they are bound to follow this recipe without alteration, but the result of doing so is to produce "a mass of a consistence as dense as the department. It is a conglomerate the only aim of which appears to be that, if another 'work us boy' falls into the copper, he may stick on the surface." Such errors are sure occasionally to occur with an exclusively masculine management of what are really domestic affairs. Paid female officials should help in the administration of State charity, as unpaid workers of that sex do in so much private charity.

FLORENCE FENWICK-MILLER.

The Mercers' Company have given a donation of 100 guineas to the Vauxhall Park committee.

The Lord Mayor and Sheriffs and a distinguished company were entertained on Nov. 26 at dinner in the Saddlers' Hall, Cheapside, by the Company of Plumbers.

A terrible storm visited the whole of the Atlantic seaboard on Nov. 25, blocking railway and telegraphic communications, and causing great damage by land and sea.

Mr. Joseph Bowles, stationer, of George-street, Mansion House, has been unanimously elected as the new representative in the Court of Common Council of the ward of Walbrook, in the place of Mr. Samuel Ward, who has become disqualified.

The Duchess of Sutherland died on Nov. 26 at Stafford House. The deceased lady, Anne, Countess of Cromartie in her own right, and only child of the late Mr. John Hay Mackenzie, was married to the Duke of Sutherland in 1849. A memoir of her Grace will appear in our next issue.

At the meeting of the Royal Botanic Society on Nov. 24, it was stated by the Secretary that, owing to the unusual warmth during the month (nearly five degrees above the mean for the last seven years), several of our early spring flowers, such as primroses and cowslips, were in bloom in the gardens.

The first ordinary general meeting of the Sanitary Institute was held on Nov. 22, Sir Douglas Galton, K.C.B., F.R.S., in the chair. The council reported the successful commencement of the institute, nearly 500 members and associates had been enrolled, and the institute had before it a large field of useful work. The Duke of Northumberland was elected as president of the institute, and Inspector-General R. Lawson, LL.D., was chosen treasurer.

The Birmingham Cattle and Poultry Show, which holds its fortieth annual show on Dec. 1, 3, 4, 5, and 6, has received the largest entry of cattle on record. The Herefords particularly furnish a grand display, and in this section will be found the strongest class, numerically, in the whole show. Shorthorns and Devons are well up to the average, and the classes for Scots and crosses, owing to the improved classification, are well patronised by feeders from the North. With the exception of Shropshires, there is not a strong display of sheep; but some extraordinary pens of lambs are entered, both for the butchers' prizes and the society's. A large and excellent entry of pigs of all sorts is secured. The show of poultry is again on a very large scale, there being 250 game cocks and over one hundred pens of turkeys. There is an excellent entry from the Royal farms at Windsor and Sandringham, and also excellent competition for the butchers' prizes, which in the cattle are almost the strongest class.

BRIDAL BOUQUET BLOOM
BEAUTIFIES THE COMPLEXION

DR. DUNBAR'S ALKARAM. or Anti-Catarrh Smelling Bottle.

ALKARAM. COLDS.
ALKARAM COLDS.
ALKARAM. COLDS.

IF inhaled on the first symptoms, ALKARAM will at once arrest them, and cure severe cases in half an hour. Sold by all Chemists, 2s. 9d. a Bottle. Address, Dr. Dunbar, care of Messrs. F. Newbery and Sons, 1, King Edward-st., E.C.

GOLDEN HAIR.—Robare's AUREOLINE produces the beautiful golden colour so much admired. Warranted perfectly harmless. Price 5s. 6d. and 10s. 6d., of all principal Perfumers and Chemists throughout the world. Agents, R. HOVENDEN and SONS, 31 and 32, Berners-st., W.

VALUABLE DISCOVERY for the HAIR. If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed. "The Mexican Hair Renewer" is sold by Chemists and Perfumers everywhere, at 3s. 6d. per Bottle.

COUGHS, COLDS, ASTHMA,
BRONCHITIS, and NEURALGIA.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the "Times," July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in cholera was Chlorodyne.—See "Lancet," Dec. 31, 1853.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Extract from the "Medical Times," Jan. 12, 1866:—"Is prescribed by scores of orthodox practitioners. Of course, it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, Rheumatism, &c.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in Cholera, Dysentery, Diarrhœa, &c.

DR. J. COLLIS BROWNE'S CHLORODYNE.—CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government stamp. Overwhelming medical testimony accompanies each Bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. Sold in Bottles, 1s. 1½d. 2s. 9d., 4s. 6d., and 11s.

The Kodak.

KODAK—Abroad.

KODAK—Caught on the "Fly."

KODAK—On Board Ship.

WITH this Camera is presented an entirely novel and attractive system of Amateur Photography, by which the finest pictures may be taken by anyone having no previous knowledge of the art, and without the necessity of dark room or chemicals.

The comparative size of the Kodak is shown in the accompanying illustrations.

AS A TOURISTS' CAMERA it is unrivalled. No cumbersome tripod or plate-holders are needed. It is carried like an ordinary field glass, and with it may be photographed objects moving, or at rest, landscapes, animals, interiors of rooms, or cathedrals.

ONE HUNDRED EXPOSURES may be made consecutively.

FOR CHRISTMAS the Kodak offers novelty, beauty, and usefulness.

PRINCE HENRI D'ORLEANS has used the Kodak and writes us saying:

"The results are marvellous. The enlargements which you sent me are superb."

Full Information and Samples of Work done by the Instrument will be furnished upon application, or a Personal Inspection may be had at the Office of

THE EASTMAN DRY PLATE & FILM CO.,

PETER ROBINSON, Oxford-st.

WILLS AND BEQUESTS.

The will (dated Aug. 11, 1886) of John Joseph Jones, J.P., D.L., late of Abberley Hall, Stourport, Worcester, who died on Aug. 5, at Carlsbad, was proved on Nov. 21 by William Jones and James Jones, the brothers and executors, the value of the personal estate in the United Kingdom amounting to upwards of £247,000. The testator devises his estates at Oldham, Lancashire, to his eldest son, with remainder to his other sons, in seniority, with remainder to his brother William. He bequeaths £2000 and his household furniture, carriages and horses, to his wife, Mrs. Sarah Amelia Jones, and, during her life or widowhood, the use of his plate, jewels, paintings, and articles of virth, and an annuity of £5000; on her remarriage the said annuity is to be reduced to £1000, and on her death the jewels, plate, &c., are to be sold, and the proceeds given to his nieces, the daughters of his brothers William and James; and £10,000 to his brother James. The residue of his real and personal estate he leaves to his children; but in default of children to his brothers William and James, in equal shares.

The will (dated Oct. 17, 1887) of the Right Hon. Sir Henry Singer Keating, P.C., LL.D., formerly M.P. for Reading, and a Judge of the Queen's Bench, late of No. 11, Prince's-gardens, Kensington, who died on Oct. 1 at St. Leonards, was proved on Nov. 9 by Henry Sheehy Keating, the son and sole executor, the value of the personal estate being sworn to exceed £84,000. The testator bequeaths £1500 to his niece Agnes Keating; £1000 to his niece Geraldine Keating; £500 to his cousin, Rear-Admiral Morgan Singer; £100 each to his godson Egerton Phillimore, the Hon. Hugh Gough, and his cousins William Keating, Henry Keating, and Kathleen Thornhill; and legacies to servants. The residue of his real and personal estate he leaves to his son, Henry Sheehy, absolutely.

The will (dated March 13, 1876), with three codicils (dated Nov. 5, 1881; March 12, 1884; and Sept. 6, 1886), of Mr. Charles Octavius Swinnerton Morgan, J.P., D.L., F.R.S., and M.P. for Monmouthshire from 1840 to 1874, late of The Friars, Newport, Monmouthshire, who died on Aug. 5 last, was proved on Nov. 14 by Henry Salusbury Milman, the nephew, and Sir George Ferdinand Radzivil Walker, Bart., the executors, the value of the personal estate exceeding £68,000. The testator bequeaths £2000 to Radzivil Walker; £1500 to Ivor Walker; £1000 each to Clarence, Devereux, Charles, Roland, and Charles Evelyn Walker; £1000 to General Gustavus Milman; £500 each to Henry Salusbury Milman, Colonel Everard Milman, Colonel George Milman, and Angela and Jemima Milman; £200 each to Hugh Owen, Colonel John Owen, William Owen, and Angelina Owen; £300 to his niece, the Countess of Hereford; £750 to Sir George Walker; £200 to the Newport Corporation for the support of a Free Library or a School of Arts and Science; £100 each to the Newport Infirmary and the Llandaff Church Extension Fund; and all his shares and interest in the Monmouth Railway and Canal Company, upon trust, for his niece, Lady Walker, for life, and then to her son, Radzivil Walker. He charges all his interest in the Tredegar Wharf Company with the payment of annuities of £250 each to Henry Salusbury Milman, General Gustavus Milman, Colonel Everard Milman, and Angela and Jemima Milman; and £150 each to Hugh Owen, Colonel John Owen, William Owen, Angelina Owen, and Sir George Walker, for life, then to his wife, Lady Walker, and on her death to their son, Ferdinand Walker. He gives all his wonderful collection of watches, clocks, dials, Papal and other large rings, Chamberlain's keys, and china to the British Museum; and legacies and specific gifts to his relatives. The residue of his property he leaves to his nephew, Henry Salusbury Milman.

The Scotch Confirmation, under the seal of the Commissariot of the county of Edinburgh, of the trust disposition and settlement (dated April 12, 1884) of John Millar, Lord Craighill, J.P., one of the Senators of the College of Justice, late of No. 3, Ainslie-place, Edinburgh, who died on Sept. 22, granted to Robert Lee, James Arthur Crichton, John Hepburn Millar (the son), and Elizabeth Constance Millar (the daughter), the executors nominate, was resealed in London on Nov. 19, the value of the personal estate in England and Scotland exceeding £55,000.

The will (dated July 5, 1878), with a codicil (dated July 20, 1882), of Mr. John Moss Lawrence, late of No. 37, Belsize-avenue, who died on Oct. 19, was proved on Nov. 20 by Mrs. Emily Lawrence, the widow, and Laurie Asher Lawrence and Arthur Moss Lawrence, the sons, the executors, the value of the personal estate amounting to upwards of £51,000. The testator bequeaths £900, his house, with the furniture and contents, and an annuity of £1800 to his wife; £50 each to the Board of Guardians for the Relief of Jewish Poor and the Jews' Hospital and Orphan Asylum (Norwood); and nineteen guineas each to the Metropolitan Free Hospital, the Jews' Blind Asylum, the London Hospital, King's College Hospital, the Jews' Aged Needy Society, the Association for the Oral Instruction of the Deaf and Dumb, the Jews' Deaf and Dumb Home, the New Hospital for Women (Marylebone-road), and to the Synagogue at which he is a seatholder at the time of his death. The residue of his real and personal estate he leaves between his children.

The will (dated Dec. 8, 1880), with two codicils (dated Nov. 4, 1884, and May 5, 1885), of Mrs. Elizabeth Moulton, late of Kingston House, Bradford, Wilts, who died on June 11, was proved on Nov. 17 by Horatio Moulton and John Moulton, the sons and executors, the value of the personal estate amounting to upwards of £43,000. The testatrix bequeaths £5000, upon trust, for her daughter, Mrs. Catherine Denham, for life, and then to her children; £1000 each to her granddaughters, Susan and Clara Moulton, Kate Elizabeth Rule, and Henrietta Kuhhandt; specific gifts of jewels to relatives; and legacies to servants. The residue of her property she leaves between her sons, Horatio and John Moulton.

The will (dated Aug. 9, 1879) of Miss Emma Carpue, late of No. 8A, Manchester-square, who died on Aug. 3, was proved on Nov. 14 by Sharon Grote Turner, the surviving executor, the value of the personal estate exceeding £40,000. The testatrix leaves all her property to her sisters Anna Augusta and Sophia, or to the survivor of them; but in the event of both of them predeceasing her, which appears to have happened, then she bequeaths £6500 to St. George's Hospital, at which her father, Joseph Constantine Carpue, was a pupil; certain stocks and shares to the Rev. Thomas Barge and Miss Barge; £1000 each to Mary and Emily Turner, and her house, No. 8A, Manchester-square, with the furniture and contents; and £500 to her executor, Mr. Turner. The residue of her property she leaves in equal shares between the following charities—viz., the Margate Sea-Bathing Infirmary, the Royal Free Hospital (Gray's-inn-road), the Shipwrecked Fishermen and Mariners' Benevolent Society, the Society for the Relief of Widows and Orphans of Medical Men, the Church Missionary Society, the London City Mission, and the British and Foreign Bible Society.

The will (dated June 1, 1885) of Miss Caroline Webber, late of Sparrow Herne, Bushey, Herts, who died on Sept. 8, was proved on Nov. 15 by Robert Webber Monro, Robert Bryan Webber, and Reginald Herbert Blyth, the executors, the value of the personal estate exceeding £25,000. The testatrix bequeaths certain stocks, upon trust, for the children of her brother Henry and Lucy, his wife; and, subject thereto, she leaves all her property, upon trust, for her sister, Laura Webber, for life, and, on her decease, the residue is to follow the same trusts as are contained in the will of her late brother, George.

A JOURNEY TO THE ATLAS MOUNTAINS.

In the absence of General R. Strachey, president of the Royal Geographical Society, General Sir C. P. Beauchamp Walker occupied the chair on Nov. 26 at a well-attended meeting held in the theatre of the London University, Burlington-gardens.

The paper read was by Mr. Joseph Thomson, and was descriptive of a journey made to the Atlas Mountains in Southern Morocco in the early part of the present year. Except for the explorations of Sir Joseph Hooker and his companion, Mr. Ball, little was known of the geographical features and geological structure of the Atlas, all attempts made hitherto to break down the barrier of Moorish fanaticism, suspicion, and official obstruction having met with very slight success. It was with a wide field for his exploring instincts that Mr. Thomson, accompanied by Mr. Harold Crichton-Browne, started from England last March on his voyage of discovery. Almost from the outset the travellers experienced the same difficulties and discouragements that had befallen their predecessors in the way of official obstruction and suspicion, their progress being continually barred. Other troubles, from treacherous servants and guides, were severely felt, and it was not until May 7 that the little party of five men left Mogador and plunged straight into the interior. Demnat was reached after an arduous journey, and their first explorations of the mountains took place there, without the knowledge of the Kaid. At Demnat Mr. Thomson had the good fortune to find a reliable Jewish interpreter, with whose assistance the party succeeded in reaching the district of the Tetula, in the very heart of the Atlas range. Here the explorers reached the summit of the Tizi-n-Teluet, a height of nearly 9000 ft., commanding a magnificent view. They looked in vain, however, for the Anti-Atlas. After further explorations in this district, Mr. Thomson and his companions were placed in confinement by the Kaid of Glauwa. Escaping after some days, the little party met even worse dangers in the shape of a body of armed mountaineers, who came very near to terminating the expedition by shooting Mr. Thomson and his followers. Obliged to retrace their steps, the explorers went towards Amsmiz, and succeeded in getting away to the mountains without further opposition. In this neighbourhood many valuable explorations were made, but again an unfriendly Kaid prevented full success from crowning the travellers' efforts. Many exciting adventures befel him in his further explorations, but in the end Mr. Thomson succeeded in reaching his destination and climbing the highest peak of the range, 12,500 ft. above the sea. Ultimately Mr. Thomson managed to penetrate as far as the most westerly extension of the Atlas range, and returned to England, having, in the face of enormous difficulties, succeeded in still further elucidating the geographical features of a range of mountains second to none in Europe or Africa in length and average elevation.—A cordial vote of thanks was accorded to Mr. Thomson for his valuable paper.

THE MANUFACTURING

GOLDSMITHS' & SILVERSMITHS' COMPANY,

Show-Rooms: 112, REGENT-STREET, LONDON, W. (Adjoining Stereoscopic Company)

Supply the Public direct at Manufacturers' Cash Prices, saving Purchasers from 25 to 50 per Cent.

GOLDSMITHS' AND SILVERSMITHS' COMPANY, 112, REGENT-STREET. CATALOGUE POST-FREE.

NEW MUSIC.

METZLER and CO., LONDON.
40, 41, 42, and 43, Great Marlborough-street; and 35, 36, 37, and 38, Foubert's-place, Regent-street.

MANUFACTURERS and IMPORTERS of MUSICAL INSTRUMENTS of every description.

MUSIC PUBLISHERS.

ESTABLISHED OVER A HUNDRED YEARS.

NEW and SUCCESSFUL PUBLICATIONS.

METZLER'S RED ALBUM. 1s. each.
New Series of Vocal and Instrumental Music.

No. 1 contains Nine Songs by Goring Thomas, Sullivan, Pinsuti, Clay, &c.

No. 2 contains Eight Songs by Cellier, Hatton, Cowen, Benedict, &c.

No. 3 contains Eight Compositions for the Pianoforte.

No. 4 contains Six Compositions for the Violin and Pianoforte.

METZLER'S RED ALBUM.
"Capitally got up in folio-size, and adorned with a bright red wrapper, bearing sketches of various ways in which pic-nic music is made."—Daily Telegraph.
"Metzler and Co. thoroughly understand the actual requirements of the day—that is, to give about five shillings-worth for one; and, in fact, the Red Album series does not fulfil this condition. I am ready to deliver myself up as a Dutchman."—Topical Times.

METZLER'S CHRISTMAS ALBUM of DANCE MUSIC. Price 1s. Contains Waltzes by May Oxford, P. Buckland, P. Solomon, and A. G. Crowe; Quadrilles, Lancers, Polkas, &c.
"It is a neat little book, decidedly worth the shilling it costs."—Daily Telegraph.
"Those who are look ers for nursery ditties should take note of a little collection appropriately entitled

PLEASE SING ME A SONG. 2s. 6d. net.
The poems, twenty-four in number, are the work of Mary Chater and Effie Wilson, all the music being written up on the table, not one word or phrase of them from the pen of R. R. Addison. We cannot criticise them from a professional point of view, but we can say that they are good enough. The verses are lively, cheerful and healthy, and sung in child-like fashion in a pleasing manner. The composer has treated them with infinite variety, and has altogether produced a very pleasing music."—Daily Telegraph.

LAWRENCE KELLIE'S SONG ALBUM. 1s. net.
"Mr. Kellie, as most people know by this time, is one of the cleverest of our young song-composers, and one who, in trying to reach popular favour, does not forget to be artistic. Dozens on dozens of examples of the kind are to be met with nowadays.... Enough for us to say that when he need not be ashamed to see before a room full of connoisseurs. In the midst of a decline of common place, we hail Mr. Kellie's refined lyrics."—Daily Telegraph.

A NEW POLKA.
ROCKET POLKA. ESPAR DUMAINE.
"Excellent, because really characteristic. For once we meet with a piece of dance music which runs out of the rut of its kind."—Daily Telegraph.
"A spirited and very dansante polka."—Army and Navy Gazette.

TAYLOR'S CIMOLITE, OR PREPARED WHITE FULLER'S EARTH, is the only reliable and unobjectionable SKIN POWDER. It is prepared by an experienced Chemist, and under the Latin name of "Terra Cimolia" is constantly prescribed by the most eminent Physicians, and was pronounced by the late Sir Erasmus Wilson, F.R.S., and by the late Sir Tilbury Fox, M.D., to be the purest and simply invaluable, and far superior to Glycerine or any other compound. It is the Best Nursing Powder for Infants. Formerly used in the Nurseries of her Majesty the Queen, the Princess of Wales, the Duchess of Teck, &c., and now extensively employed in the Nurseries of her Imperial Majesty the Empress of Russia, the Duchess of Edinburgh, our own Royal Princesses and Duchesses, H.R.H. the Duchess of Cumberland, and most of the Aristocracy. Recommended by the faculty. The eminent physician, Dr. Routh, says—"I feel I cannot too highly recommend it." "I cannot afford to be without it."—Dr. Blandridge. A lady writes:—"Here, in India, for 'Prickly Heat' I found it worth a guinea a teaspoonful." Post-free. Send 14 or 36 penny stamps.
Ask for "Taylor's Cimolite." See that the Trade Mark, Name and Address, are on every Parcel, and do not be persuaded to take imitations.
Introduced into medical practice and prepared by JOHN TAYLOR, Chemist, 13, Baker-street, London, W.

DR. SMILES'S WORKS.
LIVES OF THE ENGINEERS. Illustrated.
5 vols., 7s. 6d. each.
"We cannot but refer to the captivating and instructive volumes which Mr. Smiles has devoted to the 'Lives of the Engineers'—a record not surpassed in point of the achievements of a race of men who have conferred the highest honours and the most extensive benefits on their country."—Edinburgh Review.

LIFE OF GEORGE STEPHENSON. With Illustrations, 5s., 7s. 6d., or 2s. 6d.
"We have read this book with unmingled satisfaction. We hardly ever remember to have read a biography so thoroughly unaffected.... It is an artless attempt to set out the character and career of one of the most enormous, honest, irresistible, homely, and kind-hearted of human beings. The entire style of the work is unpretentious, lucid, thoroughly manly and good."—Saturday Review.

JAMES NASMYTH, ENGINEER; An Autobiography. Illustrated, 6s.
"The whole range of literary biography may be searched in vain for a more interesting record of an active, useful, successful, and happy life, than is presented by the delightful autobiography of James Nasmyth."—Edinburgh Review.
A few copies of the large Paper Edition, with Portrait etched by Rajon, 8vo, 16s., may still be obtained.

WIRE ADDRESS—"EXCELSUS," LONDON.
FREDERICK SPENCER,
STOCK and SHARE DEALER,
NO. 155, FENCHURCH-STREET, LONDON, E.C.,
OPERATES in every class of ENGLISH RAILS, STOCKS, BONDS, and GOVERNMENT SECURITIES. Opens Speculative Accounts on the most favourable terms, with cover from 1 per cent. Special dealings in Americans. Handsome profits have resulted from my last recommendations. Enormous profits are often made by combining cover. Enormous profits are often made by combining cover. Information. Bargains wired the moment of receiving.

£5 commands	£500 Stock.
£10 "	£1000 "
£20 "	£2000 "
£30 "	£3000 "
£50 "	£5000 "
£75 "	£7500 "
£100 "	£10,000 "

With no further liability whatever.
A client, by depositing £10 margin with me to secure me against loss, may buy, say, £1000 Brighton A at, say, 130. Supposing the stock advances to 135, and he then sells, he makes a clear profit of £50; while, if the stock happens to recede, he could make no loss unless he sold, till it fell back a point—that is to say, 120—and then he would lose his £10 cover only, and have no further liability. In other words, he stands to win an unlimited amount, but can only lose the amount of his cover.

FREDERICK SPENCER'S
GUIDE for SPECULATORS GRATIS.
GUIDE for SPECULATORS GRATIS.
GUIDE for SPECULATORS GRATIS.

MY ADVICE and FORECASTS of the Markets are generally reliable, and operators who follow my recommendations will be materially assisted to secure for themselves golden returns. Be guided on the spot, it only stands to reason that my advice must be worth following.
The "Evening News," Jan. 20, 1888, says:—"We have received a copy of the 'Guide for Speculators,' published by Mr. Frederick Spencer, of 155, Fenchurch-street, E.C. This little book contains some useful information with regard to Stock Exchange dealings; and, in addition, shows the highest and lowest prices and dividends paid for the last twelve years on most of the leading English railway and Government securities."
"Stock Exchange Times," Feb. 4, 1888, says:—"This gentleman in his circular evidently does not prophesy, like some of the sporting prophets, by the card. A great many of his recommendations have been verified, and his judgment in all matters pertaining to stocks and shares appears to be very sound. Those who wish to act on his suggestions should write to him for his list on his address, 155, Fenchurch-street, E.C."

A COUNTRY DEPARTMENT is under special management, where clients living at a distance can depend upon having their interests well watched. Telegrams dissatisfied should write me any hour necessary. Telegrams are sent daily free, giving the leading quotations.

FREDERICK SPENCER advised the purchase of BRIGHTON A when they were 123. They have since been 133½. Profit of £10 ems £10 temporary deposit.

FREDERICK SPENCER advised CALEDONIANS when they were 104. They have since been 118; profit of £112 10s. on £10 temporary deposit.

FREDERICK SPENCER'S advice is so very correct that he receives daily hundreds of inquiries as to the future movements of various stocks.

FREDERICK SPENCER DEALS in EVERY DESCRIPTION of STOCK EXCHANGE SECURITY at Market Prices, and charges no Commission.

FREDERICK SPENCER'S Offices are fitted up with all the latest improvements, and there are PRIVATE CONSULTING-ROOMS with competent men to advise.

FREDERICK SPENCER'S
GUIDE for SPECULATORS GRATIS.
GUIDE for SPECULATORS GRATIS.
GUIDE for SPECULATORS GRATIS.

I give a few of the marvellous successes which have attended my last selections, which were:—

	Since Each Cheque has been	Profit of:
Brighton A	123½ .. 133½	£78 15
North Eastern	156 .. 161½	£30 0
Great Western	145 .. 157½	£73 15
Caledonians	104½ .. 118	£112 15
De Beers	27 .. 31½	£83 15
Caltho Bis	£10½ .. 15	£93 5
Canadian Pacifics..	59 .. 64½	£57 10
		£367 10

FREDERICK SPENCER,
STOCK and SHARE DEALER,
NO. 155, FENCHURCH-STREET, LONDON, E.C.

I HAVE HAD some large dealings in the Stocks I advised in my last Circular, and many of my clients have done remarkably well by following my tips.
The American Market has been exceedingly firm, and since very important advances have taken place since I wrote. I must confess that my last tips in Denvers and Milwaukees have been almost more than verified.

MANY operators ask "how it is my tips are always so correct?" and "how is it that I so seldom make mistakes?" It is simply this: I never advise operations in any Stock until I have myself carefully studied its movements for some considerable time previously, and when I do advise I am thoroughly an fait, then I save my reputation as well as those of my clients, and I am proud to say in doing that many of my clients are able to make such grand profits.

I AT this very moment have a client on my books who bought Lake Shore several months ago at 92½. They are now over 105. This alone has shown a profit of £132 5s. for a temporary deposit of £10. To those of my clients who visit the City I shall be pleased to show my books to prove this assertion.
It has been truly said: "The Stock Exchange is the place to make a fortune," provided the operator quietly studies the markets before dealing.
I ask, How is it that so many of our country squires, with but small, limited incomes, are keeping up such large establishments, &c.? Why, because most of them speculate on the Stock Exchange—and although most of them deny it, it is, nevertheless, a fact.

SPECIAL ADVANTAGES of DEALING WITH ME:
1. Being a dealer, not a broker, clients by transacting their business with me save the brokers' commissions—a very great consideration.
2. I do not charge commission of any description.
3. Clients' names are never exposed to their cover, but there is no limit to the amount of their profits.
4. I give clients advice gratuitously, either by letter, telegram, or personally.
5. I deal at close market prices, and immediately wire full particulars.
6. I open speculative accounts from 1 per cent. cover.

I HAVE issued a very carefully compiled book, entitled "Guide to Speculators," which will be found of very great service to operators. I shall be pleased to forward a copy post-free.

WIRE ADDRESS—"EXCELSUS," LONDON.

THE SILENT MEMBER.

The Marquis of Salisbury's campaign in the heart of Midlothian — carrying war into the enemy's quarters with a vengeance—was preceded by quite a busy and businesslike sitting in the House of Lords. As possible candidate some day for the Colonial Secretaryship (and an admirable nobleman for the post in every respect), the Earl of Harrowby on the Twenty-eighth of November questioned the present courteous occupant of that office as to the Queensland difficulty. Lord Knutsford, in replying, admitted that, owing to objections on the part of Queensland, Sir Henry Blake would not proceed now to the colony as Governor. But the Secretary for the Colonies compensatcd Sir Henry Blake to the best of his ability by passing a warm eulogium on his high character, and upon his services as Governor of Newfoundland—a cordial tribute which the Earl of Derby emphatically indorsed. Their Lordships then gave themselves up to legislation, and passed through committee the Irish Municipal Funds Bill and the Parliamentary Oaths Bill, which was accepted by the Primate in an admirable speech, in the course of which he parenthetically alluded to the deep anxiety generally felt as to the condition of Mr. John Bright.

Mr. W. H. Smith, in the Lower House, has had to fight the Home-Rule party step by step over the Irish Land Purchase Bill. Mr. Parnell, cool and incisive as ever, opened fire on the Twenty-second of November against the measure. The wan-faced and fair-bearded Home-Rule Leader, it is true, agreed with the principle of the Bill, but reiterated the claim that arrears should be dealt with. Lord Randolph Churchill, in a manner of speaking, ran with the hare and hunted with the hounds, for the noble Lord gained the cheers of the Irish members whilst condemning the Bill with faint praise, and saved his Party-consistency by voting for it on the plea that it was "only a little one." Mr. Goschen half promised that arrears would be grappled with by the Ministry. In the division, the Government majority was reduced to 75.

Mr. Balfour had sufficiently recovered from his cold to resume his seat on the Treasury bench, on Monday, the Twenty-sixth of November, when a regrettable circumstance happened in the lobby. An over-zealous member of the Irish constabulary, Jeremiah Sullivan, appears to have had the audacity to penetrate to this sanctum to serve Mr. David Sheehy, the member for South Galway, with a writ. The breach of decorum was at once resented by Mr. Sheehy, who re-entered the House, and rose from the Home-Rule benches to protest against the strange proceeding. Not only Mr. Bradlaugh, but also Lord Randolph Churchill's stalwart henchman, Mr. Hanbury, energetically supported the hon. member in his remonstrance. Mr. Balfour deplored the occurrence, but his explanations did not allay the excitement. Mr. Courtney left the chair in Committee on the Irish Land-Purchase Bill; and the Speaker was recalled, at the suggestion of Mr. John Morley. And the ruffled feelings of the House were eventually calmed by the appointment of a Committee of Inquiry into the case, at the instigation of Mr. Smith. "Surtout, point de zèle!" is not unlikely to be Mr. Balfour's admonition to those responsible for the contretemps.

The Marquis of Hartington will welcome the return of Mr. Joseph Chamberlain to his side—if the happy bridegroom be so unwise as to forsake honeymoon delights for the turmoil of politics. Lord Hartington's steadfast clinging to his corner seat on the front Opposition bench when he is in full sympathy with the Government still subjects him to reproaches from the Home Rulers. Ere he returned to Hawarden Mr. Gladstone himself indulged in a jibe at the expense of his former distinguished colleague; and during the Sheehy controversy Mr. Labouchere followed his leader's example with characteristic readiness and sangfroid. Happily, that "hard-headedness" which Mr. Bright commended in him steels the noble Lord in the performance of his uncongenial part.

MARRIAGE.

On Nov. 21, at the Cathedral, Lincoln, by the Lord Bishop of the Diocese, assisted by the Very Rev. the Dean and the Rev. C. C. Ellison, uncle of the bride, Michael Stocks, only son of Major Stocks, of Woodhall, Norfolk, Upper Shibden Hall, Yorkshire, and 26, Rutland-gate, to Charlotte Amelia, elder daughter of Colonel Ellison, of Boultham Hall, Lincoln, and 23, Queen's-gate.

DEATH.

On Nov. 18, at Marseilles, Alice, wife of Patrick Henderson, her Majesty's Consul at Cadiz.

*** *The charge for the insertion of Births, Marriages, and Deaths, is Five Shillings.*

CIGARS DE JOY ASTHMA COUGH BRONCHITIS

These CIGARETTES give immediate relief in the worst attack of ASTHMA, COUGH, CHRONIC BRONCHITIS, INFLUENZA, and SHORTNESS of BREATH. Persons who suffer at night with coughing, phlegm, and short breath, find them invaluable, as they instantly check the spasm, promote sleep, and allow the patient to pass a good night. They are perfectly harmless, and may be smoked by ladies, children, and most delicate patients.

In Boxes of 25 Cigarettes, 2/6, from all Chemists and Stores. Each genuine box bears the name WILCOX & CO., 239, Oxford Street, London. Post-free.

HIMROD'S CURE FOR ASTHMA

Established nearly quarter of a century.

Prescribed by the Medical Faculty throughout the world. It is used as an inhalation, and without any after bad effects.

Among the thousands of testimonials the following will be read with interest:—

"The only relief I could get." "If I had known it earlier." —Lord Beaconsfield (In his dying moments).

"I have tried every remedy ever invented, and HIMROD'S CURE is the only one in which I have absolute confidence." —Emily Faithfull.

"This is an excellent remedy for asthma." —Sir Morell Mackenzie, (In his clinical lecture at the London Hospital and Medical College).

"I have used all remedies—HIMROD'S CURE is the best. It never failed." —Oliver Wendell Holmes.

Trial samples free by post. In Tins at 4s. 9d. British Depot—46, Holborn Viaduct, London. And also of Newbery & Sons, Barclay & Son, Lynch & Co., Sangers, and all Wholesale Houses.

SIR SPENCER WELLS LECTURING AT THE ROYAL COLLEGE OF SURGEONS.

OUR NOTE BOOK.

BY JAMES PAYN.

A very interesting speculation has been raised by a writer in *Lippincott's Magazine* as to whether, upon the whole, Criticism has been of advantage to Literature, and even (I write it with fear and trembling, and a sense of blasphemy) whether it is really of any value at all. Indeed, it is at the latter conclusion that this audacious being has apparently arrived, though he was once a critic himself. The spectacle can only be paralleled by that of a divine divesting himself of his "orders," and becoming not only a layman but an antagonist of Holy Writ. The collection he has made of the judgments (sentences of death in fact) passed by the "hebdomadal (and other) conferrers of immortality" upon Carlyle, Wordsworth, Shelley, Dickens, Tennyson, and many more great names in literature, sounds to modern ears, it must be confessed, exceedingly ludicrous. The confidence with which they were uttered—as though no Court of Appeal existed—and the pompousness of their style immensely heighten their humour. Instead of killing Keats as the *Quarterly* was fabled to do, it ought, as it now strikes us, to have tickled his sense of fun; but then we are regarding the matter from a different standpoint and at a greater distance off than he was, and he was not, as now, standing on a pinnacle. He was certainly annoyed by it, as Byron was by the barbs of the *Edinburgh*. Even in the last generation we find Thackeray irritated by the bolts of the "Thunderer," and even writing to the editor of a magazine to know why the deuce he didn't take that notice of his works which their merits demanded. To us it seems amazing that the "We's" should have had such power. The question put by the writer in *Lippincott* is, "Did they exercise it for good?" and he answers it, as I have said, in the negative.

A light and graceful hand in the *Daily News* has controverted this opinion, or, at all events, has very happily instanced the advantages which have flowed to authors—notably, to Tennyson, from what that poet terms "the indolent reviewer." It would be hard if the flail of criticism has not occasionally thrashed out the corn to some purpose and a triumph for homœopathy, indeed, if its "chaff" only evoked chaff. But the matter must be looked at all round, and especially with regard to the motives of criticism. Has its object, on the whole, been to improve, or merely to exalt itself at the expense of the author, or even to give him pain? The fond mother, the poet tells us, "only to be kind," takes her offspring on her knee and "gives him several slaps behind." It hurts her (as the schoolmasters falsely aver of *their* punishments) more than it hurts him. Does anybody believe it hurts the critic? The vast majority of reviews of books, I am afraid, have been written to make an attractive—i.e., slashing—article; the writers have practised vivisection, not in the interests of science, but in their own; the public has discovered it, and that is why much of their power has departed from them. It is also a great deal easier to detect blemishes than beauties; a critic at once kindly and acute is one of the noblest works of Providence—but rather rare; his praise is termed by his fellow-labourers in the vineyard, "log-rolling"; they mistake the grape for the walnut tree, and think it is the better for beating. For myself, it would be ingratitude indeed did I not acknowledge the generosity of critics; I have been treated by the whole fraternity (with one or two base exceptions) as well (almost) as I deserve; but, speaking generally, I think they are less inclined to look for the rising sun of genius than for the spots in it.

This was certainly the case in old times. A friend of mine, who is probably the best authority on such subjects in England, had, for a certain reason (besides his sins, which are insignificant), to read through the whole quarterly literature of the century. He found it very dry and very bitter. Moreover, what should please the modern reviewer (and I love to please him), he told me that, with the exception of certain writers, such as most of us are acquainted with, the authors of these lucubrations wrote such stuff as would not be accepted now by any periodical which has a reputation to lose. I have no doubt of the truth of his statement; but it seems odd enough that these dead-and-gone critics should be pronounced so worthless, whereas, as we are so constantly told by their descendants of to-day, our dead-and-gone authors should be the only ones worth reading.

"The sort of critic I most detest," wrote one who is now beyond the reach of criticism, "is not the malignant one, who, as a natural child of Satan, does his father's behests in a dutiful and hereditary way; but the one who calls himself my friend, and is compelled by high principle and his professional duty to write of my work ('with great personal unwillingness') something unpleasant. Why on earth (save that he wants his blood-money) should it be necessary for him, since he cannot speak of it civilly, to speak of it at all? It is possible, of course, that an individual may be so built up of wisdom and justice that it is impossible for him to keep silence even to oblige a friend; but this presupposes an angel, and I have generally found that the only association with principle and duty that this sort of person ever had in his life is the pretext they thus afford him for writing an offensive review of his friend."

What a host of friends, if he followed the advice of Dr. Johnson—"to make friends of young men when we ourselves grow old"—must the venerable Provost of King's College have left behind him! To die at ninety-one is to have had two lives; though one indeed far better worth the living than the other. When I knew him, I was a small boy at Eton, and he the master of the Lower School. He was a very kindly man, though with an appearance of great dignity, and had a great reputation for epigram. When the King of Bavaria had to vacate his throne, partly in consequence of his tender regard for Lola Montez, Dr. Okes was credited with these appropriate lines—

> Thus spoke Bavaria's classic King,
> When forced to cut and run—
> "Pack up my trunks, and take my place,
> O Lola! I am done."

The Doctor's admiration for Greek was such that he was reported to express himself in that language on occasions that did not seem to demand it, and to deprecate the custom of throwing stones as "lithoballizing." My brother had been his pupil, and on my first arrival at Eton, though he was not my tutor, he was so good as to ask me to breakfast. Burns's feelings on being invited to "dinner with a lord" were nothing to mine on the reception of this invitation. I would have given all my pocket-money for the term to have evaded so great an honour. I went, of course, nevertheless; and though very much suppressed, did justice to a very excellent entertainment. If a boy can't eat he must be in a bad way indeed. Even of a love-sick one it is recorded—

> Seared is, of course, my heart; but unsubdued
> s and shall be my appetite for food.

When the repast was over, however, I felt the necessity of relaxing the mind, and it being a fine sunshiny morning, took my seat at my window, and with mirror in hand, proceeded to dazzle the various passengers that crossed the bridge from Windsor, immediately opposite. One very portly one gave me great amusement, and not until, shading his eyes with his hand, I perceived him coming straight to my "dame's" house, did I dream of danger. I was always very near-sighted, and only when he came quite close did I recognise my host of the morning, Dr. Okes. Was ever modest youth placed in so undesirable a position? I draw a veil over what ensued, simply because I don't remember it; I was so desperately frightened. "O lola!" I said to myself, and knew no more. Perhaps the good Doctor saw that I had received punishment enough, but at all events I was not punished except by that terrible interview. What was also very kind of him, I thought: he never asked me to breakfast again. This escapade happened nearly half a century ago, since which I have never dazzled anybody (doubtless on account of it), but I shall always entertain a tender feeling for Dr. Richard Okes.

I always thought that one of the great advantages of the chessboard as compared with the card-table was that in the former case money was never staked upon the result of the contest. The interest of the game was such, I was told, that there was no necessity to increase it by the prospect of pecuniary aggrandisement; and, indeed, there was a sort of divinity supposed to hedge the game—as it does the King himself at it, who can't be held in check—which puts such vulgar and debasing considerations out of the question. But, if the *Pall Mall Gazette* is to be believed, we shall have to get rid of this illusion. In Russia, it says, there is a lady whose father having lost his fortune by gambling at chess has devoted herself to getting it back again by the same means, and succeeded. She did not play for a shilling a game, like the gentlemen of old at "Simpson's," but for stakes that were worth winning. Moreover, she has found "a mate" with similar proclivities, and husband and wife are ready to play anybody for what they like. What is very satisfactory, there can be no possibility of unfairness, for chess can be only played "on the square."

The Conversations of the Great Duke with Lord Stanhope, to which the world has been so tardily permitted to listen, are admirable reading. Without quite endorsing the Laureate's view of our national hero—that no record that has leapt to light has been to his disadvantage—he has stood the shocks of time far better than is customary with our departed great ones; much better, for instance, than his rival Nelson. His opinions may have been what are now called "narrow," but there was nothing small about himself. Brief and curt as he was by speech and letter, there was invariably matter in what he said or wrote; and, above all, he was always natural and himself. He detested humbug, and expressed himself with a frankness that, compared with the diplomatic utterances of those with whom he mingled, must have been most refreshing. What a trial it must have been to him when his contemptible Monarch, half out of "what he called his mind," used to ask his corroboration of his sacred person having been actually in danger at Waterloo. ("Was it not so, Arthur?" "I have often heard your Majesty say so.") The late Lord Clarendon used to relate a charming story of his first interview with the Duke, which I do not remember to have seen in print. It was when the Liberals were in power and Clarendon in office. As the youngest member of the Ministry, he was selected to inform his Grace of the determination they had come to of giving up the body of Napoleon to the French, and he wrote to request an interview. "F. M. the Duke, &c.," wrote in his usual style, and named an hour at which he would receive him at Apsley House. He was ushered into a little room with nothing but two chairs in it, and as the clock struck the Duke entered, nodded, and took one of them. Clarendon explained to him that, considering the association of his Grace with Napoleon, the Ministry had thought it only right to inform him of what they proposed to do, and expressed his hope that the French would appreciate the courtesy of the act. "They won't," said the Duke; "they will only think you are afraid of them; and, in the words of my late honoured friend the Duke of Richmond, I don't care 'two twopenny damns' if they do. Good morning!" If he had spoken for an hour he could not have expressed himself more clearly; but what to my mind is most noteworthy—supposing his opinion of the French of that date to be correct—was his contempt for a policy of conciliation when nothing could come of it. Our modern system is to attempt to conciliate everybody, but more especially those who bully and bluster, under the mistaken idea that we are thereby making friends.

What a rage there is for "good short stories"! The prices that are given for them (chiefly by the Trans-Atlantic press, however) is just now unexampled. I see it generally stated that our storytellers must be "coining money" even at a greater rate than usual (which is almost one-fifth of the speed of any other profession). The coin is, indeed, made quickly enough, but, from the nature of things, the gain is transitory. It is only reasonable that the commodity required should fetch a high price, for—unless in the chance instance of a writer having a "plot" in his mind which will suit a short narrative, and not a long one—he has generally to sacrifice to its composition material which, with proper treatment, would make a novel. This is the chief objection, from the novelist's point of view, to a short story. Moreover, it requires characters—with no space to spread themselves in—and emotions, and "situations," and catastrophes, all in a nutshell. The labour is that of miniature painting, which, whatever is paid for it, can hardly be remunerative. And when it is done it is done for. After appearing in the magazine, or newspaper, there is no publication for the short story in volume form, save in the company of a score of similar productions, and when it is so produced the book is not remunerative. The libraries do not look with favour upon such collections of short stories. This is curious, when we hear so many people expressing their preference for short stories over long ones; but so it is, and this is "the long and short" of the whole question.

THE MORTON LECTURE AT THE ROYAL COLLEGE OF SURGEONS OF ENGLAND.

Two years ago, a gentleman well known in connection with the philanthropic work of this metropolis, Mr. J. T. Morton, offered to provide funds for the institution of a Lectureship on cancer and cancerous diseases in the Royal College of Surgeons. The offer was accepted and Sir James Paget was requested to deliver the first lecture last year. This he published and dedicated to Mr. Morton "with sincere respect for his benevolence and generosity; and expressed the hope which he believed the founder entertained, that this lectureship might lead to some practical utility, perhaps even to the finding of a method for the prevention or the cure of these diseases." The second annual lecture on this important subject was delivered on Thursday, Nov. 29, in the theatre of the college, by Sir Spencer Wells, who commenced his lecture by remarking that no body of men could be more anxious to assist in the attainment of the philanthropic desire of Mr. Morton than the members of the Royal College of Surgeons, and no one of those whom he had the honour of addressing needed to be reminded of the almost overwhelming importance of the subject, cancerous diseases being as heartrending to the surgeon as they were mysterious and terrible to the public. An additional reason for urging the importance of the study at the present moment is found in the fact that, notwithstanding the great advance of sanitary science, and the prolongation of the average length of human life—in spite of the shortening of the duration and the lowering of the mortality of some diseases, the prevention (almost the stamping out) of others—cancerous diseases, so far from being less prevalent or less fatal, are increasing among us. The increase in the number of deaths from cancer at the present time, and has been for many years past, is far greater than the proportional increase of population. The Registrar-General's report bears out this statement in every particular. Carefully recorded statistics show that the number of deaths from cancer in England increased from 7245 in 1861 to 17,113 in 1887. In Scotland and Ireland the proportional increase was almost equally great; in the former, with a smaller population than the latter, there were some 200 more deaths from cancer, the mortality reaching the highest percentage in Edinburgh. Singularly enough, and contrary to a widespread belief, there was seen to be a higher death-rate among males than among females. The fact that these diseases destroy their victims during the most active and useful periods of life surely adds to the greater importance of studying their causes. When we learn more of the history of cancer, more of its invasion into the human frame, &c., then we may hope to be able to avoid or prevent, perhaps, even cure the disease. It is, then, observed Sir Spencer, "for surgeons to consider their duty as surgeons in relation to cancerous diseases in general, whether they could be checked, their surgical or medical treatment improved, and so forth." He concluded his very practical discourse by pointing out the danger of inadequate, unnecessary, and heroic measures, and compared the results obtained by so-called remedies of a secret character with the more solid work achieved by scientific surgeons. The President of the College, Mr. Savory, occupied the chair, and he was well supported by Sir James Paget, Sir W. MacCormac, Sir Joseph Fayrer, Mr. Bryant, Mr. Hulke, Mr. Hutchinson, Mr. Willett, Mr. Sibley, Mr. Jabez Hogg, Mr. Heath, Mr. Sidney Jones, Mr. Doran, and a very appreciating and numerous body of the members of the college.

The Mercers' Company have given one hundred guineas to the Augmentation Fund of the Clergy Pensions Institution, Mowbray House.

The Marquis of Huntly opened an exhibition of painting and statuary in Aberdeen on Dec. 3, and, in an address on Scotch painters and their patrons, referred to the origin and progress of pictorial art in Scotland. His Lordship claimed that a meeting in Edinburgh in 1729 of some seventeen artists and amateurs laid the foundation-stone of a Scotch school of painting, that meeting being the first systematic effort for the furtherance of art, and as such was entitled to be considered the precursor of the Royal Scottish Academy.

The inaugural meeting of the Arts Congress, which has been held in Liverpool, took place on Monday, Dec. 3—Sir James Picton presiding over a brilliant assemblage. Sir Frederick Leighton, the president, gave an eloquent address on the needs and aims of the congress, speaking of the necessity of art for the national greatness and of the want of cultivation among the English people as a rule, pointing out how much could be effected by such a congress in the interchange of ideas to remedy existing deficiencies. The various sections of the congress began their sittings next morning.

Accompanied by the Lady Mayoress, the Sheriffs and Under-Sheriffs of London and Middlesex, and many other distinguished visitors, the Lord Mayor presided on Dec. 1 at the annual distribution of prizes to the City of London Rifle Volunteer Brigade held at the Crystal Palace. The proceedings were opened by Colonel Lord E. Pelham-Clinton, in command of the brigade, who referred to the patriotic intention of the Lord Mayor to raise, if possible, a fund of £100,000 to thoroughly equip the metropolitan Volunteers. The prizes were presented by the Lady Mayoress, the principal recipients being Private Griggs (best shot in the brigade) and Major Earl Waldegrave.—A conference of commanding Volunteer officers took place at the Mansion House on the 3rd for the purpose of discussing means to perfect the equipment of Volunteers, so that they may be ready for service at the briefest notice.

THE COURT.

The Queen and the Empress Frederick and several members of the Royal family travelled from Windsor to town on Nov. 29, and paid a series of visits. The Empress Frederick, Princesses Sophie and Margaret of Prussia, and Prince Christian visited Mr. Boehm's studio at Fulham, in order to inspect the model for the bust of the Emperor Frederick, which is to be sent to Windsor Castle. The bust represents the late Emperor as he appeared at the Jubilee last year. On arriving at Paddington the Queen proceeded to Kensington Palace, and visited Princess Louise, where her Majesty was joined by the Empress Frederick. The Queen, the Empress, and Princess Beatrice likewise visited Mrs. Thurston, who had been head nurse to the Royal family for many years. Their Majesties afterwards visited the Duchess of Cambridge at St. James's Palace, and returned to Windsor Castle at half-past seven o'clock. Her Imperial Majesty, accompanied by Princess Beatrice, visited the Royal Tapestry Works on the 30th. Prince and Princess Henry of Battenberg, accompanied by Princesses Victoria, Sophie, and Margaret of Prussia, were present at a special service, held in the evening, at Westminster Abbey, at which "The Messiah" was performed. Count and Countess Karolyi arrived at the castle, and had the honour of being received by the Queen and the Empress Frederick. Princess Christian of Schleswig-Holstein, with Prince Albert of Schleswig-Holstein, visited her Majesty and the Empress Frederick. Baron Reischach had the honour of dining with the Queen, the Empress, and the Royal family. The Queen drove out on Saturday afternoon, Dec. 1, accompanied by Princess Beatrice and Princesses Sophie and Margaret of Prussia. Princess Louise and the Marquis of Lorne, K.T., arrived at Windsor Castle. Earl and Countess Sydney and the Bishop of Ripon also arrived, and had the honour of dining with the Queen and the Royal family. The Duke and Duchess de Sermoneta arrived at Windsor Castle in the afternoon, and had the honour of being received by the Empress Frederick. The Duchess of Manchester was also received by the Empress Frederick, and afterwards by the Queen. The Queen and the Empress, with the Royal family and the members of the Royal household, attended Divine service in the private chapel at Windsor on Sunday morning, the 2nd. The Bishop of Ripon, assisted by the Dean of Windsor, officiated; and the Bishop of Ripon preached. The Queen drove out in the afternoon, accompanied by Princess Louise (Marchioness of Lorne). Earl and Countess Sydney, the Bishop of Ripon, and Count Seckendorff had the honour of dining with her Majesty and the Royal family. Princess Louise (Marchioness of Lorne), Earl and Countess Sydney, and the Bishop of Ripon, who have been on a visit to the Queen, left Windsor for London on the 3rd. The Queen went out with the Empress Frederick and Princess Beatrice. The Duc de Némours and the Duc d'Aumale visited her Majesty and remained to luncheon. The Queen drove out in the afternoon accompanied by Princess Beatrice and Princess Margaret of Prussia. Prince and Princess Christian of Schleswig-Holstein, with Princesses Victoria and Louise of Schleswig-Holstein, dined with her Majesty. The Queen went out on the 4th with Princess Beatrice and Princesses Sophie and Margaret of Prussia. Her Majesty conferred the honour of knighthood upon Mr. Peter Henry Edlin, Q.C., Assistant Judge, Middlesex Sessions, and Mr. Polydore De Keyser, late Lord Mayor of London.

The Princess of Wales's birthday was kept on Saturday, Dec. 1, at Sandringham with the usual rejoicings. The annual tenants' ball was given the previous evening, the whole of the guests at Sandringham as well as the Royal family being present. On Saturday afternoon, in the large room at the Royal mews, all the children of the Sandringham, West Newton, and Wolferton Schools had their annual tea as usual on the birthday. The Prince and Princess of Wales, with Prince Albert Victor, Prince George, Princesses Louise, Victoria, and Maud, and the Duke of Cambridge, accompanied by the guests at Sandringham, were present at Divine service at the church of St. Mary Magdalene on Sunday morning, the 2nd. The Rev. F. Hervey, Rector of Sandringham, officiated, and the Rev. Canon Duckworth preached. The Duke of Cambridge left Sandringham. The Comte and Comtesse de Paris and Princess Hélène left Sandringham on the 3rd, having terminated their visit to the Prince and Princess. The Prince left Sandringham for London in order to preside next day at a meeting of the Duchy of Cornwall. In the evening he went to the Comedy Theatre. On the 5th the Prince went on a visit to Mr. Tyssen Amherst, M.P., and Mrs. Amherst, at Didlington Hall, Norfolk. The Princess and her three daughters remain during the week at Sandringham.

Princess Louise attended a conversazione on Dec. 1 at the Athenæum, Highbury-park, to inaugurate the North London branch of the Recreative Evening Schools Association.

On the same day the annual distribution of the late Lady Peek's prizes at the National Orphan Home, Ham-common, was made by Princess Mary Adelaide, who was accompanied by Princess Victoria of Teck. The Earl of Wemyss (chairman of the committee), the Countess of Wemyss, Lady Elcho, and Lady Whittaker Ellis were among those present.

Mr. Justice Wills has been appointed as the Judge for England under the Railway and Canal Traffic Act of the present year; Lord Trayner, one of the Judges of the Court of Session, has been appointed for Scotland; and Mr. Justice Murphy for Ireland.

The new School Board for London held their first meeting on Dec. 4. The only business transacted was the election of a chairman and vice-chairman. The Rev. J. Diggle was re-elected by a majority of eight; and Dr. Gladstone was chosen vice-chairman in place of Sir Richard Temple, M.P.

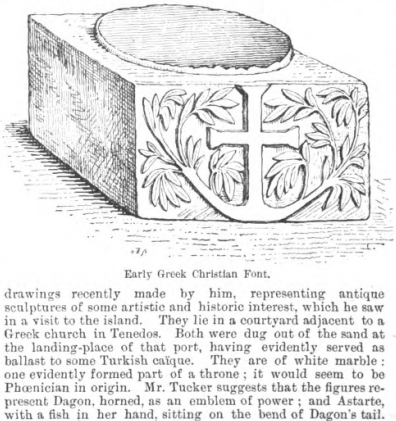
A great disappointment awaited the audience who visited St. James's Hall on Dec. 3, to hear the Monday Popular Concert, from Madame Néruda (Lady Hallé) being a sufferer from severe cold, and unable to take part in the concert. A competent substitute was, however, found in M. Straus, and Mozart's famous clarionet quintett in A major was ably led by that experienced musician.

A rich Masonic window, from the studio of Mr. Taylor, of Berners-street, has been placed in the church of Hinton-Martell, Dorsetshire, in memory of Mr. Henry Charles Burt, the gift of his brother Freemasons. The subject is "The Good Samaritan," with the emblems of the craft in the ornamental surroundings.—In St. Mark's Church, Coburg-road, Old Kent-road, on Dec. 1, a new stained-glass window, the gift of Miss Thrupp, was publicly unveiled.

The marriage of Mr. John O. Thursby, son of Sir John Thursby, of Omerod, to Miss Ella Crosse, younger daughter of Colonel Thomas and Lady Mary Crosse, was solemnised on Nov. 28 at St. Peter's, Eaton-square, before a large and fashionable congregation. The bride was conducted to the altar by her father. The bridesmaids were Miss Crosse (sister of the bride), the Misses Garnett (cousins), Miss Sybil Hooper, Miss Thursby and Miss Mary Thursby (sisters of the bridegroom). Miss Margorie Garnett acted as train-bearer. Mr. Powney, of the Guards, attended the bridegroom as best man.

MIRAGE ON THE STEPPES OF ASIA.

A Russian Artist, who has contributed to our Journal several other Views of the peculiar landscape scenery of the Steppes of Central Asia, here represents the curious phenomenon of mirage which has often been observed on extensive dry plains in other parts of the world. It takes place only when the atmosphere is perfectly still, and when the surface of the ground has been long heated by the direct rays of the sun. The lower strata of air become so rarefied by the heat, parting with all moisture, as to form waves or masses with outer curved lines, bending upwards to the sky; and the rays of light from any distant object, around or above, are refracted by these curves—sometimes casting on the ground an image of the clouds, which looks like pools of water; sometimes throwing laterally, as in this instance, very distinct images of neighbouring rocks, or even of moving figures, which seem to hover just above the ground. An army has occasionally been startled by the apparent nearness of another body of troops; or a caravan marching across the desert is met by the reflection of itself crossing the horizon in an opposite direction. A town or fort, with all its buildings, may be discerned seemingly in a position ten or twelve miles from its real situation; and it is said that people on the cliffs at Hastings once saw, in a calm sea, the coast of France, with all its bays and inlets, brought very near to the English shore. These varied effects on sea and land, due to an inversion of the more or less dense layers of the atmosphere, and to the consequent distortion of the rays of light, are not unfrequent on the Steppes during the great heats of summer.



ANTIQUITIES OF TENEDOS.

The small island of Tenedos, off the coast of Asia Minor, just opposite the shore of the famous plain of Troy, is mentioned by Virgil, in the "Æneid," as the gathering-place of the

Part of a Marble Throne (Phœnician) with Figures probably of the Horned Dagon and Astarte.

Grecian fleet preparing for the return home; and it has more than once, in our own times, witnessed the British fleet anchoring in Besika Bay, and there waiting orders to enter the Strait of the Dardanelles. We are favoured by the Rev. B. S. Tucker, R.N., Naval Chaplain to H.M.S. Sultan, with two

Early Greek Christian Font.

drawings recently made by him, representing antique sculptures of some artistic and historic interest, which he saw in a visit to the island. They lie in a courtyard adjacent to a Greek church in Tenedos. Both were dug out of the sand at the landing-place of that port, having evidently served as ballast to some Turkish caïque. They are of white marble: one evidently formed part of a throne; it would seem to be Phœnician in origin. Mr. Tucker suggests that the figures represent Dagon, horned, as an emblem of power; and Astarte, with a fish in her hand, sitting on the bend of Dagon's tail. The other is an early Christian font on which a device in laurel encircles the cross, emblematic of the triumph of Christianity. Both these objects are well worthy of a niche in the British Museum.

The annual presentation of prizes to the 2nd Volunteer Battalion Royal Fusiliers, by Mrs. Robert W. Routledge, will be made on Dec. 13, at St. James's Hall. Viscount Wolseley, the Hon. Colonel; Lord Abinger, commanding the West London Volunteer Brigade, and Generals Sir R. Gipps and Lyon Fremantle will be amongst those present.

At Birmingham, on Dec. 1, the fortieth annual fat cattle show commenced, the show of cattle being the largest held there, and the quality remarkably fine. The Queen has taken four first prizes, four second prizes, and one high commendation. The President's prize and the Elkington Challenge Cup were awarded to Mr. George Wilkin for a two-year-old steer, as the best animal in the cattle classes.—The National Dog Show opened on Dec. 3 in Curzon Hall, with an unprecedented entry of 1245 animals, many of them of high quality.

PARISIAN SAYINGS AND DOINGS.

(From our own Correspondent.)

PARIS, Monday, Dec. 3.

If the Parisians could only read the foreign newspapers, especially the London dailies, with those wonderful headlines due to the perspicacity of sub-editors, they would be astounded at the events that are taking place amongst them, and to which they pay no heed. The present times are doubtless confused and tumultuous; some people drink openly to the fall of the present régime; Communist Generals, like Cluseret, are candidates for the deputation; a man whose disgrace was thought to be complete, like Wilson, returns calmly to the scene of action and begins to play a rôle that terrifies his less cynical colleagues; Floquet dreams vaguely of a coup-d'état, but instead of taking the thing tragically everybody laughs at the comicality of such a scheme. Meanwhile the anniversary of Dec. 2 comes round. There is talk of transferring Baudin's remains to the Panthéon; and the Municipal Council, in order to affirm its existence as the chief pillar of the Republic, decides to manifest. Very good, says the Government; manifest—under our patronage and protection. And so it was. (illegible) forts and great preparations were made. Vast forces (illegible) put on foot. The garrison of Paris were confin(illegible)racks. The timid were warned to keep their (illegible) of street-fighting. Committees, groups, societi(illegible) banners and flags prepared, and a cortége (illegible) on Sunday, when the great day rose, t(illegible) did not trouble their heads about (illegible)ion, but went to the races in swarms (illegible)d procession that was to have number(illegible)ts did not exceed 15,000 to 20,000. (illegible) that was to have lined the route ap(illegible)s nor enthusiastic, and the cortége (illegible)nd lugubrious as a funeral procession(illegible)ne (illegible)assed without disorder—so much the (illegible)etter—but instead of a protestation of Republicanism it was rather a manifestation of indifference and ennui. Now-a-days, even the politicians themselves are getting sick of politics. All this is, of course, only the prologue; the real play will begin in 1889, when the peasants intervene in the elections and either confirm the Republic, or go over to Monarchism or to Boulangism.

The great event of the week at the theatres has been the appearance of Madame Patti at the Opéra in Gounod's "Roméo et Juliette." The audience was, perhaps, a little prejudiced against Patti at the beginning on account of her neglect of Paris during the prime of her talent. However, they did not sulk long over their pleasure, and warmly applauded the *diva*, though it must be confessed that the real hero of the evening was rather the tenor, Jean de Reszké, than Adelina Patti. These Patti performances are the occasion of a considerable scandal, owing to an understanding arrived at between the managers of the Opéra and the ticket speculators. The box-office has hitherto not been opened at all.

The Institute of France has filled up two vacancies by the election of the Vicomte Eugène Melchior De Vogüé to the French Academy, and of M. Gustave Moreau to the Academy of Fine Arts. M. De Vogüé has been the apostle of the modern Russian novelists in France, introducing us by essays, studies, and translations to the spirit of Tolstoi, Dostoievsky, and the Slav novelists of human suffering. M. Gustave Moreau is the visionary and unique painter of "Hélène," "Galathée," "Hérodiade," "King David," "Œdipus"; the painter of myths, of hieratic figures animated by the human dream. M. Moreau is truly a unique painter, and destined to remain such, for his art is too complex, too literary, too intellectual, too symbolic to ever influence widely either artists or general public.

A Polish lady, Mdlle. Andzia De Wolska, supported by a committee of ladies, amongst whom are Maréchale Canrobert and Lady Caithness, is founding in Paris a permanent international library of women's works—that is to say, of books in all classes of literature written by women. Mdlle. De Wolska asks aid from the public, and especially from authoresses of all nations. Those who wish to learn further details about her interesting project may address her directly at 59, Rue Jacob, Paris.

The cause of physical education is rapidly gaining ground in Paris. The latest move is a project elaborated by the architect Charles Garnier for converting the now deserted site of the Tuileries Palace into a sort of athletic arena, with tracks for foot-races, tennis-courts, cricket-pitches, ball-lawns, &c. The great difficulty that the promoters of athletics seem to find is the want of initiative of the French boy: he does not know how to play at anything.

Louis XV. and Louis XVI. fashions are now quite out of fashion; no more paniers and tabliers, no more Pompadourism. The Directory even scarcely survives at all. The grand *chic* is the stiffness and pseudo-classical simplicity of the Empire; truth pure and unadorned; high waists, plain corsages, plain skirts, the simplest trimmings confined to the hems. For evening costumes, *décolletage* in a point, very small natural coiffure without any *postiches*. Velvet is a fashionable material for all sorts of toilettes. The head-dress is to be a small capote without strings; round the neck a long boa; the outer garment a short velvet jacket or a long tight-fitting redingote of velvet, very plain. In order to wear these Empire garments with grace it is desirable to be thin, very thin. The ideal of an Empire toilette is pure lines.

T. C.

The session of the Spanish Cortes was opened on Nov. 30 by Señor Sagasta, the Premier, who read the Decree of Convocation in both Houses. There was no Speech from the Throne. The Chamber of Deputies subsequently re-elected Señor Martos as President by a majority of 160 votes.

The Federal Council of Berlin has assented to the new Commercial treaty between Switzerland and the German Empire.

The German Emperor and Empress gave a State dinner on Nov. 30 in honour of the Grand Duke and Grand Duchess Vladimir. The Dowager Grand Duchess Maria and Duke John of Mecklenburg-Schwerin, and Counts Muravieff and Bismarck were among the invited guests.

The fortieth anniversary of the accession of the Emperor-King Francis Joseph was on Dec. 2 celebrated throughout Austria and Hungary. Special services were held in most of the churches. His Majesty, who passed the day with the Empress at the Castle of Miramare, having requested that no public demonstration should take place, the money which would otherwise have been spent in festivities has been devoted to charitable objects. Their Majesties returned to Vienna on the 3rd. Congratulatory telegrams have been received from all the European Sovereigns.

The Session of the United States Congress was opened at Washington on Dec. 3. President Cleveland's Message strongly reiterates his former views about reducing surplus taxation and reforming the tariff. He says there is no existing subject of dispute with any foreign Power not susceptible of satisfactory adjustment by frank diplomatic treatment.

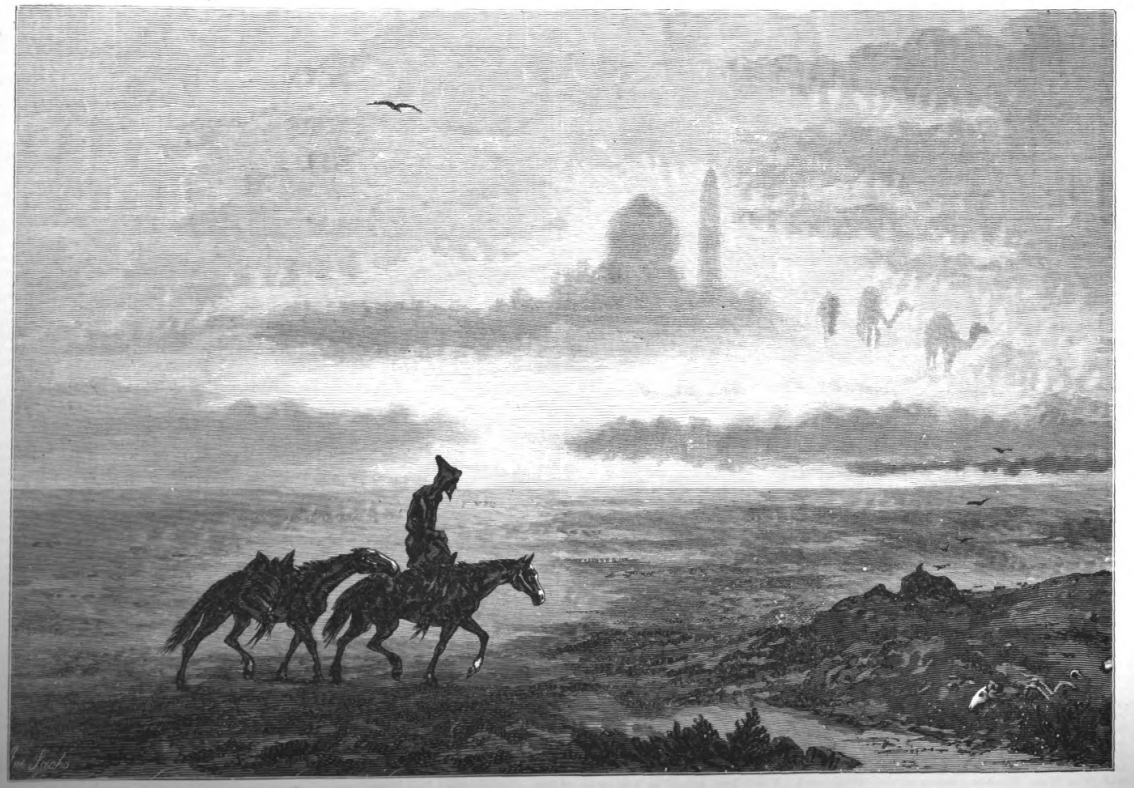
MR. MONRO, C.B.,
THE NEW COMMISSIONER OF METROPOLITAN POLICE.

THE LATE DUCHESS OF SUTHERLAND.
SEE "OBITUARY."

THE LATE SIR RONALD THOMSON, G.C.M.G.,
BRITISH MINISTER IN PERSIA.

THE NEW COMMISSIONER OF POLICE.

Mr. James Monro, C.B., has been appointed to succeed Sir Charles Warren as Commissioner of Metropolitan Police. He is a son of the late Mr. George Monro, solicitor, of Edinburgh, and is just fifty years of age. He entered the Indian Civil Service in 1857, and held both judicial and executive appointments, filling the posts of magistrate and collector, secretary to the Board of Revenue, District and Sessions Judge. Subsequently he became Inspector-General of Police in Bengal, that force numbering upwards of 20,000 men, under European officers, until, five years afterwards, he was appointed Commissioner of the Presidency Division. On several occasions Mr. Monro received the thanks of the Bengal Government for his services. When Mr. Howard Vincent retired from his position at the head of the Criminal Investigation Department, Mr. Monro, under the new name of Assistant-Commissioner (Mr. Vincent was Director) was appointed to take his place. His recent resignation of this position was much regretted, as he had been especially consulted by the Home Office with regard to the proposed improvement in the organisation of the Metropolitan Detective Police staff.

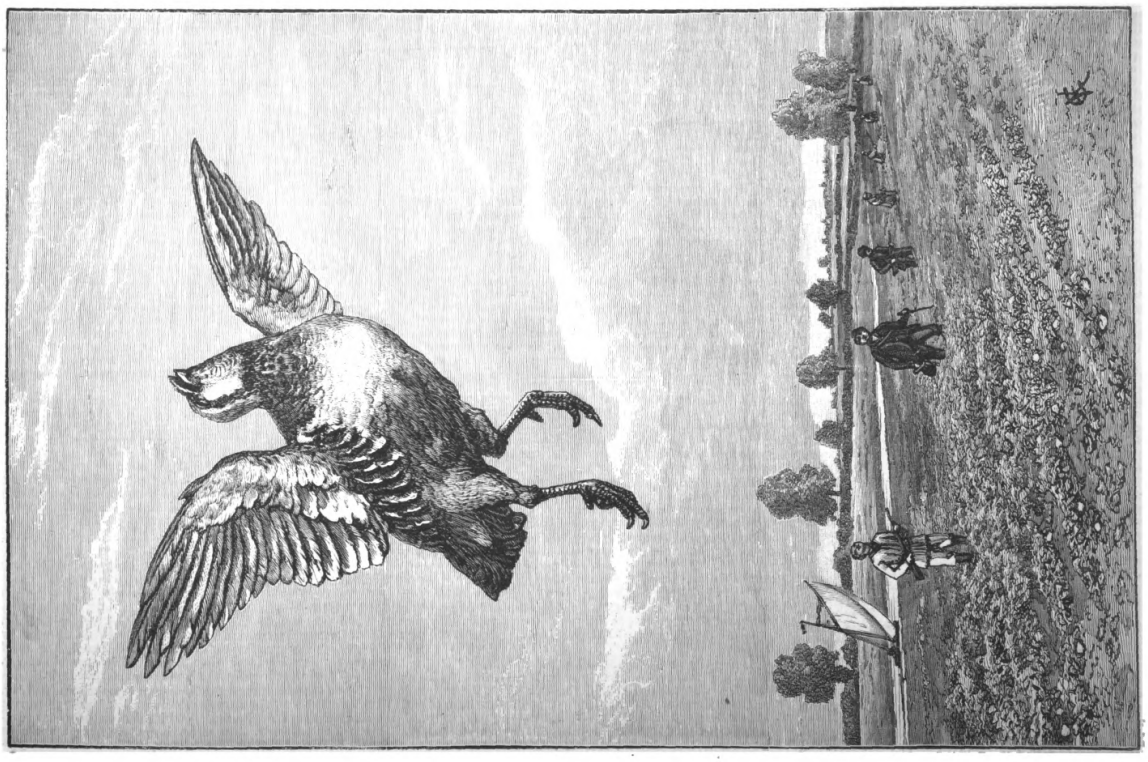


The Portrait is from a photograph by Messrs. Elliott and Fry.

A farewell meeting to a band of workers for the Chinese Inland Mission took place in Exeter Hall on Dec. 3. Mr. T. A. Denny presided, and said that this was the last party of missionaries, and would make fifty-five sent out this year (1888). Death had lately been busy amongst them, and they had lost three missionaries in one month. The Rev. Samuel Clark said that the Chinese people were willing to hear the Gospel preached to them; and he gave his hearers an idea of the vast mission-field that lay before them. Mrs. Clark, the Rev. E. O. Williams, Mrs. Williams, and the other eight ladies who form the party which leaves, having spoken, the proceedings terminated.

THE LATE SIR RONALD THOMSON.

The late Sir Ronald Ferguson Thomson, G.C.M.G., her Majesty's Minister in Persia until a year ago, was one of the best diplomatic servants of this country, but was less known as his career was passed entirely in such an out-of-the-way State as the Shah's dominions. He joined the staff of her Majesty's Legation at the Court of Teheran in 1848, and by the usual slow progress of advancement became Minister in 1879. He was unrivalled in his acquaintance with the Persian language, was most acceptable to the Shah, and had a thorough and intimate knowledge of all our political and commercial interests relating to Persia, and of its affairs in connection with Afghanistan and India. Sir Ronald Thomson was born in 1830, son of the late Mr. David Thomson, of Orkie, Fifeshire; he never married, and lived nearly forty years of his life at Teheran.



The Portrait is from a photograph by Mr. Vandyk, of Gloucester-road.

A MIRAGE ON THE STEPPES OF CENTRAL ASIA.

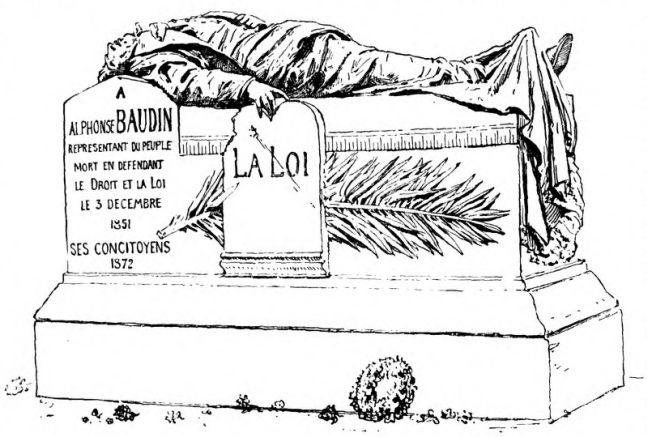
PARTRIDGE-SHOOTING IN NORFOLK: GOOD AT DRIVEN BIRDS.

PARTRIDGE-SHOOTING IN NORFOLK: A TOWERING FRENCHMAN.

THE PLAYHOUSES.

Mr. W. S. Gilbert tells a story in his new and original four-act drama called "Brantinghame Hall" that probably reads better on paper than it looks on the stage. There was certainly considerable disappointment when the curtain fell on the last act; although long before that time all interest had been exhausted and all hope of a brilliant success was gone. The fault of the play is one almost inscparable from Mr. Gilbert's system of work and view of human nature. He seems determined not to see men and women as they really are, but as they might be under certain given conditions. He takes the exceptional circumstances of life, and thinks they are dramatic because they form an abnormal growth on our civilisation. It is little use to argue with Mr. Gilbert, because on certain points he suffers from colour blindness. He insists upon the actual converse of what is generally accepted; he glories in contradiction and a perverse treatment of the simplest circumstances of life. Take, for instance, his new heroine, Ruth Redmayne. Now, here is a girl brought up and reared in the Australian bush, with a father who is a convict, with companions who are rude stockmen, a girl educated in an atmosphere of freedom, not to say coarseness, and yet Mr. Gilbert would seriously ask us to believe that such a girl frames her phraseology not on what she hears about her, but on what she reads in her family bible! The dramatist does not prepare us for such an astounding surprise; nay, he spoils his own idea of it, and hinders our faith in our guide and instructor. Had he at once wanted to show the simplicity of Ruth's life and her guilelessness, to impress upon us the fact that she dwelt in the "forest primeval," and was to be an Australian Evangeline, he would not surely have started his drama on row, riot, the fighting of bullies, and the quarrelling of rough, uncouth fellows. The very keynote that the author desires to str[illegible]adened by his own contradictoriness. Mr. Gil[illegible] girl brought up in such surroundings—th[illegible] of a convict, whose ears are daily soiled with the conversation of swearing stockmen—would talk like a perambulating Old Testament, and frame every thought on her best book—"Holy Writ"; common-sense says that the girl would do nothing of the kind, for she does not happen to pass her days with Quakers, Puritans, or Plymouth Brethren, but with semi-savages. There is a further objection. If Mr. Gilbert elected to make his heroine talk in this quaint and curious fashion, should he not at least have explained his reason to his audience in order to have warned them what to expect? But it is positively startling after Mr. Dick Somers and his rowdy companions have had a "set to," and Ruth's lovers have quarrelled and almost come to blows in the most ordinary "you're another" fashion, and when everyone is modern to a fault, to hear Ruth adopting the *lingo* of the Pilgrim Fathers and preaching out her platitudes as if she were another Hester Prynne or Dorothy Bruce. At the close of the first act the majority of the audience were completely befogged over this peculiar phraseology. "Why does Ruth Redmayne talk in that fashion?" anxiously asked the curious. "Oh, don't you know?" was the answer. "Gilbert has explained it all to an interviewer on the *Pall Mall Gazette!*" Well, that is all very well; but a dramatist, as a rule, makes his explanations to his audience.

There is another point, of more serious moment. The great effect of the play, on which so much is built and all depends, is a surprise so exaggerated that it does not commend itself as feasible to an audience. Ruth Redmayne, from the outset, is a very estimable young person. There is not a shadow or taint of suspicion about her character. Butter would not melt in her mouth—and she looks it. No sane person with the slightest study of physiognomy could put her down as a vulgar adventuress. She is the incarnation of all the virtues. Before leaving Australia Ruth marries a Peer's son, in the presence of credible witnesses, the ceremony being performed by a reputable clergyman. Her husband makes a handsome will in her favour, and is then drowned at sea. Hearing of her husband's death, Ruth starts for England with the laudable ambition of becoming reconciled to her husband's father and of redeeming a mortgage on the old Peer's property with the money that her husband has left to her—a most desirable and natural proceeding. A scoundrel who once loved Ruth has a mortgage on the property; so when the honourable woman desires that her inherited money shall be of some value, she finds herself met with extraordinary objections all round. Lord Saxmundham refuses Ruth's offer because he is as obstinate as he is proud. Ralph Crampton refuses to allow the mortgage to be redeemed with Ruth's money—which he could not do. There is only one loophole for escape, and that is for Ruth to marry the detested Ralph. This she positively refuses to do; but, driven into a corner, she resolves to tell a false story of her own shame and infamy merely to transfer her money to her father-in-law. The thing is wholly improbable and unnatural, and Mr. Gilbert sees it as clearly as anybody, for he makes a common-sense spectator very fairly observe that Ruth is doing no one any very particular favour by lending her own money on mortgage. She has money to invest, and here she has a very good investment. There was no need for her to deny her truth, fame, and good name in order to open the eyes of an obstinate old nobleman, and to crush an enemy who quotes bad law in order to frighten an antagonist. Now, this is a very weak foundation on which to build a play. No one is deceived by Ruth Redmayne's act of self-sacrifice. Not a human being believes in it. The audience quickly sees that the characters surrounding her do not believe her transparent renunciation of self. Even if there were no marriage certificate or will in existence to prove conclusively that the girl was uttering a pious falsehood her very looks would belie her. Saints do not suddenly and impetuously become sinners in this fashion. With this surprise the author has let off his only important firework. It faints, fizzles, and it goes out. There is no more to be done; and when it is found in the last act that the drowned hero and husband comes to life again in a very ordinary and common-place fashion it cannot be surprising that the play, from which so much had been expected, was found to be unreasonable and unattractive. It is not at all impossible that Ruth Redmayne should act as she does in this play; but it is in the highest degree improbable without a far stronger motive than is here shown. An author who desires to catch us in the toils of a surprise should carefully, and with artistic subtlety, lead up to it.



PARTRIDGE-SHOOTING IN NORFOLK.

There has been much controversy of late among the critics of sport on the relative merits of "driving," as against shooting over dogs. In former days, when long stubble formed covert for the crouching partridges, the services of pointers and setters were necessary to find the birds; but now, a well-directed "drive" affords many more shots than were to be got by the old-fashioned method. Another innovation is that of ladies wielding the smooth-bore. We leave our readers to form their own conclusions as to the propriety of this practice, as well as to consult their own predilection in the matter of driving or finding their game. In either case, with regard to the general principle, if we remember the authentic accounts of Royal and noble hunting-parties in English deer-parks in the Tudor and Plantagenet reigns, there is some precedent for applying similar customs to the killing of partridges or pheasants. For the deer were usually driven by a host of beaters; while the Queen, the Princesses, and the ladies of the Court did not disdain to exercise their skill in archery at the expense of those gentle beasts; as we see the Princess, in Shakspeare's play of "Love's Labour's Lost," taking her stand for this ladylike pastime:—

> Thou forester, my friend, where is the bush
> That we must stand and play the murderer in?
>
> FORESTER—Hereby, upon the edge of yonder coppice;
> A stand where you may make the fairest shoot.
>
> PRINCESS—I thank my beauty, I am fair that shoot,
> And thereupon, thou speak'st, the fairest shot.
> But come, the bow! Now, mercy would not kill,
> So shooting well may be accounted ill.
> Thus will I save my credit in the shoot;
> Not wounding, pity would not let me do't;
> If wounding, then it was to show my skill,
> That more for praise, than purpose, sought to kill.

THE BAUDIN MONUMENT IN PARIS.

In the perpetration of that act of treachery and ruthless violence by which Louis Napoleon Bonaparte, sworn President of the French Republic, on Dec. 2, 1851, usurped despotic power, the soldiery under the command of General St. Arnaud met with some unavailing resistance. Barricades were thrown up against them in the streets of Paris; there was a little fighting, and a great deal of massacre. Several members of the Legislative Assembly joined personally in the combat. One of these, M. Baudin, was killed fighting in the Faubourg St. Antoine; and a monument to his honour, which has now been erected over his tomb in the Cemetery of Montmartre, was unveiled on Sunday, Dec. 2, the thirty-seventh anniversary of his death. Our Paris Correspondent's letter gives some account of the proceedings. It is a recumbent statue of the slain political martyr, laid on drapery which falls in heavy folds over the pedestal. There is an inscription on a shield as follows:—"To Alphonse Baudin, Representative of the people, killed while defending justice and law, Dec. 2, 1851. His fellow-citizens, 1872." The last-mentioned date is that of the resolution to provide this monument, which was adopted a year or two after the restoration of the French Republic. M. Aimé Millet is the sculptor by whom this monument was designed; there is also to be a monument in the Panthéon.

TOMB OF BAUDIN.

In our description of Messrs. Pears' new buildings in Oxford-street, it should have been stated that the mosaic was laid by Messrs. Diespeker and Co., of 40, Holborn Viaduct.

Last year 15,300 lb. of smuggled tobacco were seized and burned in what is known as "The Queen's Pipe," the value being £4206, exclusive of duty.

Mr. H. Graves, the captain of Derby School, who had the honour of presenting a Latin address to the Prince of Wales on the occasion of the late Royal visit, has been elected to a Classical Open Exhibition at Balliol College, Oxford.

Sir Algernon Borthwick, M.P., took the chair on Dec. 5 at the annual dinner of the Peterboro' Benevolent Society. The sum of £115 was collected in the room, and the proceedings were of a most successful character.

The Duke of Devonshire has issued a circular to his Irish tenantry, informing them that he has decided to grant an abatement of 20 per cent in their rents now payable. He gave a reduction of 25½ per cent last year, and 27½ per cent the year previous.

A special entertainment, under the direction of Mr. and Mrs. Davies, is announced for Monday, Dec. 10, at St. Andrew's Hall, Newman-street, to provide the poor of St. Pancras with Christmas dinners. Many ladies and gentlemen have offered their services, and there is a good programme.

Owing to ill-health, Sir Thomas M'Ilwraith, the Queensland Premier, has resigned the offices of Chief Secretary and Colonial Treasurer, retaining, however, the position of Vice-President of the Executive Council. He has left Brisbane on a trip to China and Japan, which will probably extend over four months. The party leadership will now be assumed by the Hon. B. D. Morehead, the Colonial Secretary, who will also discharge the duties of Premier and Chief Secretary. The Hon. W. Pattison, who has previously been a member of the Cabinet without portfolio, will be Colonial Treasurer.

THE SILENT MEMBER.

London has in December rarely been so lively, from a social point of view, as it is now. Honourable members may, not unnaturally, sigh for a sunny in lieu of an inky sky, the badgered Leader of the House being particularly deserving of commiseration. But, whilst Parliament sits, West-End tradesmen rub their hands with glee, and theatrical managers running ephemeral pieces fairly rejoice, and, in some cases, "ride the high horse," unapprehensive of the "killing frost" that will possibly arrive for some when Parliament prorogues.

The week that opened in the Commons with the cool attempt of Jeremiah Sullivan to serve a writ in the Lobby on coy Mr. Sheehy ended, not inappropriately, in a farcical scene or two. On the penultimate night of November, the debate on the third reading of the Irish Land Purchase Bill was interrupted by an unusually exciting episode. A baseless rumour spread from bench to bench among the Liberals and Irish Home Rulers that Lord Compton had won the Holborn Election; and loud cheers burst forth, and were renewed again and again. The halloo was premature, to say the least of it. The late Colonel Duncan's seat was gained by a majority of 965 by the Conservative and Unionist candidate, Mr. Gainsford Bruce, Q.C., and when the true report reached the Treasury bench, Mr. Smith and the Ministerialists made the glass roof vibrate with their cheers. A Saturday sitting was necessary on the First of December, and that dramatic demagogue, Mr. Robert Gallnigad Bontine Cunninghame Graham, was ordered by the Speaker to withdraw from the House for the use of a decidedly un-Parliamentary expression.

The House of Lords—lucky in having to meet only on Tuesdays during this extra Session—quickly passed the Parliamentary Oaths Bill on the Fourth of December; that measure being in the capable hands of Earl Spencer, who has, by-the-way, the credit or otherwise of having converted Earl Granville to Home Rule, and whose platform oratory is unquestionably increasing his influence as a Liberal leader.

In the hushed chamber of the Peers, Lord Ashbourne, the vigorous father of the Irish Land Purchase Bill, experienced but a faint subdued measure of the stern opposition offered to the conditions of the Five Millions loan in the Commons. The noble and learned Lord, whose grey hair offers a singular contrast to his hale and hearty appearance, has a breezy style of speaking that is very prepossessing. Lord Ashbourne's recommendations of this measure of amelioration, really only an extension of the Ashbourne Act, were met by the Earl of Aberdeen and Earl Spencer with the earnest pleas for Irish tenants in arrears strenuously urged by Mr. Gladstone and Mr. Parnell in the Lower House. The Bill was read the second time, however, by the Lords without division.

The Earl of Onslow (whose urbanity, tact, and deep interest in our Colonial Empire should make him a most acceptable Governor of New Zealand) has an efficient successor as Parliamentary Secretary to the Board of Trade in Lord Balfour of Burleigh, who is said to have declined the Governorship of Queensland for family reasons. Not the least of the Marquis of Salisbury's high qualifications for the Premiership is his happy knack of selecting able Ministers from the increasing circle of rising young statesmen.

The Soudan difficulty inherited by the present Government from their predecessors in office threatens to be as perilous to this Ministry as it was to the Gladstone Administration. That extremely zealous and energetic Liberal debater and Home-Rule advocate, Mr. John Morley, approaches this complicated Egyptian problem with a clear conscience. He joined Mr. John Bright in deploring and condemning British intervention in Egypt. Mr. Morley had, accordingly, a moral right to rise from the midst of his Gladstonian colleagues, on the First of December, to warmly deprecate the projected new expedition to Souakim, with its probable result of a fresh series of massacres in the vicinity of that beleaguered seaport. Sir James Fergusson, Mr. Edward Stanhope, and Mr. W. H. Smith answered that it was necessary to send the military reinforcements for the protection of the population of Souakim; but the Government had to endure rear and flank attacks from Lord Charles Beresford and Lord Randolph Churchill. As it was, there was but the small Ministerial majority of 35 against Mr. John Morley. Encouraged presumably by the smallness of this majority, and strengthened by his strong aversion to all Soudan expeditions and Egyptian entanglements, Lord Randolph Churchill on the Fourth of December took the unusual step of moving the adjournment as a practical protest against the inadequacy of sending a single British battalion to Souakim, especially against the advice of the Home military authorities. Mr. Stanhope replied that our military authorities in Egypt had sanctioned the course adopted. But Lord Randolph Churchill was supported by Sir William Harcourt and Mr. Gladstone (who had returned to town the previous day to strongly attack the Irish administration of Mr. Balfour); and, although Lord Hartington stanchly defended the Government, Ministers could only count a majority of 42—sign of breakers ahead for the Ministry.

The Borough of Birmingham and the Burgh of Dundee have been raised to the rank of cities.

The Research, a surveying vessel, was launched at Chatham Dockyard on Dec. 4, with engines and boilers on board. She is to be employed first in making a new survey of the English Channel and the Scilly Islands.

Punch's Almanack, garnished with the lively wit of Mr. F. C. Burnand, presents a dainty dish of artistic humour by the deservedly popular comic artists of *Punch*, the chief cartoon, "New London," being an admirable example of Mr. John Tenniel's refined, finished, and characterfull style.

The entertainment at the Brompton Hospital on Tuesday, Dec. 4, consisted of Sullivan's "Cox and Box," well performed by Messrs. Charleton, Freeman, and Lendon, to the great enjoyment of the patients. The entertainment on the 11th will be under the direction of Mrs. Fraser, with an excellent programme.

On Dec. 4, the first Tuesday in Advent, the annual performance of Spohr's oratorio "The Last Judgment" was given in St. Paul's Cathedral, at a special evening service. The solos and choruses were sung by the ordinary choir, accompanied by a small band, without the organ, which was only used for the other portions of the service. Dr. Martin, the organist of the cathedral, conducted. There was an enormous congregation.

THE VOLCANIC REGION OF HAWAII.

We have again to speak of that interesting group of islands, half-way across the Pacific Ocean from the western coast of Mexico to the Chinese Archipelago, in the 20th degree of latitude north of the Equator, which forms the native Kingdom of Hawaii. The name belongs to the whole of the small nation, now dwindled to 70,000, inhabiting the larger island, Hawaii proper, the island of Oahu, which contains the capital and well-known commercial port of Honolulu, and the islands of Maui, Molokai, Lanai, Kauai, and Nihau, with many smaller isles of no account. These were formerly called the Sandwich Islands—after their discovery by Captain Cook, who met his death by the spear of a savage at Hawaii, the name being spelt "Owhyhee" in old books of geography and travel. Since 1819, the ruling class of natives have professed Christianity, and some progress has been made in civilisation. King Kalakaua, and Queen Kapiolani, and the ex-Queen Emma, who are educated persons and have travelled in Europe, are no strangers to good English society. The Anglo-American colony at Honolulu, including missionaries and teachers of every Protestant religious denomination, enjoys the Royal favour and exercises a beneficial influence. But our purpose just now is especially to present a few Illustrations of the amazing natural phenomena of volcanic action in the mountain region of the island of Hawaii, which is not usually visited by those who sojourn for a few days at Honolulu. For these Illustrations we are indebted to Mr. Scott B. Wilson, a scientific and practical botanist and naturalist, well known to the Zoological Society of London, we believe, and to the Natural History Museum; who, in September and October, 1887, explored the great volcano of Kilauea, and took a series of photographic views. He sent us also views of the neighbourhood of Honolulu, with several specimens of the peculiar vegetation, the algaroba, the bread-fruit-tree, and the "Dianella ensifolia," belonging to these islands, and portraits of the Hawaiian native people.

The best description of the volcanic region of Hawaii is to be found in Miss C. F. Gordon-Cumming's book, "Fire-Fountains," published in two volumes by Messrs. W. Blackwood and Sons in 1883—a work of great interest, written in a vigorous and agreeable style, and containing valuable information concerning the principal islands, the kingdom and its inhabitants, and their manners and customs, as well as these wonders of nature. The mountains, of which the highest summit, Mauna Loa, has an elevation of 14,000 ft., are approached by a very gradual ascent from the seashore at Hilo, a journey of thirty miles. Passing through a belt of tropical forest, and a tract of coarse grassy downs, with occasional swamps, one comes upon a great rocky plain intersected by hardened streams of black lava, the huge blocks of which are strewn about the country for many miles. At an elevation of 4000 ft. lies the immense active crater of Kilauea, the largest in the world. It is a huge sunken pit, nine miles in circumference, the walls of which, 600 ft. deep, are precipitous, and the bottom, of a bluish grey colour, is a floor of hot lava; in its centre is the Lake of Fire, called Halemauman, enclosed by a circle of high crags, ever and again changing their shapes as fresh masses of molten lava are thrown up from beneath. This, however, is often concealed by the dense clouds of steam continually arising: it is only by the aid of a favourable wind that, from some point or other, a distinct view of the crater may be obtained. The abyss, of unknown depth, is filled with flames or waves of fire, which at night cast an awful reflection on the clouds of vapour; but this is only at the time of an active eruption. There are times when the fire recedes into the earth, and Miss Gordon-Cumming, with her guides and companions, was then able to descend into the pit, and to walk over the ridges and billows of lava-crust, to climb the inner circle of crags, and to look down into the crater, where she saw only steam and smoke, with frequent jets and flashes of bluish fire, and a sort of fire-spray—now white, now glowing red, now yellow—licking the sides of the rocks. The continual alternations in the internal condition and in the aspect of Halemauman, and likewise of Mauna Hua-lei-lei, which has twenty craters — one a mile in circumference, the others much smaller — are to be remembered in comparing the accounts of different travellers. A crater usually finishes by forming a perforated cone of lava which rises from the bottom of its pit, and which may be 500 ft. high. Miss Gordon-Cumming, on a second visit to Halemauman, saw the new formation of many such cones and domes, a new lake and new rivers of liquid lava, where she had been able to walk in safety not many days before. The other celebrated volcano, Mauna Loa, with its crater, which is called Mokua-weo-weo, near the summit, differs considerably from Kilauea, and is not always in action; but its notable eruptions from 1789 to 1877, of which an historical account has been compiled by the Rev. Titus Coan, especially the great eruption of 1868, and the later tremendous outburst in 1880 and 1881, are famous enough.

FIXING TELEGRAPHIC WIRES ON TREES IN THE FOREST OF LÜBLIN, RUSSIA.

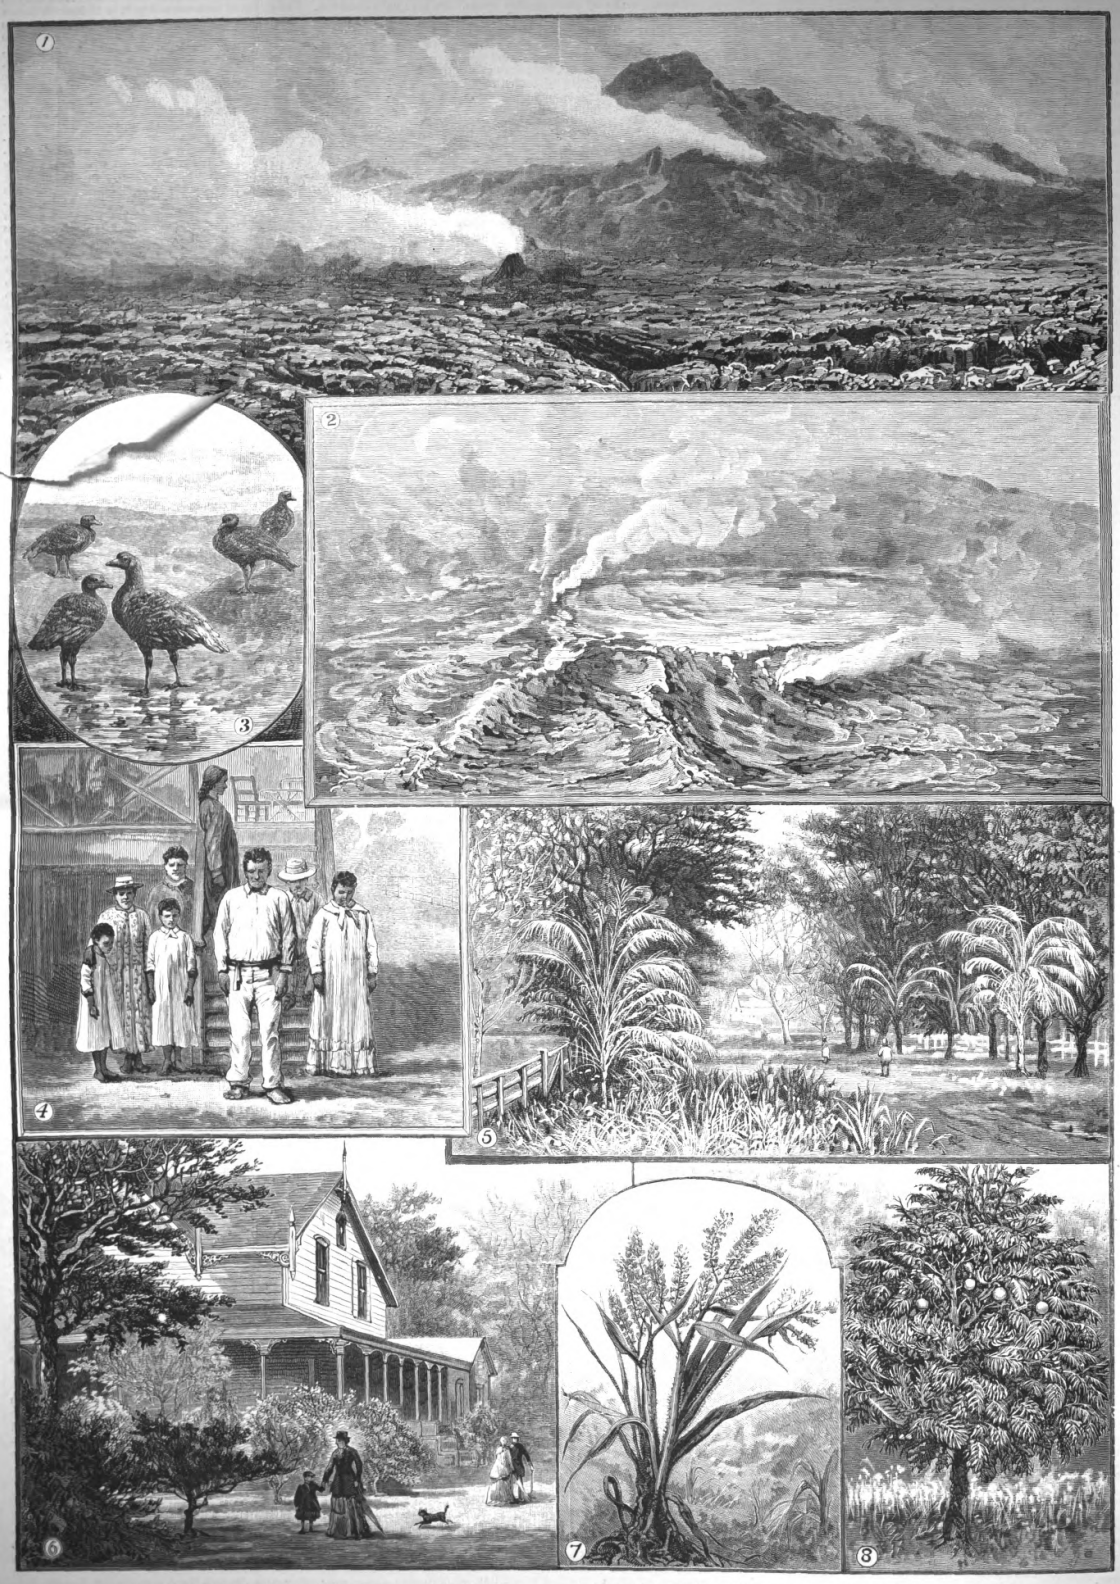
RUSSIAN MILITARY TELEGRAPHS.

The Vienna newspapers continue their reports of considerable movements of Russian troops from the Charkow military district to those of Kiev and Moscow, and thence to the western frontiers. Our correspondent, the Artist who furnishes a Sketch of Russian field-telegraph operations, recently travelled from Lüblin, in Russian Poland, to Bobrowinski and Schelekov, on the borders of Galicia, and found the woods near the last-mentioned place occupied by eleven reserve battalions, extending to Kaluschin. It was here that he saw a section company of one of the "parks" of field-telegraph laying the line through the forest. They made use of the trees growing along the line, to fix the wires to them, and only erected poles on the open ground where no trees were growing. The space included in the triangle between Konstantinov, Kazatin, and Nemerinka, confronting Lemberg, would constitute the most likely strategic base for an advance on Austria, as the base of an advance into Roumania would be the position between Kishineff and Bender. The Russian Army possesses seventeen parks of field-telegraph, each in two sections, with sixty-nine kilomètres of wire. Three are kept at Akerman, near Odessa; three at Shitomir, in the province of Kiev, and others at Warsaw, at Lüblin, and at Bobrowinski. The present concentration of troops in the military districts of Wilna, Warsaw, and Kiev, provides a large force ready for operations in case of war with Germany and Austria; but we hope that the peace of Europe will not be disturbed.

The Board of Trade have received, through the Foreign Office, a silver medal and diploma which have been awarded to Captain Vincent James, of the schooner Myvamvy, of Port Natal, for his services in rescuing the crew of the Italian brig **Papa Rissetto**, in the Atlantic Ocean, on May 23 last.

ROYAL INSTITUTION.

The following are the lecture arrangements before Easter:—Professor Dewar, six lectures (adapted to a juvenile auditory) on "Clouds and Cloudland"; Professor G. J. Romanes, twelve lectures, constituting the second part of a course, on "Before and After Darwin (The Evidences of Organic Evolution and the Theory of Natural Selection)"; Professor J. W. Judd, four lectures on "The Metamorphoses of Minerals"; Dr. Sidney Martin, four lectures on "The Poisonous Action of Albuminoid Bodies, including those formed in Digestion"; Professor J. H. Middleton, four lectures on "Houses and their Decoration from the Classical to the Mediæval Period"; Professor Ernst Pauer, four lectures on "The Characters of the Great Composers and the Characteristics of their Works" (with illustrations on the pianoforte); and eight lectures by the Right Hon. Lord Rayleigh, on "Experimental Optics" (Polarization; the Wave Theory). The Friday evening meetings will begin on Jan. 25, when a discourse will be given by Professor G. H. Darwin; succeeding discourses will probably be given by Professor W. C. McIntosh, Sir William Thomson, Professor A. W. Rücker, Mr. Harold Crichton Browne, Professor Oliver Lodge, Professor Archibald Geikie, the Rev. Alfred Ainger, the Right Hon. Lord Rayleigh, and other gentlemen.



The authorities of Milan Cathedral, on the recommendation of an international jury, have selected the design of Signor Brentano, of Milan, for the rebuilding of the west façade. Thirteen other competitors have been awarded prizes from 4000 fr. to 2000 fr. Of these, Mr. D. Brade, of Kendal, is the only English competitor.

Santa Claus has taken up his abode for the Christmas Holidays at Olympia, the vast arena of which is completely filled with an enormous bazaar. The receptions of fair little Dollie Daisie Dimple in the centre of Hinde's English toy exhibits, and the gaily-costumed girls who preside at the stalls; the Irish Village for the sale of the tasteful woollen and other work by Irish peasants, organised for the Countess of Aberdeen by Mr. J. S. Wood; and the Oriental café and lounge are among the most attractive features of the bazaar proper. A band enlivens the proceedings, and in the evening promenade concerts take place; whilst the entertainments are diversified by marionette and minstrelsy performances.

Messrs. De la Rue's publications are happy combinations of beauty and use. Their pocket-books and diaries for 1889 are as tasteful as ever and are brimful of useful every-day information.

The Craven Fellowship at Oxford for the present year has been awarded to Mr. Henry Arthur Tubbs, B.A., of Pembroke College. The fellowship is tenable for two years, with an annual stipend of £200. Mr. William Henry Hadow, M.A., assistant tutor and lecturer at Worcester College, has been elected to an official (tutorial) fellowship.

Among the Christmas and New-Year cards and dainty books just issued may be noted, for their special excellence, the art-novelties of Messrs. Prang and Co., of Boston, U.S.A., published by Mr. Arthur Ackermann, of Regent-street; those of Messrs. Castell Brothers, of Warwick-lane and Paternoster-square; of Messrs. Raphael Tuck and Sons, of Coleman-street and Paris and New York; of Mr. Harding, of Piccadilly, whose productions are chiefly devoted to British sports and pastimes; of Messrs. Marcus Ward and Co., of London, Belfast, and New York; and of Messrs. John Walker and Co., of Farringdon House, Warwick-lane—the latter firm publishing also "The Goodchild Family at Home," an amusing game for children. Mr. Tom Smith and Co., famed for their Christmas crackers, have produced some striking novelties, specially prepared for the ensuing festive season.

1. Basin of Volcanic Craters and Crags, Halemaumau.
2. Lake of Fire, with Lava Overflowing.
3. Hawaiian Geese.
4. Natives of Hawaii.
5. Avenue of Algaroba Trees at Honolulu.
6. Judge Bickerton's Residence, Honolulu.
7. Dianella Ensifolia, at Volcano House.
8. Breadfruit Tree.

SKETCHES IN HAWAII (SANDWICH ISLANDS).

"OLIVIA."—PICTURE BY F. SEIFERT.

THE ROYAL SOCIETY OF PAINTERS IN WATER-COLOURS.

It is only by courtesy that the winter exhibition at this gallery can be regarded as one of "sketches and studies." The majority of the works are finished pictures; and the most important "studies" are those of Sir Frederick Leighton, Mr. Burne-Jones, and Mr. Poynter, in which water-colours play no part. With this reservation, we must admit that the exhibition is a very good one, and that the general level of the works is above, rather than below, the usual average. It may or may not be regarded as a reproach to the members of the "Old Society" that they continue to abound in the vein in which they made their reputation. We must remember, too, that water-colour painting is subjected to narrower limitations than oil-painting, and that a master of his art is to be tested rather by the powers which he exhibits in his treatment than by attempts to invade the domain of others. Thus we know instinctively that in an exhibition of the "Old Society" we shall meet with Mr. Alfred Hunt's poetic rendering of Nature, by Mr. Stacey Marks's humorous drawing of character, or Mr. Charles Robertson's realistic treatment of Oriental life. Of each and all these we have abundant instances on the present occasion, and find no reason to complain either of the "cooks or the viands." It is, however, another matter whether the "Old Society" does not show too much jealousy of younger men, and whether there is not some fear of its perishing from inanition in the future because the managers of the present will not attract more brilliant recruits. The danger which awaits a "Head-Quarter Society" is that, being closed against external influences, and being helpless in its efforts to direct contemporary art, it taste, it will awake some day to find it too late to renew relations or to act in sympathy with the outer world.

Foremost among the pictures in point of size as well as importance is Mr. Burne-Jones's "Caritas" (30), a striking application of water colours, and by the help of body-colour and other expedients producing a surface which obliges one to ask in what it differs from the results of oil-painting. The subject, that of a young and beautiful mother nursing two children, whilst four others find refuge in the folds of her ample dress, is admirably suited to Mr. Burne-Jones's art. He has caught with no slight success the touch of those early painters who, delighting in symbolism, yet remained "humanists"; and it is the essentially true type of womanhood here portrayed which constitutes the picture's chief charm. Its colour is subdued throughout, with a suggestion of warmth in the red dress, and of comfort in the ample folds of the dark cloak. The children are charming modern renderings of Raffaelle's cherubs; and, although the lines are here and there hard, in the case of the most prominent of the children clinging to the woman's skirt, the left leg is not only distorted but disproportioned to its companion; whilst in one of the nursed children the leg is stiff and lifeless. The various studies, chiefly in black and white, by Mr. Burne-Jones and Sir F. Leighton, which occupy nearly the whole of the end of the room, are especially useful as throwing light upon the different ways in which the President of the Royal Academy and the chief of the eclectics compose their works. In almost every figure from the former's pencil the idea is conveyed that he has kept before his eyes the solid figure—whether in life or model; whilst Mr. Burne-Jones has sought his types through mere surface studies on paper, and that having once caught the expression he desired he worked from his drawing to his picture. In fact, we see in Sir F. Leighton the full appreciation of the artist for the sculptor's work, and the belief that it is through sculpture that painting becomes real. Mr. Poynter suggests a third method—that of the advanced drawing-book style—which, doubtless, produces great accuracy of measurement, but seldom excites admiration.

In a series of ten works Mr. Alfred Hunt shows his striking power of translating Nature in her many moods. In the little study of "Mont St. Michel" (6) we have only the winding steps which lead down to a cottage door painted with a daintiness and delicacy which Mrs. Allingham might envy; in "Whitby Smoke" (76) we have one of those studies of atmosphere of which Mr. Hunt has long shown himself the master, of which a still finer example with larger effects is to be found in his "Whitby from the Sands" (92) under the pale moonlight; whilst "Robin Hood's Bay" (172) affords him a wide expanse of sea with the jutting headland rising cold and bleak out of the silver sea. In his "Schloss Elz" (188), nestling under the lea of a high hill, we have a delicate study of foliage; and in the "Way to the Maëlström" (196) and from "The East Pier" (203) the wash of the angry waters is rendered with more energy and movement than we are accustomed to find in Mr. Hunt's work. Mr. Albert Goodall is scarcely less numerously represented, and in nearly all we see his wonderful resources in dealing with clouds and sunlight. His three most distinctive works are "Pilatus" (38), from its base, near Stanstadt; a richly-coloured view of "Lucca" (158), and a grand study of storm-clouds over the picturesque "City of Durham" (187). Mr. Thorne Waite is still as much at home as ever on the Sussex Downs, producing aerial effects which few can rival; but in "Dividing the Flock" (22) and the "Hampshire Cornfield" (239) there is too marked a tendency to see all Nature in one yellow tone. Miss Clara Montalba marks a new departure in her views of Sweden, and finds in its pale skies subjects well suited to her style. The first of the series, "A Swedish Fishing-Village" (78), is a somewhat daring attempt, and must only be regarded as a sort of introductory vignette to her views of "The Royal Palace at Stockholm" (108), "Marstrand" (267) on an autumn day, and "The Distant View of Stockholm" (181)—as seen from the sea. The weak point of Miss Montalba's work is a certain monotony in composition—each scene being built up, as it were, on the same scaffolding. It is, therefore, with sincere pleasure that we see her breaking away, now and then, in such works as the study of "The Autumn Woods near Näas" (105) and in the "Rough Weather off Marstrand" (112), where the waves are beating on the granite headland. Mr. Stacey Marks, although always painstaking and generally humorous, is scarcely up to his usual level; even "The Casket" (321)—a man in a buff jerkin and red cap, intent upon the contents of the box he is rifling—shows more industry than imagination. Mr. Glindoni, a far inferior artist, in a technical sense, is more likely to hit popular taste by his "Solo" (19)—a man laboriously blowing a bassoon—and by his "Height of Fashion" (44), a lady of the last century evidently enjoying her clothes. Mr. Charles Robertson, who is one of the latest and most promising recruits of the Old Society, is strongly represented; but, in spite of his well-intended English landscapes, one turns with greater satisfaction to such highly-finished, brilliantly-coloured studies of Eastern life as "The Bazaar at Cairo" (119), and the still more beautiful "Harem Door" (209), half hidden amongst the bright poppies. Amongst the old favourites who show no falling off in their powers must be mentioned Mr. William Collingwood, Mrs. Allingham, Mr. William Callow, Mr. Walter Field, Mr. S. P. Jackson, Mr. Wilmot Pilsbury, Mr. Cuthbert Rigby, Mr. Eyre Walker, and Mr. J. D. Watson; but their work calls for no special notice, although it bears witness to the high standard water-colour painting sustained by the Old Society. Amongst those who are less numerously represented, but whose works deserve, for that reason perhaps, greater attention, should be mentioned Mr. Matthew Hale, Mr. Tom Lloyd, Mr. David Murray, Miss Constance Phillott, and Miss Edith Martineau. Many well-known names—those of Mr. George Boyce, Mr. Carl Haag, Mr. J. W. North, and others—are absent, but those who are represented well sustain the reputation of the society; and the public, at all events, will have no reason to complain that finished works form the bulk of the exhibition instead of "sketches and studies."

At Messrs. Tooth's galleries (5 and 6, Haymarket) a collection of pictures and studies by Mr. Richard Beavis now fills the outer room. These works are the results of three years' wanderings in Spain and Portugal, and it must be admitted that the artist has turned his time to good account. From Belem Castle, at the mouth of the Tagus, to Barcelona, on the far-distant east coast, Mr. Beavis has jogged pleasantly along, picking up bits of quaint customs, of bold scenery, and of picturesque antiquities. He has caught with great skill the bright skies, the graceful inhabitants, and the arid soil of the Peninsula; and his views of Cordova, Valencia, Cadiz, and Malaga will revive pleasant recollections in the minds of those who have had the good fortune to visit these spots, and may serve to give a more accurate idea of what Spain really appears to travellers than the descriptions of the most painstaking writers from Beckford to Mr. O'Shea.

The Committee of the Reform Club have consented to lend to the approaching exhibition at Burlington House Mr. Frank Holl's full-length portrait of Mr. John Bright, which adorns the Club-house. This portrait, which was painted about half-a-dozen years ago, belongs to what is known as the artist's later style; and Mr. Holl was accustomed to rank it as one of the most important and successful of his works. Mr. Bright is represented seated beside a table, on which are books and papers, resting his head upon his hand.

The picture of Wagner in his home at Wahnfried, painted by Professor Beckmann, is now on view for a short time at Messrs. Ibach's Gallery (113, Oxford-street), and will probably have considerable interest for many of the master's admirers. In this family group—which includes Madame Wagner, Abbé Liszt, and Hans Von Wolzogen—the incident chosen for the picture is the moment of the completion of the opera "Parsifal," of which Liszt holds the manuscript, and congratulates the composer, who has just risen from the piano. Wagner is not represented in any of those wonderful garments of which we have recently heard so much tittle-tattle, but in simple velvet coat and white waistcoat; and altogether the simple scene gives an idea of Wagner's domestic life which well deserves a lasting memorial.

Fräulein von Hörschelmann, who comes to this country from Berlin with the recommendations and good wishes of the Empress Frederick and the Court circle, has been giving an exhibition of her varied powers. A lecture (in French) on the spirit of the Renaissance was followed by recitations in German, Italian, and English, all of which, though in different degrees, seemed to be appreciated by the audience. Our own impression is that Fräulein von Hörschelmann will do well to recognise the fact that London lies nearer to Paris than does Berlin; and that this proximity, as well as other causes, brings before English audiences French men and women who deal with similar subjects. The English ear, moreover, accustomed to listen to M. Renan, M. Andrieux, and M. Coquelin, and having at this moment the *conférences* of Mdlle. Blanche de Bury at their disposition, will be scarcely disposed to go in search of French declamations from one not to the manner born. Fräulein von Hörschelmann's knowledge of the history of art might, we think, be advantageously combined with her fluency in German to give lectures in that language; but to be successful in this country she must resolutely turn away from that diluted word-painting which has invaded contemporary German criticism. The specimen she herself gave—from Madame von Puttkamer's essay, "Chopin and his Art"—scarcely said more in four pages than the Frenchman who tersely described the exile's music and despondency in a foreign land as "Les larmes de la Pologne sur l'asphalte de Paris."

Mr. Francis Fleming, C.M.G., at present administering the Government of Mauritius, has been appointed Colonial Secretary of that colony; and Mr. Edward Rawle Drayton, a member of the Executive Council of the island of Grenada.

The Board of Trade have received through the Consul-General for Sweden and Norway, three silver medals of the third class, which have been awarded by the Norwegian Government to J. Z. Guttesen, master, Alfred King, mate, and Frank Russling, seaman, of the fishing-smack Volunteer, of Grimsby, in recognition of their services in rescuing in the North Sea, in March, 1887, two men of the crew of the wrecked Norwegian vessel Fri, of Fredrikstad.

Miss Lyons, daughter of Major-General Lyons, commanding the Western District, on Nov. 30 performed the christening ceremony of the launch, at Devonport, of the Sharpshooter, a new gun-vessel for the Royal Navy. The Sharpshooter is similar to the Sandfly and Spider, but of improved construction. Her length is 230 ft.; breadth, 27 ft.; displacement, 730 tons. She is built of steel throughout, and will carry two 36-pounders and four 3-pounder quick-firing guns; and has on the bow a torpedo-tube, as well as a pair of torpedo-tubes on each broadside. The vessel is expected to develop a speed of twenty-one knots per hour with forced draught.

The following appointments have been gazetted:—Mr. James Joseph Enslie, Consul at Hiogo and Osaka; Mr. John James Quin, Consul at Nagasaki; Mr. John Carey Hall, Consul at Hakodate and Neegata; Mr. Thomas Watters, Consul at Newchwang; Mr. Alexander Frater, Consul at Ningpo; Mr. Edward Lavington Oxenham, Consul at Kiungchow; Mr. Benjamin Charles George Scott, Consul at Chefoo; Mr. Colin Mackenzie Ford, Consul at Wuhu; Mr. Henry Barnes Bristow, Consul at Chinkiang; and Mr. Charles Walter Everard, Vice-Consul at Pagoda Island.

A handsome brass tablet has been placed in the crypt of St. Paul's Cathedral in memory of the late Field-Marshal Lord Strathnairn. It was designed and carried out by Messrs. Frank Smith and Co., of Southampton-street, Strand, and bears a simple inscription, surrounded by a bordering of laurel-leaves, and headed by the helmet and banneret of the Royal Horse Guards, of which regiment the deceased Field-Marshal was Colonel. It reminds us, with commendable brevity, that in the course of a career of sixty-five years Lord Strathnairn (better known as Sir Hugh Rose) took a leading part in some of the most important events of recent times. The late Field-Marshal died suddenly, at Paris, on Oct. 16, 1885, at the advanced age of eighty-four years. Handsome monuments of granite mark the spot where he and his brother, Sir William Rose, lie, close together, in the Priory Churchyard at Christchurch, Hants, with which town their family had been long connected.

MAYMYO, THE HILL STATION OF MANDALAY.

Three thousand five hundred feet above the city of Mandalay, the capital of Upper Burmah, is the pleasant little hill-station of Maymyo, nestling among the Shan hills. Not long ago an unpretentious village, it is now an important military post, with a garrison of European and native troops, to which has also been added a detachment of Punjabi police. The trade of the place has increased since the British occupation, and the Bazaar, held every five days, is a scene of busy commercial activity. To Maymyo come the traders of distant Shan states, bringing their rice and pickled tea; Panthays from the further confines of Burmah, and the almond-eyed merchant from far Cathay; while Shan caravans, with their interminable trains of neatly-laden pack-bullocks, pass through weekly on their way to Mandalay.

On bazaar day, Maymyo is seen at its best. Everyone is in holiday attire, and the market-place is thronged with a heterogeneous crowd, in colours of gorgeous hues, and with head-dresses of quaint and curious design. Of the latter, a large, flexible, betasselled straw hat, convertible by the aid of string into a "Dolly Varden," is much affected by male dandies as a sort of finishing touch to their silk fur-lined jackets, and silver-mounted "dahs" or dirks, which are frequently of costly and excellent workmanship. The headgear of the women is somewhat less pretentious. Use, rather than ornament, appears to be consulted; and their sugar-loafed hats of bark, of varied pattern, and consisting almost entirely of brim, amply fulfil this requirement.

As a hill-station and sanatorium, Maymyo may be said to be in its infancy; in fact, its future as such is as yet undecided. It has a possible rival in Koni, a green and salubrious spot, where pine-trees flourish, away to the south. But the hard-worked and perspiring toilers of the Golden City are not loth to ride the forty miles and to climb the steep ascent which lie between them and Maymyo, whenever an opportunity is offered.

Even two European ladies have ventured so far, and have braved the discomforts of a long and tedious journey, for the sake of a change to a cool climate, and to feast the eye on vegetation other than tropical. For up here the scenery is more English than Burman. The first arrival of that rarest apparition in the Shan country, an English lady, created the keenest interest and excitement in the breasts of the natives. She was followed everywhere by a gaping and astonished crowd; and on a market day they all jostled one another to obtain a good view of this remarkable figure; while on horseback she filled them still further with awe and wonderment.

In this wild region the lover of orchids will find plenty to occupy and amuse him. Within easy distance of the Fort are procurable numerous specimens of those interesting plants, some quaint and uncommon, others merely of local interest, rich in blossoms, but of no great rarity or value. For a few annas a coolie will journey to the hills and distant gorges amidst the mountains, and bring back enough plants to adorn a bungalow; and for a few rupees sufficient to stock a conservatory.

It is to be hoped that this station, possessing such a good climate, and other advantages, will eventually become to Mandalay what Ootacamund and Darjeeling are to Madras and Calcutta. The Sketches, and this description of Maymyo, are by Lieutenant A. E. Congdon, 2nd Battalion Royal Munster Fusiliers.

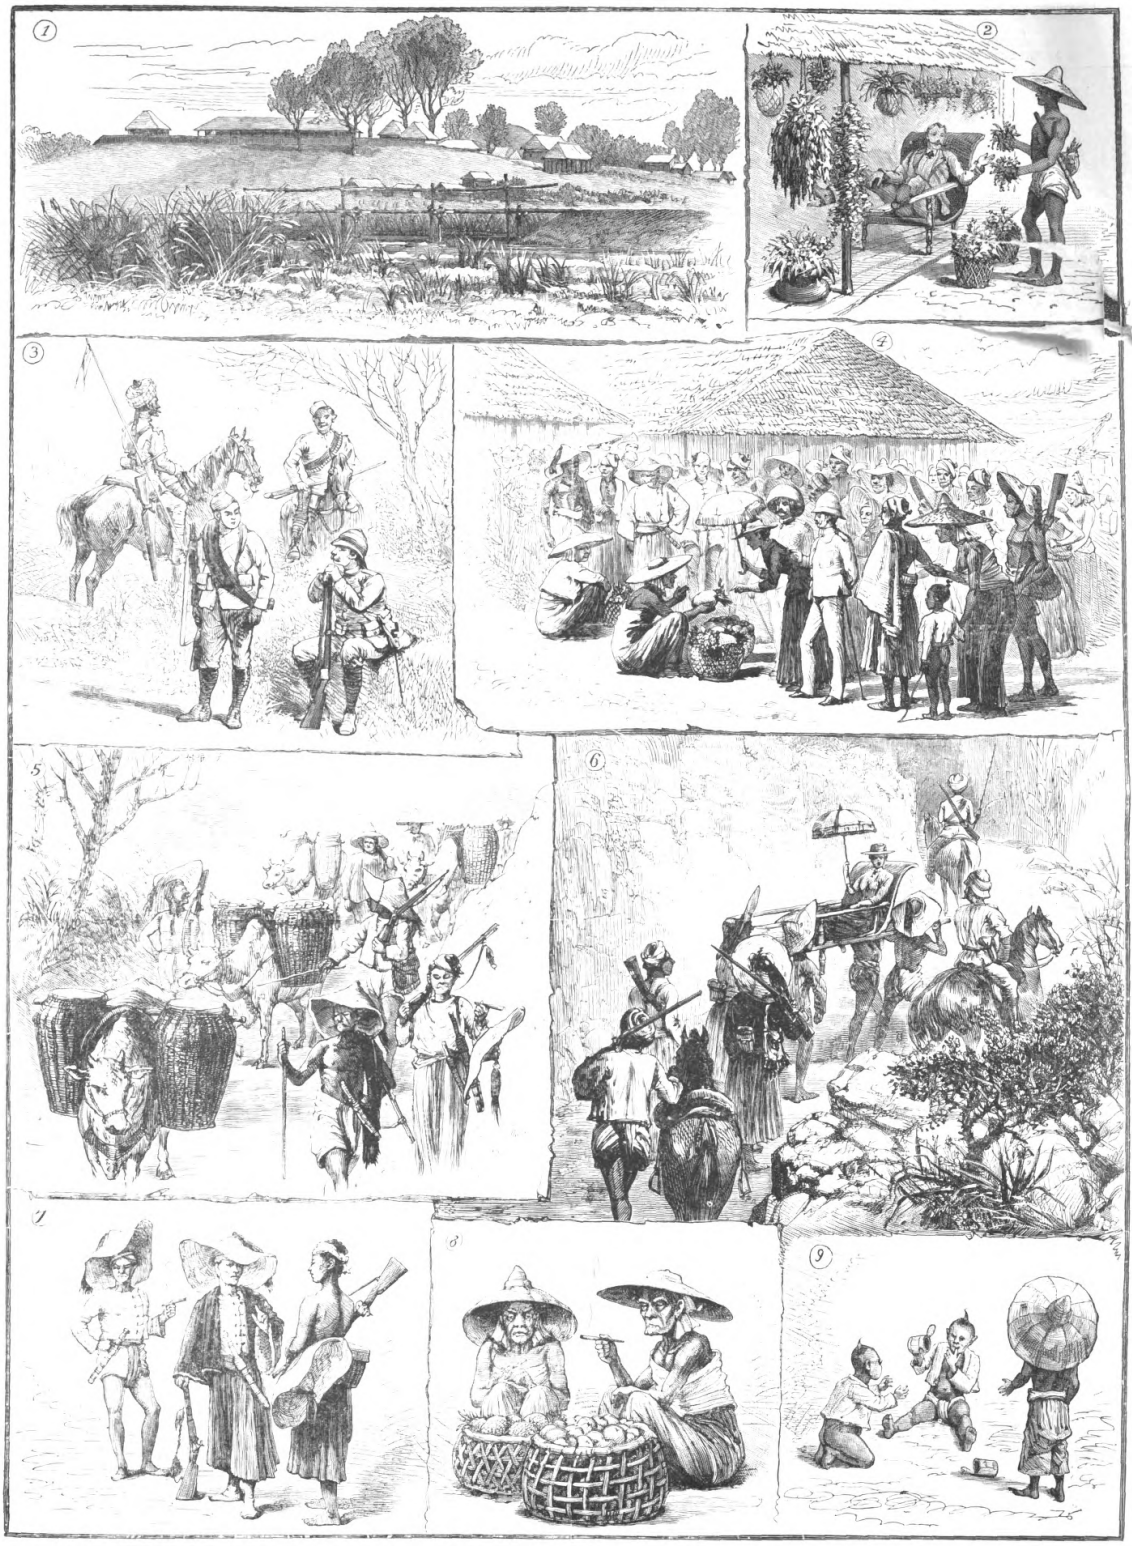
Mr. Sydney Courtauld has presented extensive pleasure-gardens to the parishes of Braintree and Bocking, Essex, and has also provided for their maintenance by an endowment.

Mr. John L. Child gave a dramatic and miscellaneous recital at Steinway Hall, on Dec. 3, and will give another, at the same place, on Monday evening, the 17th.

Mr. A. A. Hopkins has been appointed Counsel to the Mint authorities at the Birmingham Sessions, vacant by the resignation of Mr. Arthur Denman.

The annual cross-country competition between Oxford and Cambridge Universities was decided on Nov. 30, at Oxford, in a heavy downpour of rain. The dark Blues won easily, gaining the first three places. W. Pollock-Hill, Keble, covered the eight miles in 47 min. 52 sec.; A. J. Fowler, Corpus Christi, was second; and R. S. Vavasour, Worcester, was third.

The late Mr. O'Reilly Dease, of St. James's-square, London, and of Dee Farm, in the county of Louth, who died in the month of August, 1887, bequeathed the whole of his estate, amounting to upwards of £50,000 (subject to legacies to his solicitor and steward), to the Treasury, to be applied towards the reduction of the National Debt.



A supper to the "criminal classes," attended by some two hundred discharged prisoners, was given recently in the Mission Hall, Little Wild-street, Drury-lane; and a meeting was afterwards held, which was attended by the Lord Mayor (accompanied by the Lady Mayoress), the new Chief Commissioner of Police, and a number of other gentlemen.

Archdeacon George Henry Sumner, Prolocutor of the Lower House of Convocation of Canterbury, and Archdeacon Denet were consecrated on Nov. 30 at Westminster Abbey, the first as the Bishop of Guildford, Suffragan of Winchester, and the second as Assistant-Bishop of Jamaica. Among those present were the Archbishop of Canterbury, the Bishops of London, Winchester, Rochester, Marlborough, and several American prelates. The Rev. C. Grant preached the sermon.

The Universities of Oxford and Cambridge have drawn up regulations for the promotion of home reading and study in connection with their University extension schemes. The University extension work in London is carried on by the London Society for the Extension of University Teaching, in conjunction with the Universities' joint board. The Universities' board are preparing a similar scheme of home reading and study for London.

General Sir Henry W. Norman, G.C.B., G.C.M.G., C.I.E., now Governor of Jamaica, has been appointed Governor of Queensland. General Norman served in the Army at the siege of Delhi and the relief of Lucknow, and, after being for eight years Military Secretary to the Government of India, was appointed a member of the Council of the Viceroy. Seven years later he became a member of the India Council, and resigned that position in the following year, on being appointed Governor of Jamaica.

The fifth annual meeting of the Church Missionary Society (Kensington Rural Deanery Association) was held in the Kensington Townhall on Nov. 30. The Bishop of Marlborough presided, and, referring to the progress which had been made in missionary work, said that one hundred years ago there was not a single missionary in any part of the world, and now missionary societies and male and female agencies of different kinds are at work. Missionary work was not a failure, for they had eighty colonial bishops and eighty bishops in America, and the system was perfect in organisation. The Bishop of Moosonee gave a detailed account of the diocese over which he was placed in the Hudson Bay territory, where they had about 200 natives who attended services. The Rev. Mr. Dyson appealed for more funds to carry on their work.

1. The Port of Maymyo. 2. Coolie with Orchids. 3. Types of the Maymyo Garrison. 4. The first English Lady in a Shan Bazaar. 5. Shan Caravan on the March.
6. Travelling in the Shan Hills. 7. Shan Swells on Bazaar Day. 8. Shan Market-Women. 9. Young Shans with a Weakness for Sweets.

SKETCHES IN BURMAH: MAYMYO, THE HILL-STATION OF MANDALAY.

FOR FAITH AND FREEDOM.

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIBEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER XLIII.

BARNABY HEARS THE NEWS.

Master, my patient, got up from his bed in a few days, somewhat pale and weak after his copious blood-letting and the drastic medicines with which I purged the grossness of his habit and expelled the noxious humours caused by his many intemperances. These had greatly injured what we call—because we know not what it is—nor what else to call it—the pure volatile spirit of the body, and, so to speak, turned sour the *humor radicalis*—the sweet oil and the balsamical virtues of the brain. I gave him such counsel as was fitting for his case, admonishing him urgently to abstain from strong liquors, except in their moderate use; to drink only with his meals; to keep his head cool and sober, and above all things to repress and govern his raging temper, which would otherwise most certainly catch him by the throat, like some fierce and invisible devil, and throw him into a fit, and so kill him. I told him also what might be meant by the Wise Man (who certainly, being inspired, considered all the meanings which his words could have) when he said that one who is slow to wrath is of great understanding—meaning, among other things, that many men do throw away their lives by falling into excessive fits of rage. But I found that the words of Holy Scripture had little authority over him, for he lived without prayer or praise, trampled on the laws of God, and gave no heed at all to the flight of time or to the coming of the next world.

For a day or two he followed my injunctions, taking only a bottle of ale to his breakfast, the same quantity with his dinner, a pint of Madeira for his supper, and a sober glass or two before going to bed. But when he grew well, his brother planters came round him again, the drinking was renewed, and in the morning I would find him once more with parched throat, tongue dry, and shaking hand, ready to belabour, to curse, and to rail at everybody. If one wanted an example for the young, to show how strong drink biteth like a serpent and stingeth like an adder, here was a case the sight of which might have caused all young men to for ever forswear drunkenness. Alas! there are plenty of such examples to be seen in every part of England; yet the younger men still continue to drink, and that, I think, worse than their fathers. This man, however, who was not yet five-and-thirty, in the very prime of strong and healthy manhood, already had his finger joints swollen and stony from taking much wine; he commonly *ate but little meat*, craving continually for more drink; and his understanding, which was by nature, I doubt not, clear and strong, was now brutish and stupid. Thinking over this man and of the power, even unto death, which he possessed over his servants and slaves, the words came into my mind: "It *is* not for Kings, O Lemuel; it *is* not for Kings to drink wine, nor for Princes strong drink."

Nay, more (and this I say knowing that many godly men will not agree with me): I am fully persuaded that there is no man in the whole world so good and so strong in virtue and religion that he should be suffered to become the master or despot over any other man, even over a company of poor and ignorant blacks, or a gang of transported thieves. When I think of our unhappy people, how they were driven forth in the morning, heavy eyed and downcast, to the hard day's work; and when I remember how they crept home at night, after being driven, cursed, and beaten all day long; and when I think upon their drivers, overseers, and masters, and of their hard and callous hearts, I am moved to cry aloud (if any would hear me) that to be a slave is wretched, indeed; but that to own and to drive slaves is certainly a thing most dangerous for any who would continue a member of Christ's Church.

When I told Barnaby the surprising news that his sister was not only safe, but was a servant like ourselves upon the same estate, I looked that he would rejoice. On the contrary, he fell into a strange mood, swearing loudly at this ill stroke, as he called it. He said that he never had the least doubt as to her safety, seeing there were so many in the West Country who knew and respected her father, and would willingly shelter her. Then he dwelt upon certain evils—of which, I confess, I had thought little—which might befall her. And, lastly, he set forth with great plainness the increased dangers in escaping when one has to carry a woman or a wounded man—a thing, he pointed out, which had caused his own capture after Sedgemoor.

Then he opened up to me the whole business of our escape which he had been secretly planning.

"Last Saturday night," he said, "while you were sleeping, I made my way to the port, and, having already put into the place before, I sought out a tavern that I knew. It is hard by the Bridge, a house-of-call for sailors, where I had the good fortune to find a fellow who can do for us all we want—if his money hold out, which I doubt. He is a carver by trade and a convict, like ourselves; but is permitted by his master to work at his trade in the town. He hath been, it is true, branded in the hand; but, Lord! what signifies that? He was once a thief—well—he is now an honest lad again, who asks for nothing but to get home again. John Nuthall is his name."

"Go on, Barnaby. We are already in such good company that another rogue or two matters little."

"This man came here secretly last night, while you were in the sick-house. He is very hot upon getting away. And because I am a sailor and can navigate a craft (which he cannot do), he will take with him not only myself but also all my party. Now listen, Humphrey. He hath bought a boat of a Guinea man in the harbour; and because, to prevent the escape of servants, every boat is licensed and her owner has to give security to the Governor's officers, he hath taken this boat secretly up a little creek nigh unto his own cottage, and hath there sunk her three feet deep. The masts, the sails, the oars, and the other gear he hath also safely bestowed in a secret place. So we have a boat; but we cannot sail without water and provisions, nor without a compass at least. If our party is to consist of sister, Robin, you, John Nuthall, and myself—five in all—we shall have to load up the boat with provisions, which will cost much money. I looked for a boatfull with only ourselves and John Nuthall. Now we shall have Sis as well; and the boat is but small. Where shall we get provisions? and where shall we lay our hands upon the money to buy what we want?"

He could talk of nothing else, because his mind was full of his plan. Yet it seemed to me a most desperate enterprise, thus to launch a small boat upon the wide ocean, and in this cockle-shell to brave the waves which are often fatal to the tallest ships.

"Tut, man," said Barnaby. "We are not now in the season of the tornadoes, and there is no other danger upon these seas. I would as lief be in an open boat as in a brigantine. Sharks may follow us, but they will not attack a boat; calamaries they talk of, big enough to lay their arms round the boat and so to drag it under; but such monsters have I never seen, any more than I have seen the great whale of Norway or the monstrous birds of the Southern Seas. There is only one danger, Humphrey, my lad." Here he laid his hand upon mine and became mighty serious. "If we are taken we shall be flogged—all of us. Thirty-nine lashes they will lay on and then they will brand us. For myself I value not their thirty-nine lashes a brass farthing, nor their branding with a hot iron, which can but make a man jump for a day or two. To me this risk against the chance of escape matters nothing. Why, when I was cabin-boy I got daily more than thirty-nine lashes, with kicks, cuffs, and rope's-ending in addition. Nay, I remember, when we sat over the Latin syntax together my daily ration must have been at least thirty-nine, more or less, and Dad's arm was stronger than you would judge to look at him. If they catch me, let them lay on their thirty-nine and be damned to them! But you and Robin, I doubt, think otherwise."

"I would not willingly be flogged, Barnaby, if there were any way of escape—even by death."

"So I thought! So I thought!"

"And as for Robin, if he recovers, which I doubt, he too, if I know him, would rather be killed than be flogged."

"That comes of going to Oxford!" said Barnaby. "And then there is Sis. Humphrey, my lad, *it goes to my heart to think of that poor girl*, stripped to be lashed like a black slave or a Bristol drab."

"Barnaby, she must never run that dreadful risk."

"Then she must remain behind, and here she runs that risk every day. What prevents you drunken sot—the taste of that cudgel still sticks in my gizzard!—I say, what prevents him from tying her up to-day or to-morrow, or every day?"

"Barnaby, she must never run that risk, for if we are caught"—— I stopped.

"Before we are caught, you would say, Humphrey. We are of the same mind, then. But who is to kill her? Not Robin, for he loves her; not you, because you have too great a kindness for her. Not I, because I am her brother. What should I say to my mother when I meet her after we are dead, and she asks me who killed Alice?"

"Barnaby, if she is to die, let us all die together."

"Why," he replied, "though I have, I confess, no great stomach for dying; yet, since we have got her with us, it must so be done. 'Tis easy to let the water into the boat, and in three minutes, with no suspicion at all, and my mother never to know anything about it, Alice will have said her last prayers and we shall be all sinking to the bottom together with never a gasp left."

I took him after this talk to the sick-house, where Alice was beginning her second night of nursing the sick man. Barnaby saluted his sister as briefly as if her presence was the thing he most expected.

The room was lit by a horn lanthorn containing a great candle, which gave enough light to see Robin on the bed and Alice standing beside him. The woman called Deb was sitting on the floor wrapped in her rug.

"Sis," said Barnaby, "I have heard from Humphrey how thou wast cozened out of thy money and enticed on board ship. Well, this world is full of villains, and I doubt whether I shall live to kill them all. Two I must kill: that is certain. Patience, therefore, and no more upon this head. Well, Sis, dost love to be a servant?"

"Surely not, Barnaby."

"Wouldst like to get thy freedom again?"

"I know not the meaning of thy words, Brother. Madam says that those who have interest at home may procure pardons for their friends in the Plantations. Also that those whose friends have money may buy their freedom from servitude. I am sure that Mr. Boscorel would willingly do this for Robin and for Humphrey; but for myself—how can I ask him? How can I ever let him know where I am and in what condition?"

"Ay, ay, but I meant not that way. Child, wilt thou trust thyself to us?"

She looked at Robin. "I cannot leave him," she said.

"No, no; we shall wait until he is dead—or, perhaps, till he hath recovered." But he only added this to please his sister. "When he is well again, Sis, thou wilt not be afraid to trust thyself with us?"

"I am not afraid of any danger, even of death, with you, if that is the danger in your mind, Barnaby."

"Good! Then we understand each other. There are other dangers for a young and handsome woman—and, may be, dangers worse than death. Hast any money at all, by chance?"

"Nay; the man Penne took all my money!"

Barnaby for five or six minutes without stopping spoke upon this topic after the manner of a sailor. "My turn will come," he added. "No money, Child? 'Tis a great pity. Had we a few gold pieces now! Some women have rings and chains. But, of course"——

"I know, I know," said Barnaby. "Patience—patience. Oh! I shall get such a chance some day!"

"The other I threw away when I fled, from my husband at the church door."

"Ay, ay. If we only had a little money! 'Tis pity that we should fail for want of a little money."

"Why," said Alice, "I had quite forgotten. I have something—I have a third ring—that may bring money." She pulled from her neck a black ribbon on which was a little leathern bag. "'Tis the ring the Duke gave me at Ilchester long ago. I have never parted with it. 'God grant,' he said, when he gave it to me, 'that it may bring thee luck.' Will the ring help, Barnaby?"

I took it first from her hand.

"Why," I said, "it is truly a sweet and costly ring. Jewels I know and have studied. If I mistake not, these emeralds must be worth a great sum. But how shall we dispose of so valuable a ring in this place, and without causing suspicion?"

"Give it to me." Barnaby took it, looked at it, and laid it, bag and all, in his pocket. "There are at the port merchants of all kinds, who will buy a ship's cargo of sugar one minute and the next will sell you a red herring. They will readily advance money upon a ring. As for suspicion, there are hundreds of convicts and servants here. 'Tis but to call the ring the property of such a one and no questions will be asked. My friend John Nuthall, the carver, shall do this for us. And now, Sis, I think that our business is as good as done. Have no fear; we shall get away. First get Robin well and then"—— Here Barnaby gazed upon her face with affection and with pity. "But, Sister, understand rightly: 'tis no child's play of hide and seek. 'Tis life or death!—life or death! If we fly we must never come back! understand that well."

"Since we are in the Lord's hands, Brother, why should we fear? Take me with you; let me die, if you must die; and if you live I am content to live with you, so that my husband may never find me out."

CHAPTER XLIV.

A SCARE.

There is between the condition of the mind and that of the body an interdependence which cannot but be recognised by every physician. So greatly has this connection affected some of the modern physicians as to cause doubts in their minds whether there be any life at all hereafter, or if, when the pulse ceases to beat, the whole man doth not become a dead and senseless lump of clay. In this they confuse the immortal soul with the perishable instruments of brain and body, through which in life it manifests its being and betrays its true nature, whether of good or ill.

Thus, the condition in which Robin now lay clearly corresponded, as I now understand, with the state of his mind induced by the news that Alice, to save his life, had been betrayed into marrying his cousin. For, at the hearing of that dreadful news he was seized, as I have already said, with such a transport of rage (not against that poor innocent victim, but against his cousin) as threatened to throw him into madness; and, on recovering from this access, he presently fell into a kind of despair, in which he languished during the whole voyage. So also in a corresponding manner, after a fever the violence of which was like to have torn him to pieces, he fell into a lethargy in which, though his fever left him, he continued to wander in his mind, and grew, as I could not fail to mark, daily weaker in his body, refusing to eat, though Alice brought him dainty broth of chicken, delicate panadas of bread and butter, fruit boiled with sugar, and other things fit to tempt a sick man's appetite, provided by the goodness of Madam. This lady was in religion a Romanist; by birth she was a Spanish Quadroon. To escape the slavery to which the colour of her grandmother doomed her, she escaped from Cuba and found her way to this island of Barbados, where she met with our master. And whether she was lawfully married unto him or no I will not, after her kindness to Alice and her faithfulness to myself as regards Robin, so much as ask.

Robin, therefore, though the fever left him, did not mend. On the contrary, as I have said, he grew daily weaker; so that I marvelled at his lasting so long, and looked to see him die, as so many die, in the early morning, when there is a sharpness or eagerness in the air, and the body is exhausted by long sleep. Yet he died not.

And now you shall hear how, through the Duke of Monmouth's ring, we escaped from our servitude. "God grant," said the Duke, "that it bring thee good luck." This was a light and unconsidered prayer, forgotten as soon as uttered, meant only to please the ear of a child. And yet, in a manner most marvellous to consider, it proved the salvation of us all. What better luck could that ring cause than that of small escape from the land of Egypt—the House of Bondage?

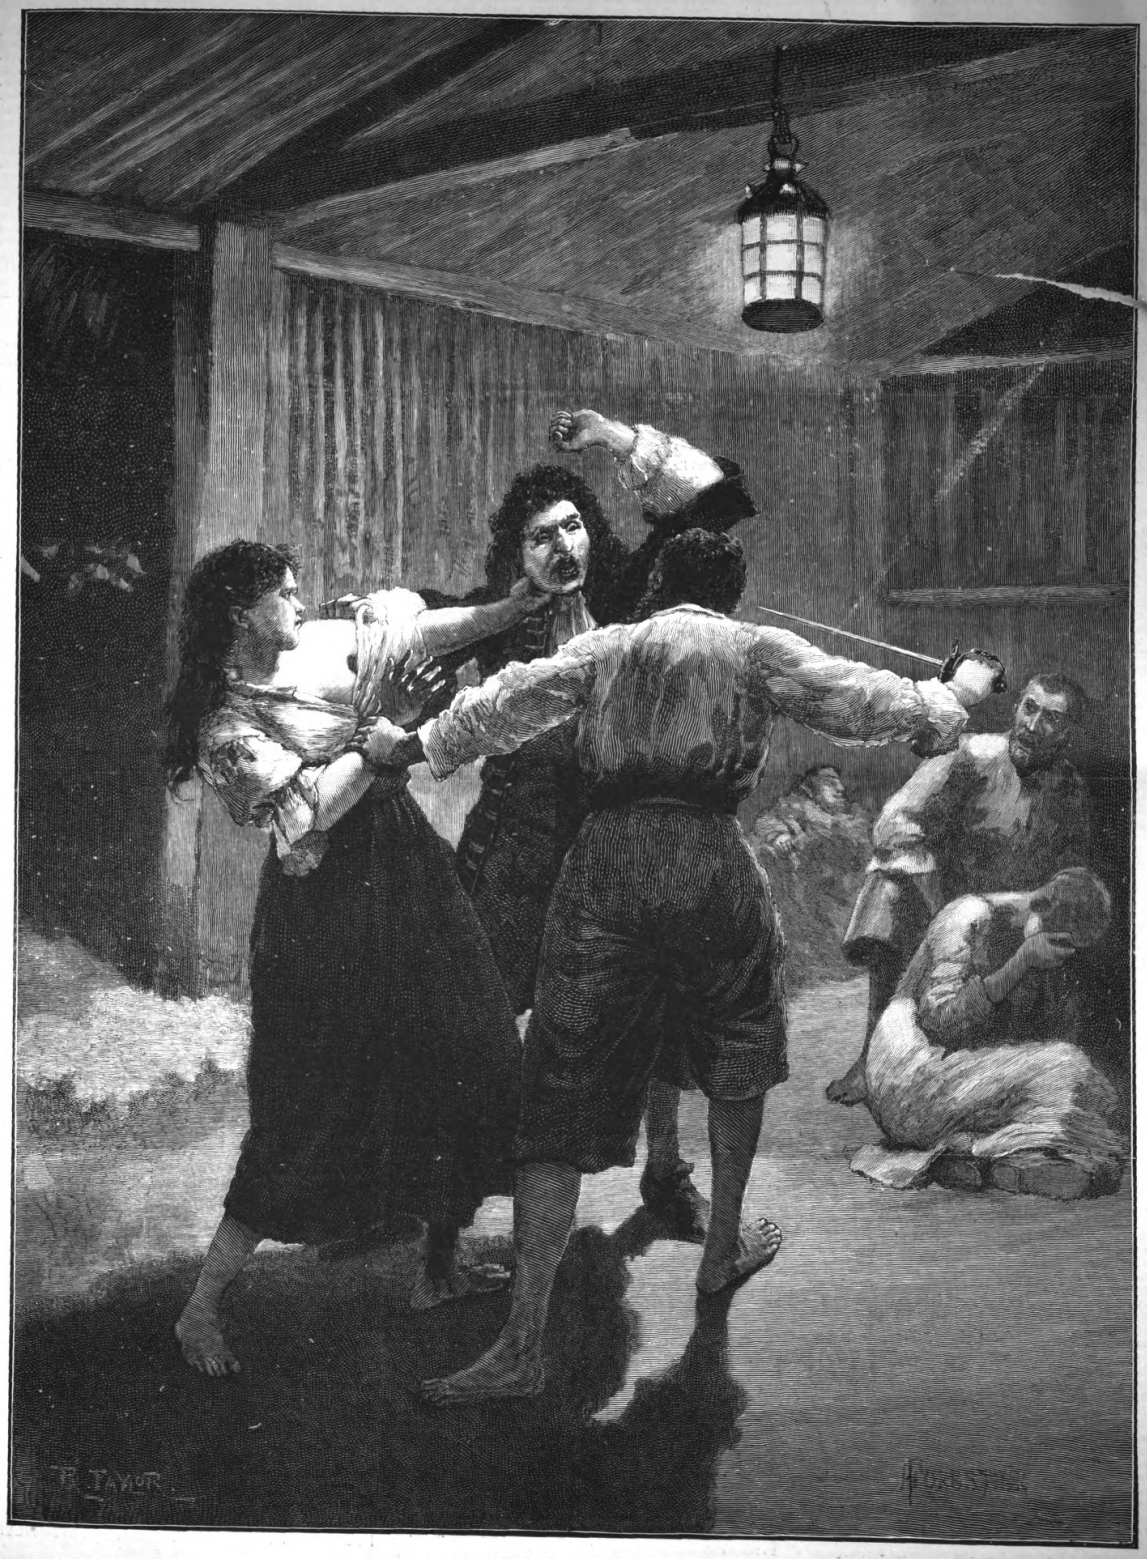
"I have disposed of the ring," Barnaby told me a few days later. "That is to say, John Nuthall hath secretly pledged it with a merchant for twenty guineas. He said that the ring belonged to a convict, but many of them have brought such precious things with them in order to buy their freedom. The merchant owned that the stones are fine, and very willingly gave the money on their security."

"Then nothing remains," I said, "but to get away."

"John Nuthall has bought provisions and all we want little by little, so as to excite no suspicion. They are secretly and safely bestowed in his cottage, and half the money still remains in his hands. How goes Robin?"

"He draws daily nearer to his grave. We cannot depart until either he mends or dies. 'Tis another disaster, Barnaby."

"Ay; but of disaster we must not think. Robin will die. Yet our own case may be as bad if it comes to scuttling the ship. Cheer up, lad; many men die, yet the world goes round. Poor Robin! Every man for himself, and the Lord for us all. Sis will cry; but even if Robin recovers he cannot marry her, a consideration which ought to comfort her. And for him—since nothing else will serve him—it is best that he should die. Better make an end at once than go all his life with hanging head for the sake of a woman, as if there are not plenty women in the world to serve his turn."



"I know not what ails him that he doth not get better. The air is too hot for him; he hath lost his appetite. Barnaby," I cried, moved to a sudden passion of pity such as would often seize me at that time, "saw one ever ruin more complete than ours? Had we been fighting for Spain and the accursed Inquisition we could not have been more heavily punished. And we were fighting on the Lord's side!"

"We were—Dad was with us, too. And see how he was served! The Lord, it seems, doth not provide His servants with arms, or with ammunition, or with commanders. Otherwise, the Duke this day would be in St. James's Palace wearing his father's crown, and you would be a Court Physician with a great wig and a velvet coat, instead of a Monmouth cap and a canvas shirt. And I should be an Admiral. But what doth it profit to ask why and wherefore? Let us first get clear of the wreck. Well; I wish we were to take Robin with us. 'Twill be but a poor business going back to Bradford Orcas without him."

We waited, therefore, day after day, for Robin either to get better or to die, and still he lingered, seemingly in a waste or decline; but such as I had never before seen, and I know not what would have happened to him, whether he would have lived or died, but then there happened a thing which caused us to wait no longer. Thus it began.

The master, having, according to his daily custom, gone the round of his estate—that is to say, having seen his servants all at work under their drivers; some planting with the hoe, some weeding, some cutting the maize, some gathering yams, potatoes, cassavic, or bonavist for provisions, some attending the Ingenio or the still-house—did unluckily take into his head to visit the sick-house. What was more unfortunate, this desire came upon him after he had taken a morning dram, and that of the stiffest; not, indeed, enough to make him drunk, but enough to make him obstinate and wilful. When I saw him standing at the open door, I perceived by the glassiness of his eyes and the unsteadiness of his shoulders that he had already begun the day's debauch. He was now in a most dangerous condition of

*All Rights Reserved.

DRAWN BY A. FORESTIER.

"Stand back!" cried Barnaby, pushing me aside. "Leave thy hold of him, woman. Let me deal with him."

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

mind. Later in the day, when he was more advanced in drink, he might be violent but he would be much less dangerous, because he would afterwards forget what he had said or done in his cups.

"So, Sir Doctor," he said, "I have truly a profitable pair of servants!—one who pretends to cure everybody and so escapes work, and your cousin, who pretends to be sick and so will do none! A mighty bargain I made, truly, when I bought you both!"

"With submission, Sir," I said, "I have within the last week earned for your Honour ten guineas'-worth of fees."

"Well, that is as it may be. How do I know what hath gone into your own pocket? Where is this malingering fellow? Make him sit up! Sit up, I say, ye skulking dog! sit up!"

"Sir," I said, still speaking with the greatest humility, "nobody but the Lord can make this man sit up." And, indeed, Robin did not comprehend one word that was said.

"I gave fifty pounds for him only a month ago. Am I to lose all that money, I ask? Fifty pounds! because I was told that he was a gentleman and would be ransomed by his family. Hark ye, Master Physician, you must either cure this man for me—or else, by the Lord! you shall have his ransom added to your own. If he dies, I will double your price! Mark that!"

I said nothing, hoping that he would depart. As for Alice, she had turned her back upon him at his first appearance (as Madam had ordered her to do), so that he might not notice her.

Unfortunately he did not depart, but came into the room looking about him. Certainly he was not one who would suffer his servants to be negligent, even in the smallest things.

"Here is truly fine work!" he said. "Sheets of the best—a pillow; what hath a servant to do with such luxuries?"

"My cousin is a gentleman," I told him, "and accustomed to lie in linen. The rug which is enough for him in health must have a sheet to it as well, now that he is sick."

"Humph! And whom have we here? Who art thou, Ma'am, I wish to know?"

Alice turned.

"I am your honour's servant," she said. "I am employed in this sick-house when I am not in the sewing-room."

"A servant? Oh! Madam, I humbly crave your pardon. I took you for some fine lady. I am honoured by having such a servant. All the rest of my women servants go in plain smock and petticoat. But," here he smiled, "to so lovely a woman as Mistress Alice Eykin—fair Alice, sweet Alice—we must give the bravest and daintiest. To thee, my dear, nothing can be denied. Those dainty cheeks, those white hands, were never made to adorn a common coif. Mistress Alice, we must be better acquainted. This is no fit place for thee. Not the sick-house, but the best room in my house shall be at thy service."

"Sir, I ask for nothing but to sit retired, and to render such service as is in my power."

"To sit retired? Why, that cannot be longer suffered. 'Twould be a sin to keep hidden any longer this treasure—this marvel, I say, of beauty and grace. My servant! Nay; 'tis I—'tis the whole island—who are thy servants. Thou to render service! 'Tis for me, Madam, to render service to thy beauty." He took off his hat and flourished it, making a leg.

"Then, Sir," said Alice, "suffer me, I pray, to go about my business, which is with this sick man, and not to hear compliments."

He caught her hand and would have kissed it, but she drew it back.

"Nay, coy damsel," he said; "I swear I will not go without a kiss from thy lips! Kiss me, my dear."

She started back, and I rushed between them. At that moment Madam herself appeared.

"What do you here?" she cried, catching the Master's arm. "What has this girl to do with you? Come away! Come away and leave her in peace!"

"Go back to the house, woman!" he roared, breaking from her and flourishing his stick, so that I thought he was actually going to cudgel her. "Go back, or it will be the worse for thee. What? Am I master here or art thou? Go back, I say."

Then a strange thing happened. She made no reply, but she turned upon him eyes so full of authority that she looked like a Queen. He shifted his feet, made as if he would speak, and finally went out of the place to his own house with the greatest meekness, soberness, and quietness.

Presently Madam came back.

"I blame thee not, Child," she said. "It is with him as I have told thee. When he begins to drink the Devil enters into him. Dost think he came here to see the sick man? No, but for thy fair eyes, being inflamed with love as well as with drink. At such times no one can rule him but myself, and even I may fail. Keep snug, therefore. Perhaps he may forget thee again. But, indeed, I know not."

She sighed, and left us.

CHAPTER XLV.

BARNABY THE AVENGER.

The man did not come back. During the whole day I remained with Alice in fear. But he molested us not.

When the sun set, and the field hands returned, I was in two minds whether to tell Barnaby what had happened, or not. But when I saw his honest face, streaked with the dust of the day's work, and watched him eating his lump of salt beef and basin of yellow porridge with as much satisfaction as if it had been a banquet of all the dainties, I could not bear, without greater cause, to disturb his mind.

"To-night," he told me, when there was no more beef and the porridge was all eaten, "there is a great feast at the Bridge. I would we had some of their Sherris and Madeira. The Governor of Nevis landed yesterday, and is entertained to-day by our Governor. All the militia are feasting, officers and men; nobody will be on the look-out anywhere; and it is a dark night, with no moon. What a chance for us, could we make our escape to-night! There may never again happen such a chance for us! How goes Robin?"

And so, after a little more talk, we lay down, and I, for one, fell instantly asleep, having now no fear at all for Alice; first, because the Master would be gone, I thought, to the Bridge, feasting, and would come home too drunk for anything but to sleep; and next, because she had with her the woman Deb, as stout and lusty as any man.

But the Master was not at the Bridge with the rest of the planters and gentlemen. Perhaps the drink which he took in the morning caused him to forget the great banquet. However that may be, he was, most unluckily for himself, drinking at home and alone, yet dressed in his best coat and wig and with his sword, all of which he had put on for the Governor's banquet.

After a while, the Devil entered into him, finding easy admission, so to speak, all doors thrown wide open, and even a welcome in that deboshed and profligate soul. About eight o'clock, therefore, prompted by the Evil One, the Master rose and stealthily crept out of the house.

It was a dark night, but he needed no light to guide his footsteps. He crossed the court and made straight for the sick-house.

He gently pushed the door open and stood for a little looking within. By the light of the horn lanthorn he saw the girl whose image was in his mind. The sight might have caused him to return, repentant and ashamed. For she was on her knees, praying aloud beside the bedside of the sick man.

As he stood in the door the woman named Deb, who lay upon the floor asleep, woke up and raised her head. But he saw her not. Then she sat up, watching him with suspicion. But his eyes were fixed on the figure of Alice. Then she sprang to her feet, for now she knew that mischief was meant, and she stood in readiness, but in the dark, unseen, prepared with her great strong arms to defend her mistress. But he thought nobody was in the house but Alice and the sick man. He saw nothing but the girl at the bedside.

I say that I was sleeping. I was awakened at the sound of a shriek—I knew the voice—I sprang to my feet.

"God of mercy!" I cried, "it is Alice! Barnaby, awake!—awake, I say! It is the cry of Alice!"

Then I rushed to the sick-house.

There I saw Alice—shrieking and crying for help. And before her the Master struggling and wrestling with the woman Deb. She had her arms round his neck and made as if she was trying to throttle him. Nay, I think that she would have throttled him, so strong she was and possessed of such a spirit, and by the light of the lanthorn gleaming upon the blade I saw that his sword had either fallen from his hand or from the scabbard, and now lay upon the floor.

"Stand back!" cried Barnaby, pushing me aside. "Leave thy hold of him, woman. Let me deal with him."

The thing was done in a moment. Merciful Heavens! To think that thus suddenly should the soul of man be called to its account! I had seen the poor fellows shot down and cut to pieces on Sedgemoor, but then they knew that they were going forth to fight and so might be killed. There was time before the battle for preparation and a prayer. But this man had no preparation—and he was more than half drunk, as well.

He lay at our feet, seemingly lifeless, Barnaby standing over him with the broken sword in his hand.

For a while, no one spoke or moved. But the woman called Deb gasped and panted and even laughed, as one who is well pleased because she hath had her revenge.

Then Madam herself, clad in a long white night-dress and with bare feet, suddenly pushed us aside and fell upon her knees beside the wounded man.

She lifted his head. The face was pale and the eyes closed. She laid it gently down and looked round.

"You have killed him," she said, speaking not in any rage or passion, but quietly. "You have killed him. To-morrow, you shall hang! you shall all hang!"

We said nothing. To me, indeed, it seemed pretty certain that we should all hang.

"Doctor," she turned to me, "tell me if he is dead or living."

She took down the lanthorn and held it while I made such examination as was possible. I opened the wounded man's waistcoat and laid back his shirt. The sword had run straight through him and had been broken off short, perhaps by contact with his ribs. The broken point remained in the wound and the flesh had closed around it so that, save for a drop or two oozing out, there was no flow of blood.

It needs not great knowledge of surgery to understand that when a man hath six inches of steel in his body which cannot be pulled out, and when he is bleeding inwardly, he must die.

Still, as physicians use, I did not tell her so.

"Madam," I said, "he is not dead. He is living. While there is life there is hope."

"Oh!" she cried; "why did he buy you when he could have had the common sort? But you shall hang—you shall hang, everyone!"

"That will we presently discover," said Barnaby. "Humphrey, we have now no choice left—what did I tell thee about the chances of the night? We must go this night. As for this villain, let him bleed to death."

"Go?" said Madam. "Whither, unhappy men, will you go? There is no place in the island where you can hide, but with bloodhounds they will have you out. You can go nowhere in this island but you will be found and hanged, unless you are shot like rats in a hole."

"Come, Humphrey," said Barnaby, "we will carry Robin. This poor woman must go too; she will else be hanged for trying to throttle him. Come, Deb. Well, thou canst lend a hand to carry Robin. Madam, by your leave we will not hang, nor will be shot. In the—in the—the cave—cave" (he nodded his head with a cunning look), "the cave," he repeated, "that I know of your bloodhounds will never find us."

"Madam," I said, "it is true that we shall attempt to escape. For what hath happened I am truly sorry; yet we may not suffer such a thing as was this night attempted without resistance, else should we be worse than the ignorant blacks. The Master will perhaps live, and not die. Listen, and take heed therefore."

"Doctor," she cried, "do not leave me. Stay with me, or he will die. Doctor, stay with me, and I will save your life. I will swear that you came at my call. Stay with me—I will save Alice as well. I will save you both, I swear it. You shall be neither flogged nor hanged. I swear it. I will say that I called you for help when it was too late. Only this man and this woman shall hang. Who are they? A rogue and"——

Barnaby laughed aloud.

"Doctor," she entreated, falling at my feet, "if you stay he will perhaps recover. Then he will forgive you all."

Barnaby laughed again.

"Madam," I told her, "better death upon the gallows than any further term of life with such a man."

"Oh!" she cried. "He will die where he is lying!"

"That may be, I know not." I gave her, therefore, directions, bidding her, above all, watch the man, and cause him to lie perfectly quiet and not to speak a word, even in a whisper, and to give him a few drops of cordial from time to time.

"Come," said Barnaby, "we lose time, which is precious. Madam, if your husband recover—and for my part I care nothing whether he recover or whether he die—but if he should recover, tell him from me, Captain Barnaby Eykin, that I shall very likely, in a year or two, return to this island, and that I will then, the Lord helping, kill him in fair duello, to wipe out the taste of the cudgel which he was good enough once to lay about my head. If he dies of this thrust with his own sword, he must lay that to the account of my Sister. Enough," said Barnaby, "we will now make our way to the—to the woods and to the cave."

This said, Barnaby went to the head of Robin's bed and ordered Deb to take the foot, and so between them they carried him forth with them, while Alice followed and I went last.

We heard, long afterwards, through one Mr. Anstiss, the same young gentleman who loved Alice and would have married her, what happened when we were gone. An hour or thereabouts afterwards, Madam woke up one of the overseers, telling him what had befallen the Master, and bidding him be ready at daybreak, with the bloodhounds, horses, and loaded guns, to follow in pursuit and bring us back.

There would be, they thought, no difficulty at all in catching us, because we were encumbered by a sick man and two women.

There was, however, more difficulty than they expected. For the footsteps led the bloodhounds to the seashore; and here the trace was lost, nor could it ever be afterwards recovered. And though the hue and cry was speedily out over all the island, and the woods and the ravines and caves where runaway negroes hide were searched, we were never found. Therefore, since no boat at all was missing (the Guinea man had sailed away), it was certain that we could not have escaped by sea. It was fortunate, indeed, that Barnaby dropped no hint about the sea; otherwise there would have been dispatched some of the boats of the port in search of us, and in that case the scuttling of the ship might have been necessary. For, had we been caught, we should certainly have been hanged for murder, after being flogged for attempted escape. Because the Master died. He lay speechless until the day broke. Then he became conscious and presently breathed his last in great anguish of body and terror of mind. What hath since become of Madam and of that miserable family of overseers, drivers, servants, and slaves, I know not. Certain it is that they could not find a more barbarous or a more savage master in place of him whom Barnaby slew if they were to search the whole of the Spanish Main and the islands upon it.

(To be continued.)

Mr. Ralli, a Liverpool merchant residing at St. Asaph's, has offered to contribute £300 towards the expenses incidental to the establishment of a dairy school in Flintshire.

The Birmingham and Midland Eye Hospital has received £5000 from an anonymous donor, £4000 to be devoted to paying off the existing debt on the hospital, and £1000 towards current expenditure.

The sixth annual exhibition of the Royal Cambrian Academy of Art, held at Plas Mawr, Conway, closed on Nov. 26 after a highly satisfactory season, over 8000 visitors, excluding season-ticket holders, having passed the turnstile. The chief attraction of the exhibition, apart from the interesting mediæval mansion of Plas Mawr, were the works of Sir J. Millais, Mr. G. F. Watts, Mr. H. Stacey Marks, and other honorary members. The sales amounted to £1715.

NEW TALE BY MR. RIDER HAGGARD.

The first Instalment of a New Serial Story, of absorbing interest, entitled CLEOPATRA *(being an Account of the Fall and Vengeance of Harmachis, the Royal Egyptian, as set forth by his own hand), written by* H. RIDER HAGGARD *expressly for this Paper, and Illustrated by* R. CATON WOODVILLE, *will be given in the Number for Jan. 5, 1889, beginning a New Volume.*

Now Publishing,

OUR CHRISTMAS NUMBER

CONSISTING OF A

COMPLETE STORY by D. CHRISTIE MURRAY,

POSTAGE FOR FOREIGN PARTS THIS WEEK.

DECEMBER 8, 1888.

Subscribers will please to notice that copies of this week's number forwarded abroad must be prepaid according to the following rates:—To Canada, United States of America, and the whole of Europe, THICK EDITION, *Twopence-halfpenny;* THIN EDITION, *One Penny.* To Australia, Brazil, Cape of Good Hope, China (viâ United States), Jamaica, Mauritius, and New Zealand, THICK EDITION, *Threepence;* THIN EDITION, *One Penny.* To China (viâ Brindisi), India, and Java, THICK EDITION, *Fourpence-halfpenny;* THIN EDITION, *Three-halfpence.*

Newspapers for foreign parts must be posted within eight days of the date of publication, irrespective of the *departure* of the mails.

MAGAZINES FOR DECEMBER.

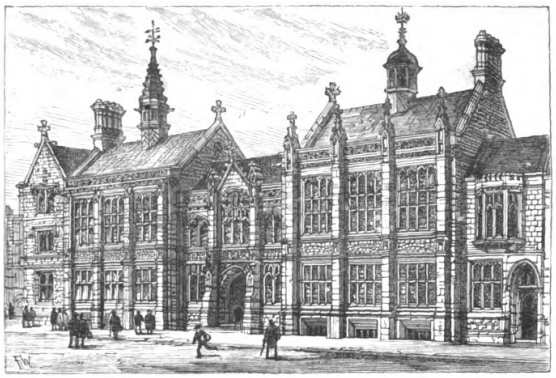
Nineteenth Century.—No fresh subject of urgent interest obtains discussion this month, unless it be the Presidential election in America, treated by Sir Lyon Playfair; while Mr. Frederick Greenwood, on the recent change in European affairs, has little new to say, but that he knows the young Emperor of Germany to be no friend of England, and regrets that England has declined to join the German-Austrian-Italian alliance. Mr. J. Theodore Bent has viewed from Patmos the scene of many volcanic eruptions in the isles of Thera and Santorin, which he suggests may have furnished some of the imagery in the reputed Apocalyptic vision of St. John the Apostle. Soldiers' food-rations and their cooking are discussed by Mr. Archibald Forbes. Dr. C. Lloyd Tuckey describes the curative or alleviating treatment of some diseases by the aid of mental influence applied in the hypnotic condition, as practised at Nancy by the French physician, Dr. Liébault, which is the scientific method of "faith-healing." The observations of Lord Enstace Cecil, in a visit to Japan, and Lady Blake's notes on the Beothuks, an aboriginal natives of Newfoundland, are papers of an attractive kind.

Contemporary Review.—Mr. Frederic Harrison, in an "Appeal to Liberal Unionists," recites the manifold iniquities of past rule in Ireland, and denounces the present administration as if it were equally oppressive. The ethnological and geographical aspects of Indian government are the theme of an effective essay by Sir W. W. Hunter. The Bishop of Wakefield, from his experience as Suffragan of the London diocese, supplies valuable information concerning the social condition of the East-End. The controversy with Professor Max Müller on the identity of thought and language is resumed by the Duke of Argyll. The unique position and character of Westminster Abbey, as a treasury of English historical monuments and associations, inspire Archdeacon Farrar to an earnest pleading for its preservation, and for the projected additional cloister or chapel. Mr. R. W. Dale continues the record of his impressions of the Australian colonies. The future prospects and resources of our food-supply are examined by Mr. J. W. Cross.

Fortnightly Review.—Lord Wolseley's testimony and commentary on the quality of negroes as soldiers, when strictly trained under severe discipline, should be of military importance. M. Jules Simon, an esteemed French writer on social morality, defends the female sex in his nation against wholesale censures of their domestic life, and asserts the existence of "eighteen millions of virtuous Frenchwomen." Mr. A. W. Stirling's opportune explanation of the political situation of Queensland shows the significance of the recent dispute with our Government on the appointment of Sir Henry Blake without consulting the Queensland constitutional authorities, while it exhibits the present division of parties in that colony, and reveals the growth in Australia of a decided spirit of independence; and this article may be commended to the attention of theorists who indulge the fancy of a more binding "Imperial Federation." It is followed by Mr. Walter Pater's critical disquisition on the artistic qualities of literary style; a concise account, by Mr. Stephen Wheeler, of the Black Mountain campaign; Sir Henry Pottinger's experiences of wild shooting sport in Norway; further controversy between Canon Isaac Taylor and the Church Missionary Society about the financial details of its management; an article on Roumanian politics, by Mr. J. D. Bourchier; and Professor Tyndall's narrative of the measures adopted, on his advice, for the lighthouse service of the Irish coasts, which have been the subject of much debate.

National Review.—The problem of destitution, and that of idleness and vice, which are not precisely identical or coincident, are treated by three writers: Mrs. S. A. Barnett, on "East London and Crime"; Bishop Bromby, on "The Sinking and the Sunken," prescribing industrial schools, Government action to relieve trade of locally congested labour, and assisted systematic emigration; and Mr. H. G. Tregarthen, on the organisation of unpaid agencies of visitation and out-door relief, long established at Elberfeld, in Prussia. "The Black Art," which is the subject of a learned work by Mr. J. Chaloner-Smith, here reviewed by Canon W. Lewery Blackley, is that of mezzotint engraving, a process declared to have been practised in England more skilfully and successfully than in any other country, and especially suitable for the reproduction of portraits. Mr. W. Earl Hodgson prognosticates good results to the Conservative Party in Scotland from Lord Salisbury's visit to Edinburgh. Professor Lewis Campbell, who has studied Shakspeare as deeply as Sophocles, examines "King Lear" for indications of dramatic motive and purpose hitherto overlooked. Lay agency to help the ministry of the Church is recommended by the Rev. G. Huntington; Mr. H. G. Keene upholds the social benefit of the institution of marriage; the working of the great London hospitals is investigated by Mr. A. O'Donnell Bartholeyns; Mr. E. Strachan Morgan gives an account of the Monte di Pietà, or State pawnbroking office, in Papal Rome; and there is an article on farming prospects, on low prices, and foreign imports.

Macmillan's Magazine.—Mr. Bret Harte's story of "Cressy" is concluded. A military contributor describes the manner in which the German soldier is drilled and taught. An accomplished scholar, poet, and gentleman of the seventeenth century, Sir Richard Fanshawe, is the subject of an agreeable notice by Mr. J. W. Mackail. "Names in Fiction," by Mr. George Saintsbury, is a pleasant literary essay. There is an Italian idyll, in verse, call "Sandro Gallotti"; a political article on Russia and England; one treating of bi-metallic monetary standards; a critical estimate of Mrs. Browning's poetry; an attempt, by Mr. Hallam Tennyson, to render "Persicos odi" in English sapphics, which are very faulty in metre; and some chapters of "Marooned," the latest sea romance of Mr. Clark Russell.



Murray's Magazine.—The excessive multiplication of new books, many of them worth reading, but which no one has time to read, and which cannot pay the authors or the publishers, is justly lamented by Mr. Alexander Innes Shand. "Character in Children" is thoughtfully considered with a view to education. Mr. Alfred Pollard pleads for fair salaries to lady teachers. The Rev. H. W. Rawnsley, the poet of "Sonnets Round the Coast," describes in prose a great flood in the Vale of Keswick. The historical notices of old English music, by A. M. Wakefield, deal now with the Carols. Mr. H. H. Romilly reports curious instances of sorcery and other superstitions in New Guinea. The tales of "A Good Old Family," and "The Reproach of Annesley," are continued.

Harper's Magazine (Christmas).—Mr. Walter Besant supplies to this excellent American magazine a short story written in the old-fashioned English style, entitled "The Last Mass," which is concerned with a crisis in domestic life contemporary with the Spanish Armada. "A Christmas Mystery in the Fifteenth Century," by Mr. Theodore Child, of Paris, is a minute description of one of the ancient miracle-plays, performed in 1473 at Rouen. Among the American contributions are one of Mr. W. D. Howells' lively little comedies in dialogue form; an article on F. S. Church, an eminent American artist; and tales, poems, and essays by several popular authors, with many fine engravings.

Scribner's Magazine.—Mr. R. L. Stevenson continues his Scottish story, "The Master of Ballantrae," and also preaches a kindly and sensible "Christmas Sermon." The picturesque in American scenery is honoured by an account of "Winter in the Adirondacks," with good illustrations; the beautiful or interesting in art, by a notice of Sandro Botticelli, and by a treatise on stained-glass windows, both illustrated by many engravings. Mr. Lester Wallack's theatrical and personal reminiscences are going on; and there is sufficient provision of poetry and of prose fiction.

The Century.—We naturally turn to an article on "The Reorganisation of the British Empire," published at New York; and are pleased to recognise in the writer, Mr. G. R. Parkin, a frank and cordial spirit of friendly goodwill towards the continuance of the political connection between Great Britain and Canada and our other great colonies beyond the ocean. Mr. George Kennan's narrative of his long and devious journey through Siberia, and his investigations into the condition of Russian prisoners and exiles, is continued; and so is the authentic political history of President Lincoln's Administration, which draws near the period of his resolve to emancipate the slaves. The description of London, by Mr. Henry James, a novelist as popular in England as in the United States, has, of course, an immediate claim on our readers' attention. We confess the truth of his impressions; we cannot pretend that London is a bright or elegant city; but we are glad that he likes Piccadilly and the Strand, that he admires the parks, approves of the Thames Embankment, respects our metropolis as the headquarters of the English-speaking world, and thinks us a huge, active, good-natured, unceremonious, rather clumsy, multitudinous community, with which a sensible American, or any other sensible man, soon feels himself at home.

English Illustrated Magazine.—An account of the progress of stage representation of "Macbeth," by Messrs. W. Archer and R. W. Lowe, treats of Garrick, Macklin, Mrs. Siddons, Edmund Kean, Macready, Phelps, and Ristori, as performers in that tragedy, and is accompanied by authentic portraits of actors and actresses in character, and views of scenes at Covent-Garden Theatre. The "Angler's Song" of Izaak Walton is given with ten illustrations designed by Mr. Hugh Thomson; "The Ferry Girl," by W. Padgett; "Beatrice and Hero," by H. Ryland; "A Study in Chalk," by Mrs. C. E. Perugini, and "Idle Moments," by G. Morton, are drawings of some merit. "Surrey Farmhouses," and "A Ramble through Normandy," afford good subjects for pen and pencil. Mr. F. Marion Crawford's Roman story is continued.

THE NEW CITY OF LONDON COURT.

Cornhill.—There is a pleasant and instructive discourse on sheep, by one who has kept them in Australia and Texas as well as in this country. "French Janet," and "A Life's Morning," proceed with several chapters, the latter to its conclusion. "The Other Englishman" is an interesting short story, and "A Piratical F.S.A.," is an entertaining cruise of an antiquary among the isles of Greece.

Longman's Magazine.—Mr. William Black narrates the dismal experience of an untrained man of sedentary habits in Scotch deerstalking. "A Dangerous Catspaw" is continued by Mr. D. Christie Murray and Mr. Henry Murray. Dr. Andrew Wilson treats of growing too fat, and the professed cures for that inconvenience. A short tale of West Coast Africa is contributed by Miss Werner.

Gentleman's Magazine.—The anecdotes of various ways of dying, collected by Mr. W. H. Davenport-Adams, are curious but sad, yet "Moriendum est omnibus" is a title which cannot be denied. Still more grim and dreadful are the Rev. S. Baring Gould's historical notices of "The Wheel and the Gallows." The tale of "A Stage Undine" is pathetic; the account of marionette performances is quaintly amusing; and "Shakspeare's Trees" afford a pleasant theme of citation and comment.

The following magazines can here only be received with general commendations: "Time," "Temple Bar," "Belgravia," "Monthly Packet" Christmas Number, "Argosy," "Tinsley's Annual," "Atlantic Monthly," "Lippincott's," "Woman's World," "Atalanta," "Naval and Military," "Colburn's United Service Magazine," "Illustrated Naval and Military Magazine," "Illustrations," "Outing," "Myra's Journal of Dress and Fashion," "Good Words," "Leisure Hour," and "Cassell's Family Magazine."

A set of twelve exquisite sepia drawings by the late Thomas Stothard, R.A., have been added to the permanent art collection at Nottingham Castle Museum, the gift of Mr. Felix Joseph. Stothard was famous for the illustrations of novels of his epoch. The Nottingham Museum now contains a large number of Stothard drawings presented by Mr. Joseph.

In pursuance of the powers vested in the Queen by the Trinidad and Tobago Act, 1887, her Majesty has been pleased, by the advice of her Privy Council, to declare by an order, bearing date Nov. 17, that from and after Jan. 1, 1889, the colony of Trinidad and its dependencies, and the colony of Tobago, shall be united into and constituted one colony, which shall be called the Colony of Trinidad and Tobago.

THE NEW CITY OF LONDON COURT.

The new City of London Court, opened on Thursday, Dec. 6, by the Lord Mayor, is situated on the south side of Guildhall-buildings and on the west side of Basinghall-street, and occupies the site of the old court buildings, the old Land-Tax offices, and the "Tap" of the Guildhall Tavern. The ground floor consists of the offices for clerks and bailiffs; on the upper floor, to the west, is the Judges' Court, about 45 ft. by 26 ft.; to the east the Registrar's Court, 36 ft. by 26 ft., each with a private room attached, and approached by a separate stair and entrance. The principal and public entrance is in the middle of the façade to Guildhall-buildings. The building has been designed in the late Gothic style of architecture, which was also adopted for the Guildhall Library and the New Council Chamber, in order to harmonise with the ancient Guildhall. The south window contains the arms bearings of the Lord Mayor; of Mr. B. S. Foster Ma... chairman of the Law and City Courts Committee; and ... H. H. Bridgman, the late chairman. In the north win... the arms of the City, and of Alderman and Sheriff Gr... Mr. Sheriff Newton.

Mr. Andrew Murray, the architect, deserves much ... for such a suitable building. T... building and fittings was Mr. J. Morter, of Stratfor...

A TRIP ROUND THE WORLD.

A Trip Round the World in 1887 and 1888. By W. S. Caine, M.P. (G. Routledge and Sons).—In the early part of the last century, when a gentleman travelled with a hired carriage and post-horses through France or Flanders and Germany to Italy, as far as Rome and Naples, it was called "the grand tour." In less time, and at less expense, one may now go round the globe, visiting Canada or the United States, Japan or China, Australia or India, and returning by the Suez Canal, seeing a little of Egypt, perhaps of Syria and Greece, and running home through Italy and Germany or France. This is the "grand tour" of these days, which by the aid of steam-ships and railways can be performed very easily, indeed in a leisurely manner, with first-class accommodation, at the cost of about £350, occupying six months, and stopping to view the most notable sights. The hon. M.P. for Barrow-in-Furness is not only a well-known politician, but is also well informed concerning social, industrial, and commercial affairs, in relation to which he could gather knowledge of more utility than the mere descriptions of scenery, and the conjectures or secondhand opinions, which are too often repeated in books of this kind. Accompanied by his daughter, he crossed the Atlantic to Canada in August, 1887; traversed the breadth of the North American Continent by the Canadian Pacific Railway, embarked at Vancouver, Oct. 8, for Yokohama, spent a fortnight in Japan, visited Hong-Kong and Singapore, passed ten days in Ceylon, was at Calcutta on the day before Christmas, saw Benares, Agra, Delhi, and Jeypore, stayed a week in Bombay, and got home in February to his Parliamentary duties, having been away from England five months, two weeks, and three days. His letters written during this course of travelling to a local newspaper in the town which he represents are collected in the volume before us. They are good useful reading; and the conciseness and directness of his style, with the freshness of his observations, render them more acceptable than the tedious personal narratives of some other "globe-trotters." If any of our own readers have felt that the recent Sketches of our Special Artist excite a wish to know a good deal more about such places as Calgary and Banff, at the foot of the Rocky Mountains, and the Selkirk Range and other grand features of nature in British Columbia, we would refer them to Mr. Caine. But he never loses sight of questions of social welfare; and being a strong advocate of total abstinence from intoxicating drink, and of laws prohibiting its sale, his remarks on the Canadian Local Option Act of 1878, which has already been adopted in sixty-three counties and cities, may be encouraging to those who share his opinions. In British Columbia, it seems, the consumption of liquor, per head of the population, is nine times greater than it is in Prince Edward's Island; but Calgary is a tectotal town, and the people of Manitoba, on the average throughout that province, drink only at half the rate of the people of Ontario. There is certainly much statistical interest in the results of any such legislative experiments within the limits of one colonial dominion; but the western provinces have as yet a scanty population, and nobody can predict what they will choose to do at a future time. The line of steam-ships from Vancouver to Japan seems to be uncomfortably managed; and, until there shall be some improvement, travellers will do wisely to prefer the San Francisco line for their voyage across the Pacific. Mr. Caine visited the capital city of Tokio (Yeddo), the temples of Nikko, the port of Kobe, and Kioto, the old capital; but his sojourn in Japan was too brief for him to add anything to our acquaintance with that attractive country and agreeable nation. He shows an instructed taste for Japanese decorative art, and commends the system of popular education. In the island of Ceylon, to which two chapters are devoted, and among the splendid temples, palaces, and tombs of the ancient cities of India, he found other objects of interest which have frequently been written about. His views of the condition and prospects of India are fair and candid, with a disposition to favour the demand of high-class natives that they may have a larger share in the administration. The book is adorned with a great variety of illustrations.

The Goldsmiths' Company have given £50 towards the funds of the Deaconesses' Institution and Hospital, Tottenham, which is in need of further help.

Mr. Vernon Lushington, Q.C., Judge of County Courts (Circuit No. 45), has been elected Treasurer of the Honourable Society of the Inner Temple for the ensuing year in succession to Sir Patrick Colquhoun, Q.C.

The Exhibition of Decorative Handiwork, which has been opened in the Galleries of the Royal Scottish Academy at Edinburgh, is of considerable interest. It comprises various kinds of professional and amateur work, for which prizes are awarded; wood-carving, plaster modelling, carving in stone or marble, gold and silver work, wrought iron, repoussé metal work, inlaying of wood, turning, picture frames, painted decoration, mosaic, embroidery, and book-ornament. There is also an attractive loan collection of selected examples of fine old and modern work of these kinds. The executive committee is formed of ten or twelve gentlemen of known taste and skill, among whom are Mr. J. M. Dick Peddie, architect, Professor Baldwin Brown, Mr. James Gordon, architect, and others well known in the Scottish capital, where many visitors have been drawn to the Exhibition.

"The illustrations in colour, delicately executed, are a special feature of this attractive book."—Saturday Review.
London: SEELEY and Co., Essex-street, Strand.

CHATTO and WINDUS'S NEW LIST.

PERSONAL MEMOIRS of General P. H. SHERIDAN. (The Romantic Career of a Brave Soldier, told in his own words.) With 22 Portraits and other Illustrations, 27 Maps, and numerous Facsimiles of Famous Letters. Two Vols. of 500 pp. each, demy 8vo, cloth extra, 24s.

WILKIE COLLINS'S NEW NOVEL.
THE LEGACY OF CAIN. By WILKIE COLLINS, Author of "The Woman in White."

THE DAGONET RECITER and READER. Being Readings and Recitations in Prose and Verse, selected from his own Works by GEORGE R. SIMS. Portrait Cover, 1s.
The following is the first verse of Mr. SIMS'S NEW POEM, "THE LONG STRIKE," which opens the Volume:—
"Up in the North, where 'gainst the night
The furnaces flame in a belt of red,
And the sullying smoke shuts out the light,
And the fields are black and the trees are dead—
Up in the North, in a grim, grey town
That frowns on a black and a barren land,
The master had put the wages down,
And the toilers had made a desperate stand."

THE EULOGY OF RICHARD JEFFERIES. By WALTER BESANT. Crown 8vo, cloth extra, with Photographic Portrait, 6s.
"We owe, many of us, a deep debt to the author of 'Dorothy Forster,' as to one who has refreshed us in weariness, and whose kindly pen has caused the stiff pasture of many unchuffed hours. But we doubt if any of his novels will appeal to his readers with such force and charm as the pages, overflown not with love and admiration, in which he has told the life of Richard Jefferies, the great prose poet of the Wiltshire downs."—Spectator.

PLAYERS AND PLAYWRIGHTS I HAVE KNOWN. By JOHN COLEMAN. 2 vols., demy 8vo, cloth extra, 24s.
"It can never be said that there is too much of the class of literature which the books of such interest as that published by Mr. Coleman form the standard of merit."—Yorkshire Post.

AGATHA PAGE: A Novel. By ISAAC HENDERSON. 2 vols., crown 8vo, at all Libraries.

THE SPECTRE OF THE CAMERA; or, The Professor's Secret. By JULIAN HAWTHORNE, Author of "A Dream and a Forgetting," &c. Crown 8vo, cloth extra, 3s. 6d.

THIS MORTAL COIL. By GRANT ALLEN. 3 vols., crown 8vo, at all Libraries.
"An extremely clever study of certain aspects of modern society. . . . The plot, which is very sensational, moves rapidly, and the book seems to us greatly in advance of anything which we have previously read from Mr. Grant Allen's caustic but clever pen."—Leeds Mercury.

HERR PAULUS: His Rise, his Greatness, and his Fall. By WALTER BESANT, Author of "All Sorts and Conditions of Men." Cheaper Edition, crown 8vo, cloth extra, 3s. 6d.
"'Herr Paulus' is undoubtedly the best novel which Mr. Besant has written since 'All Sorts and Conditions of Men.' . . . It has plenty of life, humour, and interest."—Manchester Examiner.

A STRANGE MANUSCRIPT FOUND IN A COPPER CYLINDER. With 19 Full-page Illustrations by Gilbert Gaul. Third Edition, crown 8vo, cloth extra, 3s. 6d.
"Thrillingly interesting, intensely satirical, and undoubtedly clever."—Perthshire Advertiser.

WISDOM, WIT, AND PATHOS. Selected from the works of Omar, by F. SYDNEY MORRIS. New and Cheaper Edition, post 8vo, illustrated boards, 2s.

KING OR KNAVE? A Novel. By R. E. FRANCILLON. Cheaper Edition, crown 8vo, cloth extra, 3s. 6d.

HOLIDAY TASKS. By JAMES PAYN, Author of "Lost Sir Massingberd," &c. Cheaper Edition, crown 8vo, cloth extra, 3s. 6d.
London: CHATTO and WINDUS, Piccadilly, W.

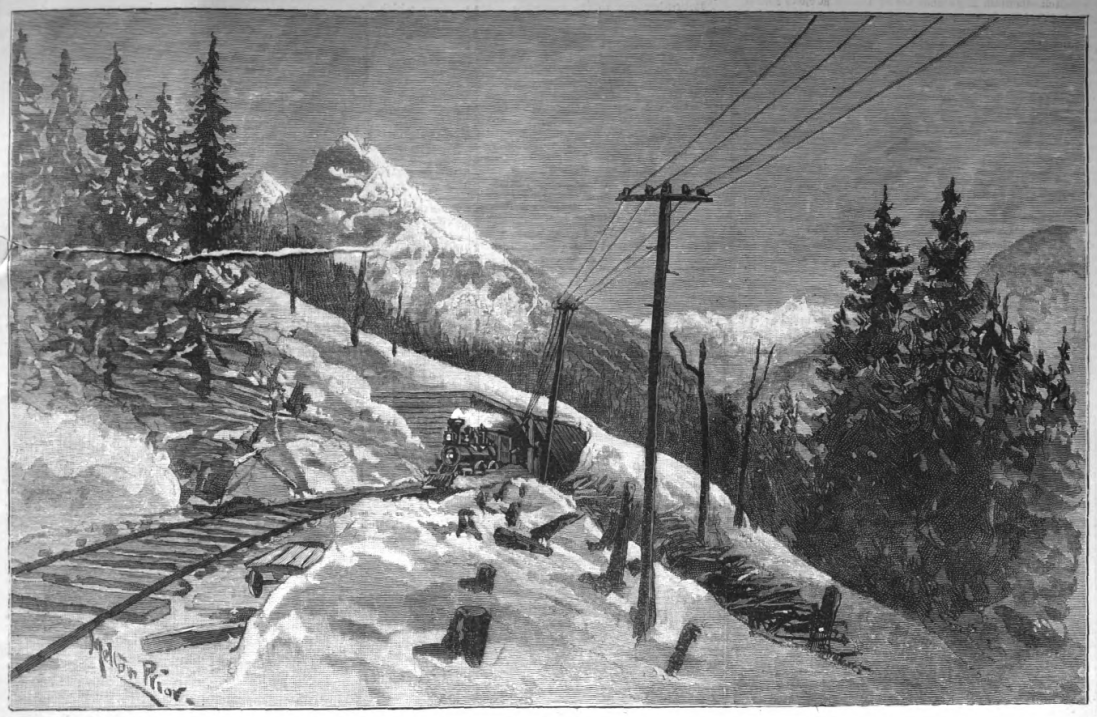
THE CANADIAN PACIFIC RAILWAY.

British Columbia, a "Land of the mountain and the flood"—to which the Scottish Highlands are of tame and petty aspect, and which abounds more than Switzerland and Norway in wild and romantic scenery—furnishes the subjects of our Special Artist's Sketches. This most westerly province of the Dominion of Canada, extending about eight hundred miles from north to south, and three hundred miles from east to west, from the Rocky Mountains to the Pacific seacoast, is intersected by several great mountain ranges: the Selkirk, the Gold Range, and the Cascade Range being the main interior groups, running generally from north-west to south-east, with frequent intervening spurs and offshoots. The Selkirk Range has quite an Alpine character, and forms the backbone of the country, rising often higher than the Rocky Mountains in this part of North America. The principal rivers, some of which at the beginning of their course flow northwards, and turn afterwards to the south, while others — the Kootenay, for instance—begin with a southward course and subsequently change to the northerly direction, form numerous lakes resembling the inland "lochs" of Scotland; but their channels are usually rock-bound, and their banks, except in the more open straths and valleys, where the land is very fertile, are overlooked by grand pine-covered mountains or precipitous cliffs and craggy peaks. The Columbia River passes southward into the United States' territory of Washington, and issues between that territory and Oregon, discharging itself into the Pacific Ocean. The Fraser River, which has its source in the Rocky Mountains, flows 650 miles, entirely within British Columbia, receiving the Thompson River at Lytton, and many other large streams, by which it is connected with the Kamloops, the Harrison, the Lillooet, and the Seton Lakes; the lower portion of the Fraser River from its mouth in the Gulf of Georgia, below New Westminster, is navigable by steamer for ninety miles up to the town of Yale.

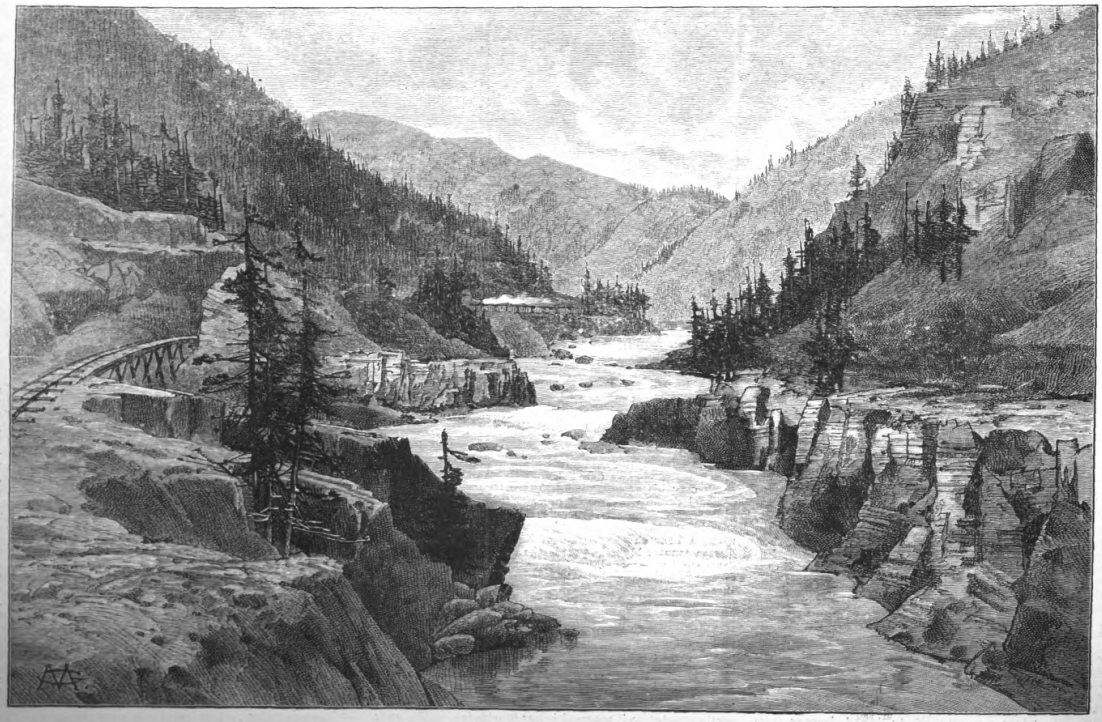
Returning now to the Selkirk mountain range, which is crossed by the Canadian Pacific Railway, we must notice its highest summit, 11,000 ft. above the sea-level, named after Sir Donald Smith, one of the chief promoters of this line. The passenger cannot fail to be struck by the view of Mount Sir Donald. It rises high above the southern verge of the Rogers Pass, close to a great glacier which, joining with another further south, forms the head-waters of the Illecillewaet river. This stream runs out from under the icy mass and over the boulders and débris at the bottom of a deep gorge that crosses at right angles, though much below, the Rogers Pass. The glacier is a vast mass of ice fully a mile wide at the top, with the waters flowing out from underneath in several currents, uniting to form the river. In this gorge the company have built another pretty Swiss chalet for a stopping-place, which they call the "Glacier Hotel," with magnificent mountain views. The railway avails itself of this ravine, and of another that comes into it at right angles a short distance below, to get down out of the pass. The line, by repeated double loops, runs for six miles, descends 600 ft., and accomplishes just two miles of actual distance. Here is an achievement of engineering that took a railway genius to conceive and execute. First the line runs southward, along the side of the gorge towards the glacier, then it crosses a high bridge and curves back on the other side, coming out near where it started, but at a much lower level. Next, it curves round into the second ravine, swings across it, and comes back again at 120 ft. lower level, yet only 130 ft. further down the pass. Then it doubles upon itself, and crosses the river, immediately recrossing again. Here are six almost parallel lines of railway in full view, each at a lower stage, and each made up largely of huge trestle bridges. These are the "loops" of the Canadian Pacific.

It is not less remarkable to observe the manner in which the Canadian Pacific Company builds its snow-sheds to protect the railroad. There are two between the summit and the hotel which are being united, altogether over a mile long. On the side next the mountain the shed is of strong crib work, built of cedar timber, 10 by 12 in. laid two inches apart, with cross timbers dovetailed into the two sides of the crib and spiked together with seven-eighth spikes 16 in. long. This crib is 35 ft. high, and filled with stone. On the other side timber of the same size and about five feet apart are spiked upon the massive mudsills and cross-sills. Upon the cross-sills heavy lean-to supports are mortised into the upright timbers and into the sills, all spiked together. Across the top is a floor of two-inch planks, braced from the centre, and another sloping roof of the same thickness slanting down nearly to the ground on the lower side of the track, completes the shed. The whole roof is as strong as a bridge. In some parts of the line there are double tracks—one within the shed for winter use, the other outside, to be used during the summer months. Every kind of work on the road seems to be done without regard to cost, but with the determination to make it as perfect as a single-track road can be. The station-houses are, or are to be, all ornamental.

Startling as is the passage through the Rocky Mountain and Selkirk ranges, the carving out of the line upon the steep banks of the deep and winding canyons of the Thompson and Fraser Rivers has also called for great engineering skill, and gives for hundreds of miles a succession of magnificent scenes. The hotel at North Bend is a good stopping-place for tourists who wish to see more of the Fraser Canyon than is possible



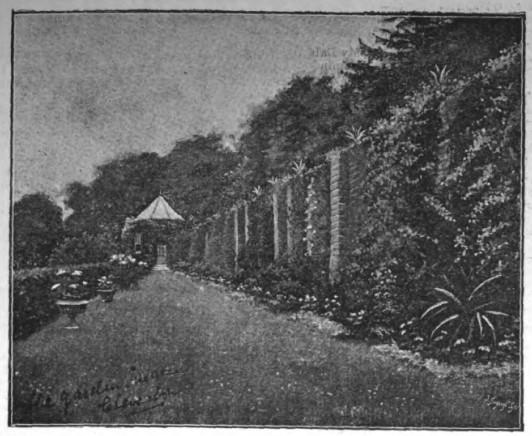
BOSTON BAR, ON THE FRASER RIVER, BRITISH COLUMBIA.
SKETCH BY OUR SPECIAL ARTIST, MR. MELTON PRIOR.



from the trains. At Boston Bar, a few miles below North Bend, the principal canyon of the Fraser commences, and from here to Yale, twenty-three miles, the scenery is intensely interesting. It has been described as "ferocious." The great river is forced between vertical walls of black rocks where, repeatedly thrown back upon itself by opposing cliffs, or broken by ponderous masses of fallen rock, it madly foams and roars. The railway is cut into the cliffs 200 ft. above, and the jutting spurs of rock are pierced by tunnels in close succession. At Spuzzum the Government road, as if seeking company in this awful place, crosses the chasm by a suspension bridge to the side of the railway, and keeps with it, above or below, to Yale. Ten miles below Spuzzum the enormous cliffs apparently shut together and seem to bar the way. The river makes an abrupt turn to the left, and the railway, turning to the right, disappears into a long tunnel, emerging into daylight and rejoining the river at Yale.

A RIDE TO SHESHOUAN.

Our readers will remember, in *The Illustrated London News* of Sept. 22, a Sketch by Mr. Walter B. Harris, giving a view of the singular Moorish town of Sheshouan, in the Berber mountain country of Northern Morocco, between the habitations of the Beni-Hassan tribes and the Riff. Sheshouan, though distant not more than forty hours' journey from Tangier, is not accessible to European visitors without some danger, as it is reputed a very sacred Mussulman shrine, and unbelievers in the Prophet Mohammed are strictly forbidden to approach it. We understand that only once, before the adventurous expedition of our recent correspondent, has this sequestered and jealously guarded place been seen by any Christian. Mr. Walter Harris contributes to the new December Number of *Blackwood's Magazine* an interesting narrative of his "Ride to Sheshouan," which was performed last July. He put on the dress of a respectable Moor, consisting of a long white shirt and baggy white trousers, a small sleeveless jacket of crimson silk, the "fez" or "tarboosh" on his head, and a "jelaba" or hooded cloak, also white, covering him from head to ankles. He engaged at Tangier a boy named Selim, a native of Sheshouan, and set forth with two mules, carrying only a blanket and a small red leather bag slung over his shoulder, but not forgetting his revolver for personal defence in case of need. Having passed the first night at Tetuan, forty-five miles from Tangier, he next day, with his guide, to whom only he intended to speak in Arabic, rode on through the village of Zenat, and the wild Beni-Hassan country beyond, towards the conspicuous peaks of the great Sheshouan mountains. Being waylaid by the suspicious tribesmen on the road, he tried to hide himself amidst the shrubs, while Selim told the questioners that the stranger who had been seen with him was a Moor, "the son of Abdul Malek from Fez, going to Sheshouan to see his mother's people." But the Beni-Hassan men presently caught Mr. Harris, who boldly told them what he was, and where he meant to go; he gave them cigarettes, and they behaved civilly, resolving not to stop him by force, though warning him that he would be killed, if discovered to be a Christian, by the Sheshouan people. He and Selim were allowed to ride on, and in the evening got to the mysterious town, which is magnificently situated, as it appeared in our illustration, on the lower slope of a lofty mountain; the precipitous cliff, with rocky crags at its summit, rising close behind, and the valley below, well wooded and cultivated, with the winding course of a rapidly flowing river. It is a large town, with five gates and seven mosques; and its aspect is the more picturesque as the house-roofs, instead of being flat, are gabled and covered with red tiles. Three waterfalls, pouring out of caves in the mountain, fill aqueducts supplying water to the many fruit-gardens and to the mills. Mr. Harris was taken by Selim to his parents' house in the town, where he had food and lodging for the night, after walking about for two hours, late in the evening, with Selim's father. The family were much alarmed, however, when they knew he was an infidel, for the son's life would probably have been forfeited in the event of detection. He could not venture next morning out in the streets by daylight; in fact, he lay in the house all day, sleeping off his fatigue; he was told that the news of his coming had been spread by the reports of the Beni-Hassan, and that all the town was alert to catch him. It was proposed that after dark he should escape, wrapped up in the voluminous dress of a Moorish woman, but he chose rather the torn and ragged brown cloak of a mountaineer. A friendly peasant named Mohammed, whose dwelling was in a village four miles distant, undertook to accompany Mr. Harris, on foot, out of Sheshouan by the chief town gate. They went out, that evening, as quietly as possible, crossed the "soko" or market-place outside the walls, and waited among the ferns and rocks till Selim came to them. A long and toilsome walk over rough ground, and through sharp thorny bushes, which lacerated his naked legs and feet, brought Mr. Harris and his companions to the cottage of Mohammed, where he was kindly taken care of. His mules were sent after him next morning; but the villagers, as well as the Sheshouan townsfolk, were angrily looking out for the Christian intruder, and he could not leave the cottage till night, after the moon went down. Mohammed, "a stalwart, handsome mountaineer," refusing all payment for his services, walked on for eight hours with the English stranger whom he had rescued from great peril and had most hospitably entertained. It was very difficult to persuade him even to accept the price of the food eaten by his visitors, as he left Mr. Harris and Selim at the ruined "fondak," or caravanserai, on the road to Zenat.



SNOW-SHED AT ROSS PEAK, NEAR THE GLACIER HOUSE, BRITISH COLUMBIA.

POTTERS AT WORK.

ELIZABETHAN FIREPLACE.

ELTON WARE VASES.

ST. STEPHEN.

THE GREAT HALL.

CLEVEDON COURT, SOMERSETSHIRE.

Although it is within a stone's-throw of the great high road to Bristol, Clevedon Court is essentially as much out of the world and self-contained as if it lay miles from the busy haunts of men, with which, indeed, it has little or nothing in common.

Perhaps the spirit of the great novelist who loved Clevedon, and reproduced it as Castlewood, in the pages of his noblest romance, guards it and shields it from the rush and hurry of the world of to-day; perhaps the ghosts of Beatrix and Henry Esmond yet wander on the upper garden terrace or meet below the trees that stand on the seaward side of the beautiful house; or perhaps, once more, the stern presence of Rachel Lady Castlewood is still to be felt in the wide oak hall, where she watched Beatrix descending the stairs in her red shoes, holding the candle up over her head to throw the light down on her stately head and beautiful shoulders, as she came to greet those who had just entered in the small inner passage that now leads straight into the great hall, where, whatever the weather is outside, coolness seems to linger strangely, as if even the changes in the temperature could not affect a place which had remained much as it was left by the builder's hands some time during the fourteenth century until the great fire of a few years ago, which destroyed almost the complete half of the house, disclosing at the same time some curious fourteenth-century arches in the second hall, and another window in the small chapel, that is, perhaps, one of the most interesting spots in a most interesting and beautiful house.

But, whatever the cause of the strange quiet that seems to keep the house separate and distinct from all other houses that we have even seen, the effect remains the same; and as we stay for a while looking up at the house, on the old half of which an enormous pomegranate climbs, laden with fruit, which ripens, year by year, in the soft and marvellous Clevedon air, we cannot help being struck by the peace that seems to enwrap it, although round the square chimneys the jackdaws are croaking dismally, and, far away, we can hear the sheep calling to each other; while every now and then a heavily-laden waggon passes on the road below, the driver shouting

to his horses or whistling merrily to himself as he goes on his way to the big, noisy Bristol city. The old part of the house is on the right hand as we stand on the drive and gaze up at the lovely place, on the left front of which the architect has proudly carved the words "An honour to Somerset." But so cunningly has The Court been rebuilt, and so quickly is Nature reclothing it with luxuriantly-growing creepers, that it requires a practised eye indeed to tell where the old leaves off and the new begins to form the house—a task rendered less difficult, however, when we pass to the high terraces which lead up from the level ground to the beautiful woods behind the house, whence we can see quite easily where the fire did its deadly work, and as easily discriminate between the new and the old.

And perhaps the best place to see the house from is one of these same terraces, for from them we look down to and over the house, and begin to recognise some likeness between it and the Queen Anne sketch of it that hangs in the inner hall. But the lines of fish-ponds shown therein are missing, and the high-road now cuts straight through what was then a wide green stretch of meadow-land, belonging to and attached to The Court; but which has, we believe, passed entirely into other hands than those of the family who now hold The Court, and have held it since it passed from the possession of John Digby, Earl of Bristol, into that of Sir Abraham Elton, the first Baronet and founder of the family. Sir Abraham appears to have been a prominent figure in Bristol in the early part of the eighteenth century, when he bought this and two other properties in different parts of England about the same time—one of which, White Staunton, still remains in the family, and is superior to Clevedon inasmuch as it possesses a "curse" all its own, and a ghost; neither of which hall-marks of antiquity is vouchsafed to The Court—if we except the ghosts that we cannot help raising for ourselves. For whoever comes to Clevedon must raise ghosts for himself from "Esmond," and from the "Memoirs of Arthur Hallam," whose monument hangs on the walls of Clevedon old church, and who, in company with many another great and well-known man, must have often walked in the Clevedon gardens or rested in the silence of the library, which unfortunately perished in the fire which completely destroyed the marvellous Elizabethan fireplace shown in one of our illustrations, as well as most of the valuable library, collected carefully for years by the Elton family, and more especially by Sir Arthur Hallam Elton, who had the misfortune to live to see these books burn before his eyes, and half the house, of which he had taken such fond and reverent care, reduced to ashes. The fireplace has been restored almost line for line, as, indeed, the whole house has been restored in the same loving way; but it cannot be the same, naturally, and suggests nothing beyond the faithfulness of the architect and a sorrowful feeling that so much was destroyed that was really as old as it looks. And we do not lose this feeling when we enter the best bed-room, with its old oak bedstead, and hear of all the glories that once were its own—glories now concentrated in a tiny chapel, just off the bed-room, exactly as are modern dressing-rooms arranged now, but complete and beautiful with its miniature altar, its piscina, and its stained-glass window—a recent addition, but framed in the old window-frame discovered by the fire, and which was unknown of before by the family, who used this chapel every now and then, on more specially solemn occasions.

The drawings familiar now to readers of *Scribner's* are in the library at Clevedon, and are becoming faint with age. But the nursery shown in one of the Sketches perished in the fire, though the school-room remains, and looks just the same as it was when Thackeray sat there and drew the present Lady Elton as a small curly-headed child of about two, who, now grown up and with children of her own, just remembers Thackeray's visits—but only just—the while she joins in our regrets that the date of the year is never put to either letters or sketches, Thackeray having generally, if not always, contented himself with the month and day of the month; sometimes putting simply "Monday," "Tuesday," or whatever the day of the week might be, utterly regardless of posterity in a most trying manner.

But proud as the present owner is of his lovely home and the numerous interests that are inseparable therefrom, his heart is not in The Court itself, but just outside it, where in a small shell-like erection, or rather in a series of shell-like erections, is produced under his own eye, and his own directions, that curious pottery, well known to connoisseurs as Elton ware, which has an unlikeness to any other pottery, and an originality of design that attracts attention to itself no matter where it is placed, or among what other ware it may for the moment find itself.

"The offspring of an ill-regulated mind," says Sir Edmund himself, as he girds himself with the orthodox potter's apron, and gets himself into a regulation blouse; but, ill-regulated or not, it is a mind that is never idle, and that has produced under its auspices some of the most exquisite combinations of colouring that we, personally, have ever seen. While we are assured that this combination of colour is due in a great measure to chance, and that no one can tell how a piece is coming out of the kiln, or whether it will issue therefrom as a complete wreck or not, we look on with immense interest at the wheel, at which Sir Edmund seats himself in the orthodox potter's fashion, and while we watch his workmanlike way of setting to work, see just a little more than chance in the manner in which the vase of the future is "thrown," and, finally, left to dry. One ready to be embellished is placed on the circular table shown in the Illustration, and promptly receives certain most mysterious indentations and sketchings with a sharp-pointed pencil that develop afterwards into flowers and birds, serpents, or conventional designs, just as it has pleased the artist at the moment to draw out his ideas on the soft clay, which, after being coloured by being washed in coloured clay about as thick as an egg-shell, receives its first "baptism of fire" in the kiln, and is then plunged into the glaze, which gives it a mysterious white and ghost-like appearance. After this it returns once more to the kiln, whence the "saggers" which contain this and many another specimen of the famous ware are once more withdrawn and become either causes of "blessing" or "banning," according to the manner in which they have taken the glaze and acquired colour in the furnace. Colour—exquisite clear scarlet or a peculiar greeny blue, like the breast of a peacock—is the great feature in the Elton ware, and is, therefore, the one thing about which the potter has to be quite sure. But he also aspires after wondrous designs in tiles, and has produced, among other curious devices, the one of St. Stephen which is illustrated here, and which is, we believe, in the church at White Staunton.

The whole history of the Elton ware manufacture would require columns to describe. To tell of the failures, the heart-breaking rush of poisonous sulphur fumes which spoiled hundreds of pounds'-worth of ware over and over again, would take volumes; but to the student the story would be valuable if as a mere study of patience conquering almost insuperable difficulties. And if Sir Edmund still mourns over the lovely Elton red which for the nonce had escaped him, he yet can point complacently to rows of beautiful vases and jugs in marvellous colourings, which, unique in themselves—no two specimens being precisely alike—would rejoice the heart of any connoisseur simply to contemplate and handle—let alone to possess.

There are few more interesting places in England than Clevedon Court, and its Sunflower pottery, cunningly concealed among the outbuildings in such a way that no mere visitor to The Court would notice the immediate presence of a thriving manufactory; and as we turn away from the house and climb up the lovely sheltering hills, below which The Court nestles in the clear autumnal sunshine, and come out on the top of the hills, from which we can see the deep, brown waters which Clevedon itself fondly calls the sea, we look back regretfully at this typical English home, and wish devoutly that more of our landowners would go with the times and turn their attention and their talents to some such delightful task as that which connects the Elton name with one of the most beautiful and satisfactory manufactures of the present day.

J. E. PANTON.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

ABAFFETH (Hay mouth).—We are much obliged for the information, use of which we make below. We shall be much surprised if your own expectation of the winner is not realised.

A. L. S. (Redhill).—We are pleased to hear from so old a correspondent as yourself, and the games shall have careful attention.

J. W. FYFFE.—Your diagrams still lack clearness, but we will give them proper examination.

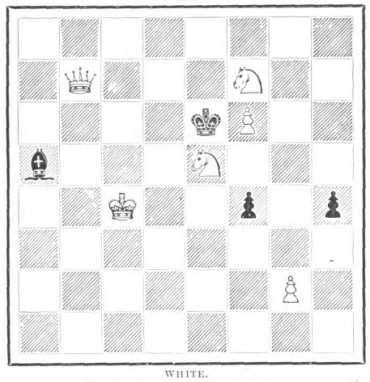
L. F. THURGOOD.—Whatever merits your problem may possess it is quite impossible for us to publish one whose solution consists of a series of checks.

D. MCCOY (Galway). M. JACKSON, Mrs BAIRD.—Problems received with thanks, and shall be duly reported upon.

*** We much regret Mr. Healey's problem (No. 2329) is unsound, 1. Kt to B 7th proving a second solution.

CORRECT SOLUTIONS OF PROBLEM No. 2324 received from G B Hewett (Middle Cobbal), of No. 2326 from H S B (Shooter's-hill), W W Hardman, and W H Hayton; of 2327 from W W Hardman, E G Boys, E W Rickett, G W G Brodie, Lomeny, Charles Hetherington, E J Gibbs, and Percy R Gibbs (Plaistow); of No. 2328 from A W Hamilton Gell (Exeter), W W Hardman, E G Boys, P C (The Barnes), J G Hankin, Carshalton, W Wood (Plymouth), Stowmarit, Columbus, Maxwell Jackson (B.A.), E W Rickett, Cogreshall Chess Club, and J L Cooke (Cardiff).

CORRECT SOLUTIONS OF PROBLEM No. 2329 received from A W Hamilton Gell, Bernard Reynolds, Shaftforth, *I. Desanges*, Dane John, D McCoy (Galway), W E Rollem, Jupiter Junior, Dawn, J Dixon, E Phillips, E Casella (Paris), G J Powell, Howard A, Cogreshall Chess Club, W H Reed (Liverpool), Maxwell Jackson (B.A.), W W Hardman, E L Kearney, R H Brooks, L. Greco (Munich), J D Tucker (Leeds), M W D (Woburn), R Worters (Canterbury), W H Hayton, John Short, E Louden, J Ross (Whitley), C Colman (Chippenham), Dr Waltz, W E Cartwright, C E P, James Sage, C S, Quadrante, H S B, Dr Law, J Blaikie, John S Moorat (Bonhomie), Stowmatt, Columbus, G V (Brentwood), Thomas Chown, T Roberts, Arthur Evanuel, J Gaskin, Lieut-Colonel Lorraine, John G Grant, Rev Winfield Cooper, Ruby Rook, Alfquist, R F N Banks, Dr F St, and G Veale.



SOLUTION OF PROBLEM No. 2327.

WHITE.	BLACK.
1. K to Q 4th	Any move
2. Mates accordingly.	

PROBLEM No. 2331.

By SIGNOR ASPA.

BLACK.

WHITE.

White to play, and mate in three moves.

The Grand Winter Handicap at Simpson's Divan commenced on Saturday, Dec. 1. Five prizes are being competed for, and nearly twenty players have entered, among the representatives of the first class being Bird, Lee, Mason, and Pollock. The time-limit will be twenty moves an hour. Mr. H. E. Bird is hon. sec.; and Mr. J. Henley, of Simpson's, hon. treasurer.

Two tournaments are also in progress at the British Chess Club. In one the competitors start on even terms; the other is a handicap. Both are strictly limited to members, and none of the masters have been invited to compete. Mr. Loman still leads the first-class players, and up to the date of our last report had lost a single game. The chief scorers of the other sections are making a very level fight of it amongst themselves, and growing interest is taken in every successive round. Last week the committee elected nine new members, the most notable of whom was Mr. Morian, a strong representative of France.

The match between Messrs. Steinitz and Tschigorin is definitely announced to be played at Havannah early next January. The local chess club provides the stakes, which consist of 20 dols. for each game to the winner and 10 dols. to the loser. The match is to be decided by the best score in twenty games.

The Plymouth Chess Club has arranged with Mr. Blackburne for an exhibition of blindfold play to take place at the Royal Hotel on Wednesday, Dec. 12, when Mr. Blackburne will be opposed by eight members of the club.

Mr. F. J. Lee visited the Bournemouth Chess Club on Nov. 22, and played twelve simultaneous games against its strongest members, with the following result:—Won seven, lost one (to Mr. Bodkin, hon. secretary), and three were unfinished.

On Nov. 17 the Amethyst Chess Club defeated the Zokertort Club by 8½ games to 4½, and on Nov. 28 were successful against the Shoreditch Y.M.C.A. Chess Club by 7 games to 1.

A match has taken place at the British Chess Club between Messrs. Bird and Blackburne; it was won by Mr. Blackburne, who scored 4 to 1. Another match between the same combatants will shortly be played at Simpson's.

SUBSCRIPTION TO THE ILLUSTRATED LONDON NEWS.

AT HOME.

Twelve months (including Christmas Number),	£1 9s. 3d.
Six months, 14s.	Christmas Half-Year, 15s. 3d.
Three months, 7s.	Christmas Quarter, 8s. 3d.

Copies will be supplied direct from the Office to any part of the United Kingdom and the Channel Islands, for any period, at the rate of 6½d. for each Number, paid in advance.

ABROAD.

The yearly subscription abroad, including the Christmas Number, is £1 16s. 4d. (on thin paper, £1 12s.), with the following exceptions:—

To Abyssinia, Aden, Bechuanaland, Borneo, Ceylon, India, Java, Labuan, Penang, Philippine Islands, Sarawak, Siam, Singapore, and Zanzibar, £2 1s. (on thin paper, 31s.)

To Diego Garcia, £2 5s. (on thin paper, £1 16s. 4d.)

Subscribers are specially advised to order the thick paper edition, the appearance of the engravings on the thin paper copies being greatly injured by the print at the back showing through.

Newspapers for foreign parts must be *posted* within eight days of the date of publication, irrespective of the *departure* of the mails.

Subscriptions must be paid in advance, direct to the Publishing Office, 198, Strand, in English money; by cheque, crossed "The Union Bank of London"; or by Post-Office Order, payable at the East Strand Post Office, to INGRAM BROTHERS, of 198, Strand, London.

SCIENCE JOTTINGS.

OTHER SENSES THAN OURS.

My Dalmatian dog, "Spotty," has been considerably agitated in mind this morning over the appearance of a strange cat in my back garden. Albeit he is not on particularly friendly terms with the two feline members of the household, "Spotty" yet contrives to bear and forbear where the cats proper to his home are concerned. The mother-cat is somewhat given to a spitefulness of disposition towards her Dalmatian co-tenant, and her black son, the "Professor," treats the dog with high-handed contempt. But, as things are, life rubs on easily enough where the canine and feline units are concerned. A stray cat, however, appearing within his own and special domain, causes "Spotty" a world of anxiety. He longs to be up and doing in the way of battle, and his voice rings loud and deep when, secure on the broken glass-bottles of the garden-wall, the strange cat contemplates his attitude and hears his loud vociferations with equanimity, or with something which goes as nearly as is possible to expressing a feline smile of contempt. "Spotty's" anxieties, however, are not limited to this barking at the cats which perpetually leap to and fro "over the garden wall." When not a cat is to be beheld, and when there is not a vestige of a feline within a mile of him, I can tell of his latent animosity to the cat-tribe being aroused by his sniffing the ground, by his low growls and sharp yelps, and by the bristling of his back hair as his vivid imagination depicts before his mind's eye the possibility of the fray.

This sniffing and smelling of dogs which hunt their prey like my Dalmatian by aid of their noses, opens up a curious study in animal senses, and one which leads us towards many unsolved problems of life and brain. In the first place, what is it that my dog perceives? What is it that arouses his brain and muscle, through the medium of his sense of smell? A cat passes with a light tread over the ground. Allow, if we will, that there is a characteristic odour pertaining to the cat-body—and to all other carnivorous animals, indeed—and the problem does not become simplified even after such an admission. What is there in the odour which remains to mark to my dog's intelligence and perception each light foot-fall of the cat in the back garden? What is the nature of the scent of the hunter which the wind carries to the wary deer, or to the lion or rhinoceros itself? What is the exact cause of the power which enables the vulture to scent the prey from afar off, or which tells the eagles where the carcase lies for attack? Let us try to argue this matter out as best we may. The senses of an animal are its "gate-ways of knowledge." The eye sees not, neither does the ear hear. They are merely instruments—"receiving offices," to put it plainly—which transmit to the brain the impressions of the outer world, which modify, parcel out, and assort these impressions, and adapt them for being understood and appreciated by the seeing-centres and hearing-centres of the organ of mind. So much is matter of ordinary physiological teaching. And what of the impressions which fall upon eye and ear, nose and tongue, and skin? Everything in the way of sense, as Goethe put it long ago, resolves itself into a matter of *touch*. Every other sense is a modification of touch; or, as it was originally put, "touch is the mother of all the senses." When we touch any object, that, of course, is ordinary sensation, pure and simple. It is the contact of the nerve-ends with the outer world, with which our nervous system brings us into relation. When we taste there is contact—that is to say, "touch"—of the substance to be tasted with the nerves of tongue and palate. When we smell there must be contact of nerve-ends again, with the odorous particles. When we hear and see, there is the impinging of waves of sound and of waves of light upon ear-drum and retina (the nerve-network of the eye), respectively. Ethereal and delicate must ear-touch and eye-touch be, yet it is a contact of something material from the outside world with something material in eye and ear nevertheless. All our sensations and impressions, then, are reduced to the level of touch. It is only a question of the degree of fineness of the touch, and not one of difference of the kind of touch, which awaits the comprehension of science whenever senses and their methods are discussed at all.

But certain clear facts lead us nigh to the comprehension of "Spotty," and his perception of cat-presence, as well as to the understanding of the powers of the bloodhound in tracking the criminal, or of those of the St. Bernard in finding the frozen man beneath the snow.

It is provable, first of all, that any form of matter which possesses a smell at all, exhibits that property in virtue of its power of giving off fine particles of its substance. It is similarly clear that the odour of any body will be the more powerful according as its particles are freely given off. Take the case of musk, for instance. We weigh a grain of musk in a chemical balance which turns the scale with the merest fraction of a grain. Thuswise, we secure exact weight, and we place our grain weight of musk in a room. For years our grain of musk will appreciably scent that apartment. During all this period it must, therefore, have been giving off its particles to the air; yet, mark the astounding result—if we weigh it years afterwards, we shall find it show exactly the weight it originally possessed. Plainly, then, the particles given off from the musk in such numbers must have been of such microscopic size as to leave practically unaffected the bulk of the substance. Our minds fail to grasp any idea of the size of such particles. Sir William Thomson's estimate of the size of atoms may find a parallel in the particles of our musk; yet, small as these particles are, you observe they excite the sense of smell, and become appreciated by our brain as those of a well-known perfume. It may interest us to know that Sir William Thomson makes the ultimate atoms of matter each measure, in diameter, the one-fifty-millionth part of an inch. As far as sight is concerned, I believe Helmholtz gives a particle which is the eighty-thousandth part of an inch in diameter, as the smallest which can be distinctly made out by the eyes in association with other particles. Such estimates of what matter is, microscopically regarded, may serve to teach us something of the acute nature of the sense of smell in man, relatively to our particles of musk.

But that the dog's sense of smell is infinitely more delicate than our own it is evident. Your collie tracks out your footsteps by the odour they have given off amidst a dense crowd of people. "Spotty" recognises the tread of the cat, by reason of the fine particles which the feline impression has left behind it, and which appeal to his nerves of smell while all unrecognised by us. The bloodhound, in the same way, with keen scent, traces out the resemblance in smell between the footsteps of the criminal and those of the garment which belonged to the evildoer. The dog's brain shows large lobes of smell, and big nerves emanating therefrom. His nervous apparatus in this respect makes for him a world of odours all unappreciated by his master. As there are many other worlds than our own whirling round in the blue ether, so in truth, in lower life, there are many other, more powerful and acute senses than ours.

167, REGENT-STREET, LONDON, W.

Established 1860.
Two Doors from Burlington-street.

MUSIC.

The third Monday evening Popular Concert of the new series brought forward Brahms's new "Gipsy-Songs." These characteristic pieces are among the composer's latest productions, and, like his "Liebes-lieder Waltzer"—which have long been popular—they are composed for four voices and pianoforte. The quaint melodies (we believe these are original, not national)—with their characteristic rhythm and appropriate harmonic treatment—are very charming, and the pieces will doubtless be as much in request as were their predecessors—above referred to. The Gipsy-Songs were excellently rendered on the occasion now alluded to by Mrs. Henschel, Miss L. Little, Mr. Shakespeare, and Mr. Henschel, as vocalists, and Miss Fanny Davies as pianist. At the same concert, Miss M. Wild made a very favourable impression by her execution of a "Scherzo" by Chopin. Madame Norman-Néruda (Lady Hallé) continues to be the leading violinist at the evening concerts; Miss Agnes Zimmermann having been announced as solo pianist at that of Dec. 3. The Gipsy-Songs of Herr Brahms were repeated at the afternoon performance of Dec. 1.

The second of the new series of Mr. Henschel's London Symphony Concerts at St. James's Hall, brought forward—for the first time in *England*—the music to a "Ritterballet" composed by Beethoven, in 1790, an early production which is chiefly interesting on that account; but little, if any, sign of the master's subsequent greatness being apparent. Miss Fanny Davies's admirable performance of Mozart's Pianoforte Concerto in D minor was a feature of the concert, other items of which call for no specific mention. The third concert, on Dec. 4, was of strong interest, but comprised no novelty requiring comment.

The second concert of the season of the Royal Choral Society (heretofore called the Royal Albert Hall Choral Society) was appropriated to a performance of Mr. Cowen's oratorio, "Ruth." The work was originally produced at the Worcester Festival of last year, with a success which was repeated on its performance in London and elsewhere, including Melbourne in September last, during its composer's engagement there as director of the musical proceedings connected with the Exhibition. In its recent performance at the Royal Albert Hall the vocal soloists were Misses Anna Williams and A. Larkcom, Madame Belle Cole, Mr. B. McGuckin, and Mr. W. Mills, who were more or less efficient. On the whole, the choral portions of the oratorio were generally the most effectively rendered; but signs of the want of further rehearsal, both of chorus and orchestra, were occasionally apparent.

We have already given details of the festival performance of the "Messiah" in Westminster Abbey, on Nov. 29, in celebration of the 150th anniversary of the Royal Society of Musicians. But little remains to be added to the particulars previously furnished. As already said, the solo vocalists were Mesdames Albani and Patey; Messrs. Harper, Kearton, Hilton, and Brereton. There was a full orchestra and chorus, Dr. J. F. Bridge (organist of the Abbey) conducted, and Mr. Jekyll presided at the organ.

The celebrated Heckmann quartet party reappeared, as already briefly stated, at Prince's Hall on Nov. 29, too late for comment until now. We have several times recognised, in previous notices, the admirable playing of the four artists concerned, and this was again evidenced on the occasion now referred to in string quartets by Schumann and Beethoven; and in Brahms's pianoforte quintet in F minor, with Madame Haas as pianist; the lady having also given an artistic performance of a prelude and fugue by Bach.

On the same date as that of the Heckmann quartet concert, Madame Essipoff gave an afternoon recital at St. James's Hall. The eminent Russian pianist played a varied selection, including Schumann's solo sonata in G minor, with admirable execution. In some pieces for two pianos, Madame Essipoff was associated with Madame Fannie Bloomfield, who made a good impression.

The Crystal Palace Concert of Dec. 1 brought forward, for the first time here, a "Cortége Fantastique," an orchestral work by Herr Moszkowski. The composer was first made known in this country by several sets of pieces for two performers on the pianoforte. These pieces are all of exquisite beauty, full of distinctive character, admirable alike in subject and treatment, and altogether forming a series of exquisitely finished miniatures. Compositions (for the orchestra) of a more ambitious, but a less successful, kind were produced (conducted by himself) at our Philharmonic concerts. The work brought forward at the Crystal Palace is bright and characteristic, and will probably be soon heard again. The concert referred to included Madame Essipoff's fine rendering of Schumann's pianoforte concerto in A, and smaller unaccompanied pieces; and vocal solos well rendered by Mdlle. Badia.

A fresh addition to musical activity in London was to be inaugurated at St. James's Hall on Thursday evening, Dec. 6, when a new series of Novello's Oratorio Concerts was to begin with a performance of Dr. C. Hubert Parry's oratorio "Judith."

The reproduction of Gounod's opera "Roméo et Juliette" took place at the Paris Grand Opéra on Nov. 28, with Madame Adelina Patti's first performance of the character of Juliette, with the French text. The part is one in which the great prima-donna has often appeared, with signal success, in the version of the work given at our Royal Italian Opera house; the first occasion having been in 1867. Her recent performance in Paris is said by competent judges who were present to have manifested all its former charms of voice and style, and to have realised a fresh success for the incomparable artist. She was admirably supported by M. Jean de Reszké as Romeo, and M. E. De Reszké as Friar Laurence; the part of Capulet having been well sustained by M. Delmas. The composer conducted the performance. The opera, as modified by M. Gounod for its reproduction in Paris, will probably find repetition in this shape in London.

The second and last of the two Patti concerts at the Royal Albert Hall will take place on Dec. 11, this being the final appearance here of the great prima-donna previous to her departure to fulfil her foreign engagements.

The death was recently announced of Signor Cesare Lisci, the energetic and courteous manager of the London branch of the eminent firm of Ricordi, of Milan. The deceased gentleman was highly esteemed by all who were acquainted with him. The funeral took place at Kensal-green Cemetery, on Nov. 29.

Another recent death of one who was associated with the musical world was that of Mr. Desmond L. Ryan, who was for many years musical critic of the *Standard* newspaper. He not only possessed sound musical knowledge, both theoretical and practical, but manifested on several occasions much literary taste and capacity, apart from newspaper work (especially in several libbrettos for cantatas) and considerable talent for musical composition. He had not completed his thirty-eighth year.

Mr. William Carter gave a grand Scotch Festival at the Albert Hall on St. Andrew's Day; Mr. Isidore De Lara's second Vocal Recital took place on Nov. 27 at Steinway Hall; Mr. S. De Sola's morning concert on Nov. 29 at Prince's Hall; the Royal Amateur Orchestral Society's first evening concert this season at St. James's Hall on Dec. 1; Miss Marian Bateman and Miss Esther Mowbray's recital of original compositions for two performers, on Dec. 7; and Herr Von Czeke, professor of the violin, gives a vocal and instrumental concert, on Dec. 8, at Addison Hall.

THE RECENT NAVAL MANŒUVRES.

The Special Commission of naval experts appointed to report upon the recent manœuvres, has sent in its final report to Lord George Hamilton. The evidence laid before the Commission was of a voluminous nature, and in many cases contained important suggestions of a confidential character for the conduct of future blockades. The Commanders of the opposing squadrons, Admiral Tryon and Admiral Baird, and the second in command, as well as the Captains and umpires of both squadrons engaged in the manœuvres, gave evidence at considerable length, and their testimony having been carefully considered by the highest naval experts has been reported upon by the Commission. We understand that to Sir George Tryon has been awarded the victory, he having by the most efficient manœuvring been able to break Admiral Baird's blockade, to attack several English ports, and to capture many merchant-vessels.

At the quarterly court of the governors of the Brompton Hospital for Consumption held at the hospital on Nov. 29, the report of the committee of management, read by the secretary (Mr. H. Dobbin), stated that since the last court the necessary repairs, cleaning, and painting, had been effected throughout the extension building, and the wards having been reopened, the whole of the 321 beds in the two buildings are now again in full occupation. The cost of these repairs had been considerable, and funds would be gladly received, not only to defray these, but to meet the largely increased expenses of the coming winter. The number of in-patients admitted since Aug. 2 was 582; discharged, many greatly benefited, 402; died, 99; new out-patient cases, 4349.

A meeting of the executive council of the British Section of the Paris Exhibition, 1889, was held at the Mansion House, on Nov. 30. Mr. H. Trueman Wood, one of the secretaries, reported that the whole of the space placed at the disposal of the British Section has been allotted among exhibitors. Various colonies desired to participate, but appeals to the French authorities failed in obtaining any extension of the original amount of space granted. The committee, however, has been able to devote a considerable space to Victoria and New Zealand, and to the Cape of Good Hope. There is every likelihood of an adequate representation of British art, and promises of support have been received from many leading artists. The Lord Mayor has become president of the general committee, Sir P. De Keyser, his predecessor, continuing to act as chairman and treasurer of the executive council. Sir Frederick Leighton, adverting to the fine art section, said, in view of the fact that in Paris in 1878 England had been represented very worthily in matters of art, it would be damaging if British art were not well represented at the forthcoming exhibition. The council voted, including previous grants and donations, £2000 towards the expenses of the art section.

MAPPIN & WEBB'S ARTISTIC AND USEFUL CHRISTMAS PRESENTS.

WILLS AND BEQUESTS.

The will (dated July 4, 1887), with three codicils (dated July 11, 1888; Aug. 4, 1888; and Sept. 29, 1888), of Mr. J. M. Levy, J.P., late of No. 51, Grosvenor-street, Hyde Park, who died on Oct. 12, at Florence Cottage, Ramsgate, has been proved. Mr. Edward Lawson and Mr. Albert Levy, the sons, and Alderman George Faudel Phillips, the son-in-law, are the executors. The value of the personal estate, exclusive of real property, amounts to upwards of £325,000. The testator bequeaths £1000 to each of his two sisters, and other legacies to many old and personal friends, and also to his servants. In addition to other gifts, the testator bequeaths to his daughter Matilda £1000, free of duty, to be applied or distributed by her for such purposes of charity as she may think most advisable. He devises to his said daughter, Matilda, absolutely, his freehold house and the surrounding land at Ramsgate, with the furniture, china, and pictures contained in his residence there. The testator directs that with regard to his London residence, No. 51, Grosvenor-street, and the furniture, plate, china, books, pictures, &c., his trustees shall permit his said daughter, at her option, to have the personal use thereof for such period as she should desire. The residue of his real and personal estate he leaves, upon trust, for his seven surviving children for life, and then to their children as they may appoint.

The will (dated Dec. 15, 1883) of Mrs. Caroline Louisa Derby, widow, late of Regency-square, Brighton, who died on Oct. 12, was proved on Nov. 24 by Sir Arnold William White and Richard Alexander Bevan, the executors, the value of the personal estate being sworn to exceed £220,000. The testatrix gives £200 to her executors, and all her household furniture, &c., between her two daughters. Subject thereto, she leaves all her property, upon trust, to pay half the income thereof to each of her daughters, Mrs. Katharine Louisa Drummond and Mrs. Ellen Maria Pechell, for life, with remainder to their husbands, and on their death, as to the capital as well as the income, for their respective children.

The Scotch Confirmation, under the seal of the Commissariot of Lanarkshire, of the deed of settlement (dated Dec. 31, 1883) of Mr. Peter Clouston, late of No. 1, Park-terrace, Glasgow, who died on Aug. 30 last, granted to David Barr, James Bullock, Matthew Bullock, Christina and Elizabeth Clouston, the daughters, Frederic Fairlie Elderton, and John Ebenezer Watson, the executors nominate, was resealed in London on Nov. 13, the value of the personal estate in England and Scotland amounting to upwards of £178,000.

The will (dated Jan. 26, 1886) of Thomas Longueville Longueville, late of Penyllan Hall, Oswestry, who died on Oct. 27 last, was proved on Nov. 24 by Thomas Longueville, the son, Anna Maria Longueville, the daughter, and Charles William Roberts, the nephew, the executors, the value of the personal estate amounting to upwards of £133,000. The testator bequeaths £35,000, and his household furniture, pictures, carriages and horses to his daughter, Anna Maria; and gives and devises all his real estate to his son, Thomas. The residue of his personal estate he leaves to his said two children, in equal shares.

The will (dated May 10, 1878), with two codicils (dated Sept. 4, 1882, and Jan. 26, 1887), of Mrs. Elmina Crabbe, late of Glen Eyre, Basset, in the county of Southampton, who died at Bellagio, Italy, on Oct. 12, was proved on Nov. 24 by Eyre Macdonald Stewart Crabbe (the son) and Arthur Niblett (the nephew), the executors, the value of the personal estate being sworn to exceed £66,000. The testatrix gives £200 to the Royal South Hants Infirmary; all her books and the plate with the crest of a boar's head to her son Henry Stewart Spooner; and legacies to servants. The residue of her property she leaves to her son, Eyre Macdonald Stewart Crabbe.

The will (dated April 26, 1877), with two codicils (dated Dec. 2, 1880, and Dec. 18, 1883), of Mr. Henry Badcock, late of Wheatleigh Lodge, Taunton, Somerset, who died on Oct. 16, was proved on Nov. 15 by Henry Jefferies Badcock and Isaac Badcock, the sons and executors, the value of the personal estate being sworn to exceed £58,000. The testator bequeaths £1000, his household furniture and effects, carriages and horses, and the use, for life, of his house, to his wife, Mrs. Georgiana Badcock; £500 to his daughter, Georgiana; £100 each to the Church Missionary Society and the Church Pastoral Aid Society; and £100 to his sister, Elizabeth Badcock. He gives and devises certain land and premises in Devon to his son Henry Jefferies Badcock. The residue of his real and personal estate he leaves, upon trust, to pay annuities of £200 each to his sons, Isaac, Francis William, and Alexander Robert, and to his daughter, Georgiana, during the life of his wife, and the remainder of the income to her; on her death, £10,000 is given to each of his sons, Isaac, Francis, and Alexander, and his daughter, Georgiana; and the ultimate residue between his said three sons.

The will (dated July 20, 1888), with a codicil (of the same date), of Dame Frances Ann Rowe, late of No. 10, Queen Anne-street, Cavendish-square, who died on Oct. 28, was proved on Nov. 10 by Colonel George Clayton Swiney, the nephew, Holroyd Chaplin, and Miss Sarah Ann Hayllar, the executors, the value of the personal estate exceeding £46,000. The testatrix bequeaths £2500 each to Ellen Kennard, Richard Valpy, and Mary Valpy Valpy; £3750 each to Mrs. Mary Jane Cater and Mrs. Hannah Frances Harvey; £2000 each to Percy Westmacott and Emily Brown; £2500, upon trust, for John Montagne Valpy; £4500, upon trust, each for Henry Stephen Swiney and George Clayton Swiney; and other legacies. The residue of her real and personal estate she leaves to Mrs. Mary Jane Cater and Mrs. Hannah Frances Harvey, in equal shares, as tenants in common.

The will (dated Feb. 16, 1888) of William Crundall, late of "Lords," near Faversham, Kent, who died on July 5, was proved on Nov. 23 by William Henry Crundall and Albert Edward Bechely Crundall, the sons and executors, the value of the personal estate exceeding £31,000. Subject to a legacy to his wife, Mrs. Catherine Susan Crundall, the testator leaves all his property, upon trust, to pay £3000 per annum to his wife for life, and the remainder of the income thereof to his two sons. On the death of his wife, he leaves £45,000, upon trust, for his three daughters, Mrs. Elizabeth Mary Day, Mrs. Emily Jane Punnett, and Mrs. Catherine Helen Conchi; £12,000 to his son Albert Edward Bechely; his estate called "Lords" to his son William Henry; and residue of his property between his said two sons.

The will (dated April 13, 1881) of Robert Dymond, J.P., late of No. 1, St. Leonard-road, Exeter, and Blackslade, Widcombe-in-the-Moor, Devon, who died on Aug. 31, was proved at the District Registry, Exeter, on Oct. 2, by Mrs. Josephine Dymond, the widow, Arthur Kingston Dymond, the son, and George Edward Fox, the executors, the value of the personal estate exceeding £27,000. Subject to the gift of £300 and all his household furniture and effects to his wife, and £100 to each of his grandchildren, the testator leaves all his property, upon trust, to pay two thirds of the income thereof to his wife, during her widowhood, and one third between his three children—Arthur Kingston, Josephine Elizabeth, and Mrs. Caroline Anne Fosswill; but in the event of his wife again marrying she is only to receive one third, and his children take the remaining two thirds of the income; and subject thereto to his children in equal shares.

On St. Andrew's Day, the 224th anniversary festival of the Scottish Corporation was held in the Hôtel Métropole, under the chairmanship of Mr. Ritchie, M.P., President of the Local Government Board. In response to the Chairman's appeal, subscriptions to the amount of £2500 were announced.

Lady Claud J. Hamilton presented new colours to the 2nd Royal Inniskilling Fusiliers on Dec. 1, in place of a pair which have been in the possession of the regiment for over twenty years. The ceremony was performed on Rushmoor Green, where the regiment, in review order, paraded at twelve o'clock. A large assemblage of spectators was present.

"BY a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that

EPPS'S (GRATEFUL, COMFORTING) COCOA

a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

ADVICE TO MOTHERS.—Are you broken in your rest by a sick child, suffering with the pain of cutting teeth? Go at once to a chemist and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor sufferer immediately; it is perfectly harmless; it produces natural, quiet sleep by relieving the child from pain; and the little cherub awakes "as bright as a button." Be sure and ask for Mrs. Winslow's Soothing Syrup, and see that "Curtis and Perkins, New York and London," is on the outside wrapper. No mother should be without it. Sold by all Medicine Dealers, at 1s. 1½d.

THE MATRIMONIAL HERALD and FASHIONABLE MARRIAGE GAZETTE is the original and only recognised medium for High-class Introductions. The largest and most successful Matrimonial Agency in the World. Price 3d.; in envelope, 4½d. Address, EDITOR, 6, Lamb's Conduit-street, London, W.C.

THE LADIES' COLUMN.

There will be only four ladies on the next London School Board. Mrs. Augusta Webster's loss of her seat is to be deplored; she is one of those persons whose presence it is worth while to secure on the Board, for the sake of the distinction which their personality confers on that body, apart from the consideration of how much time they are prepared to devote to the details of the work. The placing of a distinguished Indian statesman and financier like Sir Richard Temple at the bottom of the successful poll, and the rejection of a woman of letters and unusual culture like Mrs. Webster, are acts of electoral foolishness, the tendency of which is to reduce the *personnel* of the Board to a constantly lower level. Such events are only to be excused by the extreme difficulty of regulating the cumulative vote in conjunction with the ballot. For the successful use of the cumulative vote, open voting is necessary.

Of the ladies who are returned, Miss Davenport-Hill, who *heads the poll in the City*, is the only one who has previously been a member. She has the distinction of having been for *many years the most regular* attendant of all the members at the Board and committee meetings. There are very *few days of the year* on which Miss Davenport-Hill is not found at the Board office, except, of course, *during the holidays*. Mrs. Ashton Dilke, a young lady of ability and a good speaker, is the proprietor of the *Weekly Dispatch*, and widow of a brother of Sir Charles Dilke. Mrs. Annie Besant's position is well known from the suit successfully brought against her some years ago by her husband, a Church of England clergyman, to remove her little daughter from her custody on the ground of the mother's lack of religious belief. She is a near relative of an ex-Lord Chancellor, and is an undergraduate of London University, having passed the first examination for the Bachelor of Science degree. Mrs. Besant is avowedly an *extreme* Socialist, and was one of the candidates of that party; but their true strength is not to be measured by her success. The hold which Socialism has amongst the working classes may be ganged by the few votes polled by candidates like Mrs. Hicks and Mr. Bland, who had no personal hold on the electorate, and were Socialist candidates pure and simple. Mrs. Besant (like the Rev. Stewart Headlam) had also the support of many classes of electors, besides the Socialists. Mrs. Maitland, the other new lady member, has not, I believe, before this election, done anything in the public view.

Few ordinary incidents can bring home to one more acutely the instability of human life and the fallaciousness of human hope and effort than when there comes into one's hands the posthumous book of an author one has known. I do not know whether the same impression is produced on those who are not themselves authors. Perhaps not. We who know from experience how much fatiguing and irksome labour of brain and hand—how much steady effort consciously directed towards a future end and inspired by hope for that future—and how much vivid interest and delightful suspense go to the production of a book, probably feel the pathos most keenly. Certainly, to us who write books, it is deeply touching to see a volume brought forth from the press after its author, whom we knew in life, has passed to that place where "there is neither work, nor device, nor knowledge, nor wisdom." A newly-published book is *so live* a thing, however short may be its vital destiny; and to get this in one's hand, a thing of the moment, fresh and new, when the brain that conceived it is already stilled from all earthly interests, is a sermon on mortality. "Dreams and Dream-Stories," a book written by my late friend, as beautiful and brilliant as she was learned, Dr. Anna Kingsford, has just been published. According to a note by the editor, "the publication is made in accordance with the author's last wishes." It is impossible to criticise the book under the circumstances. I can say no more than that its contents are somewhat unequal in execution. Many of the sketches and stories are marked by a wild and weird imagination that is very impressive; others are parables containing both beauty and meaning; while one or two only—such as "The Panic-struck Pack-Horse"—are almost comical from their dreamlike lack of point and purpose. "Occultism," however absurd (or worse) it may seem to those of us who are not "bitten" by it, is unquestionably one of the most fashionable and popular fancies—or, should I say, faiths?—of the moment; and Dr. Kingsford's curious book will interest specially those of her own belief in "theosophy," "esoteric Buddhism," transmigration, dream revelations, and all the rest of the "Hermetic" cabala.

Dr. Klein alarmed us, a year or two ago, by an announcement that he had discovered that scarlet fever originated with milch cows. A certain far from uncommon disease of the udder, and one which the dairyman, however good his intentions, might easily overlook or confound with some simple eruptions, was declared to be the originating source of the scarlet fever contagion. This was very serious news to mothers, whose little ones ought to be chiefly fed upon milk, in various preparations, for at least the first two years of life. It was serious news, too, for that considerable and sensible class of folk who take a drink of milk when many would fly to the dangerous resource of alcohol. The feeling of exhaustion, of "wanting something but you don't quite know what," is better met by a glass of milk than by a glass of wine, for persons with a pretty good digestion—always supposing that there is not scarlet fever in the tumbler. Dr. Klein's "discovery" that a simple and common cow-complaint originates that human epidemic is, happily, proved to be an error. His experiments and arguments appeared to be conclusive enough; but the repetition of his inoculations by others has not produced the same result, and a direct source of infection has been discovered for that case in which Dr. Klein could find no other source than the cows themselves. So milk-drinkers may again be at ease about the natural properties of their beverage, while dairymen and farmers have received a fresh lesson about the extreme importance of not allowing any person who comes from a house where there is scarlet fever to go near the milk.

Lord Compton deserved to lose his election in Holborn for the *gaucherie* of saying at a special meeting of ladies held in support of his candidature, and with no less a person than Mrs. Gladstone in the chair, that he disapproved of ladies taking part in politics.—The Marquis of Salisbury, on Nov. 30, made a most important declaration, in a speech to the Edinburgh branch of the Primrose League, of his own "earnest hope" that women may soon receive the Parliamentary franchise.—The Women's Suffrage Society's Central Committee will hold a special meeting on Dec. 12 for amending its rules, with the object of widening the basis of the society.—Miss Jane Cobden will, in all probability, stand for election to the London County Council; and should her *nomination* be refused on the ground that women are not qualified to be members, that question will at once be taken to a court of law to be settled. Lawyers differ upon it, at present; but the Local Government Board, which has the management of the elections, has given an *opinion that females are ineligible*. Miss Cobden is not only "the daughter of her father," but has high personal merits.

FLORENCE FENWICK-MILLER.

The Mercers Company have voted £105 towards the Mansion House Prize Fund in connection with the Metropolitan Exhibition of the Royal Agricultural Society in 1889. Messrs. Combe, Delafield, and Co. have subscribed £52 10s.; Messrs. Mann, Crossman, and Paulin, £52 10s.; Lord Calthorpe, £25; Lord Penrhyn, £10; Messrs. A. Voelcker and Sons, £10 10s.; Messrs. Cattley, Gridley, and Co., £10 10s.; and Messrs. Twining and Co., £10 10s.

HEALTH-STRENGTH VIGOUR ·LONG-LIFE·
Guaranteed by the use of HUNT'S FAMILY PILLS. Large numbers of people in robust health can testify to the truth of this assertion, having regulated themselves entirely by these Pills for over 50 years. One pill will invariably relieve, and a little perseverance radically cure, either a Torpid Liver, Costiveness, Indigestion, Pains in the Back or Head, Influenza or Feverish Cold, Rheumatism, Lumbago, Flatulency or Giddiness. THEY RESTORE BRIGHTNESS TO THE EYE, CLEARNESS TO THE COMPLEXION, SHARPNESS TO THE INTELLECT, AND ENERGY TO BOTH MIND AND BODY. To Ladies they are invaluable. Sold everywhere, in boxes, 1s. 1½d. and 2s. 9d. Wholesale Agents, WILCOX & CO., 239, Oxford Street, London; post free.

STREETERS' GOLDSMITHS
INTRODUCERS of 18 CARAT GOLD JEWELLERY.
18 NEW BOND ST. W.

CAUTION.
BENGER'S Food differs entirely from any other Food obtainable. When mixed with warm milk it forms a delicate nutritious cream, in which the curd is reduced to the same flocculent digestible condition in which it exists in human milk, so that hard indigestible masses cannot form in the stomach.
It may be had of Chemists, &c., everywhere, or will be forwarded free by Parcel Post direct from the Manufacturers.
GOLD MEDAL AWARDED INTERNATIONAL HEALTH EXHIBITION

MAPLE & CO.

TABLE LINENS.

TABLE LINENS.
During the long-continued depression in trade, many of the best Irish manufacturers have still kept their most skilful weavers employed, with the result that stocks have accumulated, till of necessity they must be realised, even at a serious sacrifice.

TABLE LINENS.—MAPLE and CO. having been consulted by several manufacturers so situated, have bought out for cash, on most exceptional terms, an immense assortment of pure hand-made, soft-finish CLOTHS and NAPKINS, which they are now offering at a very large percentage under value.

TABLE LINENS.—The cases are now being opened out, and comprise a large variety of CLOTHS of a substantial character, fit for everyday family use, and which, being pure flax, will wear well and retain their natural bloom till the last. The Cloths are mostly of medium sizes—2 yards by 2¾ yards, from 5s. 11d.; better quality, 8s. 11d.; extra quality, 14s. 9d.

TABLE LINENS.

TABLE LINENS.

TABLE LINENS.—Amongst the stocks are a number of CLOTHS, in both medium and large sizes, of altogether exceptional quality; in fact, some of the finest and most beautiful productions of the Irish looms. These are suitable for best use and special occasions, and should certainly be seen. The prices will be found but little more than usually asked for goods of ordinary character.

TABLE LINENS.—Included in the stocks will also be found a large variety of both CLOTHS and NAPKINS suitable for use in Hotels, Clubs, Boarding-houses, &c., and proprietors contemplating renewing these items or quotations. A great saving may be effected by purchasing at once.

TABLE LINENS.—The Stocks also include piles upon piles of DAMASK NAPKINS, as follows: Fish Napkins, from 2s. 3d. per dozen; Breakfast ditto, from 4s. 6d. per dozen; Dinner Napkins, all fine flax, from 6s. 11d. per dozen; extra large French size, 9s. 11d. per dozen. These goods will be found of remarkably good value, and are sure to please in use.

SHEETINGS.

SHEETINGS.

SHEETINGS.
MAPLE and CO.'S Stock of pure-finish and hand-made Irish, Scotch, and Barnsley LINEN SHEETINGS, as well as plain and twilled COTTON SHEETINGS, is now completely assorted, and prices are ruling unusually low. Housekeepers would therefore do well to replenish their stores. Patterns free. A special quality Cotton Sheets, very strong, at 6s. 8d. per pair.

HOUSEHOLD LINENS.

HOUSEHOLD LINENS.

LINENS.—A Complete Set for £8 13s. 9d., consisting of Blankets, Quilts, Table Linen, Sheets, &c., suitable for a house of eight rooms.—MAPLE and CO., London, Paris, and Smyrna.

OBITUARY.

THE DUCHESS OF SUTHERLAND, COUNTESS OF CROMARTIE.

Anna, Duchess of Sutherland and Countess of Cromartie, died on Nov. 25. Her Grace was only child of Mr. John Hay Mackenzie, of Newhall and Cromartie, and was born in 1829. In 1849 she married the present Duke of Sutherland, K.G., and had four sons and two daughters. In 1861 her Grace was created Countess of Cromartie and Viscountess Tarbat, with limitation to her second surviving son Francis, who now becomes Earl of Cromartie, who is married to the daughter of the fourth Lord Macdonald, and has issue. The Duchess of Sutherland was Mistress of the Robes to the Queen, 1870 to 1871; and Member of the Royal Order of Victoria and Albert. The Mackenzies of Cromarty, the former Earls of Cromarty, of whom the deceased Duchess was the heir, are one of the most distinguished families in Scotland. A Portrait of her Grace, from a photograph by Mr. H. S. Mendelssohn, of Pembridge-crescent, Notting-hill-gate, will be found in this week's publication.

SIR ANTHONY MUSGRAVE.

Sir Anthony Musgrave, G.C.M.G., late Governor and Commander-in-Chief of Queensland, died at Government House, Brisbane, on Oct. 9, aged sixty. He was third son of Anthony Musgrave, M.D., Treasurer of Antigua, and devoted himself from an early period to colonial employment. In 1852, he became Treasury-Accountant of Antigua, and Colonial Secretary of the island from 1854 to 1860. He was subsequently Administrator of Nevis, and of St. Vincent. In 1862, he was appointed Lieutenant-Governor of St. Vincent; in 1864, Governor of Newfoundland; in 1869, Governor of British Columbia; in 1872, Lieutenant-Governor of Natal; in 1873, Governor of South Australia; in 1877, Governor of Jamaica; and in 1883, Governor of Queensland. He married, first, in 1854, Christiana Elizabeth, daughter of Sir William Byam; and secondly, Jeanie Lucinda, daughter of Mr. David Dudley Field, of New York.

SIR DAVID WILLIAM BARCLAY, BART.

Sir David William Barclay, Bart., of Pierston, Ayrshire, died on Nov. 23. He was born Sept. 5, 1804; was formerly Captain in the 56th and 99th Regiments, and acted as Aide-de-Camp to Lieutenant-General the Hon. Sir Charles Colville, G.C.B., when Governor of Mauritius. In 1864 he was appointed member of the Legislative Council in that island. He was a great conchologist, and gathered many rare specimens during his long residence in Mauritius. Sir David married first, Feb. 16, 1829, Lis Josèphe De Rune, daughter of Charles Malo, Marquis de Rune, and secondly, in 1872, Emily, second daughter of the late Mr. James E. Stacey, of Kingston, Surrey. By his first wife (who died March 22, 1867) he had several children; and by the second, an only son. He succeeded to the baronetcy at the decease, in 1859, of his nephew, Sir Robert Barclay, ninth Baronet. The title now devolves on Sir David's eldest son, Sir Colville Arthur Durell Barclay, eleventh Baronet, C.M.G.

MR. SARTORIS.

Mr. Edward John Sartoris, J.P. for Hants, M.P. for Carmarthen from 1868 to 1874, died on Nov. 23, aged seventy-four. He was eldest son of Mr. Urban Sartoris, of Sceaux Park, near Paris, by Matilda, his wife, daughter of Mr. Edward Rose Tunno, of Warnford Park, and received his education at Trinity College, Cambridge. He married, in 1842, Adelaide, eldest daughter of Mr. Charles Kemble, and leaves a daughter, May, wife of Mr. W. H. Gordon, and a son, Algernon Charles Frederick Sartoris, of Tichfield, Hants, who married, in 1874, Ellen Wronshall, daughter of General Ulysses Grant, President of the United States.

We have also to record the deaths of—

Lieutenant-Colonel John Money Carter, late of the 1st Royals (Royal Scots Lothian Regiment), at his residence, Chiswick, on Nov. 28. He was born in 1812, and was the only surviving son of the late Colonel John Carter, K.H. Colonel Carter married, in 1839, the Hon. Jane Ferguson Murray, daughter of Alexander, eighth Lord Elibank, by whom he leaves issue, surviving, two sons and four daughters, the eldest son being Colonel Charles Alexander Edward Stapleton Carter, Comptroller of Military Accounts at Madras.

Major-General William Hichens, R.E., C.B., on Nov. 29.

The Rev. Richard Okes, D.D., Provost of King's College, Cambridge, on Nov. 29, in his ninety-first year.

The Rev. Octavius Hartley, M.A., late Rural Dean of Potterne, Bradford Portion, for eighteen years Vicar of Steeple Ashton, Wilts, aged sixty-two.

Captain George Thomas Delmé Radcliffe, lately of the 46th Regiment, on Nov. 28, youngest son of the Rev. Charles Delmé Radcliffe, Rector of Holywell, and grandson of Emilius Henry Delmé, who assumed the name and arms of Radcliffe.

Sir Walter G. Stirling, of Faskine, county Lanark, on Dec. 1, at his residence in Portman-square. He was born in 1802, and succeeded his father as second Baronet in 1832. His memoir will appear in our next issue.

Mr. Richard King-Wyndham, of Corhampton House, Hants, J.P., on Nov. 23. He was eldest son of the late Mr. John King, of Fowelscombe, and assumed the surname and arms of Wyndham in consequence of his marriage with Ellen Christian, daughter of Mr. John Campbell, of Dunoon, and sister and co-heir of Mr. John Henry (Campbell) Wyndham, of Corhampton. The Wyndhams of Corhampton, and The Close, Salisbury, are a branch of the Wyndhams of Dinton, Wilts.

BIRTH.

On Nov. 28, at Merrivale, Ross, the wife of Frank J. Constable Curtis, of a son.

DEATHS.

On Dec. 1, at Plaistow Lodge, Bromley, Kent, Mary Jane, widow of the tenth Baron Kinnaird, and daughter of the late W. H. Hoare, Esq., of Mitcham Grove, Surrey, aged 72.

On Dec. 1, 1888, at Villiers House, Blackheath, S.E., of phthisis, Mary Ann (Minnie) White, eldest child and only daughter of the late Henry White, Esq. (Treasurer of Sir John Cass's Charity), and of Sarah, his wife; aged forty-one years. A loving and devoted daughter and sister, deeply mourned.

*** *The charge for the insertion of Births, Marriages, and Deaths, is Five Shillings.*

RHEUMATISM EXTERMINATED FROM THE SYSTEM, NERVOUS EXHAUSTION, BRAIN FAG, IMPAIRED VITALITY, LIVER AND KIDNEY DISEASES, LADIES' AILMENTS, &c., CURED

by mild, imperceptible, continuous currents of Electricity, generated by wearing **HARNESS'** WORLD-FAMED (PATENT)

ELECTROPATHIC BATTERY BELT

The only Guaranteed Genuine Galvanic Belt recommended by the Leading Medical and Scientific Authorities.

MEN AND WOMEN who wear HARNESS' world-famed ELECTROPATHIC BELT find that it Invigorates the Debilitated Constitution, Stimulates the Organic Action, Promotes the Circulation, **Assists Digestion,** and promptly Renews that Vital Energy, the Loss of which is the first symptom of decay. Its Healing Properties are Multifarious; it **Stimulates** the Functions of Various Organs, Increases their Secretions, Gives Tone to Muscle and Nerves, Relaxes Morbid Contractions, **Improves Nutrition,** and Renews Exhausted Nerve Force. Acting Directly on the System, it Sustains and Assists its Various Functions, and thus Promotes the Health and Vigour of the entire Frame.

IF YOU ARE SUFFERING from any slight derangement, with the cause of which you are acquainted, you will find that HARNESS' ELECTROPATHIC BELT affords a perfect means for the self-application of Curative Electricity. It is comfortable to wear, painless to shock, and is absolutely certain to do good in every case. The thousands of Testimonials in favour of HARNESS' ELECTROPATHIC APPLIANCES speak for themselves. A large number of them are published with Mr. HARNESS' NEW PAMPHLET (Sent post-free); but sufferers are invited to call if possible, and examine themselves by personally inspecting the originals. IF YOU HAVE ANY REASON to fear that your sufferings are serious or complicated, you are recommended to call; or, if your medical adviser so wishes, to write for a private "Advice Form"; which will be sent to you by post (with Pamphlet), free of charge.

EVERYBODY IN SEARCH OF **HEALTH AND STRENGTH**

should know that there is positively no other means by which this Restorative agent can gain so valuable and healing a Nerve remedy as ELECTRICITY, applied in the form of mild continuous currents as generated by wearing

HARNESS' ELECTROPATHIC Battery BELT.

Pamphlet and Advice Free, personally or by Letter.

NOTE ONLY ADDRESS; and if you want to be permanently and speedily Cured, without medicine, DISCARD PREJUDICE; call and inspect the original testimonials, and personally examine Mr. HARNESS' numerous Curative Electrical Appliances, all of which are guaranteed genuine.

THE MEDICAL BATTERY COMPANY'S

ELECTROPATHIC & ZANDER INSTITUTE.

52, OXFORD-STREET, LONDON, Corner of Rathbone-place, W.

Open Daily for the TREATMENT and CURE of

Rheumatism,	Brain Fag,	Indigestion,	Corpulence,
Lumbago,	Kidney Diseases,	Constipation,	General and Local
Sciatica, Gout,	Epilepsy,	Neuralgia,	Debility,
Nervous Exhaustion,	Paralysis,	Female Disorders,	Hernia,
Sleeplessness,	Spinal Weakness,	Liver Complaint,	Functional Disorders, &c.

All sufferers should consult Mr. C. B. HARNESS, the Company's Chief Consulting Medical Electrician, who gives advice, either personally or by letter, free of charge.

The following Extracts from **TESTIMONIALS** *speak for themselves.*

NERVOUS DYSPEPSIA CURED. G. W. BACON, Esq., 127, Strand, London, W.C., writes: "Your Electropathic Belt acts like magic. It has completely restored me to health. I would not be without it for any money."

SCIATICA & RHEUMATIC PAINS CURED. Mr. R. J. WATSON, 13, Market-street, Harwich, writes:—"Harness' Electropathic Belt has completely cured me of Sciatica. After wearing it for a week I got relief, and have gradually been getting better, and am now quite free from pain. P.S.—You are at liberty to publish this."

RHEUMATISM AND INDIGESTION. Mr. GEORGE GARWOOD, 208, Caledonian-road, King's Cross, writes:—"My health has been very good ever since wearing Harness' Electropathic Belt, but before wearing it I was never free from pain."

RHEUMATISM AND DEBILITY CURED. Mr. W. CULLIS, 2, Gardnor-road, Hampstead, London, writes:—"Harness' Electropathic Belt has done me so much good. My health generally is greatly improved."

LADIES AILMENTS CURED. Mrs. OSBOURNE, The Hollies, Newark-upon-Trent, writes:—"Sept. 27, 1888.—Your Electropathic Abdominal Belt has had a wonderful effect upon the circulation and in improving the general vitality of the system. Since wearing the Belt I have become quite strong, and can walk miles without fatigue. I am, in fact, completely cured by your treatment."

LUMBAGO CURED. Mr. J. B. CARNE, Station Master, L. B. and S. C. Railway, Clapham Junction Station, S.W., writes:—"I have derived great benefit from wearing your Electropathic Belt. The Lumbago and pains in my back have both ceased."

NERVOUS DEBILITY CURED. Mr. F. G. ANSTEY, 199, Queen's-gate, London, S.W., writes:—"Dec. 3, 1887.—Words fail to express my gratitude to you for the benefit I have derived from the use of your Electropathic Appliances, for now I feel like a new creature and better than I have done for years. My nerves are much better, and I have none of that *languid feeling* which used to make my life a burden."

Mr. C. B. HARNESS, CONSULTING MEDICAL ELECTRICIAN (*President of the British Association of Medical Electricians*), attends daily at the ELECTROPATHIC and ZANDER INSTITUTE, 52, OXFORD-STREET, LONDON, W., and gives **ADVICE FREE OF CHARGE, personally or by letter,** on all matters relating to HEALTH and the application of CURATIVE ELECTRICITY, MASSAGE, and SWEDISH MECHANICAL EXERCISES.

RESIDENTS at a DISTANCE, and those unable to call, should write for "Private Advice Form," which will be sent, together with Pamphlet and Copies of Testimonials, post-free to any address on application.

NOTE ONLY ADDRESS— **52, OXFORD-STREET, LONDON, W.** (CORNER OF RATHBONE-PLACE.)

FOR XMAS & NEW YEAR'S GIFTS

Nothing is more suitable than ARBENZ'S Celebrated

MANDARIN RAZORS,

AND HIS UNIVERSALLY APPRECIATED

GEM AIR GUNS.

Innumerable Testimonials pronounce the former to be the best, most reliable, easiest, and cheapest high-class Razors known. They are fully warranted, and will give perfect satisfaction. ARBENZ'S GEM AIR GUNS have, like most good things, been followed by imitations which, for extra profit, are offered by some dealers as the original article. Those wishing to purchase really reliable, powerful, effective, and well-made Gem Air Guns should see that each is stamped upon the barrel with a Swiss Cross (thus ✠). They may be had at the same prices as the valueless imitations made, through any respectable dealer, or direct where unobtainable otherwise. Insist upon having with every gun my descriptive circulars, giving full particulars, instructions for use, retail prices, &c. T. A. ARBENZ, 102 an 1 108, Great Charles-street, Birmingham.

HIMROD'S CURE FOR ASTHMA

Established nearly quarter of a century.

Prescribed by the Medical Faculty throughout the world. It is used as an inhalation, and without any after bad effects.

Among the thousands of testimonials the following will be read with interest:—

"The only relief I could get." "If I had known it earlier."
—Lord Beaconsfield
(In his dying moments).

"I have tried every remedy ever invented, and HIMROD'S CURE is the only one in which I have absolute confidence." —Emily Faithfull.

"This is an excellent remedy for asthma."
—Sir Morell Mackenzie.
(In his clinical lecture at the London Hospital and Medical College).

"I have used all remedies—HIMROD'S CURE is the best. I never failed."
—Oliver Wendell Holmes.

Trial samples free by post. In Tins at 4s. 9d.
British Depot—46, Holborn Viaduct, London.
And also of Newbery & Sons, Barclay & Son, Lynch & Co., Sangers, and all Wholesale Houses.

HOLLOWAY'S PILLS and OINTMENT. The Pills purify the blood, correct all disorders of the liver, stomach, kidneys, and bowels. The Ointment is unrivalled in the cure of bad legs, old wounds, gout, rheumatism.

THE BLACK MOUNTAIN EXPEDITION: OFFICERS' MESS, CAMP AT AKHUND BABA, 9100 FEET HIGH, IN A SNOWSTORM.
SKETCH BY LIEUT. WALTER C. BLAIR, 24TH PUNJAUB INFANTRY.

OUR NOTE BOOK.

BY JAMES PAYN.

The popularity of particular books is a subject that "no fellow can understand" by the ordinary processes of reasoning. The logical mind, in fact, is not adapted for the solution of the question, which appeals to one of a much more common type, and, indeed, the commoner the better. I have always maintained that the marvellous success of Mr. Tupper's poems was because they express ideas which are entertained by persons of the most ordinary kind (and, therefore, the most numerous), but expressed much better than they could express them. For the first time in their lives they found that they understood poetry, and the revelation formed half the pleasure they found in it. The same thing occurs with all who master a foreign language, especially a dead one: they do not find one half the beauties in it they assert they do, but they are enraptured at finding any meaning in it at all. The "Proverbial Philosophy" teaches philosophy and poetry at once to those who have known nothing of either; and its verses are "to the purpose"—easy things to understand." This latter attribute is essential to great popularity. Mr. Browning may be the greatest of poets, and Mr. Meredith the greatest of novelists; but popularity—in its widest sense—they will never achieve. Its simplicity of diction is one of the charms of the most popular book in the world, though "it never drew a smile or a tear"—"Robinson Crusoe"; it is true it has *Genius* added, but *that* is not the cause of its popularity, which is to be found rather in its dramatic interest, and especially in the fact that it describes a situation in which any one of us may be placed and driven to the same shifts. Indeed, the popularity of "Robinson Crusoe" *may* be thus explained; while that of very inferior books almost equally sought after is inscrutable.

Messrs. Routledge have lately told us, through the *Pall Mall Gazette*, that "Valentine Vox" and "Handy Andy" are the most popular of all the novels they produce. During the last thirty-five years they have sold 394,000 copies of the former and 237,000 of the latter. From a literary point of view (though the less attractive one is better written than the other) they have little or no merit. For myself, indeed, "Handy Andy" had no attraction at all. I never could get through it; but "Valentine Vox" is full of adventure. I have not read it for these forty years; but it has one scene, where the soles of a gentleman's feet, unjustly confined in a private madhouse, are tickled to make him mad, ready for the Government inspector, which will never leave my memory. It was before the days of "sensation" stories; but the incident may certainly lay claim to that title. The rest of the novel, as I remember it, is dullish, and I fancy it is this pinch of sensational salt which preserves it from decay; it has also, however, a great deal of a low class of humour—practical jokes, which no doubt appeal to the taste of boys. Another novel, "Sylvester Sound the Somnambulist," on the same lines and by the same author (Cockton), had no such vogue. "Called Back," a much better book than "Valentine Vox," still, no doubt owed its marvellous run to its sensational character. I should, indeed, be inclined to put "sensation" first, as the element of popular attraction, and next, adventure and incident. Of Poe's tales, well known as they have been for so long, no less than 29,000 copies were sold last year (the vast public that consumes him know comparatively little of Lefanu, a far greater master of the weird, but one whose style is probably too subtle for them). "Ivanhoe," as one would take for granted, seems to be the most attractive of Scott's works. But the wonder of gigantic circulation arises when one comes to the dull books. Everyone can understand the popularity of "Uncle Tom's Cabin"; but who can account for that of "The Wide, Wide World" and its congeners? They may be full of merit; people who ought to know tell me they *are*; but what attraction do they possess that draws a whole world of readers into their orbit, and leaves Scott (for example), by comparison, discoursing to a little crowd!

The lectures at the "Kissing School" recently established in Philadelphia are no doubt entertaining, but their attraction will probably depend upon the models that are engaged to be experimented upon. These are not, I presume, lay figures. One can hardly, as promised by the Professor, "derive an etherial pleasure" from kissing "lightly and deliberately" one of those dreadful skeletons with gowns on that you see in the windows of art-shops. You can't "put your right hand to *her* left cheek" (for she has no cheek worth speaking of), "draw her face slowly forward to you, look her straight in the eyes" (they are mere sockets), "bend your head down," and perform the operation. Kissing, it is true, goes by favour; but not to this extent. It would be easy "not to pucker up your lips, but allow them to remain in a state of natural repose," in the presence of so unattractive an object. Of course "she will be bashful," and (if you move the proper hinge) "turn her head away"; but who cares what she does, or doesn't? And yet, in all the interviewer has to tell us about the new Professor and his most interesting course of lectures, there is not a word about the person who "lends herself" (or, as is more likely, hired) "to illustration." It would be foolish indeed for any student to go to Philadelphia with the object of improving himself in this charming art, without having this preliminary matter—of the model—distinctly understood.

It is easy enough to be humorous on subjects that lend themselves to humour, but to evoke amusement where the matter is dull requires the hand of a master. Mathematics, for example, is a science that can hardly be said to be as full of fun as it is of figures; yet even mathematics has been the cause of merriment. When I was at Cambridge I knew a lecturer—he has long "joined the majority": not that he is dead; quite the contrary, he accepted a living, which is what the majority of Fellows of Colleges do—who was a humourist. He persuaded the College to buy him models of "the wheel and axle" to show us how they worked, and the ratios of speed which they had to one another. None of them ever acted as he and his favourite pupil (who assisted him in these experiments) assured us they would; which was much better for us all. To watch, as the poet of the lecture-room expressed it—

> Hobson and pup
> Coaxing a pulley that wouldn't pull up,

was worth any amount of scientific successes. To hear Hobson say, "The principle, however, remains the same," after each tremendous failure, was charming indeed, and we all enjoyed it immensely. It was his theory that statics (or whatever they were; *I* don't know) were full of pathos, if only properly dwelt upon by the human voice; and the following was his favourite instance—"But if A B is in the same straight line with C D, B C vanishes, the weight is supported by the immovable fulcrum C and the body is at rest." At the last words his voice would sink and break most touchingly. He was not a poet, though "he lisped in numbers" (for he was a born mathematician), but the performance drew tears from eyes little accustomed to the melting mood.

This was a *tour de force* (statics you know) of course, and, after all, what are even the highest mathematics in the way of dryness—though high and dry is a proverb—compared with the aridity of the Law? Yet how brightly has wit shone upon it! Who has not read Mr. Justice Hayes's "Written in the Temple Gardens," after the manner of the "Elegy in a Country Churchyard," has missed a treat indeed:—

> The grave attorney, knocking frequently,
> The tittering clerk who hastens to the door,
> The bulky brief and corresponding fee,
> Are things unknown to all that lofty floor.

Mr. Frederick Pollock's "Leading Cases done into English" are a delight to all who can understand them; but as Shelley was the poet for the poets, so is Mr. Pollock a legal wit for lawyers; he is caviare (though very good) "to the general." Mr. Edmund Christian, in his recent "Lays of a Limb of the Law," has given us, on the other hand, such leading cases in verse as must tickle everybody's heartstrings. Take Cumber v. Wane for example, not because it is the best, but (what should make it dear to lawyers) the briefest. Like all the rest it has its proper reference; though Heaven knows to what. It is a roundel (think of a roundel on a law case!)—

> (Sm. L. C., 366. Temp., 1719.)
> Who pays a part in lieu of all
> Knows not the myrtle legal art;
> For on him for the rest they'll fall
> Who pays a part.
>
> Once Wane had touched his Cumber's heart.
> "Give me a third your debt; I'll call
> It settled," said he, in the mart;
> Yet sued and gained the rest. The Hall
> Rang loud with plaints: "Ah, well-a-mee dart!
> He pays the rest with rising gall
> Who pays a part."

The good things are so many that I can only make "references" to them myself. See page 40, Cutter and Powell; page 84, the great Brighton bug case and the "Sonnets on the Mortgagees" (which has a flavour of Mrs. Browning in the title). Under "Legal Maxims," too, see "The Song of the Tyrannical Landlord," which Home Rule papers please copy. Our author is humorous even over the State trials—

> Of General Warrants, dark and direful springs
> Of deeds unconstitutional, he sings,

and of all sorts of most unlikely things to move men's minds to mirth; but yet he does it. It is a capital book.

A writer in a scientific periodical has lately given us some curious notes on suicide. He asserts that persons wishing to destroy themselves "prefer to use the means with which they are most familiar"—soldiers, for instance, resorting to firearms, and doctors to narcotics. This sounds probable enough; but it places other professions at a disadvantage. A clergyman cannot end his days by throwing himself out of the pulpit (because of the people below), and we know that his "white choker" is only a figure of speech. A lawyer is much too wise to precipitate matters. A literary man can, indeed, as has been cruelly said of him, "attempt his own life"; but the essay is seldom successful, and paper and print, though dangerous, are not deadly weapons. What seems very strange there is nothing so provocative of imitation as any out-of-the-way method of putting an end to our mortal coil. When the Sultan of Turkey killed himself by opening a vein (which, as a matter of fact, was obligingly opened for him) a good many people adopted the same means of exit. Scores of persons have thrown themselves off Clifton Bridge, as sheep follow sheep; but not one has tried the Menai Bridge, though it offers precisely the same advantages. We laugh at the follies of fashion, but it has influence over the last act of our lives. As regards the methods of leaving the world, it is singular that the writer above referred to has made no mention of machinists. Whenever *they* have decided to make an end of themselves they almost always do so in a scientific fashion. The most curious example I remember was the plan adopted by a carpenter, some years ago, in Bouverie-street. He lived in an underground room, in which was a cupboard, between which and his bedstead he placed a bench. To the post of the bed's-head he fixed a heavy axe, the handle working freely on a screw. He inserted in the cupboard door a double-action pulley, to enable a rope holding up a stone weighing ninety pounds to pass through it. He then lay down on the bench, placed the axe in position, and cutting the rope which held the weight with a razor, thus circuitously accomplished his object. He perished, in fact, by the guillotine, though he was probably unaware of it.

Among the small trials of life that have in their time taxed a heavenly temper I count the woman who at a railway ticket office, when there is not a moment to lose, can't find her purse, or enters into conversation with the clerk respecting her change of trains. If conscious of her clumsiness or her ignorance why does she not come a quarter of an hour earlier, and clear the way? What is to be said of a father who encourages these habits in his female offspring and even worse? There was a parent the other day—he had been prosecuted six times himself for not producing his railway ticket when requested—who upon being asked by his daughter whether she should follow his example for the seventh time, replied "Do as you like, my child;" whereupon she produced it not. Imagine a whole train full of passengers being kept waiting by this marvellous pair! I have never before known a woman act in this way—though the sex are devoted to delay—but a man often. It is an idiosyncrasy (a word I sometimes think derived from "idiots" and "crazy") of some males, generally of wealth and position: they think it fine not to submit to ordinary rules like ordinary people. Years ago there was a person on the South-Western line who would never give up his ticket; "You are aware who I am," he would say to the unfortunate official (who very often wasn't), "and that is sufficient." He had generally his son with him, who used to say, "It is no use, Collector; I know my dad so well, and he won't do it." And his diagnosis was quite correct. A gentleman of sporting appearance was a Director upon a certain railway, and, of course, did not pay his fare. He only used to murmur, "Director," and the man, who knew him very well, used to touch his cap. On one suburban race-day—let us say Hampton—the order of the trains was changed, and with it the collector; in the meantime the Director had become Chairman of the company, and on being asked for his ticket, murmured "Chairman." "No, no! that *won't* do, my man; you're a-going a little too far," was the official's playful rejoinder. "You've got 'Appy 'Ampton written upon your countenance." The Chairman, who was a capital fellow and used to tell the story with great gusto, instead of being angry with the man, as a fool would have been, "very much applauded what he'd done," in refusing to take a stranger's word for so tremendous a statement, and recommended him for promotion instead of dismissal.

THE BLACK MOUNTAIN EXPEDITION.

An official correspondence has been published by the Indian Government and the Secretary of State for India concerning the recent expedition against certain tribes inhabiting the Black Mountain, on the border of the Hazara district, north of the Punjaub. It shows that ever since the British occupation of the Punjaub the tribes on this part of the frontier have given serious trouble, and the effect of the Black Mountain Expedition of 1868 and of fines and blockades has been only transitory. The district concerned is a triangle bounded on the north by the high mountains of Kohistan, on the west by the River Indus, and on the east by the British frontier. Within this area are three principal tribes of Afghan origin, the Hassanzai, Akazai, and Chigarzai, which number respectively about 2000, 700, and 3000 fighting men. During the last few years, offences have been committed by the Akazais, the Hassanzais, the Parari Synds, who have some Chigarzai dependents living among them, and the Allaiwals; raids were made into British territory, and British subjects murdered. The attitude of the Hassanzai tribe became refractory, and the Punjaub Government recommended active measures. The mild expedient of a blockade was first tried; but on June 18, a party of British troops were attacked by the tribes within the British frontier, and two English officers and four Ghoorka soldiers killed. The tribes concerned, on being asked for an explanation of this attack, gave defiant or unsatisfactory replies, and the Punjaub Government urged the sending of a military expedition to the Black Mountain. After careful inquiries the Indian Government were reluctantly forced to the conclusion that to ensure the peace and order of the frontier this measure was just and necessary. The operations of the Hazara Field-Force, commanded in chief by General M'Queen, and divided into four columns, advancing by different routes northward through the Black Mountain country in the month of October, have been sufficiently described and illustrated. We now present a Sketch by Lieutenant Walter C. Blair, of the 24th Punjaub Infantry, which formed part of the third column; this regiment, on Oct. 6, having advanced from the Oghi Fort two days before, encamped on the mountain at Akhund Baba-ka-Chura, at an elevation of 9100 ft., in a situation exposed to severe weather; and our correspondent's Sketch shows the discomforts of the officers' mess during a violent snowstorm.

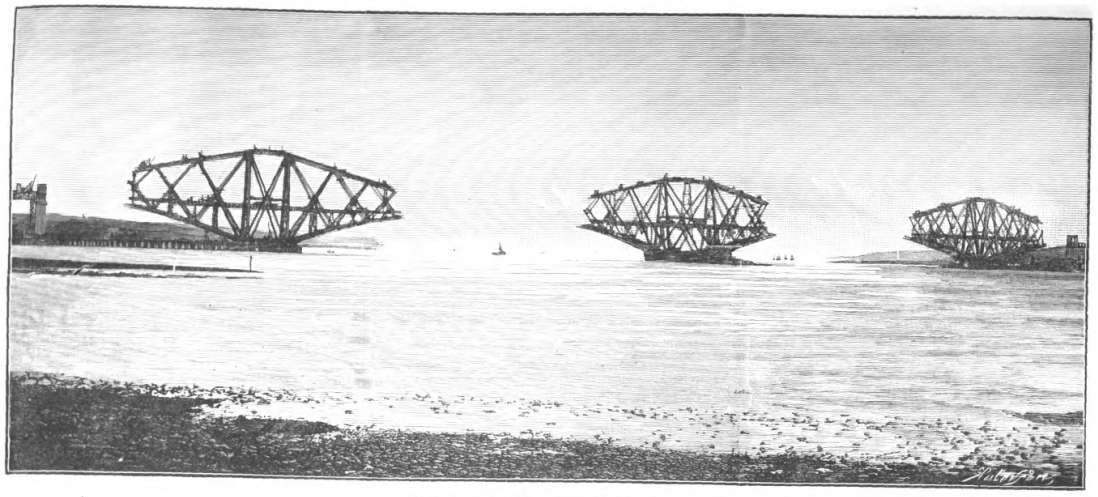
THE SMITHFIELD CLUB CATTLE-SHOW.

The ninety-first annual show of the Smithfield Club was opened on Dec. 10 at the Royal Agricultural Hall, Islington, and continued till the 14th. The total exhibits are 320 head of cattle, 197 sheep, and 86 pigs, being an increase in each item, and a total increase of 63 over the number in 1887. During the day the Prince of Wales visited the Show. His Royal Highness remained for about an hour, and was much interested in Lord Tankerville's curious cross-bred steer.

Among the exhibitors of live stock were the Queen, the Prince of Wales, the Duke of Buckingham and Chandos, the Duke of Hamilton and Brandon, the Duke of Richmond and Gordon, the Marquis of Bristol, and the Marquis of Bute. The Queen is represented by thirteen entries in the cattle classes—namely, six Devons, three Herefords, and four shorthorns; and the judges have awarded to her Majesty two first prizes, five second prizes, and three third prizes. The Prince of Wales is represented by one animal each in the Devon and shorthorn classes, and his Royal Highness secures a fourth prize in the former class and the commendation in the latter.

Nineteen counties were represented at the annual meeting of the County Cricket Council held at Lord's on Dec. 10, Lord Harris presiding. The subject of residential qualification was discussed, but only one slight alteration in the rules was carried. Lord Harris was re-elected chairman.

The Public Libraries Act having been adopted by the urban authority at Sittingbourne, who have had a library of valuable books, numbering about 4000 volumes, presented to them, a free library and reading-room was on Dec. 10 opened to the public. The library is situated in the centre of the town, and the ratepayers of the adjoining town of Milton have been invited to participate in its benefits.



The University delegates propose to arrange a second meeting of University extension and other students in Oxford next summer. The objects of the meeting are to stimulate and direct systematic home-study by means of short courses of lectures; to supplement University extension teaching by a brief period of residence and study in Oxford; and to afford opportunities for conference between teachers and others interested in education on the best means of developing University extension and other educational work. The first part of the meeting will begin on Tuesday, July 30, and will end on Friday evening, Aug. 9; and the second part of the meeting will begin on Aug. 12 and end on Aug. 30.

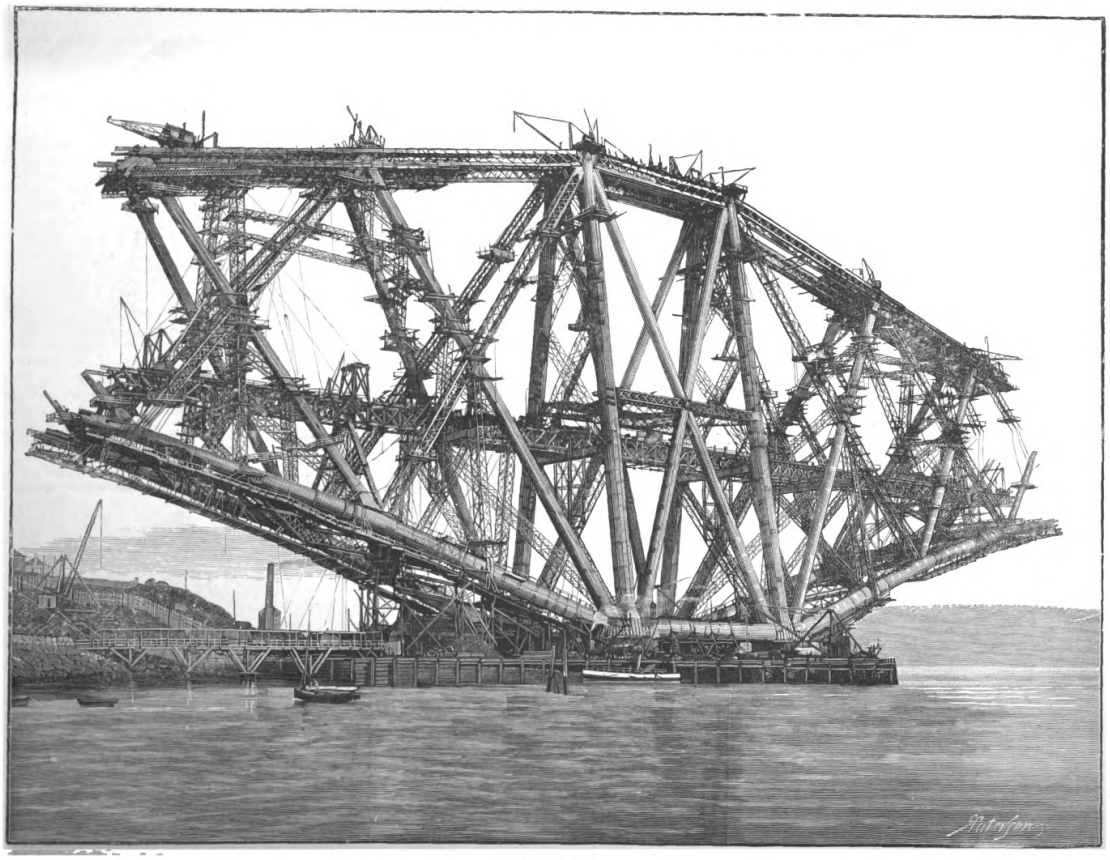
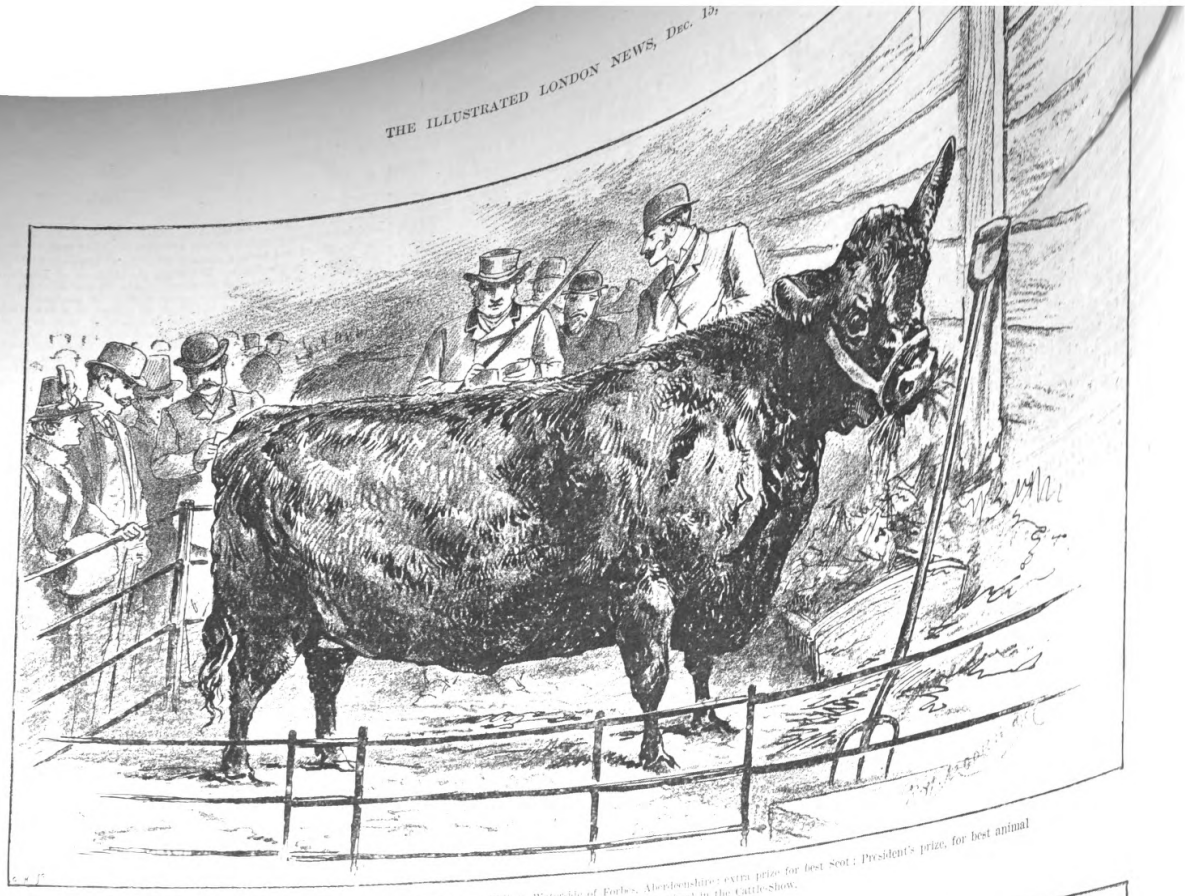
EXHIBITION OF HAIR-DRESSING AT THE PAVILION, BRIGHTON.



The elegant art of hair-dressing, like all other arts, must in this age come forward with its exhibitions of competitive practice. More than one such performance in London has of late years claimed public notice; and London-super-Mare had its turn a few days ago. In the Pavilion, the Palace once of Georgian celebrity, no longer the Brighton abode of Royalty, but the resort of various kinds of popular entertainment, an Exhibition of "historical, powdered, and fancy coiffures" was opened on Monday, Dec. 3, in aid of the funds of certain benevolent institutions for relieving distressed members of a respectable and useful trade. Mr. Truefitt, of Bond-street, London, was one of its chief promoters; and Mr. W. Hopgood, of Brighton, took an active part in the local arrangements. Any student of the history of costume and cosmetics, which is an instructive branch of human and social and national history in general, might have gained some additional knowledge by visiting the rooms. The afternoon promenade, with much that was curious, ingenious, and beautiful to admire, was enlivened by a concert of music from Gates's orchestra, and was attended by many ladies and gentlemen of fashion. In the evening, twenty of the most skilful artists in hair-dressing, convented from different cities and towns of the United Kingdom, made a practical demonstration of their faculty on the heads of proud and happy female victims, in full view of an assembly of spectators, whose taste and experience well enabled them to judge of the merits of the work. It ought to be esteemed one of the finest of the fine arts; for its material—though, as Dean Swift wrote on the packet containing Stella's remaining tress, it is "only a woman's hair"—may in some cases be infinitely more precious than silken or golden threads. And what picture or sculpture was ever so worthy to be cherished as a pretty human head? We cannot reveal the names of the fair subjects of this adornment; nor would it, perhaps, be fair to the profession that those of the prize-winners should be set forth here in a published list.

VIEW OF THE BRIDGE FROM THE EAST.



The construction of the great railway bridge to cross the Firth of Forth, at Queensferry, just beyond Dalmeny Park, where the opposite shores of Fifeshire and Linlithgowshire nearly approach each other, with the rocky islet of Inchgarvie between them, is one of the grandest works of modern engineering. It was designed, for the North British Railway Company, by Sir John Fowler and Mr. Benjamin Baker, has been four or five years in actual progress, and will be completed in the autumn of next year. The width of the estuary in this part is reduced by the peninsula of North Queensferry to a mile and a half; and on the south shore, the water shoals rapidly, with a bed of boulder clay and a very deep stratum of mud; but the Fife shore is an almost perpendicular cliff, and the intervening islet is a rock in the centre of the deep channel, with 200 ft. depth of water on each side, and with a strong tide-current sweeping up and down on each side. It was impossible to erect piers anywhere but on this islet; hence the bridge must rest on three main piers, one at South Queensferry, one at Inchgarvie, and one on the Fife shore, besides two supplementary piers which serve to relieve the balance arms of the "cantilever" girders, and to connect the bridge with a long approach viaduct.

A cantilever is a girder supported only at one point, its overhanging extended part being balanced by its weight at the other end; this engineering device is the most novel feature of the Forth Bridge. The main spans of the bridge are to be upheld over the deep-water channels by the projecting ends of cantilever girders, with connecting central girders over about one-sixth of the span. Each cantilever girder is a complex structure framed of four vertical columns, standing not parallel, but from a wide base narrowing to the top; two bottom members, formed of horizontal tubes arranged in an upward curve of 680 ft. span; two top members, consisting of box-lattice girders arranged horizontally on vertical columns; twenty-eight struts, holding the top and the bottom together; and twenty-four ties, crossing and binding the

FIFE MAIN PIER.

PROGRESS OF THE FORTH BRIDGE, QUEENSFERRY, NEAR EDINBURGH.

Smooth polled cow, Waterside Elena, three years old; owner, Mr. George Wilson, Waterside of Forbes, Aberdeenshire: extra prize for best Scot; President's prize, for best animal bred and fed by exhibitor; Elkington challenge cup as best animal in the Cattle-show.

THE CATTLE-SHOW AT BIRMINGHAM.

Mr. Mansfield H. Mills's Best Irish Setter of any breed.
Mr. Royle's Champion St. Bernard, Duke of Marlborough.
Mrs. Foster's Champion Yorkshire Terrier, Ted.
Mr. Harry T. Clarke's Champion Greyhound, Charles Davis.
Mr. R. T. Martin's Bourhound, Earl of Warwick.
Mr. Farrow's Champion Spaniel, Gipping Sam.
Mr. Hood Wright's Champion Bloodhound, Hector.
Mr. J. S. Pybus Selous' Champion Bulldog, Datholite.

THE DOG-SHOW AT BIRMINGHAM.

struts, with secondary ties to assist in holding up the bottom, all made of steel. By these means, the Forth Bridge will be carried over two spans each of 1710 ft., nearly a third of a mile, besides the half-spans extending inland, where the ends of the cantilever girders, at and beyond the piers of support, are ballasted so as to counterbalance the weight of the suspended parts and of any trains passing over them. To allow for expansion or contraction of metal, the connecting central girders, resting on the cantilevers, each weighing about 800 tons, are only rigidly attached at one end, leaving the other end free. No one can fail to admire the mechanical ingenuity of the whole contrivance, which relies on the principle of "stable equilibrium," instead of a rigid union of all the parts of this immense and ponderous structure. It will scarcely, like the unfortunate Tay Bridge, be liable to be blown down by a gale of wind.

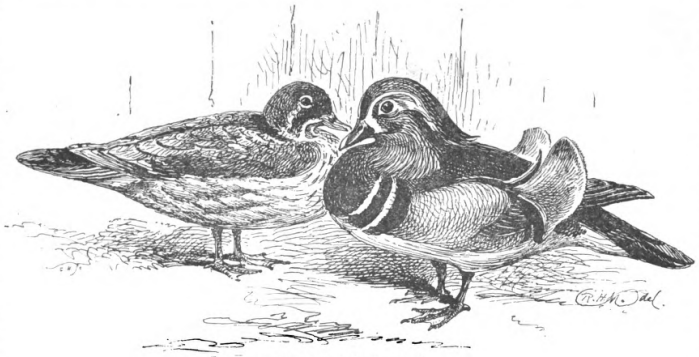
Our Engravings show a general view of the Forth Bridge so far as it is at present completed, and a more detailed view of one of the piers and the great double cantilevers resting upon it.

We may repeat, in conclusion, that each opening of the Forth Bridge is one-third of a mile in clear span; which unprecedented width is spanned by a steel structure made up of two cantilevers or brackets, projecting 675 ft. from the piers, and a central lever connecting the ends of the cantilevers. As shown in the Engravings, the cantilevers project about 400 ft. from the piers; and pieces are being added to the ends at a rate which will complete the bridge next year. It was reported that, during the recent storms which did so much damage to shipping, the Forth Bridge had suffered; but as a matter of fact, not a plate or bolt was shaken, although, in its present condition, the structure has not one-half of its final strength.

BIRMINGHAM CATTLE AND OTHER SHOWS.

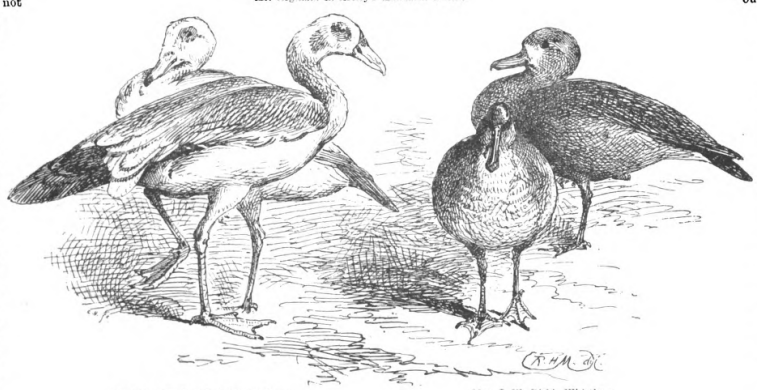
The National Cattle-Show at Bingley Hall, Birmingham, which always takes place a week or two before that held in the Agricultural Hall of London, has this year been not less worthy of notice than usual, though of sheep there was a much smaller number of pens filled than on preceding occasions, and the swine also were less numerous, however good in quality. We present an Illustration of the beautiful cow of a Scotch polled breed, which was pronounced the finest animal in the Cattle-Show. The Birmingham Dog-Show and the Birmingham Poultry-Show, held at the same time, furnish suitable subjects for other Illustrations, with which the lovers of domestic animals, the connoisseurs of canine virtues, and the masters and mistresses of the farm-yard, will not be displeased. The Dog-Show at Curzon Hall had sixty pointers and some fine setters, thirty bloodhounds, and nearly as many deerhounds.

JUBILEE MEMORIAL HALL, EALING.



An Illustration of this building, with some account of its erection and opening, is given on another page. Information of its architectural details, having been supplied too late, must be taken separately and briefly. Its style is English Gothic, freely treated for modern requirements; the walls are of stone. The central feature is a two-storeyed oriel window, over the principal entrance; to the right is a tower 145 ft. high, separating the public offices from the Free Library wing. The east and west ends of the building terminate with hipped roofs. As for the interior, there is an entrance-hall of stone arcades, with red granite shafts; a central staircase leads to the Public Hall. To the left and to the right are different offices of the Local Board, with a second entrance to them on the west side, and a second staircase. On the first floor are the Board-room, 45 ft. by 25 ft., and 21 ft. high, with open trussed roof, traceried windows, and oaken floor; committee-rooms; and the medical officer's department. The Memorial Hall, 100 ft. long, 45 ft. wide, and 40 ft. high, has an open trussed hammer-beam roof, elaborately pierced. From the west end of the building there are two entrances to it, with a staircase on the right and another on the left, one of these leading to the lower hall, which is 40 ft. by 25 ft. by 14 ft. high, and beyond that to retiring and cloak rooms. The Free Library, in the east wing, is approached by a single doorway similar to the double doorway of the main entrance. On the ground floor are the reference library, 33 ft. by 22 ft.; the lending department, 39 ft. by 28 ft.; and at the north end the reading-room, 32 ft. by 26 ft. The whole of the area covered by these departments is half-basemented with two large classrooms for the science and art department, the centre being devoted to the library, with a lift to the lending department. The buildings have been constructed by Mr. Hugh Knight, of Morden, Surrey, to the design and under the superintendence of Mr. Charles Jones, architect and surveyor to the Ealing Local Board. Mr. R. E. Crossland was his principal architectural assistant.

Miss Amelia B. Edwards gave a brilliant lecture, on Dec. 7, at The Priory, Nutfield (by kind permission of Mrs. Fielden), on "The Buried Cities of Egypt." Before entering upon her subject, Miss Edwards gave a brief sketch of the formation of the Egypt Exploration Fund. She alluded, in passing, to the increasing preponderance of American over English subscribers to the fund, and stated that, unless English subscribers came forward to balance this preponderance, the committee might find themselves embarrassed in their disposal of the excavated treasures; the claims of the Boston Museum having already to be admitted alongside of those of the British and provincial museums.



THE COURT.

On Sunday morning, Dec. 9, the Queen and the Empress Frederick, with the Royal family and the members of the Royal household, attended Divine service in the private chapel. Princess Christian of Schleswig-Holstein, with Princess Victoria of Schleswig-Holstein, dined with their Majesties and the Royal family in the evening. The Queen went out on Monday morning, the 10th, with the Empress Frederick and Princess Sophie of Prussia. Princess Beatrice, attended by the Hon. Lady Biddulph, left the castle in the morning for Buckingham Palace, there to join Prince Henry of Battenberg, en route to Darmstadt, on account of the alarming illness of the Prince's father, Prince Alexander of Hesse. The Prince and Princess of Wales, with Prince Albert Victor and Prince George of Wales and the three Princesses, arrived at the castle. The Prince, accompanied by Prince Albert Victor and Prince George of Wales, inspected the Queen's farm-stock at the Shaw Farm on the 11th, previous to next day's sale. In the evening the Empress Frederick, the Prince of Wales, and other members of the Royal family attended the service at St. George's Chapel.

The Prince of Wales, who had been visiting Mr. Tyssen-Amherst, at Didlington Hall, Norfolk, arrived at Marlborough House on Saturday evening, Dec. 8. On Monday, the 10th, the Prince visited the Smithfield Club Cattle Show, at the Agricultural Hall, Islington. The Princess of Wales, accompanied by Prince Albert Victor, Prince George, and Princesses Louise, Victoria, and Maud, arrived at Marlborough House from Sandringham. The Prince and Princess, accompanied by Princes Albert Victor and George and Princesses Louise, Victoria, and Maud, left Marlborough House in the evening on a visit to the Queen.

Mr. Reginald B. Astley's Mandarin Ducks.

Mr. P. F. Fordham's Egyptian Geese. Mrs. J. W. Dick's Whistlers.

THE POULTRY SHOW AT BIRMINGHAM: ORNAMENTAL WATER-FOWL.

CAPE GUARDAFUI, EAST COAST OF AFRICA.

Cape Guardafui, sighted by most steamers in the Indian Ocean proceeding westward to Aden and the Red Sea, is the northern limit of the combined British, German, and Portuguese blockade. The portion of the east coast of Africa thus blockaded extends from Zanzibar to Cape Guardafui. This naval demonstration against slavery will consist probably of about twenty-five ships of war, carrying about 150 guns and 4000 men. The land is a wild and inhospitable one. Duarte Barbosa first tells us of it in 1516, in the times when the Kings of Portugal swept these seas with their ships, and levied tribute at the Straits of Mecca, lying between Socotra and Cape Guardafui. In our own times, heavy tribute is often paid by silk and tea laden steamers. It is a dangerous coast, and all the skill of seamanship cannot save the homeward bound steamer from destruction if caught beneath the cliffs of Guardafui. It is at this cape that the coast ends northward, and trends so as to double towards the Red Sea.

Our Views of Cape Guardafui are from sketches made by Lieutenant-Colonel W. T. McLeod, of the Commissariat and Transport Staff. The cape, seen either from the north or south, is of a light red tint. A remarkable depression of the land is seen in the view from the north. It is as if Nature had hewn out a stupendous carriage-way for traffic with the interior. It is, however, but a highway of shifting, yellow sand, apart from the haunts of man. In the daylight, Guardafui stands, bare and bleak, in a shimmering blaze of intense heat; the very atmosphere is yellow, and filled with an impalpable dust. A table-land—900 ft. in height—rises above the sand-hills and the lesser plateaus; scorched and burnt, vegetation finds no place in these stony deserts and sandy hillocks. Below, the blue waters of the Indian Ocean lie calm and tranquil.

THE SILENT MEMBER.

Legislators surely merit public sympathy. They may not be unaccustomed to a certain amount of political haziness within the walls of St. Stephen's. But when the thickest of London fogs enters the House, and materially adds to the discomfort of sitting far into December, senators may be pardoned for longing for the Christmas holidays, to escape to a pure and bracing atmosphere. Whilst the Marquis of Salisbury, it appears, will remain at home to guard the interests of the Empire, Mr. Gladstone and Mr. W. H. Smith flit to the more congenial climates of Italy and the Riviera; and Lord Randolph Churchill leisurably packs up his portmanteau for an instructive and recuperative trip with Colonel J. T. North to South America in the New Year.

The Prime Minister had an important announcement to make respecting Persia in the House of Lords on the Eleventh of December, when Viscount Sidmouth distinguished himself as arch-interrogator. There had been an amusing overture on the part of Lord Denman, who took exception to being boycotted, as he implied, by the able and urbane chief of the *Times*' Parliamentary staff, Mr. Leycester; but no other noble Lord, I imagine, would have dared to question the amplitude of the *Times*' exhaustive reports of Parliamentary speeches. Their Lordships then agreed—when they do agree, their unanimity is wonderful—to the Commons' amendment to the Irish Land Purchase Bill; and gave an opening to Lord Sidmouth to display his interest in Table Bay and Simon's Bay improvements, in docks for "Gib." and Bombay, and, his eye with fine frenzy rolling, even in Persia. This afforded Lord Salisbury an opportunity, in his happiest manner, to extol the "very high diplomatic capacity" of our adroit Minister at the Court of Teheran, Sir Henry Drummond Wolff, but at the same time to do justice to the enlightenment of the Shah himself. The noble Marquis who so easily bears on his broad shoulders the heavy dual burdens of Premier and Foreign Secretary indeed showed that the Oriental potentate whose flashing diamond nigrette is so well remembered in the Metropolis is quite prepared to move with the spirit of the times. The Shah of Persia has, in fact, wisely come to the conclusion that his country needs the aid of our Government to stimulate commerce in his dominions. With this view, his Majesty has consented to open the port of Mohummreh and the River Karun to European traffic. New markets for British products being so desirable, manufacturers and merchants will welcome the news communicated by Lord Salisbury. The linked dullness long drawn out of the protracted discussions in the Commons—relieved only now and again by an eloquent outburst of Gladstonian oratory, by a skilful pyrotechnic display on the part of Lord Randolph Churchill, or by a diversion in the Parnellite ranks—has proved to demonstration that topics would be forthcoming for debate were the House to sit incessantly all the year round. The mischief of it is that we get very little forwarder. Much cry and little wool is still the deplorable rule. This is certainly not the fault of the laborious and painstaking Leader of the House, for Mr. Smith is remarkably terse and businesslike. May his exemplary succinctness spread! Should that happy time arrive when brevity would be the soul of Parliamentary wit, we should at length boast a model Session. Meanwhile, disrelish of a Saturday sitting in December caused faint interest to be taken even in the Home Secretary's report of the Sheehy Committee, who decided that Jeremiah Sullivan had committed a distinct breach of privilege, and warned him not to do it again; the House is becoming tired of the pastime of Balfour-baiting; and one and all are anxious for the last of the estimates to pass, in order to escape with alacrity to fresh woods and pastures new. The good news that Mr. Bright was better occasioned general satisfaction at the commencement of the second week in December in the House, where the bulletins from Rochdale have been scanned with the deep interest we all felt when his Royal Highness the Prince of Wales was battling against fever at Sandringham just seventeen years ago.

THE PARNELL INQUIRY COMMISSION.

The judicial Commissioners had reached their thirtieth sitting at the Law Courts in the week ending Dec. 15, and were still hearing the examination and cross-examination of witnesses. Pat Molloy, of Dublin, was supposed to have been a Fenian or an "Invincible," which he denied; this man was brought up under guard of two of the Irish police, having been arrested and sent to London, and confined in the Holloway Prison, for not obeying the summons of the Court. He was once employed as a canvasser for a respectable firm of book-publishers in London. His evidence was to have been discredited by that of Mr. Walker, who also, for the facility of making personal inquiries, had called himself Mr. Thompson, and who was clerk to a Dublin solicitor. Mr. Arthur Shaen Bingham, a landowner in Mayo, gave evidence respecting an attempt to shoot him, in 1881, while driving in a car with his wife and a young lady; the shot was fired by a man dressed as a woman; Mr. Bingham and the young lady were slightly wounded. He afterwards used to carry a revolver, but had none on that occasion. Being asked, in cross-examination, whether his revolver did not go off by accident, he simply replied, "It could not go off, for it was not in my possession." Our Sketches are portraits of these witnesses, and of Bridget Barrett, the widow of one of Mr. Bingham's tenants, who was murdered about the same time.

SIR F. LEIGHTON'S OPENING ADDRESS.

MR. G. AITCHISON'S ADDRESS (ARCHITECTURE).

MR. WALTER CRANE'S ADDRESS (DECORATIVE ART).

MR. ALMA TADEMA'S ADDRESS (PAINTING).

THE LIVERPOOL ART CONGRESS.

The National Association for the Advancement of Art and its Application to Industry has been founded in response to desires and suggestions expressed very often in speeches and writings for thirty or forty years past, and has the goodwill of influential leaders of social opinion. It may do some good, and the only ground for scepticism is a doubt whether the English race, in general, has been endowed by its type of mental constitution with any natural capability of highly appreciating plastic art, though a few good sculptors, as well as a few architects of talent other than that of adaptation and that of construction, are found in successive generations. Painting is another matter, and England has certainly produced some of the best landscape artists and some of the best portrait-painters in the world. We shall see what we shall see, or posterity will see what may come of the patriotic endeavour to cultivate a perception of beauty in form—that is the deficiency in the average English mind. The first Congress of the Association, held at St. George's Hall, Liverpool, on Monday, Dec. 3, and following days, was as much of a success as meetings with speeches and resolutions and excellent sentiments can achieve towards an object which is only the beginning of a new branch of national education. Sir Frederick Leighton, Bart., the accomplished President of the Royal Academy, was supported by Mr. Alma Tadema, A.R.A., President of the Section of Painting; Mr. Alfred Gilbert, A.R.A., President of the Section of Sculpture; Mr. George Aitchison, A.R.A., President of the Section of Architecture; and Mr. Walter Crane, R.I., President of the Section of Applied or Decorative Art. The addresses delivered by these gentlemen have been reported, and have, no doubt, been thoughtfully perused by a very large number of readers who understand and enjoy the fine arts, or some fine art, and who would gladly be taught to recognise Art in the abstract, if the mystic meanings of æsthetic philosophy could be as readily comprehended by our countrymen as by the divinely inspired Greeks—inspired by repute, or by the erudite Germans who make it an academic profession. We may all hope to learn, and even to improve our notions of the ideal in sculpture and of architectural harmony, notwithstanding the indestructible materials of bad examples of those particular arts; while in painting, which is less permanent and less obtrusive, there is always the facility of using improved skill in execution to present original ideas in which the English mind, with its sensitiveness to the beauties of Nature, is not wanting; and a great improvement in our decorative art has already been effected. The opening of the Liverpool Art Congress is, therefore, an event on which public congratulations seem to be due; and our Sketches, representing Sir Frederick Leighton, Mr. Alma Tadema, Mr. Aitchison, and Mr. Walter Crane, delivering their respective presidential addresses, are given as an expression of sympathy with this laudable effort. Sir James Picton, the munificent donor of an Art Gallery and chairman of the Free Library, Museum, and Art Gallery Committee of the Liverpool Corporation, was chairman also of the Reception Committee for the visit of the Art Congress. The Mayor of Liverpool, Mr. E. H. Cookson, entertained the members of the Congress with a banquet in the Townhall. The Congress has been invited to meet in 1889 at Edinburgh, but we understand that this has not yet been decided.

The directors of the Union Steam-Ship Company have sent out to their chief agent in South Africa—Mr. T. E. Fuller, M.L.A., of Capetown—two 20-guinea gold watches for presentation, respectively, to the Colonial cricketer who makes the highest score in any match against Major Warton's English team, and to the Colonial bowler who takes the largest number of wickets in any match against the same English team.

Princess Christian visited the Royal Female School of Art in Queen-square on Dec. 7, and opened the new studio recently added to the institution.

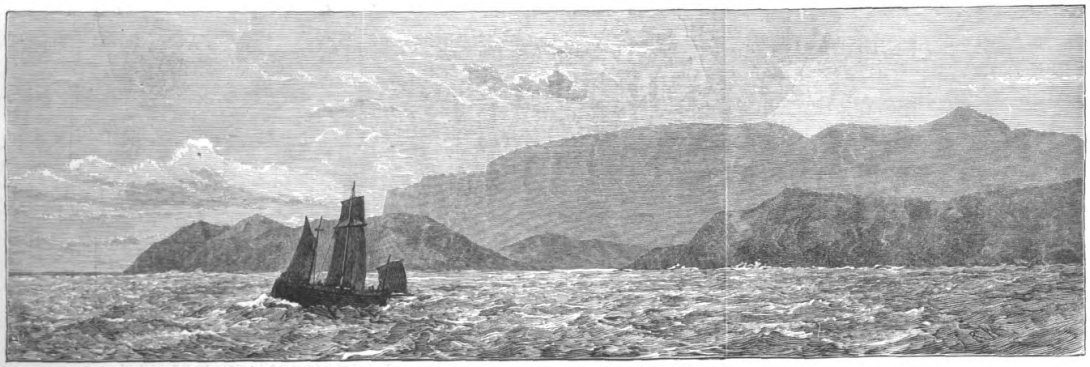
Lord Justice Bowen distributed, on Tuesday evening, Dec. 11, the prizes gained by the students of the City of London College, Moorfields.

There is in Messrs. Parkins and Gotto's new galleries for toys in Oxford-street an extraordinary assortment of amusing and grotesque mechanical and musical toys, that cannot fail to enliven the Christmas of many of our juvenile friends. The objects vary greatly, some being very low-priced, while one large elephant, beautifully modelled and capable of holding a number of presents, is priced at eighteen guineas.

All matters have now been definitely settled for holding a Spanish Exhibition in 1889 at Earl's Court, upon the site of the late Italian Exhibition. The president will be the Duke of Wellington, Grandee of Spain; and the vice-president, Colonel J. T. North. The most elaborate preparations are being made, and some important arrangements have been entered into by the authorities.

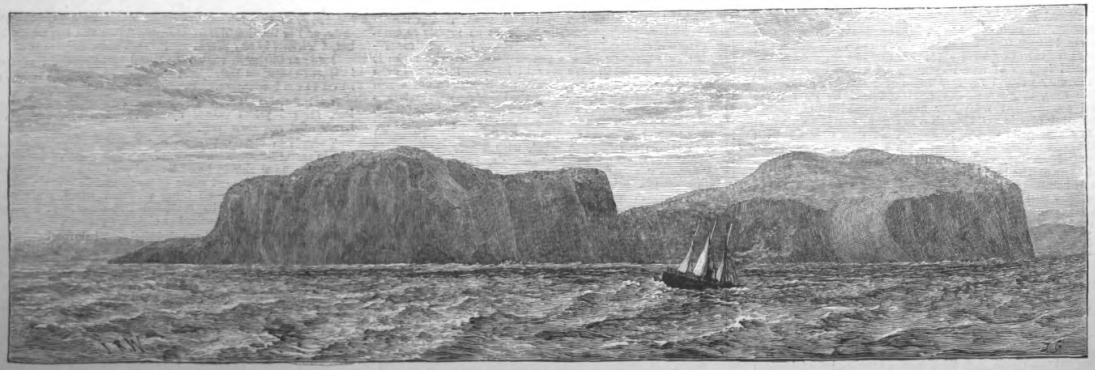
The foundation-stone of the Fulham Townhall was laid by the Rev. F. H. Fisher, Vicar of Fulham, on Dec. 10. A sealed jar, containing a copy of *The Times* newspaper of that date, *The Illustrated London News* of Dec. 8th, and three local newspapers, together with a set of silver and copper coins, was deposited in a cavity of the granite block. The hall will cost upwards of £20,000. Mr. George Edwards is the architect; and Mr. Charles Wall, of Chelsea, the builder.

Mr. Boughton.



Pat Molloy's Bodyguard.

Pat Molloy.



Mr. "Thompson" Walker.

Bridget Barrett.

CAPE GUARDAFUI, EAST COAST OF AFRICA, LOOKING NORTH.

MR. H. RIDER HAGGARD,

Author of "King Solomon's Mines," "She," "Allan Quatermain," and "Cleopatra."

MR. H. RIDER HAGGARD.

This clever and ingenious novelist has won such extensive celebrity that we may feel sure of the ready acceptance of his portrait by an immense multitude of readers, who are so well acquainted with his stirring romances as not to require any details of his personal biography; and it may even be considered that a popular author, working in his study for the public entertainment, has no need, individually, to allow the world to comment on his unassuming private life. There are few among those who delight in the contemporary literature of fiction to whom Mr. Rider Haggard's books are unknown. "King Solomon's Mines," "The Witch's Head," "She," and "Allan Quatermain," with their wondrous revelations of Central African mysteries, of wild savagery and heathen civilisation, and of the miraculous preservation of customs and institutions derived from prehistoric antiquity, are quite as familiar, to many of us, as "Robinson Crusoe," or "Gulliver's Travels," or "The Arabian Nights." If certain grave critics have deemed it their duty to object to these interesting tales on the ground of their lack of consistency with ascertained facts of geography and ethnology, or with the understood physical laws of Nature, or with the conditions of human character and behaviour under any conceivable social influences, it is a sufficient answer that they are not intended to satisfy the scientific critics, but to amuse the fancy; and in this purpose, it cannot be denied, the author has been one of the most successful writers of the day. He has, we believe, sojourned a while in South Africa, and has had an opportunity of seeing what Zulus and Kaffirs are like, his descriptions of the habits and manners of those races agreeing fairly with those which are to be found in authentic books of travel. As for the imaginary preternatural incidents, the subterranean rivers and unquenchable fires, the tremendous caverns and chasms, the sorcery and magic, the treasures hoarded for ages, the splendid cities of sculptured marble, with golden palaces and temples, where immortal Queens of enchanting beauty and enthralling wisdom rule for thousands of years over an obedient warlike population—why should not these romantic dreams be permitted for our diversion, as well as the perusal of Homer's "Odyssey," the various marvels related by Ariosto, the fables of Indian, Persian, or Arabian invention, or the "Earthly Paradise" of Mr. William Morris? What may be told in verse can also be told in prose; and nineteen people in twenty now like prose reading much better. Among the other productions of Mr. Rider Haggard are to be mentioned his "Dawn," "Jess," "Mr. Meeson's Will," and "Maiwa's Revenge," each of which has been received with public favour; "Colonel Quaritch, V.C.," a novel in three volumes, recently published; and his great story of ancient Egypt, entitled "Cleopatra," which will appear by weekly instalments in *The Illustrated London News*, beginning with our first publication in the New Year.

The Portrait of Mr. Rider Haggard is a drawing from life, specially made by one of our own Artists.

NEW BOOKS.

Colonel Quaritch, V.C., a Tale of Country Life. By H. Rider Haggard. Three vols. (Longmans).—The popularity of this author, though chiefly won by stories of a different kind, is so widely established that many readers are gained beforehand to a new tale written by him. Yet while few writers of fiction can more potently arouse the imaginative joy of a description of fierce fighting, there is none of that sort of entertainment here, in spite of the military rank and the Victoria Cross worn by his modest hero. The Colonel has retired on half-pay, in the forty-fourth year of his age, before the story begins; he has come to reside, with an income of about £600 a year, in an ancient cottage on the Molehill at Honham, bequeathed to him by his aunt. A recent magazine essay on "Names in Fiction," by one of the most judicious literary critics of the present day, emboldens us to ask why a typical plain English gentleman should be appointed to bear a unique foreign surname, heretofore known to Londoners only in connection with a highly-respectable business familiar to scholarly amateurs of rare and precious exotic or antique books. "Quaritch" does not go well with "Harold," which is, perhaps, itself a Christian name of too youthful an air for a man of the Colonel's time of life, though he could nowise get rid of it after wearing it gracefully and gallantly at one-and-twenty. But the objection most likely to be taken by ordinary novel-readers to Harold Quaritch personally is that his mature disposition and behaviour show no trace of his ever having been a young man; he could never have been handsome or graceful; and though he must, as a soldier, have exhibited on some occasion, in India, what is officially styled "gallantry," which thousands of other soldiers would show if they had the lucky opportunity, the social quality that oftener takes that name, in his demeanour to either sex, is not more especially conspicuous than it may be in any quiet civilian. He is unquestionably a very honest, manly, straightforward, generous fellow, with plenty of moral courage, which is a much better quality; and when he has, with ample justification, called Mr. Edward Cossey a cur and a blackguard, he offers to cross the Channel for the purpose of fighting a duel—an improper and unnecessary invitation which Mr. Edward Cossey more wisely declines. Still, the part which Colonel Quaritch has to play, throughout this story, is that of self-possessed inactivity, with a patient attendance on the young lady who has captivated his middle-aged affections, until the period arrives, near the end of it all, for him to discover a hidden treasure in the Dead Man's Mount, behind his own back garden. This feat of digging up a hoard of old gold coins, on a stormy winter night, in a pit where it has lain guarded by skeletons for more than two centuries, is told with the intense descriptive force to be expected in such a narrative by the author of "King Solomon's Mines." But it is not of a nature to cast much light on the complex conditions of individual character; for any tolerably courageous man, with a strong motive, whether of love and friendship, or of greedy avarice, would do the same, if free from superstition, when he had deciphered the cryptogram of the writing in the old Bible. There is no flavour of the "V.C.," or of "distinguished gallantry," about such an action; we like and esteem Colonel Quaritch, as a worthy country gentleman of small pretensions and an unassuming faithful lover; we are sincerely glad that he helps to save the Squire's estate from ruin, and that he finally becomes the husband of Ida; but he does not come up to the romantic ideal of a hero. The Squire, for his part, is a type of the conventional attributes of an old-fashioned Tory country landlord, with the exception, again, of his family name, De la Molle, which is neither English, Norman, nor French; and that of Dofferleigh, which originally belonged to his ancestors, seems almost equally impossible in our national history. He is, personally, to judge by his sayings and doings, such a foolish, vain, selfish, obstinate old man, that we cannot much care for the impending risk of his ejection from Honham Castle, as he has no male heir, and his only daughter may have a good husband, able to support her and her father as poor gentlefolk to the end of their lives. Seriously, it is difficult to approve, on the consideration of mere pride of ancestry, Ida's intended self-sacrifice for the price of £30,000 to a man whom she and her father both detest and despise, Mr. Edward Cossey, the son of the rich London banker, and a base scoundrel with an inheritance of half a million, carrying on, as she knows, a criminal intrigue with a married woman in the neighbourhood. No daughter capable of consenting to such a marriage, especially after avowing her love for another man, should be regarded as an honest young woman; so the heroine, as well as the hero, of this disagreeable social complication appears to us a failure in moral interest; while the hereditary claims of the De la Molles to keep their mortgaged property, even by a proposed transaction of this unworthy kind, do not command our sympathy. Much is said of the noble ancient race of English landed proprietors, and of the inferior class, often rich tradesmen, bankers, or lawyers, who now sometimes come into possession of their former estates. But every diligent student of the domestic history of England has ascertained that in the means by which the oldest landed estates were originally acquired, there was incomparably more chicanery, servility, and treachery, than can now be practised, and that modern purchases, or mortgages and foreclosures, are more honest dealings than some of those on record under the Tudor and Plantagenet reigns. These reflections are presented only as an antidote to any false impressions that may be left by what is called a "Tale of Country Life." Mr. Rider Haggard is, nevertheless, a writer of so much inventive ability, with such remarkable powers of combining incidents to bring about a designed catastrophe, setting his personages forcibly in action, bringing them into sharp collision with each other, entangling them, and subsequently removing their bonds in the course of his story, and exciting common emotions on their behalf, that none of his works can fail to be of some interest. In this novel, we confess, the episode of Mr. Quest's social and matrimonial embarrassments—though Mr. Quest is a very bad man, and the unhappy lady called Mrs. Quest is not at all a good woman—engages our concern much more heartily than the affairs of Honham Castle. Mr. Quest, the clever, scheming, ambitious solicitor, the churchwarden, the clerk of Petty Sessions, all that is respectable at Boisingham, yet a secret criminal, a bigamist, in lifelong dread of his real wife, a vile, coarse, drunken, profligate creature, who lives a loose life in London, draining him of the better part of his income, does somehow take hold of the imagination; all the more as he is passionately fond of his second partner, who, having detected his perfidy, regards him with bitter aversion and becomes wantonly unfaithful to him in return. This is a terrible conflict of passions, but the situation is not inconceivable; and Mr. Rider Haggard works out its development with a dramatic skill and force which prove his capacity of dealing successfully with the elements of the usual domestic novel. He will no doubt find a suitable plot and characters of substantial merit for the composition of another story of this class, which may add to the considerable reputation acquired by his other successful writings. In the meantime, we confidently expect that his "Cleopatra," immediately forthcoming in our own pages, will be admired even more highly than those ingenious weird romances which have fascinated a countless multitude of readers by the entertainment of poetical fancy with visions of pity and terror.

The Land beyond the Forest (Transylvania). By E. De L. Gerard. Two vols. (W. Blackwood and Sons).—Madame Gerard, a Scotch lady, the wife of an Austrian Cavalry officer, lived two years at Herrmannstadt and Kronstadt, in the south-eastern corner of the Empire, and became well acquainted with the country and the various races of people on that remote frontier. Her account of them is copious in detail, enlivened with many anecdotes of social and domestic life, of peculiar customs, notions, and legendary traditions, and gives to the intelligent reader both a good deal of entertainment and much suggestive information. Nowhere in Europe is there to be observed a more curious juxtaposition of different nations, or fragments of nations, contrasting strongly with each other in character and in their state of civilisation. The Transylvanians of the South Slavonic race, the Magyars or Hungarians, the Roumans from Wallachia, the descendants of German colonists, who are called Saxons, the Tsiganes or Gipsies, the Szekels, a purely Hunnish race, and the Armenian emigrants from Moldavia, occupy their several districts in the valleys west of the Carpathian mountains, and north of the Roumanian frontier. Madame Gerard describes them separately, and it is just now of some political importance to learn their characteristic dispositions, for they might possibly be drawn into the conflict between Austria and Russia which is apprehended by many statesmen as a future danger. The town of Klausenburg, now more frequently named Kolosvar, is much less German than formerly, and the non-German elements of population seem to be gaining ground in Transylvania. The Greek Church has great influence in the country; while Unitarianism, which finds sympathy among certain English Dissenters, prevails in that and other towns. The authoress, as might be expected, dwells especially on the stiff Conservative habits and temper of the old-fashioned Saxons, who appear to be a sturdy, honest, rather boorish, hard, and plodding kind of people, not without solid merits, and Protestants in religion. They afford, perhaps, the most genuine example of the primitive German type, and are worth studying on that account; "but they are now rapidly degenerating into mere fossil antiquities." The Roumanians, on the contrary—who claim to be of Italian origin, and whose language is a Latin dialect, being, perhaps, the descendants of Trajan's colony of Roman soldiers on the Lower Danube—are vivacious, crafty, endowed with versatile talents, and cherish an enterprising ambition. It seems as if they had a future before them; and the comparison between them and the stationary or retrograde Saxons is the main interest of this book. The last chapters are an agreeable description of the scenery of the Bulea Lake, the mountains and pine-forests, with an excursion to Sinaia, the favourite summer resort of the King and Queen of Roumania, not far beyond the Austrian frontier.

The Leeds Town Council have resolved to borrow £200,000, by the issue of debenture stock, for town improvements.

The Lady Mayoress on Saturday distributed the prizes to the officers and men of the 3rd London Rifle Volunteers, at the Guildhall, the Lord Mayor presiding.

The Duke of Sutherland has placed at the disposal of the Crofter Commissioners a portion of a deer forest, in the Assyre district, over 800 acres in extent, and portions of several sheep farms extending to about 8000 acres, to be assigned to Crofter applicants who desire to extend their holdings.

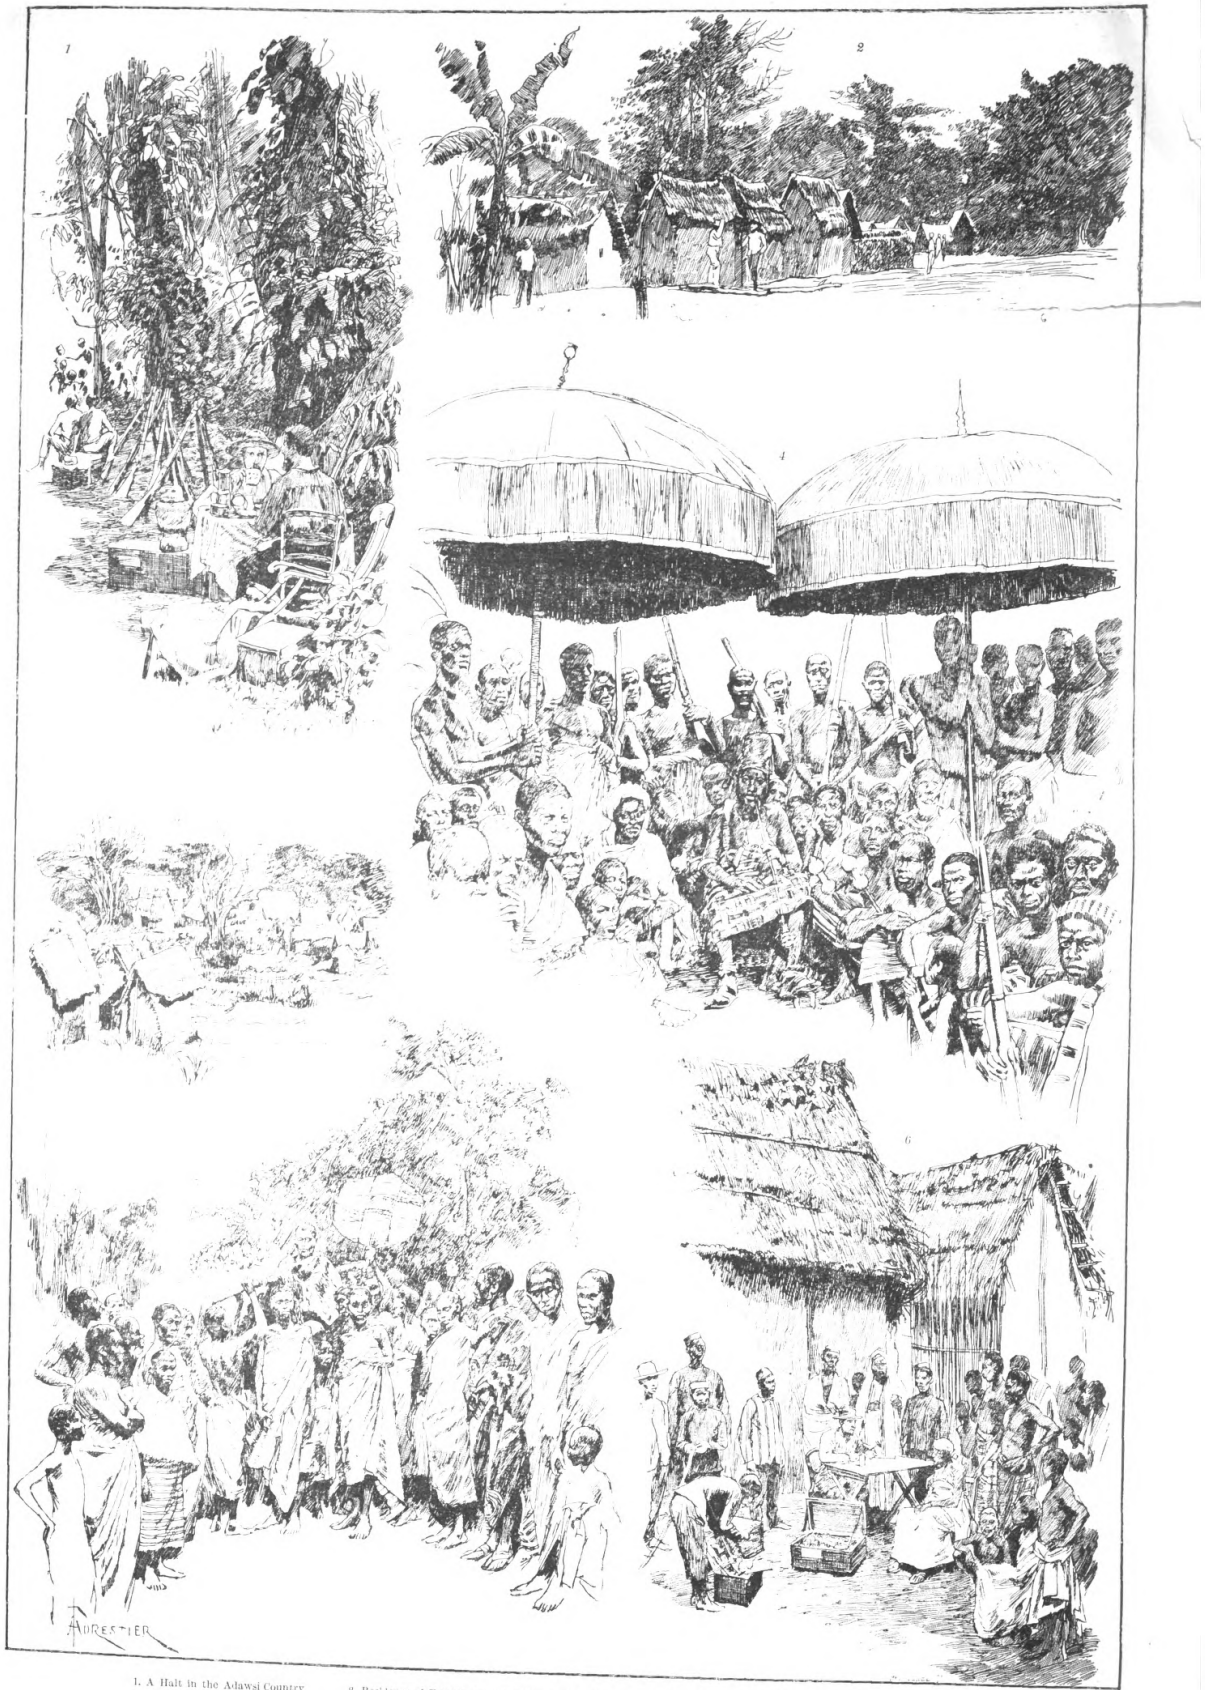
A deputation representing newspaper proprietors and journalists waited upon the First Lord of the Treasury on Dec. 8, at the House of Commons with reference to the Libel Law Amendment Bill now on the Order Book of the House of Commons for consideration of the Lords' amendments. In reply to the earnest hope expressed by the deputation that an opportunity might be afforded for its being passed during the Session, Mr. Smith said he would use every effort to secure this result.

THE MISSION TO THE ASHANTEES.

None of those who were among our readers fifteen years ago can have forgotten the British military expedition sent, under the command of Sir Garnet Wolseley, to punish the cruel King Coffee Calcalli for his insolent invasion of the Fantee protected territory behind Cape Coast Castle. The prompt and orderly march of a large body of our troops, for two hundred miles inland, through a dense tropical jungle and troublesome marshes, fighting several battles against a numerous host of warlike foes; the burning of Coomassie, which is the capital of the Ashantee Kingdom; and the submission of its savage monarch to the prescribed terms of peace, were fully related not only in the pages of this Journal, but also in a separate Illustrated *History*; and our Special Artist, Mr. Melton Prior, began his services as a War Correspondent by furnishing admirable Sketches of that campaign. King Coffee Calcalli was not deposed, but lived and reigned, we hope less unmercifully than before, until a recent date; when the Royal Stool or Throne, left vacant by his death, was disputed in a fierce civil war between two rival factions. His Majesty had no son to inherit it; and his sister, Princess Yawa-Kiah, who is married or a widow having three daughters, could not reign on account of the Salic law. We know little of Ashantee politics, and will not attempt even to state the names and titles of the opposing claimants; but the Kingdom is rather a sort of Empire including several tributary nations, the Adawsi, the Bekwai, the Kokofus, and others, whose chiefs took different sides, and there was a great deal of sanguinary fighting, by which the forest-country for a distance of seventy miles, from the Prah river to the Bekwai, was continually overrun, and every native village was utterly destroyed, not one habitation being left standing. Thousands of people must have perished, and it seemed right to the British Government of Cape Coast Castle, when the mutual rage of the contending parties was exhausted, to offer a friendly mediation, recognising the head of the victorious league as the necessary King, and interceding for clemency to the vanquished, while taking pledges for his peaceable behaviour towards the subjects of our protectorate. For this purpose, and to witness the ceremonial enthronement of his Majesty, the late Captain Lonsdale, C.M.G., with Captain Barnett, of the Gold Coast Constabulary as second Commissioner, was sent to Coomassie, and advanced to the village of Adwabin, fourteen miles south of that city, within easy reach of the camps of the two rival parties. Here the Mission was delayed seven months, occupied in difficult negotiations and watching the progress of events; but Captain Lonsdale fell ill, and Captain Barnett succeeded him in the command of the expedition and in the business to be transacted. The native chiefs having at length agreed to a settlement, invited Captain Barnett to proceed to Coomassie; and the medical officer who accompanied this Mission—namely, Dr. F. Sullivan, M.D., Assistant Colonial Surgeon of the Gold Coast Colony—took a series of photographs of the town, the King's palace, and the most important Ashantee personages, which we are permitted to copy in our Engravings. Dr. Sullivan, while at Coomassie, opened a charitable hospital for the relief of native sick patients, and was called "Amagashi Bruni," the White Medicine-man, by the grateful Ashantee people. Much credit is due to Captain Barnett for the satisfactory result of the Mission. In one of our Illustrations, Princess Yawa-Kiah and her daughters are making "a morning call" on the Commissioner; in another, his visitor is the noble Chief Bantama Awuah, General of the Ashantee army.

MR. ANDREW LANG ON FOLK-LORE.

At the annual meeting of the Folk-Lore Society, held on Dec. 6 in the rooms of the Royal Asiatic Society, in Albemarle-street, Mr. Andrew Lang was installed as president in succession to the Earl of Strafford, who has resigned.



In his opening address Mr. Lang congratulated the members upon the work already achieved by the society, particularly mentioning the publication of Signor Comparetti's "Book of Sindibad" and Mr. Nutt's "Legend of the Holy Grail," the latter of which, he said, enabled us to answer, so far as it can be answered, the question which we have asked ourselves ever since we read Malory in our early days—namely, whence come the things which are there narrated.

The subject of folk-lore was a vast one, and the more he thought upon it, the more it puzzled him. A plea had been made in favour of treating it as a science, but directly they treated it as a science they trenched upon the ground of other societies. For instance, one branch of study which might be pursued came strictly within the province of the Psychical Research Society, and that was the comparison of ordinary ghost stories, such as one might hear told at Christmas-time, with the ghost stories in the records of the past. He himself had once gone into the subject of the Beresford ghost story, which had been adapted by Sir Walter Scott in ballad form, and he had traced it back through a number of mediæval sermons to William of Malmesbury. From this he inferred either that ghosts had certain fixed habits, or that old stories were adapted with trifling alterations.

This led him to the subject of the tendency of the human mind to invent the same stories, and the question how far such stories were invented separately, and how far they were transmitted and handed down from a common centre. Thus, he had ascertained from a friend of his who had lived in New Caledonia that the Kanukas had a story of a lady of the woods to see whom was a presage of death; and precisely the same legend was to be found in the ballad of "The Sieur de Nan," translated from a Breton original by Mr. Tom Taylor.

Among other subjects was that of popular etymologies. The theory of the philologists was that expressions arose of which the meaning was forgotten, but that they remained in the language, and in consequence people invented stories to account for them. There was the modern slang expression "oof-bird," for instance. He understood that it referred in some way to the accumulation of wealth. It might be argued that "oof" was a corruption of the French "œuf," an egg, and that reference was made to the goose with the golden eggs. Was it likely that men would go on talking of the "oof-bird" after the meaning of the expression was forgotten?

He suggested as a possible definition of folk-lore that it was a small department or branch of the science of anthropology. In one sense, it might be said that folk-lore was at an end. The origin of most customs and superstitions could be readily accounted for. Thus, the superstition about thirteen persons sitting down to table referred to the Lord's Supper; and Friday was held to be unlucky because that was the day on which Our Lord was crucified. On the other hand, when they came to think of the difficulties of transmission of the popular tales or *Märchen* of the world, many of which existed in practically the same form among all races of mankind, they might say that they were only at the beginning of the subject. An object to which they might usefully devote themselves was the collection of the folk stories of Great Britain. This would enable them to determine whether there were not more than three belonging specially to this country—namely, Tom Hickathrift, Jack the Giant-Killer, and Jack and the Beanstalk.

1. A Halt in the Adawsi Country. 2. Residence of English Commissioners at Adwabin. 3. Part of Coomassie as it now is.
4. A Morning Call. 5. A Royal Princess and her Party. 6. Medical Officer of the Mission Treating the Sick at Coomassie.

THE MISSION TO THE ASHANTEE KINGDOM.

FOR FAITH AND FREEDOM.*

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIBEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER XLVI.

A PERILOUS VOYAGE.

this way, unexpected and tragical, arrived our chance of escape. We walked to Carlisle Bay by way of the sea-shore, so that we might be met by none, and in order that the bloodhounds (if they should use them) in the morning might be thrown off the track. On the march that stout and lusty wench who carried one end of the bed neither called for a halt nor complained of the burden she carried all the way. It was nigh unto midnight when we arrived at the creek in which the boat lay sunk. This was within a stone's throw of John Nuthall's cottage, where were bestowed the mast, sails, oars, and gear, with such provisions as he had gotten together for the voyage. The man was sleeping when Barnaby called him, but he quickly got up, and in less than an hour we had the boat hauled out of the water, the provisions hastily thrown in, the mast stepped, our sick man and the two women placed in the bows, the stern and middle of the boat being encumbered with our provisions, we had pushed down the muddy and stinking creek, we had hoisted sail, and we were stealing silently out of Carlisle Bay under a light breeze. Three or four ships were lying in the bay; but either there was no watch kept aboard or it was no one's business to hail a small sailing-boat going out, probably for fishing at dawn. Besides, the night was so dark that we may very well have escaped notice. However that might be, in a quarter of an hour we were well out at sea, beyond the reach of the guns of Carlisle Bay, no longer visible to the ships in port, and without any fear of being seen until daybreak. And, happily, the wind, which sometimes drops altogether in the night, still continued favourable, though very light.

"My lads," said Barnaby presently, drawing a long breath, "I verily believe that we have given them the slip this time. In the morning they will go forth, an they please, with their bloodhounds to hunt for us. Madam's eyes mean hanging. Well, let them hunt. If any inquiry is made for us at the Bridge, no boat will be missing, and so no suspicion will be awakened. They will, I suppose, search for us among the caves and ravines of which I have heard, where there are hiding-places, to be sure, in plenty, but no water to drink, so that the poor devils who run away and seek a refuge there are speedily forced to come out for water, and so are caught or shot down. Well, they will hunt there a long time before they find us. This boat makes a little water, but I think not much. If she proves water-tight, and the breeze holds, by daylight we should be well to the south of the island. Courage, therefore! All will be well yet! How goes Robin?"

He was lying as easily as we could manage for him—one rug over him and another under him. Alice sat on one side of him, and the woman Deb on the other. Then, because the boat was heavy in the bows, and sometimes shipped a little water when she dipped in the waves, Barnaby rigged up a tarpaulin to prevent this; and (but this was not till next day) over the tarpaulin he made out of a rug and an oar a low tilt which, unless the weather grew bad, might shelter those three by night from dew and spray, and by day from the sun overhead and the glare and heat of the water.

"Deb," he said presently, softly, "art afraid?"

"No, Sir—not while my mistress is here." (She meant Alice.)

"If we are taken, Deb, we shall all be flogged wellnigh unto death, and very likely hanged as well. Remember that."

"I am not afraid, Sir."

"And we may spring a leak," said Barnaby, "and so go all to the bottom and be devoured. Art not afraid to die?"

"No, Sir—not if I may hold my mistress by the hand so that she may take me whither she goeth herself."

"Good," said Barnaby. "As for me, I expect I shall have to go alone, or take hands with John Nuthall here. Well, there will be a round half-dozen of us. Go to sleep, my girl! In the morning we will serve round the first ration, with, perhaps, if all be well, a dram of cordial."

In the dim light of the stars I watched all night the three figures in the bow. Robin lay white and motionless; Alice sat, covered with her hood, bending over him; and Deb, from whose head her coif had fallen, lay, head on arm, sound asleep. She had no fear, any more than a common soldier has when he goes into action, because he trusts his Captain.

Thus began our voyage: in an open boat, twenty feet long, with a company of three sound men, two women, and a sick man. For arms, in case we needed them, we had none at all. If any ship crossed our track and should call upon us to surrender we could not deny that we were escaped convicts, because the dress of all but one proclaimed the fact. Who, in such a climate, would choose to wear a coarse shirt and canvas breeches, with a Monmouth cap, except it was a servant or a slave who had no choice, but must take what is given him?

But we would not surrender, come what might. If we could neither fight nor fly, we could sink. Sail Barnaby in the dead of night, whispering in my ear. "Lad, 'tis agreed between us; we will have that clear: sooner than be taken we will scuttle the ship, and so sink all together. If 'tis accounted murder, let the blame lie between us two."

A little before daybreak the breeze freshened, and the waves began to rise; but not so high as to threaten the boat, which proved, indeed, a most gallant little craft, dancing over the waters as if she enjoyed being driven by the breeze. Some boats, as sailors will tell you (being always apt to compare their craft with living creatures) come thus, frolic and sprightly, from their makers' hands; while others, built of the same material and on the same lines, are, on the contrary, and do always remain, heavy and lumpish; just as some children are lively and gay, while others, born of the same parents, are dull and morose.

Then the sun rose, seeming to leap out of the water, a most glorious ball of fire, which instantly warmed the cool air and began to burn and scorch our hands and faces. In these hot latitudes, one understands what the ancients meant when they spoke with dread and awe of the Sun-God, who both gives and destroys life, and is so beneficial and yet so terrible. We, who live in a cold country, are sometimes greatly comforted by the sun, but are never burned; we feel his warmth, but understand not his power.

Then Barnaby began to gaze curiously all round the horizon. We had no glass or telescope; but his eyes were to him as good as any telescope is to most men.

"Thank the Lord!" he said, drawing breath (it was rare, indeed, for Barnaby thus openly to give praise), "there is no sail in sight. To be sure we have the day before us. But yet"—— Here he began to talk, as some men use when they desire to place before their own minds, clearly, the position of affairs. "Very well, then—Barbados laying now thirty miles and more nor'-east by north—vessels bound for the island from Bristol commonly sailing round the north—very well, then—we are well out of their track. Yet—there again—some are driven south by stress of weather. Ay, there is our danger. Yet again, if a vessel should see us, would she bear down upon us? I greatly doubt it. Why should she? The wind will continue—that is pretty sure. If they were to discover that we had gone off by boat, would they sail after us? Why—whom could they send? And whither would they steer? And what boat have they which would overtake this little craft with twelve hours' start? Humphrey, lad"—he turned upon me his broad and sunburnt face, full of cheerfulness—"we are not within many hours of scuttling yet. Heart up, then! A tight boat, a fair wind, a smooth sea—let us hope for the best! How goes Robin?"

There was no change in Robin, either for better or for worse.

"Sis," said Barnaby; "art sleeping still, Sis? Wake up, and let us eat and drink, and be jolly! What! Alice, I say! Why—we have escaped! We have escaped the cursed plantation! We are far away at sea! Let us laugh and sing. If there were room in this cockle, I would dance also!"

She lifted her head, and threw back her hood. Ah! what a mournful face was there!

"Brother!" she said reproachfully, "canst thou, after what has happened, laugh and sing? Hast thou forgotten last night?"

"Why, no," he replied. "One must not forget last night, because it was the night of our escape. All else, I own, I can forget. Let it not stick in thy gizzard, my dear, that man frightened thee. Rejoice rather that the villain thus afforded me a chance of giving him a taste of his own cold iron. Now he lieth low, with little taste for kisses, I take it."

"Nay, Brother," she said, shaking her head. Then she looked round her. "We are a long way from the land," she said. "When will they send out a ship to bring us back?"

"Why, d' ye see," Barnaby replied, "give us twelve hours more, and they may send out all their fleet, if they have one, and sail the wide world round for us, and yet not capture us. And now let us overhaul the provisions, and examine the ship's stores." Alice pulled her hood down again, and said no more. The woman Deb was now wide awake, and staring about her with a show of the greatest satisfaction.

"Come, John Nuthall," Barnaby went on, "we are hungry and thirsty. Where is the list I made for thee? Thou art our purser, our supercargo, our cook, and our steward; thou art also our boy's-n and carpenter, and half the crew. Where is my list, I say? Give it me, and we will overhaul the stores. Look up, Sis; never cry over what is done and over. What? A villain hath received a lesson which will serve for many other villains, and thou hangest thy head, therefore? Look up, I say. There is now hope for all. Look up, my dear, and laugh. What? Thou shalt merrily dance at my wedding yet."

Then he read the list and examined each parcel with great care.

"A hundred and a half of bread, a soft cheese, a bunch of plantains, a keg of water (nine gallons), six bottles of Canary (not one broken), a compass, a half-hour glass, a spare rug ('tis over Robin's legs), flint and steel, a handy bit of tarpaulin, a hatchet and hammer, a saw, some nails, a spare oar or two, a coil of rope and yarn, a lump of tobacco (we can chew it, though I would rather put it into a pipe), a lanthorn, candles—faugh! they are run together in a lump; well, they will serve to caulk the bottom presently."

We had, in fact, no light during our voyage, but the tallow proved useful when—I think it was the next day—the boat started a leak.

This was all our store. 'Twas not much for six people, but Barnaby hoped that the voyage would be short. If he should be disappointed, who would not put up with short rations for a day or two for the sake of freedom?

"And now," he said, when everything was stowed according to his mind, "we will have breakfast. Our provisions are no great things; but, after the accursed lob-lollie, a bit of bread and cheese will be a feast."

A feast indeed it was, and our Captain gratified us further by opening a flask of canary, which raised all our hearts. Strange, that men should be able to recover their spirits, which should be independent of bodily comforts, by a dram of wine. As for Barnaby, I thought he would have kissed the bottle, so tenderly did he hold it and so affectionately did he regard it.

"It is now three months and more," he said, "that we have had nothing save, now and then, a sup of kill-devil fresh from the still, and now we are mercifully permitted to taste again a glass of canary. 'Tis too much!" he sighed, drinking his ration drop by drop. "Well, we have but a few bottles, and the voyage may be longer than we hope; therefore we must go upon short allowance. But fear not, Sis; there shall always be enough for Robin, poor lad."

He then proceeded to tell us what he intended, and whither he would steer.

"We have no chart," he said. "What then? I can draw one as good as they are made to steer by in these seas." He could not draw one, because he had no paper or pencil; but he carved one with the point of his knife on the seat, and marked out our course upon it day by day. "See," he said: "here is Barbados. Very well then. Our course all night hath been sou'-west. She now makes about five knots an hour. It is now eight, I take it; and we must therefore be about forty miles from Barbados. To-morrow morning we should make the Grenadilloes, which are a hundred and fifty miles from Carlisle Bay. Hark ye! Here is our danger. For there may be a Bristol vessel sailing from Great Grenada to Barbados, or the other way. That would be the Devil. But such ships are rare, for there is no trade that I know of, between the two islands. Well, we will give Grenada as wide a berth as may be." Here he considered a little. "Therefore, 't will be our wiser plan to bear more to the south. Once south of Grenada, I take it, there will be no more danger at all. Off the main of South America, the sea is covered with islands. They are No-Man's Land: inhabitants have they none: navigators, for the most part, know them not: English, French, and Spanish ships come never to these islands. My purpose, therefore, is to put in at Great Margaritos or Tortuga for rest and fresh water, and so presently hoist sail again and make for the Dutch island of Curaçao."

"And after that?"

"There, my lad, we shall take ship to some country where a Protestant sailor may get a berth and a physician may find patients. It must be to Holland first; but, never fear, we shall get back to England some time. Our turn will come; and perhaps we will fight another battle with his Papistical Majesty, and find a different tale to tell afterwards."

As the day advanced, the coast of Barbados continually receded, until, before sunset, the island lay like a purple cloud low down in the horizon. The north-east breeze blew steadily, but the sun caused a most dreadful heat in the air, and our cheeks burned and our eyes smarted from the glare of the water and the spray that was blown upon us. It was at this time that Barnaby constructed the tilt of which I have spoken. The sea lay spread out round us in a broad circle, of which our boat was the centre, and the cloudless blue sky lay over us like unto a roof laid there for us alone. It is only in a ship one doth feel thus alone, in the centre of creation: even as if there were nothing but the sea around, the sky above, and our boat in the centre. Thus must the Patriarch Noah have felt when his ark floated upon the vast face of the water, and even the tops of the high hills were hidden and covered over. All day long Barnaby scanned the horizon anxiously; but there came into sight no sail or ship whatever. To us, who sometimes see the vessels lying in a crowded port, and hear how they bring argosies from every land, it seems as if every part of the ocean must be covered with sails driving before the wind from whatever quarter it may blow. But he who considers the "Mappa Mundi" will presently discover that there are scattered about vast expanses of sea where never a sail is seen, unless it be the fugitive sail of the pirate or the bark canoe of the native. These are the seas outside the lines of trade. We were now nearing such a lonely sea or part of the ocean. Barnaby knew, what the planters did not, how to steer across the unknown water to a port of safety beyond.

At mid-day our Captain served out another drink of water, with a plantain, and to Robin I gave a sop of bread in canary, which he seemed, to my surprise, to suck up and to swallow with readiness.

In such a voyage, where there is nothing to do but to keep the ship on her course and to watch the horizon for a strange sail, one speedily falls into silence, and sits many hours without speech; sometimes falling asleep, lulled by the ripple of the water as the boat flies through it.

I have said nothing about the man, John Nuthall. He was a plain, honest-looking man, and we found him throughout all this business faithful, brave, and patient, obedient to Barnaby, and of an even temper and contented with his share. That he had formerly been a thief in his native country cannot be denied, but I hope that we shall not deny to any man the power and possibility of repentance.

Barnaby divided the crew—namely, himself, John Nuthall, and me—into three watches of eight hours each, of which each man kept two at a stretch. Thus, beginning the day at noon, which was the only time we knew for certain, Barnaby would himself (but this was after the first two days) lie down in the bottom of the boat and sleep till sunset or a little later. Then John Nuthall lay down and took his turn of sleep till Barnaby thought it was four o'clock in the morning (but he reckoned, sailor fashion, by bells), when he woke him and I took his place and fell asleep. But for the first day or two, Barnaby slept not at all, and the whole of the voyage he slept as a good watch-dog sleeps, namely, with one eye always open.

At sunset he gave out another pannikin of cold water to each of us, a ration of bread and cheese, and a dram of wine. Then he commanded John Nuthall to lie down and sleep, while I took the tiller and he himself held the ropes. Then the night fell once more upon us.

Presently, while we sat there in darkness and in silence, Alice rose up from her seat, and came aft and sat down beside me. John Nuthall lay sleeping at our feet; Barnaby held the ropes, and I was at the helm.

"Humphrey," she whispered, "think you that he is truly dead?" She was speaking, not of Robin, but of the Master.

"I know not, my dear."

"I can think of nothing but of that man's sudden end, and of what may happen to us. Say something to comfort me, Humphrey! While we were on the estate you always had some good word to say, like manna for refreshment. Say something now. My soul is low in the dust—I cannot even pray."

"Why, my dear?" What could I say? "'Tis true that the man was struck down, and that suddenly. And yet"——

"Alas! to think that my own brother—that Barnaby—should have killed him!"

"As for that," said Barnaby, astonished, "if someone had to kill him, why not I as well as another? What odds who killed him?"

"Oh!" she said, "that a man should be called away at such a moment, when his brain was reeling with wine and wicked thoughts!"

"He was not dead," I told her (though I knew very well what must have been the end), "when we came away. Many a man recovers who hath had a sword-thrust through the body. He may now be on the mend—who can tell?" Yet I knew, I say, very well, how it must have ended. "Consider, my dear: this poor wretch tempted the wrath of God, if any man ever did. If he is destroyed, on his own head be it—not on ours. And if he should recover, he will have had a lesson which will serve him for the rest of his life. Whether he recover or no, he may have had time left him for something of repentance and of prayer. Why, Alice, if we get safely to our port we ought to consider the punishment of this sinner (which was in self-defence, as one may most truly say) the very means granted by Providence for our own escape. How else should we have got away? How else should we have resolved to venture all, even to carrying Robin with us?" All this, I repeat, I said in order to encourage her, because, if I know aught of wounds, a man bleeding inwardly of a sword-thrust through his vitals would have short time for the collecting of his thoughts or the repentance of his sins, being as truly cut off in the midst of them as if he had been struck down by a thunderbolt. A man may groan and writhe awhile under the dreadful torture of such a wound, but there is little room left him for meditation or for repentance.

Then I asked her if, haply, she was in any fear as to the event of the voyage.

"I fear nothing," she told me, "except to be captured and taken back to the place whence we came, there to be put in prison and flogged. That is my only fear. Humphrey, we have suffered so much already that this last shame would be too great for me to bear. Oh! to be tied up before all the men, and flogged like the black women—'t would, indeed, kill me, Humphrey!"

"Alice," I said very earnestly, "art thou brave enough to endure death itself rather than this last barbarity?"

"Oh! Death!—death!" she cried, clasping her hands. "What is death to me, who have lost everything?"

"Nay, but consider, my dear. To die at sea—it means to sink down under the cold water out of the light of day; to be choked for want of air; perhaps to be devoured quick by sharks; to lie at the bottom of the water, the seaweed growing over your bones; to be rolled about by the troubled waves"——

"Humphrey, these are old wives' tales. Why, if it had

Barnaby rigged up a tarpaulin; over this he made, out of a rug and a spare spar, a low tilt.

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

been lawful I would have killed myself long ago. But I must not lose heaven as well as earth. A brief pang it is to die, and then to be happy for ever. What do I care whether the seaweed covers my bones or the cold clay? Oh! Humphrey, Humphrey, why should I care any longer to live?"

"My dear," I said, "if we escape in safety there may yet be happiness in store. No man knoweth the future." She shook her head. "Happiness," I told her, "doth not commonly come to man in the way which he most desires and prays. For if he obtain the thing for which he hath so ardently prayed, he presently finds that the thing bringeth not the joy he so much expected. Or it comes too late, as is the case often with honours and wealth, when one foot is already in the grave. I mean, my dear, that we must not despair because the thing which most we desire is taken from us. Perhaps we ought not to desire anything at all, except what the Lord shall provide. But that is a hard saying, and if men desired nothing it is certain that they would no longer work for anything." I talked thus at length to divert her mind from her troubles. "To thee, poor child," I said, "have been given afflictions many and great—the loss of godly parents, the imposition of a husband whom thou must avoid, and the deprivation of earthly love. Yet since thou art so brave, Alice, I will tell thee—I thought not, indeed, to tell thee anything of this"——

"What, Humphrey? What?"

"Briefly, then, Alice. Know that, whatever happens, thou shalt not be taken alive."

"How? unless you kill me?"

"We are resolved, my dear—Barnaby and I—that if we cannot escape any vessels which may pursue us, the boat shall be sunk, and so we shall all drown together. Indeed, Alice, I confess that I am not myself so much in love with life as to return to that captivity and intolerable oppression from which we have gotten away. Therefore, be assured, we will all drown rather than be taken and go back."

"Oh!" she sighed, but with relief, "now shall I fear nothing. I have not lost everything, since I have thee still—and Barnaby. Alas! my head has been so full of what Madam said—that we should be certainly caught, and all of us flogged. To be flogged! Who would not rather die?" she shivered and trembled. "To be flogged!—Humphrey, I could not bear the shame!" She trembled and shivered at the very thought.

"Fear not, my dear," I said; "thou knowest, now, that we on the boat love thee too well to suffer that extreme of barbarity. Put that fear out of thy mind. Think only that we may have to die, but that we shall not be taken. To die, indeed, will very likely be our fate: for we have but a quarter of an inch of frail wood between us and the sea. If a storm should arise, we fill with water and go down, if the wind should drop, we are becalmed, and so perish miserably of hunger and thirst, if Barnaby steer not aright"——

"Humphrey," said Barnaby, "fill not her foolish and ignorant head with rubbish. 'Tis not the time of tornadoes, and there will be no storm. The wind at this season never drops, therefore we shall not lie becalmed. And as for my steering aright, why—am I a lubber?"

"Brother," she said, "if I am not to be flogged, the rest concerns me little. Let us say no more about it. I am now easy in my mind. Robin sleeps, Humphrey. He hath slept since the sun went down, and this afternoon he looked as if he knew me. Also, he took the bread sopped in Canary eagerly, as if he relished it."

"These seas," said Barnaby, "are full of sharks."

I knew not what he meant, because we were speaking of Robin.

"Sharks have got sense, as well as sailors," he went on.

Still, I understood him not.

"When a man on board a ship is going to die, the sharks find it out and they follow that ship until he does die and is flung overboard. Then they devour his body and go away, unless there is more to follow. I have looked for sharks, and there are none following the boat; wherefore, though I am not a doctor, I am sure that Robin will not die."

"I know not at all," I said, "how that may be. There are many things believed by sailors which are superstitions—fond beliefs nourished by the continual presence of perils. On the other hand, the senses of man are notoriously as far below those of creatures as their intellects are above them (yet a skilful man may read the premonition of death in a sick man's face). Therefore I know not but that a shark may have a sense like unto the eye of a hawk or the scent of a hound, with which to sniff the approach of death afar off. Let us comfort ourselves, Alice, with Barnaby's assurance."

"'Tis a well-proved and tried thing," said Barnaby; "and sailors, let me tell thee, Master Doctor, have no superstitions or idle beliefs."

"Well, that may be. As to Robin's disease, I can pronounce nothing upon it. Nay, had I the whole library of Padua to consult I could learn nothing that would help me. First, the mind falls into a languishing and spiritless condition. That, I apprehend, causeth the body to lie open to attacks of any disease which may be threatening. Then, the body, being ill at ease, works upon the mind, and causes it to wander beyond control. So that the soul, which is bound up with body and mind, cannot show herself or manifest her will. It is the will which shows the presence of the soul: the will which governs body and mind alike. But if I know aught of disease, if a change comes upon Robin it will either swiftly cure or swiftly kill."

"Humphrey," she whispered, "if he recover, how shall I meet his face? How shall I reply when he asks me concerning my promise and my vows to him?"

"My dear, he knows all. 'T was that knowledge, the pity of it, and the madness of it—believe me—which threw him into so low a condition."

"I have looked daily for reproaches in thy kind eyes, Humphrey. I have found none, truly. But from Robin—oh! I dare not think of meeting those eyes of his."

"Reproach thee will he never, Alice. Sorrow and love, I doubt not, will lie in his eyes all his life. What thou hast done was for him and for thy father and thy brother and for all of us. But, oh! the pity—and the villainy! Fear not to meet the poor lad's eyes, Alice."

"I long to see the light of reason in those dear eyes—and yet I fear. Humphrey, I am married; but against my will. I am a wife, and yet no wife; I am resolved that, come what may, I will never, never go to my husband. And I love my Robin still—oh!" she sobbed, "I love my Robin still!"

"If we die," I told her, "you shall go down with your arm round his neck, and so you shall die together."

Then we sat silent a while.

"My dear," I said, "lie down and take some sleep."

"I cannot sleep, Humphrey, for the peace of mind which hath fallen upon me. If Robin now come to his senses again I shall not fear him. And the night, it is so peaceful—so cool and so peaceful"—the wind had now dropped, till there was barely enough to fill the sail, and only enough way on the boat to make a soft murmur of the water along her sides. "The sea is so smooth; the sky is so bright and so full of stars. Can there be, anywhere, a peace like this? Alas! if we could sail still upon a silent and peaceful ocean! But we must land somewhere. There will be men, and where there are men there is wickedness, with drink and wrath and evil passions—such as we have left behind us. Humphrey—oh! my brother Humphrey!—it would be sweet if the boat could sink beneath us now, and so, with Robin's hand in mine, we could all go together to the happy land, where there is neither marrying nor giving in marriage."

From beneath the tilt there came a voice—I verily believe it was an answer sent straight from heaven to comfort this poor faithful soul. "Alice"—it was the voice of Robin, in his right mind at last. "Alice," he said, "we will continue to love each other, yet without sin."

"Oh, Robin! Robin!" she moved quickly to his side and fell upon her knees. "Robin, thou wilt recover!"

"Stay," I interposed. "Robin will first have a cup of cordial."

"I have been sleeping," he said: "I know not what hath happened. We are in a boat, it seems, and on the open sea! Unless I am still dreaming, we are slaves to a planter in Barbados! And this is Alice—who was in England! and I know not what it means!"

"You have been ill, Robin," I told him. "You have been nigh unto death. Many things have happened of which we will speak, but not now. Alice is at your side, and Barnaby is navigating the boat. Drink this cup of wine—so—sleep now; and in the morning, if it please Heaven, you shall be so strong that you shall hear everything. Ask no more questions, but sleep. Give him your hand, Alice."

She obeyed me, sitting at his side and taking his hand in hers, and so continued for the rest of the night, Robin sleeping peacefully.

In a word, he was restored. The fresh sea-breeze had brought him back to life and reason; and though he was still weak, he was now as sound in his mind as any man could desire to be. And in the morning we told him all that had been done, whereat he marvelled.

Alice might love him still. That was most true, yet between them stood a man, and he was a barrier which could not be removed. So Robin could not wed the girl he loved. Why, there was another man in the boat who also loved a girl he could never wed. His passion, I swear, was full of constancy, tenderness, and patience. Would Robin be as patient?

When the day broke again we were still sailing over a lonely sea with never a sail in sight, and never a sign of land.

But now Robin was sitting up under the tilt, his face pale and his cheek wasted. But the light of reason was in his eyes, and on his lips such a smile of tenderness as we were wont to see there in the days of old.

"Said I not," cried Barnaby, "that he would recover? Trust the sharks for common-sense. And again an open sea, with never a sail in sight. Praise the Lord, therefor!"

But Alice, when the sun rose above the waves, threw back her hood and burst forth into joyous singing:—

O Lord, how glorious is thy grace,
And wondrous large thy Love!
At such a dreadful time and place,
To such as faithful prove.

The tears came into my eyes only to see the change that had fallen upon her gracious, smiling countenance. It was not, truly, the sweet and happy face that we remembered before her troubles fell upon her, but that face somewhat older, and graver with the knowledge of evil and of pain. And it was like unto such a face as I have seen painted on many an altar-piece in Italy, the face of some sweet woman, a saint glorified with gratitude and love.

Then the woman Deb fell to weeping and blubbering for very joy that her mistress looked happy again. 'Twas a faithful loving creature.

"Humphrey," said Alice, "forgive me that I murmured. Things that are done cannot be undone. Robin is restored to us. With three such brothers, who would not be content to live? I hope, now, that we shall get safely to our port; but if we die, we shall die contented, in each other's arms. Going through the Vale of Misery," she added softly, "we will use it as a well."

(To be continued.)

NEW TALE BY MR. RIDER HAGGARD.

The first Instalment of a New Serial Story, of absorbing interest, entitled CLEOPATRA *(being an Account of the Fall and Vengeance of Harmachis, the Royal Egyptian, as set forth by his own hand), written by* H. RIDER HAGGARD *expressly for this Paper, and Illustrated by* R. CATON WOODVILLE, *will be given in the Number for Jan. 5, 1889, beginning a New Volume.*

Entitled "RED RIDING HOOD."

Painted by G. HILLYARD SWINSTEAD, and accepted for Exhibition by the Royal Academy.

ONE SHILLING; Inland Parcel Post, Threepence

INGRAM BROTHERS, 198, STRAND, W.C., LONDON.

MUSICAL PUBLICATIONS.

The shilling series of "Burlington Music-Books," published by Messrs. R. Cocks and Co., is being carried on with continuous interest. A recent number consists of "Dance Album," comprising spirited pieces in the styles of waltz, quadrille, polka, schottische, and mazurka. Another issue consists of "Popular Songs," among which are compositions by Gounod, Sterndale Bennett, Blumenthal, &c. Messrs. Cocks and Co.'s recent vocal publications include some pleasing songs; among them being "King Weathercock," by J. L. Roeckel, a simple but pretty melody; "None know how I love thee!" by Tito Mattei, the eminent pianist, who has recently taken a prominent place as a composer of successful songs, among which that now specified deserves to rank.

The Christmas number of Chappell's *Musical Magazine* contains a very liberal shilling's-worth of sprightly dance music of various forms and by well-known hands. Waltzes and quadrilles based on themes from the popular opera "Dorothy," adapted by P. Bucalossi; pieces bearing the same name and dances by D. Godfrey, C. D'Albert, and others, make up a collection that will be serviceable and welcome in numerous circles.

"Ma Bella Napoli" is the title of a vocal duet, being an arrangement, by Mrs. Harvey (of Ickwell-Bury), of a Neapolitan melody—with Italian words. The music of the voice part has the soft melodious flow of the genuine Italian style, and it is associated with an appropriate and effective pianoforte accompaniment. Messrs. J. B. Cramer and Co. are the publishers.

"The Auld Scotch Sangs" is the title of a volume containing a collection of national airs (with their text) arranged and harmonised by Sinclair Dunn, who has judiciously selected those which have been most popular with the public during the present century. Some of the pieces have been arranged as duets for medium voices; and a list of contents is supplemented by a glossary of Scotticisms which will be acceptable to many. Messrs. Morrison Brothers, of Glasgow, are the publishers.

"The Tribute of the Flowers" is the title of a cantata for two solo voices (soprano and tenor), chorus, and orchestra. The text is by Nita Guzman. The music, which is by Claude Duprè, is bright and tuneful; and the cantata in its published shape—that is, with the orchestral score adapted for the pianoforte—is well calculated for amateur performance in the drawing-room. Messrs. Hutchings and Romer are the publishers; as also of the following songs, which may all be commended for their agreeable melodiousness and freedom from executive difficulty:—"In Paradise" (with the addition of an ad libitum violin accompaniment), by Odoardo Barry; "Stars love the night," by Tito Mattei; "Good-bye; but come again," by Carl Engel; "Yes, please!" (canzonet), by Ciro Pinsuti; and "Consider the lilies" (a beautiful sacred song, arranged from "Le Calme"), by Gounod.

"The Bells of Elsinore," is the title of a cantata for ladies' voices, written by Edward Oxenford and composed by Edmund Rogers (published by Messrs. Forsyth Brothers). The music comprises twelve numbers, including some two-part choruses, and several pieces for solo voices. They are written in a bright melodious style, free from difficulty, and are well adapted for drawing-room performance.

"A Wild Night" is the title of a song of a declamatory kind, the agitated sentiment of which is enhanced by occasional passages of dramatic force in the accompaniment. In "The Parting Hour" some sentimental lines by Clement Scott have been well set by Ernest Birch, who has allied a very expressive melody to an appropriate but not obtrusive accompaniment. Both the songs just named are published by Messrs. J. and J. Hopkinson, as is an effective song entitled "Peace and War," the words and music of which, by Michael Watson, comprise some good suggestive contrasts. Messrs. Hopkinson are continuing their very cheap "Grosvenor Series of Part Songs," the contents of which are of a varied and attractive nature.

"Twenty-five Progressive Studies for the Pianoforte," by Georges Pfeiffer, are exercises, composed by a distinguished Professor, intended as introductory to Clementi's "Gradus ad Parnassum" and Bach's Preludes and Fugues; the pieces by M. Pfeiffer (classed as his Opus 108) being supplemental to his Studies (Op. 70). The pieces now specially referred to (Op. 108) are admirably suited for their intended purpose. Many of the varied forms of pianoforte passages are illustrated by examples, the practice of which cannot fail to lead to the pupil's improvement; indeed, the studies include much modern mechanism that is in advance of the style of the masters to whom they are intended as introductory. Among the studies of M. Pfeiffer are two of especial value—one in clear illustration of the now obsolete embellishments indicated, by abbreviated signs, in the music of the old masters; the other, an exercise for the left hand only. The studies are published by Mr. Ashdown, of Hanover-square, who has also issued a set of twelve similar pieces by Mr. Walter Macfarren; a series of exercises that are both valuable as practice and interesting in themselves. "The Diatonic and Chromatic Scales," edited and fingered by Mr. C. Gardiner, are calculated to insure proficiency in a branch of pianoforte playing that is too much neglected. These are also published by Mr. E. Ashdown, as are two pleasing pieces, "Au Cirque" and "Idylle," by Mr. Sidney Smith (well adapted for teaching purposes); "Amazonen-Ritt," a bright pianoforte solo, by that prolific composer, Fritz Spindler; "Un Aveu," a graceful "mélodie" for the pianoforte, by Signor Tito Mattei; and "Sabina," a characteristic minuet (with trio) by that clever pianist (of the Royal Academy of Music), Miss Margaret Gyde.

The returns of the Board of Trade show that during the eleven months just completed 270,636 emigrants of British origin left the Kingdom, being 251 less than the number leaving in the same months of 1887. They were 163,725 English, 34,778 Scotch, and 72,133 Irish, as against 160,395, 32,798, and 77,694 respectively in 1887. The English emigration to the United States was 2863 less than in 1887, to Canada 2367 more, to Australasia 190 less, and to other places (which include South Africa) 4016 more. The Scotch emigration to the United States was 838 more, to Canada 1852 more, and to Australasia 785 less than in 1887, while the Irish was less by 2777 to the United States, by 971 to Canada, and 1600 to Australasia.

POSTAGE FOR FOREIGN PARTS THIS WEEK,

DECEMBER 15, 1888.

Subscribers will please to notice that copies of this week's number forwarded abroad must be prepaid according to the following rates:—To Canada, United States of America, and the whole of Europe, THICK EDITION, *Twopence-halfpenny;* THIN EDITION, *One Penny.* To Australia, Brazil, Cape of Good Hope, China (viâ United States), Jamaica, Mauritius, and New Zealand, THICK EDITION, *Threepence;* THIN EDITION, *One Penny.* To China (viâ Brindisi), India, and Java, THICK EDITION, *Fourpence-halfpenny;* THIN EDITION, *Three-halfpence.*

Newspapers for foreign parts must be posted within eight days of the date of publication, irrespective of the *departure* of the mails.

ILLUSTRATED GIFT-BOOKS.

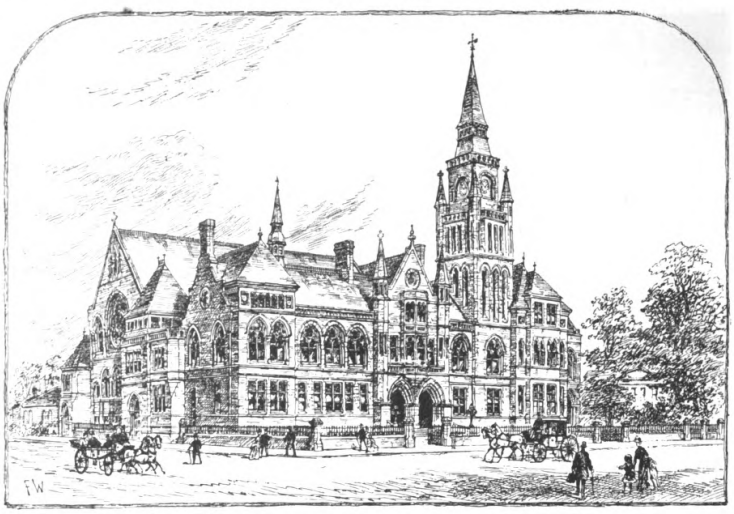
The seasonable provision of handsome volumes, with more or less artistic decoration outside and inside, with attractive literary contents of prose or verse, new or old, and with illustrative and ornamental designs rendered by various processes, as well in colours as in black and white, fails not to anticipate the near festival of Christmas, when people like to give and receive presents, and the subsequent opportunity of New-Year's Day. We proceed to notice those of interest and value.

Nuremberg. By H. W. Longfellow. Illustrated with twenty-eight Photogravures by the Gebbie and Husson Company, Limited (Sampson Low and Co.).—One of the most characteristic and suggestive of the short poems, in which the genial American scholar expressed his sympathetic appreciation of the romantic and picturesque aspects of mediæval antiquity in Europe, is here reprinted on a stately scale. Each page, of fine thick paper, contains but one couplet, in fair capital letters, with ornamental devices, in red or blue ink, and outline drawings, by the Misses Mary and Amy Comegys; the initials being copied from various illuminated manuscripts of the fifteenth century. The frontispiece is Albrecht Dürer's portrait of himself; the other plates are views of Nuremberg architecture and sculpture, with portraits of the Emperor Maximilian and of Hans Sachs, and some of Albrecht Dürer's works.

A Book of Old Ballads. Illustrated by Alice Havers (Hildesheimer and Faulkner).—This elegant volume contains many favourite songs of comparatively modern date, composed by Moore, Burns, and other lyric poets known to late generations; but some are taken from Shakspeare's plays, or from Elizabethan and seventeenth-century literature. In the drawings by Miss Havers which accompany these pieces of verse, there is an effective grouping of figures, and in some of them an agreeable air of rustic simplicity. Mr. Ernest Wilson contributes a few beautiful sketches of rural scenery.

Birds in Nature. By R. Bowdler Sharpe, F.L.S., Zoological Department, British Museum; with Coloured Illustrations by P. Robert (Sampson Low and Co.).—Mr. Bowdler Sharpe, as a scientific British ornithologist, has been able from his own field observations to supply good descriptions of the birds common in these islands. For those belonging to other countries than Europe, he has judiciously borrowed from the writings of Mr. Henry Seebohm; and, in other instances, from Mr. W. H. Hudson or Mr. C. Dixon. The different species which are here depicted by M. Robert, in thirty-nine large coloured plates, are all found in the northern temperate zone; and many of them are our familiar acquaintance. The volume is adorned with decorative initial letters, and with small woodcuts at the ends of chapters.

The Mirror of the World. By Octave Uzanne; with 160 illustrations by Paul Avril (J. C. Nimmo). — The lively French author, who has written cleverly of "The Fan" and "The Sunshade," has learnt his philosophy of Montaigne, and from Rabelais the tricks of his garrulous style. He discourses, not unkindly nor unwisely, of the conventional pretences, the fatiguing bores, the delusions and disappointments of society; of dinner-parties and drawing-room parties; of literature, art, and sport; of pedantry, hypocrisy, and ambition; he devotes a chapter to gastronomy; but on the tranquil joys of home life, and of pure love, on the pleasures of travelling, on study and books, on rural retirement, contemplation, and reverie, he dwells with especial complacency. We should prefer reading him in French, but he is not ill-translated, and is well worth reading; his sentiments are the cream of a refined Epicurean science of happiness. The designs furnished by his artistic colleague are not less beautiful than ingenious; figures and groups engaged in characteristic actions, bits of landscape, interiors of houses, furniture and implements, and fantastic decorations, some of which are richly coloured or delicately tinted, adorn the volume throughout, but leave M. Uzanne free to pursue his original train of thought.



Endymion. By John Keats; illustrated by W. St. John Harper (Sampson Low and Co.).—As a poetical narrative, in the romantic spirit, dealing with a classical theme, "Endymion" has more depth of feeling and a finer grace than any work of the Italian Renaissance poets. Sensibility, with which its author was most richly endowed, and a vivid fancy, if not a powerful dramatic imagination, produced this charming tale, which is here presented with the accompaniments of highly artistic designs. Those representing entire scenes have somewhat the effect of many of Gustave Doré's, and may appear too sombre and majestic for the gentle strain of Keats; but the single faces are lovely; more than one of them is "a thing of beauty and a joy for ever"; and nothing is unworthy of the noble poem which many still delight to read.

J. C. Hook, R.A.: His Life and Works. By F. G. Stephens (*Art Journal* Office).—The biography of an eminent living English artist, with critical notices of his most important pictures, is written by a competent author; but the most attractive feature of this publication is supplied by engravings, steel and wood, of many of Hook's paintings which we have admired at former Exhibitions of the Royal Academy.

The Courtship of Miles Standish. By H. W. Longfellow. With Illustrations (Sampson Low and Co.).—The old colonial times of New England, especially in the seventeenth century, with the austere, quaint habits of the Puritan settlers, and their neighbourhood to wild Indian tribes, were calculated to afford themes of idyllic and romantic narrative, which Longfellow and Whittier have treated in verse. The story of Miles Standish, partly derived from a tradition of Longfellow's own ancestors, has probably more of historical truth than that of Evangeline; he at first took it in hand with a view to dramatic composition, but it appeared thirty years ago in its present form. This edition is the finest, in every respect, that has ever been produced; the illustrations, designed by Messrs. G. H. Boughton, F. T. Merrill, C. S. Reinhart, and other artists, are vigorous, true in character, and expressive of feeling; the introductory essay and the appended notes are serviceable; and few books can equal this in the quality of the paper and printing.

Galilee and the Jordan. By J. L. Porter, D.D., LL.D. (T. Nelson and Sons).—The reverend and learned President of Queen's College, Belfast, who is the author of an acceptable work on "Jerusalem, Bethany, and Bethlehem," and of Murray's "Handbook to Syria and Palestine," having travelled with Bible in hand through the country associated with events of the deepest religious interest, presents an account of places that were the scene of Christ's earlier life and ministry. It may perhaps not seem to be the most convenient arrangement to set forth, in this instance, from Jerusalem, and to travel through Samaria to Galilee, as it reverses the order of events in the sacred biography; yet the reader can, if he so pleases, begin at page 41 with the general description of Galilee, follow the tour along the shores of its lake, and up the valley of the Jordan, and the mountain road to Cana and Nazareth, in which he will find Dr. Porter a trustworthy and instructive guide. There are more than 120 engravings, apparently from photographs, of the present aspects of those places.

The Rose-Garden. By William Paul, F.L.S. Ninth Edition (Kent and Co.).—Mr. Paul, of Waltham Cross, an eminent practical and scientific horticulturist, who has a European reputation as an authority on roses, published his treatise on the subject forty years ago. It has to a great extent been rewritten by him for this splendid edition, which may be obtained, at the purchaser's choice, either for one guinea, in royal quarto, with twenty very fine coloured plates, or at half-a-guinea, in imperial octavo, with the wood engravings only, sixteen in number. We decidedly recommend it be procured by every owner of a suitable garden who intends to cultivate the noblest and sweetest of our old favourite native flowers, the one most endeared to us, especially in England, by cherished domestic and literary associations. It is worth while also to choose the larger volume with the coloured pictures of roses, which will give much pleasure by lamp-light on the drawing-room table in winter evenings, and will remind everyone of the glorious bloom of summer; these are drawn by Messrs. W. H. Fitch, Worthington Smith, and other good botanical artists. Mr. J. G. Baker, F.R.S., adds an essay on "The Botany of the Rose," and Mr. Arthur Paul supplies an entomological treatise on the insects that visit this plant. We congratulate the veteran author on his completion of this important work.

THE QUEEN'S JUBILEE MEMORIAL HALL, EALING, OPENED BY THE PRINCE OF WALES, DEC. 15.

Twelve White Flowers. By Frances Livings and A. Livings (Hamilton, Adams, and Co.).—There is a taste for white flowers; and there are some occasions of deep interest in family and social life, where "Births, Marriages, and Deaths," which mean so much to the affections of those concerned, are wont to call for the exhibition of these emblematic blooms. The twelve species described by A. Livings, and delineated by Frances Livings, are the camellia, narcissus, eucharis, chrysanthemum, lily-of-the-valley, lapageria (from Chili) rose, anemone, clematis, sweet pea, azalea, and hellebore. The drawings are careful and truthful, and are well lithographed by Mr. Ben George, of Hatton-garden.

Album of Old Masters. (T. J. Smith, Son, and Downes).—This magnificent and luxurious volume, bound either in morocco, russia, or calf leather, with soft padded cover and splendid gilt edges and clasp, at very moderate prices, is intended for the reception of photographs. It has, therefore, no literary contents; but is adorned with nine small pictures of well-known designs by famous artists—Sir Edwin Landseer, J. W. M. Turner, Sir Joshua Reynolds, Gainsborough, Rembrandt, Vandyke, Velasquez, Rubens, and Raphael. We cannot say much for these, but it is a grand photograph album.

THE JUBILEE MEMORIAL HALL, EALING.

The handsome public building at Ealing, of which we give an Illustration, was opened by the Prince and Princess of Wales on Saturday, Dec. 15, after which a Fancy-Dress Bazaar, in aid of the funds to defray the cost of this building, would be held on Wednesday, the 19th, and the two following days, under the patronage of Princess Christian and other ladies of rank. The Victoria Hall, as it will henceforth be called, has been erected as a commemoration of the Jubilee of her Majesty's reign, and the building is to be vested in the Local Board for the time being as trustees. It is designed to afford accommodation to the Local Board offices, and a Free Public Library. The proceeds arising from the letting of the hall, after payment of all necessary expenses, are to be devoted to the assistance of the various charitable and philanthropic institutions in Ealing, such as the Cottage Hospital or Almshouses. As there will be no capital expenses to meet in connection with the Hall, and, in fact, nothing beyond the ordinary costs of management, it is hoped that there will be a surplus profit of at least £200 per annum to dispose of in the way suggested. The building, which has cost about £5000, stands in front of the Baths in Uxbridge-road.

MR. SUTTON PALMER'S DRAWINGS IN THE HIGHLANDS.

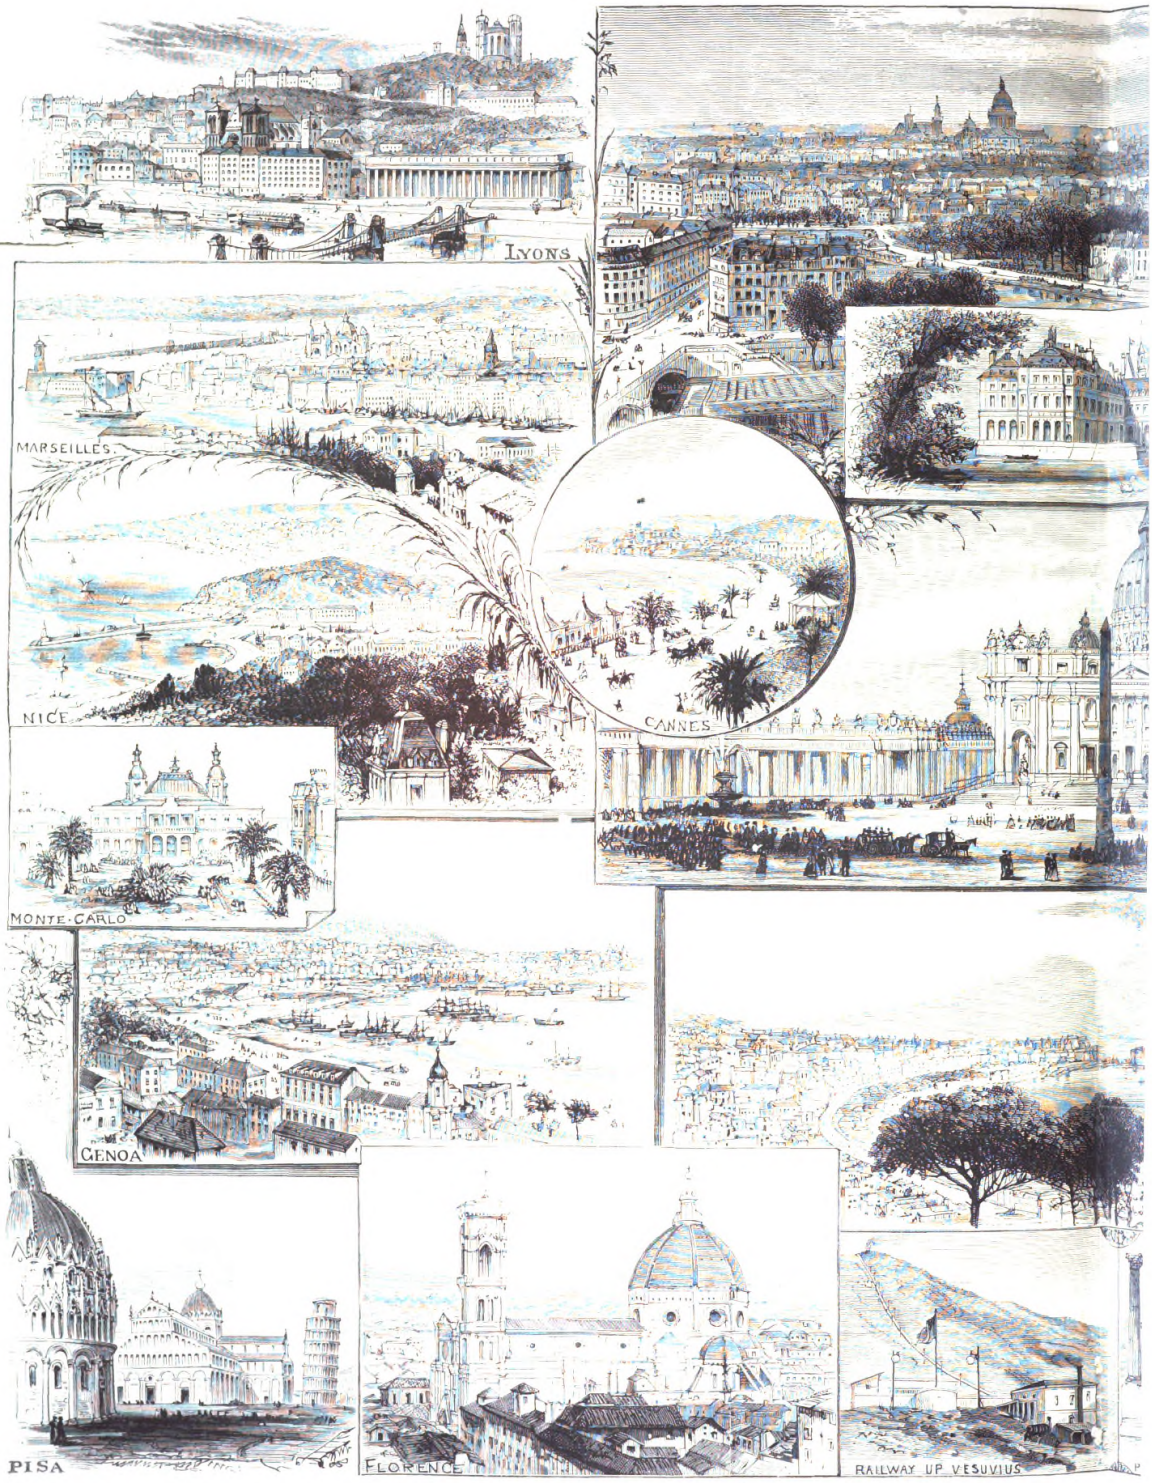
At Messrs. Dowdeswell's Gallery (160, New Bond-street) there is now on view a more than usually interesting collection of drawings, by Mr. Sutton Palmer, illustrative of two years' work among some of the finest scenery of the Highlands. On previous occasions we have noticed this artist's work among the English Lakes and along the Scottish Border, and have called attention to the main features of his work. It is, therefore, with renewed pleasure that we congratulate him upon a series of works in which his best qualities are brought to a higher degree of perfection than in any previous exhibition. Mr. Sutton Palmer excels especially in the true rendering of rushing water and liquid streams, in a delicate appreciation of broad sunlight, and in fine idea of outline and distance. In illustration of these powers, we may point respectfully to "The Falls of Orchy" (17); to the well-known view of that splendid gateway to Highland scenery (19), and depicted when

> All in the Trossachs' glen was still,
> Noontide was sleeping on the hill;

or to the grand "Mass of Benvenue" (55) towering over the peaceful stream, and, again, to the dark and lowering "Rocks of Glencoe" (11), looking apparently up the pass in the direction of Loch Etive. Although these may be taken as typical works of the artist's wide range, they give but very slight indications of his skill in the treatment of other and dissimilar scenes of beauty. We pass in rapid succession from the soft summer haze which overhangs "The Falloch" (6), near its entrance into Loch Lomond, to his almost wintry tower of the snow-covered "Ben Eay" (5) towering above Kinlochewe, or its still more imposing neighbour, "Ben Slioch" (16), which rises above Loch Maree. The wild Pass of Glencoe has had naturally great attractions for an artist endowed with so appreciative an eye as Mr. Sutton Palmer, and in "The Gloom of Glencoe" (28), "Loch Treachtean" (76), and a sketch entitled "Chasm and Crag" (45) we see how thoroughly he has been enthralled by the beauties of this wild spot. In a totally different key are pitched such scenes as that "By Loch Katrine's Shore" (23), in a full blaze of sunlight; "The Wandering Mist" (32), creeping over the loch and up the mountain sides; the beautiful stretch of country below "Loch Tay and Round Killin" (82) under the effects of sunshine and shower, and a scene full of real movement, "Leading to Loch Lomond" (77), when along the hill-side—

> Torrents from the height
> In Highland dales their streams unite.

We must also mention as worthy of special notice "A Gleam of Gold" (80), a touch of late autumn, which may make some tourists regret that they are back in towns and cities before the woods look their best; and a "Storm-swept Brae" (79), which may possibly lead other tourists to a different conclusion; the lovely sunny scene of "Glen Falloch" (61), the "Giant Man of Ben Slioch" (59), and an interesting work "O'er hill and heath" (63)—the only instance in which Mr. Sutton Palmer treats his clouds with any special attempt to give them prominence in his landscape. Taken as a whole, we can suggest no better way of recalling the best impressions of a Highland tour than is offered by this exhibition, and it may be of use as well as of interest to many a traveller to compare his own impressions with those of so delicate and accurate an observer as Mr. Sutton Palmer shows himself to be.



At a meeting of the Royal Botanical Society, held on Dec. 8, twenty-four different kinds of spring flowering plants were shown, which had bloomed, and were gathered on the 8th in the open air in the gardens of the society.—With reference to the mildness of the weather, a young lady, Marjory Hull, aged eight, daughter of the Rector of Upper Stondon Rectory, writes to the *Standard*, on Dec. 6, as follows: "When I was out for a walk this morning I picked such a lovely little bouquet for mother, and mother said it was such a wonderful one for the time of year that I ought to write and tell you about it. It had ox-eye daisies in it, wild geranium, knobweed, hemlock, white campion, a marguerite, and two very pretty little flowers, yellow and mauve, that I do not know the names of. We have violets and primroses in full bloom in our gardens."—Mr. Edward Roobotham, of Wirksworth, writing to the same paper on the same day, says: "I enclose three heads of asparagus, cut out of garden this day, grown in the open. I think it a remarkable evidence of the mild weather we are having in the Peak of Derbyshire."—Mr. M. T. Culley, of Coupland Castle, Wooler, North Northumberland, states "that he had a dish of tender and excellent green peas on Nov. 20, and on the 23rd one of globe artichokes from his garden, while primroses, polyanthus, foxglove, sweet peas, and roses were blooming abundantly."

Mr. J. B. Burgess, A.R.A., has been elected a Royal Academician, in the place of the late Mr. Frank Holl.

Tom Smith has sent, as a contribution to the Toy Fund, 22,000 of his celebrated Christmas crackers to be distributed among the poor children of the hospitals and workhouses of the metropolis.

Photographs of Mrs. John Wood and Mr. H. B. Conway are among the illustrations of the *Theatre* for December which is a good instalment of a serial always light and readable. "Macbeth on the Stage," by Frederick Hawkins, is the opening paper, and comes opportunely, in view of the approaching important revival of that great work.

The Italian Opera Company of Mr. Augustus Harris on Saturday night, Dec. 8, concluded a week's engagement at the Theatre Royal, Manchester, where their performances have been a pronounced success. The opera given was "Les Huguenots," and the theatre was crowded. At the termination of the performance, Mr. Harris was presented with a massive silver bowl by the members of the company, who desired in this way to testify to their appreciation of the artistic and liberal manner in which the operas have been performed, and likewise to acknowledge the solicitude shown for their own comfort during the tour.

FROM LONDON TO THE RIVIERA AND ITALY: WITH VIEWS ON THE

THE LINE TO BRINDISI, BY MONT CENIS, AND THE CORNICHE.

FROM LONDON TO ITALY.

The winter season sends a multitude of tourists and invalids to the Riviera or to Italy, where, amidst the most charming landscapes, in the first case, and with a climate of exceptional mildness, they escape our winter's gloom; beyond, in the fair land of Italy, they find at every step those works and monuments on which the eye of the artist, the connoisseur, or the student of history, romance, or antiquity must ever delight to dwell.

The writer, having visited the Riviera and Italy on several occasions, in the course of many winters, and having returned with restored health and with the brightest impressions of the principal places of interest, here proposes to notice these in the order of travel. It will be convenient to give a brief description of the different routes that may be chosen to reach either the Riviera or the inland towns of Italy, beginning, of course, with Paris. Everyone knows the journey from London to Paris, which is accomplished, now-a-days, most rapidly and comfortably, viâ Dover and Calais, and by the Northern of France Railway.

In order that this description should be as clear as possible, it is arranged in sections of lines.

SECTION 1: FROM PARIS TO MÂCON.

After Paris, the first station deserving of special attention is Fontainebleau, fifty-nine kilomètres from Paris. This is a charming little town, celebrated for its historic palace, or castle, and its forest, the grandest in France. The Palace of Fontainebleau, which dates from St. Louis, is a magnificent pile. Most of the Kings of France, from Francis I. to Louis XIV., have dwelt there; and it was the favourite summer residence of Napoleon I. It contains paintings by the great masters, some superb tapestry, and objects of art of great value. We commend the choice recently made by M. Carnot, President of the French Republic, in selecting the Palace of Fontainebleau for his summer residence.

Next comes Dijon, which town contains the old palace of the Dukes of Burgundy, a splendid museum, and the cathedral of St. Bénigne, which is a remarkable edifice. After running through the famed vineyards of the Côte d'Or, the line reaches Mâcon, which is the junction of the Mont Cenis and Marseilles lines.

SECTION 2: MÂCON TO GENOA VIÂ LYONS AND MARSEILLES.

Pursuing our journey towards the French portion of the Riviera, we reach Lyons, which is the most important town in France after Paris, on account of its extent, the beauty of its monuments, and its population. Lyons is situated at the confluence of the rivers Rhône and Saône. The Bellecour, Perrache, and Terreaux quarters constitute the wealthier portion of the town, and contain several theatres, churches, historical monuments, the Exchange, the Art Palace, the Townhall, and the Prefecture. Lyons is the recognised centre of the silk trade of the world.

On leaving Lyons the line follows the left bank of the Rhône as far as Arles; and, after passing through the stony plains of the Crau, reaches Marseilles, a city founded by the ancient Phocæan Greek colonists, which is one of the largest and busiest commercial towns in Europe. It is the third town in importance in France, on account of the magnitude of its trade and dense population. The port and docks of Marseilles are the largest in the Mediterranean. Among the sights of Marseilles may be mentioned the Art Palace of Longchamp, an admirable piece of architecture; the Canebière, a grand street leading to the port, and celebrated for its handsomely-appointed cafés; the Prado, a fine walk 3400 mètres in length, ornamented with plantain-trees; the Cathedral, in the later Byzantine style; and the Corniche promenade, skirting the sea-shore for a length of over four kilomètres.

The line next reaches Toulon, the largest military port of France in the Mediterranean; and then La Pauline, whence a small line branches off to Hyères.

Here begins the Riviera. *Hyères is a winter-resort* famous for the mildness of its climate. The town and its outskirts are adorned with fine plantations of palm-trees. The line thence takes a north-easterly direction to St. Raphael, a much frequented winter resort. It was at this spot that Buonaparte landed on his return from Egypt, and hence he embarked for the island of Elba. Further on we come to Cannes, a most fashionable winter resort, frequented by a large number of English visitors. The town owes its exceedingly mild and even climate to its favourable situation at the foot of the Esterel mountains, which shelter it from the cold winds. The neighbouring hills are covered with pine-trees, whose health-giving fragrance fills the air around. Next to Cannes is Antibes, a fortified town, the Antipolis of the Phocæans, with its fine church, dating from the twelfth century; and we soon arrive at Nice.

Nice, founded by the Phocæans from Marseilles, is a town admirably situated on the Anges Bay. The renown of Nice is such that there *is no* need for dwelling here on the splendour of its villas, its exceptionally genial temperature, and the numerous and various amusements provided by the Municipality. Everyone has heard of the Carnival of Nice; of its Corso, its sport, yacht-races, &c. The walks in the Public Garden and the Promenade des Anglais, with their splendid mansions and villas, together with the beautiful gardens surrounding them, are a great sight. There are also some beautiful structures in the environs of Nice.

The line from Nice continues towards Villefranche, Beaulieu, Eza, and Monaco. The last-mentioned place—the capital of the principality of that name—is a small but picturesque town of 1500 inhabitants, built on a high headland. The palace and gardens, with their beds of beautiful plants, which can only be grown in hothouses in less fortunate climes, are deserving of a special visit. Close to Monaco is Monte Carlo, much frequented on account of its sea-bathing and its mild climate—not to mention its famous gaming-tables, the object of attraction to visitors of every nationality. The Casino offers its numerous visitors fair play, the excitement of the roulette-table and trente-et-quarante, besides attractions such as daily and extraordinary concerts and theatrical performances, got up with the support of the leading artistes of Paris. Finally, the pigeon-shooting there draws together the best shots in the world.

After crossing the Gorbio and Borigo torrents, we reach Mentone, a pretty town of 11,000 inhabitants, agreeably situate on the bay of the same name. The luxuriant vegetation of the country around, the beauty of its walks, the picturesque appearance of its buildings, together with its genial climate, have made the place the favourite resort of a large number of visitors, artists, tourists, and invalids.

On leaving Mentone, the train crosses the Franco-Italian border, and stops at Vintimiglia, where the Customs formalities have to be gone through.

The principal places of interest between Vintimiglia and Genoa are the following:—Bordighera, a small town of 2500 inhabitants, the heights of which command the grand prospect of the French Riviera as far as the Esterel mountains; Ospedaletto, a winter station created by a Lyons company; San Remo, a most picturesque town, pleasant and healthy, with numerous promenades; Alassio, a winter resort specially frequented by English visitors; Albenga, containing ruins of Roman constructions; and finally, Savona, a town of 16,000 inhabitants, occupying a magnificent situation—the harbour is a very fine one.

SECTION 3: FROM MÂCON TO TURIN, VIÂ MONT CENIS.

The Mont Cenis line is remarkable for quick travelling, the boldness of its construction, and the wild grandeur of the country it runs through. Leaving Mâcon, the line runs to Bourg, which possesses the beautiful church of Brou, one of the finest in France; and to Culoz, the junction of the Geneva line. Shortly after leaving Culoz, the line approaches the Lake Bourget, which it skirts for nearly its entire length. Here is Aix-les-Bains, one of the most celebrated baths on the Continent, honoured during summer by the presence of our Queen Victoria and the British aristocracy. We next reach Chambéry, a pretty and interesting town, well worth a visit; next, after a picturesque ascent, Modane is reached. The train, at 5½ kilomètres from Modane, enters the great Mont Cenis tunnel, which is 13,671 mètres in length, connecting France and Italy. It took over thirteen years to construct this tunnel, and the cost reached nearly £3,000,000. On passing out of the tunnel we are on Italian soil; and after a very pleasant descent the train arrives at Turin.

Turin is one of the largest and most beautiful towns in the Italian kingdom. It is situated in the centre of a fertile plain, watered by the river Po. It is a pleasant and healthy city, and boasts of numerous and comfortable hotels. Turin is the point of intersection of the Milan, Venice, and Genoa lines, the latter of which extends throughout the length of Italy.

SECTION 4: FROM TURIN TO VENICE.

Leaving Turin, we enter the beautiful and fertile plains of Piedmont and Lombardy; and, after passing Novara, come to Milan. This noble city, the capital of Lombardy, numbers over 200,000 inhabitants, and is one of the great commercial centres of Italy. The Cathedral of Milan, a splendid monument, built of marble, ranks third amongst similar constructions in Europe. The grandeur of its architecture and the beauty of the works of art *it contains* surpass all description. Do not omit a visit to the Royal Palace, the Victor Emmanuel Gallery, and the Poldi-Pozzoli Museum, as well as to the Brera, an old Jesuit College.

The train, pursuing its way past Verona and Padua—towns remarkable for their architectural monuments and historical interest—duly arrives at Venice. This superb and celebrated ancient city, the Queen of the Adriatic, is situate at about four kilomètres from the mainland, and occupies 117 islands, intersected by 150 canals, and connected by 378 bridges. It has a population of about 135,000. The innumerable precious works of art in the Venetian palaces have always had a great attraction for visitors. The chief places of interest in Venice are—the Public Square and magnificent Church of St. Mark, the Procuratie, the Campanile, the Clock Tower, the Piazzetta, the Lido, the old Library, the splendid Palace of the Doges; the Fine-Art Academy, containing a fine collection of paintings and carved works. Venice also possesses numerous fine churches of every style.

SECTION 5: TURIN TO GENOA, FLORENCE, ROME, AND NAPLES.

Genoa is a large and handsome town and seaport occupying a splendid site. Its port, about three kilomètres in circuit, is the most important one in Italy, in a commercial point of view. Besides its beautiful church, raised by contributions from the great patrician families, it possesses numerous marble palaces, splendidly decorated inside, and which have earned for it the title of "Genoa the Superb."

After passing La Spezia and Viareggio—winter resorts in good repute for the mildness of their climate and their luxuriant vegetation—we reach Pisa, a town of 50,000 inhabitants, situate in an extensive and fertile plain, and enjoying a mild and salubrious climate, which is especially recommended to the asthmatic. The Cathedral, built of black and white marble, contains paintings and sculptural works of priceless value. The Campanile, or "Leaning Tower," in which Galileo carried out his experiment on gravitation, comprises eight storeys of 207 superposed colonettes. At Pisa, it is well to leave the direct line in order to make an excursion to Florence, by way of Empoli.

Florence is a city of 170,000 inhabitants which no tourist should miss visiting. Up to the time of the transfer of the capital to Rome, it was the seat of the Italian Parliament. The Uffizi and Pitti Palaces contain works by the great masters: Praxiteles, Michael Angelo, Raphael, and Titian. These masterpieces make up one of the finest art collections in the world. The town also boasts of splendid churches, Egyptian and Etruscan museums, and a fine-art academy.

From Pisa the train runs rapidly to Rome, after passing Fullonica, Grosseto, and Civita Vecchia. Of Rome, the capital of Italy and seat of the Papacy, it would be absurd to speak in a cursory manner. Nevertheless, we are bound to advise persons who intend making but a short stay in Rome to visit the Capitol, the Coliseum, the Vatican, and the Basilica of St. Peter's, the St. Angelo Fort, the Appian Way, the triumphal arches of Titus and Constantine, and the Trajan Column.

From Rome to Naples the distance is 260 kilomètres. Naples is the most populous town in Italy, having 450,000 inhabitants. The Bay of Naples is one of the most beautiful sights in the world. The town possesses some remarkable monuments and artistic collections, and is especially famous for the great animation prevailing everywhere. The environs are particularly interesting—for instance, the Chiaja, the Posilippo, and Vesuvius, the ascent of which is now effected by a funicular railway which brings visitors to the crater; Pompeii, Herculaneum, and Castellamare.

A recently-constructed line connects Naples and Brindisi, by way of Metaponte and Tarento. The port of Brindisi, on the Adriatic coast, is the embarking station for the India mail. The trains of the Mont Cenis-Rome-Brindisi line are in connection with the India mail-steamers at Brindisi.

In concluding this description we particularly recommend the Mont Cenis route to travellers wishing to travel direct from London to Italy. By this route the journey from London to Turin is effected in 26 hours, from London to Milan in 29½ hours, to Florence in 37 hours, to Rome in 43 hours, and to Naples in 50 hours. The Vintimiglia route is longer, but the tourist will find ample compensation in visiting the beautiful country it runs through.

The ordinary carriages of the trains on both lines are thoroughly comfortable. Some of the trains comprise saloon and sleeping cars, arm-chairs, and sleeping accommodation. A car provided with sleeping and toilet accommodation, and a saloon-car, run daily between Calais and Vintimiglia; and a saloon and sleeper between Calais and Milan. Saloon-cars also run daily between Paris and Marseilles, Vintimiglia, Turin, Milan, and Rome. We may add that during the winter season a daily train, consisting of saloon, sleeping, and dining cars, will run daily between Paris and Vintimiglia. Twice a week (Wednesdays and Saturdays) this train leaves Calais at 1.30 p.m., connecting direct with the train leaving London at 10 a.m.

SCIENCE JOTTINGS.

LOBSTERS.

To-day, in the fishmonger's shop, I beheld a large box of lobsters which the early morning train had brought from the far north of Scotland. They were packed into the box with that total disregard of whatever feelings the lower animals may possess which characterises man in his dealings with life below his own, whether it is represented by fowls in hencoops or by pigsor sheep in railway trucks. The seething mass of blue-black bodies encrusted with the white spiral shells of worms that build limy tubes, was "a sight for to see," as the old ballad has it. Lobster-life seems to take its troubles with equanimity. Beyond an occasional squirming of a tail or flap of a feeler, all was quiet within the box. One veteran crustacean, perched in a coign of vantage above the others, was working his jaws—one of many pairs—as if still under the delusion that he was cosily nestling under his rock in the sea, and baling out the refuse water from his gills by means of the scooplike spoon wherewith he is provided for the purpose in question. His great black eyes, each resting on a short stalk, were staring vacuously at the prospect before him. Mentally regarded, that prospect was not a cheerful one. "Out of the box and into the pot" might well parallel the frying-pan and fire simile as applied to lobster-life. In a few hours after I saw that big crustacean, I doubt not he was popped into his funeral urn. As I write, his nice blue-black shell will have changed into the bright red of the boiled animal—a colour seen, by-the-way, in the lobster of a certain classic picture intended to represent the native products of the sea as obtained in the miraculous draught of fishes. By to-morrow, nothing will be left of him but his shelly armour. He will have perished, as has many a higher creature, in the work of making life brighter and better—in so far as lobster-salad can be said to aid that desirable end—and so runs the world away, little recking of the wonderful amount of vital complexity which it consumes even in its most commonplace fare.

A certain great naturalist has used the lobster-kind as the text or peg whereon to hang a very instructive book of natural history science. In truth, I know of no better task for a would-be naturalist than the attempt to discover the ways and works of lobster-existence. From its head to its tail the familiar crustacean is a living wonder. That it is a poor relation of the crab is a plain fact; although why a "poor" connection may not be quite so evident as is the relationship itself. This matter resolves itself into a question of tail and no tail. Early in life, crabs and lobsters are tailed animals. Then your crab shortens the appendage just named and tucks it up under his body—which, by-the-way, is all head and chest. The lobster keeps his youthful tail throughout life, but poses as a lower animal than the crab in consequence. He is nearer the groundlings of his race, in other words, because of his tail; and the crab, conversely, is his more modified and better developed cousin, because he has a higher nervous system and a more elevated and compact type of body. Not alone in crustacean life is this matter of tails a vital question. From frogs up to man, the disappearance of the tail bears an important part in the history of the race. Heads are all very well in the race for superiority; but when there is a difficulty at all in the matter of aristocratic position among the animal hosts, one may not go very far astray in crediting with a station of high degree, the being which has discarded his tail and, in a zoological sense, has come to the short-jacket stage of anatomical perfection.

That lobster of ours has in his body some twenty joints or segments, and there is not one joint which may not form food for reflection. Every joint is really a replica of every other joint, although, truly, you may require to dive into the intricacies of anatomy to trace out the likeness. Those six joints of his tail are, perhaps, the simplest of his frame. Below you observe that each possesses a couple of appendages called the "swimmerets," and to these appendages Mamma Lobster, as you may see, attaches her eggs, and constitutes herself a walking nursemaid by reason of this little piece of attention to maternal duties. Each pair of appendages is like every other pair; albeit, you find great variation in their shape and form. Those of the tail exist each as a double-leaved structure set on a joint. If you look at the tail-fin, wherewith, aided by the big muscles of the tail, the lobster makes a forcible backward stroke in the water, you will discover that the fin consists simply of a pair of the swimmerets you see further forward on the tail, broadened out, and having a little centrepiece set in between them. Go further forward on the body and you come to the five pairs of walking legs. Now these legs, after all, are only altered swimmerets, in which the innermost leaf has grown big and foot-like and has become encased in a limy shell. Further forward still, and you reach the "foot-jaws," which are half-way houses between jaws in front and legs behind. Then come the jaws proper, of which your lobster boasts three pairs. One pair is hard and horny, the other two are softer in texture—but they are all really swimmerets, like those of the tail. Finally, in front of the jaws come the "feelers," and of these two pairs exist. The lesser pair has two divisions, while the greater feelers, that project like huge horns, have only one division or part. These feelers, again, are only modified appendages, all corresponding to the simpler ones of the tail. Finally come the eyes, and the movable eye-stalks on which the eyes are set correspond to the single joint by which the appendages elsewhere are attached to the body.

Now, if you ask me "How one comes to all this certainty of knowledge?" I reply, because when the lobster is a mere baby, just out of his egg, or little further advanced in his history, all the appendages resemble the swimmerets of the adult's tail. As he grows, those of the head change to form eye-stalks, feelers, and jaws; others become his foot-jaws, and others, again, his walking legs; and only those of the tail retain their original form. It is not what things are, but what they have sprung from, that we trust to in science for the elucidation of their true nature; and the lobster is a good illustration of the manner in which many and varied organs of an animal's body arise out of one common stock—a feature which is repeated in the history of the whole animal.

Lobsters, thus, form a text, as I have said, for teaching a great lesson in the value of watching an animal's development as a clue to its history. For the rest space fails me, at present, for the discussion of many interesting questions in crustacean life—as, for example, the inquiry "How and what do lobsters see?" But of this matter more anon. Of gills, the lobster possesses a full set, lying neatly packed away in the sides of his chest, and attached to the tops of his walking legs and foot-jaws. A nervous system he likewise possesses, lying on the floor of his body, like that of the insects, spiders, and centipedes, of which he is a distant connection. He has feelers and eyes, as we have noted; his ears exist at the foot of his lesser pair of feelers, and he possibly possesses a "nose" (physiologically regarded), for smelling functions, judging by his successful search after the "high" and odoriferous fish wherewith the lobster-traps are baited. Altogether, the lobster is not to be despised as a lowly creature. Contrariwise; and, as his life is laid out for him, he possibly contrives to secure a full share of whatever corresponds in lower existence to the delights of higher or more sentient life.

ANDREW WILSON.

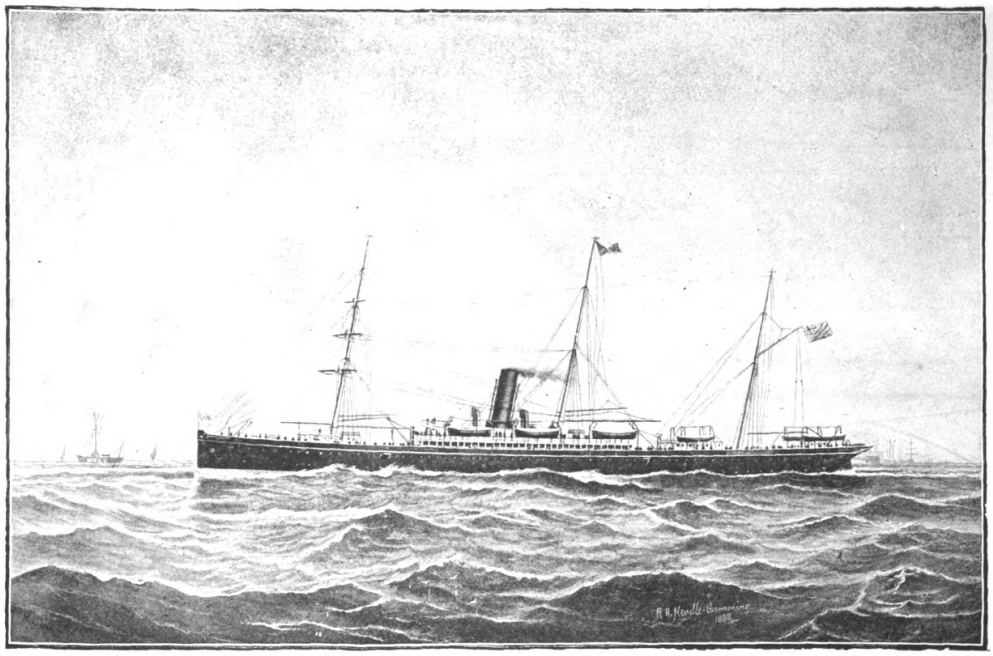
THE PENINSULAR AND ORIENTAL STEAMER PENINSULAR.

Although we are apt to complain, and, in the opinion of many, not without a good show of reason, of the inadequacy of our naval armaments, yet so far as our commercial fleet is concerned, we are able, thanks to public and private enterprise, notwithstanding the strenuous efforts which are at present being made by France, Germany, and Italy in the matter of shipbuilding, to hold our own in that direction against all comers.

The Peninsular and Oriental Company, always in the van of progress, and imbued with the commendable determination to be second to none of their competitors in the India, China, and Australian trade, have scarcely placed in active service their quartette of Jubilee ships, aggregating some 26,000 tons, when we hear of the contemplated further addition of six steamers to their already long list of magnificent vessels. Few companies can boast of being the possessors of a fleet of 210,000 tons, the greater part consisting of steamers of a new and improved type, in the construction of which the experience of years has been brought to bear so as to adopt, on the one hand, everything that modern science and forethought can suggest to provide against the ever-present dangers of the ocean, and on the other, to make such arrangements for the comfort and well-being of passengers, both as regards accommodation and cuisine, as would satisfy the most inveterate grumbler who would scarcely be content were every vessel a floating Hôtel Métropole.

The trial-trip of the Peninsular, the first of the last projected six steamers, took place at Greenock, where she has been built by Messrs. Caird and Co. This vessel is a somewhat new departure from the preceding steam-ships of the Company, being more especially designed to meet the multifarious wants of Indian travellers. Her gross tonnage is 5000 tons, and her horse-power of the same figure. Her accommodation for passengers, of whom she will carry some 200, in the first and second saloon, is of the highest order, and those who have hitherto been debarred from visiting our great Eastern empire by fancied discomforts which they were reluctant to encounter, will find that the appointments, so far as roominess and airiness go, satisfy the wants of the most fastidious voyagers.

The Peninsular is fitted with what all Indian passengers know is such a special boon—an unusual assortment of deck-cabins, all the berths being models of comfort. The dining-rooms and saloons bear the impress of refined luxury as well as admirable taste on the part of the architect of the Imperial Institute, who is responsible for the design of this particular branch of the work. The great beam of the ship—48 ft.—will ensure increased steadiness at sea, and it will be a matter of assurance to timid passengers that the vessel is built in six water-tight compartments, besides which there is an ample supply of life-boats and a steam launch. Special precautions are taken against fire, and cool chambers are fitted for provisions and the production of ice.



There is no doubt that the Peninsular will demonstrate her capabilities in the matter of fast steaming, possessing, as she does, the cardinal qualifications which make for speed and safety, as well as strength and stability. She left London for Bombay on Dec. 7, with a full passenger-list; and it is confidently expected that she will achieve renown as a passenger-ship plying between our own shores and India. A sister-ship, the Oriental, of 5500 tons gross burthen, with accommodation for 175 first-class and thirty-five second-class passengers, also built for this Company by Messrs. Caird, of Greenock, has since been launched.

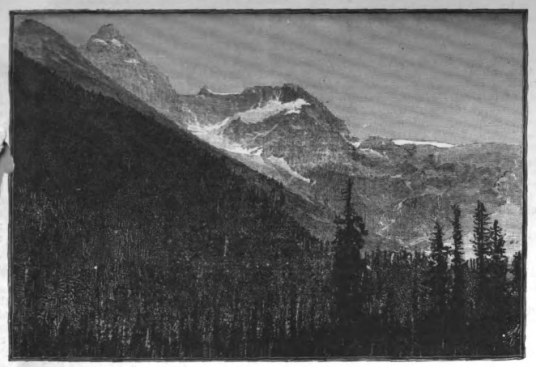
Mr. Henry Tate, sugar refiner, of Streatham and Liverpool, who recently presented Liverpool with a homœopathic hospital, and South Lambeth with a free library, has given £1000 to the Liverpool Merchant's Guild, for the relief of decayed gentlemen and gentlewomen.

CAPTAIN COOK'S VOYAGES.

In the early, the very early, years of the present reign a favourite boys' book, as many of my readers will probably remember, was the little one-volume edition of "The Voyages of Captain James Cook." Ah me, such a contrast—with its dull, not to say dingy-looking, cover, and its small type, and its indifferent paper—to the gorgeous things which the activity of publishers, the fertility of authors and artists, and the resources of printers, now-a-days produce in such profusion for the delight of our "young gentlemen"! In the time I speak of "Books for Boys," as a class *per se*, were almost unknown; and the juveniles, to a great extent, fed upon so much of the intellectual pabulum of their seniors as those seniors thought fit to deal out to them. They were allowed to luxuriate, for instance, in Bruce's "Travels in Abyssinia," or "The Mutiny of the Bounty," or "Drake, Cavendish, and Dampier," or "The Life of Nelson"—with "Baron Munchausen," "The Castle of Otranto," and Scott's "Ivanhoe" thrown in as lighter reading. Perhaps it was because our choice was so limited that our partiality was so great; but, assuredly, the few books which then brightened a boy's bookshelf were very dearly loved and valued, were read and re-read and made much of, and treated altogether as household companions and bosom friends. My observation of the ways and habits of the young folk of the present time leads me to doubt whether the story-books which flow so continuously into *their* possession are the happy recipients of an equal affection.

At all events, of the books of our boyhood, in that dim and distant past, when Queen Victoria rode out daily on horseback, accompanied by her young and handsome husband, and Louis Philippe practised his petty economics in the Tuileries—an age which seems as far away from us now as the age of the dodo—'Captain Cook's Voyages" was held to be a pearl without price. Boys carried it about with them, like a fetish

THE NEW P. AND O. STEAMER, PENINSULAR.



or a talisman; and read it in corners of the playground, or inserted it inside their Latin grammars, and hazarded surreptitious glances at its fascinating pages. And oh! what a region of charm and magic those pages revealed to the youthful fancy! Sweet summer isles of Eden, nestling in warm sunny seas; groves of palm, which no bleak winter-winds stripped bare; clusters of bread-fruit trees, with their untaxed and unadulterated stores of food; coral reefs, white with the foam of ceaseless breakers; happy islanders dancing in gay measures upon lawny slopes; glories of sunrise and sunset across the wide waste of the Pacific—all these came upon us like glimpses of heaven upon the excited vision of a mediæval saint! Through the open windows of the hot school-room on a drowsy summer afternoon, how often the boyish imagination would take its flight, and, crossing leagues of land and sea, follow close in the track of Cook and his companions, enchanted by each novel scene, and by the simple ignorance and seeming innocence of its dusky-skinned inhabitants. We revelled in the beauties of Tahiti and Hawaii (or Otaheite and Owhyhee, as Cook spells the names), and joyfully disported among the blue creeks and bays of the Navigators' Archipelago. And how we loved the familiar every-day names which Cook bestowed upon his discoveries—such as the Friendly Islands and the Society Islands—so quaintly unlike the sonorous designations of Spaniard or Portuguese. We relished, too, the matter-of-fact way in which he (or his historian) invariably speaks of the wonders which daily greeted him. On such and such a day "they passed two small islands, and about noon on the following day sighted more land." And next "they saw a number of fires and smoke in several places, whence it was conjectured that the place was well peopled." Those fires produced a strong impression upon us! And again, "when the ship was clear of all the islands which had been laid down in such maps as were on board, they were surprised at sighting an island to the west-south-west, which they supposed was a new discovery." No flourish of trumpets here; all is severe simplicity.

I know few books better adapted to stimulate the sense of wonder in a boy, and to awaken his imagination, than "Cook's Voyages." There is a breezy, bracing atmosphere throughout; and the hero of it, the Yorkshire labourer's son, who attained by industry, courage, and integrity, to his responsible position, is as good an example as one could wish to set before the young. He is the greatest of discoverers, and we have good cause to be proud of him as an Englishman, if only for the fine humanity which marked his transactions with the native populations. I suppose that few discoverers have shed so little blood. Then the interest of his ocean-wanderings is inexhaustible. He went out into a new world, and annexed it like a conqueror. One day they come upon a race of people who refuse to drink rum or brandy, intimating, after tasting it, by signs, that it burned their throats. These total abstainers have broad, flat faces, high cheeks, noses inclining to flatness, wide nostrils, small black eyes, large mouths, and straight black hair falling down over their ears and foreheads. Another day they are witnesses of a war-dance. Again, they are surrounded by a fleet of canoes, the crews of which, equipped with spears, darts, battle-axes, and the patoo-patoo, make the air ring with cries of defiance. At one time they are sailing slowly across a sea as blue as the heaven above it, with an apparently measureless expanse of waters stretching all around; at another they are drifting into a still lagoon, which sleeps within its belt of coral, shaded by a few cocoa-nut palms with feathery crests. Bright little pictures like these are constantly flashing across the page:—"The islands were shaded with evergreens and covered with woods, and exhibited a delightful prospect. The rocky shores were enlivened with flocks of aquatic birds, and the whole country resounded with the wild notes of the feathered songsters." Or—"The sea was quite unruffled; and the sun, shining brightly, exposed the various sorts of coral in the most beautiful order." Dip where you will, you will come upon some such suggestive passage, and may soon lose yourself in dreams.

But the truth is, Captain James Cook was exceedingly lucky in his opportunities. The chart of the great southern ocean was almost a virgin one when our discoverer first set sail from Deptford. The world was all before him where to choose. He sailed into the unexplored Pacific, and, as a matter of course, struck upon some new land almost every day. There they lay, those fresh fair island-groups, all waiting to be discovered. So it was with the early astronomers after the invention of the telescope. As soon as they pointed their magic tubes towards the azure depths of the firmament, new planets immediately swam within their ken. No such good fortune now-a-days rewards the navigator or the stargazer. The islands have been gathered up from east to west, and the stars all catalogued like the items in a grocer's shop. No wonder that our later voyages have none, of the rare sweet fascination of Captain Cook's. They tell an oft-told tale; 'twas Cook's felicity to tell it first. There are omnibuses and bathing-machines at Honolulu now, and German "interests" at Samoa: the romance and poetry of the islands are as dead as Queen Anne. That is the worst of experience; it leaves us nothing to anticipate. So that Captain Cook's voyages to the middle-aged reader becomes quite another thing to what it was to the boy.

At this time of the year custom demands that to our simplest reflections and palest commonplaces a "seasonable" colouring should be given; and no doubt the patient reader is already wondering when and how I shall establish a connection between Christmas and "Cook's Voyages." I might be content to say that the book makes a capital companion for Christmastide—for the wassail bowl, and the yule-log, and the evergreens. But I confess that the fancy, in my mind, is this: To youth and old age Christmas comes with much the same difference of feeling about it as "Cook's Voyages." To youth it opens up an ideal world, full of bright, fairy scenes—radiant in the "purpureum lumen" of hope and promise. All is new—untasted—untried. The map is not yet filled in; the planetary spaces are not yet gauged. Every day brings with it a discovery; the bark bounds buoyantly over seas hitherto untraversed, and the morning mists, as they rise, reveal shores hitherto unknown. But in our later years Christmas discloses to us no such glorious visions. The chart is full; the world's novelties have been essayed, and taken count of. There is no more promise, no more expectation; all that belongs to us is the burden of the past. While Youth, with eager eye and panting breath, strains towards the future and its wealth of green islands and sunny seas—so new, so strange, so rapturous; Old Age, with bowed head and weary limbs, coils up in the fireside-corner to reperuse the record of the parted years—the stained pages of the log-book of its "Voyages"—and to tell over the Christmases that have been and shall be no more.

INTERIOR OF A COLONIAL SLEEPING-CAR ON THE CANADIAN PACIFIC RAILWAY.

THE CANADIAN PACIFIC RAILWAY.

Our Special Artist, Mr. Melton Prior, on his long railway journey from Montreal to Vancouver, which is performed in five days, made a Sketch of the interior of the sleeping-car allotted to the class of passengers regarded as intending colonists, who obtain cheaper, though less luxurious, accommodation than the first-class through passengers. In each transcontinental train, we understand, there are fourteen sleeping-carriages and eleven dining-carriages, with extra ones to provide for trains that carry a heavier load. The "through-sleeping" carriage goes over the entire route, its conductor and servants going the whole way. They thus become acquainted with the peculiarities and special wants of their passengers, and aid in relieving the monotony of the long journey by giving notification of the approach to attractive bits of scenery, to see which it may be necessary to rise early in the morning. The sleeping and dining-carriages afford all the conveniences needed for the long journey. The sleeping-carriage is constructed with six "sections" (as they are called) on each side. Each section will represent the seats and high backs of an English railway carriage, except that an aisle passing along the middle of the carriage divides one side from the other side. At night the seats are rearranged into an upper and a lower set of berths, with curtains drawn in front. At one end a section, made somewhat wider, is inclosed in the form of a state-room, so as to give complete privacy. In the aggregate, twenty-six persons can be given sleeping accommodation in the carriage; while at either end are toilet-rooms, and a bath-room is also provided. At the rear of the sleeping-carriage is a large open apartment, with a good outlook from the back platform, this being the rear of the train, so that the passengers can use it as a smoking-room and have a view of the line as the train passes.

Our views of the mountain, glacier, and torrent scenery of British Columbia, which have been hitherto presented, were all supplied by Mr. Melton Prior's sketches; but those which appear this week are from the photographs taken by Messrs. W. Notman and Son, of Montreal. We have already spoken of the Selkirk Range, and of its Great Glacier, a vast plateau of gleaming ice extending as far as the eye can reach—as large, it is said, as all those of Switzerland combined. Here, at an elevation of 4122 ft., are the station and hotel, within thirty minutes' walk of the Great Glacier, from which Mount Sir Donald rises, a naked and abrupt pyramid, to a height of more than a mile and a half above the railway. This stately mountain was named after Sir Donald Smith, one of the chief promoters of the Canadian Pacific Railway. Farther to the left, looking from the hotel, are two or three sharp peaks, inferior only to Sir Donald, while Rogers' Pass and the snowy mountain beyond (part of the Hermit range, which is called Grizzly, from the frequency with which bears are met upon its berry-bearing slopes), are in full view. The hotel is a handsome structure, resembling a Swiss châlet, which serves not only as a dining station for passing trains, but affords a delightful stopping place for tourists who wish to hunt, or explore the surrounding mountains and glaciers. The Great Glacier is hardly a mile away, and its forefoot is only a few hundred feet above the level of the hotel. A good path has been made to it, and its exploration is within an easy walk. A glacier stream has been made to furnish fountains about the hotel. Game is very abundant throughout these lofty ranges; their summits are the home of the bighorn sheep and the mountain goat, the latter almost unknown southward of Canada.

The Bear Creek station is 1000 ft. above the Beaver, whose upper valley can be seen penetrating the mountains southward for a long distance. The line here leaves the Beaver and turns up Bear Creek along continuing grades of 116 ft. to the mile. The principal difficulty in construction of this part of the line was occasioned by the torrents which come down, many of them in splendid cascades, through narrow gorges cut deeply into the steep slopes along which the railway creeps. The bridge that crosses Stony Creek—a noisy rill flowing in the bottom of a narrow deep ravine, 296 ft. below the rails—is one of the loftiest railway bridges in the world. Beyond Stony Creek bridge, the gorge of Bear Creek is compressed into a ravine between Mount Carroll on the left and the Hermit on the right, forming a narrow portal to the summit, with enormous precipices at each side. Mount Carroll towers a mile and a quarter above the railway in almost vertical height, its numberless pinnacles piercing the sky overhead.

The Duke of Cambridge has reopened the Sailors' Institute, Mercer-street, Shadwell, which has recently been undergoing a thorough repair.

The Goldsmiths' Company have presented a picture by Mr. G. A. Storey, A.R.A., called "The Violinist," to the Corporation of London for their art gallery at Guildhall.

At a meeting held at King's College, the Bishop of London presiding, a committee was appointed to collect funds to carry out a thorough repair of the church of St. Mary-le-Strand.

It has been decided at a special meeting of the Council of the National Rifle Association that, subject to the arrangements for acquiring additional ground being satisfactory, the offer of the Government for the use of land at Brookwood, near Aldershott, should be accepted for the annual meeting.

The first anniversary conversazione in connection with the British Nurses' Association was held on Dec. 7 at the Grosvenor Gallery. In the absence of Princess Christian, president of the association, the guests, who numbered over 1000, were received by Mr. W. S. Savory, President of the Royal College of Surgeons. This association, the only one of its kind in the kingdom, was founded just a year ago, and already its members number upwards of 1600, and branches are being formed in the Colonies. Its objects are to increase the usefulness of trained nurses by elevating the general standard of professional knowledge, and to enable the nurses to unite for mutual support. The association seeks to obtain a Royal charter to provide for the legal registration of its members, and so protect the public from the numerous unskilled women who at the present time are acting as nurses.

An appeal is being made by the council of Bedford College for public contributions towards the enlargement of the college premises, the object of the enlargement being the provision of improved laboratories and of accommodation at an economical rate for students of narrow means. It is proposed that the new buildings should be called the "Shaen Wing" in commemoration of the late Mr. William Shaen, who took an active interest in the management of the college from its earliest days. Bedford College is now the principal college for women in London. The number of its students has risen from 68 in 1873 to 118 in 1887. Of the 152 women who are Masters and Bachelors of Arts of the University of London, 51 have been students of Bedford College; and of the 21 women who are Doctors and Bachelors of Science, 12 have been students of the same institution. Contributions may be sent to the chairman, Dr. Russell, F.R.S., 34, Upper Hamilton-terrace, N.W.; or to the honorary secretary, Bedford College.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

ALIQUIS.—The book can be obtained from the office of the *British Chess Magazine*, 19, Bayley-street, Leeds.

A W YOUNG.—Marked for further examination.

A C CLARKE (Bristol).—They shall be duly examined.

W GILRAVE.—Shall be reported upon next week.

MRS KELLY.—We shall be sorry to miss you, and hope you will have time to do both.

HEREWARD.—Problem No. 2330 is sound as a bell.

W T PIERCE.—The failure to describe it as a "Pierce Gambit" is an oversight we cannot understand. Thanks for your game, which shall receive attention.

J C COLEMAN (Chippenham).—Apply to Mr. Adamson, City Chess Club, Newgate-street, who has had most experience of such things. Your solution of No. 2330 is wrong.

MONA.—You can have as many Queens as you can get Pawns to their eighth square. There are no special means of indicating the new Queens; an inverted Rook is generally used.

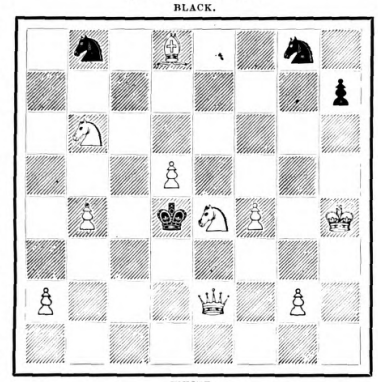
M JACKSON.—Please send us an amended diagram. We cannot undertake to make alterations.

D H S (St Austell).—If, in No. 2326, Black moves his Kt, White mates with Q at Q Kt 4th.

R D F (St Andrews).—Your suggested defence to the King's Gambit does not amount to much. The game continues—7. P to Q 4th, Q to R 5th (ch); 8. K to B sq, with a good game.

O Q K.—We cannot understand your position. Is White's Rook to move, or has it moved?

CORRECT SOLUTIONS OF PROBLEM NO. 2327 received from Emil Frau (Lyons), J W Shaw (Montreal), An Old Lady (Paterson, U.S.A.), and James D Hannan (Lockerbie); of No. 2328 from Blair H Cochrane and Paul von Szávos (Vienna); of No. 2329 from W E Cartwright, J T Pullen, Alpha, R Elliott, E G Boys, J J Baker, Ch-lwell, J Bridge, G W G Brodie, J A Schmucke, Hereward, W Heitzmann, T G (Ware), and W H Morris.



CORRECT SOLUTIONS OF PROBLEM NO. 2330 received from R Worters (Canterbury), John S Moorat (Boulogne), Wawor, T H Wilson, Dawn, Jupiter Junior, Martin F. Cobb (Paris), A Newman, J J Coad, W H D (Woburn), J G Finney (Loughton), R Elliott, R F N Banks, W E Leveson (Cambridge), Cholwell, W H Baillem, Howard A, F C Cook (Reading), W W Hardman, A W Hamilton Gell, J Hepworth Shaw, C E P, Dr Waltz (Heidelberg), Emil Frau, Arthur Emanuel, J Hurley Smith, F G Tucker, G W G Brodie, W Foster (Clayton), S W Hooper, Columbia, J Saze, C S, S Louden, H E Maxted, Joseph T Pullen, James Margate, F W Enser (Cardiff), Alquis, A W Young, Ruby Rook, Quidnunc, W Von Beverhoudt, G J Veale, J Rose (Whitley), J Bridge, E P, J Dixon, L Desanges, E J Winter Wood, Dane John, J A Schmucke, J Hall, Bentcher, Bourne Endy, Coggeshall Chess Club, C Worrall, E Lucas, Mrs Kelly, W E Cartwright, W P Welch, T Roberts, W Heitzmann, T G (Ware), Blair H Cochrane, J G Hoskin, Thomas Chown, Julia Short, E G Boys, Bernard Reynolds, R H Brooks, Lieutenant-Colonel Loraine, Sindforth, W Fry, J D Tucker (Leeds), G V (Brentwood), L E Poynting, the Rev Winfield Cooper, and Dr Law (Sheffield).

SOLUTION OF PROBLEM NO. 2328.

WHITE.	BLACK.
1. K to Kt 3rd	K moves
2. R to R 2nd	K moves
3. R to R 8th	K moves
4. R to Q 8th. Mate.	

PROBLEM NO. 2332.
By E. J. WINTER WOOD.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS IN LONDON.

Game played between Messrs. F. HEALEY and J. G. CAMPBELL.
(*French Defence*).

WHITE (Mr. H.)	BLACK (Mr. G.)
1. P to K 4th	P to K 3rd
2. P to Q 4th	P to Q 4th
3. P to K 5th	P to Q B 4th
4. P to Q B 3rd	Kt to Q B 3rd
5. P to K B 4th	

Kt to B 3rd is the usual move.

5.	Kt to R 3rd
6. Kt to K B 3rd	B to K 2nd
7. B to Q 3rd	P to K Kt 3rd
8. P to Q B 3rd	P to Q R 4th
9. B to K 3rd	P to B 5th
10. B to B 2nd	P to Q Kt 4th
11. Q Kt to Q 2nd	B to R 5th (ch)
12. P to Kt 3rd	B to K 2nd
13. Castles	P to R 5th
14. Q to K 2nd	Kt to K Kt 5th
15. Kt to Kt 5th	Kt takes B
16. Q takes Kt	R to R 2nd
17. Q Kt to B 3rd	P to K R 3rd
18. Kt to R 3rd	Kt to B sq

Castling is obviously risky.

19. Q R to K sq	K to Kt 2nd
20. P to K Kt 4th	P to K R 4th
21. P to Kt 5th	

P to B 5th is a better move, and would have certainly led to a more lively game. The following seems a likely continuation:—P takes Kt P, 22. P to B 6th (ch), B takes P (better than moving the King); 23. P takes B (ch), K to Kt sq; 24. Kt from B 3rd to Kt 5th, P takes Kt; 25. R takes P, with a great advantage of position.

21.	Q to Kt 3rd

Black, having securely entrenched his King, now commences a spirited attack on the Queen's flank.

22. Q to Q 2nd	

A weak move, the vigour of Black's onslaught being scarcely appreciated.

WHITE (Mr. H.)	BLACK (Mr. G.)
22.	P to Kt 5th
23. B P takes P	Kt takes P

A bold sacrifice; but one that greatly weakens White's Kt P.

24. P takes Kt	B takes P
25. Q to B sq	B takes R
26. K takes B	B to Q 2nd
27. Kt to B 2nd	R to Q Kt sq
28. Kt to Q sq	Q R to Kt 2nd
29. R to K 3rd	Q to R 4th
30. K to B 2nd	R to Kt 5th
31. Q to Q 2nd	Q to R 2nd

All this part of the game is well played by Black.

32. R to B 3rd	K R to Kt 2nd
33. K to Kt 3rd	Q to Kt sq
34. Q to K 3rd	R takes P

Black can hardly hope for more than a draw, but his strategy to secure this is admirable.

35. Kt takes R	R takes Kt
36. B to Q sq	R to R 7th
37. Kt to K sq	Q to Kt 8th
38. B to B 2nd	Q to Kt 7th
39. Kt to Kt 2nd	P to R 6th
40. P to B 5th	B to R 8th
41. P to B 6th (ch)	K to R 2nd

The King's move is of importance, the one here adopted being the best.

42. Kt to K sq	B takes B
43. R takes B	Q to Kt 6th
44. Q takes Q	P takes Q
45. R takes R	P to Kt 7th
46. R takes R P	P (a Queen)
47. Kt to B 3rd	Q to Kt 2nd
48. P to R 4th,	

Drawn game.

A new chess club has been successfully started at Chippenham, and meets, under the presidency of Captain A. B. Rooke, at the Temperance Hotel. The hon. secretary is J. Charles Coleman, M.R.C.V.S.

We have received the preliminary programme of the sixth American Chess Congress, which is circulated with a view of obtaining suggested amendments from the public and intending players. It is much too long for even a summary in this column; but, in the main, follows the rules of the London Congress of 1883, and is, so far, in little need of improvement. The chief novelty is Rule 17, which has been devised for the purpose of getting over the difficulty caused by players retiring in the middle of the tourney. The attempt is ingenious, but seems to create by its complexity much more trouble than it obviates, and we shall watch with interest the results of its adoption. The fairest plan seems to be to cancel all games played by a retiring competitor; which, we think, might be safely adopted in lieu of that suggested by the American Committee. The amount collected so far for the purposes of the Congress exceeds £1000, and the minimum amount of prizes offered is £750. The winner is liable to a challenge for the Championship of the World, providing not less than four European players compete in the tourney, and a liberal provision is made for his benefit in the event of being compelled to play, whatever may be the result of the Championship Match. We understand Mr. Steinitz is a likely competitor.

In the competition for the Metropolitan Senior Cup a match was played on Nov. 27 between the North London and Brixton Chess Clubs. The former had matters all its own way and ultimately won by 8½ games to 2½.

PARISIAN SAYINGS AND DOINGS.

(From our own Correspondent.)

The political week has been marked by the usual noisy scenes in the Chamber, this time aggravated by a commencement of pugilism between two deputies. The main interest, however, is outside Parliament, in the polemics which are caused by the approaching general elections, and by the discussion of the tactics of the enigmatic Boulanger, whose utterances are commented upon variously by his various allies. His last manifesto at Nevers terminated, as usual, with the cry of "Vive la République!" but, at the same time, the orator spoke most kindly of the coup d'état and its author, and also of the partisans of Royalty; still, he was perhaps just a little too Republican, and both Bonapartists and Orléanists make reserves in their approval of the manifesto, without, however, denouncing the Boulangist pact to which they are both parties. The General's allies are not absolutely displeased, but they are no longer enthusiastic. This symptom is noteworthy, because it shows how difficult the rôle of Boulanger will become when he has to concert with his Monarchist and Imperialist allies as to the line of conduct to be followed when the day of battle arrives. Will there be a plébiscite, or a Constituante, or what? The Bonapartists demand the former, the Royalists the latter, and the chances are that, in the midst of the squabbling, the Republic will come out victorious after all.

The Income Tax Bill may be considered already rejected. The Commission appointed to examine the Bill has elected M. Jules Roche president, and the majority of the members of the Commission are hostile, not only to this present Bill, but to any kind of income tax. The Commission will present a very strong report against the whole principle of income taxation.

A last echo of the funereal Baudin manifestation on the anniversary of Dec. 2: the Municipal Council has changed the name of the Boulevard Haussmann to that of Boulevard Baudin. This is black ingratitude and rank folly; but for both these defects the Municipal Council is famous.

The new extraordinary war Budget amounts in all to the sum of 770,731,000*f.* Out of this total, credits have already been opened to the amount of 228,335,000*f.* For the remnant, 542,396,000*f.*, there is only a *reliquat* of 55,000,000*f.* to be disposed of. Where is the rest to come from? From loans without guarantee? M. De Freycinet is anxious to take serious measures to meet these expenses. But what measure can be taken? How can a country live and prosper with a floating debt to which a milliard is added from time to time in this calm way?

The question of Mont Saint Michel was the subject of a lively debate in the Chamber a few days ago. A Radical deputy made a furious attack against the architect, M. Ed. Corroyer, whom he accused of clericalism and of being a member of the *conseil d'administration* of the Œuvre des Frères de la Doctrine chrétienne. In order to curry favour with the Radicals the new Director of the Fine Arts Department, M. Larroumet, has revoked M. Corroyer from his functions. This is regrettable. M. Corroyer has devoted fifteen years of his life to the restoration of Mont Saint Michel, and he has always acted by the orders of the Fine Arts Department, which has hitherto been satisfied with his archæological knowledge, and never inquired into his personal opinions and sympathies.

M. Auguste Vacquerie's new comedy "Jalousie," produced at the Gymnase, is an absolute failure. In reality it is a comedy *de cape et d'épée*, but M. Vacquerie has made the mistake of dressing his characters in contemporary costume, and so their actions, attitude, and language excite contemptuous laughter instead of pleasurable interest. M. Vacquerie, who is a veteran of the old romantic school, is furious at the want of respect which the public have shown for his work, and cannot realise the fact that his piece is very bad, as bad as it can be, although the author is also the author of "Tragaldabas" and "Jean Baudry," and a great poet in the esteem of Algernon Charles Swinburne.

Experiments have been made at Joinville of a new system of mechanical traction for canal service invented by M. Maurice Lévy, member of the Institute. This consists of an endless wire-rope fixed along the two banks of the canal on supports provided with pulleys and driven by a stationary engine. The boats hook on to this cable just as tramways hook on to the underground cables in use in many towns. The rate of progression will be two miles and a half an hour, and the cost of traction half that of horse-traction. This new system is to be applied to the whole of the French canal system.

Plaisanterie, winner of the Cambridgeshire and Cesarewitch in 1887, was sold by auction the other day at Chantilly, and bought by Sir Tatton Sykes for 60,000*f.* The sale attracted a great concourse of sportsmen, who all regretted that the celebrated mare was to leave France.—Encouraged by the success of the Patti performances, the directors of the opera announce that the tenor Gayarré will sing "L'Africaine" and "La Favorite" in April. Thus it seems the disastrous "star" system is to become the rule at the Paris opera as it is in Buda-Pesth or Rio Janeiro. La Patti comes back to Paris on Dec. 17 to continue her performances. — The irrepressible General Boulanger is about to plead for a divorce from his wife. The General's son-in-law, Captain Driant, is following in the footsteps of his father-in-law. The walls of Paris are covered with flaring posters announcing the issue in penny parts of "La Guerre de Demain," by "Captain Danrit," the anagramme of Driant. The Minister of War, M. De Freycinet, has sent Captain Driant to prison (*aux arrêts*) for thirty days for indiscipline. The Captain ought to have asked permission of the War Office before publishing his book.—T. C.

Mr. A. J. Balfour, M.P., presided at the thirty-ninth anniversary dinner of the National Orphan Home, and in proposing the toast of the evening made an earnest appeal for this valuable institution. Contributions to the amount of £730 were announced.

The Lord Mayor presided on Dec. 7 over the annual meeting of the Surgical Aid Society, held at the Cannon-street Hotel. He said that the benefits which the charity dispensed were increasing year by year. In connection with the meeting, donations to the amount of £370 were announced.

A meeting was held on Dec. 7 of the finance committee of the Mansion House Fund in connection with the holding of the Metropolitan Exhibition of the Royal Agricultural Society next year. The fund was reported to amount to £4300, and Mr. Walter Gilbey handed in various additional donations amounting to £278 which he had collected. Mr. Jacob Wilson said the prize list at the exhibition would be the most comprehensive of its kind ever offered. The exhibition would be open on Monday, June 24, and continue the whole week. It was resolved unanimously to contribute £4000 from the Mansion House Fund towards the prizes, and the Lord Mayor was requested to make a further appeal for donations towards this special fund. The Lord Mayor (who presided) said as a Westmorland man he should like to offer a 20 guinea prize for the best Herdwick ram of any age, and Mr. Wilson accepted the offer on the part of the society.

OBITUARY.

SIR WALTER GEORGE STIRLING, BART.

Sir Walter George Stirling, Bart., of Faskine, in the county of Lanark, J.P. and D.L. for Kent and Middlesex, died at his residence in Portman-square on Dec. 1, in his eighty-ninth year. He was only son of Sir Walter Stirling, M.P., on whom the baronetcy was conferred in 1800, and grandson of Sir Walter Stirling of Faskine, Captain R.N., a distinguished naval officer. The deceased Baronet was educated at Westminster and Christ Church, Oxford. He married, Aug. 18, 1835, Lady Caroline Frances Byng, daughter of John, first Earl of Strafford, G.C.B., and had two sons and two daughters. Of the former, the elder, Walter, died unmarried June 5, 1862, and the younger, Colonel Walter George, R.A., now succeeds as third Baronet. He was born Sept. 6, 1839; and married, Oct. 15, 1875, Viscountess Clifden, daughter of Mr. F. C. W. Seymour, and sister of the present Countess Spencer.

LIEUTENANT-COLONEL TROTTER, M.P.

Lieutenant-Colonel Henry John Trotter, of Byers Green Hall, in the county of Durham, M.P. for Colchester, died from an accident in hunting. He was second son of the late Lieutenant-Colonel William Trotter, who was also killed out hunting in 1866. The gentleman whose death we record was a barrister, a Fellow of the Society of Antiquaries, and M.A. of Oriel College, Oxford.

We have also to record the deaths of—

Major Alexander H. Ross, M.P., suddenly at 9, Upper Berkeley-square, aged fifty-eight.

Lady Georgiana Needham on Dec. 3, at Datchet House, Datchet, at the age of ninety-three years. She was the sixth of the eight daughters of Francis, first Earl of Kilmorey, and great-aunt to the present Earl.

The Rev. Samuel Earnshaw, assistant minister of Sheffield parish church, on Dec. 6, at the age of eighty-three. In 1831 Mr. Earnshaw was Senior Wrangler and first Smith's prizeman. He was a most successful coach at Cambridge for sixteen years, and had been in his present position at Sheffield since 1847.

Colonel George Churchill Bartholomew, late of the 10th and the 109th Regiments, suddenly on Dec. 2, aged fifty-eight. He was third son of the late Archdeacon Bartholomew of Morchard Bishop, Devon, entered the Army in 1850, and saw service in India and Abyssinia.

Mr. Edward Cutler, Q.C., has been elected a Bencher of the Honourable Society of Lincoln's Inn in succession to the late Sir Richard Baggallay.

The Grocers' Company have contributed £100 and the Clothworkers' Company £50 to the Mansion House fund in connection with the next Metropolitan Exhibition of the Royal Agricultural Society.

At a meeting of guarantors of the Leeds Musical Festival held on Dec. 6, it was stated that the guarantee fund now reaches £25,000, being about £7000 in advance of the amount subscribed three years ago.

Mr. Deputy Hart, who has represented the Ward of Coleman-street for some years in the Court of Common Council, has been unanimously elected an alderman in the room of Mr. J. E. Saunders, resigned.

The Marquis of Lorne presided on Dec. 6 at a meeting in the Holborn Townhall to promote the establishment of four technical schools—in Finsbury, Hackney, Islington, and St. Pancras. A resolution was adopted pledging the meeting to endeavour to raise the £200,000 needed to accomplish the work.

The Drury-lane Working Girls' House and Day Nursery has been instituted to help the girls living in the crowded district of Drury-lane who, just leaving school, are earning their own livelihood or seeking employment. A report fully explaining the work which is carried on under the direction of a committee of ladies, will be sent on application to the hon. treasurer, Mr. W. Fortescue Barratt, 73, Drury-lane. Funds are urgently needed to meet the current expenses.

The Earl of Limerick has given an unsolicited reduction of 20 per cent to the numerous tenantry on his Irish estates. Reductions amounting to close upon 50 per cent have also been made, without solicitation, to his Lordship's town tenants, occupiers of houses, and small plots.

The fourteenth anniversary dinner of the Metropolitan Dairymen's Benevolent Institution took place on Dec. 6 at the Freemasons' Tavern, Mr. William Low occupying the chair. There was a very large attendance, and the donations announced amounted to about £600.

Two small stained-glass windows, from the studio of Messrs. Warrington and Co., have been placed in the chancel of Charlton Abbots Church, Gloucestershire.—The parish church of Glossop, Worcestershire, has received a two-light stained-glass window representing "The Good Samaritan," designed and executed by Messrs. Mayer and Co.

An exhibition of works of art in black and white will be held this Christmas at St. Jude's Schools, Whitechapel. An exhibition on similar lines was held two years ago at the same place, which, like this one, was in connection with the series of exhibitions of oil-paintings which have taken place at Easter for some years past. The exhibition will open on or about Christmas Day, and will remain open about three weeks.

The marriage of Mr. C. Orr-Ewing, son of Sir Archibald Orr-Ewing, Bart., M.P., with the Hon. Beatrix Ruthven, only daughter of Lord and Lady Ruthven, was solemnised in St. Mary's Episcopal Church, Hamilton, near Glasgow, on Dec. 5, in the presence of numerous relatives and friends of both families. Captain James Orr-Ewing, 16th Lancers, was the best man; and the four bridesmaids were Lady Esther Gore, Miss May Hozier, the Hon. Adele Hamilton, and Miss Violet Orr-Ewing. The youthful bride was given away by Lord Ruthven, her father.

ESTABLISHED IN THE REIGN OF GEORGE III.

THE LADIES' COLUMN.

London shops are full of more or less expensive trifles and novelties designed for Christmas and New-Year's presents. There is endless variety in style and in price. According to your means and generosity you may select from one and the same shop-window either a diamond tiara in shape and brilliancy like to the rays of the half-set Southern sun—or a little flat case of metal, looking like a sovereign purse, but really being a pocket receptable for face-powder and puff. The one will cost you a thousand and fifty pounds, the other is only a shilling; but the same shopman will sell you either—or both. In another place, the humble sixpence may be employed to purchase a handkerchief of cambric shaped like a vine-leaf and having the edges outlined with coloured thread in machine button-hole stitch—or you may buy a flounce of old point lace rarer than, and as costly as, a parure of precious stones. Or for yet another illustration, see in this fancy shop-window how the three-and-sixpenny feather fan, made from short ostrich tips and goose-wing plumes, modestly hides in a corner behind the same plate-glass where the splendid "lyre" fan of fine ostrich feathers at five guineas occupies the post of honour. So there is no difficulty in suiting the purse. Giving presents has many other difficulties about it, however, besides that of finding an article of the price that one can afford. It is hard to choose what is wanted and what is suitable; it is hard to select from amidst the wide possibilities open something that shall not hurt the recipient as being either too cheap ("What a mean gift!") or too costly ("What a slur on my poverty! What purse-pride!"); and it is hard to know how a particular present will fit in with the possessions that the recipient already enjoys. Never mind! Gifts grease the wheels of life. It is so sweet to be thought of, so pleasant to be valued, that for one churl who so receives a gift that you would wish you had not offered it did you know his reflections and words about it, there will surely be many whose hearts will be warmed and whose thoughts will be made more genial by the receipt of a token of your friendly remembrance.

There are some things which it is scarcely possible to go wrong in giving, and others, on the precise contrary, with which it is difficult to go right. In the last category come bonnets—the becomingness and style of which are matters so much of individual taste that it is almost sure to be a blunder for another person to buy one without consulting the intended wearer. Books, again, unless the tastes or wants are specifically known, are very likely to disappoint. In jewellery, on the other hand, it is easy to please. A white or a black fan can hardly fail to be acceptable. A novel nick-nack for the drawing-room, or for table decoration, will give pleasure to the mistress of a house; while gloves or lace will always be welcome to a young woman, if given by anybody in a position to justify such personal tributes.

It is a far harder task for a lady to find nice presents to give a gentleman than vice-versâ. Woolwork slippers and embroidered smoking-caps are *rococo*. In the shops there seems to be hardly anything for masculine tastes but apparatus for smoking: an odious and selfish practice to which, happily, not quite all men are given! For those who are, there are silver match-boxes, silver cigarette-cases, canes which open at the top to take in a cigar and a few matches, pipe-cases in wood made like a five-barred gate with a rack for the pipes hanging from the top bar, billiard-balls fixed three on a stand and pierced for cigarettes, matches, and ash respectively. A letter-wallet, for carrying in the breast pocket, whether made in plain morocco or in crocodile leather, with silver corners, is not a bad present. Paper-knives and ink-bottles are made in bewildering variety; but one such object lasts a lifetime, and others are superfluous. Photograph-cases and even pincushions might sometimes not be despised, and, of course, there are various articles of jewellery available. But when all is thought of, presents for gentlemen are difficult to find compared with the abundance of choice that there is in gifts for us.

Well, after all, theirs is the present-making sex, and ours the present-receiving one! We make a present of ourselves and our domestic care and service, but we receive material return, as a rule; and oh! there are heaps of pretty things that can be given to women—quite an embarrassment of choice. New fans are prominent for prettiness and novelty. What are described as Empire fans do not close. They are stiff constructions, either of gauze drawn over wire in an oval shape, painted, or nearly covered with beautifully-made artificial flowers; or they are of feathers. In feather fans there is great variety, some closing in the ordinary manner, while others in numerous shapes and sizes remain open. One variety has three great ostrich feathers arranged like Prince of Wales's plumes, the centre one being eighteen inches long. Another looks fuller with six ostrich feathers fronted by a cluster of marabout and an aigrette of osprey. The narrower "lyre" shape is now to be had in shaded feathers to match any gown, as well as in the familiar black, white, and grey. All these fans have their short, stiff handles tied with long loops and ends of moiré ribbon, or of tulle, in colour to match the dress, and serving not only for smartness, but also to hang the fan by upon the wrist. Then there are novel gauze fans. One is cut into the shape of a butterfly, the thick body affixed to the stick handle down the centre, the transparent wings spread out and coloured in delicate tints. Another kind of gauze fan is shaped and painted to imitate a group of three enlarged flowers, natural in colour and as far as may be in form—one in the centre, and one on either hand: pale yellow sunflowers, mauve and purple pansies, delicate grey and yellow irises, and pale pink and white chrysanthemums are the several flowers that I have seen thus imitated, with white, grey, and gold sticks respectively, and long streamers of moiré ribbon to match. Leaf-fans are made in strong *crêpe de Chine*, the entire fan (somewhat more narrow than the usual size of a closing fan) gives the shape of the leaf, and the several points (a horse-chestnut or other serrated leaf being always chosen) are represented at the tips of the successive sticks; the colour is either plain olive-green or the beautiful variety of tints of fading foliage which combine with so many colours in gowns.

In jewellery, too, there is novelty. No doubt, as was said at the recent Art Congress—"Fashion is change, but it is not progress"; the ideas involved in the two words are by no means the same. But variety is the spice of existence, and that which is new has a charm, irrespective of whether it is more or less artistic than the old. A diamond brooch made like a big hook and eye may not be as graceful as one resembling a swallow in full flight; a diamond frog is decidedly less elegant than a star; and a bird's merry-thought has less poetic associations than a crescent—but crescents, stars, and swallows are commonplace; the other objects are novelties in form for diamond ornaments. Other new ideas for brooches are a parrot with coloured enamel body and diamond head and claws; a fly with chrysolite head, nacre body, and diamond wings; a diamond chicken on a gold bar contemplating a broken egg-shell in white enamel; a pretty face carved in moonstone with poke bonnet in diamonds; a golden spray of mistletoe, with pearl berries; and enamel imitations of pansies, forget-me-nots, or violets, each flower with a tiny diamond dew-drop in its midst. The new short chains for watches, which I have previously described, would be acceptable to many women, as the longer watch-guards which we all possess are quite unwearable at present. The revival of Directoire and Moyen-Age fashions has brought in again the use of châtelaines, which are now to be seen in every large jeweller's shop. Pencils, scent-bottles, and even tiny note-books are now placed, as watches have for some time been, in the centre of bangles. In short, the variety of pretty things at command, as I commenced by saying, is infinite. The *Lady's Pictorial* for Dec. 8 is full of illustrations of such things. It is a special Christmas-present number, and should be consulted by anybody living too far away to see for themselves the bright and interesting shop-windows which I have been studying.

FLORENCE FENWICK-MILLER.

THE MANUFACTURING

GOLDSMITHS' & SILVERSMITHS' COMPANY,

Show-Rooms: 112, REGENT-STREET, LONDON, W. (Adjoining Stereoscopic Company)

Supply the Public direct at Manufacturers' Cash Prices, saving Purchasers from 25 to 50 per Cent.

HIGH-CLASS JEWELLERY. The Stock of Bracelets, Brooches, Earrings, Necklets, &c., is the largest and choicest in London, and contains designs of rare beauty and excellence not to be obtained elsewhere, an inspection of which is respectfully invited.

ORIENTAL PEARLS.—Choice strung Pearl Necklaces, in single, three, or five rows, from £10 to £5000; also an immense variety of Pearl and Gold mounted Ornaments, suitable for Bridesmaids' and Bridal Presents.

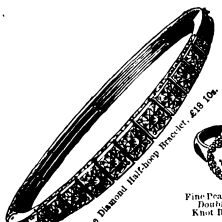
PEARL and DIAMOND ORNAMENTS. A magnificent and varied collection to select from.

BRIDAL PRESENTS. Special attention is devoted to the production of elegant and inexpensive novelties suitable for Bridesmaids' Presents. Original designs and estimates prepared free of charge.

WEDDING PRESENTS.

COMPLIMENTARY PRESENTS.

CAUTION.—The Company regret to find that many of their Designs are being copied in a very inferior quality, charged at higher prices, and inserted in a similar form of advertisement, which is calculated to mislead the public.



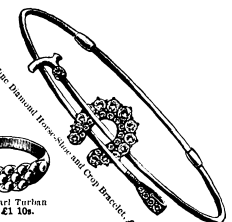
They beg to notify that their only London retail address is 112, REGENT-STREET, W.

CHRISTMAS PRESENTS.

NEW YEAR'S GIFTS. An immense variety of inexpensive articles, specially suitable for presents. Every intending purchaser should inspect this stock before deciding elsewhere, when the superiority in design, quality, and price will be apparent.

WATCHES.—Ladies' and Gentlemen's Gold and Silver, most accurate timekeepers, at very moderate prices.

CLOCKS.—A large assortment, suitable for travelling or for the dining-room, drawing-room, &c., from 25s. to £100.



Fine Pearl and Diamond Double Heart and Knot Ring, £18 10s.

DIAMOND ORNAMENTS. A magnificent assortment of Rings, Stars, Sprays, Flies, Necklaces, &c., composed of the finest White Diamonds, mounted in special and original designs, and sold direct to the public at merchants' cash prices.

SAPPHIRES from Ceylon, but with London cutting, mounted alone, or with Diamonds, in a great variety of ornaments.

NOVELTIES.—A succession of Novelties by the Company's own artists and designers is constantly being produced to anticipate the requirements of purchasers.

CASH PRICES.—The Company, conducting their business both in buying and selling for cash, are enabled to offer purchasers great advantages over the usual credit houses. All goods are marked in plain figures for cash without discount.

APPROBATION.—Selected parcels of goods forwarded to the country on approval when desired. Correspondents, not being customers, should send a London reference or deposit.

COUNTRY CUSTOMERS have through this means, the advantage of being supplied direct from an immense London stock, containing all the latest novelties, and which are not obtainable in provincial towns.

COLONIAL AND FOREIGN Orders executed with the utmost care and faithfulness under the immediate supervision of a member of the Company. Where the selection is left to the firm, customers may rely upon good taste and discretion being used, and the prices being exactly the same as if a personal selection were made.

TESTIMONIALS.—The numerous recommendations with which the Goldsmiths' Company have been favoured by customers, is a pleasing testimony to the excellence and durability of their manufactures.

OLD JEWELLERY, Diamonds, and Plate taken in exchange or bought for cash.

MEDALS.—Awarded Several Gold and Prize Medals and the Legion of Honour, a special distinction conferred on this Firm for the excellence of their manufactures.

CATALOGUE, containing thousands of designs, beautifully illustrated, sent post-free to all parts of the world.

GOLDSMITHS' AND SILVERSMITHS' COMPANY, 112, REGENT-STREET. CATALOGUE POST-FREE.

SPEARMAN & SPEARMAN, PLYMOUTH.

MELLIN'S FOOD.

FOR INFANTS AND INVALIDS.

Allen & Hanbury's "Perfected" COD-LIVER OIL.

"Is as nearly tasteless as Cod-Liver Oil can be."—Lancet.

"Has almost the delicacy of salad oil."—Brit. Med. Journal.

"No nauseous eructations follow after it is swallowed."—Medical Press.

It can be borne and digested by the most delicate; it is the *only* oil which does not "repeat"; and for these reasons the most efficacious kind in use. In capsuled Bottles only, at 1s. 6d., 2s. 6d., 4s. 9d., and 9s.

Sold Everywhere.

BYNIN, LIQUID MALT, forms a valuable adjunct to Cod-Liver Oil, being not only a highly-concentrated and nutritious Food, but a powerful aid to the digestion of all starchy and farinaceous matters, rendering them easy of assimilation by the most enfeebled invalid. BYNIN, being liquid, is entirely free from the inconvenient treacle-like consistence of ordinary Malt Extract; it is very palatable, and possesses the nutritive and peptic properties of malt in perfection. It is a valuable ailment in Consumption and Wasting Diseases. **In Bottles, at 1s. 9d. each.**

DR. SMILES'S WORKS.
LIVES OF THE ENGINEERS. Illustrated. 5 vols. 7s. 6d. each.
"We cannot but refer to the captivating and instructive columns which Mr. Smiles has devoted to the 'Lives of the Engineers,' a record not before attempted of the achievements of a race of men who have conferred the highest honour and the most extensive benefits on their country."—Edinburgh Review.
LIFE OF GEORGE STEPHENSON. With Illustrations. 5s., 7s. 6d., or 9s. 6d.
"We have read this book with unmingled satisfaction. We hardly ever remember to have read a biography so thoroughly unaffected. . . . It is an artless attempt to set out the character and career of one of the most ingenious, honest, resolute, homely, and kind-hearted of human men. The entire style of the work is unambitious, lucid, thoroughly manly and good."—Saturday Review.
JAMES NASMYTH, ENGINEER; An Autobiography. Illustrated, 6s.
"The whole range of literary biography may be searched in vain for a more interesting record of an active, useful, successful, and happy life, than is presented by the delightful autobiography of James Nasmyth."—Edinburgh Review.
A few copies of the Large Paper Edition, with Portrait etched by Rajon, 8vo, 10s., may still be obtained.

JOHN WALKER, 72, Cornhill; and 220, Regent-street.

WILLS AND BEQUESTS.

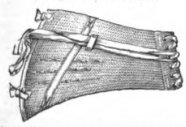
The will (dated March 13, 1888) of Mr. Robert Hampson, late of Enville House, Bowden, Cheshire, who died on Aug. 16, was proved on Oct. 1, at the Chester District Registry, by Richard Hampson Joynson, Edward Walter Joynson, and Richard Clifford Smith, the nephews and executors, the value of the personal estate amounting to upwards of £146,000. The testator gives £5000 to Miss Augusta Van Voigt; £1000 each to the children of Mrs. Emily Gaddum, Richard Hampson Joynson, and Edward Walter Joynson; £7000 to Miss Edith Mary Barratt; £2000 each to Richard Clifford Smith and Edward Walter Joynson; £500 to the Manchester City Mission; £200 to the church at Aberfoyle, Perthshire; £2000, upon trust, in aid of the stipend of the minister there; all his interest in the house, lands, farms, and shooting at Aberfoyle to his sister, Mrs. Mary Jane Smith; and other legacies to relatives and servants. He gives and devises Enville House, with the lands and premises adjoining, the furniture and effects therein, and his land in Canada, to Richard Hampson Joynson. The residue of his real and personal estate he leaves between John Hampson Jones, Emily Mary Smith, Marion Beatrice Smith, Henry Theodore Gaddum, the Rev. Robert Trousdale, Richard Hampson Joynson, Edward Walter Joynson, and Richard Clifford Smith, in equal shares.

The will (dated March 7, 1883) of Mr. Emanuel Boutcher, late of No. 36, Hyde Park-gardens, and Grateley House, Grateley, Southampton, a member of the firm of Boutcher, Mortimore, and Co., of Bermondsey and Liverpool, who died on Sept. 14 on board his steam-yacht Fiona, was proved on Nov. 30 by Mrs. Emily Isabella Boutcher, the widow, William Emanuel Boutcher, the son, Foster Mortimore, and Alfred William Lafane, the executors, the value of the personal estate being sworn to exceed £91,000. The testator after directing that he is to be buried in wicker or some other material that will not arrest decay, gives his land in America, all the money in his house, at his banker's, and due to his estate from his partnership business, to his wife and five children, as tenants in common; numerous specific bequests of stocks and shares in companies to his children; £500 each to Foster Mortimore and Alfred William Lafane, and all his cigars between them and his son Emanuel. The residue of his property he leaves to his wife and son, William Emanuel, in equal shares.

The will (dated July 2, 1881), with a codicil (dated Oct. 5, 1885), of Mr. William Rivington, late of No. 39, Phillimore-gardens, Kensington, who died on Nov. 12, was proved on Dec. 1, by Mrs. Jane Rivington, the widow, the Rev. Thurston Rivington, the son, and Charles Robert Rivington, the nephew, the executors, the value of the personal estate exceeding £79,000. The testator bequeaths £100 each to the Incorporated Church Building Society, the Society for Promoting Christian Knowledge, and the Society for the Propagation of the Gospel in Foreign Parts; £200 to the Society for the Employment of Additional Curates; £500 and all his household furniture, plate, &c., to his wife, and legacies to his nieces. The residue of his property he leaves, upon trust, to pay the annual sum of £1740 to his wife for life, and the remainder of the income to his five children, William John, Thurston, Sophia, Mrs. Dorothy Leach, and Mrs. Alice Brewster. On the decease of his wife, he gives £8000 each to his daughters, Sophia, Mrs. Dorothy Leach, and Mrs. Alice Brewster; £12,000 to his son Thurston, and devises his freehold land and houses in St. John's-square, Clerkenwell, to his sons, Thurston and William John. The ultimate residue he leaves to his said three daughters, his son Thurston, and his daughter Mrs. Susan Jane Chappell, in equal shares.

The will (dated March 17, 1888) of John Ashworth, late of Ollerton, near Bolton, Lancashire, cotton spinner, who died on Sept. 18 last, was proved on Nov. 14 by Mrs. Mary Jane Ashworth, the widow, Walter Ashworth, the son, and William Kevan, the executors, the gross value of the personal estate exceeding £59,000. The testator, after stating that his wife is well provided for and giving her the use of his furniture, for life, leaves all his property between his children, his executors having the option of carrying on his mills or selling them at once.

The will (dated April 16, 1883) of Mr. William Baker, late of No. 43, Warrior-square, St. Leonards-on-Sea, who died on Oct. 14, was proved on Dec. 1 by Mrs. Catherine Baker, the widow, Frederick Arnold Baker, Percival Alleyn Nairne, and Walter John Frederick Tomlinson, the executors, the value of the personal estate being sworn to exceed £35,000. The testator bequeaths £200 and all his furniture, plate, carriages, horses, wines, and consumable stores to his wife; and £200 each to Frederick Arnold Baker, his brother George Baker, Mrs. Rowsell, Cecilia Tomlinson, and Lieutenant-Colonel Nairne. The residue of his real and personal estate he leaves, upon trust, for his wife, for life, and on her decease he gives £6000 to Frederick Arnold Baker; £1000 each to his nieces, Maria Lance, Ida Tomlinson, Edith Tomlinson, and Elizabeth Tomlinson; £400 to Percival Alleyn Nairne; £500 each to Walter John Frederick Tomlinson and his brother George Baker; £100 to the Middlesex Hospital; and numerous other legacies to his relatives. The ultimate residue he leaves to his nephew, Frederick Arnold Baker.



The will (dated Nov. 21, 1882) of Frederick Gunton, late of the city of Chester, who died on Oct. 6, was proved on Nov. 23 at the District Registry of Chester, by the Rev. Frederick Gunton and the Rev. Charles Forster Gunton, the sons and executors, the value of the personal estate exceeding £27,000. The testator gives his consumable stores and wines, and the use, for life, of his household furniture to his wife, Mrs. Julia Gunton; and certain gifts of silver plate to his three sons, with a wish that they will keep them in the family. The residue of his real and personal estate he leaves, upon trust, for his wife for life, and at her death between his children—viz., Frederick, Charles Forster, Thomas Octavius, Lucy Amelia, Elizabeth Julia, and Edith Emma, in equal shares.

The will (dated Feb. 7, 1887), of Mr. Thomas Mashiter, late of "Priests," near Romford, Essex, who died on Aug. 20, was proved on Nov. 29, by Miss Julia Mashiter, the sister, the Rev. Robert Helme, and John Nesbitt Malleson, the executors, the value of the personal estate exceeding £23,000. The testator bequeaths £500 to John Nesbitt Malleson, £300 to the Rev. Robert Helme, £250 to Peter Reynolds, and legacies to servants and others. He devises his real estate, upon trust, for his sister Julia Mashiter, for life, with remainder to Robert Helme, for life, with remainder to his first and other sons, according to seniority in tail. The residue of his property he leaves, upon trust, for his sister, for life, and at her death it is to be invested in freehold property, and then to follow the trusts of his real estate.

The Lord Lieutenant of Ireland has appointed Mr. William J. O'Donnell to be High Sheriff of Limerick for the ensuing year. The Corporation had selected three names—that of Mr. William O'Brien being placed first, Mr. Dillon next, and Mr. O'Donnell third on the list.

At a general meeting of the Anglo-Australian Society of Artists the following artists were elected members:—Sir J. E. Millais, Hon. R. W. Allan, R.W.S., W. Follen Bishop, F. Bourdillon, F. Bramley, E. F. Brewtnall, J. M. Bromley, Percy Craft, Ed. Harris, A. Hartley, E. Blair Leighton, W. S. Llewellyn, J. M. M'Intosh, Frank Short, W. Christian Symons, Percy Thomas, Frank Walton, R.I., and Hugh Wilkinson.

SWANBILL BELTS
(Registered). Price 31s. 6d.

"Nothing can be better. The Swanbill Silk Elastic Belt is a real comfort."—Court Journal.

"The Swanbill Belt I recommend to all young mothers, for nothing tends to injure a woman so much as the loss of symmetry of figure. By attention a woman may almost retain her natural maiden form, even though the mother of a large family."—Madame Schild's Journal.

FOR XMAS & NEW YEAR'S GIFTS
Nothing is more suitable than ARBENZ'S Celebrated
MANDARIN RAZORS,

AND HIS UNIVERSALLY APPRECIATED

GEM AIR GUNS.
Innumerable Testimonials pronounce the former to be the best, most reliable, easiest, and cheapest high-class Razors known. They are fully warranted, and will give perfect satisfaction. ARBENZ'S GEM AIR GUNS have, like most good things, been followed by imitations which, for extra profit, are offered by some dealers as the original article. Persons wishing to purchase really reliable, powerful, effective, and well-made Gem Air Guns should insist upon having those marked with a Swiss Cross thus ✠. They may be had at the same prices as the vilest imitations made, through any respectable dealer, or direct where unobtainable otherwise. Insist upon having with every gun my descriptive circulars, giving full particulars, instructions for use, retail prices, &c. F. A. ARBENZ, 107 and 108, Great Charles-street, Birmingham.

Pears' Soap

I have found it matchless for the hands and complexion
Adelina Patti

Since using Pears' Soap I have discarded all others.
Lillie Langtry

For preserving the Complexion, keeping the skin soft, free from redness and roughness, and the hands in nice condition, it is the finest Soap in the world.
M. Sarah Bernhardt

Good Complexion! AND Nice Hands!

NOTHING adds so much to personal attractions as a bright, clear complexion, and a soft skin. Without them the handsomest and most regular features are but coldly impressive, whilst with them the plainest become attractive; and yet there is no advantage so easily secured. The regular use of a properly prepared Soap is one of the chief means; but the Public have not the requisite knowledge of the manufacture of Soap to guide them to a proper selection, so a pretty box, a pretty colour, or an agreeable perfume too frequently outweighs the more important consideration, viz.: *the Composition of the Soap itself*, and thus many a good complexion is spoiled which would be enhanced by proper care.

A most Eminent Authority on the Skin,
Professor Sir Erasmus Wilson, F.R.S.,
Writes in the JOURNAL OF CUTANEOUS MEDICINE:—

"THE use of a good Soap is certainly calculated to preserve the Skin in "health, to maintain its complexion and tone, and prevent its falling "into wrinkles. PEARS is a name engraven on the memory of the "oldest inhabitant; and PEARS' Transparent SOAP is an article of the "nicest and most careful manufacture, and one of the most refreshing "and agreeable of balms for the Skin."

TO persons whose skin is delicate or sensitive to changes in the weather, winter or summer, PEARS' TRANSPARENT SOAP is invaluable, as, on account of its emollient, non-irritant character, *Redness, Roughness and Chopping are prevented, and a clear appearance and soft velvety condition maintained, and a good, healthful and attractive complexion ensured.* Its agreeable and lasting perfume, beautiful appearance, and soothing properties, commend it as the greatest luxury and most elegant adjunct to the toilet.

Testimonial from
Madame Adelina Patti.
"I HAVE found PEARS' SOAP matchless for the Hands and Complexion."
Adelina Patti.

PEARS' Transparent SOAP. TABLETS & BALLS: 1s. each. Larger Sizes, 1s. 6d. and 2s. 6d. (*The 2s. 6d. Tablet is perfumed with Otto of Roses.*) A smaller Tablet (unscented) is sold at 6d. PEARS' Transparent SOAP.

MUSIC.

Novello's Oratorio Concerts entered on a new season—again at St. James's Hall, and conducted by Dr. Mackenzie—on Thursday evening, Dec. 6, Dr. C. Hubert Parry's "Judith" having been the work performed. It was originally produced, with much success, at the Birmingham Festival in August last, on which occasion we spoke in detail of its merits and characteristics. There is no need now to repeat opinions that were given so recently. At the London performance referred to (which took place too late for comment until now) the solo vocalists were:—Miss Anna Williams, Madame Patey, Mr. Lloyd, and Mr. Plunket Greene; the first three of whom were associated with the original Birmingham performance. That at St. James's Hall was a very effective one, especially in the choral details; the several choruses of priests, people, Assyrians, and others having well realised the dramatic intention of the composer. The three principal soloists again gave the declamatory music assigned to the respective characters with appreciative feeling; Mr. Lloyd's solos having been especially successful—particularly that beginning "God breaketh the battle." Mr. Greene possesses a good baritone voice, which he occasionally used somewhat too strenuously. The performance was ably conducted by Dr. Mackenzie, and the composer was called forward by an enthusiastic audience.

Madame Patti's concert at the Albert Hall on Dec. 11 calls for no detailed notice, the performance not differing in any material sense from its numerous predecessors.

The first of three vocal and pianoforte recitals by Herr Max Heinrich and Mr. E. Moor was given at Steinway Hall on Dec. 7, when the artistic singing of the first-named gentleman was agreeably varied by the skilful playing of the other.

Mr. J. A. St. O. Dykes's pianoforte recital at Princes' Hall on Dec. 7 displayed good taste in a varied and well-selected programme, and high executive ability in the rendering thereof.

The Saturday afternoon concerts at the Crystal Palace will be suspended after Dec. 15 for the usual Christmas and New-Year's recess. The concert of Dec. 8 included skilful violin performances by M. Marsick, who was heard in Wieniawski's second concerto, and shorter solo pieces. A quasi-novelty at the concert was Sir A. Sullivan's pleasing overture to "The Yeomen of the Guard." Mdlle. Trebelli was the vocalist of the day, other features calling for no specific comment.

At the Monday evening Popular Concert at St. James's Hall, on Dec. 10, Herr Straus—as on other recent occasions—replaced, with his well-known ready skill, Madame Néruda as leading violinist. A pleasing "Spanish Lullaby," by Mr. G. F. Cobb, was brought forward, the singer having been Mr. Thorndike. The piece was enhanced by the violoncello obbligato assigned to Signor Piatti. Madame Essipoff was the solo pianist of the evening.

The fourth evening performance of the present series of Mr. Henschel's London Symphony Concerts, at St. James's Hall, took place on Dec. 11, when the programme contained no novelty calling for special comment. A feature of the concert was the brilliant performance, by Madame Essipoff, of M. Saint-Saëns's pianoforte concerto in G minor.

Mr. John Boosey's London Ballad Concerts at St. James's Hall—now in their twenty-third season—are continuing their successful career. The most recent concert was a morning performance, the programme of which was of an attractive popular nature, and included the co-operation of some distinguished artists, vocal and instrumental.

At the Royal Victoria Hall and Coffee Tavern, selections from Gounod's "Faust" were given recently, with capable artists as principals, and illustrated by a series of tableaux. The "Lily of Killarney," presented in the same way, was promised for Dec. 20.

The second of Herr Waldemar Meyer's grand orchestral concerts; the second Heckmann quartet concert; and the last of Madame Essipoff's pianoforte recitals must be spoken of hereafter.

A concert was given at the Eyre Arms Assembly-rooms on Dec. 13 the programme containing some good names: and the forty-ninth performance of the Musical Artists' Society (of which the Duke of Beaufort is the president) has been announced to be given, at Willis's Rooms, on Saturday evening, Dec. 15.

At a meeting of the guarantors of the Leeds Festival for 1889, held recently, the hon. secretary, Mr. Alderman Spark, stated that Brahms had regretfully declined to compose a new work on account of his nervous condition; that Dr. Parry had promised to set music to Pope's "Ode to St. Cecilia's Day"; that Mr. F. Corder would produce a dramatic cantata, "The Sword of Argantyr," founded on a Scandinavian legend; that Dr. Creser would furnish a short cantata, "Freia, Goddess of Spring"; and that Sir Arthur Sullivan would compose a piece the nature of which is not yet specified.

The Royal Choral Society announces that Sullivan's "Golden Legend" will be given at the Royal Albert Hall on Saturday afternoon, Dec. 15; the artists being Madame Nordica, Madame Belle Cole, Mr. Edward Lloyd, Mr. Henry Pope, and Mr. Henschel; Mr. Barnby will conduct. There will be a band and chorus of one thousand.

On the evening of Dec. 12 the Bishop of London preached the annual sermon to young men of the diocese, at a special service in St. Paul's Cathedral.

The honorary freedom and livery of the Company of Turners of London has been conferred upon David Kirkaldy, M. Inst. C.E., and member of the Institute of Engineers and Shipbuilders in Scotland, in recognition of his valuable services to metallurgists, turners, and all branches of engineering by his system, machinery, and inventions for testing the strength and other properties of every variety of material used in the constructive arts.

DEATH.

On Nov. 16, at her residence, Rose Hill, Bowden, Cheshire, Margaret Bower, eldest daughter of the late Major Bower, of High Grove, Cheshire, formerly of "The Buck," near Liverpool.

NOTTINGHAMSHIRE.
BERRY HILL HALL, near Mansfield, Superior Family Mansion TO BE LET from Lady Day next, or TO BE SOLD by Private Contract.
The park-like grass-land fronting the Mansion comprises about 54 acres, surrounded by a farm of about 300 acres in a ring fence. The Mansion is elevated, well timbered, and surrounded by well-timbered plantations and grounds, on the new red sand-stone formation. The reception-rooms, 14 ft. high, comprise dining and drawing rooms, each 29 ft. by 18 ft., library, 23 ft. by 19 ft., with vestibule and hall; billiard-room, boudoir, and four principal bed-rooms, with dressing-rooms, 13 ft. high; and twelve other bed-rooms. The business-rooms are approached by a separate entrance. The domestic offices include butler's pantry, housekeeper's room, servants' hall, kitchen, and laundry on an ample scale, with excellent ancillary offices. There are entrances to modern vineries and forcing-houses, with a conservatory and plant-houses. The walled kitchen garden, with adjoining orchard, comprises an area of seven acres, the fruit-trees in their prime. Stabling for twelve horses, with carriage-houses, grooms' and gardeners' rooms. The sporting rights comprise very superior pheasant shooting and partridge-shooting. Three packs of foxhounds meet within a short distance. The Mansion is 13 miles from the Nottingham Station on the Midland Railway. For Terms and to View Apply to Mr. CHARLES J. NEALE, Land Agent, High Oakham, near Mansfield.

THE ILLUSTRATED LONDON NEWS

REGISTERED AT THE GENERAL POST-OFFICE FOR TRANSMISSION ABROAD. TWO WHOLE SHEETS | SIXPENCE. By Post, 6½d.

No. 2592.—VOL. XCIII. SATURDAY, DECEMBER 22, 1888.

"The existence of the Empire depends upon the strength of the Fleet, the strength of the Fleet depends on the Shipbuilding Vote. . . . I maintain the Shipbuilding Vote is based on no policy, no theory, no businesslike or definite idea whatever, to enable it to meet the requirements of the country, the primary object of its expenditure. . . . I hold that the Government, which is and must be solely responsible, should first lay down a definite standard for the Fleet, which standard should be a force capable of defending our shores and commerce, together with the punctual and certain delivery of our food supply, against the fleets of two Powers combined, one of which should be France; and that the experts should then be called together and say what is necessary to get that standard, and give the reasons for their statement."—Lord Charles Beresford, in House of Commons, Dec. 13, on Shipbuilding Vote.

LORD CHARLES BERESFORD SPEAKING IN THE HOUSE OF COMMONS ON THE STATE OF THE NAVY.

OUR NOTE BOOK.

BY JAMES PAYN.

To the success of great national speculations which, although delusive, have taken the fancy of the public and become "a craze," two things seem to be almost indispensable—(1) that the promoter should be a man of character, with a Napoleonic gift of personal attraction: and (2) that the objects of the speculation should be a long way off. In M. De Lesseps and his Panama Canal, in Mr. Law and his Mississippi scheme, both these conditions were complied with; and also, though in a less degree, in Lord Oxford's plan of the South Sea Company. No improper motives, I believe, have been imputed to any of those three projectors; indeed, the character of M. De Lesseps stands very high, while he has given a proof of his ability for undertakings such as he recommends which is acknowledged by all the world. Still, the similarity of what is now going on in France with what happened there one hundred and seventy years ago is remarkable, and will be still more so if the Government (which, however, seems now improbable) should back his efforts as the French King (as he well might, for it put millions into his coffers) backed those of Mr. Law. That gentleman, having been made director of the Royal Bank, in twelve months "created" fifty millions sterling in new notes. The East and West India Companies (French) joined with it, and the expectation was that all the national debt (then at an immense discount) was to be brought into the concern, and the creditors paid in Mississippi bonds instead of specie. Perhaps we may see something analogous to this operation again, though there is little chance of the shares of the present undertaking running up to "a thousand per cent," at which point his Majesty discreetly sold out. The last fifty million shares were each split into one hundred, so as to afford an opportunity to the very poorest of benefiting by the golden opportunity; and, indeed, they might have done so, had they been quick enough about it, for the stock, we are told, rose, after *that*, no less than 500 per cent, and though it fell to 450 on the bare rumour of Law's indisposition, rose again to 610 on his recovery. The highest quotation of the stock was 1300! Its attractions, we read, "crowded Paris with strangers, so that lodgings could hardly be obtained for money, and provisions were at the highest price."

Of course it is very wrong to escape from a lunatic asylum when one's friends have placed one there for one's own good, but argument is thrown away upon some people. At the same time a patient may consider that his friends have made a mistake; and I can imagine nothing likely to make him more angry than to find himself in confinement for doing what others do with the utmost impunity. For example, a gentleman is at present advertised for, as having left an establishment of this nature without leave, "whose mania is to attend auction sales, and give large prices for worthless objects." This is not, at all events, homicidal mania, and may even result in benefit—to the auctioneer. I know several people—a most affluent and respectable solicitor for one, who shuts up other people (so to speak) like winking, when too eccentric—who are victims to the same delusion, and not a soul interferes with their liberty of action. A man who gives pounds and pounds for an "early edition" of some volume that he can get at the railway bookstall for two shillings—and often because it has some picture in it so badly drawn that it is afterwards cancelled, or even some ridiculous misprint—is certainly mad; much madder than any hatter—a class maligned so far as I know, and who only go mad when you don't pay them. I suspect the gentleman who is advertised as being improperly "at large" does not buy books; but suppose he even buys salamanders, for which he has no use: where is the difference? Perhaps he derives the same satisfaction from looking at a whole row of them that the bibliomaniac derives from his shelves of early editions, which he never reads and, I need scarcely add, never lends. He would cut your throat first; and yet he is secure from captivity.

A book called "How Men Propose" has, I see, been published in America, but not, as I well remember, without having had a previous existence in England, cut short by the threat of "an injunction." A more impudent act of piracy, indeed, was never attempted; and all the "Selections" and "Collections" made by those who make their living out of other folks' brains without their leave and license become respectable compared with it. It was nothing less than a collection of love-scenes culled from the books of living English novelists, and "conveyed" by the editor for his own behoof. I dare say he picked out the plums with the sagacity of Jack Horner, but "Horner's Process" (though meritorious in mathematics) is held in literature to be roguery. The American edition, as might be expected, is much "fuller," and includes the lady novelist's view of how proposals should be effected; but the original name—which was the only thing original the book possessed—seems to be retained. Indeed, unless in leap year, it would be of small importance to those seeking a social guide in this delicate matter to hear how ladies propose to gentlemen. What is wanted is practical information; and in "How Men Propose" we get it, alphabetically, from Mr. Walter Besant to Mr. Edmund Yates. Every male will herein find the style most suitable to his disposition—the patronising and the humble, the confident and the wellnigh hopeless, the pathetic and even the humorous. I am quite sorry that "copyright difficulties still bar the book from the English reader"; but, on the other hand, it is quite possible for honest readers to obtain the information they seek from the works of the authors themselves, without the help of this larcenous production.

Mr. Dion Boucicault has published his opinion that woman should be allowed to propose. He "hates a privileged class, and prejudices, however respectable;" and "why an honest woman may not freely and honourably acknowledge her preference in selecting a partner for life" he does not see. Selection, however, suggests possession—the certainty of acquiring what we have set our hearts on—whereas a proposal presupposes at least the possibility of rejection. How dreadful it would be for a young woman to have the reputation that some young men have of "making fools of themselves" after supper (or, indeed, any meal: five o'clock tea would, perhaps, be worse than supper) by proposing indiscriminately! It is a practice, I am told, that grows upon you; but it is not what the doctors call a wholesome growth. For a young person to boast of the lovers she has rejected may be cruel, but it is natural enough: so the Indian chief plumes himself on (and with) the scalps of the fallen: but for her to sustain defeat in her own proper person seems not exactly right. After a few seasons it might be said of one of these too advanced (and advancing) young persons, just as is now said of the too impressionable males, "That girl has asked more men to marry her than any girl in London." It might be true, but to my thinking it would not be pretty. Such a custom would render it in time less impossible, I fear, than it is now for a gentleman to say "No" to a lady. On the other hand I think it perfectly reasonable that a young woman who is troubled by the attentions of a philanderer, should (delicately but firmly) ask him whether he means business. "Excuse my seeming abruptness," she might say, "but the fact is my time is valuable, and yours is not."

There are some things concerning which, when the people who tell us about them say, "I would not have believed it, had I not seen it myself," we venture to claim the same exemption. The hearing the cuckoo in December, lately attested by four persons in Norfolk, comes, I think, under this head. One of them was servant to the clergyman of the parish who tells the story, and the Rector backs his man. He doubts whether cuckoos migrate, and narrates the following instance of it: "A person told me that one winter, in moving some faggots stacked against a wall, *he turned out a cuckoo*." This is a fairy tale, indeed, and sounds more like metamorphosis than any lack of migration. It was no doubt after he turned cuckoo that the four honest Norfolk men heard him: my own impression is, however, that that unseasonable songster was less a cuckoo than a lyre bird.

White of Selborne did not believe in "the swallow, swallow" always "flying south"; he used to find them "gliding about" in November, and believed many of them to winter in holes and caverns. He says the same of the bunting—though not, it is to be observed, of "the baby bunting," which is only seen in warm weather. He is very hard upon the cuckoo, to whom he applies Job's remark on a much larger bird, "She is hardened against her young ones as though they were not hers"; but he never accuses her of hibernating.

There have been strange stories told of the cuckoo. Though his note is spoken of as the very type of monotony, "in the month of June," as the children's rhyme runs, "he alters his tune." The cuckoo, says White, "begins early in the season with the interval of a minor third; he then proceeds to a major third, then to a fourth, then to a fifth, after which his voice breaks," and he loses his situation (like our boy choristers) among the feathered choir. In Southey's Journal we read of a very remarkable specimen of the bird. "By Mr. Leathes' house," he writes in 1815, "I heard a stuttering cuckoo—whose note was 'cucucukoo, cucucukoo'; after three or four of which he brought out the word rightly." The poet does not mention the time of day when the phenomenon occurred, but one can't help suspecting that it must have been after either he, or the bird, had been dining.

M. Numa Gilley, the French Deputy, ought to be regarded by posterity—whose good opinion we are always told is the only one worth having—as the least egotistic of men. Somebody has been publishing works under his name, which have made some sensation, but which he protests that he has "not even read," and far less written. Until they threatened to get him into trouble he took no pains to deny their authorship. Being a Deputy, perhaps, makes us content with the abolition of one's identity. His position is curiously in contrast with that of our own M.P.'s, some of whom, so far from ignoring their own productions, are whispered to put their names to "addresses" and their voices to speeches that are made by others. It seems probable that Numa Gilley is itself a *nom de plume*, for it's a very funny one; and, since his utterances are not his own, he can hardly even lay claim to be *rose et proterea nihil*. Perhaps the hibernating cuckoo has been discovered in this retiring politician after all.

How soon the memory of a dead man dies with all he holds most dear, has been reproachfully adverted to by the poet, who has, however, also hinted at the complications that would arise if he should take it into his head to come back—

> The hard heir strides about his land
> And will not yield it for a day.

This is not so certain just now as regards "the land," which he would probably yield very readily (because it yields nothing to *him*), but with respect to personal property, he would no doubt stick to it. As to the duration of grief for the dead, that depends upon the character of the Departed and also on that of the Survivor. There are some loving souls who, having lost the idol of their affections, go mourning all the days of their lives: while others (and these are more numerous) get over it with amazing promptitude. It is curious to note, however, how fashion affects both these classes, in a matter which, whether their grief be genuine or not, must at all events seem to them a most serious and solemn one. It is not many years since the custom began of supplementing the obituaries in the papers with "In Memoriam" notices. At first it seemed very touching: these pious records contrasted favourably with the curt style adopted by some mourners: "No cards," as if the departed had entered the married state; "No other intimation—Scotch papers please copy," &c. But as time went on, and also the "In Memoriams," one began to doubt the sincerity of some of them. It may not be so, of course; but what strikes one as rather suspicious is their intermittency. A "beloved husband" is regretted in 1885 and 1886, but not in 1887: but grief bursts into leaf again (the advertisement leaf) in 1888. Is it possible the widow forgot him in 1887? Rather, let us hope, she had not the money to spare for the insertion; but the omission is certainly remarkable. The custom has, however, evidently taken root and grows. I notice that the "In Memoriams" are going farther and farther back. There was a husband the other day in the paper lost in 1880, and another in 1881. Neither of them ever appeared there in the meantime: what could possibly have attracted the pent-up grief of the advertisers to break out in so strange a channel? These eccentricities of human feeling are surely interesting, though to many of us inexplicable.

THE SILENT MEMBER.

Lord Charles Beresford, the steadfast advocate of Admiralty and Navy reform, joined Lord Randolph Churchill in giving a lively fillip to Parliamentary proceedings prior to the departure of Mr. W. H. Smith for the Monte Carlo Eden, and the start of Mr. Gladstone for Naples on the agreeably mild morning of December the Nineteenth (a pleasant change from the chilling fog of the Fifteenth, when the right hon. gentleman drove with Mr. John Morley to Limehouse to deliver another rousing address).

It is always a pleasure to hear Lord Charles Beresford. The noble and gallant Lord the member for East Marylebone is ever in earnest. A skilful, daring, and brave naval officer, the mere mention of whose name calls up recollections of his intrepid action on board the little Condor at Alexandria, and his valorous exploit on the Upper Nile during the Gordon Relief Expedition, Lord Charles Beresford has also the signal advantage of being a thorough master of his subject, practically as well as theoretically, when he rises in the House to prove the inadequacy of our Navy. There is, in fine, a sailorlike candour about his speeches that is very refreshing in an assemblage where red-tape officialdom is still predominant.

Possessing these rare qualifications, Lord Charles Beresford, (nothing daunted by his fall in the Row) commanded the attention of hon. members interested in the Navy when he arraigned the First Lord of the Admiralty on the Thirteenth of December, and from his vantage point behind the Treasury bench poured in a formidable fire on the devoted head of Lord George Hamilton; Lord Randolph Churchill vainly endeavouring to smother his satisfaction by assiduously curling the ends of his moustache. Of the latter noble Lord it may be truly said, indeed, that nothing seems to afford him so much pleasure as the political misfortunes of his best friends. It was in Committee of Supply on the vote of £1,806,200 for ship-building and repairs that Lord Charles Beresford delivered his attack. Contending that the British fleet should be numerically more than a match for the combined fleets of any two European Powers, Lord Charles entered into statistics to prove that such was not the case at present. He put the case very plainly. Supposing, said he, for example, that hostilities were to break out between England and France (which terrible eventuality the Fates forbid!), we should then have to fight the thirty war-vessels France possesses for defensive and offensive purposes. Deducting the British ships which the noble Lord said would be unavailable at such a juncture, he computed that there would only be thirty-six English men-of-war left to cope with the thirty of the French. His Lordship then set to work to support his argument by unfolding in interesting detail a possible naval "plan of campaign," naming the French ports and squadrons our ships would have to watch, and making it manifest that our fleets would be insufficient in numbers for the work before them. We regret that we have not space to add particulars of Lord Charles Beresford's well-thought-out and admirable speech. It must suffice to say that his Lordship contended that Twenty Millions more should be expended on new ships of war to render our Navy commensurate with the duties it would have to perform in the contingency he bluntly stated. The numerous friends of the noble and gallant Lord will value the counterfeit presentment of him drawn on the preceding page. Lord George Hamilton, in a manner, admitted the soundness of Lord Charles Beresford's views by agreeing that our fleet *should be* stronger; and he foreshadowed a larger and more comprehensive vote for next year; but he thought the object desired might be gained by spreading the expenditure over a number of years. In the end, the badgered First Lord of the Admiralty secured all the Navy votes.

Mr. Goschen, in taking Mr. Smith's place as Leader of the House, had at the outset to face the fresh Souakim Difficulty, and Lord Randolph Churchill's awkward inquiries on the Fifteenth of December as to the course the Government would adopt in view of Osman Digna's declaration that the Mahdi had captured Emin Pasha and Mr. H. M. Stanley. The Chancellor of the Exchequer was quite equal to the occasion. Mr. Goschen said the Government had no proofs of the capture of those eminent personages, and could not hamper the military Commanders at Souakim. Upon Mr. John Morley returning to the attack on this knotty question the Monday following, supported by Mr. Gladstone and Lord Randolph Churchill (who inflicted a brace of digs into the ribs of the Prime Minister), the Government, through the medium of Mr. Stanhope, stoutly maintained that they had no alternative but to defend Souakim. What has concerned hon. members even more than the Souakim problem is that Parliament should be compelled to sit till Christmas!

The supply of cattle for the Christmas trade, at the Metropolitan Cattle Market on Dec. 17, was rather larger than in several recent years. There were 7518 beasts exhibited, and 12,890 sheep.

The last concert given by the students of the Hyde Park Academy was more than usually well received. "King René's Daughter" filled up the first part of the programme, Mrs. Lindley White rendering in excellent taste the principal part in the popular cantata.

The Earl of Shrewsbury has intimated to the whole of the tenantry on his estates in Cheshire his intention of returning to them 10 per cent on the half-year's Christmas rents now due. This is the eighth time in succession that the Earl has made a similar abatement.

Christmas and New Year cards are not yet exhausted. From Messrs. Misch and Stock, of 55, Jewin-street, we have received several specimens, nicely coloured, and all in good taste; a few novel designs from Messrs. Birn, of 27, Finsbury-street; some cards, showing great care, from Messrs. Thorburn and Bain, of 60, Paternoster-row; hand-painted ones and comic eccentricities from Messrs. Hamilton, Hills, and Co., of 22, Paternoster-row; Christmas nuts to crack, all home-grown, from Mr. J. Tayler Foot, of 18, Poland-street; and Christmas and New Year gifts from Messrs. Charbonnel and Walker, of 173, New Bond-street.

THE PARNELL INQUIRY COMMISSION.

Our Sketches in court were made on Friday, Dec. 14, when the witnesses from Kerry were being examined and cross-examined. Sir Charles Russell, Q.C., M.P., appears engaged in a cross-examination, in the interest of his clients, the Irish Land League and National League leaders, also members of Parliament. Behind him sits Mr. Timothy Harrington, M.P., attired as a professional barrister, who conducts his own case. The evidence given on that day was of some personal concern to Mr. Harrington, with reference to transactions at Castle-island and Currow, and in the town of Tralee, in March, 1881, and his association with two men named Brosnan, to whom money was paid for canvassing, "by night," in favour of the Land League candidate at an election of a Poor-Law guardian. Thomas O'Connor, the informer, deposed that two of the electors were visited at night by himself and one of the Brosnans, disguised with covered faces, who threatened to do something serious to them if they would not promise to vote for Mr. M'Sweeney. This witness O'Connor said he did not want any money from the *Times* but his bare expenses, and he had come forward "in the hope of banishing the hell upon earth that existed round his own place in Ireland." Mrs. Donoghue, of Tralee, who keeps a lodging-house, deposed that Mr. T. Harrington, in 1882, paid her £20 or £25 for daily supplying food to some men imprisoned in the county jail for agrarian outrages. The shorthand reporter had a difficult task in keeping pace with the confused Anglo-Irish language of a voluble female witness.

Mr. T. Harrington.

Sir Charles Russell.

HYÈRES.

Hyères has deservedly come to the fore this season, and is crowded with visitors. It is a mystery why this most charming of Riviera health-resorts did not long ago become the favourite place. However, the Hyères officials and municipality have wakened up, and added greatly to the attractions of the place by improving the Casino and organising a fine orchestra. But it is to those in search of health, rest, and freedom that Hyères most commends itself—for, though a gay little town, there is Costebelle, the lovely hilly suburb where one can almost imagine oneself in a semi-tropical ranche of Southern California were it not for the strains of distant music and the peal of distant bells wafted up by the evening breeze from the little town below, looking like a pearl set in emeralds, so white it gleams from out its luxuriant vegetation. The best example of Costebelle's increasing popularity is the fact that the Grand Hôtel d'Albion—one of the best hotels on the whole Riviera—has had to add a large wing to its former building, in order to accommodate the number of visitors who are flocking there. An English church, too, has been erected in the hotel grounds, and the Bishop of Gibraltar is nominating the chaplain.

The view from Costebelle is a scene of ever-changing delight: one gazes far over the azure sea, dotted with verdant islands, in and out of which tack and put about the prettily-rigged fishing and fruit vessels, while away to either side are faint blue mountains. As will be seen from our Artist's sketches the town offers to the antiquary and the sketcher every advantage. The old gateway is but one of many which, with the town walls and an ancient castle, give both scope for their full powers; and what could be more picturesque, in different ways, than the old "Quartier de St. Paul" and the "Rue du Paradis," or the sandy road of Costebelle bordered with such aloes as one expects to find only in Africa? The remaining picture is a charming view of the Grand Hôtel d'Albion, the magnificent position of which can well be gathered from the sketch.

O'Connor, the Informer.

A race between Shorthand and Anglo-Irish.

SKETCHES AT THE PARNELL INQUIRY COMMISSION.

The season of Christmas spectacles was opened early in London at the bright and cheerful Alhambra Theatre of Varieties, which fairly eclipsed former triumphs. A model of magnificence and good taste, the charming new fantastic ballet of "Irene" well merited its enthusiastic reception. "Irene" should attract all London. The exquisitely beautiful new costumes of M. and Madame Alias combine for the first time the ethereal with the brilliant, the soft, silken crêpe de Chine draperies being particularly elegant. Whilst the inspiriting Neapolitan Fair scene has rarely, if ever, been surpassed for gaiety and radiant loveliness of colour, the crowning tableau of Fortuna's Kingdom is perfectly enchanting. It evoked a storm of applause. The music of Jacobi, choreographic art of Casati, costumes of Alias, and grace of the Alhambra corps de ballet, unite to make "Irene" a great terpsichorean success.

The availability of ordinary return tickets between all stations on the London, Brighton, and South Coast Railway will be extended over the Christmas Holidays as usual, and in this arrangement will be included the special cheap Saturday to Monday tickets between London and the seaside places on the South Coast and the Isle of Wight. On Dec. 22, 24, and 26 extra fast trains will leave Victoria and London Bridge Stations for the Isle of Wight; and on Christmas Eve an extra midnight train will leave London for Brighton, Eastbourne, Hastings, Worthing, Chichester, Portsmouth, &c. On Boxing Day special cheap excursions will be run from Brighton, &c., to the Crystal Palace and London, and also from London to Brighton and back. For the Crystal Palace pantomime and the holiday entertainments on Boxing Day, extra trains will be run to and from London, as required by the traffic. The Brighton Company announce that their West-End offices—28, Regent-circus, Piccadilly, and 8, Grand Hotel-buildings, Trafalgar-square—will remain open until 10 p.m. on the evenings of Friday, Saturday, and Monday, for the sale of the special cheap tickets and ordinary tickets to all parts of the line, at the same fares as charged at London Bridge and Victoria Stations.

The coast districts of New South Wales have been visited by heavy storms and rains; but, in the interior, rain continues to be urgently needed.

A Christmas-Box for a shilling is the special attraction at the European Game and Toy Warehouse of Mr. Cremer, jun., 210, Regent-street, where may be found every variety of Christmas games, toys, and dolls, and where also is kept a large assortment of cosaques.

At Souakim the left flank of the enemy was reconnoitred by our troops on Dec. 15 and following day. The Welsh Battalion arrived on the 15th, from Suez, and was warmly welcomed. On the 17th the forts directed a heavy fire on the enemy's position, and destroyed a portion of their entrenchments. The reinforcements have been completed by the arrival of the 1st squadron of the 20th Hussars and 100 men of the 2nd Battalion of Egyptian troops. A letter addressed by Osman Digna to the Governor informs him that he had received news from the Khalifah that the Equatorial Province had fallen into the Mahdi's hands; and that Emin Pasha and another white man, whose name was not known, but said to be Stanley, were, it is stated, taken prisoners. If the information thus communicated to General Grenfell be authentic it brings to a melancholy conclusion the uncertainty and apprehension in which we have so long been plunged with respect to Emin Pasha and Mr. Stanley.

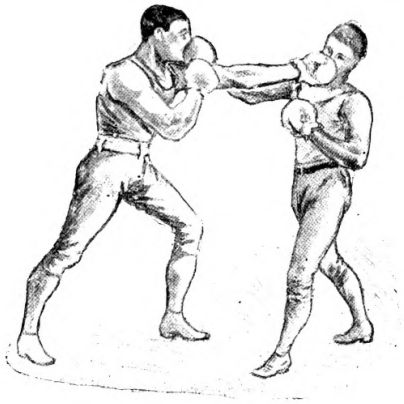
THE ELECTIONS IN SERVIA.

The general election of representatives in the Grand "Skuptschina," or National Assembly, of the Kingdom of Servia took place on Sunday, Dec. 16, under the new provisions of the amended Constitution. It appears that the Royal influence was used rather adversely to the existing Ministry, that of M. Christich, the head of the Moderate Progressist party; and that the Radical party, whose chief is M. Ristich, have gained more than three-fourths of the seats, winning at least twenty in the towns and thirty in the rural districts. At Belgrade, the capital city, M. Garashanine and the other Ministerial candidates were defeated, four Liberals and four Radicals being elected by 355 votes for each. The new Assembly would meet on Dec. 23, but the political struggle for office would not begin until January. The overthrow of the present Government was considered to be certain; but the Radicals were supposed to be bent on rescinding some parts of the Constitution, with a view to diminishing the prerogatives of the Crown, and M. Ristich is supposed to incline to a Russian or Panslavish policy. These conditions make it doubtful whether the King would accept a Radical Ministry, as his Majesty seeks Austrian support. A Sketch by M. Lachmann shows the riot at Vidovo, the chief magistrate rescued by gendarmes.

Pocket-books combining utility and strength with elegance are issued by Messrs. Marcus Ward and Co.

At a meeting of the Royal Geographical Society, held on Dec. 17 in the theatre of the London University—General Sir Richard Strachey, president, in the chair—Colonel R. G. Woodthorpe, R.E., read a paper entitled "Explorations on the Chindwin River, Upper Burmah," in the course of which he recounted his own personal observations and experiences in that country, and gave some interesting details as to the appearance and customs of the various native tribes. He remarked that the Chindwin River, which at certain periods of the year was much swollen by rain, became so shallow during the month of May as to render navigation very difficult. This, he thought, however, might be obviated to some extent by the shifting of sandbanks. The paper was illustrated by a series of dissolving views taken from photographs and from sketches by the lecturer himself. A vote of thanks, proposed by the chairman, brought the proceedings to a close.

Mr. Justice Stirling has made an order for the winding-up of the affairs of the late Irish Exhibition, after hearing statements affecting the solvency of the undertaking and the liability of the Executive Council.



Mr. Ralph Copeland, F.R.A.S., has been appointed by the Queen to be Astronomer-Royal for Scotland, and Professor of Practical Astronomy in the University of Edinburgh, in the room of Professor Piazzi Smyth, resigned.

A new mechanics' institute, built by the Lancashire and Yorkshire Railway Company, at a cost of £3000, was opened at Horwich on Dec. 15 by the chairman of the directors, Mr. George J. Armytage, who afterwards distributed prizes to the successful science students. A concert followed. The library of the institute consists of 1800 volumes.

The usual weekly entertainment at Brompton Hospital took place on Dec. 18, when "Dearest Mamma" was performed by Miss Blanche Fane, Miss Hildyard, Mrs. Stafford Thompson, Messrs. Lister Drummond, C. Drummond, E. H. Whitmore, and George Nugent; Mrs. Whalley ably presiding at the piano. The entertainment gave great pleasure to the patients and nurses.

A Bill providing for a loan of £4,600,000, bearing interest at 3½ per cent, has passed the Victoria Legislative Assembly. This loan comprises the unissued balance—namely, £2,000,000—of the £8,000,000 loan authorised in 1885, which is reduced by that amount, and £2,600,000 to meet obligations incurred on railway works authorised during the last three years. Of the total amount of £4,600,000, it is only intended to float £3,000,000 early next year.

Lord Dufferin, who was entertained at a banquet before leaving Bombay, said he handed over India to his successor without a cloud on the horizon. There was no internal question on hand which could not be easily solved.—Lord Lansdowne, replying to an address of welcome presented by the Calcutta Municipality, expressed the hope that during his term of office the Government would be able to attend uninterruptedly to legislation for the domestic benefit of the people, and to improve the machinery of government to such an extent as the altering conditions of the country might require.

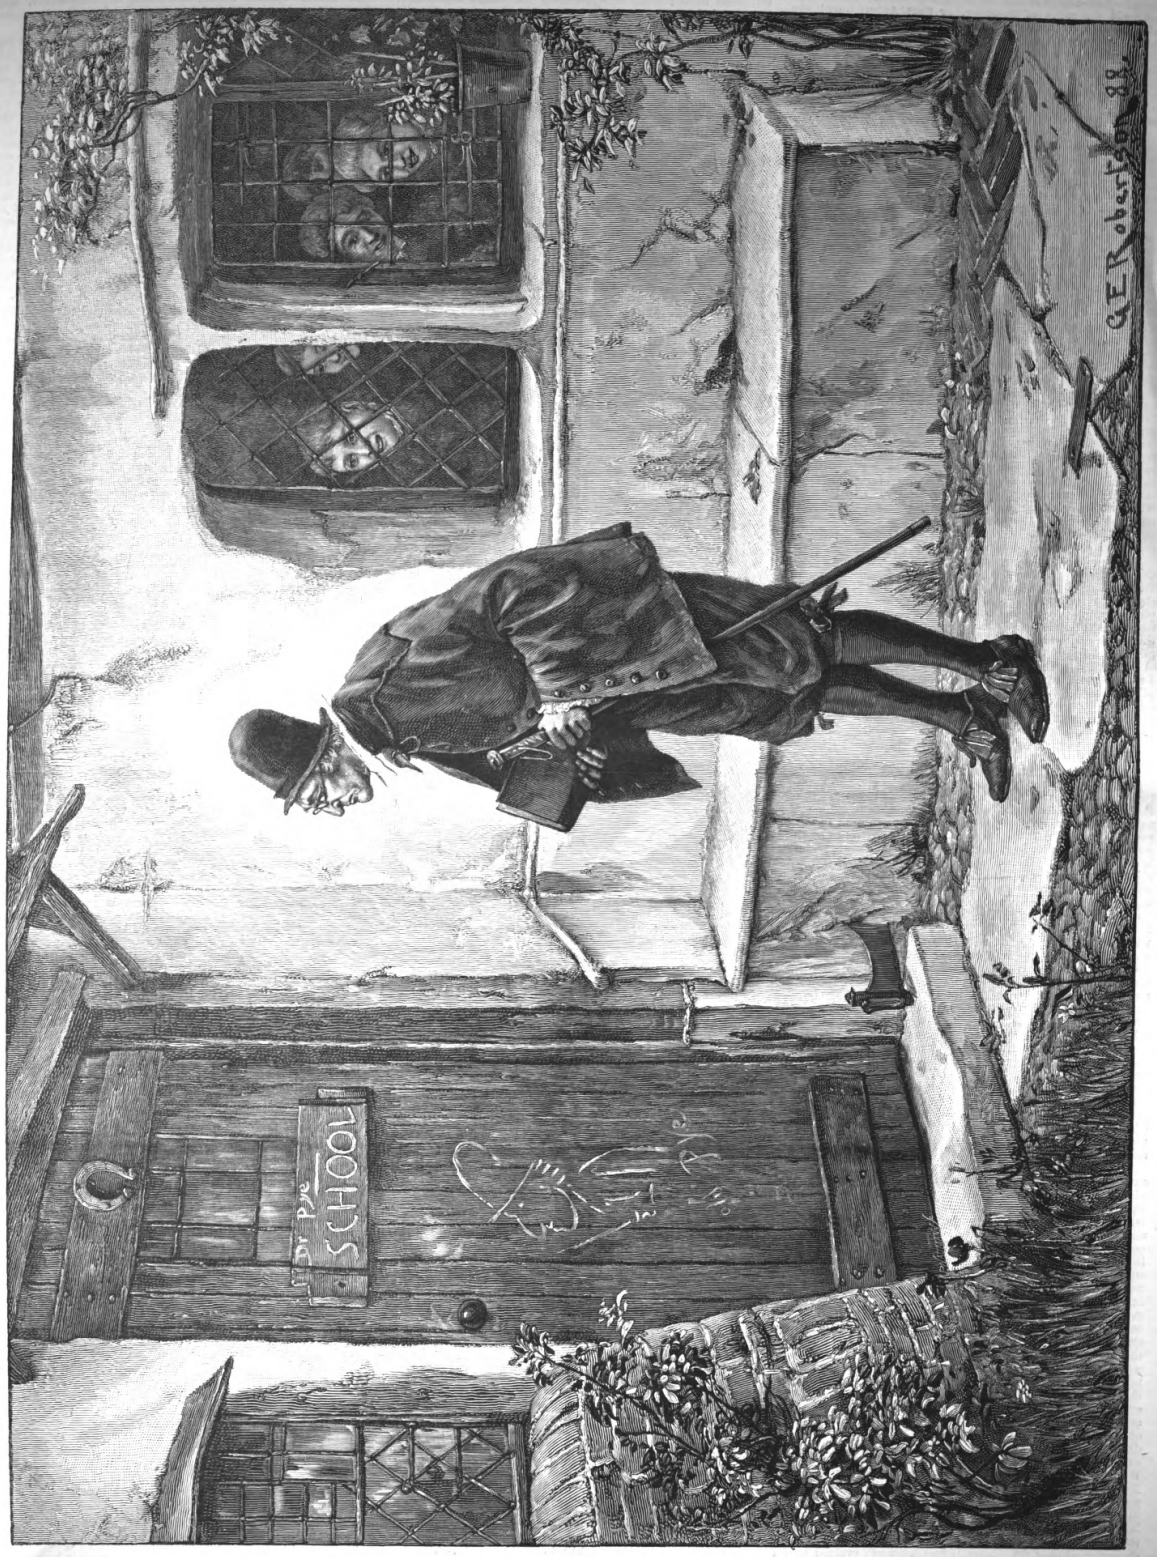
BOXING PERFORMANCES AT HER MAJESTY'S THEATRE.

During the week ending Dec. 15, a Grand Boxing Tournament, harmless with the gloves, was held in Her Majesty's Theatre, Haymarket, formerly dedicated to Italian Opera, afterwards to the religious hymns and sermons of Moody and Sankey, to political demonstrations, and to diverse popular spectacles and entertainments. This exhibition of competitive athletic skill was promoted by sporting men of fashion, members of the "Amateur Boxing Association," but was hardly superior in arrangement and performance, from a scientific point of view, to those which have been witnessed at the excellent German Gymnasium at King's-cross. The members of the Association did not personally enter the lists, and some professional boxers, having been engaged the week before in a similar "tournament" at the Royal Aquarium, wanted a rest. The last day's proceedings were of most interest, comprising the final bouts in the eight different classes; namely, those of 9 st. amateurs, 9 st. 6 lb. professionals, heavy-weight amateurs, 8 st. 4 lb. professionals, middle-weight amateurs (under 11 st. 4 lb.), professionals of 10 st. 8 lb., amateur light-weights, ten stone and under, and a catch-weight professional contest. Several of the amateurs belonged to the Invicta, the Royal Victor, and the New-cross Boxing Clubs. The prizes for amateurs were presented to them by Sir John Astley. Between the regular competitions there were various exhibitions of wrestling and sparring, Indian club wielding, and curious feats of fisticuffs, which afforded much amusement. Our Artist, to whom nothing comes amiss, "was fortunately on the spot," and has delineated the portraits of some of the most accomplished pugilists, including Jem Smith, the champion of England, and those of Sir John and other gentlemen among the spectators. The wrestling-match in the Cumberland and Westmoreland style, which is a noble exercise with none of the Cornish kicking tricks, was valiantly sustained by Scott and White; the first-named competitor got the odd fall. In the boxing-match open to all weights (professional) Ted Burchell, of Shoreditch, beat Alf Mitchell, of Cardiff, a taller man, and a precise and severe hitter—forcing him round the stage, however, in the third round, so as to cause a difference of opinion among the judges, but the referee decided in favour of Burchell. Much amusement was excited by the extra bye-performances; the Twin Brothers Gee, announced as the smallest boxers in the world, displayed a good deal of "applied science" and practical dexterity with their puny limbs; and there was a ludicrous imitation of cock-fighting, by two men squatting and springing at each other, with the legs of each trammelled by a stick under the knees. There was also a comic sparring-match between a white man and a black man, the gloves of the former being covered with white chalk, and those of the latter with lamp-black; the effect on their faces, respectively, was both ridiculous and sublime. It has been pointed out, upon this occasion, that the site of Her Majesty's Theatre was formerly that of Rideout's Fencing Academy.



The Illustration of Black Mountain prisoners in the Fort of Oghi, which appears on another page this week, is from a photograph taken by Major Sydney D. Turnbull, of the 14th Bengal Cavalry; not, as is stated by mistake, one of the Sketches we received from Lieutenant Walter Blair. One of these prisoners was a Hassanzai; the others were of the Bungash Kheyl tribe, from the Kohat district, but settled in Agror. They were charged with the cruel slaughter of some unarmed muleteers in our service. The prisoners are represented as under guard of a Ghoorka havildar and sentry.

ELECTION SCENE IN SERVIA, UNDER THE NEW CONSTITUTION.
FROM A SKETCH BY M. LACHMANN.

"CHRISTMAS IS COMING!"
DRAWN BY RUDOLF BLIND.

"BARRED OUT."—DRAWN BY G. E. ROBERTSON

THE PHILOSOPHY OF THE PLUM-PUDDING.

Why is it that history so persistently ignores the things, names, and events which the world most earnestly desires to know? Now-a-days it matters to none of us that Marius once sat amid the ruins of Carthage, or that Alfred burnt the cakes in the neatherd's cottage. Who cares a stiver whether Cheops built the Great Pyramid, or Omar the Khalif compiled the code of laws known by his name, or whether when Timour invaded India the Hindoos "caught a Tartar"? But at this Christmas-time, as a certain delicious fragrance—subtly compounded of many separate fragrances, each sweet in itself, but all much sweeter than any separate one—is wafted to my "olfactory organs" (to quote the comic journals), I am painfully reminded that history has nowhere recorded the name of the inventor of the plum-pudding. It would not be easy to adduce a more impressive example of the ignorance of historians, and, I fear I must add, of the ingratitude of the world. For centuries men and women—and, notably, English-speaking men and women—have been feasting at stated periods on this dish "fit for gods," and yet have made no attempt (so it appears) to rescue from oblivion the name of the benefactor who invented—or, as I should prefer to say, created it. Neither in the pages of garrulous Herodotus or judicious Thucydides, of Livy or Tacitus, of Perishta the Persian or Tabari (whom Gibbon calls the Livy of the Arabians); neither in Eusebius or Zozomen; or, to come later down, in De Thou or Philip de Comines, Guicciardini or Muratori—in the Saxon Chronicle, Geoffrey of Monmouth, Walter Map, or Henry of Huntingdon, occurs the slightest reference to this philanthropist. Mr. Samuel Rawson Gardiner has not detected his name among the State Papers he loves so well; nor has Mr. Froude discovered it among the archives of Simancas. Alas! how true it is (as Sir Henry Taylor says) that "the world knows nothing of its greatest men"! Assuredly, in the front rank of these Great Unknowns—"inheritors of unfulfilled renown"—the impartial and dispassionate inquirer will place the illustrious inventor (or creator) of the Plum-Pudding. But "impartial," "dispassionate"! Is it possible for any person who has once partaken of this glorious dish to preserve his freedom of judgment? Will not the sweet memories of its succulency bind him for ever after in allegiance to its original maker? Whenever the pudding smokes upon the board, will not his kindliest sympathies go out towards its unknown concoctor? Or will he—like the mass of mankind—absorb the gift of genius without a thought for the giver?

Every schoolboy knows who invented the spinning-jenny, the stocking-loom, the steam-engine, and Aspinall's enamel. We have read all about Pascal and his enamelled pottery—about Pears and his incomparable soap—about Edison and his phonograph. A gorgeous college for women perpetuates the name of the inventor of Holloway's ointment, and grateful thousands (it is said) bless the sanative properties of Beecham's pills. Yet has anyone—or have all of them—deserved so well of humanity as the author or authors of the plum-pudding? I am prepared to admit that the steam-engine has accomplished great changes, great revolutions; but then, have they all been for good? One may venture to hint that, quite possibly, the world might have done pretty well without it; but could the world, or at all events the English, which is a tolerably large portion of the world, have done without the plum-pudding? Where would be Christmas? For no one can conceive of Christmas without its pudding: 'twould be like Sullivan's music without Gilbert's libretto, or Mr. Swinburne's poetry without its alliterations. But all will agree, I think, that Christmas is more important than the steam-engine; and as Christmas, I repeat, could not be without the plum-pudding—every boy and girl in the country would laugh you to scorn if you said otherwise!—it is clear that the said pudding is of greater value than the said engine. Q. E. D., Consider the enmities which have been dissolved, the jealousies which have been extinguished, the misunderstandings which have been cleared up, the good fellowships which have been cemented, the happy thoughts which have budded into life, around the odoriferous Christmas pudding, and you will begin to appreciate the nature of its claims upon your regard. Dismiss for a moment your pleasant recollections of its flavour and savour, of its agreeableness to the palate and its gratification to the appetite, its material and sensual side, and you will be free to recognise that it is something more than a dish—a viand—an item, however honoured, of the Christmas menu; that it is, in fact, a grand moral agent which, every year, makes for righteousness and the regeneration of society. I have heard of a pair of lovers composing their transitory differences under its genial influence, of husband and wife working off "a tiff," of rich uncles so softened by it as to "tip" their scapegrace nephews, of philanthropists impelled to seek out and relieve the puddingless poor, of politicians inclined to believe in the honesty of their opponents, of Ritualistic curates taking to their hearts Low Church vicars—and all owing to the magical effects of this best of solvents, the plum-pudding!

It is well known that the great ideas of the world are never the direct offspring of the ingenious minds which first give to them a concrete shape or a definite expression. Like the limbs of Osiris, their different parts are scattered far and wide, until some fortunate genius sees his way to collect them and form them into a perfect whole. The idea of the steam-engine, for instance, had been developed through many intellects before it culminated in the brain of the Greenock watchmaker. The seeds of the Reformation were sown by numerous earnest spirits long before Luther and Calvin came in to reap the harvest. In all probability, such, too, was the genesis of the plum-pudding. I can well imagine that it was at the outset a rude and inchoate affair—like our earth in the ante-palæozoic ages, or lawn-tennis in its green infancy—and that, like Mrs. Beecher-Stowe's Topsy, *it growed*. And it would prove an interesting study, if we had the necessary data, to trace the successive stages of its evolution—to differentiate the action of the several minds which, by meditation, study, and experiment, brought it to its present perfection. Whose, for instance, was the fortunate inspiration of introducing into the sweet compound the aroma of "candied peel"? Who, sublimely daring, first dashed in a modicum of *eau-de-vie*? Who so cunningly adjusted the proportions of the different materials? Who suggested the use of spice—hot from the islands of the Eastern seas? Who *boiled* instead of baked it? This, mark you, is no trifling question; for no small measure of the unrivalled excellence of our pudding is due to its being boiled. Wrapped in its fair white cloth, it holds and jealously retains the various tastes and perfumes which combine to fix its character, as they are gradually and delicately evolved by the action of the ebullient water; whereas, if it were rudely huddled into an open dish, and then thrust into a coarse oven, those fine qualities which constitute its specialty would evaporate and disappear, and the plum-pudding, dried up and exhausted, would become a mere *caput mortuum*, a *simulacrum*, a shadow of itself! All these considerations incline me to believe that the plum-pudding, as we have it now, *teres atque rotundus*, has been the work of several minds. And, indeed, if you come to think of it, *no one* mind *could* have given birth to so grand and glorious a creation. A Shakspeare may create a "Hamlet," or a Milton a "Paradise Lost"; but what is either, in artful and happy complexity, in exact relation of parts, in cunning elaboration of materials, in felicitous harmonising of apparently discordant substances, in the wholesome purpose that pervades the whole, to—the plum-pudding? Can you not fancy that many Shakspeares, many Miltons, have, each in his day and generation, contributed something to the consummation and completeness of this "heir of the ages," this glory of the Christmas season?

Bishop Latimer tells a story of a good fellow who, once upon a time, bade a friend to breakfast with him, observing, "If you will come, you shall be welcome; but I tell you aforehand, you shall have but slender fare—one dish, and that is all." "What is that?" "A pudding, and nothing else." "Marry!" said the intending guest, "you cannot please me better; of all meats, this is for my own tooth. You may draw me round the town with a pudding." This enthusiasm was excusable, perhaps, if its object were a *plum*-pudding. But, after all, it must never be forgotten that the plum-pudding has a loftier and purer mission than merely to please the palate. We have glanced already at its moral side; but it is also symbolical, historical, geographical, allegorical, and cryptical! Its very shape—that of a globe or spheroid—is suggestive, and sets one a-thinking of the kosmos, the mythology of the Hindoos, the "microcosm" of Paracelsus, and other difficult and sublime themes. Then, its outline is the circle—the emblem of eternity—the magic ring—the circle of Ulloa, and so forth. Look, for one moment, at the ingredients. At the egg—what does not that signify to the thoughtful? *Omnia ab ovo*—all things from the egg; Orpheus speaks of the world as having been hatched from an egg, and such was the belief of the Phœnicians, the Egyptians, and other ancient nations; while in all times and places the egg has been taken as the rudimentary principle of life. Bread represents the great staple food of civilised peoples; raisins, or dried grapes, remind us of the wine which maketh glad the heart of man; sugar—spice—each possesses its characteristic property, and each, no doubt, has its esoteric significance. It would not be difficult, moreover, to trace a fine allegory in the use of these various ingredients, and in their final purification, as by fire, before they are blended adequately in the general mass. Or, we might make the pudding the subject of a geographical lecture, and dwell on the different countries which contribute towards this *magnum opus*. But the subject has more possibilities than I can hope to deal with; and, indeed, anyone who knows what has been got by ingenious minds out of a sunflower, will not hesitate to allow that a very great deal more can be got out of a plum-pudding.

W. H. D.-A.

ABOUT SOME GHOSTS.

It is now forty years since the phenomena vouched for by men and women known as "Spiritualists" came into existence. In the month of March, 1848, Miss Kate Fox, a girl of nine years old, and living in the village of Hydesville, New York, was able to interpret certain mysterious knockings—so runs the story—and to discover that a murdered man was buried in the cellar of her father's house. Then followed, either through this girl as medium or through other persons who discovered that they possessed a similar power, a number of strange occurrences. A person was raised in the air in a crowded room, in full daylight; a drumstick was seen beating a drum, with no one near it; a pencil "rose of itself" on a table, and wrote; and a human hand, unattached to a body, did the same thing. Sealed-up letters, written in different languages, were read and answered by "mediums" who knew none of them; and pianos played without performers. Anon these eerie manifestations crossed the Atlantic. Tables were broken to pieces when untouched by mortal hand; sometimes they kicked unpleasantly at unbelievers, or rose in the air, and became "lighter or heavier at request." Figures appeared with dresses from which pieces might be cut that soon melted away; and flowers, seemingly real, vanished in the same fashion. Hand-bells rang of their own accord; and one, Sir David Brewster states, came and placed itself in his hand, while another visited Lord Brougham; and dead friends returned in "absolute unmistakable living form."

These are but a few of the marvels for which "Spiritualists" vouch, and I suppose there are none of us who have not met with persons who declare that they are in communication with deceased friends. I knew a physician of considerable repute who told me that his child-daughter—a child still in the spirit world—came to him nightly; and I know a man, bearing every mark of honesty, who avers that he has been lifted to the ceiling on his own dining-table, and receives letters from his dead mother. No doubt, in the good old times for which some of us sigh, he would have been burnt as a wizard. I am not going now to discuss the truth or falsehood, the illusions or the facts, of spiritualism. There are more things in heaven and earth than are dreamt of in our philosophy, and this, at least, seems certain, that if modern ghosts do occasionally revisit the glimpses of the moon, they are such friendly, comfortable people that they can alarm *nobody*.

The late Isaac Taylor, alluding to the famous ghost in the Wesley family, made the suggestion that mischievous spirits of a low order, and, no doubt, soulless, like Undine before she married, do sometimes escape from their confines and play tricks with mortals. Dr. Henry More, the Platonist, seems to have held the same opinion, and after hearing of the "frolic of some demon," observes that "there are as arrant fools out of the body as in the body." This would be a reasonable explanation of the elfish mischief that rings bells, upsets furniture, flings bed-clothes upon the floor, and spends the nights in opening and slamming doors.

Two hundred years ago Joseph Glanvil, F.R.S., Chaplain to King Charles II., and, in Mr. Lecky's judgment, our ablest writer in the defence of the belief in witchcraft, published a book containing "full and plain evidence concerning witches and apparitions"—evidence, by-the-way, that is far oftener full than plain. The witch stories are sad enough, and almost make one wonder how any poor woman with an unscrupulous enemy in the world ever escaped a witch's doom. The ghosts in those days seem to have been troublesome, but they did not kill or materially injure the victims of their sport. Still, a ghost like the "demon of Tedworth," of which we have a minute account in the chaplain's book, could not have been a desirable inmate of a well-regulated family. Mr. Mompesson, the master of the house, had a drum under his care which had been taken from a drummer detected in a cheat. It was the most lively instrument imaginable, and, without being moved from its place, played at night all over the house. The drum was not wanting in politeness, for when Mrs. Mompesson was confined it remained quiet. After her recovery, the noises began again, and not only did the drum beat all the tunes then familiar "as well as any drummer," but the spirit began to lift the children out of their beds, and the servants also. Moreover, it threw an old gentlewoman's clothes about the room and hid her Bible in the ashes, flung a manservant's shoes at his head, and was heard to pant like a dog out of breath or to purr like a cat. Then we read how a board came up to a manservant who called it; how Mr. Mompesson found his horse with "one of his hinder legs in his mouth, and so fastened there that it was difficult for several men to get it out with a lever," and how, in sight of all the company, "the chairs walked about the room of themselves, the children's shoes were hurled over their heads, and every loose thing moved about the chamber."

Glanvil's strange book contains stories of men carried up into the air, of furniture "rudely scattered on the floor" by an unseen power, of a tobacco-pipe and a knife moving of their own accord, of a saddle that would "hop about the house from one place to another," of bed-clothes tugged and pulled—this seems a standard joke with these lively spirits—and of "a naked hand and an arm from the elbow down beating upon the floor till the house did shake again." There is also in Glanvil's collection of ghost-stories an account of the "strange passages" that happened at Woodstock in 1649, in which the ghost known as "the good devil of Woodstock" singularly favoured the Royalists. Unfortunately, for the credit of spirits, this devil, as Sir Walter Scott relates, was a man called Funny Joe; but it is not at all clear how he could with any amount of assistance have done without detection some of the feats recorded.

With ghosts and their achievements generally I have nothing to do just now, and so I will pass from the year 1661, when Mompesson's ghost made its appearance, to the year 1716, when a similar, but much more famous, ghost excited the attention of the Wesley family.

There never was a domestic ghost more curiously and carefully watched than "Jeffrey." A large family was engaged for weeks in listening to his performances, and there seems to have been little fear of this uninvited guest. It was a mischievous spirit of the kind that troubled Mompesson, a very noisy ghost, full of fun and fond of what is called horseplay. Now it would come to the bedside and gobble like a turkey-cock; now it would walk about invisible in a rustling gown, or shake the whole house as it went up the stairs; now, being an adherent of the Stuarts, it would object by a violent knocking to Mr. Wesley's prayer for King William; now it seemed to Mrs. Wesley as if somebody had emptied a bag of money at her feet; now it appeared to one of the Wesley girls as a man with a loose nightgown trailing after him; and now, as the young ladies were sitting on a bed playing at cards, it lifted the bed up several times and spoilt their game. Like the spirits known in our day, if it were addressed it would answer by knocking; but alas! no alphabet for ghosts had then been discovered, and what the restless phantom wanted will never be known.

Some attempts, very unsuccessful I think, have been made to account for "Jeffrey." Coleridge thought the whole thing was merely a contagious fancy and that there was no objective reality in the noises. But, we must remember, that in this case the presence of the ghost was announced not by hearing only, but by feeling, and, though less certainly, by sight. Samuel Wesley, the elder brother of John, and a man of shrewd sense, asked for the testimony of two senses, while admitting that it was morally impossible the hearing of so many people could be deceived. And not only was a queer shape seen more than once, but a plate danced upon the table, and old Mr. Wesley was three times pushed against by an invisible power. Doors, too, were thrown open, the door-latches were moved swiftly up and down, and the young children of the family trembled violently in their sleep. It is worth noting that "Jeffrey" and the Mompesson ghost seem to have played the greatest freaks before the most ignorant members of the two families, the menservants in each case telling the strangest stories; but in the Wesley family the noises were rarely accompanied by such acts of mischief as Glanvil records. Many years ago an attempt was made—by Dr. Salmon, in the *Fortnightly Review*—to account, in a very mundane way, for the rappings of the Epworth Ghost; and his argument, suggesting that the whole affair was due to one of the daughters of the house, is certainly ingenious. But it is simply impossible that the noises, if accurately reported, could have been made by Hetty Wesley; and, if it were not impossible, it is wholly beyond belief that a girl of nineteen, brought up to reverence her parents, would have dared to practise such dangerous tricks upon them. The modern "spiritualist" will find, I suppose, no difficulty in explaining a story which, according to Dr. Priestley, is, "perhaps, the best authenticated of the kind anywhere extant"; but most readers of the curious narrative will probably be inclined to agree with the reply of Samuel Wesley, when his mother asked if he could suggest an explanation: "Wit, I fancy, might find many; but wisdom, none."

J. D.

The Rev. H. E. J. Bevan, Rector of St. Andrew's, Stoke Newington, has been appointed Gresham Lecturer in Divinity, in the room of the late Dean of Chichester.

Mr. Justice Denman and Mr. Justice A. L. Smith will be the Christmas Vacation Judges. There will be no sittings in court during the vacation.

The Marquis of Salisbury has granted a reduction of twenty per cent off the half-year's rents of the agricultural tenants on his Hertfordshire estates.

The historic ruins of Kirkstall Abbey, near Leeds, have been sold to a number of gentlemen of Leeds for £10,000, and the Abbey House for £3500. The ruins, which are enclosed in twelve acres of land, will be retained for the use of the public.

At the annual meeting of the Society of Medalists, the Hon. C. W. Fremantle, Deputy Master of the Mint, was re-elected President, and Mr. R. Stuart Poole and Mr. H. A. Grueber, of the British Museum, hon. secretaries. The society determined to offer in 1889 two prizes of the value of £25 and £10 for medals or models of medals in bronze and plaster.

Messrs. Charles Letts and Co., of 3, Royal Exchange, are to the fore again with their Diaries for 1889, of various forms and sizes, arranged so as to meet the requirements of nearly every class, and containing valuable information on subjects of daily life. They are all strongly bound, and practical usefulness seems to have been the chief aim of the publishers.

The annual distribution of medals and prizes to the students of the West London School of Art took place at Great Titchfield-street on Dec. 14, Mr. G. A. Thrupp, Chairman of the School Committee, presiding. The report, as read by the head-master, Mr. John Parker, showed the school to be in a satisfactory condition. In the national art competition their successes were more numerous during the past year than they had ever been. Mr. Seymour Lucas, A.R.A., distributed the prizes.

Mr. Robert Field presided on Dec. 14 over the half-yearly general court and election of the Royal Asylum of St. Anne's Society, held at the Cannon-street Hotel, when twenty-five children—fifteen boys and ten girls—were elected. The institution is the only charity which aims at the relief of those who, once in prosperous circumstances, find themselves reduced from affluence to indigence. To them the society offers help in the maintenance and education of their children.

THE GHOST-GERM

A Fable:

SETTING FORTH THE EVILS OF VAINGLORY AND INGRATITUDE.

He was a poor wretched little Germ of a Ghost-Story; and nobody cared a farthing about him

He lived all alone in a great empty house on the edge of a heath.

His mother was a poor but honest Footstep on the Stairs:

And his father was a Forgotten Murder: a very shady character

And one day a rich retired butcher came to see the house, & found the germ, & seemed quite pleased to see him

He took the house, and gave the Germ a nice draughty room all to himself, & petted him up, and made out a pedigree of respectable Ghost ancestors for him, and invited a lot of people to come & see him

And by degrees the little chap lost his hang-dog look, and got quite chirpy. "Thish ere's rippin", he said. He was a vulgar little beggar

And his growth grew strong and big on his good fare — Indigestion & weak nerves were what he liked best. He called himself a full-blown Ghost now, and thought no end of himself.

And his owner gave him a lot of clanking chains and things to play with, & dresses to dress up in, and he had no end of grisly fun.

He got more and more stuck up, and swaggered about the place as if it were his own. He used to leave his own Haunted Room, and rampage all over the house, frightening the servants & visitors

At last he put on so much side that he & his owner had words. His owner said that instead of being an attraction, he was keeping people away from the house, & he wasn't going to stand it any longer. Then the Germ cheeked him, & said he could get along all right without any patronage.

But one day a mysterious little old gentleman called:

And the Germ introduced himself; but instead of being frightened the little old gentleman smiled, & prodded him about, & took his measure, & turned him inside out, & got him into a corner & asked him a lot of uncomfortable questions about his ancestors, & the Germ had to tell a lot of lies. He began to shrink, & get wizened & weak again:

And the little old gentleman went on smiling, and said "Thank you, my friend: but you're not a Ghost at all, you're a Hallucination. Here's my card. I'm a member of the Society of Psychical Research"

"WHA-AT!" yelled the Germ. He grovelled on the floor & became positively abject.

But the little old gentleman smiled, & calmly took hold of him, & crushed him out flat

And his recovery is despaired of

FOR FAITH AND FREEDOM.*

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIBEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER XLVII.

"I TAKE it," said Barnaby, on the third morning—the weather continuing fine and the sea clear of ships—"that we are now clear out of the track of any British vessels. We may fall into the hands of the Spaniard; but he is mild and merciful of late compared with his temper a hundred years ago. 'Tis true we have given him many lessons in humanity. We should now before nightfall make the islands of Testigos; but I think they are only rocks and sandy flats, such as they call Keys, where we need not land, seeing that we should get nothing by so doing, except the rations shorter. Robin"—'twas at breakfast, when he served out a dram of wine to everyone—"I drink to thy better health, lad. Thou hast cheated the Devil. Nay, Sis, look not so angry!—I meant, thou wilt not go to heaven this bout. Up heart, then, and get strong! We will find thee another sweetheart, who shall make thee lift up thy head again. What? Is there but one woman in the world?

"I was saying, then," he went on, "that we shall presently make the islands of Testigos. There followeth thereafter, to one who steereth west, a swarm of little islands. 'Twas here that the pirates used to lie in the good old days, snug and retired, with their girls and their drink. Ay, and plenty of both! A happy time they had!" Barnaby wagged his head and sighed. "South of this archipelago (which I will some day visit, in order to search for treasure) there lieth the great and mountainous island of Margaritos. This great island we shall do well to keep upon our south, and so bear away to the desert island of Tortuga, where we shall find water for certain—and that, I have been told, the best spring water that flows; turtles we may also find, and fish we may catch; and when we have recovered our strength, with a few days' rest ashore, we will once more put to sea and make for the island of Curaçao and the protection of the Dutchmen."

It needs not to tell much more about the voyage, in which we were favoured by Heaven with everything that we could desire—a steady breeze from the best quarter, a sea never too rough, provisions in sufficiency, the absence of any ships, and, above all, the recovery of Robin.

I say, then, that we sighted (and presently passed) the group of islets called the Testigos; that we coasted along the great island of Margaritos, where we landed not, because Barnaby feared that certain smoke which we saw might betoken the presence of the Spaniard, whom, in spite of his new character for mildness, he was anxious to avoid. 'Tis strange thus to sail along the shore of a great island whereon are no inhabitants, or, if any, a few sailors put in for water, for turtle, and for cocoanuts—to see afar off the forests climbing round the mountain sides, the waterfalls leaping over the precipices—and to think of the happy life one might lead in such a place, far from men and their ways. I confess (since my Mistress will never see this page) that my thoughts for a whole day, while we sailed along the shores of Margaritos, turned upon those pirates of whom Barnaby spoke. They lived here at ease, and in great happiness. 'Tis of such a life that a man sometimes dreams. But if he were suffered so to lie in sloth, farewell heaven! Farewell future hopes! Farewell our old talk of lifting the soul above the flesh! Let us henceforth live the lives of those who are content (since they can have no more) with a few years of love and wine and revelry! It is in climates like that of the West Indies that such a temptation seizes on men the most strongly, for here everything is made for man's enjoyment: here is no cold, no frost, no snow or ice; here eternal summer reigns, and the world seems made for the senses and for nothing else. Of these confessions enough. 'Twas impossible that in such a luxurious dream the image of Alice could have any part.

We landed, therefore, on the desert island of Tortuga, where we remained for several days, hauling up our boat and covering her with branches to keep off the sun. Here we lived luxuriously upon turtle, fresh fish, the remains of our bread, and what was left of our canary; setting up huts in which we could sleep, and finding water of the freshest and brightest I ever saw. Here Robin mended apace and began to walk about with no more help from his nurses.

We were minded, as I have said, to sail as far as the island of Curaçao, but an accident prevented this.

One day, when we had been ashore for ten days or thereabouts, we were terrified by the sight of a small vessel rigged in the fashion of a ketch—that is, with a small mizen—beating about outside the bay which is the only port of Tortuga.

"She will put in here," said Barnaby. "That is most certain. Now, from the cut of her she is of New England build, and from the handling of her she is under-manned; and I think that we have nothing to fear from her, unless she is bound for Barbados, or for Grenada, or Jamaica."

Presently the vessel came to anchor, and a small boat was lowered, into which three men descended. They were unarmed.

"She is certainly from New England," said Barnaby. "Well, they are not from Barbados in quest of us, otherwise they would not send ashore three unarmed men to capture four desperate men. That is certain. And as we cannot hide our boat, though we might hide ourselves, I will e'en go forth and parley with these strangers."

This he did, we watching from a safe place. The conversation was long and earnest, and, apparently, friendly. Presently Barnaby returned to us.

"There offers," he said, "a chance which is perhaps better than to make for Curaçao, where, after all, we might get scurvy treatment. These men, in a word, are privateers; or, since we are at war with none, they are pirates. They fitted out a brigantine, or bilander (I know not which), and designed to sail round Cape Horn to attack the Spaniard on the South Seas. On the way they took a prize, which you now see in the bay. Six men were sent aboard to navigate her as a tender to their ship. But they fell into bad weather off Brazil, and their ship went down with all hands. Now they are bound for Providence, only four hands left, and they will take us aboard and carry us to that island for our services. Truly, I think we should go. They have provisions in plenty, with Madeira wine; and Providence is too far for the arm of King James to reach. What say ye all? Alice, what sayest thou?"

"Truly, Brother, I say nothing."

"Then we will agree, and go with them."

We went on board, taking with us a good supply of turtle, clear water, and cocoanuts (being all that the isle afforded). Honest fellows we found our pirates to be. They belonged to the island of Providence, in the Bahamas, which hath long been the rendezvous of English privateers. Ten years before this the Spaniards plucked up courage to attack and destroy the settlement, when those who escaped destruction found shelter in some of the adjacent islands, or on the mainland of Virginia. Now some of them have come back again, and this settlement, or colony, is re-established.

Thither, therefore, we sailed. It seemed as if we were become a mere shuttlecock of fortune, beaten and driven hither and thither upon the face of the earth.

CHAPTER XLVIII.

THE ISLAND OF PROVIDENCE.

It was some time in the month of March, A.D. 1686, that we landed in Providence. The settlement—from which the Spaniards had now nothing to fear—then consisted (it is now, I learn, much larger) of no more than one hundred and fifty people in all, the men being all sailors, and ready to carry on again the old trade of privateer or pirate, as you please to call it, when they should be strong enough to buy or hire a ship and to equip her.

We stayed on the island for two years and a quarter, or thereabouts. It is one of an archipelago, for the most part, I believe, desert. The settlement was, as I have said, but a small one, living in scattered houses; there were plenty of these to spare (which had belonged to the former settlement) if one only took the trouble to clear away the creeping plants and cut down the trees which had grown up round them since the Spaniards came and destroyed the colony. Such a house, built of wood, with a shingle roof, we found convenient for us; and after we had cleared the ground round it and repaired it, we lived in it. Some of the people helped us to a porker or two and some chickens. They also gave us some salt beef and maize to start with. That we had little money (only what was left over from the sale of Alice's ring) made no difference to us here, because no one had any at all, and at this time there was neither buying nor selling on the island—a happy condition of things which will not, I take it, last long. So great is the fertility of the ground here, and such is the abundance which prevails, that we very shortly found ourselves provided with all that we wanted to make life pleasant. Work there was for us, but easy and pleasant work, such as weeding our patches of vegetables and fruit in the early mornings; or going to fish; or planting maize; or attending to our pigs, poultry, and turkeys; and, for the rest of the time, sitting in the shade conversing. It is never too hot in this place, though one would not in the summer walk abroad at noon; nor is it ever too cold. All the fruits which flourish under the tropics grow here, with those also which belong to the temperate zone. Here are splendid forests where you can cut the mahogany-tree and build your house if you please of that lovely wood. Here we ourselves grew, for our own use, maize, tobacco, coffee, cocoa, plantains, pines, potatoes, and many other fruits and vegetables.

Barnaby soon grew tired of this quiet life, and went on board a steamer bound for New England, promising that we should hear from him. After many months we did receive a letter from him, as you shall immediately learn. When he was gone we carried on a quiet and peaceful life. Books, paper, and pens there were none upon this island. Nor were there any clothes, so that the raggedness of our attire (we were dressed in the sailors' clothes our friends the privateers gave us) became incredible. I made some kind of guitar on which we played, and in the evening we would have very good playing and singing together of such pieces and songs as we could remember. I made verses, too, for amusement, and Alice learned them. We found our brother-settlers a rough but honest folk, to whom we taught many arts: how to procure sea-salt; how to make wine from pine-apples; how to cure the tobacco-leaf—things which greatly added to their comfort, and seeing that there was no church on the island, we every Sabbath held a meeting for prayer and exhortation.

Seeing, then, that we had all that man could desire—with perfect freedom from anxiety, our liberty, a delightful climate, plenty to eat and drink—ay, and of the very best—and that at home there was nothing for us but prison again, and to be sent back to the place whence we had escaped; we ought, everyone will acknowledge, to have felt the greatest contentment and gratitude for this sure and quiet refuge. We did not. The only contented members of our household were John Nuthall and the woman Deb, who cheerfully cultivated the garden and fed the poultry and the pigs (for we had now everything around us that is wanting to make life pleasant). Yet, I say, we were not contented. I could read the signs of impatience in the face whose changes I had studied for so long. Other women would have shown their discontent in ill-temper and a shrewish tongue, Alice showed hers in silence, sitting apart, and communing with herself. I dare say I also showed my own discontent; for I confess that I now began to long vehemently for books. Consider, it was more than two years since I had seen a book! There were no books at all on the island of Providence—not one book, except a Bible or two, and, perhaps, a Book of Common Prayer. I longed, therefore, for the smell of leather bindings, the sight of books on shelves, and the holy company of the wise and the ingenious. No one, again, could look upon Robin without perceiving that he was afflicted with a constant yearning for that which he could not have. What that was I understood very well, although he never opened his mind unto me.

Now, I confess that at this time I was grievously tormented with the thought that, Alice's marriage having been no true marriage—because, first, she was betrayed and deceived, and next, she had left her husband at the very church porch—there was no reason in the world why she should not disregard that ceremony altogether, and contract a marriage after her own heart. I turned this over in my mind a long while; and, indeed, I am still of the opinion that there would have been nothing sinful in such an act. But the law of our country would not so regard it. That is quite true. If, therefore, I had advised these unhappy lovers in such a sense, they would have been compelled to live for the rest of their lives on this island, and their offspring would have been illegitimate. So that, though the letter of the law caused a most cruel injustice—*summum jus, summum nefas*—it was better that it should be obeyed. In the end, it was a most happy circumstance that it was so obeyed.

I have presently to relate the means by which this injustice was removed. As for my own share in it, I shall neither exaggerate nor shall I extenuate it. I shall not defend it. I will simply set it down, and leave judgment to a higher Court than the opinion of those who read these pages. I must, however, acknowledge that, partly in Barbados and partly on Providence, I learned from the negresses, who possess many secrets, and have a wonderful knowledge of plants and their powers, the simple remedies with which they treat fevers, agues, rheumatisms, and other common disorders. I say simple, because they will, with a single cup of liquor boiled with certain leaves, or with a pinch of some potent powder gotten from a plant, effect a speedier cure than our longest prescriptions, even though they contain more than fifty different ingredients. Had I possessed this knowledge, for example, while we lay in Exeter Jail, not one prisoner (except the old and feeble) should have died of the fever. This said, you will understand presently what it was I did.

It was, then, about the month of March, in the year 1688, that a ship, laden with wine, and bound from New York to Jamaica, put in at the port of Providence. Her Captain carried a letter for me, and this was the first news of the world that came to us since our flight.

The letter was from Barnaby. It was short, because Barnaby had never practised the art of letter-writing; but it was pertinent. First, he told us that he had made the acquaintance at Boston (I mean the little town Boston of New England) of his cousins, whom he found to be substantial merchants (so that here, at least, the man George Penne lied not) and zealous upholders of the Independent way of thinking; that these cousins had given him a hearty welcome for the sake of his father; that he had learned from them, first, that the Monmouth business was long since concluded, and, so great was the public indignation against the cruelties of the Bloody Assize, that no one would again be molested on that account, not even those who had been sent abroad should they venture to return. He also said—but this we understood not—that it was thought things would before long improve.

"And now," he concluded, "my cousins, finding that I am well skilled and have already navigated a ship with credit, have made me Captain of their own vessel, the Pilgrim, which sails every year to Bristol and back again. She will be dispatched in the month of August or September. Come, therefore, by the first ship which will set you ashore either at New York or at Boston, and I will give you all a passage home. Afterwards, if you find not a welcome there, you may come back with me. Here a physician may find practice, Robin may find a farm, and sister will be safe from B. B."

At this proposal we pricked up our ears, as you may very well believe. Finally, we resolved to agree to it, promising each other to protect Alice from her husband and to go back to Boston with Barnaby if we found no reason to stay in England. But the woman Deb, though she wept at leaving her mistress, would not go back to the place where her past wickedness might be remembered, and John Nuthall was also unwilling, for the same reason, to return; and, as this honest couple had now a kindness for each other, I advised them to marry and remain where they were. There was on the island no minister of religion, nor any magistrate or form of government whatever (yet all were honest), therefore I ventured to hear their vows of fidelity and prayed with them while I joined their hands—a form of marriage, to my mind, as binding and as sacred as any wanting the assistance of a priest. So we handed over to them all our property (which was already as much theirs as ours) and left them in that sunny and delightful place. If the man was a repentant thief, the woman was a repentant Magdalen, and so they were well matched. I hope and believe that, being well resolved for the future, they may have led a godly and virtuous life, and been blessed with children who will never learn the reason why their parents left their native country.

There is little trade at Providence, but many vessels touch at the port, because it lies between the English possessions in America and those in the West Indies. They put in for water, for fruit, and sometimes, if they are short-handed, for men, most of them to the place being sailors. Therefore we had not to wait long before a vessel put in bound from Jamaica to New York. We bargained with the Captain for a passage, agreeing that he should find us provisions and wine, and that we would pay him (by means of Barnaby) on our reaching Boston (which is but a short distance from New York). Strange to say, though we had been discontented with our lot, when we sailed away, Alice fell to weeping. We had murmured, and our murmuring was heard. We shall now live out what is left to us in England, and we shall die and be buried among our own folk. Yet there are times when I remember the sweet and tranquil life we led in the island of Providence, its soft and sunny air, the cool sea-breeze, the shade of its orange groves, and the fruits which grew in such abundance ready to our hands.

CHAPTER XLIX.

HOME.

In one thing alone the villain Penne spoke the truth. The Eykin family of Boston (I say again of New England) was one of the most considerable in the place—great sticklers for freedom and for religion (but, indeed, it is a most God-fearing town, and severe towards transgressors). They received us with so much kindness that nothing could surpass it; we were treated as Christian martyrs at the least, and towards Alice, of whose cruel lot they had heard from Barnaby, they showed (but that no one could help) an affection quite uncommon. They generously furnished us all with apparel becoming our station, and with money for our daily occasions; they approved of our going with Barnaby; but, in the event of our finding no welcome or means of a livelihood at home, and if Alice should be molested by her husband, they engaged us to return to New England. Here, they said, Robin might become a farmer, if he had no inclination for trade; they would joyfully receive Alice to live with them; and I myself would certainly find practice as a physician; while Barnaby should continue to command their ship. When I considered the many conveniences which exist in Boston (it is already, though young, better provided with everything than Barbados) the wholesome air and pleasant climate, the books which are there, the printing press which hath already been established, the learned ministers, the college, the schools, and the freedom of religion, I should have been nothing loth to remain there. But I was constrained first to go home. I found also, which astonished me, so great a love of liberty that the people speak slightingly of the English at home, who tamely suffer the disabilities of the Nonconformists and the prerogative of the Crown; and they ask why, when the country had succeeded in establishing a Commonwealth, they could not keep it? It certainly cannot be denied, as they argue, that Israel acted against the will of the Lord in seeking a king.

So we left them. But in how changed a condition did we now cross the ocean! Instead of huddling in a noisome and stinking dungeon, unclean for want of water, ill-fed, and with no change of raiment, we had now comfortable cabins, clothes such as become a gentleman, and food of the best. And Barnaby, who had then sat humbly in the waist, where the prisoners were confined, now walked the quarter-deck—a laced

INDIAN ART POTTERY.

The ornamentation of vases with designs illustrating the scenes and figures of antique mythology is an application of Fine Art truly classical, practised by the Egyptians, the Assyrians, the Greeks, and the Etruscans, in early periods of civilisation; and in India, in China, and in Japan, with a degree of taste and ingenuity, especially in the colouring, and with a fertility of invention in design and in decoration, that can only be admired, and can scarcely be imitated, by any modern manufactures. A set of beautiful vases recently made in India, to be presented to her Majesty Queen Victoria, Empress of India, and to Princess Beatrice, proves that the eye and hand, the prolific fancy, the hereditary skill and traditional learning of our Asiatic fellow-subjects—a race endowed with some intellectual talents in a degree not excelled by any nation of mankind—have not yet lost their power. We have perused with much gratification a short treatise of twenty quarto pages, written by Framjee Pestonjee Bhumgara, of Madras and Bombay, in which he explains the subjects represented by the designs on these exquisite examples of Indian artistic pottery. They are taken from that wonderful epic poem, the "Rámáyana," known to all competent scholars of comparative mythology and poetry, which is quite as important to the student of Indian thought and national life as Homer's "Iliad" to the student of Hellenic art and literature. This poem, which can now be read in English by those who do not happen to be acquainted with Sanscrit, relates the heroic adventures and exploits of Ráma, one of the

FLORAL VASE, DESIGNED FROM OLD INDIAN DECORATIONS.

VASE DECORATION: SCENES OF HINDOO MYTHOLOGY; THE BATTLE OF RAMA WITH RAVANA.

avatar incarnations of the God Vishnu, the Divine Preserver; there have been three Rámas, but the one here glorified is Ráma Chandra, the son of Dasaratha, a Prince of the Solar dynasty, reigning somewhere in Oude (Ayodhyá). In the judgment of Professor Sir Monier Williams, the better part of the Rámáyana was current in India so early as the fifth century before Christ; it was compiled into its existing form probably by an Indian Homer, named Válmiki, who arranged it in seven books, containing 24,000 couplets of verse. We read the life of Prince Ráma, his banishment to the forests of Central India, and how he was deprived of his wife Sita, and how, like the valiant hero that he was, being the divine institutor of the Indian military caste, the Kshatriyas, who are still extant among the native soldiery of our Indian Empire, he set forth to make war against the Demon-Giants of the South, whose cruel and lustful chief, Rávana, King of Ceylon, the enemy of the Gods, had carried off the fair Sita, flying a thousand miles through the air. The Supreme Creator, Brahma, had long tolerated the insolence of Rávana, until the benevolent Vishnu, the protector of mankind, with his wife Lakshmi sitting on his knees, pleaded with the Almighty Creator, and was permitted to save the world by incarnating his own soul in Ráma, and then becoming the champion of justice. Is not this a noble religious story for Aryan heathendom? So Ráma, at first accompanied by his brother Lakshmana, who slew Indrajit, one of the sons of Rávana, a warrior driving a chariot drawn by four tigers and a potent magician, performed the work of deliverance. In this he was aided by Hanuman, son of the Wind God, an impersonation of swift agility, who assumed the form of a monkey, could make himself of vast size or small, and could leap across the strait from India to Ceylon. Nothing so grandly fantastic as this marvellous allegory is to be found in Oriental or European fable. It has a profound significance, philosophical and historical, for the instructed Hindoo; and its recital by village patriarchs, or by wandering bards, is still the delight of an imaginative people. The episodes of the main narrative—which is a genuine national epic, signifying the advance of Aryan civilisation from the Ganges to Southern India, and the conquest of tribal savagery—are incidents of much romantic interest. One is the story of Princess Draupadi, who is also the heroine of another grand ancient Indian poem, the "Mahabharata": she was the lovely daughter of Drupada, ruler of the Panchala Kingdom, and she had five husbands at once, who were brothers, sons of the great warrior Pandu and generals of the army. There is the essence of many tales of chivalry and "Idylls of the King" in this story, which describes a "Conference" or Tournament at the Royal Court, according to the rules of the Swayamvara, when the Princess was to be given as a prize to the best archer: he whose arrow went through the ring and hit the eye of the golden fish was to wed the peerless beauty, who stood by the lists arrayed in brilliant jewels. Ráma offered to shoot for her, but his rank as a Prince was then concealed, and the Princess, in her pride of birth, refused to allow him; she was therefore won by Arjuna, for himself jointly with his four brothers. These were afterwards detected as impostors by her own Royal brother, and the consequence was a sanguinary war. Such are a few of the legendary tales of ancient India, which certainly bear comparison with those of ancient Greece.

VASE DECORATION: THE GRAND CONFERENCE AT DHRUPAD; FROM THE "RAMAYANA," HINDOO EPIC POEM.

THE BLACK MOUNTAIN EXPEDITION.

Another Sketch by Lieutenant Walter C. Blair, of the 24th Punjaub Infantry, with the third column of troops sent up the Black Mountain highlands in October to chastise the hostile confederation of warlike tribes, is engraved for our Journal this week. It represents the appearance of some of the mountaineers who had been taken prisoners of war and brought to the Oghi Fort, not very far from the military station of Abbotabad, in the district of Hazara, north of the Punjaub. The rapid suppression of this revolt on our Indian frontier, and the equally arduous and dexterous performance of the Sikkim force in repelling the Thibetan aggression, lend the lustre of successful military services to the close of Lord Dufferin's popular Indian administration. Upper Burmah, however, is still troubled by predatory bands of "dacoits"; and an expedition against the Kachyens, to the north-east of that province, was to start from Mogoung at the beginning of the year. Another expedition, under Brigadier-General Collett, proceeds by way of Mobye to Sawlon against the Red Karens.

THE BLACK MOUNTAIN EXPEDITION: PRISONERS IN THE FORT OF OGHI, HAZARA.

Mr. Stormouth Darling, M.P., Solicitor-General for Scotland, has been created a Queen's Counsel.

An excellent evening concert, in aid of the funds of the Volunteer Medical Staff Corps (London Division), was held on Tuesday, Dec. 18, at the Steinway Hall.

An entertainment recently given at St. Andrew's Hall, in aid of a fund for providing the poor of St. Pancras with Christmas dinners, was a great success, realising £105.

The court of the Cordwainers' Company have, in addition to their present exhibitions, established an extra one of £25 per annum, tenable for five years for a scholar at Oxford or Cambridge in actual residence, and have elected a scholar of Hertford College, Oxford, as the first exhibitioner.

The first performance of the Latin play annually given by the Westminster "boys" took place on Dec. 13 in the great dormitory of St. Peter's College. The play was repeated on the 17th and the 19th with a prologue and with the modern comic epilogue bristling with topical references. The old comedy this year is the "Trinummus" of Plautus.

At a meeting of the Arts Committee of the Liverpool City Council, on Dec. 13, Sir James Picton, the chairman, said the price agreed upon for Sir Frederic Leighton's picture "Captive Andromache," bought for the Liverpool Corporation Exhibition, was £4000, which included the copyright, half of the money to be paid down and half three months after delivery of the picture. Sir Frederic desires to send the picture to Berlin to be reproduced in photogravure, and it would not be returned for twelve months.

The newspapers have recently said a good deal about the injury of cigarette-smoking, in which there was doubtless wisdom, but we cannot help thinking a deal of the harm that is contracted arises quite as much from the effects of the paper used (which sticks most unpleasantly to the lips) as from the tobacco used in the manufacture. By a patent lately introduced by Messrs. Philip Morris and Co. all this harm is averted, the end or mouth-piece of their cigarette being neatly cased in thin cork. Their patent is called "The cork-tipped cigarette," and will doubtless be much appreciated by smokers.

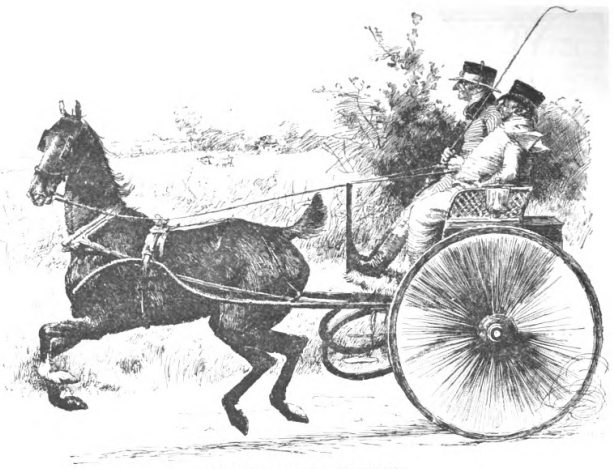
ROYAL NATIONAL LIFE-BOAT INSTITUTION.

At a meeting of this institution held on Thursday, Dec. 13 its house, John-street, Adelphi, the sum of £250 was voted aid of the local funds for the relief of the widow of Jo Crookes, one of the crew of the Staithes life-boat, who lost life when the life-boat was overwhelmed by a very heavy during the severe storm experienced on Nov. 27, he and t others of the crew having made for the shore when they w thrown out of the boat; £3 each was granted to the crew the life-boat in acknowledgment of the risk and exposure which they were subjected. The behaviour of the life-b under the exceptionally trying circumstances gave ent satisfaction to the crew, whose confidence in the boat has be increased since the disaster. She arrived in safety at Middl borough in tow of the steamer Ethel, of Stockton, with t remainder of her crew and the three fishermen she went succour. Rewards amounting to £1188 were granted to t crews of life-boats of the institution for services rendei during November, in which period they were inst mental in saving no less than 248 lives. The thanks of t institution inscribed on vellum were voted to Mr. G. H. Gri chief officer of H.M. Coastguard at Portrush, Ireland, a other rewards to the crews of shore-boats and others for savi life from wrecks on our coasts. Altogether, during the curre year, the institution has granted rewards for saving 772 liv by life-boats and other means. Payments, amounting £2439 were ordered to be made on the 293 life-boat establis ments of the institution. Among the contributions recent received were £500 from Heath Harrison, Esq., of Liverpo and Eastham, for the Campelltown new life-boat, the Ma Adelaide Harrison; £100 from George Hilder, Esq., Rye; a £71 13s. 7d. from the Independent Order of Odd Fello (Manchester Unity), on behalf of the support of their li boat at Grimsby.

ROYAL AGRICULTURAL SOCIETY.

The annual general meeting of the Royal Agricultural Socie of England was held, on Dec. 13, in Hanover-square, presid over (in the absence of the Prince of Wales) by the Earl Feversham, who congratulated the members of the society the position it had attained on the eve of the Jubilee ye when her Majesty had consented to become president.

Mr. Ernest Clarke (secretary) read a summary of t annual report of the council, which stated that since the con mencement of the Queen's year of office as president of th society a very large and encouraging accession had taken plac of new governors and members. The half-yearly statement accounts to June 30 last showed that the funded propert of the society had increased from £25,885 to £30,000 In the chemical department there had been more tha the usual amount of analytical work carried on in th laboratory, the total number of analyses made being 1653, a against 1615 last year. During the year inquiries had bee received by the consulting entomologist respecting the life history of no fewer than forty-five different kinds of insect injurious to crops, and as to means of prevention and remedie against their attacks. Concerning these, 1200 letters had bee sent, besides numerous copies of leaflets giving informatio upon the ox warble-fly and other pests. With regard to th last meeting, held at Nottingham, the report stated that it wa in every way a great success, although the weather was not a all favourable. The number of persons who passed the turn stiles was 147,927, which had only been three times exceeded— at Manchester (1869), at Birmingham (1876), and at Kilburn (1879). The accounts had not yet been finally adjusted, bu they showed a surplus of receipts over expenditure of £4000.



Mr. Clare Sewell Read moved the adoption of the report and said a more satisfactory one in the sad agricultural time which prevailed it had not been his fortune to read for many years. Mr. Gibbons seconded, and Surgeon-General Ince, Mr W. Botly, and Mr. Thomas Duckham supported the resolution the last named remarking that it was a matter of great satisfaction that, owing to the excellent regulations of the Privy Council for checking infectious diseases among animals, there had not been a single case of foot-and-mouth disease since October, 1885, although during forty years previously the nation had never been free from it. Mr. J. K. Fowler also spoke to the resolution, which was carried, and the meeting concluded with a vote of thanks to the chairman.

Lord Balfour of Burleigh has been appointed Secretary of the Board of Trade, in the room of the Earl of Onslow.

Owing to the condition of the Mansion House consequent upon the drainage works now in operation, the Lord Mayor finds that it will be impossible to hold the juvenile fancy-dress ball on Jan. 8, the date arranged, and it will accordingly be deferred until the Easter holidays. For the same reason the conversazione in connection with the Home for Little Boys will not be held on Jan. 3.

"COACHING DAYS AND COACHING WAYS."

ILLUSTRATED BY HERBERT RAILTON AND HUGH THOMSON (MACMILLAN AND CO., PUBLISHERS).

ILLUSTRATED GIFT-BOOKS.

The Witches' Frolic. By Thomas Ingoldsby. Pictured by Ernest M. Jessop (Eyre and Spottiswoode).—Among the humorous tales in verse written by the Rev. R. H. Barham, Minor Canon of St. Paul's and author of the "Ingoldsby Legends," this one is not the most celebrated. Nor is it one of his best; and, while the patter of his lines and the jingle of his rhymes may still amuse the ear, many contemporary allusions have lost their meaning to a later generation. The grotesque fancies of witchcraft and demonology are pretty well played out; the ridicule of monks, of ecclesiastical antipathies in general, has had its day: and nobody laughs at Old Nick's horns and tail. Yet a clever artist like Mr. Ernest Jessop can make effective pictures—indeed, some of his designs approach sublimity in the treatment of light and shadow—to illustrate such a fantastic story. We see our old acquaintance the Devil, locked out of doors on a stormy night, blowing into the pipe of his door-key to clear it of dust; how very funny! We see a pretty young witch riding high in air on a broomstick; but the artist's power is more fitly shown in delineating the ruined tower, the blasted tree, the lurid sunset, the Gothic front of a cathedral at night, or the gateway of a stately mansion—surely not the Vicarage?—with the watchdog howling beneath it.

The Happy Prince, and other Tales. By Oscar Wilde. Illustrated by Walter Crane and Jacomb Hood (D. Nutt).—The reputation of this author as a teacher of æsthetic social philosophy should not deter anybody from enjoying such delightful little parables as he sets before us, much in the vein of Hans Christian Andersen, gracefully fantastic, quaint, and amusing, with lessons of kindness and gentleness in each simple story. They are those of the golden statue perched on high, which saw and pitied the woes of the poor in the city, and sent the swallow to carry its jewelled ornaments for their relief; the nightingale with its breast pierced by a thorn, singing its life away for a red rose to be given as a pledge of love; the giant's garden where it was always winter because he shut out the children, but where the sun shone and the flowers instantly blossomed when he let them in; with the one-sided friendship of Hans and the Miller, and the overweening conceit of the Rocket thinking itself superior to other fireworks.

Coaching Days and Coaching Ways. By W. Outram Tristram. Illustrated by Herbert Railton and Hugh Thomson (Macmillan and Co.).—These characteristic sketches of the old English high roads, the now less-frequented country towns and villages, the roomy, once comfortable hostelries which were content to be called inns, the stage-coaches in or upon which some of us yet living have travelled all day and all night, the coachmen and guards, their passengers of different ranks and classes, and the variety of other vehicles, other scenes, and other folk, to be met with in a provincial journey, fifty or a hundred years ago, furnish a pleasant contribution to social history. They have appeared in the *English Illustrated Magazine*, and have been repeatedly noticed by us among its monthly contents, along with Mr. Outram Tristram's entertaining literary commentary, which is full of biographical anecdotes and of citations from the memoirs, the novels and plays, the local traditions and legends, bearing reference to the places along the road. The artists have well performed their task; and when it is stated that this volume treats of the Bath road, the Exeter road, the Portsmouth road, the Brighton road, the Dover road, the York road, and the Holyhead road, we trust that the geography and topography of England, apart from "Bradshaw's Railway Guide," may still be known sufficiently to understand how much that is really interesting should be found on "the old coaching ways." One of our pages this week is filled with half-a-dozen of the spirited and truthful sketches of stage-coach business, and of one driving a "gig" to catch the mail, with views of such old-fashioned inns as the Bell at Stilton and the Crown at Bawtry, and a view of Newark Castle. We congratulate Mr. Herbert Railton and his colleague on having obtained such capital subjects for their clever pencils.

Jerusalem, the Holy City. By Colonel Sir Charles Wilson, R.E., C.B., K.C.M.G., F.R.S. (J. S. Virtue and Co.).—The distinguished officer of the Royal Engineers, who has rendered great services to the study of Biblical archæology and topography in carrying out the plans of the Palestine Exploration Fund Committee, has produced in this handsome volume a work of abiding value. His introduction is a careful statement of the present condition of actual knowledge or confirmed opinion respecting the sites and structures of Jerusalem associated with events recorded in the Old and New Testament histories, mentioning the controversies that have arisen on such questions, especially with regard to the place of the Crucifixion and to the position of Zion, the city of David, and the limits of the city in which King Solomon reigned, the capital of the ancient Kingdom before the exile of Babylon. The descriptive chapters which follow may be relied upon for strict accuracy, and for conclusions in forming which the writer has taken into account all the historical evidence and the results of critical discussion now available. Sir Charles Wilson is a clear and exact writer, and has well digested the observations and arguments of his predecessors in these inquiries. The book is adorned with four large steel engravings and nearly a hundred engravings on wood.

Ranche Life and the Hunting-Trail. By Theodore Roosevelt. Illustrated by Frederic Remington (T. Fisher Unwin).—The Great American Exhibition of 1887 made even Cockneys acquainted in some degree with the active habits of the hardy "cow-boys" at the "ranches" or cattle-grazing stations of the West, in parts of Colorado and Kansas, Nebraska, Dakota, Wyoming, and Montana, besides the southern region in Texas, Arizona, and New Mexico. The hunting pursuits, more for gain than for sport, which are still afforded by the rapidly-diminishing wild animal races in those countries, though now mostly driven into the sequestered recesses of the Rocky Mountain ranges, have often been described. Mr. Theodore Roosevelt, an American writer of much experience and literary ability, contributed to a New York magazine the interesting chapters on these subjects which here form an attractive book, and which are illustrated by Mr. F. Remington with designs of much variety, representing lively scenes and stirring adventures, men and beasts in vigorous attitudes and groups, with the Red Indians hanging on the outer skirts of a rude civilisation; making altogether an original study of Western life.

Les Grands Voyageurs de Notre Siècle. Par G. Meissas (Hachette and Co.).—This volume, which is rather bulky, with a cover very prettily decorated in crimson, green, and gold, is for readers of French, and contains a vast quantity of reading, much of which has been translated, with abridgement and compilation, from many familiar English books of travel, though French, German, Italian, Dutch, and other foreign explorers of the wilder portions of the globe are made the subjects of its collected narratives. We recognise our own countrymen—Mungo Park, Admirals Parry and Ross, Sir John Franklin, Dr. Livingstone, Burton, Speke, and Grant, Sir Samuel Baker, Cameron, and Stanley—along with many adventurous representatives of the different nations of Europe. The performances of the latter—François Levaillant, D'Urville, René Caillié, Jacquemont, Father Huc, Vambéry, Garnier, Schweinfurth, Nachtigal, Payer, Nordenskiöld, Serpa Pinto, Gallieni, Prjewalski, Madame Dieulafoy, and De Brazza—are impartially set forth; and we are happy in the case of some of the French travellers to improve our previous acquaintance with them, which was less than might be desired. Asia, Africa, and America, with the Arctic Regions, supply an immense diversity of topics, with the aid of a very large number of woodcuts; but the work is better adapted to popular use in France than in this country.

Aux Rives d'Or (the Riviera). Par Mars. (E. Plon, Nourrit, et Cie., Paris).—Our readers have had several opportunities of being amused by the droll and sprightly sketches of the clever French artist M. Mars, whose pictures of children and domestic animal pets, of the sea-bathing at Ostend, and of Jersey and the coast of Brittany, were noticed some time ago. Messrs. G. Routledge and Son have published English editions of "Our Darlings" and "Friends and Playmates," to make this artist at home with us. He has now turned his

IN THE FLOWER-MARKET, COURS ST. LOUIS, MARSEILLES.

From the New Sketchbook by M. Mars, "Aux Rives d'Or," (Published by E. Plon, Nourrit, et Cie., Paris).

steps to the "golden shores" of the Mediterranean, visiting Marseilles, Toulon, Hyères, St. Raphael, Cannes, Antibes, Nice, Monaco, Mentone, Bordighera, San Remo, Savona, and Genoa, with an eye and a pencil for all that is quaint and comical, as well for what is pretty, in the figures and demeanour of those resorting to the sunny coast towns along his route. Most of the drawings are lightly coloured; they frequently run into mild caricature, but are commonly pleasant in character, and their humorous suggestions are explained by a few words of colloquial French. We are permitted to borrow the Sketch of a scene in the flower-market on the Cours St. Louis at Marseilles, with two buxom young women, Fortunée and Thérèson, carrying their baskets to the stalls.

The Alps. By Professor F. Umlauft, Ph.D., translated by Louisa Brough (Kegan Paul, Trench, and Co.).—Space and leisure are needful to do justice to the merits of this important work of scientific topography, which is very well translated by an English lady, and which must be the fruit of accurate and extensive special studies by Dr. Umlauft, dealing with a large and complex subject, as German learned men can do, consistently and thoroughly to the last item of its exposition. Orography, hydrography, meteorology, geology, botany, zoology, and ethnology contribute the views and materials, with little or no display of romantic eloquence. It comprises all the high mountain ranges of Switzerland, Savoy, and the Tyrol, and those overhanging the Italian lakes and plains, and is probably the most complete and authentic treatise on this subject. There are 110 illustrations engraved on wood, and several correct maps.

The Pied Piper of Hamelin. By Robert Browning. Illustrated by Kate Greenaway (G. Routledge and Son).—Mr. Browning has a regularly organised school of ethical disciples seeking grave lessons of wisdom from his serious poetry. This favourite piece of romantic drollery, with its piteous catastrophe, telling how the magical piper, after delivering the city from a plague of rats, by the same charm of his music led away the children to be lost in caverns of the forest, may have as much profound significance as "Pippa Passes." Miss Greenaway, at any rate, who draws little children so faithfully and gracefully because she loves and knows them so well, has filled the book with many pretty pictures, colour-printed by Mr. Edmund Evans, hereby producing a delightful Christmas gift for any household where little people are to be made happy at this season of the year.

All Things Bright and Beautiful: a Treasury of Picture and Song (Ernest Nister, Bride-street).—The editor of this collection of choice poetry, Mr. R. Ellice Mack, has drawn for its contents, except a song from Shakspeare and one or two pieces from Shelley and Wordsworth, on various English and American writers now or recently living; while the eighteen illustrations, finely printed at a Nuremberg press, are drawn by some of the English artists highest in repute for designs suitable to the art of engraving; among these are Mr. F. Morgan, Mr. Birket Foster, Miss Alice Havers, Mr. F. G. Cotman, Mr. Yeend King, Mr. E. A. Waterlow, Mr. F. Hines, and Miss Dickse. The result of their labours, as might be expected, is excellent in all artistic qualities, and we only wish that the title had been more definite and precise in meaning.

The Gold of Fairnilee. By Andrew Lang (J. W. Arrowsmith, Bristol).—The well-known scholar, agreeable poet, and versatile prose writer, to whom many young persons will be indebted for their pleasure in reading this story, has imbibed local inspiration on Tweedside; and those who have rambled in the south of Scotland cannot hear such a name as "Fairnilee" without enchanting remembrances of historic or legendary romance. His tale is of the time of the fatal battle at Flodden; and that sweetly plaintive strain, "The Flowers of the Forest," seems to mingle with an older chant of "True Thomas the Rhymer," as we peruse this Border story, in which, however, there is no description of actual fighting. The boy Randal, whose father was slain at Flodden, is carried to the Fairy Queen, and learns where to dig for an ancient Roman treasure, making him and his family happy. The coloured pictures, by T. Scott and E. A. Lemann, will assist the fancy and gratify the eyes of children.

The Story of a Mermaiden. From Hans Andersen (Griffith, Farran, and Co.).—The tale of Andersen's which is here turned into English verse of the narrative ballad metre by E. Ashe need scarcely be described to those who are conversant with the popular works of the famous Danish author. The illustrations, designed by Laura Trowbridge, have the qualities of freedom and originality of invention, and of bold treatment with vigorous and graceful effects.

A Journey Round the World. With Illustrations by Charles Marr (G. Routledge and Sons).—A family party, including a boy named Willie and his sister Ethel, are taken by their father, Colonel Sir John Wrighton, to Spain, Egypt, Ceylon, India, Borneo and the Philippines, China, Japan, the Sandwich Islands, California, South America, the West Coast of Africa, Madeira, and home. The narrative of what they saw is necessarily instructive, and the coloured pictures render it not less entertaining.

Our Country House. With Illustrations by Julius Kleinmichel (Routledge).—This is a book of the same form and class with that above mentioned; the difference is that the children, Walter and Anna, stay at home with their parents, read of wild countries, and of wild Indians, of voyages and travels and adventures, and are joined by their cousins in playing at Robinson Crusoe.

Over the Hills. By E. L. Shute. Illustrated by Jessie Watkins (F. Warne and Co.).—In simple verses of musical rhyme, the joyful romps and rambles of two little girls and a little boy or two, amidst the delights of rural scenery, are winningly related. The pictures, mostly coloured or tinted, are not lacking in the graces of childlike figures and gestures.

Jack the Giant-Killer. By the late Richard Doyle (Eyre and Spottiswoode).—In 1842, when the gifted artist whose death is regretted was quite a boy, he wrote his own improved version of Jack's marvellous victories in Big Man's Land, and decorated the pages of his neat manuscript with glowing coloured pictures, superior in drawing and composition, as well as in humour, spirit, and imagination, to many elaborate designs of this kind by old hands without his precocious genius. The publication of a facsimile of this most original work, accurately engraved, splendidly coloured, with divers ornamental page-borders, and carefully printed, is a boon to lovers of fanciful and sportive art, as well as to juvenile minds, for which it will be a rare entertainment.

Shakspeare's Songs and Sonnets. Illustrated by Sir John Gilbert (Sampson Low and Co.).—There is no further need, at this day, to commend the graceful and expressive graphic interpretations of Shakspeare in which Sir John Gilbert has abundantly excelled most of his countrymen, or to remark his dramatic and idyllic perception of old English life. These qualities will again be recognised in the present series of designs.

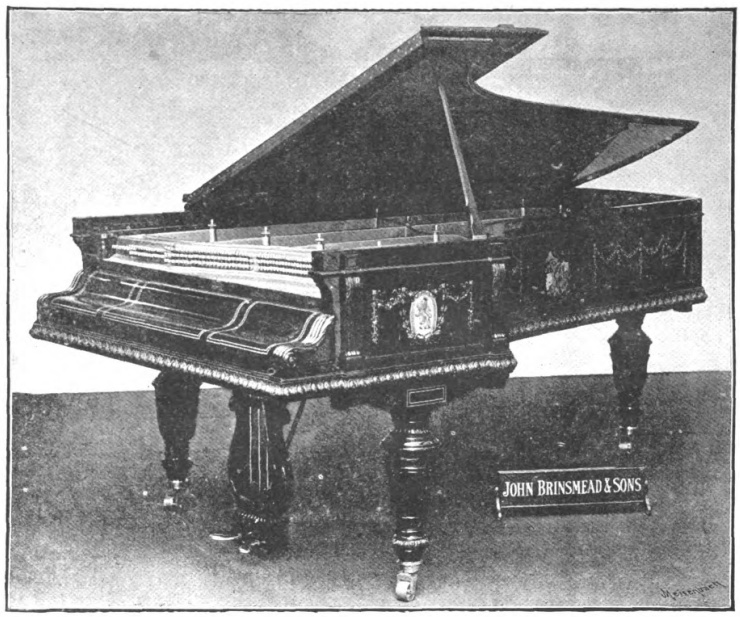
Logbook Notes through Life. By Elizabeth A. Little (Kegan Paul, Trench, and Co.).—This is a collection of brief passages of religious poetry, selected from various authors, bearing reference to the common similitude of human life to a voyage at sea. The editor, who has in her own former writings treated of moral themes with a similar metaphorical idea, arranges these extracts not unskillfully. The drawings of ocean and shore views, of ships, portions of masts and rigging, and seaman's knots with ropes, have a certain degree of merit, and serve well to accompany the text.

Nister's Holiday Annual for 1889. Edited by Robert Ellice Mack (Ernest Nister).—As a volume of pictures and stories for little folk, "girls and boys come out to play," this new candidate for the approval of mothers and children deserves our best commendation. The short tales and verses deal with child-life, its natural actions, and its purest thoughts and feelings, in an artless poetical spirit; and most of the drawings are good.

Drawing-Room Plays. Adapted from the French by Lady Adelaide Cadogan (Sampson Low and Co.).—Good and wholesome plays for modest and discreet amateur actors in a domestic performance are not too abundant. Lady Adelaide Cadogan has borrowed plots, incidents, and characters, unobjectionable in tone and purpose, from seven French comedies, transposing the dramatic situations into the familiar circumstances and manners of English society. Her work is likely to be serviceable at private evening parties, and the illustrations, drawn by E. L. Shute, add to its effect in a quiet reading.

AMERICAN NOTES.

The excitement of the Presidential Election has died away with the coloured fires, the gunpowder, the brass bands, the processions, the tinsel gew-gaws, and the general fanfaronade deemed essential to the contest. For six months or more prior to the Fourth of November in every quadrennial the greater part of the American people plunge into a state of political lunacy. But it must be added that the process of convalescence is rapid. All the personal abuse and party virulence so freely indulged in during the warfare are forgotten, or, if remembered, are condoned in a Pickwickian sense. More than a month has now elapsed since the great periodical fight between the "Ins" and the "Outs" for the possession of the White House at Washington. While it waged, the vocabulary was ransacked for terms of mutual denunciation. The peculiar rhetoric of American platform oratory and of the press found ample scope for exercise. The pillars of the earth were likely to tremble and fall. Yet the threatened catastrophe has been averted. Men continue to buy and sell and get gain—or make losses. Marrying and the customary social usages have experienced no interruption. Young America continues to have its round of pleasure. Dame Nature pursues her calm and majestic course, and the crowds of busy little human bipeds go their several ways.



The fact is that European observers attach far more importance to the Presidential title and functions than do the people to the manner born. The inaugural and the annual Messages to Congress have greatly diminished in significance. The power and the influence of the Chief of the Executive Government are defined and restricted. The Senate can refuse to ratify his nominations to high offices. Even his veto of Acts of Congress can be overridden by a specific majority. He is a distinguished personage; but he is watched, and hampered, and guarded, very much like the queen-bee in a hive. The written Constitution is precise and absolute. Innumerable Argus eyes are upon him, and he is daily instructed, admonished, and threatened by a ubiquitous and sleepless press. As an ornamental figurehead his position commands respect; but the strictly Federal matters which he can control or influence are comparatively few. With the autonomy of the several States he cannot interfere. A genuine American esteems his particular State as of supreme importance. It claims the first place in his allegiance and regard. Its Legislature is a greater body and its doings concern him more than Congress, unless there be some such crucial matter as the tariff. Each State has its own separate Constitution, and is sovereign and independent within its own borders. The proceedings at Washington occupy but a small space in the leading journals. Once in a while, between the contests for the Presidency, some grave question of policy arises, or there is a passing ripple of excitement over such an episode as the Sackville case. But the pursuit of the almighty dollar cannot be checked, even for these things; nor can matters of local concern in the township, in the municipality, or in the State, be set aside by what ordinarily occurs in Washington.

Not until March 4 does the actual change occur in the Administration. On that day, President Cleveland retires from office and his successor will be installed. The House of Representatives recently elected does not enter upon its duties before Dec. 4, 1889. During the winter there will be, of course, schemes and intrigues without number over the appointment of the Cabinet of the new President. There are also many thousands of expectant office-holders who will bring every kind of influence to bear on the dispensers of patronage. Before the time of President Andrew Jackson—known as "Old Hickory"—in 1829, the maxim which he is said to have formulated, "to the victors the spoils," had been acted upon only in a limited degree in certain States. By the distinguished statesmen who filled the Presidential chair from Washington to John Quincy Adams, public office had been scrupulously regarded as a public trust. Even when a change of parties was effected, after a severe struggle, by the election of Jefferson, he made only thirty-nine removals in eight years, although most of the existing officials were known to be opposed to his policy. Jackson changed all this deliberately and on system. Within a year he dismissed four hundred and ninety-one postmasters and two hundred and thirty-nine other officials. The new men promptly made similar changes among their subordinates, so that a clean sweep was effected. This was done with the avowed object of rewarding political friends and of punishing opponents. The hateful and pernicious system thus initiated has been pursued ever since. Honest and strenuous efforts have been made of late years in the direction of Civil Service reform. Enactments have been passed, and some small measure of good has been accomplished. But the evil and the scandal are too deeply seated to yield to anything but a heroic and drastic remedy. This is not likely to be applied until a healthy public sentiment has been aroused.

The fact is that there are too many who profit by the existing system in both the political camps. The Republican party had a monopoly for twenty-four years prior to 1885. When the Democrats achieved the victory after their long exclusion, many of them, naturally enough, wished to make as much hay as possible while the sun shone. Now that the Republicans are about to return to the warmth and the emoluments of office after a brief banishment, it is not to be expected that they will leave their political foes in possession of lucrative posts. Hence all the holders of offices in the Customs, the Internal Revenue, the Post Office, and in other branches of the Federal service, to the number of about one hundred and thirty thousand, scattered all over the States, and including Ministers and Consuls abroad, are liable to be displaced. Wise and patriotic men deplore this, and protest against it; but at present they are in a minority. The "public service" is a euphemism for private advantage with professional politicians all the world over. Hence independent and high-minded persons among both Democrats and Republicans are powerless in the presence of a hungry crowd who make politics a trade, and who demand rewards for services that are often dubious and unscrupulous. Eminent public servants, who have made a special study of certain subjects, and who are preeminently qualified to discharge their duties, are continually thrust aside to make room for men who may be utterly incompetent, but whose blind devotion to their party clamours for reward. Wealthy supporters who have contributed large sums for "campaign expenses" also look for recognition in appointments for their friends. It is estimated by competent authorities that the total cost of a Presidential election exceeds twenty millions of dollars, or about four millions sterling. No balance-sheet is published by either party, but the managers are entrusted with the absolute disbursement. The *New York Times*, of Aug. 28, 1888, reported that the National Democratic Committee had received ten thousand dollars from President Cleveland, Secretary Whitney, Secretary Endicott, and Postmaster-General Dickinson. This sum is twice the amount of the annual salary of each of the three last named. A similar custom prevails in nearly all elections for public posts, including such as are strictly local. The result is that enormous sums are disbursed—often in a manner and for purposes which highminded and patriotic men detest and censure. They admit that the laws against bribery and corruption must be made more stringent, and that measures must be taken to render voting by ballot secret and secure, which is far from being the case at present. Americans who have seen the working of the English system are emphatic in their recognition of its superiority.

They do not so readily make a similar admission with regard to another matter. To allude to it at all is like skating over very thin ice. Yet to avoid all reference to it would be cowardly. May it then be respectfully suggested, without intending to give offence or to wound national susceptibilities, that the great institution of expectorating might be somewhat mitigated! In the ordinary railroad cars the central passage is not fit to pass along, as it is the spot where the occupants of seats on each side eject their saliva with startling frequency and suddenness. The Pullman cars are provided with spittoons of brass or porcelain; these are also freely supplied in private houses, hotels, theatres, picture-galleries, legislative chambers and other places of public resort. It is not uncommon to see notices affixed to the walls asking persons not to spit on the floor; but these notices are disregarded. To a benighted British Islander this is revolting; but all he can do is to endure and thus protest against the modern form of the Declaration of Independence.

W. H. S. A.

PIANO FOR THE RAJAH OF KOOCH-BEHAR: MANUFACTURERS, MESSRS. JOHN BRINSMEAD AND SONS.

A PIANO FOR AN INDIAN PRINCE.

The piano manufactured for the Rajah of Kooch-Behar by Messrs. John Brinsmead and Sons, of Wigmore-street, is an exceedingly handsome piece of furniture in addition to being an exceptionally fine musical instrument, both in quality of tone and touch. The case is in solid, deep-coloured mahogany, handsomely carved, and inlaid with engraved marqueterie; and to ensure its standing the extreme and trying climate to which it is going, every glueing throughout the piano has been secured by screws, whilst the metal framework which withstands the strain of the strings (nearly 30 tons) is in one solid piece and is fitted with "Brinsmead's" patent screw tuning-pins, thus dispensing with all woodwork in this portion of the piano, whilst ensuring the instrument remaining in good order under conditions which would prove fatal to pianos manufactured on the old system. The mechanism, every part of which is secured by rivets, &c., is the "patent perfect check repeater action" so celebrated for its excellent blow, repeat, and delicacy of touch which it retains under the most trying climatic conditions.

The announcement that the Old Irish Market-place was to be kept open at the Winter Exhibition at Olympia has been hailed with delight by the cottage workers in all parts of Ireland, and hundreds of parcels have been received containing beautifully executed and cheap articles of all kinds made chiefly in cottage homes.

ART MAGAZINES.

The Magazine of Art for December continues two exceedingly interesting papers begun in the November number. The first, on Mr. Alfred Gilbert, A.R.A., one of the ablest of the modern English school of sculpture, is written by Mr. W. Cosmo Monkhouse, and is illustrated with several engravings of the sculptor's work, notably one of the "Icarus," an example of Mr. Gilbert's best manner. The other article is one by Mr. William M. Rossetti, on the portraits of his brother, Dante Gabriel Rossetti, and contains some interesting additions to the photographs and sketches published last month. A capital reproduction of Mr. Hamo Thornicroft's fine statue of General Gordon accompanies a short description of the latest addition to our national monuments. The annual volume of this magazine is now published, and contains a perfect gallery of beautiful engravings, photogravures, and etchings after pictures by modern painters, English and Continental.

The frontispiece to the current number of the *Art Journal* is a beautiful engraving, by L. Jacoby, of Fra Fillipo Lippi's "Nativity," now in the Berlin Museum; which museum, the subject of a paper by Mr. W. M. Conway, is a valuable contribution to the art history of Europe. "A Foreign Artist and Author" continue their travels through England, and this month give us their impressions of that popular watering-place Ramsgate. "Japan and its Art Wares" is also continued from a former number; as also a paper by Mr. Gilbert R. Redgrave on "Textile Fabrics at the South Kensington Museum." The annual volume of the *Art Journal*, being the bound numbers of the past year, has already been reviewed month by month, and therefore it is needless to say more than that no more acceptable Christmas gift could be suggested for artistic friends than this handsome volume.

A new and interesting addition to the list of journals and magazines dealing with art in all its branches is the *Scottish Art Review*, published in Glasgow, the December number of which is the seventh issue. It is, perhaps, more emphatically than most of its contemporaries a journal for the artist rather than merely the dilletante, although it offers many attractions to all lovers of art as well as art-workers. The current number contains an etching, "The Sower," by Mr. William Strang, and a reproduction of a picture by the late Frank O'Meara, entitled "Evening in the Gatinais." Among many interesting articles is one on the pastel exhibition at the Grosvenor Gallery, a paper on the Wagner-Liszt correspondence, and one on the place of poetry in a music-drama, evoked, doubtless by a recent attack on a great artist in a well-known review.

POOR CHILDREN AND CHRISTMAS.

Mrs. Adamson, wife of the Vicar of Old Ford, at the East-End of London, writes as follows:—"I have resumed the soup-kitchens in my husband's parish; and, as I have once more to relieve the semi-starvation of thousands of children, I trust that you will allow me to submit the following simple statement of our work and wants, by way of appeal for the practical sympathy of your readers. We make no religious distinction, necessity being the one and only test. Last winter, the cost of the dinners (including plant and pannikins, coals and coppers) which we gave to the poor children connected with three Board schools in this neighbourhood was £79, the dinners numbering 10,225. The children were selected from these schools, and sent by the head masters and mistresses. They were all really poor and needy—many being most distressing cases. My husband's parish alone numbers 11,000 persons, most of whom crowd together in small tenements. There is not what is called a middle-class household, so that I have no lady resident in the parish to co-operate with me. Beyond the grants kindly made to assist this good work, I require funds to meet the expenses up to April next, if the soup kitchens are to be kept open."—An appeal is made for help towards the Christmas treat to the East London Hospital for Children, Shadwell, to be held on Wednesday, Jan. 2. One hundred children, who have been in-patients of the hospital, will be invited, and provided with tea, cake, fruit, and a comic entertainment; a suit of clothes will be given to each child, as well as toys and an orange. Gifts of clothing of all kinds, but especially boys' suits, toys, cakes, fruit, &c., will be gratefully received at the hospital; and all friends of the hospital are invited to be present.

Mr. Clement Scott writes earnestly appealing for aid in the good work of supplying the poor children of the Drury-lane district with a dinner and entertainment on Christmas Eve. He states that, thanks to Miss Edith Woodworth, the founder of the feast, Mr. J. L. Toole, without whom the dinner would never have been made an annual institution, and a few others, sufficient money has been promised to give a royal dinner of honest roast beef, potatoes, plum-pudding, and mince-pies to at least 1500 hungry children. What is now wanted are presents of fruits, tops, and other articles, and the assistance of ladies who are able and willing to work energetically and cheerfully in serving the dinner and unpacking and distributing the presents.

Lady Burnett, the owner of a large property in the district of Thurles, has notified to her tenants that she will grant an abatement of 35 per cent on the present scale. All her land is at present let at Griffiths' valuation.

Her Majesty, by Order in Council, has been pleased to declare that the conditions of the Patent Act, 1883, under which an application for a patent is not to be invalidated by the exhibition of an invention at an international exhibition, are to apply to the Paris Universal Exhibition, and also that exhibitors are to be relieved from the conditions of the above Act, under which they were required to give notice to the Comptroller of Patents of their intention to exhibit the article afterwards sought to be patented. The regulations also apply to designs intended to be registered.

1. Mr. Bompas, wanting a pet puppy for his young wife, consults Weazle, the dealer in fancy dogs.
2. Weazle inspects his stock, but finds none of the desired black-and-white.
3. Clever Mrs. Weazle is ordered "to get 'em ready for showing."
4. She touches 'em up with black from the frying-pan.
5. Weazle pockets the black-and-white puppies.
6. He calls on Mr. Bompas.
7. Mrs. Bompas: "Oh, what little beauties!"
8. Suddenly: "Why, what's all this black stuff on me?"
9. Bompas: "Here, get out!"
10. Weazle cast out on the doorstep.
11. He seeks consolation.
12. At home, rebuking Mrs. Weazle, he gets her reply: "If you'd kept 'em cool, it wouldn't have come off!"

DOG-FANCYING AND DOG-PAINTING.

"A WELCOME VISITOR."—DRAWN BY S. T. DADD.

PARISIAN SAYINGS AND DOINGS.

(From our own Correspondent.)

The great event of the week is the discomfiture of the Panama Canal Company and the futile intervention of the Cabinet with a view to preventing another crash like that of the Union Générale. Owing to the partial failure of the issue of the last Panama Loan of 1888, and the repeated failure of the re-issue of the unsold bonds a few days ago, the Panama Company is in difficulties for want of money, and therefore the Minister of Finance, considering the importance of the enterprise, the immensity of the capital engaged, and, above all, the number of persons who have subscribed, introduced a Bill to authorise the company to suspend payments for three months, which would give the company time to make new arrangements. The capital already actually subscribed and engaged in the works of the Canal is 1,399,716,051f. The 600,000 shares of the company appear to be held by 400,000 subscribers, mostly small capitalists and peasants. After a long discussion the Chamber rejected the Bill by 256 against 181 and 100 abstentions. The ruin of Panama will be a great blow to the small capitalists of France and a national misfortune, and it is hard to see how this ruin can be avoided, even given the energy and popularity of M. De Lesseps. One thing seems clear already—that the prestige of M. De Lesseps will not suffer from the disaster and that the burden of unpopularity will fall upon the Deputies and upon the Republic. The 400,000 Frenchmen who have lost money in Panamas will vote dead against the members of the present Chamber of Deputies next spring, and their tendency will be to cry "Vive Boulanger!"

People are talking once more about the destiny of woman, to which attention has been called by two recent incidents—the brilliant medical examination passed in Paris by a Polish girl, Mdlle. Schultze; and the refusal of the Brussels Appeal Court to allow Mdlle. Popelin to practise as a lawyer. The Brussels Judges do not admit that a woman has the legal aptitude for practising law. The modern legislator does not acknowledge the right of a woman to do anything without the consent of her husband; it cannot, therefore, admit that she can do for others what she is not allowed to do for herself. Furthermore, the Belgians consider that woman's place in society imposes upon her duties that are irreconcilable with the profession of law, for the exercise of which she has neither leisure, strength, nor aptitude. Mdlle. Schultze, who is only twenty-one years of age, devoted herself in her thesis to proving that female doctors had rendered great services already, and were destined to render still greater services in the future. Dr. Charcot replied to her, and blamed this new ambition of women to become doctors, not that he contested their aptitudes, but because they refused to play secondary rôles and to go and practise obscurely in the provinces. They all want to be "swells" at Paris. Dr. Charcot also combated the young lady on æsthetic grounds, maintaining that certain parts of the practice of medicine were incongruous with her beauty and her dress; nevertheless, he did full justice to her talent, and Mdlle. Schultze starts out in life with a brilliant diploma from the Faculty of Paris.

At the theatres we have to record a new piece, "L'Escadron volant de la Reine," music by Litolff, at the Opéra Comique, rather old-fashioned both in plot and music—the piece was written fifteen years ago; and "La Sécurité des Familles," by Albin Valabrègue, at the Vaudeville. This latter comedy, in three acts, promises to be almost as great a success as the "Surprises du Divorce," which has had an immense run. At the Théâtre Libre, in "La Mort du Duc d'Enghien," M. Hennique has produced three tableaux of striking simplicity, which form the best specimen hitherto written of the documentary or analytic drama which some would call "naturalistic." This piece has had immense success.

At the present moment France possesses nearly one million of the new Lebel guns, which gives just one gun for each man of the active, reserve, and territorial armies. In war-time the allowance necessary is four guns per man, and in order to complete this stock the small arms manufactories of Saint-Étienne, Tulle, and Châtellerault, will work in 1889 and 1890 producing at the rate of 3000 guns a day. During the year 1889 the War Department will spend 138 millions of francs in transforming the armament of the infantry, creating stores of the new Lebel cartridges, modifying the artillery projectiles, providing the frontier forts with stronger guns, strengthening the coast and other fortifications, and building new barracks.

M. Rénan has just published the second volume of his very fascinating "History of the People of Israel," this instalment embracing the period from the reign of David to the capture of Samaria and the career of the prophet Isaiah.

The booksellers' shops are now overflowing with volumes and gift-books specially published for the New Year's present season. The quantity of so-called *éditions de luxe* is enormous, and the wonder is who can buy them; for while admitting that bibliophilism is a growing modern passion, the number of people who can buy guinea books is limited. Amongst the most interesting novelties I notice the "Histoire de la Société Française pendant la Révolution," by E. and J. De Goncourt (1 vol. 4to, Quantin), enriched with numerous reproductions in black-and-white and in colours from contemporary documents, the whole forming a most curious and interesting panorama of the men, manners, and things of that agitated epoch. A curious innovation: the cover of this volume is a facsimile of some paper-hangings of the period covered with revolutionary emblems. Quantin is also the publisher of a handsome volume, "L'Italie du Nord," by G. De Léris, profusely illustrated and agreeably written. The author has studied more particularly modern Italy; and, besides picturesque description, he has collected a great mass of information about the public, administrative, and private life of modern Italy. The same firm publishes a mass of children's books and coloured albums, remarkable for their excellence and cheapness.

The Comte d'Haussonville was received at the French Academy, on Dec. 13, with the usual ceremony. M. d'Haussonville succeeds M. Caro, whose panegyric he pronounced.—At the Comédie Française, there is trouble between the manager and some of the actors, and, in consequence of words exchanged, M. Febvre has given in his resignation. A vigorous campaign has been begun against M. Claretie, the present administrator, under whose régime the Comédie Française has not prospered.—Duels have been so numerous of late that it has been impossible to note them. This week M. Clémenceau and M. Maurel fought with swords about an incident of the recent election in the Var. M. Clémenceau was wounded under the right arm, but not very seriously.—A committee has been formed with a view to erecting a monument at Paris in the Jardin des Plantes to the great sculptor of animals, Antoine Louis Barye. In order to raise the necessary funds an exhibition of Barye's works will be held in the École des Beaux-Arts during the month of May.—A monument to the novelist Balzac, by Emile Soldi, will be shortly inaugurated at Ville d'Avray at the expense of the living novelists, Edmond De Goncourt, Zola, Guy De Maupassant, and Paul Bourget. This is quite independent of the two statues of Balzac which are being made for Paris and for Tours.

T. C.

CHESS.

TO CORRESPONDENTS.

Communications for this department should be addressed to the Chess Editor.

HEREWARD.—White has the option of compelling Black to retract his move, which he might exercise and then resign. We think, however, in the interest of correct play, and out of fairness to other competitors, no quarter should be shown even to "palpable errors."

COLUMBUS. You would also have noticed such problems were condemned as unsound. They have only appeared because the second solution escaped notice. New problem in hand with thanks.

E BOHNSTEDT.—Your solutions were omitted by accident, and due credit is now given you for them. Has your friend's problem been published elsewhere? If not, send solution. Your own is curiously like No. 2328, and it is too similar in position for publication.

IVO.—A letter to Simpson's Divan, Strand, W.C., or British Chess Club, King-street, Covent-garden, would probably find him.

J ROSS.—Black answers by 2. P takes P *en passant*, and there is no mate.

G T B.—To prevent a second solution.

J OLVER (Stroud-green).—A well constructed position, but rather too simple for a mate in two moves.

CARSLAKE W WOOD.—Many thanks for game and notice.

D A (Dublin).—We may make use of your contribution in our next number, but are a little doubtful whether it is not too difficult for the purpose.

A H LEAKEY.—In what locality do you seek a club? You could not do better than join the City, which includes players of all classes.

W HEITZMAN.—Neat; but not strategical enough for publication. Try again.

W GLEAVE.—Your problem can be solved by 1. Q to Q 2nd (ch), followed by 2. R to K 8th, &c.

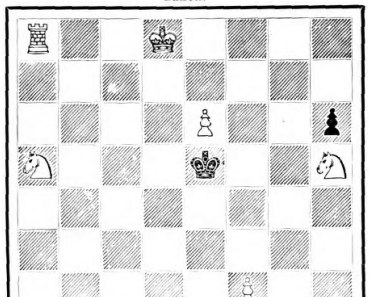
D M'COY.—*Rather too easy.* Try and give Black more strength. D. Nutt, Strand, supplies all foreign chess publications.

G W LENNOX (Cardiff).—Most acceptable.

CORRECT SOLUTIONS OF PROBLEM No. 2328 received from E Bohnstedt (Berne) and F Clark (Torquay); of No. 2329 from J Bryden, W Von Beverhoudt, J F, and Laura D; of No. 2330 from E Bohnstedt, J Blakie, Dr F St. W H Hayton, Dr Fraser (Totnes), D Gay, H Barley, J Bryden, G Ashwell, John G Grant, P C (The Hague), and W F Payne.

CORRECT SOLUTIONS OF PROBLEM No. 2331 received from Thomas Chown, E London, R Worters (Canterbury), J Blakie, C E P, Hereward, Bernard Reynolds, Dawn, Martin F, A Newman, J Goad, Howard A, Jupiter Junior, E Casella (Paris), T Roberts, Julia Short, Dr F St. L Desanges, LL.Col. Lorraine (Newcastle), G J Veale, Charles Worrall, T G (Ware), Shadforth, Dr Waltz (Heidelberg), F C Cook (Reading), J Bryden, W Heitzman, W E Cartwright, W von Beverhoudt, G U (Manchester), G W B Brodie, W F Payne, J T Tucker (Leeds), T H Wilson, J T W, Blair R Cochrane, Arthur H Emanuel, A W Young (Tettenhall), R F N Banks, Ruby Rook, R H Brooks, W H Hayton, E Phillips, E Lucas, Percy Ewen, and W Hillier.

SOLUTION OF PROBLEM No. 2329.



WHITE.	BLACK.
1. B to Kt 7th	P to K 8th
2. Kt to Q 7th	Any move
3. Mates.	

This problem can also be solved by 1. Kt to B 7th, &c.

PROBLEM No. 2333.

By W. BIDDLE.

BLACK.

WHITE.

White to play, and mate in three moves.

CHESS AT PLYMOUTH.

Game played at Plymouth Chess Club between Mr. CARSLAKE WOOD and the Rev. H. C. BRIGGS in a tournament for a silver cup.

(Vienna Game.)

WHITE (Rev. H. C. Briggs).	BLACK (Mr. Wood).	WHITE (Rev. H. C. Briggs).	BLACK (Mr. Wood).
1. P to K 4th	P to K 4th	opponent. By this brilliant stroke he loses two pieces, both of which would have been saved by 15. K to Q 2nd.	
2. Q Kt to B 3rd	K B to Q B 4th	15.	Q takes B
3. P to K B 4th	P takes P	16. Q to Q 3rd	P to K B 4th
4. P to Q 4th	B to Kt 3rd	17. Castles (Q R)	P takes R
5. K Kt to B 3rd	P to Q 3rd	18. Kt takes P	Kt to K 2nd
Black has not opened well. The K P should have been preserved by 3. P to Kt 4th. The move adopted gives White a manifestly superior game.		19. K R to K sq	Castles
		20. Kt to Q B 3rd	Q to K Kt 4th (ch)
6. B takes P	Q B to K Kt 5th	21. K to Kt sq	Q Kt to Q B 3rd
7. R to K 2nd	P to K R 3rd	22. Q to B 4th (ch)	K to R sq
8. P to K R 3rd	B takes Kt	23. R to K B sq	R to Q Kt sq
9. B takes B	Q to R 5th (ch)	24. Kt to Q 5th	Kt to Q R 4th
10. P to K Kt 3rd	Q takes B 3rd	25. Q to K 4th	Kt to B sq
Made wholly in the interest of the enemy.		26. R to K B 5th	Q takes P
11. P to K 5th	P takes P	27. Q R to B sq	Q to Kt 3rd
12. B takes P		28. Kt to K 7th	Q to R 2nd
P take P wins Black's Q R without further ado.		29. P to R 4th	R to K sq
12.	Q to K 3rd	30. Q to Q 5th	R takes Kt
13. B takes Q Kt P	Kt to Q B 3rd	31. Q to R 8th	
14. B takes R	Kt takes Q P	White must be complimented on the ingenuity with which he loses the game. It would have been difficult to fritter away a won position in fewer moves.	
15. K B to K 4th		31.	Q takes R,
White vies in generosity with his		and White resigns.	

The handicap at Simpson's is making fair progress, with Messrs. Lee and Pollock leading. Each have won six and lost one; but they are closely followed by Mr. Gibbons with five and a half wins, and Mr. Bird with five, to their respective credits.

A match between the chess clubs of the Railway Clearing-House and the London and North-Western Railway, played at the rooms of the former on Dec. 6, resulted in a victory for the home team by nine games to five, two being drawn.

The Zukertort Chess Club played a match against the Thistle Chess Club on Dec. 5 and proved victorious by five games to one.

The following problem gained the first prize in the Andrews Tourney, in the *British Chess Magazine*, by Jan Kuhre:—

White: K at Q R sq, Q at K Kt 3rd, R's at K B 2nd and K B 8th, P's at Q 3rd, Q B 4th, Q R 4th, Q Kt 5th and K 5th.

Black: K at Q 2nd, B at K R 6th, P's at K 2nd, Q B 4th, Q R 4th, and K 5th. White to play and mate in three moves.

On Thursday, Dec. 6, Mr. Blackburne gave an exhibition of simultaneous play at the Young Men's Christian Association Rooms, St. Giles's-street, under the auspices of the Norwich Association Chess Club, against twenty-nine picked players of the district. Mr. Blackburne played at a great rate, and finished his task in exactly four hours, with the splendid record of twenty-six games won and three drawn. The result was received with applause. The gentlemen who secured draws were Messrs. Herbert W. Dawe, A. Hegwood, and G. Meachen. Mr. Blackburne also paid a visit to the Plymouth Chess Club on Dec. 12, where he gave his usual blindfold séance against eight opponents, six of whom he defeated and drew against two. Being the first exhibition of the kind in Plymouth, it attracted a large and interested crowd of spectators.

Mr. Edward James Castle, Q.C., has been appointed Recorder of the city of Winchester, in the place of Mr. Mackonochie, who has resigned upon being appointed a county-court Judge.

The Rev. H. L. Thompson, M.A., Rector of Iron Acton, Gloucestershire, has been nominated by the trustees to be Warden of Radley College, in succession to Mr. Wilson, who has been appointed Warden of Keble College.

SCIENCE JOTTINGS.

THE MISTLETOE BOUGH.

Once more the flight of Father Time has brought round the season of holly, and the "mistletoe bough" decks the walls, and (in a Pickwickian sense), "more convenient" localities in the homes of the land. Perchance few of us give a thought to the debt we owe to the world of plants at the season of Yule. Holly and mistletoe are inseparable from the folk-lore of Christmas, and the forces, tendencies, habits—call them what you will—which have evolved the greenness of these plants, have contributed much to the grateful associations of the time. When other forms of vegetation have died off or are sleeping out the winter's chill, the holly, with its green and red, and the mistletoe with its equally attractive if quieter and more subdued hues, remain with us to remind us of hopes and aspirations extending far beyond the season of the snow. I think there is a tacit reflection cast from these plants into human life, bidding us be of good cheer, advising us to tide over the wintry side of life, and inspiring us with hope for the future. The old associations of mistletoe and holly abide with us as part and parcel of our social life, and unconsciously affect us by their tale of life and vitality when most things else are quiescent and still, and give no sign of life at all. Away back in the history of the Gauls, we know how the mistletoe played its part in the mystic rites of that race. On the sixth day after the first new moon of the year we can see, in our mind's eye, the two white oxen placed for the first time under the yoke, and the High Druid, in his white garments, golden sickle in hand. We can see him cut the mistletoe from the oak, and behold the plant reverently received in a white cloth as it falls. Then comes the sacrifice of the oxen, and the distribution of the sacred leaves to the people. All these things, ideas, and ceremonies have long passed away, and have become merged in that "illimitable azure of the past" which receives so many of the hopes and fears of the human race; but mistletoe remains with us—a symbol of the reviving year about to dawn, and a promise of the new life which the advent of the spring will proclaim.

That something of the lower nature often commingles with higher things is, unfortunately, a fact of life that needs no new illustration. Mistletoe is a "parasite" on apple and oak, and parasites belong to the groundlings among life's children. There is no nobility in the character of animal or plant which attaches itself to another living being, either as a lodger or a boarder, or in the double capacity of an unbidden guest. Plant-morals, like animal-morals, are often of the grossly utilitarian type. If a living being is cunning enough to take life easy by absorbing the food which another child of life prepares for its own use, the parasite doubtless benefits by its assumption of the rôle of unwelcome guest. But "the whirligig of time brings in its revenges." There is a stern decree of that implacable female, Madre Natura, which declares that parasitism includes the lowering of the form which sacrifices its vital independence to luxurious comfort and inglorious ease. In animals, legs, stomachs, eyes, and other belongings are swept away when the parasite, attaching itself to another animal, is found to have no use for the organs of free and normal existence. This is the penalty of parasitism everywhere—degradation and backsliding in the vital scale. Yet in our mistletoe there is one redeeming feature. Parasite though it may be, it has still a saving clause in its botanical character. I have before me a piece of an apple-tree's branch. It has been cut through dexterously enough, and the relations of a sprig of mistletoe which has attached itself to the bough are rendered clear and distinct. The mistletoe is not merely a lodger on the apple; it is a boarder likewise. Like certain dissatisfied tenants now-a-days, it insists on holding to its landlord, while it declines to pay rent in any shape or form. Into the substance of the apple-tree, the parasite has dipped its sucking roots, and a whole array of these roots is seen in my section, serving to drink up into the mistletoe-plant the sap which the apple-tree has made and elaborated for its own use. There is no intermingling here of parasite and prey. It is an attachment pure and simple for purposes of lodgment and food.

If you go back in mistletoe-life perchance you may trace the beginning of this curious habit. The berries of mistletoe, when examined closely, are seen to contain a very glutinous fluid. The ripe berry is, in fact, a mass of vegetable gum, which is developed in the rind or covering of the fruit. This gum is part and parcel of a distinct purpose in mistletoe-life. When the birds attack the berries and liberate the seeds, the latter, falling on the bark of trees, adhere thereto by aid of the natural glue they contain or possess. This is the first step in the act of parasitism. The bird acts as the unconscious distributor of the mistletoe-seeds, and the plant, which has tacitly bargained for this conveyance (through its offer of a free breakfast-table to the bird), then works out its own life-purposes. Once settled on the bark of the tree, the mistletoe-seed, in virtue of its inborn instinct, appreciates its surroundings. In the earth, where a respectable seed is at home, it would perish and die. On the apple-tree's bark it is in clover. It has found its haven, and now makes the most of its chance. Germination of the seed is soon set up, and then the radicle, which is simply the youthful root, penetrates the bark of the tree, and seeks out a special layer of the stem of its host. This is the layer, near the bark, through which the sap ascends. Now, this fluid forms what botanists call the "crude" sap. It is on its way, in other words, to become perfected in the leaves of the apple-tree. Once in the leaves of its own proper maker, the sap would acquire all the properties which fit it for the nourishment of the plant. Why, then, does the mistletoe select the imperfect sap of its host, in place of drawing from the tissues of its prey the perfect material?

The answer to this question brings us back to that remark of mine wherein I declared that a redeeming feature existed in the constitution of the mistletoe-bough. Our parasite has not passed quite to the depths of life's degradation after all. It still harbours a habit of food-making which constitutes a saving clause in its moral character. For the crude sap which it absorbs by aid of its roots passes into the mistletoe's own frame, and there undergoes a further elaboration. Into its leaves pass the undigested products of the apple-tree's work, and in the leaves the stolen sap is made fit for nourishing the parasite's own blossoms, and for developing the berries and seeds which are to lay the foundations of the new mistletoe race. The green leaves of our parasite also teach us that it may and does do something more in the work of food-making. Green leaves always mean a power of absorbing from the air the carbonic acid gas which forms part of the food of every green plant. Your colourless mushroom will have none of this gas; it is a more dainty feeder, and demands something of the animal dietary. Mistletoe, perchance, is on the way to lower things. Parasitism seldom remains a stable habit of life; and if the forces of Nature work out their end—as, apparently, they have done in other plants—there may dawn a far-off Christmas season when mistletoe, having lost its leaves, and parted with the last evidences of its independence, will no longer remain to cheer the heart of man, or to grace the social life of Yule.

UMBRELLAS.

SAMUEL FOX & Co., Limited, have added to their celebrated frames decided improvements (protected by Letters Patent) which give increased Stability and greater Neatness to the Umbrella.

SAMUEL FOX & Co., Limited, manufacture the Steel specially for all their frames and are thus able to provide exceptional quality at a merely nominal price over inferior makes.

THE PLAYHOUSES.

There has recently been a "professional matinée" at the St. James's, so that a few notes on the acting of Mr. Gilbert's new play, "Brantinghame Hall," that is said to be very much improved in every way, may be considered of interest. It is almost time, now, that Miss Julia Neilson should be allowed, under kindly guidance, to think out her characters for herself, to live in them more, to sink her individuality in the woman she personates, and to show more spontaneity and impulse. This handsome young lady has great gifts for the stage—an interesting face, a handsome presence, and a voice that is capable, under proper training, of being very effective. Her acting as Ruth Redmayne appeared to lack sincerity; her art is not as yet touched with any magnetism. She appeals to the admiration of her audience, as Miss Mary Anderson did, but not as yet to their sympathies. Her passion is theatrical rather than true; her grief is deliberate and formal. At present she is an actress of the highest promise; but all who are interested in the early appearance of a young and beautiful lady could have wished her to show some sign of that imaginative and emotional quality that is, after all, of more value to the stage than the best gifts of Nature. In the character of the restless, storm-tost, passion-haunted Ralph, Mr. Lewis Waller made not a step, but a bound, to the front; for he showed to us not the mere exterior or outer shell of a man, but his mind and his heart. He made love with the desperation of earnestness; he hated with the recklessness of despair. If Mr. Gilbert really wanted to show us a man not wholly lost or vile, pining for sympathy and tortured by irresolution; a man whose early errors might have been condoned by a loving woman; a man whose smothered goodness might have been awakened by the touch of a tender hand, then Mr. Lewis Waller certainly conveyed the idea of such a man. He was not at all the conventional stage villain, but a complex composition of good and bad admirably differentiated by the actor. A performance that touches the emotional qualities and stimulates the intelligence of an audience is one surely to be singled out for special observation. It may be asked why is Mr. Lewis Waller so highly praised in some quarters, when to the ordinary observer, perhaps, there is nothing so very remarkable in his performance? So much the worse for the ordinary observer. At any rate Ralph, as presented, is a man, and not a shadow; he is flesh and blood, not a dressed up tailor's dummy. Mr. Waller can make his face evil for the purposes of his art; but his voice mellow with the same design. Now that the stage is crowded—many think overcrowded—with young men of refinement and education, surely it is right to point out an instance where an actor has gone to human nature for his model, and has got inside the character. How easy to make him a stage villain; how difficult to make us sympathise with the buried faith and the expiring sense of honour in the heart of a bad man! A man too weak to resist temptation, too coated with worldly indifference to stray far from despair and hopelessness, but who finds absolution in the contact of women's purity, an angel in a woman's face, is of all characters the most difficult to paint, the most subtle to portray. Mr. Gilbert has, in Ralph, given us a fine and noble picture; Mr. Lewis Waller has realised him with a true sense of art. Mr. Fleet and Miss Rose Norreys can only play the little Gilbertian lovers one way, and that is the correct one. They both understand Mr. Gilbert's satire, and they must know that it is impossible to make the young people natural. No boy or girl ever talked like that except in Mr. Gilbert's comical world: it is a relief that they are comic. Mr. Rutland Barrington and Mrs. Gaston Murray are of great assistance to the play at awkward moments; and a singularly dignified and natural picture of an old conscientious Peer is given by Mr. Nutcombe Gould, an actor of taste and discrimination.

Before we take leave of "Brantinghame Hall," a play that lays itself open to much criticism on the first night, that has been altered and amended in accordance with that criticism, that has been improved as all plays will improve when blemishes are removed and actresses get over their nervousness, it may be interesting to note the sensitive irritability of the most experienced authors. Mr. Gilbert is reported to have taken the extraordinary and quite undignified course of "reporting" one of the critics to his editor and proprietor as if he were some wretched, trembling schoolboy, who deserved a whipping or a caning from a headmaster. This author has peculiar views as to his own power. Not content with writing plays and manufacturing actors and actresses, he would also be at the head of a school of critics, and dictate to them, birch in hand. Autocracy cannot go further than that. He would write his own plays, force artists into his own views of acting them, and insist on how they ought to be reviewed for the family breakfast-table. We cannot believe that the public, or editors, or anyone else will follow Mr. Gilbert up to that point. He is a very clever man, but his dictatorship must have a limit; and it will most certainly be drawn at his new theory of ordering from the newspapers the style of criticism that suits him best. He is further said to have announced his firm and fixed determination to write no more plays. Like his predecessor, Achilles, he has gone into his tent to brood in silence over the iniquity of his assailants. He has given to the world his last work, and the theatres are to go into mourning in consequence of this unalterable determination. If Mr. Gilbert were really serious this would, no doubt, be a subject of regret. He has done most admirable work for the stage. Many of his plays will live and are already stage classics. As a humourist he has no rival; as an earnest, pure writer he has set an excellent and honourable example throughout his career. But Mr. Gilbert is not really serious. If we mistake not he announced the same crushing threat when his clever play "Gretchen" was not criticised in accordance with the canons that are most agreeable to him. He has done excellent work since then; and he will do excellent work still when the disappointment that has been caused by "Brantinghame Hall" is buried and forgotten. But the manner in which he expresses his vexation is as unwise as it is ungenerous. Journalists who have as much experience in their craft as Mr. Gilbert has in his are not schoolboys, and, strange as it may appear, their headmasters refuse to order them to the block for castigation. Mr. Gilbert has a masterful mind, and loves to rule; but it would be a bad thing for the stage if critics as well as artists were to be turned out by the dozen from the Gilbertian patent manufactory!

The series of special matinées started by Mr. Beerbohm Tree at the Haymarket has been very successfully inaugurated with the fine old comedy "Masks and Faces," that has been twice performed to brilliant audiences. There must be some relief to long runs, and these matinées will afford very special delight to many earnest playgoers. Mrs. Bernard Beere's Peg Woffington is a very popular performance; Mr. Tree's Triplet a most interesting artistic experiment; whilst Mabel Vane has scarcely before been so delightfully acted as by Mrs. Beerbohm Tree, who is rapidly arriving at a very high place in her profession.

Miss Kate Vaughan, in a new version of one of Alexandre Dumas's strongest stage homilies, well rendered by Mr. Campbell Clarke, has been made welcome at the new Grand Theatre at Islington. The heroine of "Love and Honour" somewhat overtaxes the strength of this charming actress, but she shows in it much feeling and no little emotional power. She does not allow the audience to depart without one of her charming and inimitable dances. A trial matinée was given of a wild drama called "Stormcoast," and it is not likely that it will ever be heard of again. That such plays can ever be written, studied, and produced is a marvel indeed.

The command of the Garrison Artillery at Woolwich has been bestowed on Colonel B. Tupper, R.A.

Sir Robert Stuart, Q.C., has been elected Treasurer of the Honourable Society of Lincoln's Inn, in succession to Mr. Justice Kay.

The new building at Temple Bar for the Law Courts Branch of the Bank of England is open to the public for general banking business.

Mr. Joseph Smith, of Great New-street, has issued a new and revised edition of his "A B C Guide to London," a capital pennyworth.

The City Lands Committee has decided to demolish Newgate Prison and the adjoining Old Bailey Sessions House. They are the property of the Corporation, though the State possesses rights to their use, for which the Home Secretary is trustee.

The Court of Common Council has resolved to invite Prince George of Wales to take upon himself the freedom of the City, to which he is entitled by patrimony; and also to confer the freedom of the City on Lord Dufferin.

The new American Episcopal church and parsonage at Nice were consecrated on Dec. 13 by Bishop Lyman. The edifice has cost £8000, the whole of which has been subscribed by American visitors to Nice. The parsonage cost £4000.

The French Academy of Science has awarded the Janssen gold medal for discoveries having a direct bearing on the progress of astronomy to Mr. Huggins, of the Royal Astronomical Society of England, who is a corresponding member of the Institute.

Mr. Francis Darwin, of Trinity College, Cambridge, University Reader in Botany, has been elected to a fellowship at Christ's College, where his father, Charles Darwin, the famous naturalist, entered in 1827 at the age of twenty-two. Mr. Darwin's election was not by examination, but is a recognition of the useful work which he has some years been doing in the university.

A clock has been placed in the handsome new Townhall at Trowbridge. Both the Townhall and the clock are the gift of Mr. T. R. Brown. A number of estimates were obtained from various noted makers, and that of J. W. Benson was selected by the architect. The clock shows the time upon two dials of skeleton iron of special design with ornamental centres, and chimes the quarters upon two bells and the hours upon a third one, the total of the three bells being 24 cwt.

The public response to the appeal made on behalf of Guy's Hospital has been so generous—£97,000 having been already subscribed—that the Governors have been enabled to increase the number of four hundred beds, to which the hospital had been reduced. There is every prospect that the Governors will find themselves able to set up the six hundred beds which can be accommodated in the establishment through the incoming of continued contributions.

NEW CHIMES FOR THE OLD YEAR

FROM ST. HELENS, LANCASHIRE, ENGLAND.

I.

AGAIN the festive holly crowns the year!
Again, with gladness, THOMAS BEECHAM sends

A CHRISTMAS GREETING

WAFTED FAR AND NEAR
To hosts of cordial hearts and troops of friends!
Joy be with all! bright hopes, good luck, and wealth!
And—what is found with BEECHAM'S PILLS—

GOOD HEALTH!

II.

And here, it seems befit to state
That during Eighteen Eighty-Eight
The sale of BEECHAM'S PILLS
Has grown at most tremendous rate,
By reason of their virtues great
To cure a hundred Ills!
Not on our British shores alone,
Have countless thankful sufferers known
This Medicine's remedial pow'r,
But day by day, and hour by hour,
'Tis blessed on **India's** sunny strand,
And hailed with joy in **Yankee-Land,**
Where, in the 'cutest spot on earth,
The 'cutest people know 'tis WORTH

A GUINEA A BOX!

(To all intents—
Though they figure it out in dollars and cents.)

III.

The swift muse of commerce now lovingly thrills
To tell of the triumphs of BEECHAM'S PILLS!
The Factory, splendid and worthy the times,
With its beautiful Clock and melodious chimes!
Then sing of what pen and what pencil have done
By means of the press in the year that has gone;
And the MUSIC PORTFOLIO, scattered galore,
To the number of **six million copies,** or more!
How much we could say if we might but delay!

But remember—

THE WONDER OF WONDERS, TO-DAY,

The strangest surprise, that will gladden your eyes,
And make you for ever both merry and wise,—
IS THE CHARM

"BEECHAM'S ORACLE,"

BOUND TO DISCLOSE
What Fun says to Wisdom in language that glows!
Then get a supply from your Chemist, and see—
The NEW MUSIC's Gratis! The ORACLE's Free!

A SHILLING MAGAZINE FOR A PENNY.

For Ladies' Column, see page 758; Wills and Bequests, page 760; Music, page 762.

THE LADIES' COLUMN.

Here is the children's season again! For the next fortnight or more there will be small time for anything in child-provided homes but studying the amusement of those little happy folk who are privileged by the season to take the first place. The chief compensation for the disturbance of habits, the influx of bills, and the fatiguing obtrusion of one idea in shop-windows and in literature, is the reflection of how children enjoy Christmas. Theirs is rather a mercenary pleasure, and rather a greedy one, it is true; the additions to the stock of toys or other possessions, and the nice things to eat, form—well, maybe ninety-nine per cent of the sum-total of juvenile delight. Perhaps it would be inconvenient if we asked ourselves how much of our pleasure rests on no more elevated grounds. Children enjoy taste so keenly that (short of making them ill) it is worth while to indulge their appetite now and then in season. Would that I could now enjoy anything as erst I did cocoanut candy, strawberries, green peas, lemon ices, mince pies, jam puffs (the three-cornered ones, twopence each at the confectioner's—alas! when one has the taste one has not the twopence; when the twopences are available the savour of the viand has fled!), pine-apple, muscatel grapes, roasted chestnuts, cherry tart and fizzing lemonade! I do not think that all those things can grow or be manufactured now-a-days as they used to be in "the sixties." Something has happened, at all events; and if I had not memories, I could not now discover, seek as I might, what matchless flavours veritably lie in earthly foods. Old Scotch nurses used to say of babes who looked around with great wondering eyes and smiled upon vacancy, that they beheld the angels, who become invisible to older sight. Who knows? The physical senses certainly dull with use. The wild rapture of life's morning can never be regained; and nothing in after years can make up to a man or woman for missing the intenser joys and keener pleasures of childhood. In a word, let us give our children what we may and while we may: with, as a matter of course, that due sense of results and ultimate consequences which true kindness and ordinary prudence require. But it is so great a thing to give happy hours in childhood for memory to store away that I for one will count Christmas as a good season for the children's sake.

Properly brought-up youngsters are made happy with very little; but they much appreciate novelties, which arouse the fresh vivid interest that their minds have at command. There are various alternatives for the familiar Christmas-tree which it is worth while to trouble to get up occasionally for a party. The simplest is to persuade some good-natured young man to enact Father Christmas, who comes in bearing a sack of presents on his back, and clad in an old long overcoat well-powdered (after being sprinkled with water) with flour, intermixed with a little of the glistening powdered glass that can be bought at theatrical costumiers. He should be provided also with a big white wig and long beard, which can be hired for the occasion, or made out of tow if necessary; the face should be well covered, for the disguise and the "fearful joy" of it are half the fun. He should not speak, but should direct the formation of a circle around him and indicate when each child is to approach to receive his gift by signs made with the big branch of holly or fir that he must carry. In these arrangements he would be aided by one or two of the elders of the party.

Another novelty by means of which the presents can be distributed is a snow cave. It should be placed in a corner of a room—preferably another room than that in which the games and dancing are going on—and at the proper moment the children are introduced into the chamber, and then sent, one by one, into the cave. The interior must be rather dark, lit by a coloured lamp or lanterns only, and scented by burning pastilles. There they will, one after another, receive their presents from the Sybil, wrapped in mantle and hood, who inhabits the mysterious recesses. The cave is made up by throwing large sheets over a wooden open framework, which it is easy to construct by tying together a kitchen clothes-horse and two or three broomsticks. A rocky appearance must be given to the outline by padding it irregularly with tissue-paper, pinned on inside the sheet; and these projections can be effectively covered with a thin layer of damped cotton-wool, sprinkled with the powdered glass "frosting powder," so that the whole appearance is like that of a rocky cave covered with glistening snow. Another idea is to have the presents brought into the room in a wheelbarrow, with one or two boys dressed like postmen to distribute them to the rest of the children.

The object of the revision of the rules of the Central Committee of the Woman's Suffrage Society, made at the meeting on Dec. 12, was avowedly to introduce new enthusiasm into the movement. The *Times*, in a "leader" published the day following the meeting, declared that the real intention was to "bring the women's suffrage movement into line with Gladstonianism." There may possibly be something in this idea. Certainly, the ladies opposing the revision were mainly Liberal-Unionist and Conservative, while the ambitious young Gladstonian M.P. who occupied the chair played strange tricks with his "little brief authority" in his anxiety to get the new rules through without delay, and the chief speakers in favour of the changes were prominent members of Women's Liberal Associations, one of whom I have myself heard describe women's suffrage as "a fad" which she would postpone to "the interests of the party." But for all the apparently unmistakable indications given by these tokens, the conclusion of the *Times* writer is not fundamentally correct. The prime movers in the revision have no intention of making the fatal mistake of introducing party feeling into what is essentially a non-party question. The object in view in the new rules is bringing into focus the feeling in favour of the political influence and enfranchisement of women which manifests itself in many forms of public work. Women are daily more and more being led to take a share in political action; men are themselves persuading their wives and daughters to join in it. The women thus induced to take an active interest in politics inevitably come to feel the need of the vote to give effect to their views, and to feel also that when they are doing the harder and more noisy and objectionable work of politics by canvassing, public speaking, and organising there can be no valid reason why they should not exercise influence by the far more simple, easy, and ladylike—while also more effective—method of recording their ballot. The new rules of the Women's Suffrage Society's Central Committee propose to affiliate to that society all other bodies and organisations which vote approval of its aims, and to allow them to send delegates in proportion to their subscription to the election of the executive of the Suffrage Committee. If the Primrose Leagues and Women's Unionist Associations do not accept the invitation, given to them equally with Gladstonian Associations, to help in the suffrage movement in this way, it will surely be their own fault. For my part, I am heartily glad to see an active movement of any kind. It is a token of vitality, a presage of speedy progress to success. In political movements there is nothing so much to be dreaded as stagnation; and even if women's suffrage has reached that stage when party leaders are beginning to bid for its control, it is a happy augury and not matter for regret.

COACHING.
WAIT FOR THE "WONDER."

Will you come with me, old chappie,
To quaint St. Albans town?
The journey is delightful,
So "Yes," and do not frown.
Wait for the "Wonder,"
Wait for the "Wonder,"
Wait for the "Wonder,"
And we'll all take a ride.

From the roof of the good "Wonder"
We'll view the country round,
And not a prettier district
Can anywhere be found.
Wait, &c.

The "Wonder" is drawn by splendid teams,
With pace and action grand;
For quality and looks combined
No better in the land.
Wait, &c.

Do you know why their pace is great,
And their endurance good?
The secret is they're well supplied
With "Ridley's Patent Food."
Wait, &c.

Then we'll book by the good "Wonder,"
Now while we have the chance;
Its seats are so sought after,
We must book in advance.
Wait, &c.

And bring that silver case of yours,
Well filled with "Henry Clay's,"
And after luncheon at the "George"
We'll toss for who shall pay.
Wait, &c.

You'll find none the ribbon handle
In any better style
Than the owner of the "Wonder,"
To the task he does each mile.
Wait, &c.

Then, hurrah for Mr. Rumney
And his good old coachman Clark,
The "Wonder" is a "turn-out"
Not beaten in the park.
Wait, &c.

Don't forget the time of starting
Is punctually forty-five,
And look again at six-fifteen,
After a pleasant drive.
Wait, &c.

COACHING.—163,232 English Miles on the "Wonder." Four-Horse Stage Coach "Since Oct. 11, 1880, Rumney's "Wonder" Coach has covered no less than 163,232 miles in perfect safety between Batchett's Hotel, Piccadilly, and the City of St. Albans, leaving Piccadilly at 10 a.m. every morning, and returning to Piccadilly in time for dinner. Return Fare, 15s.—December, 1888.

COLDS CURED BY
DR. DUNBAR'S ALKARAM. or
Anti-Catarrh Smelling Bottle.
ALKARAM. COLDS.
ALKARAM. COLDS.
ALKARAM. COLDS.

IF inhaled on the first symptoms, ALKARAM will at once arrest them, and cure severe cases in half an hour. Sold by all Chemists, 2s. 9d. a Bottle. Address, Dr. Dunbar, care of Messrs. F. Newbery and Sons, 1, King Edward-st., E.C.

FLORILINE. For the Teeth and Breath. Is the best Liquid Dentifrice in the world. It thoroughly cleanses partially-decayed teeth from all parasites or living animalcule, leaves them pearly white, imparting a delightful fragrance to the breath. The Fragrant Floriline removes instantly the unpleasant fumes arising from a foul stomach or tobacco smoke; being partly composed of honey, soda, and extract of sweet herbs and plants, it is perfectly delicious to the taste, and as harmless as sherry. Sold by Chemists and Perfumers every where, at 2s. 6d. per Bottle.

VALUABLE DISCOVERY for the HAIR. If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed. "The Mexican Hair Renewer" is sold by Chemists and Perfumers every where, at 3s. 6d. per Bottle.

CHRISTMAS HOLIDAY Arrangements.
LONDON, BRIGHTON, and SOUTH COAST RAILWAY.

COUGHS, COLDS, ASTHMA,
BRONCHITIS, and NEURALGIA.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See the "Times," July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE.—The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in cholera was Chlorodyne.—See "Lancet," Dec. 31, 1853.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Extract from the "Medical Times," Jan. 12, 1856:—"Is prescribed by scores of orthodox practitioners. Of course, it would not thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, Rheumatism &c.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in Cholera, Dysentery, Diarrhœa, &c.

DR. J. COLLIS BROWNE'S CHLORODYNE.—CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government stamp. Overwhelming medical testimony accompanies each Bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. Sold in Bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

WILLS AND BEQUESTS.

The Scotch Confirmation, under seal of the Commissariot of the City of Edinburgh, of the trust, disposition, and settlement (dated May 23, 1883) of Mr. John Clerk Brodie, C.B., late of Idvies, Deputy Keeper of the Signet and Keeper of the General Register of Sasines for Scotland, who died on May 27, at No. 26, Moray-place, Edinburgh, granted to the Right Hon. James, Baron Moncrieff, Charles Bowman Logan, David Wardlow, the nephew, and James Howden, the executors nominate, was resealed in London on Dec. 10, the value of the personal estate in England, Scotland, and Ireland amounting to upwards of £139,000.

The will (dated Feb. 19, 1885), with a codicil (dated March 1, 1886), of Mr. Philip Thomas Fish, late of No. 18, Highbury-terrace, Islington; No. 7, Philip-lane, E.C.; and Birmingham, who died on Nov. 1, was proved on Dec. 7 by Samuel Bennett, the nephew, and Herbert Clifford Gosnell, the executors, the value of the personal estate amounting to upwards of £65,000. The testator bequeaths £50 each to the Orphan Asylum at Watford, the Infant Orphan Asylum (Wanstead), Asylum for the Indigent Blind, the National Benevolent Society, the National Life-Boat Institution, the Hospital for Paralysis and Epilepsy (Queen-square), the Deaf and Dumb Asylum (Old Kent-road), the Hospital for Incurables (Putney), the Cancer Hospital (Brompton), the Earlswood Asylum for Idiots, and the Sea-Bathing Infirmary at Margate; £20 to the Holloway and North Islington Dispensary; £4000 to his nephew, Henry Bennett; £100 and an annuity of £150 to his niece, Ann Fish; £50 each to the children of Charles Francis Yates; £5000, upon trust, for Charles Francis Yates, for life, then to his wife, Louisa, for life, and then to their children; and other legacies. The residue of his real and personal estate he leaves, upon trust, for his nephew, Samuel Bennett, for life; on his death, to his wife, Georgiana; and on the death of the survivor of them, as to the capital as well as the income, to their children, in equal shares.

The will (dated June 16, 1883), with a codicil (dated Oct. 11, 1886), of Mr. Griffith Thomas, late of Park House, Englefield Green, Egham, who died on Sept. 20, was proved on Dec. 6, by Henry Brockholes Thomas, the son, Samuel Hawkesley Burbury and William Walrond Ravenhill, the executors, the value of the personal estate exceeding £52,000. The testator bequeaths £750, all his jewels, personal ornaments and consumable stores, and the use, for life, of his household furniture and effects to his wife, Mrs. Martha Thomas; £200 to his son Henry; £100 each to his daughters, Fannie Brockholes Thomas and Charlotte Maude Thomas; £100 each to his executors; £50 each to his son-in-law, Cecil Coward, and to his daughter-in-law, Helen; and gifts of plate and pictures between his children. The residue of his real and personal estate he leaves, upon trust, to pay £1500 per annum to his wife for life; £200 per annum to his son, Henry; £100 per annum each to his daughters, Fannie and Charlotte, and the remainder of the income between his four children, Henry, Fannie, Charlotte, and Mrs. Catherine Elizabeth Coward. On the death of his wife he gives all his estate, and debentures and shares in the Slate Quarry Company, to his son; £2300 each to his daughters, Fannie and Charlotte, to make their share equal to that of his other daughter, Mrs. Coward; and the ultimate residue is to be divided into four parts, one for his son and one each, upon trust, for his three daughters.

The will (dated May 19, 1888) of Mr. John Egginton, late of South Ella, Yorkshire, who died on July 20 last, was proved on Dec. 5 by Arthur Egginton, the son and sole executor, the value of the personal estate exceeding £44,000. The testator gives £150 to his brother Robert; £100 to Thomas Holden, Thomas North, Charlotte Charles and Fanny Charles; £100 each to the Hull Dispensary and the Hull Infirmary; £6000 to his daughter Mary Frances Egginton, and £3300 and his house and stables, No. 117, St. George's-square, Pimlico, to his daughter, Elizabeth Egginton, the testator stating that his said two daughters are also otherwise provided for. The residue of his real and personal estate, including property over which he has a power of appointment, he leaves to his son Arthur absolutely.

The will (dated Dec. 21, 1869) of Mr. Richard Cockerton, late of No. 83, Cornwall-gardens, South Kensington, who died on Oct. 1, at Winchester, was proved on Dec. 10 by Mrs. Clementina Cockerton, the widow and sole executrix, the value of the personal estate exceeding £39,000. The testator assigns, disposes, and devises the whole of his estate, heritable and movable, real and personal, to his wife absolutely.

The will (dated Aug. 8, 1887) of Mr. Thomas Alexander Roberts, late of the Manor Hall, St. John's-wood Park, South Hampstead, and No. 22, Throgmorton-street, who died on Oct. 6, was proved on Dec. 10 by Thomas Gilbert Peckham, Charles Hill Devey, and Alexander Roberts, the executors, the value of the personal estate exceeding £34,000. The testator bequeaths £1000, his household furniture, &c., the income, for life, of £6000 Two-and-a-Half per Cent Annuities, his shares in the Gas Light and Coke Company and the London Auction Mart to his wife; £1000 each to his nieces, Adela and Ethel Jenkinson; £3000 to his sister, Mrs. Fanny Jenkinson; £1000 to his daughter, Mrs. Florence Mary Rogers; £500 to his niece, Mrs. Cecil Greenwood; £500 to augment the funds of the Auctioneers' Benevolent Fund; £100 to the Earlswood Asylum for Idiots; £100 to his partner, Mr. Radmill; £600 between his executors; and other legacies. On the death of his wife, he gives his shares in the London Auction Mart to his grandson, Harold Sydney Rogers; and his shares in the Gas Light and Coke Company and £6000 Two-and-a-Half per Cent Annuities, to his daughter, Mrs. Florence Mary Rogers. He devises his freehold property in Praed-street, upon trust, to pay £100 per annum to his sister, Mrs. Fanny Rogers, for life, and then to his grandson, Harold Sydney Rogers. The residue of his property he leaves to his said daughter absolutely.

The will (dated June 15, 1886) of Mr. Robert Taylor Heape, late of Highfield, Rochdale, Lancashire, who died on Nov. 18, was proved on Dec. 8 by Benjamin Heape, Robert Taylor Heape, and Richard Heape, the sons, and Robert Welburn, the executors, the value of the personal estate in the United Kingdom exceeding £31,000. The testator gives £50 each to his daughter, Sarah Heape, his daughters-in-law, Annie Heape and Jane Isabella Heape, and his sister-in-law, Lizzie Heape; £100 to Robert Welburn; and he specifically bequeaths all his household furniture, plate, pictures, &c. The residue of his real and personal estate he leaves, as to £6000, part thereof, to his daughter, Sarah Heape, and the remainder thereof between his sons, Samuel, Benjamin, Robert Taylor, and Richard, and his grandson, Robert Grundy Heape, in equal shares, as tenants in common.

The will (dated Nov. 22, 1887) of Miss Rebecca Gray, late of No. 27, Kensington-gardens-terrace, who died on Nov. 17, was proved on Dec. 4 by Spencer Perceval Butler, the nephew, Edith Oxenham, the niece, and Richard Melville Beachcroft, the executors, the value of the personal estate exceeding £28,000. The testatrix bequeaths £4100 to her nephew, Edward Gray; £1100 each to her nieces, Ellen Augusta Gray, Kythe Louise Gray, and Mrs. Florence Whyley; £520 to her sister, Mrs. Rachel Charlotte Oxenham; £300 to Edward Oxenham; £100 to Spencer Perceval Butler; £100 to St. Mary's Hospital, Paddington; and legacies to her relatives. The residue of her real and personal estate she leaves as to one half thereof between Edward Gray, Ellen Augusta Gray, Constance Gray, Kythe Louise Gray, and Mrs. Florence Whyley; one quarter thereof to her nephew, Spencer Perceval Butler; and the remaining quarter to her sister, Mrs. Rachel Charlotte Oxenham.

Mr. Henry Bodkin Poland has been raised to the rank of Queen's Counsel.

The chairman of the Executive Committee of the South London Polytechnic Institutes has recently received the following donations:—Sir Edward C. Guinness, £1000 (being a second donation of that amount), Mr. Howard Morley, £500 (payable in five years), the Rev. G. F. Whidborne, £200; Messrs. Crosse and Blackwell, £105; and Messrs. Peek and Frean, £100.

In the course of an address to the girls of Exeter High School, on Dec. 15, the Countess of Portsmouth referred to the spread of the High School system, and rejoiced that its flourishing condition was of value not merely to one class but to many grades of society, inasmuch as it gave a liberal and cultured education to the children of the residents of different social positions and varied fortunes. There might be errors, fallacies, and impracticable ideas among the executive of the system, but these were being rapidly removed, and great results were in store for them.

The extraordinary popularity of our spirited contemporary, *The Penny Illustrated Paper*, which circulates widely throughout the realm, has acted on its attractive Special Christmas Number, which is going off "like wildfire." No wonder. For fourpence the reader secures in this bright Christmas Number one of the most charming Coloured Prints of the season in "Come under the Mistletoe," several right pleasant pictures in black and white, and quite a budget of entertaining reading, provided by favourite authors for the Christmas Holidays; prominent among the original stories being a powerful dramatic romance of the South African Diamond Fields, "Diamonds led; Hearts are Trumps," by John Latey, junior; and Mr. George R. Sims's droll farcical tale of "Tinkletop's Crime." With its cheery Christmas pictures and photographs of the contributors into the bargain, this annual is one of the best to wile away a railway journey with.

M. Govi, an Italian savant, has presented a paper to the French Academy of Sciences, in which he claims for Galileo the distinction of having discovered the microscope as well as the telescope. He has found a book, printed in 1610, according to which Galileo had already directed his tube fitted with lenses to the observation of small near objects. The philosopher himself stated, shortly after this date, that he had been able to observe through a lens the movements of minute animals and their organs of sense. In a letter, written in 1614 to a Signor Tarde, he states that he has with his microscope "seen and observed flies as large as sheep, and how their bodies were covered with hairs, and they had sharp claws." The date usually assigned to the discovery of the microscope is 1621, and the invention is attributed to Cornelius Drebbel, a Dutchman; but according to M. Govi the date must be thrown back eleven years, and the credit of the first construction awarded to Galileo.

MAPLE and CO., Manufacturers of DINING-ROOM FURNITURE. The largest assortment to choose from, as well as the best possible value. Three more houses have just been added to this important department. Half a century's reputation.

MAPLE and CO.'S NEW SPECIMEN DINING-ROOMS, decorated and fully appointed with *furniture* in pollard oak, brown oak, Chippendale mahogany, antique carved oak, American walnut, and other woods, are now open to the public, and should be seen by all intending purchasers.

THESE ROOMS are not only helpful as showing the effect of the furniture when arranged in an apartment, but also most suggestive as regards decorative treatment, as well as a guide to the entire cost of furnishing in any selected style.

THE SEVILLE LADY'S EASY CHAIR,
In Saddlebags of rich Persian design and colourings, mounted on velvet, £3 15s.

DINING-ROOM FURNITURE.

MAPLE and CO. devote special attention to the production of high-class DINING-ROOM FURNITURE that will afford permanent satisfaction in wear. The numerous recommendations with which Messrs. Maple and Co. have been favoured by customers who have used the furniture for years is a pleasing testimony to the excellence of the articles.

USE
FRY'S

Pure COCOA

Fry's Pure Concentrated Cocoa.

This choice preparation of Cocoa makes a most delightful beverage for Breakfast or Supper. Being exceedingly nutritious, easily digested and assimilated, it forms a valuable food for Invalids and Children.

HALF A TEA-SPOONFUL IS SUFFICIENT TO MAKE A CUP OF MOST DELICIOUS COCOA.

☞ To secure this article ask for "FRY'S PURE CONCENTRATED COCOA."

38 Prize Medals awarded to J. S. FRY and SONS, BRISTOL, LONDON, and SYDNEY, N.S.W.

MUSIC.

The tenth of the present series of Saturday afternoon concerts at the Crystal Palace—and the last of the year—took place on Dec. 15, when Dr. C. Hubert Parry's oratorio, "Judith," was performed. Having spoken of the work in detail, on the occasion of its production at the Birmingham Festival last August, and having noticed its repetition at the Novello Oratorio Concert at St. James's Hall on Dec. 6, slight mention of its performance at the Crystal Palace will suffice. The principal solo vocalists on this occasion were Miss Anna Williams, Madame Patey, Mr. B. M'Guckin, and Mr. Brereton. As before, the several groups of choruses, with their varied dramatic character, proved especially effective. Dr. Mackenzie conducted the performance.

The third concert of the present season of the Royal Choral Society (and last of the year) took place at the Royal Albert Hall, on Dec. 15, when Sir Arthur Sullivan's dramatic cantata, "The Golden Legend," was performed. The great and wide-spread popularity which the work has obtained since its first production at the Leeds Festival of 1886 sufficiently attests the value of the composition and the prevailing good taste which recognises it. It is needless again to expatiate on merits that are now so generally known. The principal solo vocalists on Dec. 15 were Mesdames Nordica and Belle Cole, Mr. Lloyd, and Mr. Henschel.

The last of Mr. Henschel's London Symphony Concerts of the year took place recently. The programme, which contained no novelty, included a repetition of the "Suite," from Herr Grieg's characteristic music to "Peer Gynt," previously given at Mr. Henschel's first concert of the series.

The second of Herr Waldemar Meyer's grand orchestral concerts at St. James's Hall included Dr. Mackenzie's violin concerto, that by Beethoven, and a movement from one by Spohr, in each of which the concert-giver displayed special executive merits. A new overture by Dr. Stanford was produced; it is entitled "Queen of the Seas," and is a piece of "programme-music," composed for the centenary of the defeat of the Spanish Armada. It contains some very spirited and effective orchestral writing, a strong contrast being obtained by the incidental use of a solemn old English psalm-tune. Other features of the concert call for no specific mention. Dr. Stanford conducted, with the exception of Dr. Mackenzie's concerto, which was directed by the composer.

The Heckmann quartet party gave the second concert of their present series at Princes' Hall recently, their programme on this occasion having comprised string quartets by great masters, in which the admirable ensemble of the executants was notably displayed. A feature of the concert was the excellent rendering, by Madame Haas and Herr Bellmann, of Beethoven's Sonata, for piano and violoncello, in D (Op. 102).

Simultaneously with the Heckmann concert, the third of Madame Essipoff's pianoforte recitals took place at Steinway Hall. The programme was of varied interest, drawn from composers of the past and present periods. Her performance of Schumann's Fantasia in C, and shorter pieces by modern composers, formed a brilliant display of executive skill.

M. Falcke (from Paris) gave a pianoforte recital at Steinway Hall, on Dec. 14, when he displayed great technical skill in the execution of a series of pieces, especially of those of the modern brilliant school.

Effective concerts have recently been given by the Guildhall School of Music, the Royal College of Music, and the Hyde Park Academy of Music; in each case the progress of the students having been satisfactorily demonstrated.

The Monday Popular Concerts at St. James's Hall are suspended for the usual Christmas interval; the Saturday afternoon performances associated with them being intermitted after the concert of Dec. 22. At the previous afternoon concert (on Dec. 15) Madame Néruda resumed her position as leading violinist after her recent indisposition. Miss Zimmermann was the pianist. At the last evening concert of the year—on Dec. 17—Brahms's charming "Gipsy-Songs" were repeated, and they were announced for repetition on Saturday afternoon, Dec. 22, again, with Madame Henschel, Miss Lina Little, Mr. Shakespeare, and Mr. Henschel as vocalists; Miss Fanny Davies being the pianist at both concerts.

The approach of Christmas and the preparations for the entertainments and amusements which prevail at that festive season, cause the usual temporary subsidence of musical activity. Some of the principal serial concerts (as mentioned above) are suspended for a more or less brief period. Of the arrangements for the early weeks of the new year we must speak hereafter.

The earliest important Christmas performance of "The Messiah" was that of the second Novello Oratorio Concert of the series, at St. James's Hall, on Dec. 18.

The Carl Rosa Opera Company will begin its annual season at the Royal Court Theatre, Liverpool, on Dec. 31. The list of singers includes many well-known names, among them being those of Mesdames Georgina Burns and Julia Gaylord, Miss Fanny Moody, Mr. B. McGuckin, Mr. F. Celli, Mr. Leslie Crotty, besides several artists who will make their first appearance. The répertoire of the company now includes a large number of classical and popular operas, recent important additions being English versions of Meyerbeer's "Robert le Diable" and "L'Etoile du Nord," and Halévy's "La Juive." These, and Wagner's "Lohengrin," are among the approaching performances at Liverpool.

MARRIAGE.

On Dec. 1, at St. Philip's, Earl's-Court, S.W., James Robert, only child of Mrs. Mahlah Addyes Scott, of 6, Cambridge-gate, and Watlinghope Manor, and Norbury, Salop, and Great Barr, Ware, to Lizzie, daughter of the late Mrs. Maurice, Pension Müller, Bonn, Germany.

DEATHS.

On Dec. 2, at Ryhope Hall, in the county of Durham, John, the beloved husband of Eleanor Robson, aged 76.

On Nov. 16, at her residence, Rose Hill, Bowdon, Cheshire, Margaret Bower, eldest daughter of the late Major Bower, of High Grove, Cheadle, Cheshire, formerly of the Breck, near Liverpool.

*** *The charge for the insertion of Births, Marriages, and Deaths, is Five Shillings.*

ROYAL MATERNITY CHARITY. Instituted 1757. For Delivering Poor Married Women at their own Habitations.
Patron—Her Majesty the QUEEN. 31, Finsbury-square.
"All London is the Charity's Hospital and every Street a Ward." The Secretary of this Charity Appeals for Women's and Infants' Clothing, for which there is no official fund available, the poor mothers and their newly-born infants being continually found without a vestige of provision in their hour of trial, and their condition is often most heartrending. Parcels and also Contributions to the Samaritan Fund for providing physical comforts at such times will be most gratefully received at the Charity's house, 31, Finsbury-square, by Mr. LONG, the Secretary.

THROAT AND COUGH.—Soreness and dryness, tickling and irritation, inducing coughs and affecting the voice. For these symptoms use EPPS'S GLYCERINE JUJUBES. In contact with the glands at the moment they are excited by the act of sucking, the glycerine in these agreeable confections becomes actively healing.
Sold in Tins, 1s. 1½d., labelled "JAMES EPPS and CO., Homœopathic Chemists, London."

"THE GUN OF THE PERIOD." TRADE MARK. REGD.
HONOURS, PARIS, 1878.
DIPLOMA & MEDAL, SYDNEY, 1879,
AND CALCUTTA, 1883-4.

With intercepting Safety Bolt, rendering an accidental discharge impossible.

G. E. LEWIS'S TREBLE GRIP, combined with Anson and Deeley's Locking, Cocking, and Automatic Safety Bolt, is the most perfect weapon ever placed in the hands of the sportsman. The opening of this gun cocks it, and bolts the triggers and tumblers automatically. Prices from 20 to 40 guineas. A special plain quality, £16. "Express Rifles, from 12 guineas. "The Gun of the Period," wherever shown, has always taken honours. Why buy from Dealers when you can buy it at half the price from the Maker? Any gun sent on approval on receipt of P.O.O., and remittance returned if, on receipt, it is not satisfactory. Target trial allowed. A choice of 200 guns, rifles, and revolvers, embracing every novelty in the trade.—G. E. LEWIS, Gun Maker, 32 and 33, Lower Loveday-street, Birmingham. Estab. 1850.

FOR XMAS & NEW YEAR'S GIFTS
Nothing is more suitable than ARBENZ'S Celebrated
MANDARIN RAZORS,

AND THE UNIVERSALLY APPRECIATED

GEM AIR GUNS.
Innumerable Testimonials pronounce the former to be the best, most reliable, easiest, and cheapest hair-class Razors known. They are fully warranted, and will give perfect satisfaction. ARBENZ'S GEM AIR GUNS have, like most good things, been followed by imitations which, for extra profit, are offered by somewhat unscrupulous tradesmen as the original article. Persons wishing to purchase really reliable, powerful, effective, and well-made Gem Air Guns should insist upon having those marked with a Swiss Cross thus ✠. They may be had at the same prices as the vilest imitations named, through any respectable dealer, or direct where unobtainable otherwise. Insist upon having with every gun my descriptive circulars, giving full particulars, instructions for use, retail prices, &c. T. A. ARBENZ, 107 and 108, Great Charles-street, Birmingham.

MELLIN'S
FOR INFANTS AND INVALIDS.
FOOD.

CAVALRY GOING OUT ON A RECONNAISSANCE AT SUAKIN.

FROM A SKETCH BY OUR SPECIAL ARTIST, MR. MELTON PRIOR.

OUR NOTE BOOK.

BY JAMES PAYN.

In reading Cooper's "Prairie" the other day for the first time these many years, I came upon a literary coincidence that I have never seen commented upon. It is with no object of belittling a great genius that I here allude to it—for the cuckoo-cry of "plagiarism," so common in these days, is to me a discordant note—but merely to show how the same fine idea sometimes strikes two noble minds. In the affecting scene that describes the death of "the Trapper" in extreme old age, whom we knew in youth as Deerslayer, and in maturity as Pathfinder, he is made to depart exactly as Colonel Newcome; not indeed with *adsum*, but with a similar reminiscence of the past upon his lips. "For a moment he looked about him, and then, with a fine military elevation of the head and with a voice that might be heard in every part of the assembly, he pronounced the word 'Here!'" His remembrance of his military service is obviously quickened by the presence of Middleton, himself a soldier, and with whose grandfather (in "The Last of the Mohicans") he had served the King. The whole scene has a beauty and tenderness which escaped me when I read it as a boy. We know that Thackeray was an admirer of Cooper, for he wittily describes the character of "Leather Stocking" as better than any in "Scott's lot"; but whether some fleeting recollection of this incident suggested the end of the good Colonel is more than doubtful. He had probably forgotten it altogether, as indeed had I; the similarity is what the excellent Paley calls (though in another sense), "an undesigned coincidence."

There are one or two things I wish people would not do at Christmas time, just for once. I wish they would abstain from printing (fortunately in most cases in some unintelligible type upon a scroll) the words, "Christmas comes but once a year, *and* when it comes it brings good cheer." A more illogical conjunction was never penned. If Christmas came every day it would be reasonable enough, and the whole statement be significant of a plethora of food. It is, however, an infrequent festival, and when it does come should be proportionately enjoyed. "It is a poor heart which never rejoices," is its true parallel. "Christmas comes but once a year, *but* when it comes it brings good cheer" is the proper phrase. Also I do entreat my good friends at Christmas time and the New Year not to wish me "The compliments of the season;" is it not enough that nine-tenths of the good wishes expressed by our fellow-creatures for one another upon these festive occasions *are* compliments, without this frankness of saying as much. Say "Heaven bless you!" my dear friends, send me oysters, send me cheques, but don't wish me "The compliments of the season."

Even if the strange story of the skeleton of the baby "wrapped in Cloth of Gold" found in Edinburgh Castle, and put back again (like Sir Thomas, in the ballad, into the fish-pond) had turned out to be correct, it would probably not have made much difference to the succession of the English Crown; but what a satire it would have been upon the Divine Right of the Kings, and all the consequences that have flowed from it! For my part, I have never much believed in "blood," and have a rooted conviction that one baby is as good as another; but fancy if it had been Rizzio's baby (and the Stuarts were always a dark race) that had been substituted for the dead heir! To think of the loyalty, and life-blood, and treasure that, in that case, would have been wasted on the offspring of an Italian organ-grinder, makes the head go round as though one were listening to that very instrument. To use the language of the satirist, it would, indeed, have been "a most tremendous go," because so much would have gone with it. Fortunately, the baby in the Cloth of Gold—a little tarnished by this time, one would think—was out of it; there could have been, at least, no change of infants as happens in the novels, or else at this moment we might be entertaining the rightful heir to the British monarchy unawares, or perhaps refusing to entertain him, and even disputing the liability of one's parish so to do. My Stars and Garters (or *his*, if he only knew!), the whole subject is really too appalling; and yet in the history of the world—even if that of England has been free from them—there must have been scores and scores of such mock dynasties.

An American critic of the graver sort has published a lament that marriages in fiction are not as they should be; he complains not that so many roads in story should lead to matrimony, but that the wayfarers who join hand in hand at the altar should be so often characters unsuited to one another. "Swaggering blades are united to lovely, but pious, maidens; and profligates find eternal favour in the eyes of serious and dignified womanhood." He hopes to see all this altered, and nobody made a husband in a novel who is not worthy of that respectable position. But surely as long as novels pretend to be pictures of real life this can never be. The best of men do not (to begin with) always make the best of husbands, or, if they do, women do not think so. For his purpose of illustration the critic has taken extreme instances of dissimilarity; but some difference of taste and character adds zest to the matrimonial bond. "Jack Sprat could eat no fat, his wife could eat no lean," and so between them they made a satisfactory meal and without waste. It is quite true that nothing is more hopeless and deplorable than for a good woman to think she has a mission for the conversion of a bad man by marriage; but she falls into a plight almost as miserable when she marries a prig. A saint, again, is charming in his proper place—a niche in the church wall—but, I venture to think, not in the bonds of wedlock; to be righteous overmuch is, indeed (though I have been fortunate enough myself in matrimony), a fault generally obnoxious in a husband. When a male and female saint wed together, it is possible, indeed, that all may go well; but such unions are so uncommon, that, like the tenth place in decimals, they may be almost "disregarded." A marriage, on the other hand, of two very pronounced sinners (which would seem to find favour with the critic), may, indeed, save a couple of saints, who might have otherwise intermarried with them, from persecution (which, however, is the proper lot of saints), but is likely to produce a progeny very injurious to mankind at large. Upon the whole, I think novelists are right in following the example set by both sexes in real life, and uniting their heroes with heroines after a pattern different from their own.

M. Charcot, one of the Jury of the Faculty of Medicine in Paris, in complimenting a young lady who had obtained her doctor's degree, has passed anything but a compliment on her sex. Women, he says, pass their examinations, when they do pass them, even more satisfactorily than men; but what will be always a bar to their success is that they have no real love of their proposed profession. "What they aspire to is the first rank, the most prominent posts, the most lucrative offices"; and what they dislike is the humble and unpleasant, but necessary, service of humanity such as is given by the hospital dresser. To my mind, there never was a more unjust accusation. I know nothing of hospital life; but in that of the home, women shrink from none of those horrors of the sick-room from which man, in his sensitive delicacy and pure self-ishness, blenches appalled; and it seems incredible that those who choose the nursing of the sick as their profession should be less resolute than their lay-sisters. It might be added (but that a joke is seldom well received by the softer sex) that it is notorious that women are fond of "dressing." I am myself devoted to them; but if they have a fault, it is that they cannot bear the least touch of the dart of ridicule. Even the feather end of it—its mere tickling—turns the Graces into Furies. This makes me very cautious in treating any of these "Women's questions," which are (I am given to understand) rending the civilised world, in a light vein; I am not musical, and have no ambition to share the fate of Orpheus. Let me say, then, in all seriousness, that the three articles on "The Progress of Women" that have appeared in the *Universal Review* for December are as good as anything that has yet been written on that subject. There is, however, a touch of pretence here and there. When the topic is education, the style of the pleasant paper on Somerville Hall is so unbrokenly serious that it reminds one of the too-enthusiastic actor who blacked himself all over for Othello; even the play of its students, we are told, "has a meaning and a purpose in it." Hockey is one of their games; and only think of playing hockey with a stick and a bung—and a purpose! There is also much interesting information in another paper about the new employments opened to women; and what is especially noteworthy in the article on their legal status is that Man is for once not treated in it as an antagonistic animal—the acts (of Parliament) he has of late years performed to his own detriment and the advantage of the female meeting with generous acknowledgment. How it should ever have entered into the heads of our Minervas that we *were* hostile to them is inconceivable to anyone who has witnessed an action for breach of promise of marriage. No woman would ever prefer a jury of matrons for *that* inquiry, I am well convinced.

M. Carnot is held by some of his countrymen to have an eye not only "fixed, glassy, and lugubrious," but maleficent—an evil eye. They don't say which eye it is, but it must be "a piercer." When he went officially to look at Savoy, the river, we are told, overflowed its banks; and when he visited Fontainebleau there were fires. To blow hot and cold in the same breath is a trifling feat compared with this evocation of two antagonistic elements by a glance of the eye. Can he not be persuaded to close it, and use the other one? In Scotland the belief in the evil eye is common enough, but the sovereign remedy against it—twisting a branch of the mountain ash with the hair of a cow's tail—is, fortunately, within reach of the majority of the population. Psychologists tell us that the superstition simply arises from the influence of the eye of any "masterful" person, who is also inclined to be what the vulgar call "nasty"—i.e., malignant—which impresses the weak-minded. Cæsar Borgia was a gentleman of this stamp; Tamerlane's eyes were so terrible in their expression that out of a delicate consideration "he abstained from looking too earnestly on those who conversed with him;" and our own Edward I., though exceedingly handsome, had eyes that seemed to scorch those who looked at them. All these were credited with the evil eye, but to accuse the mild and gentlemanly M. Carnot of possessing it is as outrageous as to charge some innocent wet nurse with bewitching the cows.

The rage for cheapness in literature is becoming a nuisance. If you buy what is called a "standard" work, it is an even chance that it has been "pruned," like a standard rose, not, however, to get rid of any redundancy, but in order to decrease its supply of "copy," and therewith the expense of production; and, unhappily, it is not every editor who labours in the literary vineyard that understands the thinning of grapes. Moreover, it is not such a bargain as it looks, to buy a book for sixpence, printed in such small type that when you have got through it you find it has cost you your eyesight. I am the last person in the world to care for the externals of a volume, but I like it to be what it describes itself to be on its titlepage, and fit for ordinary eyes to read. All else is leather and prunella (or, more likely, paper covers), but these are essentials. Yet now, as if the contents of our book-stalls were not cheap enough, we have "lending libraries" in the trains. For the aristocratic passenger by the Pullman car to Brighton I see that "select" books are appropriately provided on loan, and also note (not without satisfaction) that they steal them. Of course they do. What can you expect of people who have plenty of money and yet will not spend a shilling on a railway journey upon literature?

There are few writers who can handle the supernatural without making either themselves or their subject ridiculous; but Mrs. Oliphant is one of them. She has proved it in "The Beleaguered City," but still more conclusively in "The Land of Darkness." When I first read it, it struck me as the finest article ever written in a magazine; and its impression is no less favourable in book form. A good judge of letters once told Anthony Trollope that his "Editor's Tales" showed his genius more than anything; to which he replied that nobody (he meant, of course, in comparison with his novels) had read them. It is quite possible that fewer people will read "The Land of Darkness" than the novels by the same author, but those who do will be the wiser for it. She seems in it to give rein to those powers which, as Lucas Malet points out in a recent admirable criticism of her works, she is too apt to restrain. We see in it, for once, her great resources—not the mere current coin with which she is so free, but her deposit account. The narrative is enthralling, in spite of its melancholy nature, and seems to have something of inspiration in it—like a supplemental leaf of the Scriptures.

THE COURT.

The Queen, who is in good health at Osborne, takes walks and drives daily. A special service was performed in the chapel at Osborne on Dec. 19, in memory of the late lamented Prince Alexander of Hesse, whose funeral took place at Darmstadt the same day. The Queen, the Empress Frederick, and Princesses Victoria, Sophie, and Margaret of Prussia attended, and all the members of the household; the Rev. Arthur Peile, M.A., Chaplain-in-Ordinary to her Majesty, officiating. Prince and Princess Henry of Battenberg, attended by Lieutenant-Colonel Clerk, arrived on the 22nd from Darmstadt, having crossed over from Portsmouth in H.M. yacht Alberta, Captain Fullerton. On Sunday morning, the 23rd, the Queen, the Empress Frederick, and Princesses Victoria, Sophie, and Margaret of Prussia, and Prince and Princess Henry of Battenberg, with the members of the Royal household, attended Divine service; the Rev. Canon Duckworth, D.D., Chaplain-in-Ordinary to her Majesty, officiated. Princess Louise (Marchioness of Lorne) and the Marquis of Lorne arrived at Osborne on the 24th; and on Christmas Day the Queen, the Empress Frederick, and Princesses Victoria, Sophie, and Margaret of Prussia, Princess Louise (Marchioness of Lorne), and Prince and Princess Henry of Battenberg attended Divine service in the morning; the Rev. Arthur Peile, M.A. (Chaplain-in-Ordinary to her Majesty), officiating.

The Prince of Wales honoured the Marquis De Santurce with a visit recently at Wadhurst Park, Sussex, for two days' shooting. The Prince and Princess of Wales received Count and Countess Deym at Marlborough House on Dec. 20 on Count Deym being accredited as Austro-Hungarian Ambassador at the Court of St. James. Their Royal Highnesses subsequently received the Spanish Ambassador on his departure from London, upon being transferred to the Embassy at Rome. The Duc de Chartres visited the Prince and Princess and remained to luncheon. The Prince on the 21st unveiled the statue of the Duke of Wellington, executed by Mr. Boehm, and erected opposite Apsley House, in the presence of a numerous and influential company. The Princess, accompanied by Prince George and Princesses Louise, Victoria, and Maud, left Marlborough House for Sandringham. Prince Albert Victor, attended by Captain Holford, arrived at Marlborough House from visiting Lord and Lady Wimborne at Canford Manor, Dorsetshire. The Prince was present on the 22nd at a meeting of the Standing Committee of the Trustees of the British Museum (Natural History). His Royal Highness, accompanied by Prince Albert Victor, left Marlborough House for Sandringham. On Christmas Eve the Prince and Princess and their family were present at the annual distribution of beef to all the labourers on the Royal estate. The Prince and Princess, with Prince Albert Victor, Prince George, and the three Princesses, were present on Christmas morning at the service at the church of St. Mary Magdalene, the church being seasonably decorated. The ladies and gentlemen of the household were in attendance. The Rev. F. Hervey, Rector of Sandringham, Domestic Chaplain to the Prince and Princess of Wales, and Chaplain to the Queen, officiated and preached.

PROROGATION OF PARLIAMENT.

"*La reine le veult!*" Welcome, indeed, was this ancient formula to all legislators who heard it delivered, after Royal sanction had been given to the Appropriation Bill and the final batch of measures, in the House of Lords on the Twenty-fourth of December. Not for thirty-six previous years had Parliament sat in the last month of the year. The relief of separating the day before Christmas Day was indubitable. The number of Peers present was few; but a goodly gathering of hon. members followed the Speaker to the Upper House. In their robes of scarlet cloth and ermine and ancient hats, the Royal Commissioners—Lord Halsbury, the Earl of Coventry, the Earl of Kintore, Lord Colville, and Lord Esher—sat in front of the Throne, and contributed a brilliant bit of colour to the scene in the gilded chamber.

The Queen's Speech, read with exemplary clearness by the Lord Chancellor, was of marked brevity, considering the extraordinary duration of the third Session of her Majesty's Twelfth Parliament—a Session which began on the Ninth of February. The Royal Address opened, not unnaturally, with an expression of the Queen's "great satisfaction in being able to release you from your protracted labours." Her Majesty then regretted that the Fisheries Convention with the United States had not "commended itself to the judgment of the Senate," but trusted that the "temporary arrangements" adopted would "prevent any immediate inconvenience arising from this decision." A reference to the Convention for the abolition of the sugar bounties was succeeded by this congratulatory allusion to General Grenfell's dashing action at Souakim: "The dispersion of the besieging forces has been effected by a brilliant military operation on the part of the Egyptian troops, supported by a British contingent." Our co-operation with Germany to establish a naval blockade of the part of the Zanzibar coast in a state of insurrection was justified on the score of "the renewed vigour of the slave trade" in that quarter. The next paragraph was devoted to the success of the Black Mountain and Sikkim expeditions in India, and to a statement that Ishak Khan's rebellion in Afghanistan had been subdued by the Ameer. Mention was made of the suppression of the rising in Zululand by British troops and the native levies, the disaffected chiefs awaiting their trial before a Special Commission. It was next hoped that the financial measures passed would "materially increase the public resources of the country, without adding to its fiscal burdens"; and claimed that the measures "for extending the functions and improving the machinery of local government in England" were "calculated to increase the loyal attachment of my people to their institutions."

Baron Halsbury added that Parliament was prorogued till the Thirty-first of January. But overworked senators may, with reason, indulge in the hope that the date for reassembling may be further postponed to some weeks later.

PICKINGS FROM THE POTTERIES.

"Man is an animal what collects things." Such is a child's definition of Creation's lord. It does not differentiate him from a jackdaw; but it is sufficiently correct for the object of this paper. A "china-maniac" is the name given by rational and sober Philistines to those who gather around them the vases of "Chelsea" and "Sèvres," and the services of "Worcester" and "Crown Derby"; to whom the figures of Dresden and Bow are more than real men and women, and who sigh for the lost glories of "Plymouth" and "Bristol," and are ever ready to dispute the actuality of "Lowestoft." But the ridicule of two centuries leaves the china-maniac's position stronger than ever. The method in his madness has satisfied British commercialism, and he is safe. But what can be said of the Pottery-maniac?

Prescription has not yet rendered his title to sanity indisputable. Are the assiduous collectors of Staffordshire figures and cottage faience; the proud owners of vermilion stags with yellow spots; the proprietors of blue dogs, green sheep, and purple rabbits; the cupidinous hunters of the dainty salt-glaze tea-pots and the tortoise-shell and agate wares of Whieldon and his contemporaries,—are these to go down to posterity unwept, unsung, unknown?

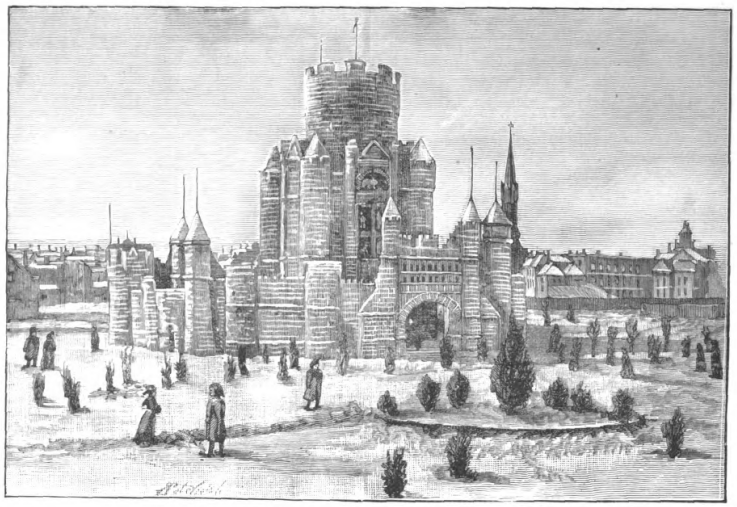
The infancy of an art is frequently its most interesting, occasionally its most fortunate, period. To watch, a century later, how ideas began to formulate, and scientific and empirical knowledge grow, has always been of interest to the few; and these few have formed the collections which stimulate others, and cause the fiercest competition among the cognoscenti. Collectors are the links which connect the present and the past: they may be rusty, they may be cracked, but they are indispensable.

Pottery does not seem to have made much progress in England before the end of the seventeenth and beginning of the eighteenth centuries.

The rough, many-handled "tygs," most English of all the potter's work, the posset-cups and candlesticks made of coarse earthenware and rudely decorated with quaint devices and pithy proverbs, standing out in relief in colours of bright orange and yellow, made no pretence to elegance or refinement. They represent the coarse jocularity or rude loyalty of the old English potter. The fearful and altogether counterfeit presentments of William III., of Mary his Queen, of Anne, and of George I., do more credit to his loyalty than to his artistic qualities. A drinking-cup inscribed with some such phrase as "The best is not too good," was given by a potter to the friend and companion of his cups. A cradle of the same rude ware was given to his friend's wife upon the birth of her first child. To a woman who was more than usually curious might have been presented the plate, now in existence, upon which is depicted Lot's wife, the pillar of salt, and two angels, while below is the inscription, "Remember Lot's wife. 1727." Allusions to the Bible (not always in the best taste) were common amongst these rude and semi-civilised potters. John Wesley, nearly a century later, experienced very rough usage at their hands.

The "tygs," to which reference has been made, were drinking-cups of coarse clay, whose chief characteristic was found in the handles, of which there were never less, and generally more, than two. Whether the word is derived, as it has been suggested, from the Latin *tegula*, a tile, or from the Anglo-Saxon, *tigel*, which also means a tile, or anything made of clay, does not signify here. The word is local, and apparently used in Staffordshire and the Potteries only. Whatever may be its derivation or real meaning the tyg played an important part in the daily life of the Early English potters. Its very shape conduced conviviality. The handles pointed coaxingly every way. Each drinker could carry it to his mouth, just as it stood on the table; there was no necessity for him to circumvent it to find the handle. Around its lip, wreathing it, as it were, with an alluring smile, was a convivial adage or a trenchant maxim.

One vessel of common shape, essentially English, and rarely found in the Continental drinking-cups, had two handles only. These were both placed on the same side, near together, but sloping away from one another. Such a tyg would be used by two men when drinking. At a large gathering the tygs would have more than two handles.



Inside the old Norwegian silver tankards, and the very early earthenware English vessels, pegs or knobs were frequently placed; and the drinkers were limited, at each drink, to the amount of liquor between one peg and another. In the old bouts wagers were often made that one man would drink, at a draught, more pegs of liquor than another. Each man would endeavour, literally, to lower his opponent's record. The expression, "taking a man down a peg" is said to have arisen from this custom. In the later vessels or tygs the handles supplied the divisions for testing the quantity of liquor drunk. These handles were looped down the side, each loop joining the side of the cup at an equal distance from the next. As earthenware became commoner, and consequently cheaper, these sociable old tygs disappeared, and the individual beer-mug, interesting but solitary, took their place.

The Slip ware, as the productions are rightly called, were, perhaps, the earliest English pottery that we can safely attribute to any one maker; unless, indeed, we except John Dwight's Fulham ware. It was often called Toft ware, on account of the names of Thomas and Ralph Toft being found on so many of the plates and dishes of that period. It is, however, by no means peculiar to these men or their family; at least a dozen names are handed down to us on as many dishes. These dishes were in all probability "show" or presentation pieces, larger than those in ordinary use, and only brought out on special occasions. They would therefore run less risk of breakage than the commoner pieces, and have thus come down to us as strange and interesting mementoes of cottage life nearly 200 years ago. The Tofts were a family probably of Dutch extraction who settled in Staffordshire. A number of fine examples of this ware, many of which are now in the British Museum, have been discovered at Wrotham, in Kent.

One of the earliest forms of decoration of plain earthenware was by means of the lines or "slips" of a different colour "trailed" all over the surface of the earthen vessel, in the form of patterns, lettering, or other devices. The ornamentation, in fact, gave the name to the ware. The coloured clay was mixed with water until it acquired the consistency of cream. It was then poured into a bottle with a narrow spout, like a modern oil-can, and the "artist" poured it out into any pattern which he fancied. There was also another method of employing the coloured clay. The dish itself, before firing, and when in a damp state, was pressed down upon an "intaglio" mould, which left the pattern standing out in relief. The coloured clay was then poured in a liquid state all over the depressed portions up to the level of the raised ones, thus giving a coloured ground to the dark pattern. There is a candlestick of this ware in the Jermyn-street Museum, dated 1649, which is probably the earliest dated piece known; but there is no doubt that this sort of ware was in use at a much earlier date. It is not known whether it was first made at Wrotham or in Staffordshire; but there seems no doubt that the Wrotham potters had more idea of form, while the Staffordshire "Tofts" showed more power of illustration. The examples of both are numerous in the British and South Kensington Museums. Slip ware is still made in some districts for the commonest sort of pans and pipkins. In Switzerland and other parts of the Continent the lover of rich colours and mere "decorativeness" may obtain for a few pence what pounds cannot procure for him in England. *Verbum sapientibus*, this is a ware which it is not hard to imitate, and collectors should be cautious.

One of the best known collectors of Early English pottery, and the author of a charming and useful work on the subject, showed the writer a fine two-handled posset-cup, for which he had paid pounds, and which (there was a twinkle in his eye as he told the story against himself) his own pupil had manufactured, and then "planted" in a cottage in the country. The ruse succeeded, and the posset-cup stands amidst its ancient and genuine prototypes—a standing reproach to the "zeal" of the collector, which has not infrequently "eaten him up." These rude dishes and jars play a most important part in the history of pottery in England. They were the beginning of an art which, culminating at the end of the eighteenth century in the productions of Josiah Wedgwood, brought not only riches, but a world-wide renown to its exponents, and established on the Continent the artistic credit of England.

T. T. G.

ICE-PALACE AT ST. PAUL, MINNESOTA, ON THE MISSISSIPPI.

ICE-PALACE AT ST. PAUL, MINNESOTA.

The winter in Minnesota is about the severest of any part of the United States; it lasts fully six months, and the frost registers 40 deg. below zero. Although fatal consequences may follow from prolonged exposure, persons in health, well fed and properly clad, find that the cold is exhilarating, and not nearly so unpleasant to bear as that we have often felt in England. Taking advantage of these conditions, the municipal authorities of the thriving city of St. Paul, on the Mississippi, erect annually, at a cost of many thousand dollars, in the City Park, a magnificent Ice-Palace of fanciful design, usually taking the form of a baronial castle, like that represented in our Illustration. It is formed of blocks of ice, about 30 in. long by 15 in. wide and 15 in. thick, cut from the Mississippi River, which flows through the city. The edifice is about 250 ft. in length, and the main tower has an elevation of 90 ft. Many hundred people can assemble at once within its crystal walls. In the day-time, under the clear cold sky, as the light catches its various salient points and projections, the Ice-Palace is a striking object; but when lit up, as it is at night, with various coloured electric lights, its appearance is truly beautiful. During its existence, a carnival is held in the park by the various snow-shoe clubs and toboggan clubs. As the winter passes away this solid-looking structure slowly and gradually disappears, so that, by the end of April, all that remains of so much magnificence is a pool of water.

THE LAST EXPLORATIONS OF M. DE BRETTES.

M. De Brettes, of whose early travels in the Grand Chaco to the south of the Rio Vermejo a brief account has already appeared, has just returned to Paris from a second expedition, with reference to which he furnishes some interesting particulars to the *Journal des Débats*. Having started from France in May, 1886, intrusted with a mission by the Minister of Public Instruction, he was detained by difficulties of one kind and another upon American soil for sixteen months, and prevented from penetrating into the Chaco. He did not, however, allow this time to be wasted, for he purchased a yacht, and with the help of a French engineer, M. De Boisvier, he completed the hydrographical survey of the Lake Ypa-Carai which had been commenced twenty-seven years before by the English engineers Burrell and Valpy, but interrupted by the Paraguay War in 1864. At the instigation of the Consul of Bolivia, M. De Brettes then entered the Chaco for the second time (Oct. 13, 1887), starting from Apa, on the frontiers of Brazil, and making for Baranquerita (the Northern Chaco). His escort then consisted of fifty Guana Indians and a single native of Paraguay who had resolved to accompany him, and who was nicknamed accordingly by his compatriots "Guapo" (the brave man). But this brave man soon took fright, and fled back to Apa half dead with terror. M. De Brettes thus travelled through the territory of the Guana Indians, who were then at war with their mortal enemies the Chamacocas, and he was himself attacked by this tribe and slightly wounded. He continued his march westwards for six days, suffering terribly from thirst, and he at last reached Bolivian territory, ten days' march from Pilcomoyo, having gone through the hitherto unexplored territories of the Guanas, the Kamananghas, the Banghis, the Neennsemahas, and the Aksseks. During the whole of this difficult march he did not fail to take note of all the important geographical positions, and thus, for instance, he followed for upwards of seventy miles a *senda* (Indian path) which leads from the Rio Paraguay to Bolivia across the Chaco. This was the knotty point of the problem, and M. De Brettes further ascertained that this *senda* runs through a perfectly flat country, and that there would be no difficulty in clearing the road which Bolivia so much desires to make. He also came upon some very curious brick ruins to the right of this Indian tract in latitude 21 deg. 48 min. south, longitude 63 deg. 07 min. west meridian of Paris. The Indians who accompanied him said that beneath the round monuments, like low towers, which M. De Brettes saw, were tombs; but he was unable to verify this, though he extracted from some of the cavities in the ground some fine specimens of pottery similar to those found in the tombs of the Aymaras of Bolivia, whence M. De Brettes concludes that the Incas' dominion must have extended far beyond the Andes. Among the pieces of pottery which he has brought back is a duplicate of what M. Jacquemart describes as the *chef d'œuvre* of American pottery, a vase which is now in the Louvre. In addition to the potteries of the Incas his collection comprises Guanas and Chamacocas vases of modern manufacture and a great number of Indian articles, such as violins, costumes made of feathers, necklaces of all kinds, and arms used for the chase and the battlefield.

The Rev. A. C. Fox, head-master of the Grammar School, Tideswell, Derbyshire, has been appointed head-master of the Reigate Grammar School.

The Duke of Buckingham has again given a remission of 12 per cent to his agricultural tenants.—The Duke of Portland has made a reduction of 20 per cent in the rents due from his tenants on his Lybster estate.—At Earl Cowper's rent audit held at Panshanger, a remission of 15 per cent was again allowed to his agricultural tenants, being at the same rate as for several successive half-years.

Mr. Henry Tate, sugar refiner, of London and Liverpool, has presented £2500 to the Liverpool Institute, for founding four Tate Scholarships, value eighteen guineas; and has also sent to the same institution a cheque for £1750, to provide a scholarship of the annual value of sixty guineas, as a memorial to the late Rev. Hugh Stowell Brown, the same to be tenable for two or three years at any college connected with any English University.

There died recently, in the hamlet of Whitington, Norfolk, a labouring man named Robert Woodcock, aged sixty-eight years. Shortly before his death he called his eldest son to his bedside, and told him he was dying. He then handed him the key of a certain box, which had formerly belonged to the sick man's father, and told the son that he would find in the box what he required. On opening the box the son, to his astonishment, found 1900 sovereigns. The deceased had been of very penurious habits, denying himself and family almost the bare necessaries of life. His wife died about three months ago, and in her last illness she was indebted to the kindness of friends and neighbours for articles of nourishment.

According to the Board of Trade returns of the lives saved along British coasts, it appears that during the last statistical year, ending June, 1888, 3166 shipwrecked persons were rescued. More than one-third of these escaped in the boats belonging to the wreck; rather more than a quarter were taken off by other ships or steamers; 443 were saved by Coastguard boats, luggers, and other small open vessels; 374 were saved by life-boats; and 286 were hauled ashore by the rocket apparatus or ropes. Only three persons escaped a watery grave by their own "individual exertion." Comparing these figures with similar data for previous years, it appears that the total saving of life is below the average, though it is considerably greater than was the case in 1886, 1885, or in 1880.

Mr. W. MacGeough Bond, barrister-at-law, Inner Temple, and member of the Cairo Bar, has been appointed to the Judgeship in the native Court of Appeal at Cairo formerly filled by the late Mr. Sheldon Amos.

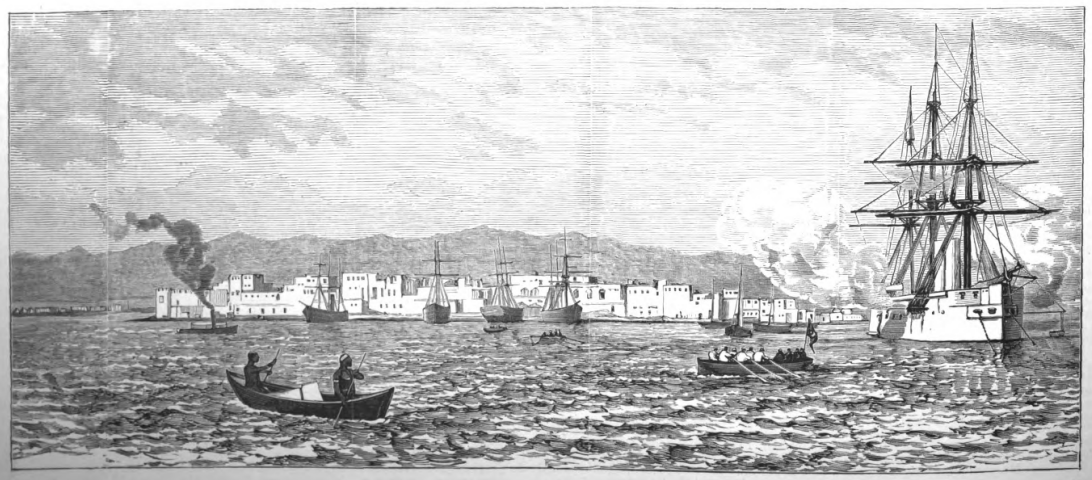
Kirkstall Abbey, near Leeds, which was recently bought by a company of gentlemen at the Cardigan Estates sale, has been resold to Colonel North for £10,000—the price at which the company bought it—and it has been presented by the Colonel to the town of Leeds, his birthplace.

At a meeting in connection with the National Fruit Growers' League, a resolution was passed, after considerable discussion, emphasising the importance of the movement promoted by the league, in the interest not only of the rural districts but of the larger towns, as tending to the more profitable use of the soil and the more equitable distribution of the population.

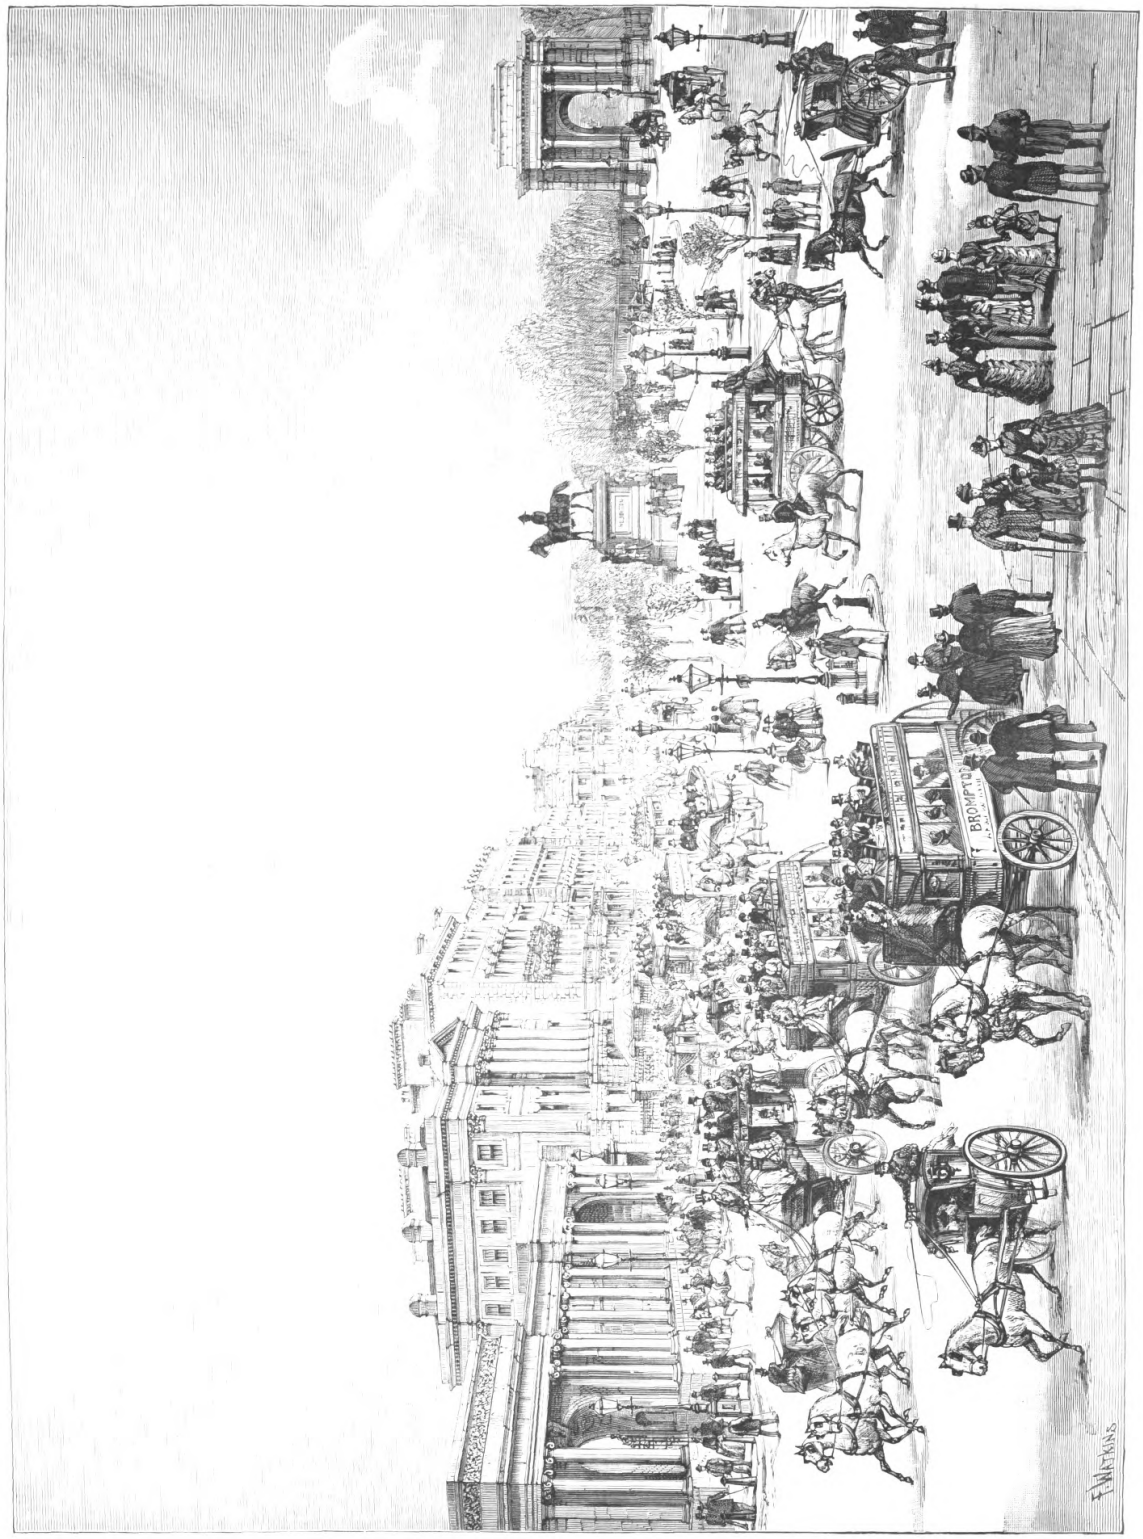
In St. Patrick's Cathedral, Dublin, on Dec. 21, the marriage was celebrated of the Hon. and Rev. Edward Lyttelton, one of the assistant-masters at Eton, with Miss Caroline West, younger daughter of the Dean of St. Patrick's. The bridesmaids were Miss Eveleen Dickenson, Miss Mabel Dickenson, the Hon. Sybil Lyttelton, and Miss Mina MacDonell. The service was fully choral. Lord Plunket, Archbishop of Dublin, and a large number of guests were present.

THE LATE JAMES SELBY.

The funeral of Mr. James William Selby, late driver of the Brighton "Old Times" coach, took place in Highgate Cemetery on Wednesday, Dec. 19. Eighteen stage-coaches, three private drags, and numerous brakes and broughams, driven by well-known whips, formed part of the procession. The funeral-car was covered with wreaths and floral emblems. The "Old Times" coach was driven by Captain Beckett, accompanied by Mr. A. F. McAdam, Mr. Carleton Blythe, Mr. Broadwood, Mr. Henry Hill, Mr. Walter Dickson, and the guard, Walter Godden. The "Virginia Water" coach, running between Oatlands Park and London, was driven by Mr. R. Falconer. The "Defiance," Bentley Priory coach; the "New Times," running between Guildford and London; the "Perseverance," Dorking coach; the "Comet," Brighton coach; the "Wonder," St. Albans coach; the "Excelsior," Tunbridge Wells coach; the "Vivid," Hampton Court coach; the "Hirondelle" (Hertford), the "Star" (Henley and Windsor), the "Champion" (Canterbury and Margate), the "New Age" (Hampton Court), and the private drags of Mr. Johnson and Mr. David Jenks took part in the procession. The cemetery was reached at half-past twelve. The burial service was performed by the Rev. Arthur F. A. Scholefield, M.A. Among those present at the grave were the Marquis of Ailesbury, Captain Stracey, and Mr. Trollope. Wreaths and floral tributes were sent by the Duke of Beaufort, Lord De Grey de Wilton, the Committee of the Pelican Club, Lord De Clifford, Colonel North, the Hon. M. Sandys, Mr. Seager Hunt, M.P.; Captain Airey, Mr. and Mrs. Stratton, the Marquis of Ailesbury, Mr. S. Freeman, Mr. C. R. Hargreaves, the *employés* of Cowland and Selby, and several well-known actresses. The "Old Times" Brighton coach, it is said, will not run in future, and all the horses will be sold.



Mr. Laurence Oliphant died, on Dec. 23, at the residence of Sir M. Grant Duff, Twickenham.



THE LATE MR. JAMES SELBY, WHIP OF THE "OLD TIMES" BRIGHTON COACH.

SUAKIN: DEFEAT OF THE ARABS.

The news of a great defeat inflicted on the hostile Arabs of the Soudan led by Osman Digna who were besieging Suakin, on the Red Sea coast, was received on Thursday, Dec. 20, with much satisfaction. This action had been performed on the morning of that day by the British and Egyptian troops of the garrison under the command of General Sir Francis Grenfell. The troops, numbering about four thousand of all arms, consisted of the Welsh Regiment, under Colonel Smyth, and the King's Own Scottish Borderers, under Colonel Coke; the Mounted Infantry, under Colonel Barrow, with the 20th Hussars, under Major Irwin; the Royal Engineers, under Captain Foley; and two brigades of the Egyptian Army, each of three black battalions, the first commanded by Colonel Kitchener and the second by Colonel Holled Smith; with the Naval Brigade, under Commander May, from H.M.S. Racer and H.M.S. Starling. They were supported by the fire of Fort Gemazeh, which was under the command of Captain Shakespear, and of Fort Shatar, commanded by Captain Jackson; and by that of H.M.S. Starling and the Egyptian steamers Noorbahr, Hodeida, and Damanhour, under Middlemass Bey. At seven o'clock in the morning, the forts opened fire on the trenches where the enemy lay; and the troops moved out, the Black Brigade on the right flank, and the cavalry and mounted infantry covering. The King's Own Scottish Borderers, the Welsh Regiment, and the Egyptian Brigade occupied the embankment between the forts, with the reserve of British infantry, while the forts shelled the trenches with a terrific fire. The enemy held their ground with intense courage till the Black Brigade charged the trenches, which were carried in half an hour. All the positions were occupied, and two guns were captured. The number of the enemy slain was reckoned to be nearly a thousand. The British loss was small. The 20th Hussars charged the enemy's cavalry and

SUAKIN, FROM THE ENTRANCE TO THE HARBOUR.

IMPROVEMENTS AT HYDE PARK-CORNER, AND NEW STATUE OF WELLINGTON.

dismounted men, and a hand-to-hand encounter ensued, the enemy losing severely, while the Hussars lost four men killed and four wounded. Lieutenant Brown, of the Royal Irish, was slightly wounded in the arm. The Egyptian troops, who fought most bravely, had about six killed and forty wounded. The enemy's trenches have been filled up and zerebas have been erected on the site, in a strong position. The country for miles round is now apparently clear. The civil population of the town was on the battle-field an hour after the fight, rendering assistance in filling up the trenches. The greatest relief is felt in the town.

The town, the port, and the military fortifications of Suakin have been described on former occasions. The town consists of two parts, one built on a small island near the head of the harbour, and the other built on the mainland, connection between the two being maintained by an artificial causeway. The part on the mainland, known as El Gaff, is defended by a wall, the extremities of which rest on the waters of the harbour. This wall is pierced by four gates and strengthened by seven bastions or forts, and a guard-house. Of the gates the Gazereh Gate, opening to the north, and the Shatar Gate, the main entrance to the town, opening to the west, are those most important. The line of defence beyond the wall consists of six outlying forts—namely, Fort Handoub, Fort Shatar, Fort Gemazeh, Fort Foolah, and Quarry Fort. Fort Shatar and Fort Gemazeh, otherwise known as the Right Water Fort and the Left Water Fort, stand about a thousand yards in advance of the Shatar Gate, and the same distance from one another. These are hexagonal structures of masonry two storeys high. The lower storey is merely pierced with loopholes, access to the building being obtained through a doorway in the upper storey, reached by means of a ladder, which can be hauled up at will by the garrison. Round this upper storey runs a projecting wooden gallery, loopholed for rifle-fire, while the flat roof is surrounded by a stone parapet similarly available. Each fort is strengthened with outlying defences, in the shape of stone walls, trenches, earthworks, and zerebas of cut thorn-bush, and is armed with Krupp cannon and machine-guns. Between these two forts extends a broad and solid earthen embankment, six or seven yards in height. This embankment had been built with the view of checking the flow of rain water coming down one of the main ravines leading from the hills inland, but is now utilised for defensive purposes. A redoubt has been thrown up near its centre to help Fort Gemazeh, which has to some extent suffered from the enemy's fire.

THE HYDE PARK-CORNER IMPROVEMENTS.

The new equestrian statue of the great Duke of Wellington, substituted for that which formerly stood on the arch at the top of Constitution-hill, Hyde Park-corner, nearly opposite his residence, Apsley House, was unveiled on Friday, Dec. 21, by the Prince of Wales. The original statue has been removed to the Long Valley at Aldershott. The arch has been re-erected a few yards to the east of its former position, and now forms an entrance to the Green Park. The statue, which is of bronze, the sculptor being Mr. J. E. Boehm, R.A., represents the Duke seated on his famous horse Copenhagen. His left hand holds the reins, and his right hand holds an open telescope, the arm resting full-length by his side. The pedestal rises from a platform, with steps of Aberdeen grey granite, artistically bordered in grey and red granite, surrounding a centre of mosaic. At the four corners stand, rather above life-size, four warriors: at the north-east, the British Grenadier of the early part of this century; at the south-west, the representative of the Scotch, in a soldier of the old 42nd Highlanders, wearing the kilt; at the south-east corner, an Irish Dragoon; and at the south-west, a Welsh Fusilier. All these are in bronze. The statues were cast by Messrs. Moore and Co., of Thames Ditton. The mosaic was furnished by Messrs. Burt and Co., of Wenman-street. The work of the Hyde Park-corner improvement was carried out by Mowlem and Co., from the designs of Mr. John Taylor, of her Majesty's Office of Works.

The rain came down as the crowd stood watching patiently till a cheer announced the coming of the company, and way was made for the guests of the Duke of Wellington, including the Prince of Wales, the Duke of Cambridge (Commander-in-Chief), the Duke of Beaufort, the Duke of Rutland, Earl Granville, Lord Dorchester, Lord De Lisle, Earl Cadogan, Lord Sudeley, Lord Alcester, Lord Magheramorne (representing the Metropolitan Board of Works), Field-Marshal Sir Patrick Grant, Mr. Plunket, M.P. (representing the Office of Works), Colonel the Hon. Charles Lindsay, Sir F. Leighton, Baron Ferdinand De Rothschild, Mr. Shaw-Lefevre, Mr. John Taylor (of the Office of Works), and Mr. Boehm, the sculptor. No addresses were delivered, but when the statue was unveiled, the Prince and the company saluted, and the crowd outside raised a responsive cheer. The statue is in exact line with the centre of Apsley House. Our Illustration is a view of the whole ground, looking eastward to Piccadilly.

THE "TRUTH" DOLL-SHOW.

The eighth annual exhibition of dolls and other children's toys, founded by the proprietor of *Truth*, was opened for two days, in the week before Christmas, at the Portman Rooms, Baker-street. It was a various collection of 23,000 articles, many of them ingenious and beautiful, including 3800 dolls, presented by subscribers to that journal, or purchased with the fund raised by an appeal to its readers. These pretty and amusing playthings, some of considerable artistic merit, filled the large hall formerly occupied by Madame Tussand's waxwork figures; and an immense trophy of toys covered the whole of the end wall, from floor to ceiling, and from door to door, arranged with much taste for the display of masses of colour. Upon the long centre table were ranged the home-made, competitive toys, for which money prizes were given. Conspicuous among these was a cleverly-constructed switch-back railway, with its cars filled with passengers, its staircases for exit and entrance, and its attendants and visitors. The switchback was worked by means of cords. The Palace of Truth was another of the home-made toys, representing a picturesque palatial cottage, covered with varnished fir-cones, and having a pillared porch, and flower-boxes, filled with plants, on the ledges of the windows. In the extensive grounds were a conservatory, with miniature red flower-pots within, a rockery, shrubs, garden-seats, a lake with swans, coach-house, and stable, and a tennis-court already marked for a game. In one home-made toy, entitled "A Corner of a Zoo," were various kinds of animals, and a hundred small dressed dolls, some promenading, others riding in the elephant's howdah and on a camel, and some dressed as bandsmen. Another toy reproduced a ward in a children's hospital, with beds, sick dolls, nurses, and picture-hung walls, interspersed with mottoes, all complete. There were fifty large dolls, exquisitely dressed, and originally costing over half-a-guinea each. The smaller dolls were arranged on six enormous pyramids, about 20 ft. high; a grotesque head formed the apex of each pyramid. The large dolls were arranged upon a capacious table, and some of them are represented in our Artist's Sketches. It would be impossible to describe these wonderful dolls in detail. The dolls and toys, and 10,000 new sixpences have been distributed to children in the London hospitals and workhouses.

NAWAB MAJOR AFSUR JUNG.

When the Ameer Abdurrahman, ruler of Afghanistan, in August last, made an arrangement with Lord Dufferin's Government to receive a British political Mission at Cabul for the purpose of discussing affairs, the British diplomatic agents selected were Mr. H. M. Durand, C.S.I., Secretary to the Foreign Department of the Indian Government; Mr. Mackenzie Wallace, Private Secretary to the Viceroy; and Colonel Chamberlain, the Persian interpreter to the Commander-in-Chief; accompanied by Lieutenant Manners Smith, Military Attaché to the Foreign Office; and Dr. Owen. A native Indian member of this Mission was also appointed, namely, the Nawab Major Afsur Jung, in the service of the Nizam of Hyderabad; but the Mission has for some months been put in abeyance, owing to the Ameer of Afghanistan being engaged in his war against the rebellion headed by Ishak Khan, in the provinces north of the Hindoo Khoosh mountains. In the meantime, Major Afsur Jung joined the recent expedition under command of General M'Queen to put down the hostile tribes of the Black Mountain. He is a keen and brave soldier, and did good service as commander of the

NAWAB MAJOR AFSUR JUNG,
One of the British Mission to Cabul.

Khyberee Rifles, being the first officer belonging to a Native State of India who has ever commanded troops in a British expedition. His photograph has been sent to us by Mr. W. E. Hill, of Hyderabad, in the Deccan; and we present the portrait of Major Afsur Jung as a token of that friendly feeling towards the British Indian Empire which was lately so magnanimously expressed by his Highness the Nizam in offering to contribute to the military expenses of our Government, and which is highly appreciated by its rulers.

The Pope delivered a long allocution on Dec. 24 to the members of the Sacred College, who offered their good wishes for the New Year. The whole world, he said, saw how painful his situation was, for even his own person was exposed to the threats of the mob.

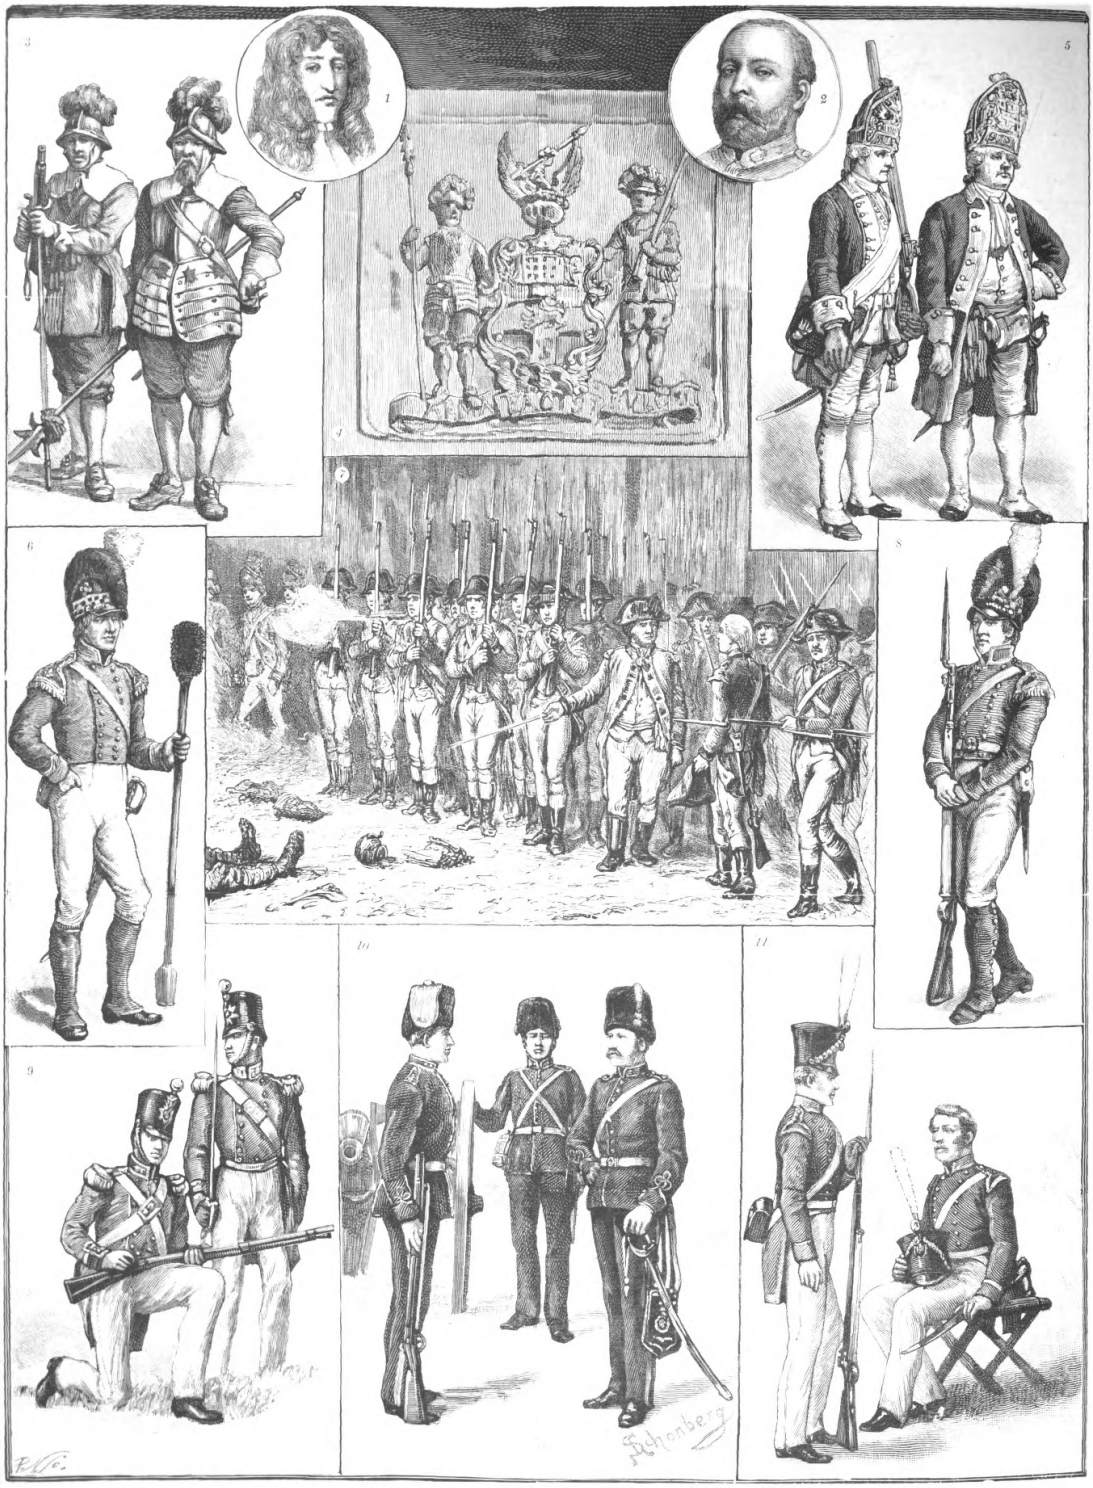
The Italian Chamber has passed a vote approving the international and military policy of the Government, and adopted the Bill authorising the Extraordinary Military Expenses.

The Second Chamber of the Netherlands States-General has passed the colonial section of the Budget by 72 votes to 18, notwithstanding a declaration on the part of the Liberal Party of want of confidence in the Minister for the Colonies.

Intelligence coming apparently direct from Mr. Stanley affords a reasonable hope that he is still in safety. Letters dated Aug. 29 have been brought to Zanzibar from Stanley Falls by Tippoo Tib's men, in which it is stated that news had been received the previous day from Mr. Stanley, who was at Bonalya, on the Aruwhimi. He had left Emin Pasha eighty-two days previously in perfect health and with plenty of food. He himself had returned for his rearguard and intended leaving ten days later, presumably to rejoin Emin. All the white men were in good health. Another report, received from San Thomé, the nearest telegraph station to the mouth of the Congo, states that news, which is considered trustworthy, has been received of the arrival of the explorer and Emin Pasha at the Aruwhimi.

The Canadian Supreme Court at Ottawa, in the Canadian Pacific Railway crossing dispute, have decided unanimously that the province of Manitoba had a right to charter the Portage Extension of the Red River Valley Railroad, including the right to cross the Pembina branch of the Canadian Pacific Railway free of all Dominion control save as to the plans of the crossing. This upholds Manitoba in her view of the subject. Much rejoicing is reported at Winnipeg.

The religious celebration on Christmas Day in London was remarkable for the large number of early services which were held, and in many churches the service was repeated at every hour up to noon. Generally the midday service was choral throughout. The congregations at St. Paul's, Westminster Abbey, and the principal London churches were unusually large.—The Queen's Christmas alms were distributed at the Royal Almonry, in Craig's-court, to over one thousand poor persons. The metropolitan and other garrisons throughout the country celebrated Christmas with the usual festivities. At all the hospitals and asylums under the control of the Asylums Board special entertainments were given to the inmates. In the hospitals and workhouses of the metropolis similar provisions were made, and in various districts of London good dinners were given to large numbers of the destitute poor, old and young.



THE HONOURABLE ARTILLERY COMPANY.

The peremptory and sudden action of the War Office, on Tuesday, Dec. 18, in depriving the Honourable Artillery Company, without previous notice, of the field-battery of guns, and of the rifles and bayonets for the infantry battalion, simultaneously with the Prince of Wales resigning his commission as Captain-General and Colonel, and the Duke of Portland that of Lieutenant-Colonel, excited feelings of alarm and profound regret. It was supposed to be a prelude to the withdrawal of the Royal Warrant constituting the Honourable Artillery Company a regiment, and to its entire suppression and disbandment. The disarmament of the company, effected in such an unceremonious manner, and apparently without any just cause, was felt to be a harsh proceeding. No one, however, could for a moment doubt that the Prince of Wales had acted under a misapprehension of the circumstances, in allowing his resignation of an office which he has held for twenty-five years, to be announced with those of the Duke of Portland and of Lieutenant-Colonel C. J. Borton, late Adjutant of the company. It is only a few weeks since a special General Court of the members—on the recommendation of the Captain-General (the Prince of Wales), and on the advice of the Duke of Cambridge, Lord Wolseley, and Mr. Stanhope, Secretary of State for War—resolved that the regiment formed from the ancient company should voluntarily make itself subject to the Act of Parliament under which all ordinary Volunteer corps are enrolled. It became evident, however, that the settlement of the company as a Volunteer corps, but one possessed of property—which, in a Volunteer corps, would vest in the commanding officer—must require special arrangements. At the annual General Court held more recently it was apparent that the members would hesitate to agree unreservedly to complete the resolution previously adopted, unless there were further guarantees that the right of controlling the property and the preservation of the old privileges of seniority over all Militia, Yeomanry, and other Volunteer corps were maintained. A resolution was then passed which, reiterating the willingness of the company to become a Volunteer corps, stated that, in order to preserve the company as a distinct and separate body, it would be most satisfactory to the members if the Parliamentary powers necessary were obtained under a separate Act, other than the Volunteer Act. The company were ready to accept the provisions of the National Defence Act, under which they would be liable to be called out for service whenever the Militia was embodied. The court, however, rejected a motion which proposed to place at the disposal of the commanding officer (the Duke of Portland) the sum of £500 for military purposes, pending the proposed alterations. The court also deferred voting other sums of money for military purposes while awaiting further information; and it is this action of the court which has led to the extreme measures taken by the War Office. We trust, however, that the conferences now in progress between the Secretary of State for War and a deputation from the Court of Assistants of the company will result in an amicable settlement; and that the military organisation of the company will be restored and improved. The deputation is composed of Major Mainwaring Jones, the senior officer; Major Raikes, Major Durrant, Captain Nunn, Captain Pash, and Captain Fry. It may be remarked that the company, apart from military discipline, holds a tolerably independent position. Whatever may be the fate of the Royal Warrant under which the company has borne arms—and which was granted by the Queen at the time the late Prince Consort was Captain-General—the general impression is that the company may still go on as a civil corporation under its charter granted by Henry VIII., and by its authority may hold the properties whose revenues it has hitherto enjoyed.

The historical character of the Honourable Artillery Company, even if there were an end of its military usefulness as part of the Auxiliary Forces, gives it an interest equal to that of other City Companies, which were connected with trades now obsolete, but which are allowed to retain their charters and corporate property. From this point of view, our Illustrations of the different uniforms worn by its members in past ages, the ancient arms of the company, and the portrait of Prince Rupert, who was its Captain-General in the reign of Charles I., show the antiquity of the institution; and the scene copied from an old engraving, in which its troops appear under the orders of Alderman Barnard Turner, the Sheriff of London, putting down the Gordon Rioters of 1780, proves that this company has rendered good service, upon occasion, to the cause of law and order. Its foundation, dating from the reign of Henry VIII., is much more ancient than that of any corps of the regular Army, though it was formed somewhat later than the Royal Yeomen of the Guards and the Gentlemen-at-Arms of the King's Household. Having been suppressed during the Commonwealth, it was revived under Charles II., when its Captain-General and Colonel was James, Duke of York, afterwards King James II. The honorary command was subsequently held by King William III.; George, Prince of Denmark, the Consort of Queen Anne; George, Prince of Wales, afterwards King George II.; George, Prince of Wales, afterwards Prince Regent and King George IV.; King William IV.; the Duke of Sussex; Albert, the late Prince Consort; and his son, the Prince of Wales, who will, it is to be hoped, resume it, as all members of this loyal company desire. The corporate affairs of the company are managed by its Court of Assistants, of which the president is Lord Colville of Culross, a former officer of the regiment; they are elected annually, and admit new members to the company by ballot, who pay an entrance fee and an annual subscription. Every Londoner knows the Armoury, in Moorfields, now City-road, near Finsbury-square, which is the head-quarters of the Honourable Artillery Company—a substantial and dignified building, which contains large and handsome rooms, adorned with portraits and military trophies, and to which a parade-ground of six acres and a spacious winter drill-room are attached. The regiment consists of a troop of light cavalry, an artillery division (both field and horse artillery), and a battalion of infantry mustering six companies, who practise rifle-shooting at their range in the Lea marshes near Tottenham. The cavalry and artillery wear a blue uniform, with scarlet facings; the infantry wear a scarlet tunic, with a bearskin cap, somewhat resembling the Grenadier Guards. The officers of the regiment, below the Captain-General and Colonel and the Lieutenant-Colonel, are usually an Adjutant, two Majors, seven or eight Captains, about twenty Lieutenants, a Quartermaster, an Inspector of Musketry, Surgeons, and a Chaplain. We earnestly hope that the regimental organisation may be preserved. It is well just now to remember that at Boston, in the United States, an American branch of the Honourable Artillery Company, founded in the British Colony of Massachusetts in 1638, is still flourishing; and that the Prince of Wales, following the example of his father, has accepted the honorary membership of that American Honourable Artillery Company, some of whose members have visited England. They would be sorry to hear that the London company had lost any portion of Royal favour.

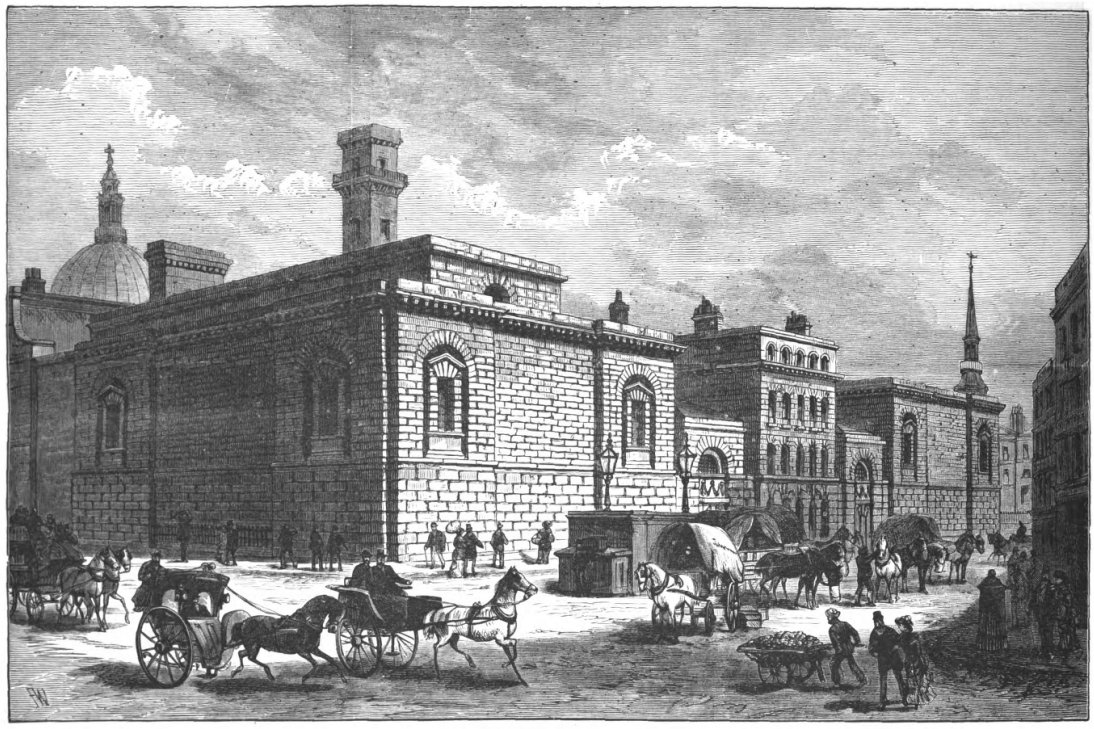
SKETCHES OF THE HONOURABLE ARTILLERY COMPANY.



CHRISTMAS GREETINGS AT SEA.

DRAWN BY JULIUS M. PRICE.

NEWGATE PRISON.

The demolition of this building, too famous in the gloomiest chapters of our social history, may be shortly expected. In presenting a view of its well-known front and a plan of the interior, with some Illustrations of different apartments, a few remarks on the history of Newgate will seem appropriate. So far back as the reign of King John, there was a prison here, maintained by the Corporation of the City of London, who had also the Compter, in the Poultry, for the detention of minor offenders, and who, at a much later period, used Bridewell, near Blackfriars, for the punishment of disorderly apprentices and women. The ancient prison at Newgate was destroyed by the Great Fire of London, in 1666; another prison was then erected, which was that out of which Jack Sheppard, the notorious housebreaker, contrived to make his escape in the reign of George II. This building was pulled down in 1772; and the one now standing was erected, in different portions, between that date and 1782, the architect being Mr. George Dance, R.A.; but one part was burnt down, almost as soon as it was built, in the Gordon riots of 1780. The outer walls of granite are three feet thick: the front in Newgate-street is 115 ft. long, and that in the Old Bailey is 295 ft., with a stern, imposing aspect. There are two lodges for turnkeys, and the Keeper's house in the centre of the Old Bailey front; behind which is the chapel. The interior of the prison was re-arranged, in 1857 and 1858, from the designs of Mr. Bunning, the City Architect. The quadrangle, occupied by men convicted of felony, is 124 ft. by 46 ft., and each of the two wings forms another quadrangle; the position of the wards, and of the corridors and galleries to which the cells open, is shown in our plan. There are 168 ordinary cells, each measuring 13 ft. by 7 ft., and 9 ft. high, with a barred window 3 ft. 6 in. high and 2 ft. 6 in. wide; the cells were warmed by hot air; and the furniture was a hammock-bed, slung at night across the width of the cell, a wash-stand with basin, a close-pan, a folding table fixed to the wall, a stool, and shelves of slate. Besides these, there are eight punishment-cells for the refractory, and sixteen reception-cells. The prison is calculated only for the accommodation of 123 male and 45 female prisoners, on the separate system; which is a small number for the extent of the buildings. In former times, before the separate system was introduced, Newgate was horribly overcrowded, and its condition excited the strong disapproval of John Howard. There was no classification of the inmates; criminals and debtors, the old and the young, convicts and those awaiting trial, were confined together; some who had money could bribe the warders, buy liquor, and indulge in drunkenness and gambling; the free conversation, with profane songs and tales of vice, was most corrupting. At one time, nearly 800 persons, of both sexes and all ages, were huddled up in Newgate; and a contagious fever broke out which caused many deaths. Mrs. Fry's benevolent labours were begun among the female prisoners here, of whom there were 150 at that period. By the removal of the debtors to Giltspur-street Compter, some of the grosser disorders were checked; but the place was found unsuitable for any proper course of prison discipline. It was therefore resolved, in 1818, to use it only for the safe custody of prisoners committed for trial; and the House of Correction in Coldbath-fields, and that at Holloway, were erected for penal establishments in which those undergoing their sentence are confined. Newgate, however, still remained in an unsatisfactory state, and the reports of the Government Inspectors of Prisons, from 1836 to 1843, repeatedly urged the need of its alteration. There can be no doubt that the City Lands Committee of the London Corporation have acted judiciously in proposing to demolish the building, which is ill-adapted for its purpose and is not now required, and to make a profitable use of its site. The old associations of Newgate are dismal and detestable; many Londoners can remember seeing murderers hanged over the gateway in the open street, before the Act of Parliament in 1868 which provided that executions should be privately performed within the prison. Five or six persons at the same time were occasionally hanged there, in the "good old days" of the reign of George III. Our Illustrations of Newgate include that of the "condemned cell," for the wretch awaiting his doom on the gallows, and that of the paved passage, where the bodies of men hanged were interred in quicklime under the pavement. The flogging block will also be noticed; its structure combines the pillory with the stocks, as the legs of the patient are secured in two holes of the closed lid of a wooden chest, while his hands are fastened in a frame to which his face is turned; and in this posture, when his bare back feels the nine-lashed scourge, or the birch rod if he is a boy, there is no chance but to endure it as best he may.

NEWGATE PRISON, ABOUT TO BE DEMOLISHED.

MUSIC.

As usual at this period, musical activity in London is intermitted during the prevalence of Christmas festivities; these exercising a predominant claim on public attention for a while. The latest important performance was that of "The Messiah" at the Albert Hall, announced for Dec. 26, under the direction of Mr. William Carter, with the co-operation of his well-trained choir, and eminent solo vocalists.

The musical aspect of 1889 will be promptly inaugurated, on Jan. 1, by a grand performance of "The Messiah" by the Royal Choral Society, conducted by Mr. Barnby. This will be soon followed by the resumption of Mr. John Boosey's London Ballad Concerts, the twenty-third season of which will be resumed, at St. James's Hall, with an afternoon performance on Jan. 5. Among the other principal forthcoming events of the month will be the resumption of the Monday Popular Concerts at St. James's Hall on Jan. 7, and the Saturday afternoon performances associated therewith on Jan. 12; the third of the Patti concerts at the Albert Hall on Jan. 8; the continuance of the season of Mr. Henschel's London Symphony Concerts at St. James's Hall, with the fifth evening performance of the series on Jan. 15; the second of the vocal and pianoforte recitals of Herr Heinrich and M. Moor at Steinway Hall on Jan. 16; the production of M. Benoit's oratorio, "Lucifer," by the Royal Choral Society at the Royal Albert Hall on the same date; the third of the Novello Oratorio Concerts at St. James's Hall on Jan. 23; and the usual Burns' birthday celebrations, on Jan. 25, by Scotch concerts at the Royal Albert Hall and St. James's Hall. Subsequent events must be referred to in the order of their occurrence.

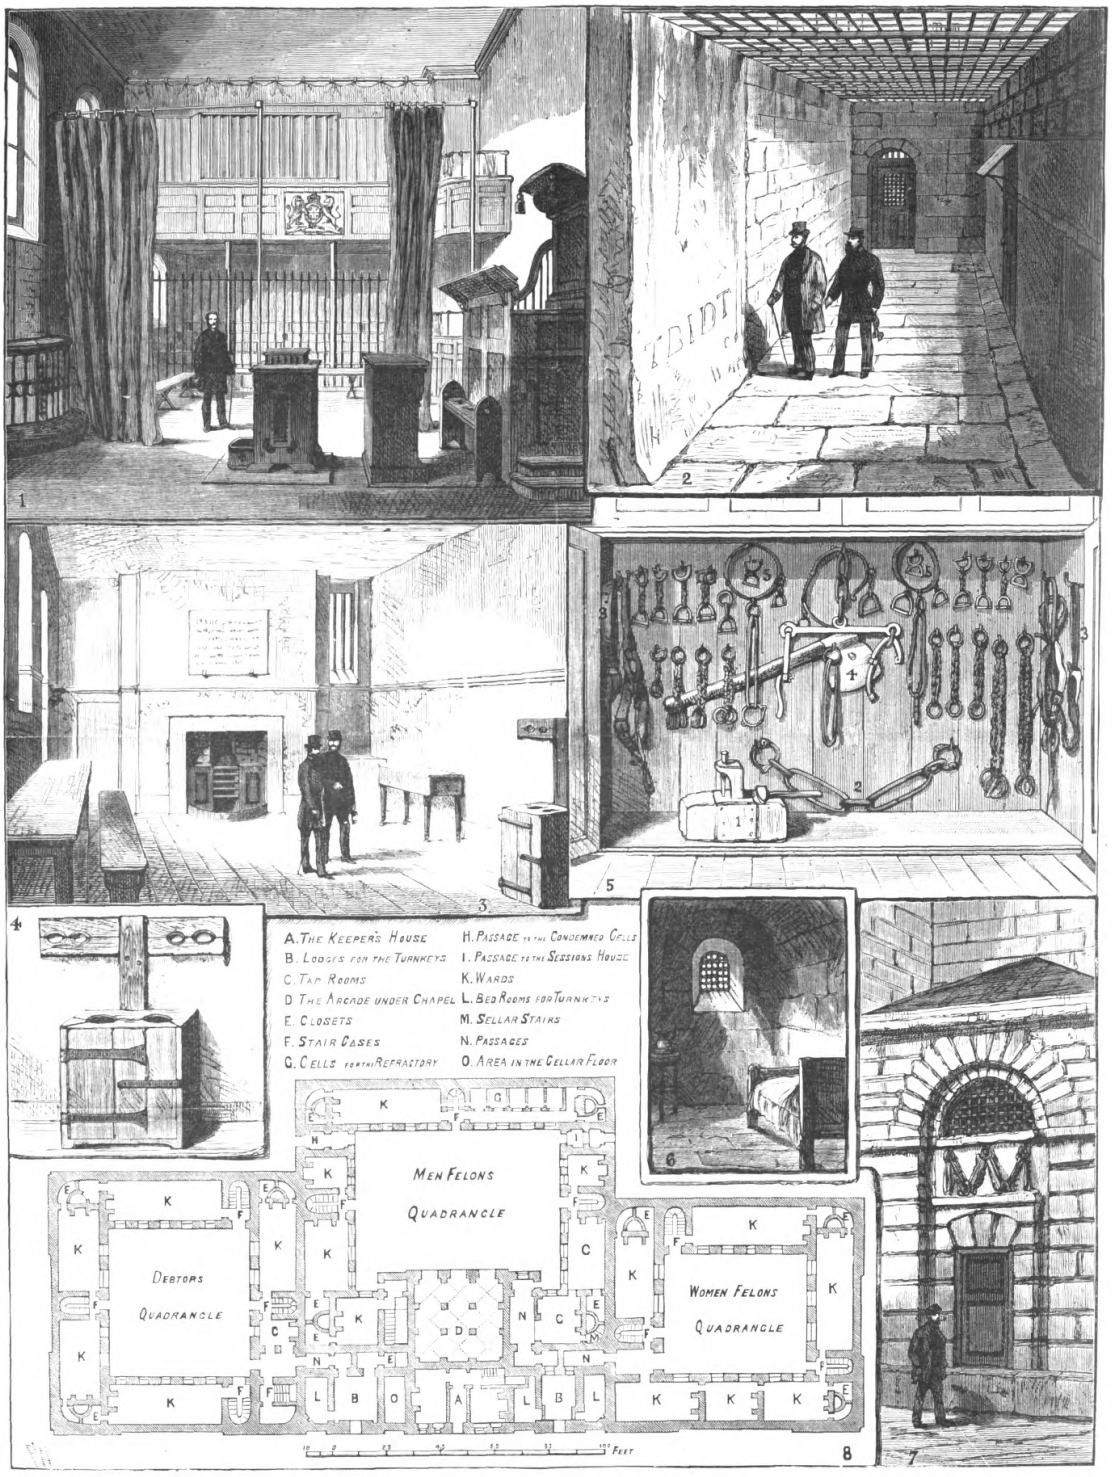
The Sacred Harmonic Society—it is stated—is now extinct, the winding-up of the institution having been determined on.

MUSICAL PUBLICATIONS.

Volume I. of Ricordi's cheap edition of dance music contains a series of pieces of this class by various composers, in the forms of the waltz, galop, mazurka, and polka, all bright and tuneful, and forming a liberal shilling's-worth that will be welcome in many drawing-room circles.

Metzler's "Red Album" is a collection of vocal and instrumental pieces issued (by the well-known firm of music publishers) in shilling parts, well engraved and printed, folio-size. The parts recently published contain, respectively, songs by popular composers, six pieces for violin and piano by various hands, and eight compositions for pianoforte solo. The pleasing character of the music generally, and its freedom from excessive difficulty, should ensure the publications a wide acceptance among amateur vocalists and instrumentalists. Messrs. Metzler and Co. also publish a set of eight original compositions by Mr. H. M. Higgs, for violin and piano, each bearing a distinctive characteristic title, which is well realised in the music. The pieces are well written for the display of each instrument, both in alternate prominence and in combination, and are within the powers of moderately skilled amateurs.

The popularity of Sir Arthur Sullivan's music associated with Mr. W. S. Gilbert's "The Yeomen of the Guard" naturally leads to the adaptation of some of its principal themes for use in the ball-room. This has been skilfully done by Mr. P. Bucalossi, in the shape of quadrilles and waltzes that will be largely welcomed for their tuneful sprightliness. Messrs. Chappell are the publishers.



"Twelve Lyrics," by Mr. A. Goring Thomas, are settings of characteristic verses by Harold Boulton, each number bearing a distinctive title which is well realised. Two of the pieces, "Contentment" and "Sunset," are duets; others—"The Viking's Daughter," "The Heart's Fancies," "Voices of Spring," "Under thy Window," "A River Dream," "A Love Lullaby," "The Willow," "A Song of Sunshine," and "The Countryman's Love-Song"—being for a single voice. No. 4, "Time's Garden," is enhanced by a violoncello accompaniment in addition to that for the pianoforte. The music has that melodious flow and expressive grace which distinguish all Mr. Goring Thomas's productions, whether for the stage or the chamber. Messrs. J. B. Cramer and Co. are the publishers.

"Bonny Kilmeny" is the title of a cantata composed by Hamish MacCunn to words partly adapted from Hogg's "Queen's Wake." The young Scottish composer has recently gained great and deserved distinction by several works, choral and orchestral, in which a distinctive character is strongly apparent; giving promise of much important work to come from the same source. The cantata now referred to is composed for solo voices (soprano, tenor, and baritone), chorus, and orchestra, and is divided into two parts, each comprising several pieces, choral and solo; in all of which there is much imaginative and interesting writing. The publication of the work with an arranged pianoforte accompaniment brings it within the scope of drawing-room performance, for which it is eminently suited, there being no formidable difficulties to be encountered. Messrs. Paterson and Sons (of Edinburgh) are the publishers, from whom also we have several songs by the same composer. "To Julia, Weeping," "I'll tend thy bower," "The Ash-Tree," "At the mid hour of night," and "I will think of thee, my love" are all far above the average of songs of the day. Without any straining after originality, there is a distinctive character in Mr. MacCunn's songs which should recommend them to a large circle of vocalists, especially as they offer little, if any, difficulty.

"Listening Angels," a song by Theresa Beney (Messrs. Morley and Co.), is a very expressive setting of serious words by Adelaide Proctor. The melody is simple without being commonplace, and the effect may be heightened by the use of an additional accompaniment for the harmonium or organ. If we mistake not, we have previously noticed a very graceful "Minuetto" for the pianoforte by the same lady composer—published by Weekes and Co.

"Songs of the Seasons," and "Song-Fancies" are the titles of cantatas for children; the first composed by Ethel Harraden, the other by Atherley Rush. Each is well adapted for its purpose—to interest very young people, both by the music (which is bright and tuneful) and the verses which it illustrates. Messrs. Forsyth Brothers are the publishers of both cantatas.

Viscount Cross on Dec. 19 presented the Queen's prizes and certificates to the successful students in the Metropolitan Drawing Classes connected with the Science and Art Department and City Guilds. He urged the importance of technical education, which he regarded as of vital interest to the nation.

1. The Chapel (looking South).
2. The "Bird-Cage Walk": the Murderers are buried under the flooring, and on the left is a piece of the old Roman Wall.
3. The Flogging Ward (looking North).

5. The Chain Cupboard: inside are—1. The Anvil for working out Rivets. 2. Chains from which Jack Sheppard freed himself. 3. Pinions. 4. Axe, formerly carried before Prisoners at Executions, another version being that it was made for the Cato-street Conspirators but not used. 5. Old Irons. The rest are modern and in use.
6. The Condemned Cell.
7. Gateway over which the Scaffold was erected for Executions.
8. Ground Plan.

NEWGATE PRISON, INTERIOR VIEWS AND PLAN.

FOR FAITH AND FREEDOM.*

BY WALTER BESANT,

AUTHOR OF "DOROTHY FORSTER," "CHILDREN OF GIBEON," "THE REVOLT OF MAN," "KATHARINE REGINA," ETC.

CHAPTER I.

THE GREAT LORD CHANCELLOR.

Rut the Prince of Orange had already landed.

We learned this news next day, and you may be sure that we were in the saddle again and riding to Exeter, there to join his standard.

This we did with the full consent of Madam and of Alice. Much as we had suffered already, they would not deter us, because this thing would have been approved by Sir Christopher and Dr. Eykin. Therefore we went. As all the world knows, this expedition was successful. Yet was not Barnaby made an Admiral, nor was I made a Court physician; we got, in fact, no reward at all, except that for Barnaby was procured a full pardon on account of the homicide of his late master.

My second campaign, as everybody knows, was bloodless. To begin with, we had an army, not of raw country lads armed indifferently and untrained, but of veteran troops, fifteen thousand strong, all well equipped, and with the best General in Europe at their head. At first, indeed, such was the dread in men's minds caused by Lord Jeffreys' cruelties, few came in; yet, this was presently made up by what followed, when, without any fighting at all, the King's regiments melted away, his priests fled, and his friends deserted him. This was a very different business from that other, when we followed one whom I now know to have been a mere tinsel pretender, no better fitted to be a King than a vagabond actor at a fair is fit to be a Lord. Alas! what blood was wasted in that mad attempt!—of which I was myself one of the most eager promoters. I was then young, and I believed all that I was told by the conspirators in Holland; I took their list of well-wishers for insurgents already armed and waiting only for a signal: I thought the roll of noble names set down for sturdy Protestants as that of men already pledged to the Cause; I believed that the whole nation would rise at the first opportunity to turn out the priests; I even believed in the legitimacy of the Duke, and that against the express statement of his father (if King Charles was in reality his father), and I believed what they told me of his princely virtues, his knowledge of the art of war, and his heroic valour. I say that I believed all these things and that I became a willing and zealous tool in their hands. As for what those who planned the expedition believed, I know not; nor will anyone now ever learn what promises were made to the Duke, what were broken, and why he was, from the outset, save for a few days at Taunton, so dejected and disappointed. As for me, I shall always believe that the unhappy man—unwise and soft-hearted—was betrayed by those whom he trusted.

It is now an old tale, though King Monmouth will not speedily be forgotten in the West Country, nor will the memory of the Bloody Assize. The brave lads who followed him are dead and buried; some in unhonoured graves hard by the place where they were hanged, some under the burning sun of the West Indies: the Duke himself hath long since paid the penalty of his rash attempt. All is over and ended, except the memory of it.

It is now common history, known to everybody, how the Prince of Orange lingered in the West Country, his army inactive, as if he knew (doubtless he was well informed upon this particular) that the longer he remained idle the more likely was the King's Cause to fall to pieces. There are some who think that if King James had risked an action he could not but have gained, whatsoever its event—I mean that, the blood of his soldiers once roused, they would have remained steadfast to him, and would have fought for him. But this he dared not to risk; wherefore the Prince did nothing, while the King's regiments fell to pieces and his friends deserted him. It was in December when the Prince came to Windsor, and I with him, once more Chyrurgeon in a mixed army. While there I rode to London—partly with the intention of judging for myself as to the temper of this people; partly because, after so long an absence, I wished once more to visit a place where there are books and pictures; and partly because there were certain notes and herbs which I desired to communicate to the College of Physicians in Warwick-lane. It happened to be the very day when the King's first flight—that, namely, when he was taken in the Isle of Sheppey—became known. The streets in the City of London I found crowded with people hurrying to and fro, running in bands and companies, shouting and crying, as if in the presence of some great and imminent danger. It was reported and currently believed that the disbanded Irish soldiers had begun to massacre the Protestants. There was no truth at all in the report; but yet the bells were ringing from all the towers, the crowds were exhorting each other to tear down and destroy the Romish chapels, to hunt for and to hang the priests, and especially Jesuits (I know not whether they found any), and to shout for the Prince of Orange. I stood aside to let the crowds (thus religiously disposed) run past, but there seemed no end to them. Presently, however (this was in front of the new Royal Exchange), there drew near another kind of crowd. There marched six or eight sturdy fellows bearing stout cudgels and haling along a prisoner. Round them there ran, shrieking, hooting, and cursing, a mob of a hundred men and more; they continually made attacks upon the guard, fighting them with sticks and fists; but they were always thrust back. I thought at first that they had caught some poor, wretched priest whom they desired to murder. But it proved to be a prize worth many priests. As they drew nearer, I discerned the prisoner. He was dressed in the garb of a common sailor, with short petticoats (which they call slops), and a jacket; his cap had been torn off, leaving the bare skull, which showed that he was no sailor, because common sailors do not wear wigs: blood was flowing down his cheek from a fresh wound; his eyes rolled hither and thither in an extremity of terror; I could not hear what he said, for the shouting of those around him, but his lips moved, and I think he was praying his guards to close in and protect him. Never, surely was seen a more terror-stricken creature.

I knew his face. Once seen (I had seen it once) it could never be forgotten. The red and bloated cheeks, which even his fear could not make pale; the eyes, more terrible than have been given to any other human creature: these I could not forget—in dreams I see them still. I saw that face at Exeter, when the cruel Judge exulted over our misery and rejoiced over the sentence which he pronounced. Yea, he laughed when he told us how we should swing, but not till we were dead, and then the knife—delivering his sentence so that no single point of its horror should be lost to us. Yes; it was the face of Judge Jeffreys—none other—this abject wretch was that great Judge. Why, when we went back to our prison there were some who cast themselves upon the ground and for terror of what was to come fell into mere *dementia*. And now I saw him thus humbled, thus disgraced, thus threatened, thus in the last extremity and agony of terror.

They had discovered him, thus disguised and in hiding, at a tavern in Wapping, and were dragging him to the presence of the Lord Mayor. It is a long distance from Wapping to Guildhall, and they went but slowly, because they were beset and surrounded by these wolves who howled to have his blood. And all the way he shrieked and trembled for fear!

Sure and certain is the vengeance of the Lord!

This Haman, this unjust Judge, was thus suffering, at the hands of the savage mob, pangs far worse than those endured by the poor rustics whom he had delivered to the executioner. I say worse, because I have not only read, but have myself proved, that the rich and the learned—those, that is, who live luxuriously and those who have power to imagine and to feel beforehand—do suffer far more in disease than the common ignorant folk. The scholar dies of terror before ever he feels the surgeon's knife, while the rustic bares his limb, insensible and callous, however deep the cut or keen the pain. I make no doubt, therefore, that the great Lord Chancellor, while they haled him all the way from Wapping to Guildhall, suffered as much as fifty ploughboys flogged at the cart-tail.

Many thousands there were who desired revenge upon him—I know not what revenge would satisfy the implacable; because revenge can do no more than kill the body; but his worst enemy should be satisfied with this, his dreadful fate. Even Barnaby, who was sad because he could get no revenge on his own account (he wanted a bloody battle, with the rout of the King's armies and the pursuit of a flying enemy, such as had happened at Sedgemoor) was satisfied with the justice which was done to that miserable man. It is wonderful that he was not killed amidst so many threatening cudgels; but his guards prevented that, not from any love they bare him; but quite the contrary (more unforgiving faces one never saw); for they intended to hand him over to the Lord Mayor, and that he should be tried for all his cruelties and treacheries, and, perhaps, experience himself that punishment of hanging and disembowelling, which he had inflicted on so many ignorant and misled men.

How he was committed to the Tower, where he shortly died in the greatest torture of body as well as mind, everybody knows.

CHAPTER LI.

THE CONFESSION.

Now am I come to the last event of this history, and I have to write down the confession of my own share in that event. For the others—for Alice and for Robin—the thing must be considered as the crown and completion of all the mercies. For me—what is it? But you shall hear. When the secrets of all hearts are laid open—then will Alice hear it also: what she will then say, or what think, I know not. It was done for her sake—for her happiness have I laid this guilt upon my soul. Nay, when the voice of conscience doth exhort me to repent, and to confess my sin, then there still ariseth within my soul, as it were the strain of a joyful hymn, a song of gratitude that I was enabled to return her to freedom and the arms of the man she loved. If any learned Doctor of Divinity, or any versed in that science which the Romanists love (they call it casuistry) should happen to read this chapter of confession, I pray that they consider my case, even though it will then be useless as far as I myself am concerned, seeing that I shall be gone before a Judge Who will, I hope (even though my earthly affections do not suffer me to separate my sin from the consequences which followed), be more merciful than I have deserved.

While, then, I stood watching this signal example of God's wrath, I was plucked gently by the sleeve, and, turning, saw one whose countenance I knew not. He was dressed as a lawyer, but his gown was ragged and his bands yellow; he looked sunk in poverty; and his face was inflamed with those signs which proclaim aloud the habit of immoderate drinking.

"Sir," he said, "if I mistake not, you are Dr. Humphrey Challis?"

"The same, Sir; at your service," I replied, with some misgivings. And yet, being one of the Prince's following, there needed none.

"I have seen you, Sir, in the chambers of your cousin, Mr. Benjamin Boscorel, my brother learned in the law. We drank together, though (I remember) you still passed the bottle. It is now four or five years ago. I wonder not that you have forgotten me. We change quickly, we who are the jolly companions of the bottle; we drink our noses red, and we paint our cheeks purple; nay, we drink ourselves out of our last guinea, and out of our very apparel. What then, Sir? A short life and a merry. Sir, yonder is a sorry sight. The first Law Officer of the Crown thus to be haled along the streets by a howling mob. Ought such a thing to be suffered? 'Tis a sad and sorry sight, I say!"

"Sir," I replied hotly, "ought such villains as Judge Jeffreys to be suffered to live?"

He considered a little, as one who is astonished and desires to collect his thoughts. Perhaps he had already taken more than a morning draught.

"I remember now," he said. "My memory is not so good as it was. We drink that away as well. Yes, I remember—I crave your forgiveness, Doctor. You were yourself engaged with Monmouth. Your cousin told me as much. Naturally, you love not this good Judge, who yet did nothing but what the King, his master, ordered him to do. I, Sir, have often had the honour of sitting over a bottle with his Lordship. When his infirmities allowed (though not yet old, he is grievously afflicted) he had no equal for a song or a jest, and would drink so long as any were left to keep him company. Ha! they have knocked him down—now they will kill him. No; he is again upon his feet; those who protect him close in. So—they have passed out of our sight. Doctor, shall we crack a flask together? I have no money, unhappily; but I will with pleasure drink at your expense."

I remembered the man's face now, but not his name. 'Twas one of Ben's boon companions. Well; if hard drinking brings men so speedily to rags and poverty, even though it be a merry life (which I doubt), *give me moderation.*

"Pray, Sir," I said coldly, "to have me excused. I am no drinker."

"Then, Doctor, you will perhaps lend me, until we meet again, a single guinea?"

I foolishly complied with this request.

"Doctor, I thank you," he said. "Will you now come and drink with me at my expense? Sir, I say plainly, you do not well to refuse a friendly glass. I could tell you many things, if you would but drink with me, concerning my Lord Jeffreys. There are things which would make you laugh. Come, Doctor; I love not to drink alone. Your cousin, now, was alway ready to drink with any man, until he fell ill"——

"How? is my cousin ill?"

"Assuredly; he is sick unto death. Yesterday I went to visit him, thinking to drink a glass with him, and perhaps to borrow a guinea or two, but found him in bed and raving. If you will drink with me, Doctor, I can tell you many curious things about your cousin. And now I remember, you were sent to the Plantations; your cousin told me so. You have returned before your time. Well, the King hath run away; you are, doubtless, safe. Your cousin hath gotten his grandfather's estate. Lord Jeffreys, who loved him mightily, procured that grant for him. When your cousin wakes at night he swears that he sees his grandfather by his bedside looking at him reproachfully, so that he drinks the harder; 'tis a merry life. He hath also married a wife, and she ran away from him at the church door, and he now cannot hear of her or find her anywhere, so that he curses her and drinks the harder. Oh! 'tis always the jolliest *dog*. They say that he is not the lawyer that he was, and that his clients are leaving him. All mine have left me long since. Come and drink with me, Doctor."

I broke away from the poor toper who had drunk up his wits as well as his money, and hurried to my cousin's chambers, into which I had not thought to enter save as one who brings reproaches—a useless burden.

Benjamin was lying in bed: an old crone sat by the fire, nodding. Beside her was a bottle, and she was, I found, half drunk. Her I quickly sent about her business. No one else had been attending him. Yet he was laid low, as I presently discovered, with that kind of fever which is bred in the villainous air of our prisons—the same fever which had carried off his grandfather.

Perhaps, if there were no foul and stinking wards, jails, and clinks, this kind of fever would be banished altogether, and be no more seen. So, if we could discover the origin and cause of all diseases, we might once more restore man to his primitive condition, which I take to have been one free from any kind of disease or infirmity, designed at first by his Creator so to live for ever, and, after the Fall, enabled (when medicine hath so far advanced) to die of old age after such prolongation of life and strength as yet we cannot even understand.

"Cousin," I said, "I am sorry to find thee lying in this condition."

"Ay," he replied, in a voice weak and low, not like his old blustering tones. "Curse me and upbraid me, if thou wilt. How art thou come hither? Is it the ghost of Humphrey? Art thou dead like my grandfather? Are we on the Plantations of Barbados?"

"Indeed, I am no ghost, Benjamin. As for curses, I have none; and as for reproaches, I leave them to thy conscience."

"Humphrey, I am sore afflicted. I am now so low that I cannot even sit upright in my bed. But thou art a doctor—thou wilt bring me back to health. I am already better only for seeing thee here."

I declare that as yet I had no thought, no thought at all, of what I was to do. I was but a physician in presence of a sick man, and therefore bound to help him if I could.

I asked him first certain questions, as physicians use, concerning his disorder and its symptoms. I learned that after attending at the Court, he was attacked by fits of shivering and of great heat, being hot and cold alternately, and that in order to expel the fever he had sat drinking the whole evening—a most dangerous thing to do. Next, that in the morning, he had been unable to rise from his bed, and, being thirsty, had drunk more wine—a thing enough of itself to kill a man in such a fever. Then he lost his head, and could tell me no more what had happened until he saw me standing by his bedside. In short, he had been in delirium and was now in a lucid interval, out of which he would presently fall a-wandering again, and perhaps, raving, and so another lucid interval, after which he would die unless something could be done for him.

I liked not his appearance nor the account which he gave me, nor did I like his pulse or the strange look in his eyes—death doth often show his coming by such a prophetic terror of the eyes.

"Humphrey," he said pitifully. "It was no fault of mine that thou wast sent to the Plantations."

"That I know full well, Cousin," I answered him. "Be easy on that score."

"And as for Alice," he went on. "All is fair in love."

I made no reply, because at this point a great temptation assailed my soul.

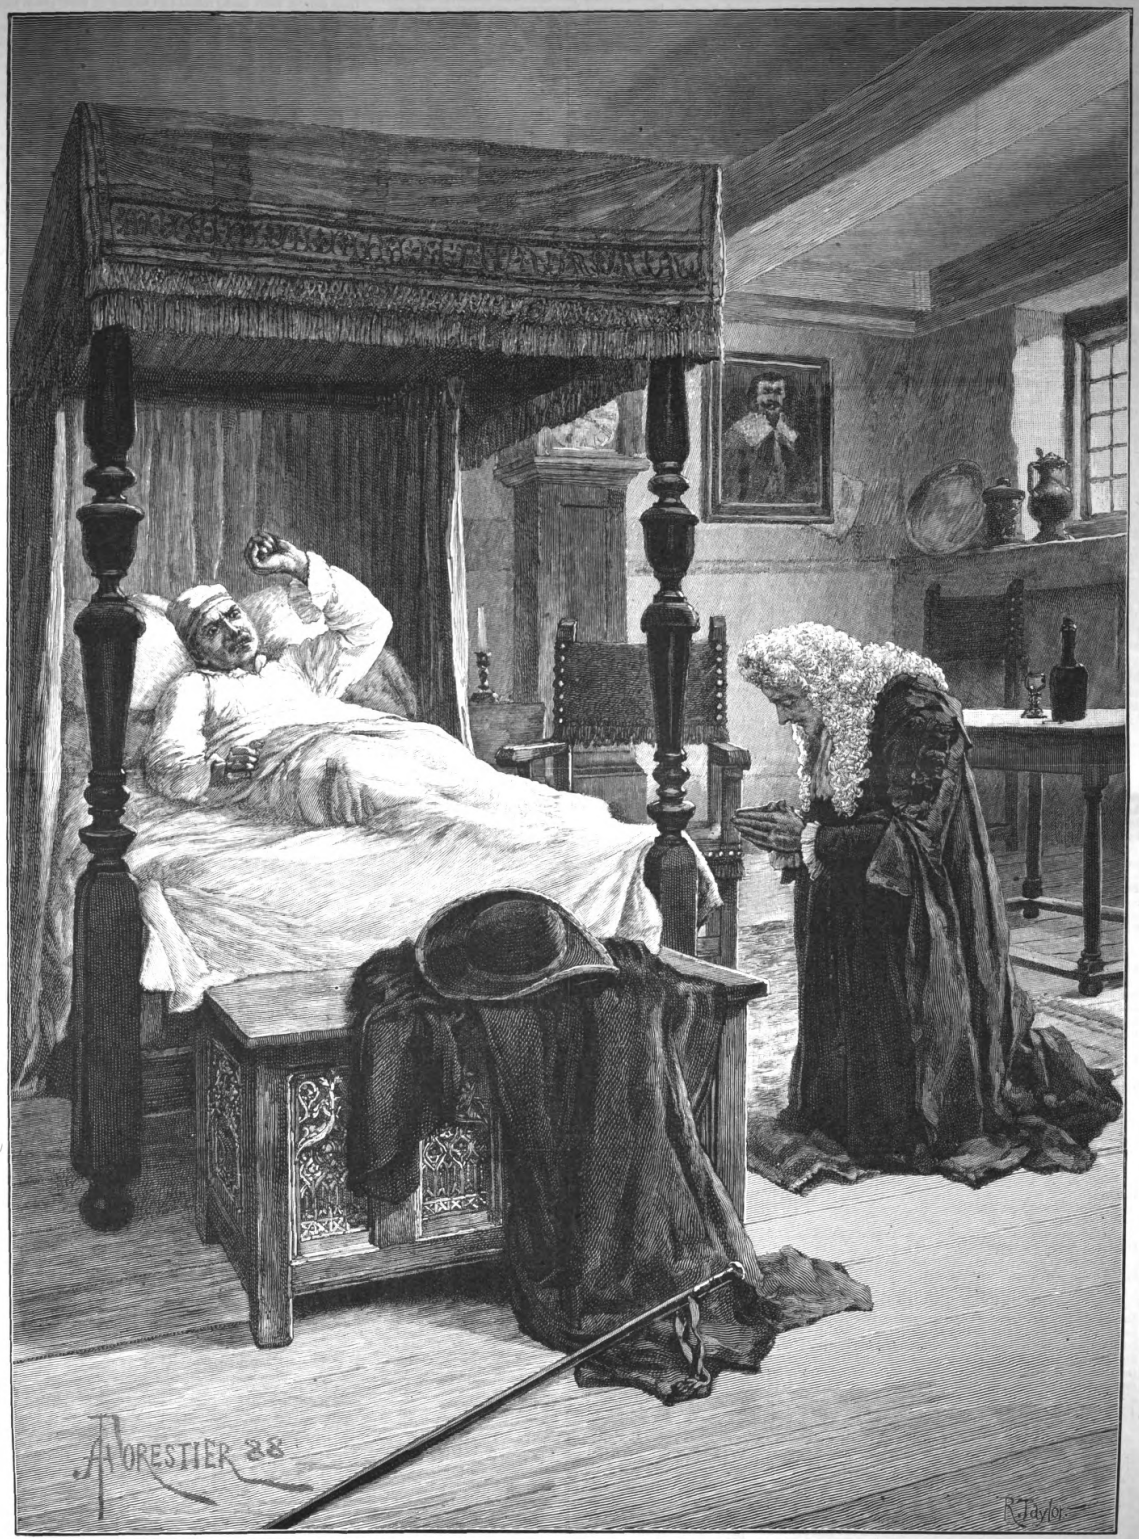
You have, I am sure, heard how I learned many secrets of the women while I was abroad. Now, while we were in Providence Island I found a woman of the breed they call half caste—that is, half Indian and half Portuguese—living in what she called wedlock with an English sailor, who did impart to me a great secret of her own people. I obtained from her not only the knowledge of a most potent drug (known already to the Jesuits) but also a goodly quantity of the drug itself. This, with certain other discoveries and observations of my own, I was about to communicate to the College, in Warwick-lane.

As for this drug, I verily believe it is the most potent medicine ever yet discovered. It is now some years since it was first brought over to Europe by the Jesuits, and is therefore called *Pulvis Jesuiticus*, and sometimes Peruvian Bark. When administered at such a stage of the fever as had now been reached by my unhappy cousin it seldom fails to vivify the spirits and so to act upon the nerves as to restore the sinking, and to call back to life a man almost moribund.

Remembering this, I lugged the packet out of my pocket and laid it on the table.

"Be of good cheer, Cousin," I said; "I have a drug which is strong enough, with the help of God, to make a dying man sit up again. Courage, then!"

When I had said these words my temptation fell upon me. It came in the guise of a voice which whispered in my ear.



"Should this man die," it said, "there will be freedom for Alice. She can then marry the man she loves. She will be restored to happiness. While he lives, she must still continue in misery, being cut off from love. Let him die, therefore."

"Humphrey," said Ben; "in this matter of Alice: if she will come to me, I will make her happy. But I know not where she is hidden. Things go ill with me since that unlucky day. I would to God I had not done it! Nothing hath gone well since; and I drink daily to hide her face. Yet at night she haunts me—with her father, who threatens, and her mother, who weeps, and my grandfather, who reproaches. Humphrey—tell me—what is it, man? What mean thy looks?"

For while he spoke that other voice was in my ears also.

"Should he die, Alice will be happy again. Should he live, she will continue in misery." At these words (which were

*All Rights Reserved.

DRAWN BY A. FORESTIER.

Then I knelt beside his bed, and prayed aloud for him. But incessantly he cried for help, wearing himself out with prayers and curses.

"FOR FAITH AND FREEDOM."—BY WALTER BESANT.

but my own thoughts, yet involuntary), I felt so great a pity, such an overwhelming love for Alice, that my spirit was wholly carried away. To restore her freedom! Oh! what price was too great for such a gift? Nay—I was seized with the thought that to give her so great a thing, even my own destruction would be a light price to pay. Never, until that moment, had I known how fondly and truly I loved her. Why, if it were to be done over again——but this matters not. I have to make my confession.

"Humphrey, speak!" I suppose that my trouble showed itself in my face.

"Thou art married to Alice," I said slowly. "That cannot be denied. So long as thou livest, Benjamin, so long will she be robbed of everything that she desires, so long will she be unhappy. Now if thou shouldst die"——

"Die? I cannot die: I must live." He tried to raise himself, but he was too weak. "Cousin, save my life."

"If thou shouldst die, Benjamin," I went on, regardless of his words, "she will be set free. It is only by thy death that she can be set free. Say then to thyself: 'I have done this poor woman so great an injury that nothing but my death can atone for it. Willingly, therefore, will I lay down my life, hoping thus to atone for this abominable wickedness.'"

"Humphrey, do not mock me. Give me—give me—give me speedily of that drug. I die—I die!—Oh!—give me of thy drug."

Then I took the packet containing the *Pulvis Jesuiticus* and threw it upon the fire, where in a moment it was a little heap of ashes.

"Now, Benjamin," I said, "I cannot help thee. Thou must surely die."

He shrieked, he wept, he implored me to do something—something to keep him alive. He began to curse and to swear.

"No one can now save thee, Benjamin," I told him. "Not all the College of Physicians; not all the medicines in England. Thou must die. Listen and heed: in a short time, unless thy present weakness causeth thee to expire, there will fall upon thee another fit of fever and delirium, after which another interval of reason: perhaps another—but yet thou must surely die. Prepare thy soul, therefore. Is there any message for Alice that thou wouldst send to her, being now at the point of death?"

His only answer was to curse and weep alternately.

Then I knelt beside his bed, and prayed aloud for him. But incessantly he cried for help, wearing himself out with prayers and curses.

"Benjamin," I said, when I had thus prayed a while, but ineffectually, "I shall take to Alice, instead of these curses, which avail nothing, a prayer for pardon, in order to touch her heart and cause her to think of thee with forgiveness, as of one who repented at the end. This I shall do for her sake. I shall also tell thy father that thy death was repentant, and shall take to him also a prayer for forgiveness as from thee. This will lighten his sorrow, and cause him to remember thee with the greater love. And to Robin, too, so that he may cease to call thee villain, I will carry, not these ravings, but a humble prayer (as from thyself) for forgiveness."

This is my confession; *I, who might have saved my cousin, suffered him to die.*

The sick man, when he found that prayers or curses would not avail, fell to moaning, rolling his head from side to side. When he was thus quiet I prayed again for him, exhorting him to lift up his soul to his Judge, and assuring him of our full forgiveness. But, indeed, I know not if he heard or understood. It was then about four of the clock, and growing dark. I lit a candle, and examined him again. I think that he was now unconscious. He seemed as if he slept. I sat down and watched.

I think that at midnight, or thereabouts, I must have fallen asleep.

When I awoke the candle was out, and the fire was out. The room was in perfect darkness. I laid my hand upon my cousin's forehead. He was cold and dead.

Then I heard the voice of the watchman in the street: "Past two o'clock, and a frosty morning!"

The voice I had heard before whispered again in my ear.

"Alice is free—Alice is free! Thou—thou—thou alone hast set her free! Thou hast killed her husband!"

I threw myself upon my knees and spent the rest of that long night in seeking for repentance; but then, as now, the lamentation of a sinner is also mingled with the joy of thinking that Alice was free at last, and by none other hand than mine.

This is my confession: I might have saved my cousin, and I suffered him to die. Wherefore I have left the profession in which it was my ambition to distinguish myself, and am no longer anything but a poor and obscure person, living on the charity of my friends in a remote village.

Two days afterwards I was sitting at the table, looking through the dead man's papers, when I heard a footstep on the stair.

It was Barnaby, who broke noisily into the room.

"Where is Benjamin?" he cried. "Where is that villain?"

"What do you want with him?"

"I want to kill him. I am come to kill him."

"Look upon the bed, Barnaby." I laid back the sheet and showed him the pale face of the dead man.

"The hand of the Lord—or that of another—hath already killed him. Art thou now content?"

CHAPTER THE LAST.

In the decline of years, when the sixtieth birthday is near at hand and one looks not to live much longer and the future hath no fresh joy to bring with it (but only infirmities of age and pain), it is profitable and pleasant to look back upon the past, to observe the guidance of the Unseen Hand, to repent one's sins, and to live over again those seasons, whether of sorrow or of joy, which we now perceive to have been Providentially ordered.

This have I done, both in reading the history of our lives as related by my Mistress, and in writing this latter part. To the former have I added nothing, nor have I subtracted anything therefrom, because I would not suffer the sweet and candid soul of her whom I have always loved to be tarnished by any words of mine, breaking in upon her own, as jarring notes in some lovely harmony. It is strictly laid upon me to deliver her words just as she hath written them down.

Now, after the death of Benjamin, I took it upon myself, being his cousin, in the absence of his father, to examine the papers which he had left. Among them I found abundance of songs, chiefly in praise of wine and women, with tavern bills. Also, there were notes of legal cases, very voluminous, and I found notes of payment made to various persons engaged in inquiring after his wife, in those towns of the West Country where her father's name would procure friends for her. But there was no will; Benjamin had died (never looking for so early an end) without making any will. Therefore, all his estate, including the manor of Bradford Orcas (indeed, he had nothing else) now belonged to Alice, a widow who had never been a wife.

* * * * *

It is thirty years ago and more. King William III. is dead; Queen Anne is dead; King George (who cannot, they say, speak English, but is a stout Protestant) sits upon our throne; the Nonconformists are free, save that they cannot enter the universities, and are subject to other disabilities, which will, doubtless, be removed in the course of years. But English people, I think, love power beyond all earthly things; and so long as the Church is in a majority, the churchmen will exercise their power and will not part with it. To us of Bradford Orcas it matters little. We worship at the parish church. Every Sunday I contemplate, as I did fifty years ago, the monument of Filipa kneeling apart, and of her husband and his second wife kneeling together. There is a new tablet in the chancel put up to the memory of Sir Christopher, and another to that of Dr. Comfort Eykin. Their bodies lie somewhere among the mounds on the north side of Ilminster Church.

Forty years ago, as you have seen, there stood three boys in the garden of the Manor House discoursing on their future. One wished never to go anywhere, but to remain always a country gentleman, like his grandfather; one would be a great lawyer, a Judge, even the Lord Chancellor; the third would be a great Physician. Lo! the end of all! The first, but after divers miseries, perils, and wanderings, hath attained to his desire: the second lies buried in the churchyard of St. Andrew's, Holborn, forgotten long since by his companions (who, indeed, are now with him in the pit), and remembered only among his own kin for the great wickedness which he wrought before the Lord. And as for the third and last, no illustrious physician is he; but one who lives obscure (but content) in a remote village (in the very cottage where his Mistress was born), with books and music, and the society of the sweetest woman who ever graced this earth for his solace. She was always gracious: she was gracious in her childhood; gracious as a maiden, more gracious still is she in these latter days when her hair is grey, and her daughters stand about her, tall and comely.

Now, had I administered that powder—that sovereign remedy, the *Pulvis Jesuiticus*—what would have been her lot?

"Humphrey," said Robin, "a penny for thy thoughts."

"Robin, I was thinking—it is not a new thing, but twenty years old and more—that cousin Benjamin never did anything in his life so useful as to die."

"Ay, poor Benjamin! That he had at the end the grace to ask our forgiveness and to repent hath in it something of a miracle. We have long forgiven him. But consider, Cousin. We were saved from the fight; we were saved from the sea; we were saved from slavery; we were enabled to strike the last blow for the Protestant religion—what were all these blessings worth if Benjamin still lived? To think, Humphrey, that Alice would never have been my wife and never a mother; and all these children should have remained unborn! I say that, though we may not desire the death of a sinner, we were not human if we rejoiced not at the death of our poor cousin."

Yes; that is the thought which will not suffer me to repent. A single pinch of the *Pulvis Jesuiticus*, and he might have been living unto this very day: then would Alice have lost the crowning blessing of a woman's life.

Yet—I was, it is true, a physician—whose duty it is to save life, always to save life, even the life of the wretched criminal who is afterwards to die upon the gallows.

Yet again, if he had been saved! As I write these lines I see my Mistress walking down the village street. She looks over my garden-gate; she lifts the latchet and enters, smiling gravely and tenderly. A sober happiness sits upon her brow. The terror of her first marriage has long been forgotten.

Why, as I watch her tranquil life, busy with her household and her children, full of the piety which asks not (as her father was wont to ask) how and where the mercy of Heaven is limited, and if, indeed, it will embrace all she loves; as I mark the tender love of husband and of children which lies around her like a garment and prevents all her doings, there comes back to me continually a bed-room in which a man lies dying. Again, in memory, again in *intention*, I throw upon the fire that handful of *Pulvis Jesuiticus* which should have driven away his fever and restored him to health again. A great and strong man he was, who might have lived till eighty years: where then would have been that love? where those children? where that tranquil heart and that contented mind? "*I WILL NOT SAVE HIS LIFE.*" I say again in my mind: "*I WILL NOT SAVE HIM; HE SHALL DIE.*"

"Humphrey," my Mistress says, "leave thy books a while and walk with me; the winter sun is warm upon the hills. Come, it is the day when Benjamin died—repentant—what better could we wish? What greater blessing could have been bestowed upon him and upon us than a true repentance and then to die? Oh! dear Brother, dear Humphrey, let us walk and talk of these blessings which have been showered upon my undeserving head."

THE END.

NEW TALE BY MR. RIDER HAGGARD

The first Instalment of a New Serial Story, of absorbing interest, entitled CLEOPATRA *(being an Account of the Fall and Vengeance of Harmachis, the Royal Egyptian, as set forth by his own hand), written by* H. RIDER HAGGARD *expressly for this Paper, and Illustrated by* R. CATON WOODVILLE, *will commence in our next Number.*

Now Ready,

ILLUSTRATED LONDON ALMANACK FOR 1889.

POSTAGE FOR FOREIGN PARTS THIS WEEK,

DECEMBER 29, 1888.

Subscribers will please to notice that copies of this week's number forwarded abroad must be prepaid according to the following rates:—To Canada, United States of America, and the whole of Europe, THICK EDITION, *Twopence-halfpenny;* THIN EDITION, *One Penny.* To Australia, Brazil, Cape of Good Hope, China (viâ United States), Jamaica, Mauritius, and New Zealand, THICK EDITION, *Threepence;* THIN EDITION, *One Penny.* To China (viâ Brindisi), India, and Java, THICK EDITION, *Fourpence-halfpenny;* THIN EDITION, *Three-halfpence.*

Newspapers for foreign parts must be posted within eight days of the date of publication, irrespective of the *departure* of the mails.

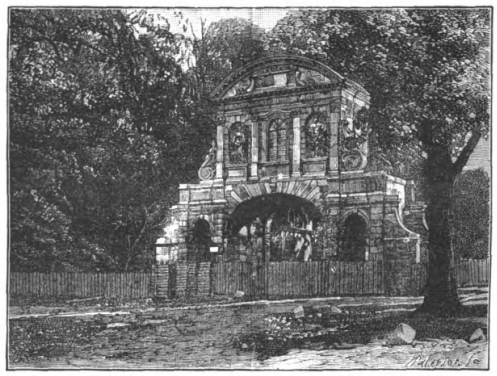
SCIENCE JOTTINGS.

HOLLY-BERRIES.

That spray of holly in the smoking-room which remains over from the Christmas festivities, with its red berries gleaming from among their background and setting of dark green leaves, has been teaching me a curious story of plant-life as I lay lazily this morning enjoying the post-prandial Havana. Outside there are holly-bushes fringing the lawn-tennis ground, and a sprinkling of snow has set out the greenness of leaf and the redness of berry better far than the neutral tint of the smoking-room wall. The thought which arose in my mind had reference to the uses of colour in fruit, and to the possible advantages which accrue to the holly tribe and to all its kith and kin which possess coloured fruits conspicuously displayed. Time was when man's observation of things extended just so far as the things themselves. Quite true; my metaphysical friends, I know, will argue for hours about "the nature of things in themselves." This smoking-room has heard learned talk, prolonged into the small hours, about Aristotelian notions and the Berkelean philosophy of an outer world—which philosophers say we make out of ourselves largely or completely. But in the science of now-a-days we have acquired the habit of going beyond objects to seek out their meaning. The holly-berries are pretty and pleasing, no doubt. Linnæus—cautious, observant old Swede—would have contented himself with a minute description of the holly-tree. Every character of leaf, stem, fruit, and flower would have been duly noted as a guide to classification. Nature, in those days, was regarded as a well-ordered museum. "Here's a holly, and there's an apple," was the tacit summation of botany in bygone days. They were species-makers and variety-mongers in those times, and were uncompromising advocates of exact description and enumeration of the characters of animals and plants. We have changed all that, thanks to the master-spirits which have taught us that nothing in nature stands solitary or alone. There has been a tremendous searching out of the "reason why" of everything since the days of Linnæus. Books on botany, written, say, thirty years ago, are filled with dry details and detached facts. Now the dry bones of description are made to glow with vitality, and the facts are linked together like pearls on a string, to make up an interesting story of how things have come to be what they are. Holly-berries were probably as red and holly-leaves were as green in the past cycles as they are now—and that was all. To-day, one wants to know why the leaves are green, why the berries are red, and what uses and purposes both serve, not merely as a part of holly-life, but as parcel of plant-existence at large.

Between fruits and flowers, in the matter of colour, there is a close and intimate association. Every school-boy who is taught botany, knows that flowers are coloured to attract insects, while the insects in turn cross-fertilise the plants by carrying the pollen-dust from one flower to another flower of the same species. Colour in flowers, then, has a purpose all undreamt of by the older botanists. What of fruits? Colour here, in the logical sequence of events, must be credited with a purpose also. Let us see what that design may be. When you look at an apple or orange you are struck by the apparently big size of the edible part of the fruit, and by the relatively small size of the seeds. Compared with, say, the fruits of a buttercup, represented by the collection of little dry green bodies borne on the end of the flower-stalk, the apple, orange, peach, plum, and cherry are grandiose in the extreme. The apple substance does not nourish the seed. There is no question of nutrition involved in the matter at all. The seeds are all ready to produce the new plants, and lie concealed within the apple, and cherry or plum stone, waiting their season and opportunity. Why, then, all this big growth of eatable material? The answer is "For the birds and insects and for man's benefit as well." The blackbirds that peck at the peaches and apples are Nature's servitors. They come for their food to the gardener's preserves, and as they split up the dainty succulent fruit, they liberate the seeds, and thus secure the prospect of fresh generations of plants. Here, then, is a philosophy of fleshy fruits for your consideration, and in it is involved a philosophy of coloured fruits as well. The colour attracts, and the fruit-substance rewards, the birds; and the plant gains through the liberation of its seeds and through the chances thus acquired of an early and satisfactory development in the soil.

The holly-berries, like the rowans and barberry fruits, are thus coloured to attract birds. In the barberry you see how the fruits are clustered, so as to mass the colour and to make sure of the fruit catching the eye of the bird-visitor. The rowan-tree has less dense clusters of berries, and the holly is still more modest in respect of its fruit-development. But what holly loses in the size of its clusters, it gains in the brightness of its berries. Against the dark green of the leaves, the berries stand out with great prominence. Their after-history is instructive enough. A holly-berry is gobbled up by a bird with ease. What of the seeds the berries contain? Does digestion, which in a bird is a tolerably rough and mechanical process, destroy the seeds? Not so. The seeds, encased each in its dense tough covering, resist even the digestion of the bird's gizzard and stomach, and they are passed on uninjured through the alimentary tract of the animal. Thus liberated, and the bird being the gainer by its digestion of the soft parts of the berries, the holly-seeds fall into the soil and grow up each in time to the holly-tree. Note again, how this interaction between bird and fruit serves another useful purpose. Birds traverse leagues of country in their peregrinations. They may thus convey the holly-seeds to regions hundreds of miles from the parent tree whence the berries were plucked. You begin with the colour of a berry, and you end by securing the distribution of holly-plants far and wide through the agency of the bird. We owe much to the dispersal of seeds by such agencies. There is a plant of the New World, the American currant, which long ago was introduced into France, for the sake of the dark red juice of its berries, which was used to colour wines. At Bordeaux this currant was extensively cultivated. Man introduced the plant, but mark the greater influence of the colour of its fruits and the work of the birds. Now the American currant is found universally throughout the South of France. It has spread also into Switzerland, and has reached the Tyrol. You can, therefore, prophesy with considerable safety regarding plants and their chances of distribution, when you see these fruits and learn the story of their distribution. Holly-berries have social associations dear to the hearts of us all. They possess, however, in their redness and in their attraction for bird-visitors, a romance that is all their own. ANDREW WILSON.



At a general meeting of the Institute of Painters in Oil Colours, held on Dec. 19, Messrs. J. J. Shannon, J. Pickering, and T. B. Kennington were elected members.

Mrs. Pledge, the ex-Mayoress of Folkestone, has been presented by the inhabitants of the town with a handsome diamond bracelet, in recognition of her services amongst the poor.

NOVELS.

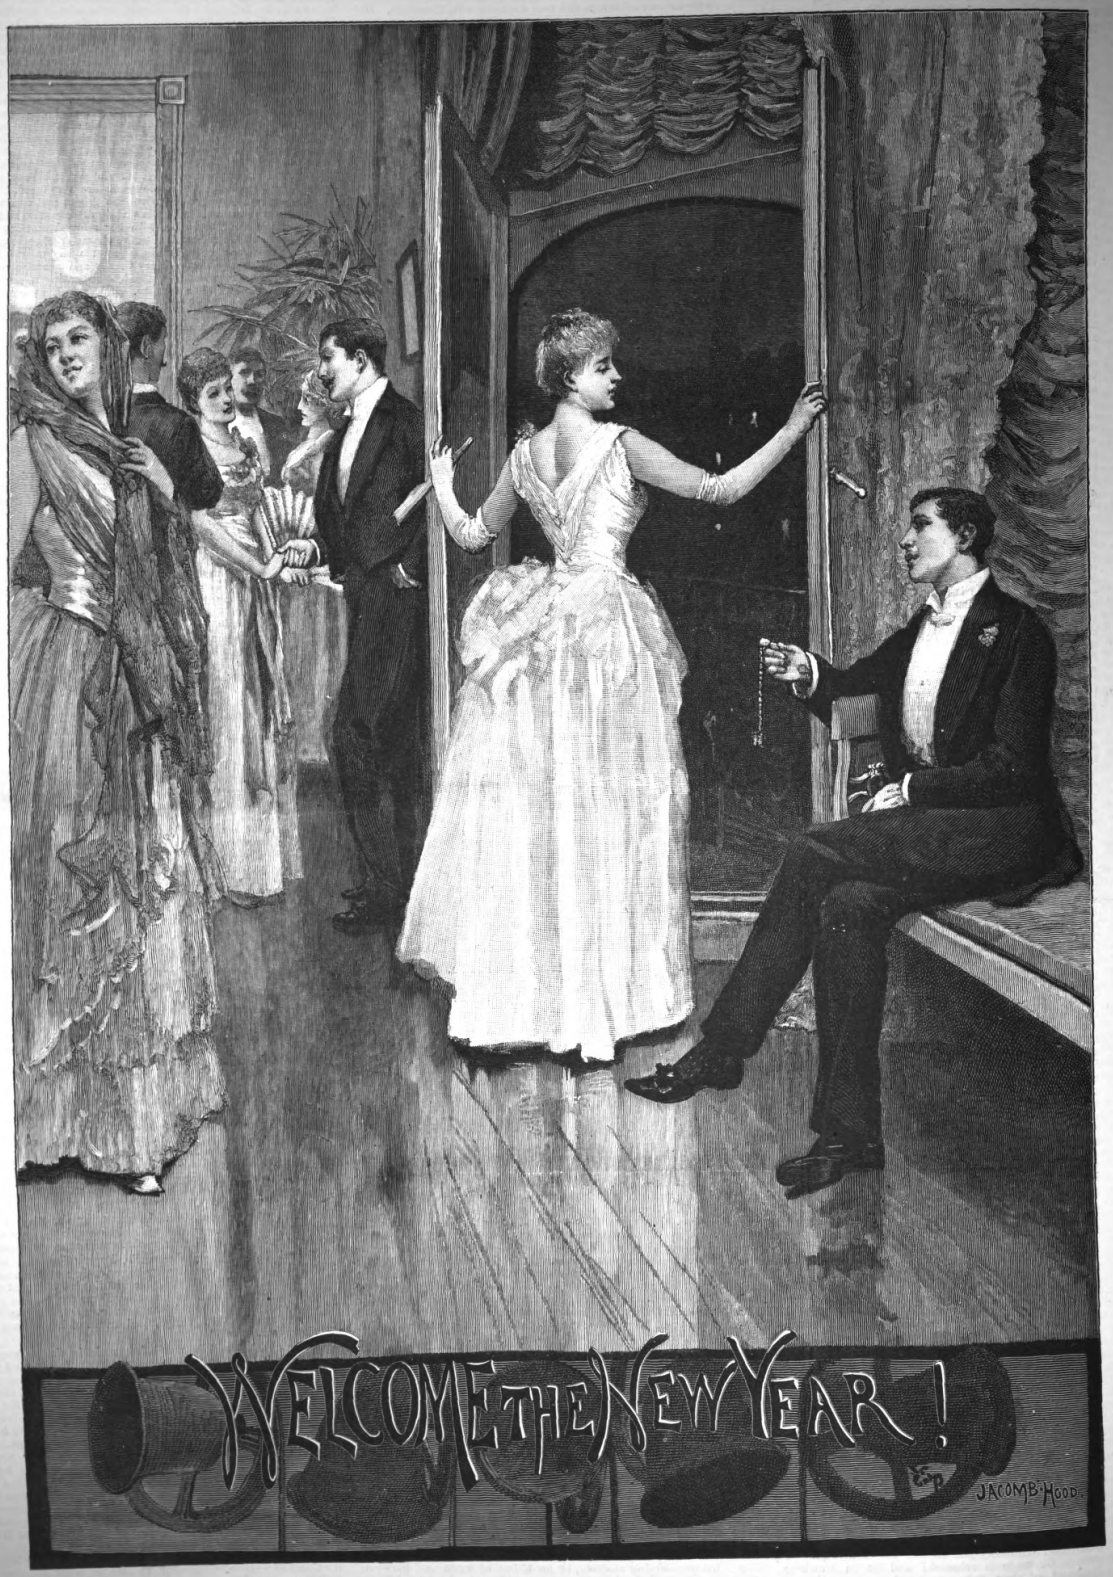
The Rogue. By W. E. Norris. Three vols. (R. Bentley and Son).—There are novel-readers who seek the pleasures of fancy in vivid pictures of outward scenes and situations, the stranger the better; others who find imaginative excitement in the conflict of vehement passions, with alternate fierceness and tenderness; others, again, to whom the analysis of individual character, or the less difficult exhibition of social types, is a source of intellectual interest. "Tous les genres sont bons, hors le genre ennuyeux." Mr. Rider Haggard, Miss Braddon, and Mrs. Campbell Praed, Mr. Henry James, Mr. Walter Besant, and Mr. Norris, to name only living writers, treat the vast and various theme of human life in different ways, and make fiction serve different purposes, but each is more entertaining to a particular class of minds. In each of the lines above indicated, these authors have several worthy companions who could easily be named, besides literary predecessors whose works yet abide in popular favour. A just and friendly critic, who is always thankful for any good story or other book, will avoid comparisons of merit, and is disposed to accept the verdict of public success. Let every reader, with a taste deliberately recognised by his or her own consciousness, choose and keep to the kind of novels that proves most interesting to his or her disposition. It will then be found, allowing one week for the consumption of three volumes—we do not so well like to read a story by monthly instalments in the magazines—that a numerous staff of able novel-writers is required to maintain the supply. Only dismiss the feeble, the dull, the puerile, as well as the base and foul, the vulgar and ignorant pretenders to an intimate acquaintance with the world, those who describe scenes of luxury and fashion, aristocratic manners, sports, dinner-parties, drawing-rooms and ball-rooms, for the sake of introducing characters of extreme moral depravity invested with the garb of elegance and titles of rank—only set aside the bad and the weak novels, of which there are legions, and then it will appear that we get scarcely enough good ones to meet the public want. Now this one of Mr. Norris's, though some may think "The Rogue" an unpromising designation, is a very good specimen of that kind of novel, produced also by Mr. Henry James of an excellent quality, the value of which consists in the contemplation of four or five individual characters placed in such mutual relations as to bring out the distinguishing complexion of each of them, with no extraordinary vicissitudes of fortune, and with no violence of action. Here is the essence of serious comedy, as Molière and some instructive English writers for the stage used to practise it in a past generation, and as Thackeray, of all modern novelists, was most inclined to do; for Anthony Trollope dealt more largely in class types of society than in personal characters apart from the influences of their education or profession. Mr. Oswald Kennedy, who is not "the rogue," but the rogue's uncle, though some years his junior, since Oswald's father married a second time in his old age, when a daughter of the first marriage, Mrs. Heywood, had two children, Tom and Gertrude, is an amiable gentleman with excessive consideration for others. He is a genuine "altruist," to borrow the ethical slang of the day, far more anxious to help Tom Heywood, whom he does not quite like or trust, than to gratify any wish of his own; and this mainly because he feels uneasy at having been born to deprive Tom of the inheritance of a good landed estate. Tom Heywood, for his part, being "the rogue," and having lived a shifty, rather shady life in America, connected with adventurers and speculators of questionable honesty, rejoins the survivors of his kindred, after many years' absence, with an unscrupulous determination to get all he can out of them. His deceased grandfather has cut him off with a legacy of £1000, while leaving £18,000 to his young sister Gertrude, and Oswald Kennedy's estate is worth £7000 or £8000 a year. Naturally, Tom Heywood's idea, as his occupation is that of assisting promoters of speculative companies, often acting as secretary or London or Paris manager, is to borrow money of his relatives for such purposes, to which he is instigated by an American ally, one Mr. Fisher. The remarkable feature of Oswald's conduct is that while he earnestly desires to make some moderate pecuniary sacrifice for Tom's sake, being tolerably indifferent to the risk of losing a round sum of his own money, and while he does not care, though otherwise prudent and cautious in business, to control Tom's employment of a loan from himself, his indignation is quickly aroused by Tom's attack on the purse of Gertrude. There are such men, but they are not commonly met with, whose combative energy will be aroused only by an unselfish motive, and who allow themselves to be regarded as soft, apathetic, or indolent, from a constitutional habit of not pushing their own claims or insisting on their own deserts. The same tendency to self-abnegation is displayed in Oswald's love affairs; he is sincerely attached to Stella Mowbray, a young heiress of sprightly temper and keen intelligence; but he idly waits to see whether she may not prefer some other suitor. He had once, while living in France, been attracted by a young Mademoiselle who afterwards became a Madame De Révigny, and whose reputation as "a fast woman," amidst the social corruption of the Empire, then caused the scrupulous Englishman to avoid her acquaintance. This Frenchwoman comes to England and shows herself in Oswald's neighbourhood; while Tom Heywood, unmindful of the comic song, "Tommy, make room for your uncle," has a notion of securing Miss Mowbray's fortune and hand for himself. He, therefore, like "the rogue" he is, communicates to that young lady an injurious notion that Oswald has been engaged in an intrigue with the notorious French married coquette. At the same time, he is so base as virtually to sell his own sister Gertrude to Mr. Fisher, the middle-aged American speculator, for a pecuniary consideration; and though she, for her part, loves Algernon Pycroft, an honest gentleman returned from Australian explorations, she will do anything for her unworthy brother. These are perilous complications, from which Oswald Kennedy, being an amiable doubter and dawdler, would scarcely be able to rescue himself and those whom he loves; but he has a friend, a shrewd old Lady Hester, who sees through all Tom's villainy, and who contrives the means of defence and exposure. Tom has been in frightful scrapes during his American life. He has embezzled some money of a bank at St. Louis, which Fisher knows; and he has had a wife, whom he believes to be dead, but who suddenly reappears in London. These facts, being discovered, effectually put an end to "the rogue's" machinations; Gertrude is released; and Stella Mowbray, being disabused of her false impression concerning Oswald's previous behaviour, consents to help him in the duties of a country squire. "The rogue," in defiance of moral and poetical justice, gets rid of his American encumbrance, escapes the infamy that he deserves, and marries a sleepy fair widow, coming into a heap of money. We should be much better pleased if he were kicked out.

Through the Long Night. By E. Lynn Lynton. Three vols. (Hurst and Blackett).—Mrs. Lynn Lynton is an authoress of wide accomplishments and long experience in literature. Her classical tale of "Amymone" was published forty years ago, when her early taste had been formed by a personal acquaintance with Landor. Traces of that predilection may even yet be perceived in frequent allusions to Hellenic fable which have become unusual with the novelists of the present day, though sometimes employed, rather less accurately, by Miss Braddon. But Mrs. Lynn Lynton's writings have been of a discursive and diversified character; ethical and historical essays, clever and somewhat bitter satirical exposures of the manners and morals of social life, and stories exhibiting violent conflicts of passion in most painful situations, have proceeded from her industrious pen. All her works prove sustained literary ability, and "Through the Long Night" is a story of considerable power. Yet being as it is a novel, one must estimate its value by the requirement essential to this kind of fiction—that it should represent the natural sentiments and behaviour of men and women as they are, under the influences of modern society, and of English habits and customs. With regard to women, who should be the most important persons in a novel dealing with affairs of the heart and domestic happiness or misery, the authoress is a keen, perhaps a sharp, observer of her own sex, and has also made them the subject of an extensive range of learned critical studies. She has written of "The Girl of the Period," of "Frisky Matrons," of Woman in Greece, Woman in Rome, Woman in Italy and other countries in the Middle Ages. In this novel we find two leading female characters—those of Lady Elizabeth Inchbold and Estelle Clanricarde, the sometime Mrs. Harford—which are eminently womanly, and which may be accepted as original and consistent individual types, if our idea of the intended conception of Estelle (namely, that she had from the beginning a tendency to insanity) be received as a true explanation of her conduct. It is not expressly stated: her sufferings are enough to drive many a fond girl mad, and their effect in producing the mental disorder is accurately described; but the latent tendency may be suspected almost in the first chapter. To have revealed it prematurely would, perhaps, have been too prejudicial to her claim on that respect for the independence of a rational personality which raises sympathy above mere compassion. At the same time, her mental disease becomes, after the forced marriage and the cruel trick of deceiving her with a false report of her lover's death, sufficiently apparent to relieve her of all stain of guilt, when she escapes from a hated husband to fly with Charles Osborne, on the impulse of the instant, unable to reflect on her duty as a wife and mother, insensible to all but his living presence and her pledged affection to him in the past. This view of Estelle's condition, while it excites our pity, entirely redeems her story, which is told in other particulars with absolute delicacy, from any palliation of a vicious course; and Charles Osborne, for his part, figures as a vain egotist unworthy of such a sacrifice, which, indeed, no worthy man could in any case accept. On grounds of morality, therefore, no objection can be taken to the sad story; it is with pure compassion, not at all with indignation, that a virtuously disposed reader will peruse the narrative of Estelle's unhappy life, and will recognise the genuine charity, the friendly, sisterly, Christian tenderness of Lady Elizabeth, in hastening, after Charlie's death, to soothe and save the distracted victim of emotional delusion. A more admirable feminine character than that of Lady Elizabeth, "a perfect woman, nobly planned, to warn, to comfort, to command," has seldom been delineated in fiction. Seeing the fine tact and discretion, as well as the high moral courage and fidelity, with which she confronts the injured husband, disarming his revenge, pleading for mercy, and softening his savage heart, it may be surmised why this brave young lady was called "Delight," by the Earl her father; not as a pet playful name, but with reference to Wordsworth's poem, "She was a phantom of delight," already quoted, in which consummate womanhood is credited, with the most practical virtues: "the reason firm, the temperate will, endurance, foresight, strength, and skill." We cannot say that Mrs. Lynn Lynton has been equally successful in her portraiture of the characters of men; she evidently does not understand true manhood, and her idea of a gentleman is incorrectly superficial and conventional, like those of the majority of lady novelists. With an absurdly false estimate of mere external graces of figure and manner, she reiterates silly expressions of contempt, such as "omadhaun," and vastly exaggerated admissions of social humiliation, to the disparagement of her Caleb Stagg, the best man and the truest real gentleman—the only true one, among the leading personages—to be met with in this story. He is the son of a coarse and boorish miner who has grown rich; but he has had a good education, reads Shakspeare, Homer, and Æschylus, studies natural history and biology, and though he might, from habits of solitude in youth, be shy and awkward when introduced to fashionable society, he could not be a mere clown; nor would a man of his sound good sense, his refined feelings and his unassuming modesty, be an object of scorn and derision, especially if the heir to great wealth, only for his plain or ugly face. On the other hand, Mr. Anthony Harford, though born of the landed gentry, athletic and handsome, returning from years of American travel and adventure, from hunting bears and buffaloes, fighting Red Indians, and consorting with the cow-boys and gold-diggers of Colorado, is decidedly not a gentleman, as he shows by his behaviour in England. It is a wonder how the authoress and Lady Elizabeth can possibly mistake him for one; a cool, hard, insolent braggart who entertains the ladies at a dinner-party with tales of murderous Western ruffianism told in hideous jocular slang—who keeps a revolver in his pocket, even in the drawing-room, and shows it to Lady Elizabeth, telling her that it is to kill his runaway wife—and who has perpetrated the hideous crime of sternly forcing a broken-hearted, half-imbecile girl to marry him against her will, being accessory, as he was, to the fraud that had been contrived by her mercenary mother. This Anthony Harford, truly, is no hero to be finally mated with such a heroine as Lady Elizabeth, after the suicide of poor Estelle. A good novel, it has been said, wants really interesting men in it, as well as interesting women. "Through the Long Night" is fatally spoilt by a distorted conception of the masculine characters; and therefore, we are sorry to say, it is not a good novel, on the whole; but some parts are very good. The earthquake on the Riviera, with the fright and confusion among the visitors at Mentone, is vividly described. The Rev. Mr. Medlicott and his bride, with her affected hostility and cruel insults to the fallen Estelle, are characteristic specimens of impertinent assumption. There is some ingenuity, too, in the prolonged conspiracy of Mary Crosby and her mysterious mother to cheat a residuary legatee by personating a deceased old lady entitled to a life annuity. Mrs Lynn Lynton is most effective in the satirical vein; but satire is never more than half the truth.

TEMPLE BAR OUT OF TOWN, RE-ERECTED IN THE PARK OF SIR HENRY MEUX, BART.

TEMPLE BAR OUT OF TOWN.

The Corporation of the City of London, when a few years since they removed the stately old architectural gateway, with its statues of the Stuart Kings, from its position at the western boundary of the City, unquestionably improved the convenience of carriage traffic between the Strand and Fleet-street. The stones of that interesting structure were carefully preserved, with indications of their proper places in the ancient building, which was designed, after the Great Fire of London, by Sir Christopher Wren. There are many places in London where this characteristic monument of civic and national history might easily have been re-erected. The Metropolitan Board of Works could have provided a site for it, one would think, at the bottom of some avenue to the Thames Embankment; or the First Commissioner of her Majesty's Works could have received it as an appropriate ornament for one of the entrances to St. James's Park. We regret to observe that Temple Bar has been finally rusticated and sent twelve miles out of London, having been handed over to a country gentleman for the adornment of his private park on the borders of Middlesex and Hertfordshire. Theobalds, at Cheshunt, near Enfield Chase, is certainly a place of historical associations inferior to few in the neighbourhood of London. It belonged to Sir William Cecil, Lord Burleigh, the great Minister of Queen Elizabeth, the ancestor of the present Lord Salisbury, and to his son, Sir Robert Cecil; it was often visited by that Queen and by her successor, James I.; and in 1607, being exchanged by the said Sir Robert Cecil, first Earl of Salisbury, for Hatfield House, it became the rural palace of King James, who died there in 1625. Charles I. occasionally resided there; but the mansion was pulled down, by order of Parliament, during the Commonwealth; and the place afterwards belonged to General Monk, Duke of Albemarle, on the Restoration of Charles II. These local antecedents may perhaps be considered to warrant the transference of a memorial of the Stuarts to Theobalds Park. The Duke of Portland obtained a grant of Theobalds, but in the middle of the last century it was sold to the Prescott family, and its present owner is Sir Henry Meux, Bart. Our Illustration of Temple Bar in the country, pleasantly surrounded with trees, is from a photograph taken by Messrs. Whittey and Co., Turner's Hill, Cheshunt. The trees had not lost their autumnal foliage when this photograph was taken. Some fine days next summer will perhaps tempt a few Londoners to run out that way and enjoy the pleasant country, when they may see their old City portal in its rural retreat. We hope the situation is not too dull for their Majesties in stone, King James and his Queen, King Charles I. and King Charles II., who for two hundred years stood on high watching the bustling crowds, and in modern times the cabs and omnibuses, passing from Westminster to the City, while the munument-room of Child's Bank, above the central arch, was safe in their august guardianship. It is ten years since the removal of Temple Bar, for which, in point of artistic taste, the heraldic Griffin, with the sculptures of Victorian Royalty on its pedestal, is a questionable substitute; but "the old order changes, giving place to new." It is not probable that any traitors' heads will ever again be stuck on the top of Temple Bar.



Doctors' Day at Merchant Taylors' School was celebrated on Dec. 20 by a banquet in Merchant Taylors' Hall—Mr. George Baker, the master, presiding. In proposing the toast of the evening he stated that every pupil old enough to proceed to the university had won either a scholarship or an exhibition.

Major-General Lyon Fremantle, Deputy Assistant Adjutant-General of the Auxiliary Forces, speaking at the annual presentation of prizes of the 21st Middlesex Rifles, said that the efficiency returns of the Volunteer Force for the past year, which closed on Oct. 31, had just been completed at the War Office, the numbers being 221,000, a decrease of 13,000 from the previous year.

A vigorous attempt is now being made in the metropolis and throughout the country to raise £10,000 to clear off the existing debt on the Wesleyan Foreign Missionary Society and increase its permanent income. Towards this event Mr. Henry J. Atkinson, M.P., has personally raised £4000, and the remaining £6000 is expected to be realised by the Christmas Day Family Offering Fund. The treasurers of the society have just received a legacy of £8000 for mission work in China.

In the Chancery Division on Dec. 20 Mr. Justice North ruled that a photographer who had been employed by a customer to take his or her portrait was not justified in striking off copies for his own use, or in selling and disposing of them, or in publicly exhibiting them without the authority of the customer, expressed or implied. He accordingly granted an injunction restraining a photographer at Rochester from making use of a lady customer's portrait.

Mr. Parnell's action against the *Times* for libel came before the Court of Session, Edinburgh, on Dec. 20, when Mr. George E. Wright, publisher, and Mr. John Walter, one of the proprietors of the *Times*, gave evidence. The latter stated that his interest in the paper consisted of one sixteenth and a half of a sixteenth. Mr. Soames, the *Times*' solicitor, undertook to furnish a full list of the proprietors, of whom there are hundreds. The hearing was adjourned until after Christmas.

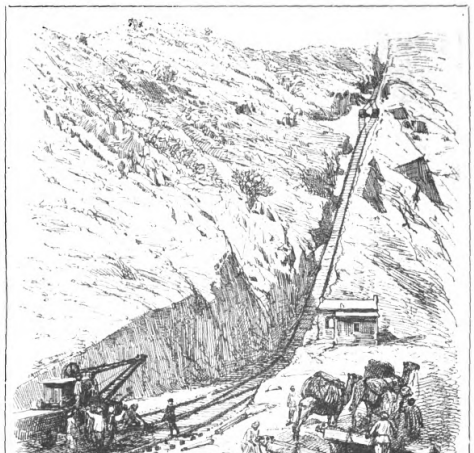
THE GUEST ON THE THRESHOLD.

Everybody understands the feelings of expectation, suspense, doubt, and anxiety with which we await the coming of a guest whom we have never seen. A stranger, he may be, to us and ours—recommended, perhaps, by some half-forgotten friend—a man of whose tastes or character we have not the slightest knowledge. We have assembled, let us suppose, a little company to emphasise the welcome we wish to offer him. The curtains have been drawn; the fire blazes merrily in the grate; the lights fill the room with a softened glow; and there we sit, with our companions—sometimes engaging in desultory talk, sometimes dropping into silence, as is always the way with people who hope or dread a novel experience—listening for the footfall on the stairs, and the opened door, which shall announce the arrival of the new-comer. We speculate among ourselves what manner of individual he will prove—dark or fair? plain or comely? urbane or morose? We wonder whether he will be a desirable addition to our "list of friends"; whether he will belong to the class of manly men whose high purpose it is to accomplish some good work for Christ and humanity; or whether he will turn out to be one of the great army of social triflers, one of the world's idlers and do-nothings, or under a plausible exterior carry a false heart and an evil temper. It is no trivial matter, mark you, the introduction into one's house of a stranger-guest. Of course, it is the merest platitude to say that the electric chain with which we are subtly bound links us so closely to each other that no incident can occur to the individual without affecting the many; and that the contact, even if temporary, with a fresh mind must exercise an influence upon us for good or bad. We cannot set aside this man or that as of no account. The tragedy of "Hamlet" could not go on to its dreadful issue without a Rosencrantz and a Guildenstern. In the fairy tale it is the dwarf with the enchanted sword who delivers the captive Princess. This makes it all the more wonderful that we should be so ready to foregather with "the man in the street," to press the happy shelter of our "mahogany tree" upon the chance acquaintance of a day, of whose actual self we are as profoundly ignorant as we are of our own soul. I am sometimes amazed at the readiness with which "intimacies" are entered upon. In the elder comedy, if a Don Francisco come across a Don Pedro on a terrace in Seville, the two immediately swear eternal "friendship"; it is always done! But it is hardly prudent—is it?—to transfer so romantic a piece of stage-business to our every-day life. How do we know—or do we know?—what kind of dramatis persona we are thrusting upon the scene! The new actor may be a marplot, an ill-doer, a mischief-maker, and so entangle the threads of our destiny, and so poison the sweet fountains of existence, that we may live to rue the day—I have known such things to be—when we hastened, with smiling face and outstretched hand, to greet the Guest on the Threshold.



I grant you that it may be otherwise; that the stranger may eventually win our esteem and confidence because he deserves them; that he may unfold into that rarest of human blessings—a true friend, because a wise and an honest one; that we may discover in him all that Cicero discovered in Atticus, or Milton in Diodati, or Brooke in Sidney, or Cowper in John Newton; so that the day on which we first clasped hands with the unknown guest may merit to be marked in our life-calendar with the whitest chalk as a *dies notanda*. All I would hint to the young is, that we cannot pick up "desirable acquaintances" as a pigeon picks up peas! As a rule, the man of whom we know nothing should never be in the position of a Guest on the Threshold.

While the last sands of December are rapidly running through the inverted glass, let us indulge ourselves with the fancy of contemplating the New Year as, in like manner, a Guest on the Threshold, as yet unseen and unknown. There is this difference: no human guest crosses our threshold uninvited; but this latest-born of Time, like Banquo's ghost, waits for no welcome, and will not be denied. How many of us, I wonder, in the solemn hush of the passing hours, are reflecting what manner of companion this self-constituted visitor may prove? We know what his predecessors have been and what they have done; how much or how little of help and comfort, of suffering and sorrow, they have conferred upon us; their tricks and turns, their changes of countenance, their surprises, their misadventures—with all these we are only too familiar. But, unfortunately, this knowledge will avail us nothing with the stranger. In some respects, it is true, we may assume that he will wear the same favour. We may be certain that he will pour some bitter into our cup, and will mock our ears with promises unfulfilled; that while he is with us the thorns will often crackle under our pots, and our pitchers go down to wells that are waterless. This is the way with all the Years! We may be sure beforehand that he will bring us little which we wish for, and despoil us of much which we prize. But whether he will hereafter grow upon us as friend or foe, adviser or accuser, *eudæmon* or *kakhdæmon* who can foresee, or, if wise, will venture to predict? Though he may come with a smiling face, he may turn upon us by-and-by a melancholy one; or the sad eyes which are now directed towards the past may beam with joy as they look into the future.

The false Florimel, in Spenser's "Faerie Queene," who at first enchants Sir Blandamour "with golden words and goodly countenance," stands afterwards revealed as an image of wax, moulded by a wicked witch's spell. Who knows what similar deception this new guest of ours may not pass off upon us? Or what deception we may not impose upon ourselves, clothing the stranger in the rainbow hues of fancy—converting "cloth of frieze" into "cloth of gold"? When Don Quixote falls in with an undistinguished shepherd, he straightway hails him as King of the Garamantuans. With equal simplicity some of us choose to believe that the year, because it is a new-comer, must be a Dives—a Midas—with hands full of gold and silver—though, alas! there may be nothing in them but thorns and thistles. At all events, he comes to us without a remorse or a regret—as free from offence as a new-born babe; but who dares say that he will leave us so? There are such dreadful possibilities in this unknown guest! It may be that during his twelvemonths' sojourn with us he will develop an infinite capacity for the commission of follies or even of sins, for the infliction of sufferings which shall almost crush the life out of the young heart. I am reminded of that terrible Eastern tale of the Afreet who gained admission into the King's palace in the person of a handsome young prince, and then changed suddenly into a hag, with dreadful claws, which did to death the unsuspecting victim. Sometimes the year in its course undergoes a transformation nearly as hideous! It stands upon the threshold now—a spirit of light, with hope and promise on its wings; before long it may take upon itself the gloomy figure of Azrael. It opens with the sound of bridal bells; perhaps it will pass away amid echoes of funeral music. The blithesome lark's song of glad expectancy with which it thrills our hearts may change all too soon into a palinode, a threnody, or a dirge. There may be no chairs empty around the domestic hearth when the New Year crosses the threshold; and yet, before its "trailing skirt" vanishes into the darkness, our sorrowing eyes may have learned to gaze wistfully at the "vacant place"—the place that shall never again be filled. Heaven grant that the coming year may not deal thus with you, my friends! May the Guest on the Threshold carry in his hand no wreath of cypress, nor lead in his train the mourning-women!

Yet, after all, this uninvited (though not unexpected) guest may turn out very much what, if we are not over-sanguine, we wish him to be. At the worst, here he is—"the man in possession"; and it will only be wise to make the best we can of him! Remember, we shall weaken his capacity for evildoing by meeting him with the courage of cheerfulness; we shall ward off the stings of his reproaches by giving no occasion for them. We shall even do much to lighten the burden he will impose upon us by straightening our backs to bear it. Let him rob us of what he will, he *must* leave us our faith in Heaven: of *that* none but ourselves can deprive ourselves. He must leave us the wisdom of the ages, with which to sustain our patience; and the bloom and brightness of Nature, on which to feed our imagination. He cannot take away from us "Plato's brain, Or Lord Christ's heart, and Shakspeare's strain." He cannot take away from us "the seven stars and the solar year," the glory in the grass and the splendour of the flower, the solace of human affection and the support of the Divine love. So that, if you look into the matter fairly, you will see that we have no just cause (except so far as it lies in our own thoughts and actions) for regarding with suspicion or alarm the Guest on the Threshold. Terrible as may be his power to wound us with unforeseen blows, he cannot beat us into the dust, if we be but true to our manhood and constant to our belief in the living God. There are more blessings around us than the greediest soul can exhaust—more joys than griefs, more hopes than fears, more stars than clouds. Even the vacant chair that moves us to an agony of tears is filled—if we would but see it!—with the wings and white garments of an angel. I hold it true that all the evil and pain in the world are to its good and happiness only as a grain of mustard-seed to a mountain. Go thou, my friend, to hail the stranger with a hopeful and a steadfast heart. The clock strikes twelve—let the Old Year out and the New Year in. "Farewell!" to the shrunken form and bowed head of the departing friend; and "Welcome! Welcome!" to the young and buoyant Guest on the Threshold.

W. H. D.-A.

ROPE INCLINE RAILWAY OVER THE KOJAK PASS, AFGHAN FRONTIER OF INDIA, TOWARDS KANDAHAR.

RAILWAY ON AFGHAN FRONTIER OF INDIA.

The Indian Government railway, projected originally by Sir Richard Temple, which traverses the mountainous region of Beloochistan, north of the Bolan Pass and Quetta, from the western border of Scinde to the new military station of Pishin, and thence still westward to the Khoja Amram range, overlooking the plain of Kandahar, has repeatedly been mentioned as a work of the greatest political importance. It is now rapidly approaching completion. An extensive tour along the Indian north-western frontier has been undertaken by the Commander-in-Chief, Sir Frederick Roberts, and his Staff. Sir Charles Dilke accompanies the party. Our Illustration represents the wonderful rope incline railway over the Kojak Pass, which Sir Charles and the party ascended on Nov. 12. Here, this line reaches a height of 7250 ft. above sea-level, and has a gradient of no less than 1 in 2½, which is, with one exception, the steepest of any in the world. It was designed and carried out by Mr. W. J. Weightman, A.M.I.C.E., under the orders of the Engineer-in-Chief, Mr. F. L. O'Callaghan, C.S.I., C.I.E. Our Illustration is from a photograph by Mr. R. J. Woods.

A Royal Proclamation commands the Peers of Scotland to assemble at Holyrood House on Thursday, Jan. 10 next, to choose a representative Peer in the room of the late Earl of Mar and Kellie.

The War Office authorities have purchased several acres of ground, situated between Epping and Ongar, as a site for new military barracks. The spot selected is on high land, and only a short distance from the Ongar branch of the Great Eastern Railway. There will be accommodation for 5000 men.

PARISIAN SAYINGS AND DOINGS.

(From our own Correspondent.)

The political week has been marked by a grand speech made in the Senate by the ex-Minister of Foreign Affairs, M. Challemel-Lacour, who, himself a Republican, bitterly criticised the successive Governments which have directed the destinies of France during the past seventeen years, insisting principally upon the dangers which the Radical policy had brought upon France to the point even of endangering her future. The substance of M. Challemel-Lacour's advice to his colleagues and to his compatriots was a policy of concentration, an alliance of patriots of all parties against those who would ruin France by their adventures and their irritating narrowness and persecutions. Unfortunately we are too near the elections for any such alliance to be concluded. M. Floquet, of course, had to defend his Radical Cabinet and policy against the attacks of M. Challemel-Lacour, and, in reply to direct questions from M. Léon Say and others, he announced that the Government meant to work for the common defence, and that if by chance the existing laws were not sufficient to enable them to resist and conquer Boulangism, they would not hesitate to ask for new ones. For that matter by re-establishing the *scrutin d'arrondissement* instead of the *scrutin de liste*, the Government was giving the nation arms to defend itself against plebiscitary adventurers. The great question of the moment has become the method of voting—the election of deputies by districts, or the election of a certain number for each Department by *scrutin de liste*. On this point depends the salvation of the Republic, and when once the Republic is saved, as it doubtless will be, the organisation of the French democracy, according to the principles of 1789, will still remain to be accomplished. During a century twenty essays of constitutions have been made in France, but the practical realisation of the principles of 1789 has hardly been begun.

The threatened Panama Canal catastrophe has been picturesquely called the "Krach des bas de laine," meaning that the people affected by it are mostly those small country capitalists who save up their money in an old woollen stocking. As M. De Lesseps said to the late Emperor William of Germany: "Je fais le Canal de Panama avec les bas de laine." This fact accounts for the little excitement which the dangerous condition of the company has caused. All those interested have only a small stake; they are simple people whose voices are not heard; the great bankers and speculators are not in the affair; the example of Suez encourages the sufferers, and so great is the influence of M. De Lesseps, and so enthusiastic is the French temperament when appealed to by ideas and phrases *à la Tacitus*, that it seems very probable that the woollen stockings will come to their own rescue and subscribe the money still wanted. A strong movement is setting in, and meetings are being held by the dozen. In January a meeting will be held in the Hippodrome, the only place in Paris big enough to accommodate the thousands who are interested. The precarious condition of the Panama Company will, however, certainly affect the New Year's gift or *étrennes* season. And to make matters worse, behold an agent de change, M. Bex, has just absconded, leaving a deficit of eight millions of francs and a feeling of distrust in the hitherto immaculate corporation of stock-brokers.

Apropos of the New Army Bill at present before Parliament, and hindered in its passage by the Radicals, who insist upon obliging seminarists and priests to perform military service like the common run of mankind, a clear-headed and sceptical journalist, M. Magnard, of the *Figaro*, makes the following admission: "The Army is a school of obedience and discipline; it is also, like every masculine collectivity, a school of coarseness of language and habits."

How very wonderful is the presumption of a literary clique, and how simple-minded are some would-be revolutionaries! Zealous reporters, who had interviewed M. De Goncourt, announced that the first night of his new piece, "Germinie Lacerteux," would be a hot battle, in which the old formulæ of dramatic art would be broken and trampled upon, and out of the ruins would rise a bold and powerful conception in the Shaksperean form, open to the investigations of modern thought and psychology. "Germinie Lacerteux" has been represented at the Odéon, and the ten tableaux of which the piece is composed have been hissed and hooted as heartily as ever piece was hissed and hooted. The failure of the play is complete. Then why say anything more about it? Simply because the personality of M. Edmond De Goncourt is a very considerable one in literary Paris. Since the death of Flaubert, M. De Goncourt has been looked upon as the chief of the realist school, of which MM. Zola and Alphonse Daudet are only the continuers. In quantities of prefaces and manifestoes M. De Goncourt has attacked the contemporary stage, and announced his desire and intention of renovating it by means of a piece which should be the integral manifestation of a new art. Hence "Germinie Lacerteux," produced at one of the State theatres, L'Odéon, and hissed! Why? Because the art of it is not new, but simply inadequate; because it is tiresome and incomprehensible; and because the characters are nearly all ignoble creatures, fished out of the lowest moral, or immoral, strata of society. "Germinie Lacerteux" is simply a dull and disgusting spectacle. The wonder is how men and, much more, ladies can listen to the dreadful language of this piece. But modern France has become singularly callous on matters of decency of language and thought; and, perhaps, this change for the worse is due not a little to the universal experience of obligatory military service, the army being, as we have seen, "a school of coarseness of language."

The manager of the Gaité Theatre has sued the *Gil Blas* newspaper for 50,000f. damages for a theatrical echo of a very harmless nature concerning the unsuccessful piece, "Tartarin sur les Alpes." The case is likely to be amusing; and, naturally, the whole press is against the rash manager.—A grand international Literary Congress will be held in Paris in 1889, under the united auspices of the Association Littéraire Internationale and the Société des Gens de Lettres. The latter is a serious association; but the former has hitherto served chiefly as a pretext for banqueting and for excursions, at reduced tariffs, to the different capitals of Europe.—Irritated by the puffery which General Boulanger organises around his person, President Carnot has been having articles written about himself in the papers in which he announces with comic gravity that he is going to ask the Chamber to vote him a large sum of money to build a fine ball-room at the Elysée. President Carnot wishes to be gay.—The workmen who are building the gigantic Eiffel tower have again struck, demanding an increase of 5f. a day. The present pay maximum is 1f. an hour to the carpenters, 90c. to the fitters, and 70c. to the boys. M. Eiffel refuses all concessions.

T. C.

AUSTRALIAN PROGRESS: MELBOURNE.

The early annals of the Australian Colonies obtained notice in our pages three months ago; and, during the Colonial and Indian Exhibition of 1887, descriptive articles on New South Wales, Victoria, South Australia, and Queensland, appeared in this Journal. Our Special Artist, Mr. Melton Prior, having travelled by the Canadian Pacific Railway over the American Continent, and having made the Pacific Ocean voyage from San Francisco to Sydney, reached Melbourne shortly before the opening there, in August, 1888, of the Great Exhibition associated with the Centenary Commemoration Festival of the foundation of New South Wales, the oldest Australian colony. His Illustrations of the opening of the Exhibition at Melbourne by Sir H. B. Loch, the Governor of Victoria, accompanied by the Governors of all the other British Colonies in Australasia, were published as soon as we received them; but we shall now present a series of Sketches of the two greatest Australian capital cities, Melbourne and Sydney, and of places in their neighbourhood, which will have a more than temporary interest. These subjects demand fresh comment and description, the statistics of which must be of the most recent date that can be procured in a collective form; and we have therefore consulted the "Australian Hand-Book" for 1888, concerning various local particulars, which may here be concisely put together for the information of readers in England (The "Australian Hand-book" is a yearly volume of 548 closely-printed pages, which is published by Messrs. Gordon and Gotch, of London, Melbourne, Sydney, and Brisbane).

VICTORIA.

The colony of Victoria, which was politically separated from New South Wales in July, 1851, is situated at the south-east of the continent of Australia, and lies between the parallels of 34 deg. and 39 deg. south latitude, and the meridians of 141 deg. and 150 deg. east longitude. Its boundaries are—on the north and north-east, the colony of New South Wales, from which it is separated by the River Murray and an imaginary line running in a south-easterly direction from The Springs on Forest Hill to Cape Howe; on the west by South Australia—the 141st meridian of east longitude dividing the two colonies; south and south-east, the Southern Ocean, Bass's Strait, and the Pacific Ocean. Its extreme length from east to west is 480 miles, its breadth 240 miles, and its area 87,884 square miles, or 56,245,760 acres. The coast-line, broken by several bays and capes, is about 600 geographical miles. It is estimated to be about one thirty-fourth part of the entire continent, and, comparing it with Great Britain (excluding the islands in the British seas), it is about 1800 square miles less in area.

A range of mountains traverses the entire length of the colony, dividing it into two unequal parts. This range runs in an eastern and western direction, generally at a distance of sixty or seventy miles from the seacoast. It is part of the Australian Cordillera, and is called the Dividing Range; all the Victorian rivers have their sources in this range or in its spurs, those to the north running towards the Murray, and those to the south flowing into the sea. Its eastern part, which divides the Gipps Land district from the Murray, is known as the Australian Alps. The Murray, the Goulburn, the Yarra-Yarra, and one or two of the Gipps Land streams, are navigable rivers; the Murray is a large river, with a course of 1300 miles, flowing generally westward, 980 miles of its course being along the northern border of Victoria. The principal harbours are in Port Phillip Bay, forty miles long, and about the same width at the widest part, area about 800 square miles, the head waters of which are called Hobson's Bay, and form the port of Melbourne; the south-western waters of Port Phillip Bay form Corio Bay, on the shores of which Geelong is located; other harbours are Portland Bay, Port Fairy, Western Port, and Port Albert.

The soil and climate of Victoria are most favourable to agriculture, growing wheat, barley, and oats, potatoes, rye, peas, beans, maize, sorghum, mangold-wurtzel and roots, clover, and various fodder grasses. Of tobacco, too, a large breadth has been devoted to cultivation. Among other things which have been successfully tried are hemp, flax, hops, chicory, beet, canary grass; and, in some localities, olives, oranges, guavas, black mulberries, and other fruits. The cereals do remarkably well. The greatest weight recorded of a bushel of wheat is 69 lb. 4 oz., the average is about 61 lb.; the average weight of oats is 40 lb., of barley 51 lb., and of maize 55 lb. As many as fifty and sixty bushels of wheat, sixty bushels of oats, and forty-two bushels of barley per acre have been obtained; but these returns are unusual. The wines made in the colony have taken a high place in the estimation of European connoisseurs. The apple, pear, peach, and nectarine, apricot, almond, gooseberry, currant, and fig, and the cabbage, cauliflower, turnip, carrot, parsnip, asparagus, pea, bean, water-melon, rock-melon, and tomato may be seen all growing together luxuriantly in the same plot of ground, while the borders blossom with the fuchsia, geranium, violet, daisy, and other common flowers of the English garden.

The mineral wealth of Victoria is great and diversified, but the wonderfully rapid progress of this colony is mainly due to its gold. One-third of the entire area of the country is believed to be occupied by gold-bearing rocks. The gold occurs in quartz and alluvium; the latter was, of course, the first worked, surface mining being comparatively easy. This was, however, quickly exhausted, and some of the sinkings are now carried on at considerable depths. Quartz reefing is now extensively followed, employing much machinery and a large amount of capital; and owing to the improvements in obtaining gold from the quartz, a yield of a few dwts. to the ton is found remunerative. The seven mining districts into which the colony is divided are Ballarat, Beechworth, Sandhurst, Maryborough, Castlemaine, Ararat, and Gipps Land. In the districts of Ballarat, Castlemaine, Maryborough, and Sandhurst there was an increase in the average yield per ton as compared with the previous year. Some of the quartz mines are now worked to a depth exceeding 2409 ft., and, so far as can be observed, there is little diminution in the yield of gold. For the past, to the end of 1886, the quantities and values of the principal metals and minerals raised since the discovery of the gold-fields were—gold, 54,424,399 oz., value £217,697,596; silver raised and exported, 255,578 oz., valued at £55,865; tin ore raised, smelted, and exported, in all, £342,459; copper ore, copper, and regulus exported, value £119,530; antimony ore raised and exported, value £202,768; lead, 660 tons of ore raised, producing metal of the value of £5326; iron, 5429 tons, value £12,535; coal, 13,153 tons, valued at £17,506; lignite, 8619 tons; kaolin, slates, flagging, magnesite, gypsum, mineral earths, and clays.

Although Victoria has not such extensive natural pastures as new South Wales and Queensland, stock-raising, the breeding of sheep, and the production of fine wool, are carried on, by different methods, with superior skill and care. The stock returns to March 1, 1887, were—308,553 horses; 1,303,265 cattle, of which number 335,727 were milch-cows; 10,700,403 sheep; 240,957 pigs.

All the railways in the colony are the property of the State. In the year ending June 30, 1887, there were 1880 miles of line open, and 521¾ miles in course of construction. The total cost of the lines was £26,171,609, being an average of £13,921 per mile for the 1880 miles open. The net revenue paid on the capital cost was 3·92 per cent. Melbourne has railway communication with all the up-country towns, and with Adelaide and Sydney.

Very many things are now manufactured in the colony, aided by the heavy Protective tariff. The number of manufactories, large and small, of all kinds, is 5783, employing 16,663-horse power and 51,469 hands, the value of premises and plant being £8,939,641. Among the exports during 1886 were—gold, inclusive of specie, £1,947,703; leather, £269,399; tallow, £121,900; wool, 107,984,839 lb., valued at £4,999,662; grain, £180,547; apparel and slops, £218,012; live stock, £394,475. The total value of the products of the colony, comprising gold, wool, tallow, hides, breadstuffs, minerals, bark, and timber manufactures, &c., exported in 1886 was £11,795,321. The value per head of the population was £11 19s. The total of yearly exports varies between twelve and sixteen millions sterling.

The Government revenue is about six millions and a half, the public debt of the Colony is about thirty millions, of which above twenty-five millions are represented by the railways. Victoria is under the control of a Governor appointed by the British Government, whose term of office is seven years, and of an Executive Council, and two Houses of Legislature. The Executive consists of the Governor of the Colony, and the Ministry for the time being. The Legislative Council is elected on a property franchise. The Legislative Assembly consists of eighty-six members, representing fifty-five electoral districts, containing, according to the latest return, 224,378 electors. It is triennial in its duration. Members are paid £300 per annum for their expenses. The qualifications of a voter are so easy that the system may be considered one of universal suffrage.

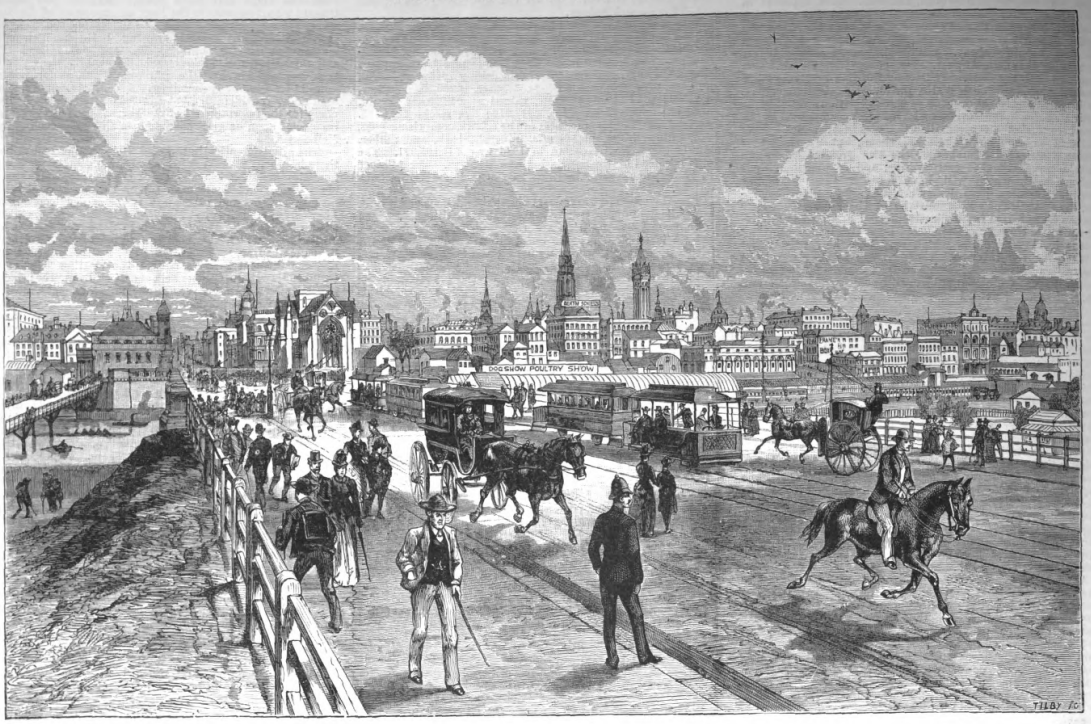
Victoria is divided into thirty-seven counties, and there are for the purposes of local self-government fifty-nine cities, towns, or boroughs, and 125 shires with municipal bodies. In 1886 the value of the rateable property in the cities, towns, and boroughs was £53,905,592; annual value, £4,824,911; revenue, £615,612. In the shires the value of rateable property was £71,973,156; annual value, £4,796,224; revenue, £615,125. From 1875 to 1885 upwards of 3½ millions sterling had been paid out of the State funds to the various local bodies. The estimated population of Melbourne and suburbs at the latest date was 395,000, inclusive of South Melbourne City, 37,000; Prahran City, 32,606; Richmond City, 31,286; Fitzroy City, 30,295; and Collingwood City, 28,800. The populations of the four principal extra-metropolitan towns in 1886 were as follows:—Ballarat, 41,110; Sandhurst, 36,570; Geelong, 20,890; and Castlemaine, 9400. The estimated population of the colony on June 30, 1887, was 1,019,106—viz., 540,954 males, and 478,152 females. The number of the aboriginal race does not exceed eight hundred.

MELBOURNE.

The city of Melbourne—the greatest city outside the United Kingdom within the British Empire, having a population of nearly 400,000, urban and suburban, within a ten-mile radius—is the metropolis of Victoria. Its central site, on the north bank of the Yarra-Yarra, two or three miles from the sea or Hobson's Bay, was in 1836 known as "Beargrass"; and a few turf or plank huts were then standing, while native "black-fellows," sheltering themselves at night with a screen made of bark, hung around the humble European settlement, which in half a century has grown to stateliness and wealth equalling the largest provincial towns in Great Britain. Its public buildings, mostly constructed of an imperishable blue stone, excel those of any other city of the same size in any part of the world, although some of them—the Parliament Houses, for example—are yet unfinished. The construction of the west front and dome of the Parliament Houses is now going on. The most noteworthy edifices are the Treasury; the Houses of Parliament (with a library of 35,000 volumes); the new Law Courts, in the Italian style, built of brick, faced with sandstone, which were nine years in erection, and have cost over £250,000, occupying a frontage to four streets of 300 ft.; the Free Library, containing over 110,000 volumes; the Post-Office; the building till lately used as Government printing-office; an immense edifice at the back of the Treasury for the Land, Mining, and other Departments; the Customs House, having a fine frontage to Queen's Wharf, and being near the spot where Mr. John P. Fawkner moored the little craft that was the pioneer of the fleets of merchantmen that have thronged the waters of Hobson's Bay; the Mint: the University, with the admirable Museum and the Wilson Hall, a magnificent building in the Perpendicular Gothic style of architecture, having a length of 140 ft., a breadth of 47 ft., and height of 47 ft. at walls to 84 ft. at the apex of the roof; the new Townhall, having a spacious room capable of seating 4000 persons, with one of the finest organs in the world; the various places of worship; St. Patrick's Cathedral (Roman Catholic), which has for many years been in course of erection; the insurance offices; the Exchange—a handsome building at the rear of the Old Hall of Commerce, with a fine hall; the theatres and the new Victoria Hall in Bourke-street, and many large and handsomely-built hotels. Conspicuous from every part of the city is Government House, a palatial building, with a square tower 145 ft. high, from whose summit a magnificent panorama of land and sea is obtainable, and in which the representative of Royalty is fittingly lodged. A cathedral for the Church of England, now in course of erection from the designs of Mr. Butterfield, is at the corner of Swanston and Flinders streets. Its extreme external length will be 273 ft., width 126 ft., central tower 156 ft. high, with lofty spire; it will afford accommodation for 1700 persons. Among the banking premises are the Bank of Australasia, a massive building of the Doric order; the London Chartered Bank, in the Greco-Italian style; the Bank of Victoria; the Bank of New Zealand; the Colonial Bank, and the English, Scottish, and Australian Chartered Bank, in the Gothic style.

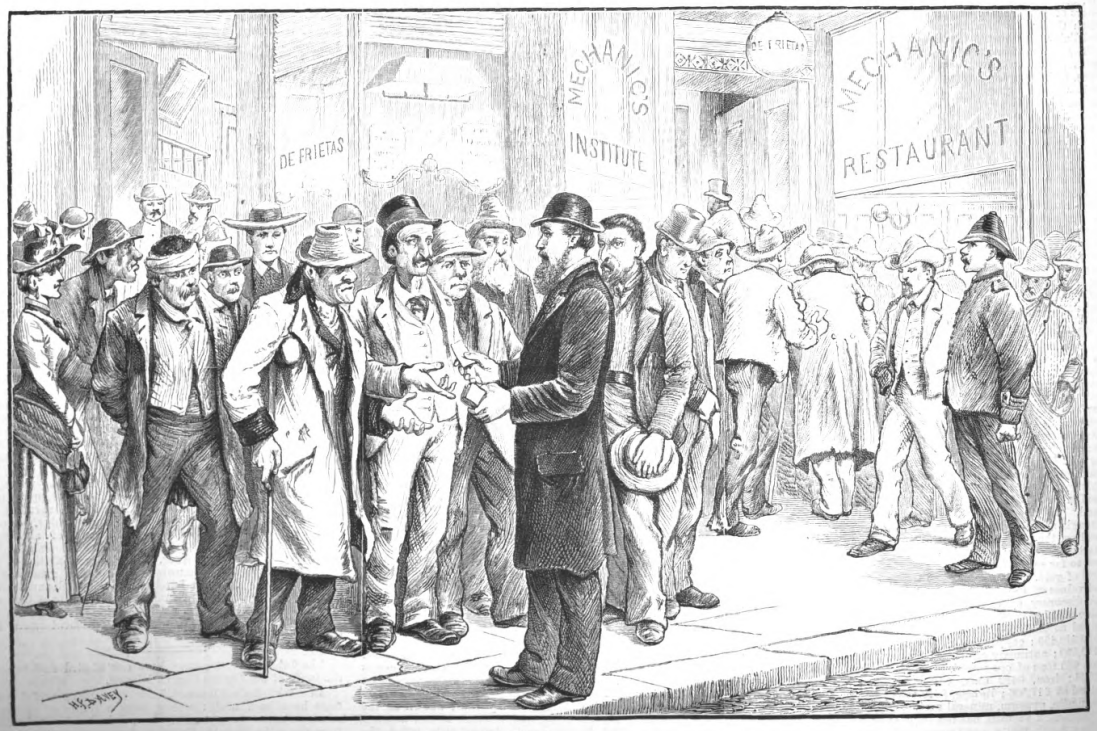
The port of Melbourne is at Sandridge (now called Port Melbourne), a township 2½ miles distant, situated on Hobson's Bay, and connected with the metropolis by road and railway. Port Melbourne has two large and commodious piers, jutting out a long way into the bay, affording accommodation for a large fleet, and allowing vessels of almost any tonnage to berth alongside. Hobson's Bay has accommodation for 800 vessels; it varies in depth from three to five fathoms, and has good anchorage, the bottom of stiff clay and mud. There is access for steamers and vessels of considerable size to the very heart of the city by means of the river Yarra-Yarra, which is navigable to Melbourne. A dyke of basaltic rock, known as the Falls, has been blasted away, and the river is now uninterrupted and is tidal to Richmond. Immediately below the Falls are the Queen's, Cole's, and Australian wharves, extending for about a mile along the north bank of the river, and used almost solely by intercolonial trading vessels and steamers, and, the Australian wharf especially, by colliers. A dry dock is here, which will admit of ships of 1100 tons being taken in, and a wet dock of large area is proposed, to which the railway from Spencer-street would be connected. On the opposite bank of the river are ship-repairing yards, foundries, and many other manufactories, also a stone wharf, built at great cost, alongside which large vessels can be accommodated, and having a very large steam-crane, capable of lifting up to fifty tons from the ships that berth there. Between this and the Queen's wharf opposite is the Pool, an expansion of the river, where the largest vessels using this navigation can turn with ease. At present vessels drawing 16 ft. can get to the Melbourne wharves at ordinary tides, and 18 ft. at high tides, and this depth will be increased. Since 1877 the water has been deepened 3 ft., and the minimum depth at low water is now 14 ft. 6 in. at spring tides. A canal to Sandridge has been under consideration, but Sir John Coode has submitted plans for the improvement of the Yarra, which have partially been acted upon—a great advantage to all vessels coming up to Melbourne.

The city is plentifully supplied with omnibuses, similar to those in use in New York, cars, cabs, waggonettes, and other facilities for suburban and street conveyance, which run at cheap fares. Cable tramways now traverse several of the leading streets, and others are in course of construction. There are three railway stations—one in Spencer-street, being the terminus of the up-country lines; the second in Flinders-street, from which the suburban trains to Port Melbourne, South Melbourne, St. Kilda, Brighton, and other places run; and the third at Prince's Bridge, the starting point of the trains to Hawthorn, Camberwell, and Gipps Land. The principal streets in Melbourne proper are one mile in length, 99 ft. in width, and run at right angles to each other; they are intersected by smaller streets which bear the name of the larger streets with the prefix of "Little." These leading thoroughfares are named, respectively, after Australian notabilities—Flinders, Collins, Bourke, Lonsdale, and Latrobe, running nearly east and west; and cross streets called Spencer, King, William, Queen, Elizabeth, Swanston, Russell, Exhibition, and Spring street. Elizabeth-street, in the valley of the two principal hills on which the city is situated, divides East Melbourne from West Melbourne. The adjacent suburbs, North Melbourne, Collingwood, Fitzroy, Carlton, Brunswick, South Melbourne, Prahran, and Richmond, present fine streets and roads, good private houses and shops. Prince's Bridge, lately reconstructed of iron, from the designs of Messrs. Jenkins and Granger, crosses the river by three spans of 100 ft.; and there are many other bridges. Melbourne has its public parks and gardens: the Royal Park, with a good zoological collection; the Botanical Gardens, on the south side of the Yarra; the beautiful Fitzroy Gardens, laid out with great taste and skill, containing a pleasing variety of trees and flowers; the Studley Park; the Fawkner Park; the Richmond Park, with the gardens of the Horticultural Society; the Treasury and Flagstaff Gardens. The central portion of the Carlton Gardens, about 20 acres, was utilised for the purposes of the International Exhibition. The buildings, which cost altogether some £250,000, covered an area of 5½ acres of ground. The main building is cruciform, and consists of a nave, 500 ft. long, running from east to west, and cut through its centre by a transept 270 ft. deep, the ends of which are north and south; at the south end is the chief portal, a tall arch 40 ft. wide and 60 ft. high, reached by a flight of broad stone steps. On each side are square towers 105 ft. high. Some 50 ft. behind the portico, and at the point where the transept intersects the nave, rises the dome, octagonal in form, and reaching the height of 223 ft. some 130 ft. above the main roof. At its base the central tower is 100 ft. square. In addition to the main building were annexes covering nearly 15 acres of ground, with centre avenues the whole length. These annexes have since been removed. Among the places of recreation and amusement may be mentioned the New Picture and Statuary Gallery, at the rear of the Public Library. The Melbourne Observatory, on the south side of the river Yarra, is provided with appliances of the first order, and the telescope ranks amongst the largest now in use. The Melbourne Racecourse, with a handsome grand-stand, situated at Flemington, and the Melbourne Cricket-ground, in the Richmond Reserve, also possessing an elegant and roomy stand and a fine brick pavilion with flat roof, are nowhere surpassed. The Racecourse on Cup and other principal race-days is thronged by a concourse of people rivalling that on the Epsom Downs; and the Melbourne Cricket-ground during Intercolonial and All-England matches presents a sight hardly to be seen elsewhere, upwards of 12,000 persons having been known to be present. The inhabitants of Melbourne are well provided with means of entertainment; there are five theatres, and the Victoria Hall for concerts of good music; while for social intercourse there are the Melbourne Club and the Athenæum Club; and the Mechanics' Institute, now called the Athenæum, has a good library and lecture-hall. The Eastern Market, rebuilt at a cost of £77,000, is lighted at night by electricity; there are several other markets. The city is everywhere well paved and lighted, and is supplied with good water from the Yan-Yean reservoir; but the supply will be increased by 25,000,000 gallons on the completion of the Watts River Aqueduct. Gas is supplied by the Metropolitan Gas Company, an amalgamation of three former companies. The city and suburban police-stations, the Government offices, and the offices of numerous private firms have communication by telephone. The shops, warehouses, and other commercial establishments, by their handsome exterior, bear witness to the activity of profitable trade. No deficiency or inferiority will be observed by the newly-arrived emigrant who has been accustomed to Liverpool or Glasgow; except in three particulars—the cabs are bad; the carriage roadway, off the principal thoroughfares, is often badly out of repair; and many of the roads are rendered disagreeable by open sewers. These faults ought soon to be amended.



Our Special Artist's Sketches comprise street views, of which more are to be given; the Pool, with its shipping, in a view looking north-east; Government House, sketched by him from a new point of view; Prince's Bridge, recently opened; the imitation of an encampment of aboriginal savages, in the Zoological Gardens; a free dinner given by public charity to the city poor, during the festivities of the Australian Centenary Commemoration; and a great sale of lands by auction. Town building land in Melbourne often realises enormous prices; in one case £5 a square foot was paid for a street frontage, and the purchaser re-sold it for £9 15s. a foot. These sales cause wild excitement among the speculators at Melbourne.

The Goldsmiths' Company have contributed £25 towards the funds of the Thames Church Mission.



In "Whitaker's Almanack" for 1889 many useful additions have been made: among them a return of the commissions given to men (615 in number) who have risen from the ranks since the abolition of purchase in the Army; papers on educational progress; the new Local Government Act; marks on porcelain; uniform, badges, and rates of pay of all ranks and departments in the Army; a complete list of the recipients of the Victoria Cross since its institution; a handy glossary of astronomical terms and facts; and a miscellaneous variety of shorter articles, tables, and abstracts. To the man of business "Whitaker" is indispensable.

THE ISLE OF MERKEN.

It was a still, hot day in August when we wound through the canals of Amsterdam in a little steam-launch, whose stoked-up fires and throbbing, malodorous engines made the heat of the breezeless day still more intense. We passed out into the Y, and through the great sea-lock, into the Zuider Zee, which stretched before us calm and desolate. At last, on the dim horizon, at some distance from the long, low shore on our left, three blocks, like ghostly haystacks, rose through the thin blue mist, and then gradually a strip of land uniting them appeared above the sea, shaping itself, as we approached, into an island covered with clusters of houses. It was the Isle of Merken, hidden away in a great curve of the Southern Sea, a land where the years bring no change as they roll by.

Suddenly, four hours after leaving the Amstel Quay, we turned sharp to the right, and ran into the little harbour of Merken, among the fishing smacks that lay sheltered along-side the staked and stone-bound dykes that formed the tiny port. We climbed ashore up a narrow ladder-like flight of steps in the cobbles of the sea-wall, which is raised several feet above the level of the island. The inhabitants stood and gazed at us, the men with their hands in their pockets, the women with their hands on their hips, and the children with their hands folded behind their backs. They looked at us calmly and placidly, with no hint of rudeness in their gaze; but with an air of tolerant criticism, as though we had been creatures of another planet, in whose existence they acquiesced, but in whom they took no more than a passing interest.

The Isle of Merken is nothing but a collection of sand-mounds rising from a low flat land hardly above the level of the sea. It is protected by stone and wattled dykes, and inter-sected by narrow canals about four feet wide, along which miniature barges or punts thread their way. These canals are crossed by single plank bridges pivoting on a huge nail, and having a heavy block of wood on the short arm, so that they can be swung back to allow the little barges to pass by. There are three mounds or hillocks, each one covered with its group of houses, which dispute for precedence among themselves. The central point of the first mound is the church and the pastor's house; of the second, the light-house; and of the third, the cemetery. All the buildings, except the pastor's house and the church, are of wood, clinker-built, tarred or painted black, and with tiled roofs. None of them can boast any great antiquity, for in the stormy history of the Netherlands Merken has frequently been taken and pillaged.

The men are burly, thick-set fellows, with the huge baggy breeches of the traditional Dutchman. These breeches and the gaiters which join them are made of dark-blue serge, very thick and strong, and the jersey is made of the same material. Sometimes on shore the men wear a blouse over all. On their heads they carry commonplace straw hats of the ordinary English shape, or close-fitting dark-blue caps with peaks, and on their feet *sabots* of surpassing size and thickness. The women have slight distinctions of dress for all ages, the costumes of young girl, betrothed maiden, wife, and widow all being different in some small particular. As a general thing they wear a heavy skirt of dark-blue serge bound with red or black, puffed out with many petticoats beneath, full at the waist and gathered in. Their long aprons and bodices, which are laced up behind, are of gay chintz, and their stock-ings are of knitted wool. On their heads they wear a close white cap, often covered with a many-coloured handkerchief, under which peeps out their pale golden hair cut in a fringe over the forehead. The unmarried girls also wear a long curl on each side of the face, hanging down against each cheek and on the shoulder, and all the women wear a couple of gold wire pins to keep their hair together behind. The children, both girls and boys, are dressed in exactly the same fashion until the age of eight. To a stranger all the solemn-faced, petti-coated little creatures seem girls; there are apparently no small boys on the island at all. The children are dressed in a brilliantly-striped cotton shirt, with a dark blue, knitted jersey underneath. Like the women, they wear a bodice of gay chintz laced up behind, a full skirt of dark-blue serge, woollen stockings, and *sabots*. They, too, have a fringe and two long, fair curls coming out from under a close bonnet of chintz, and all are so exactly alike that it is impossible, at first sight, to tell boys from girls. However, the boys are dis-tinguished by having two gold or silver buttons at the throat, fastening their cap-strings, or by a patch of embroidery on the crown of the bonnet. These gold and silver buttons are heir-looms in the families, and are handed down from father to son through the generations, and some of them are remarkable for their quaint, antique shapes and patterns.

The houses shown to the visitor are suspiciously like show houses, only one or two being open to inspection, and those full of curiosities and beyond measure tidy. The house or cabin to which visitors are always taken boasts a splendid collection of oaken chests with brass hinges, carved cabinets, armoires, and sideboards, tall clocks, pots and pans of ancient crockery, cups and bowls of finer ware, brass candle-sticks and lanterns, and against the wall an imposing warming-pan, also of brass. Two-thirds of one side of the room were occupied by a vast recess containing a wide open fire-place large enough to do the cooking for a regiment; the other third of the side being a niche in which was the owner's bed, piled up with bedding and blankets almost to the ceiling, and surmounted by a couple of bulky pillows, all after the approved Continental style for a bed in a cupboard. The room was a veritable collection of odds and ends of ancient Merken bric-à-brac; but the general effect was spoiled by the introduction of a couple of common cheap petroleum-lamps, with clumsy glass reservoirs and flimsy metal fittings, beside which even the grotesque photographs of relatives dotted about the walls had an air of antiquity and fitness. As for the widow and her pretty daughters, they were perfectly in harmony with their surroundings, their old-world dresses being most natural and becoming beneath the low rafters of that quaint old wooden house.

But the afternoon was wearing away, and we had to get back to Amsterdam; so we wound along the narrow paths by the side of the tiny canals, and returned to our launch in the little harbour. A very short run took us across to Monnick-endam on the mainland, where we entered the canal, and, passing the thick wood round the church, steamed down a broad, straight stretch of water nearly level with the sur-rounding country. On our left were wide, green meadows, dotted over with haymakers in long jack-boots reaching above the knee. Here and there were villages and farm-houses, and on the edge of the Zuider Zee, which stretched a thin blue line in the far distance, rose the tower of a church. On the right was a thick fringe of reeds, a road, a double line of trees, a ditch, and, beyond, the broad green plain, with cows, windmills, and farm-houses, to give a semblance of life to the monotony of the landscape. We visited Broek the clean, the beloved of tourists, and, passing through more flat country, and under bridges and through locks, where toll was demanded in a *sabot* dangling at the end of a long cord tied to a stick, we struck the Ship Canal and joined the crowd of vessels slowly making their way towards the busy city whose towers stood out against the cloudless sky on the other side of the Y.

J. W. P.

CHESS.

D H S (St. Austell).—Your first and third thoughts are no better than your second. Black cannot play R to R 4th—you mean R 5th. If he does that, White continues the solution given: 2. B to K Kt 8th (dis. ch), K to Kt 2nd; 3. Q to Q 7th, Mate. Now we have taken the trouble to make every move for you, perhaps you will be able to discover the problem is not impossible.

M JACKSON (Welton).—Shall be examined and reported upon shortly.

A NEWMAN.—Thanks; we hope the novelties may have a better fate than your last effort.

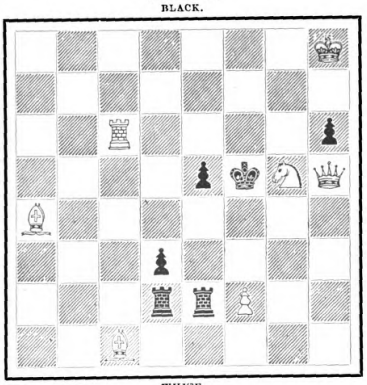
COLUMBUS.—Your problem is scarcely up to publication standard. The play lacks interest.

MRS. B.—We are not satisfied with your three-move problem. There is not sufficient variety to compensate for the easiness of solution.

J W PEIRS.—Your problems are not without merit, but the finish in each case is so tame that one of the special points of problem construction, beauty of mating position, entirely disappears.

W. PARSONS.—If, in your position, Black play 1. Kt to Q 3rd, how does mate follow?

*** In consequence of the holidays, several answers to correspondents must stand over for another week.



CORRECT SOLUTIONS OF PROBLEM No. 2324 received from O M B (Cape of Good Hope); of No. 2325 from G B Hewett (Middle Colaba) and O M B; of No. 2326 from G B Hewett; of No. 2327 from G B Hewett and J Drake (Natal); of No. 2330 from D D B (Dufftown) and J Bingley; of No. 2331 from W R Raillem, Mrs Kelly (Lifton), E G Boys, H Burley, J Hepworth Shaw, and Geo Saint, jun.

CORRECT SOLUTIONS OF PROBLEM No. 2332 received from E Louden, R H Brooks, W F Cartwright, Shadforth, Dawn, Howard A, J Coad, A Newman, R F S Banks, E Phillips, E Casella (Paris), L Desanges, R Worters (Canterbury), Dr Law (Sheffield), Dane John, G J Veale, T Roberts, James Sage, J Dixon, Mrs Kelly, D H S (St. Austell), Dr F St, Dr Waltz (Heidelberg), E G Boys, Julia Short, W R Raillem, Bernard Reynolds, Geo Saint, jun, J T W, J D Tucker (Leeds), Percy Ewen, W Wright, Percival, and M Sharp.

SOLUTION OF PROBLEM No. 2330.

WHITE.	BLACK.
1. Q to R 4th	Any move
2. Mates accordingly.	

PROBLEM No. 2334.
By B. G. LAWS.
BLACK.

WHITE.
White to play, and mate in two moves.

BLINDFOLD CHESS.

Game played by Mr. BLACKBURNE during his recent visit to the Midlands.
(*King's Bishop Gambit.*)

WHITE (Mr. Blackburne).	BLACK (Mr. Egger).
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. B to B 4th	P to K Kt 4th
A novelty of doubtful merit. Black was justified, however, in quitting a well-worn game for the purpose of em-barrassing his opponent.	
4. P to K R 4th	P to Kt 5th
5. P to Q 4th	Q to K 2nd
6. Kt to Q B 3rd	P to Q B 3rd
7. Q takes P	P to K R 4th
8. Q to K 2nd	B to Kt 2nd
9. Kt to B 3rd	P to Q 3rd
10. B takes P	
The opening now results in Black being minus a Pawn with *no* equivalent in position, something very unusual in the defence of a gambit.	
10.	B to Kt 5th
11. Castles (Q R)	Kt to Q 2nd
12. B to K Kt 5th	P to B 3rd
B to R 3rd, exchanging Bishops and bringing another piece into play, is preferable.	
13. B to B 4th	Castles
14. P to Q 5th	

WHITE (Mr. Blackburne).	BLACK (Mr. Egger).
The commencement of a strong attack.	
14.	Kt to K 4th
15. P takes P	P takes P
16. B to R 6th (ch)	K to Kt sq
17. B takes Kt	B P takes B
18. Q to B 4th	Q to Q B 2nd
19. Kt to K Kt 5th	
A well-timed move for Black threat-ened B to R 3rd (ch) and B to K 6th, &c.	
19.	B to R 3rd
20. R to Q 3rd	B to Q B sq
21. Kt to B 4th	B takes B
22. Q takes B	K to R sq
23. R to Q Kt 3rd	R to Kt sq
24. R takes R (ch)	K takes R
25. R to B sq	Kt to K 2nd
26. R to B 3rd	K to R sq
27. K to Q sq	B takes Kt
28. P takes B	Kt to Kt 3rd
29. R to Q B 3rd	R to Q B sq
An error that loses at once. Black had so far played with ingenuity, and well deserved the draw that seemed in-evitable.	
30. Kt to Kt 6th (ch),	and wins.

This being Christmas week, when anything serious is not to be thought of, we present a slight addition to the good cheer of the season in the shape of a dish of chess nuts:—

By A. NEWMAN.—*White:* K at K Kt 7th, R at Q B sq, B at K Kt 3rd, Kt at Q R 7th.
Black: K at Q B 2nd, Q at Q B 6th, R's at Q sq and Q Kt 2nd, B's at Q 2nd and Q R 8th, Knights at Q Kt 3rd and K R 2nd.
White mates in part of a move.

By A. NEWMAN.—*White:* K at K R 6th, Q at Q 8th, Kt at Q Kt 6th; Pawns at Q B 6th and Q Kt 7th.
Black: K at Q R 2nd, Kt at Q R sq.
White to play, and, by a literal interpretation of law, to mate in two moves.

The following end games in actual play are selected from Adolf Roegner's recently published collection:—

White (WINAWER): K at Q B sq, Q at K 4th, B at Q B 2nd, R at Q sq; Pawns at Q R 3rd, Q 5th, K B 2nd, K Kt 3rd, and K R 5th.
Black (BLACKBURNE): K at K Kt sq, Q at K 7th, R at Q Kt sq, B at Q B 6th; Pawns at Q 3rd, Q B 2nd, Q R 3rd, K B 2nd, K Kt 2nd, and K R 2nd.
Black to play and win.

White (ZUKERTORT): K at K Kt 2nd, Q at Q Kt 3rd, Kt at Q 5th; Pawns at Q B 7th, K B 3rd, K Kt 3rd, and K R 2nd.
Black (ENGLISCH): K at K sq, Q at Q B 3rd, Kt at K 3rd; Pawns at K B 3rd, K Kt 2nd, K R 3rd, and Q R 2nd.
White to play and win.

From the current number of Mr. Steinitz's *International Chess Magazine*:—

By J. W. ABBOTT.—*White:* K at K R 4th, Q at Q R 4th, R at K B 4th, B at Q 3rd, Kt at K B 2nd.
Black: K at K 4th, P at Q 4th.
White to play and mate in three moves.

SUBSCRIPTION TO THE ILLUSTRATED LONDON NEWS.

AT HOME.

Twelve months (including Christmas Number),	£1 9s. 3d.
Six months, 14s.	Christmas Half-Year, 15s. 3d.
Three months, 7s.	Christmas Quarter, 8s. 3d.

Copies will be supplied direct from the Office to any part of the United Kingdom and the Channel Islands, for any period, at the rate of 6½d. for each Number, paid in advance.

ABROAD.

The yearly subscription abroad, including the Christmas Number, is £1 16s. 4d. (on thin paper, £1 12s.), with the following exceptions:—

To Abyssinia, Aden, Bechuanaland, Borneo, Ceylon, India, Java, Labuan, Penang, Philippine Islands, Sarawak, Siam, Singapore, and Zanzibar, £2 1s. (on thin paper, 34s.)

To Diego Garcia, £2 5s. (on thin paper, £1 16s. 4d.)

Subscribers are specially advised to order the *thick* paper edition, the appearance of the engravings on the thin paper copies being greatly injured by the print at the back showing through.

Newspapers for foreign parts must be *posted* within eight days of the date of publication, irrespective of the *departure* of the mails.

Subscriptions must be paid in advance, direct to the Publishing Office, 198, Strand, in English money; by cheque, crossed "The Union Bank of London"; or by Post-Office Order, payable at the East Strand Post Office, to INGRAM BROTHERS, of 198, Strand, London.

ILLUSTRATED GIFT-BOOKS.

Otto of the Silver Hand. Written and Illustrated by Howard Pyle (Sampson Low and Co.).—The iron-handed German Barons and Knights of the Middle Ages have figured in many romantic tales; and the "castled crags" overlooking the Rhine and other rivers are supposed to have witnessed a good deal of lawless violence, rapacity, and cruelty. Little Baron Otto of Drachenhausen, whose gentle lady mother, when she gave birth to him, died of the shock that she suffered in seeing her fierce lord brought home sorely wounded from a fight with the neighbouring burghers, has been educated by the monks, and is an angel of charity and piety. He is captured by his father's enemy, the Baron Henry of Trutz-Drachen, who cuts off the child's right hand. The story, which goes on to relate his deliverance from the enemy's castle by One-eyed Hans, the battle that ensued, and the intervention of the Emperor Rudolph, is sufficiently interesting, and is well told by Mr. Howard Pyle, whose drawings, engraved in the twenty-five Illustrations, have also much force of conception and ex-pression. Otto, who has to wear a silver hand, becomes a page at the Emperor's Court.

That Boy Jack: A Story for Young Folk. By Helen H. Rogers, Author of "An Old-World Story" (J. Hogg).—This bright and wholesome little history of the childhood of a young gentleman who became a worthy officer of the British naval service is evidently written by a lady who knows what boys are, and how to make them what boys and men should be. She must also be acquainted with the domestic life of families belonging to the superior class of civilian officials resident at her Majesty's Dockyards; and if the character of the kind old Admiral is a portrait from life, we hope that no reform of the Admiralty will ever shut out the practice of such engaging virtues. How Jack Fenshawe, a bit of a scapegrace, in the tenth year of his age, inspired by an old sailor's yarns with a wish to go to sea, became a favourite with the Admiral by his exhibition of frankness and straightforwardness, in going to apologise for a fault, and was then taken with his sister Agnes on board the yacht for a day's pleasure; how he was sent to a private school in France, quarrelled with the French boys who derided England, ran away, lost his money, and was rescued from distress by meeting the Admiral at Cherbourg; and how, when his schooling was done, he entered the Royal Navy as a midshipman, with a noble career before him, let Miss Rogers tell the reader in her own pleasant way. The engravings, drawn by A. Hitchcock, are not bad illustrations of the tale.

Adventures of Her Serene Highness the Moon-faced Princess. By F. St. J. Orlebar (R. Bentley and Son).—The Princess, whose plump, round visage, with eyes of ineffable tenderness, looks forth in many of the illustrations in this amusing book, was born to the Mikado's Imperial family in Japan, but of an English mother, and in due time she came to England, where some thought her Serene Highness a dear soft little idiot, while others admired the bland suavity of her temper; but her grandmother and great-grandmother were quite delighted.

Brave Deeds. Collected and illustrated by Lieutenant-Colonel T. Marshman (Griffith, Farran, and Co.).—Colonel Marshman, who dedicates these historical anecdotes and pictures of military gallantry to his old comrades of the late 28th, now the 1st Battalion of the Gloucestershire Regiment, has ex-tracted brief authentic records from books of undeniable credit, and with a skilful pencil has delineated more than a dozen notable scenes on the field of battle, from the wars of Marl-borough, the Peninsula and Waterloo, to the Alma and Balaclava.

Nurse's Memories. By Charlotte M. Yonge (Eyre and Spottiswoode).—Miss Yonge's high literary reputation, especially as an engaging and instructive writer for girls, is a sufficient credential sign to recommend these chapters, which are illustrated by Frederick Marriott and Florence Maplestone with very suitable drawings.

Young Maids and Old China. Verses by F. W. Bourdillon; pictures by J. G. Sowerby (Marcus Ward and Co.).—Every page is adorned with one or more specimens of pretty blue china-ware, besides the coloured pictures of incidents in the life of girlhood, and the comments in passable poetry.

The Origin of Plum-Pudding, and other Fairy Tales. By Frank Hudson (Ward and Downey).—Mr. Hudson's stories, including his account of Father Christmas showing the fairies how to make plum-pudding for Tim Blink and his dame, "Shaun Murray's Challenge," "The Fairy of Fashion," and "The Fairy from France," as well as his burletta, "Othello the Second," which is not a tragedy, will be found amusing. The illustrations are by Gordon Browne.

The Children of the Week. By William Theodore Peters (G. Routledge).—These are American children, dwelling either in Philadelphia, as we suppose, or in New York; one of them is called Alexander Selkirk, jun., and the other is Char-lotte. They are visited by a Red Indian, who is on speaking terms with all the Days of the Week, and who repeats the tale which each Day has told him. Mr. Clinton Peters, a clever artist, furnishes the illustrations.

We may also notice, with decided approbation, the new volume of illustrated descriptive and historical geography issued by the Religious Tract Society, which is *Irish Pictures, drawn with Pen and Pencil*, by Mr. Richard Lovett; and Messrs. G. Philip and Son's *Pictures of Native Life in Distant Lands*, translated from the German of Professor A. Kirchoff, with twelve coloured plates designed by H. Leutemann, and printed at Fürth by G. Löwensohn. In *Flora's Feast* (Cassell and Co., Limited) the designs by Walter Crane, mingling graceful human forms with those of plants and flowers, are of artistic quality. *Sparks from the Yule-Log*, by W. G. Churcher, (Elliot Stock) including a short tale called "It," by Mr. Rider Haggard, is proper Christmas fare. The Bride-street publisher, Mr. E. Nister, has further produced two illustrated books, entitled *There Was Once* (old fairy-tales in prose), and *When All is Young*, pieces of verse addressed to children, with beautiful coloured engravings, printed at Nuremberg in the most perfect style; and *Fair Flowers from the Poet's Garden*, comprised in a few small pages. *Switzerland, its Mountains, Lakes, and Valleys* (J. S. Virtue and Co.) is a new and revised edition of a descriptive book, with 250 wood-engravings, by the aid of which one may share the pleasures of the tourist while staying at home. *In the Sunny South* (Walter Smith and Innes, publishers) is another story of children accompany-ing their parents in foreign travels, as far as the neighbourhood of Cannes; the illustrations are by Mr. T. Pym, who makes charming little figures and groups of the small people that everybody loves. The Religious Tract Society, among the greatest publishers of cheap and good popular literature, have this year also issued Mr. Harper's *Walks in Palestine*, illus-trated with twenty-four superb photogravures. Of the *édition de luxe*, limited to a hundred copies, and published at 45s., only twenty copies remain, and more than six hundred copies of the ordinary edition, at 25s., have been sold. This book may be pronounced one of the most artistic productions of the present season, and no choicer Christmas gift could be desired.

GREAT MEN'S FATHERS.

From the recently-published Diary of the late German Emperor Frederick readers will probably draw various conclusions, more or less capable of dispute; but there is one which I think nobody will care to impugn—namely, that he was a much greater man than his father. Circumstance—that mysterious power which bulks so largely in the lives of all of us—so ordered it that the Emperor William, though endowed with no more than average intelligence, and saved from mediocrity only by his iron strength of will and rigid adherence to his idea of kingship, should be placed in a position which made him seem quite an heroic figure. And, indeed, when set against such a background as two successful wars and the expansion of a small kingdom into a great empire, no one could look other than colossal. Agamemnon, Achilles, Priam, and the rest would be but ordinary mortals if the flames of burning Troy did not throw upon them a lurid light, and the companionship of deities elevate and dignify them. In the capacity for rule, in the statesmanship which moulds and shapes events so as to realise a lofty purpose, in self-repression and self-sacrifice and silent fortitude—the three qualities which differentiate a hero from his valet—in a word, in all the higher virtues, the son soared away above the father as if the two were not of the same blood. I wonder whether the grim old soldier fathomed ever so little the fine, sweet, and yet lofty character of his son; attained to any conception of the chivalrous magnanimity and calm wisdom which were stored up in that noble nature; was aware that he had begotten a paladin—a peerless prince? One cannot help doubting it, because the lesser minds can never correctly appraise the higher, and there can be no true sympathy where motives, aims, and impulses are radically unlike. One may even suspect that the parental affection was marred by a slight strain of jealousy. And, after all, it is unquestionably mortifying—as James I. experienced in relation to his son, Prince Henry—to discover that you have brought into the world a rival, a successful competitor with yourself, and that it is your own son who holds up the mirror to reflect his father's littleness of stature. Conceive the impatience of the best of men when they find themselves measured by a standard of their own making, and that a standard which overtops them by several inches! So long as an Amurath an Amurath succeeds, all goes well; but when a Solyman the Magnificent interrupts the succession of mediocrities, and puts his father to the blush, there's the dickens to pay! It takes a great deal of generosity for a man to be comfortable in such a position, and a great deal more for him actually to enjoy, and be proud of, his self-made depreciation. To be known as Mr. William Shakspeare's or Mr. John Milton's father—I suppose there are men who would rejoice in the distinction, and, perhaps, with good reason. On the whole, I take it to be a fortunate thing that so few fathers are exposed to this sort of trial. We have no right to ask too much of poor humanity; and it is just as well—is it not?—that most of us should be tolerably confident that we are *not* Great Men's Fathers.

Yet such an honour, or such a burden, whichever you like to call it, might happen at any moment to any man. How little could Gabrini, the small inn-keeper in the Roman Ghetto, have expected to become the father of the stately Tribune, Cola di Rienzi? or that "honest, poor man of Ipswich"—grazier or butcher, which was he?—to have introduced into English history such a magnificent personage as Wolsey, the Cardinal? When the Arras advocate suddenly disappeared from the sight of his family and clients, little did he think that the two-year old son he left behind him would one day terrorise France under the name of Maximilian Robespierre. It would seem, from an anecdote that has come down to us, that Madame Buonaparte anticipated the future greatness of Napoleon—which is probably true, as most mothers indulge in sanguine dreams of the ultimate prosperity of their offspring; but it is certain that no such splendid vision dazzled the eyes of his father, the honest and patriotic lawyer of Ajaccio (a much more respectable character, by-the-way, than his famous son ever became). The small Scotch farmer who laboriously tilled the ungrateful soil of Mount Oliphant, never dreamed, we may be sure, that his son Robbie would write the name of Burns among the immortals. He died, however, before the poet made his reputation, and therefore suffered no inconvenience from it. But I am sure that Sir Timothy Shelley bitterly disliked the kind of renown which accrued to him as the father of the author of "Queen Mab" and "The Revolt of Islam." No doubt it was a mystery to him to his dying day how he should have committed the mistake—he, the rigidly conservative and prosaic Sussex squire—of giving to the world a social revolutionist, a political destructive, and a brilliant poet in the person of his son and heir. And Martin Luther, the Reformer—what a surprise it would have been to his father, on that Eve of St. Martin, when, to the industrious miner a son was unexpectedly born at Eisleben, if the book of the Future had suddenly unfolded its leaves and shown him that son boldly riding towards Worms to vindicate the truth before the Diet of the German princes—"resolved to enter Worms in the name of the Lord Jesus Christ, although as many devils should set at him as there were tiles on the houses-tops"! Probably, honest John Luther would have wished that his wife had brought no such wonderful and perplexing man-child into the world.

It is not to be disputed that there are instances on record which point in a different direction, and to some extent vindicate the paternal character from what would otherwise be a sad reproach. One is familiar enough with the story of the careful training bestowed by the illustrious Chatham on his son William Pitt, afterwards known as "the pilot who weathered the storm"; though, as a matter of fact, he literally sank beneath it, and died of its violence. It is pretty, as Master Pepys would say, to contemplate the picture of the celebrated statesman supervising his son's practice in English composition, selecting for him the best models, teaching him how to manage his voice, and rejoicing in the promise he gave of future excellence. Pitt's great rival, Charles James Fox, received a very different training at *his* father's hands. But, at all events, Lord Holland was never discomposed by the early fame of his brilliant son. I am always much moved by the recital of the pride and exultation with which Turner's father watched the increasing reputation of the great artist; and I can fancy how astonished the whilom barber must have been at his successive triumphs. Yet in the painter's boyhood the father, it is only fair to recollect, predicted his son's rise in the world. "My son," he said to Stothard, the artist, "is going to be a painter." And when a small legacy was left to him, he immediately devoted the whole of it to paying the fees for his son's artistic education. We know that Sir Walter Scott's father—the "Alexander Fairford" of his romance of "Redgauntlet"—delighted in the laurels which his son wore always with such modest dignity. And with what eager interest did Pope's father, the retired linendraper, watch the growth of his son's popularity, and his gradual recognition by society as the greatest English poet of his time. The old man was fortunate in living to see his son not only famous, but—for a poet—affluent, and to linger for some months among the classic shades of Twickenham.

In not a few instances great men's fathers have escaped all responsibility by the simple expedient of dying before their sons attained greatness. The father of Sir Joshua Reynolds, for example, passed away just as his son's powers were beginning to mature. One could wish that industrious James Faraday, the blacksmith, had lived to see the expanding reputation of his son, the celebrated chemist. Charles Lamb's father, of whom he has drawn so charming a portrait in his essay "On the Old Benchers of the Inner Temple," struggled on until his son was twenty-two; but Elia's fame was of much later growth, and the old man's declining years were brightened by no anticipatory gleams of it. The Bristol linendraper who begot Southey did not live to see his son flourishing like a green bay-tree in the pleasant fields of literature. So small does the father sometimes seem in comparison with, or in contrast to, the celebrated son, that the latter's biographer often omits all reference to his departure from a world in which he had no other apparent *raison d'être* than to act as a progenitor. I have just looked at a memoir of Wordsworth which does not give even the date of his father's death! Schiller, the greatest (if we except Goethe) of the German poets, had reached manhood before his father died, whom he had sorely vexed by his vagrom disposition. Little could the elder Schiller foresee that the indifferent surgeon who fretted against the uncongeniality of his calling would develop into the author of "Wallenstein" and "The Maid of Orleans." It seems hard that fathers who have striven much for their sons' sake should disappear without any reward for their labours—even without that gratification which the fame and future of their sons might be expected to give; though they escape, it is true, the inconveniences to which I have already alluded. But the Bathgate baker, whom Providence made the father of Sir James Simpson, would have unquestionably been thankful to have witnessed the physician's brilliant success. His death occurred just as his son, a youth of nineteen, was going up for his surgeon's degree. And very probably the Vicar of Berkeley, who died when his son, Dr. Edward Jenner, was only five years old, would have rejoiced to hail in him so great a benefactor to mankind as the discoverer of vaccination. Petrarch's father would fain have made his son Francesco a lawyer: happily, his death left the poet free to follow the spontaneous impulses of his genius—to celebrate Laura in immortal verse, and to receive the Laureate's crown in the Roman Capitol. This is not the only case in which a great man's father has conferred on his son a double obligation—first, by becoming his father; and, second, by dying before he could do anything to mar his career (which, by-the-way, if he *had* done, he might never have proved to be a great man's father, for we know how Genius droops and withers in an uncongenial atmosphere). The father of Claude Lorraine wanted to make him a pastrycook. The father of Jacques Callot was persistently hostile to his son's artistic tendencies. And Benvenuto Cellini's father had no higher ambition for his son than that he should become an expert flute-player.

It would seem, if one judged from *à priori* reasoning, that a great man's father should himself be a great man; or else what becomes of the doctrine of heredity? But every biographical dictionary proves the reverse; and proves also that a great man's sons seldom carry on the paternal greatness, Shakespeare, Milton, Bacon, Raleigh, Cromwell, Napoleon, Wellington, Titian—one might fill a page with suggestive names. Nature, when she has produced a great poet, a great musician, or a great warrior, breaks the mould, and there's an end of it. That a man inherits to some extent the moral qualities of his parents may be allowed, though the hypothesis is one into which we must not inquire too curiously; but that he necessarily inherits his intellectual character from them appears to be a statement unwarranted by the general evidence of biography. Sometimes the advocates of heredity rely, I observe, upon the maternal element as the stronger, and the father is thrust into quite a secondary relationship; but then, at other times, we are carefully instructed to look to the great man's father as the original from which his greatness is derived. But is it possible to conceive that Shakespeare owed anything, ever so trivial, to the worthy commonplace burgess of Stratford-on-Avon, whose highest ambition was to wear the aldermanic robes? Or, to refer again to Claude Lorraine's father, what could the great painter inherit from the unintelligent individual who would have forced upon his son the cap and apron of the pastrycook? What was there in common between the rough sea-captain, Sir William Penn, and his son, the founder of Pennsylvania? When Benjamin Haydon told his father that he had made up his mind to be a painter, "Who has put this stuff into your head?" growled the father. "Nobody; I have always had it." "You will live to repent!" exclaimed the elder Haydon. "Never, my dear father; I would rather die in the trial!" Not much sympathy here between son and father! What did Locke owe to his "progenitor" Helvetius, or Diderot, or Newton? Among musicians, however, there *does* seem to be an inheritance of ability. Mozart's father, as everybody knows, was a practical musician. If Abraham Mendelssohn (who recognised the awkward position of a great man's father, wittily saying, "Formerly, I was the son of my father [the illustrious Moses Mendelssohn]; now I am the father of my son") had no technical acquaintance with the divine art, he *had* a wonderful insight into it. As for the Bachs, in them the musical faculty descended from father to son, and son to grandson, like the crown through a dynasty of Guelphs or Hapsburgs. Chopin's father was musically inclined. Beethoven's was his son's first teacher, and played both violin and clavier like a proficient. The father of Franz Schubert was a schoolmaster, but knew enough of the art to instruct his "gifted son." The greatest of violinists, Paganini, received his earliest musical lessons from his father, who loved music intensely, and was a performer on the mandolin. Haydn's father had a good tenor voice, and though he did not know a note, could accompany himself on the harp. Handel's father, it is true, was an exception to the rule, which is confirmed, however, by the case of our great English musician, Sterndale Bennett, whose father was an organist and a composer of songs. Sir Arthur Sullivan was born amid "sweet sounds;" and Dr. A. C. Mackenzie is descended from three generations of musicians.

Evidently, a heavy responsibility rests upon the fathers of great men, and, as we have seen, the relationship is one which involves a considerable amount of risk and inconvenience. So that, though a certain degree of distinction attaches to it, I feel inclined, on the whole, to offer my respectful condolences to any of my readers who are, or are likely to be, Great Men's Fathers.

O. Y.

In recognition of his recent gallant rescue of a drowning man from the River Tay, the Marquis of Breadalbane has been awarded the bronze medal of the Royal Humane Society.

Messrs. Maskelyne and Cooke, having returned from their annual provincial tour, have resumed their well-known entertainment at the Egyptian Hall. Their new programme is, as usual, excellent.

"Hazell's Annual for 1889," an excellent cyclopædic record of men and topics of the day, has just been issued, in an enlarged form, containing many new and revised articles. It is brimful of information on all sorts of subjects.

OBITUARY.

SIR BRODERICK HARTWELL, BART.

Sir Broderick Hartwell, second Baronet, of Dale Hall, Essex, died in London on Dec. 11. He was born July 17, 1813, the elder son of the Rev. Houlton Hartwell, M.A., Chaplain to George, Prince Regent, by Ruth, his wife, daughter of Mr. David Ball, of Bishops Hall, and succeeded his grandfather as second Baronet in 1831. He married, Oct. 28, 1834, Alicia, eldest daughter of the Rev. William Gunthorpe, of Antigua, and by her, who died April 24, 1859, leaves four sons and four daughters. His eldest son, now Sir Francis Houlton Hartwell, third Baronet, was born in 1835; married, in 1861, Emma Jane, only child of Sir Henry Dymoke, first and last Baronet, and has three daughters.

SIR WILLIAM PEARCE, BART.

Sir William Pearce, Bart., of Cardell, Inverkip, in the county of Renfrew, M.P. for the Govan Division of Lanarkshire, died at his town residence, 29, Park-lane, W., on Dec. 18. He was born Jan. 8, 1833, the only son of Mr. Joseph George Pearce, formerly of the Admiralty, by Louisa, his wife, daughter of Mr. William Lee, of Stoke, near Devon, and was created a Baronet last year. He studied naval architecture under Mr. Oliver Lang, and was appointed, in 1864, general manager of the ship-building yards of Messrs. Napier and Sons, of Glasgow; and, in 1870, became a partner in the firm of Messrs. John Elder and Co. He was a Magistrate for Lanark, Chairman of the Guion Line Steam-ship Company and of the Scottish Oriental Steam Shipping Company, and a director of several other companies. He was a member of the Royal Commission on Tonnage, in 1881, and on the Commission on the Depression in Trade, in 1885. He unsuccessfully contested Glasgow in 1880, but was returned for the Govan Division of Lanarkshire, as a Conservative, in 1885. Sir William married, Jan. 22, 1860, Dinah Elizabeth, daughter of Mr. Robert Sowter, of Gravesend, in the county of Kent, and leaves an only child, now Sir William George Pearce, second Baronet, barrister-at-law, who was born July 23, 1861.

ADMIRAL SIR CHARLES HILLYAR, K.C.B.

Admiral Sir Charles Farrel Hillyar, K.C.B., died suddenly, of heart disease, at his residence, Torre House, Torpoint, Cornwall, on Dec. 14, aged seventy-one. He was son of the late Rear-Admiral Sir James Hillyar, K.C.B., K.C.H., by Mary, his wife, daughter of Mr. W. Taylor, of Malta. He entered the Royal Navy in 1831, became Commander in 1848, Captain in 1852, Rear-Admiral in 1867, Vice-Admiral in 1873, and Admiral in 1878. He retired in 1882. The deceased Admiral had seen a great deal of active service, having taken part, in addition to other engagements, in the operations before Sebastopol, for which he received a medal with clasp, the Fourth Class of the Medjidieh, and the Turkish medal. He was Commodore commanding the East Indian Station, 1865 to 1867; Commander-in-Chief, Pacific Station, 1872 to 1873; and China Station, 1877 to 1878. He was made C.B. in 1869, and K.C.B. in 1887.

COLONEL THE HON. AUGUSTUS LIDDELL.

Colonel the Hon. George Augustus Frederick Liddell, Deputy Ranger of Windsor Park, died at his residence, South Lawn, Eton College, on Dec. 14, aged seventy-six. He was the sixth son of Sir Thomas Henry Liddell, Bart., who was elevated to the Peerage as Baron Ravensworth, in 1821, by Maria Susannah, his wife, daughter of Mr. John Simpson, of Bradley, and granddaughter, maternally, of Thomas, eighth Earl of Strathmore. He was educated at Eton, and was formerly in the Scots Fusilier Guards, in which he became Lieutenant-Colonel in 1846. For some years he was Comptroller of the Household and Equerry to her Royal Highness the late Duchess of Gloucester. He was Groom-in-Waiting to the Queen from 1858 to 1882, and Treasurer to the Duke of Edinburgh from 1866 to 1871. Colonel Liddell married, in 1842, Cecil Elizabeth, fourth daughter of the Hon. and Rev. Gerald Valerian Wellesley, D.D., Canon of Durham, which lady died in 1883, leaving four sons and two daughters.

We have also to record the deaths of—

The Rev. Alexander MacLennan, D.C.L., at the Vicarage, Brompton, Northallerton, on Dec. 13.

Major J. C. Fitzmaurice, formerly Assistant Commissioner, Kars, at Tunbridge Wells, on Dec. 10, aged sixty-seven.

Mr. John Rylands, at his residence, Longford Hall, Stretford, on Dec. 11, in his eighty-sixth year. He was a Magistrate for the county of Lancaster.

Mr. George Routledge, of Stone House, Carlisle, J.P. and D.L., the well-known publisher, on Dec. 13, at 50, Russell-square, aged seventy-six.

Lady Augusta Poulett, at 10, Hill-street, Mayfair, on Dec. 11, in her eighty-seventh year. She was the third daughter of John, fourth Earl Poulett, by Sophia, his wife, daughter of Admiral Sir George Pocock.

The Rev. Henry Bull, M.A., Honorary Canon of Christ Church, Oxford, and Rector of Lathbury, for over fifty years, on Dec. 18, aged ninety-three. He was one of the oldest clergymen in the United Kingdom.

Captain William Fordyce Blair, R.N., of Blair, in the county of Ayr, J.P. and D.L., on Dec. 11, at his seat near Dalry, aged eighty-three. He entered the Navy at an early age, was present at the Battle of Navarino, took part in the first Burmese War, and was engaged in the capture of the Morea.

Lady Alan Spencer Churchill, at her residence, Twickenham, on Dec. 10. She was the daughter of Mr. Thomas Dowker, of Huntingdon Hall, in the county of York, and married, firstly, in 1846, Lord Alan Spencer Churchill, who died in 1873, and secondly, in 1874, Mr. Alfred Henry Caulfeild.

Mr. Laurence Peel, last surviving brother of the late Right Hon. Sir Robert Peel, second Baronet (the distinguished statesman) at his residence, Sussex-square, Brighton, on Dec. 17, in the eighty-eighth year of his age. He sat as M.P. for Cockermouth from 1827 to 1830.

Mr. Richard Redgrave, C.B., after a short illness, at his residence, 27, Hyde Park-gate, S.W. He was born in 1804, and became a Royal Academician in 1852. He was formerly Surveyor of Pictures to the Queen and Inspector-General for Science and Art Department, South Kensington. He was created C.B. in 1880.

General David Downing, late of the Bengal Infantry, on Dec. 18, at his residence, The Grange, Plaxtol, Kent, aged eighty-eight. He served in the Punjaub Campaign of 1848 and 1849 with the division under Brigadier Wheeler, receiving a medal for his services. His commissions bore date—Captain, 1832; Major, 1839; Lieutenant-Colonel, 1845; Colonel, 1854; Major-General, 1857; Lieutenant-General, 1869; and General, 1875.

HOGMANAY.

Conspicuous among the folk-customs which, north of the Tweed, have survived from the remotest antiquity remains that of welcoming with wassail and good wishes the birth of the new year. To all appearance a pagan custom, dating from the pre-Christian past, it probably owes its permanence to instincts acquired amid the superstitions of the Dark Ages. Of late years, it is true, under the influence of Southern fashion, the festival of Christmas has seemed to be superseding that of New Year's Eve. But, as with many other picturesque and interesting customs of Scotland, the older observance remains yet deeply rooted in the heart of the people, and, having already survived so many changes of habit and creed, may be expected to outlive even this latest inroad.

There is much to be said, too, for the keeping of Hogmanay. Christmas, indeed, is the commemoration of a great religious event, and even in the North it appears interesting and appropriate enough as a Church festival; while to those with whom its observance has been a national and family custom it contains, of course, an ample significance. But to people who have inherited the instinct with their blood the end of the year remains a more fitting time for recalling the deeds and the days that are past; and the keeping of Hogmanay awakens, north of the Border, a subtle train of early feelings and associations—the pensive charm and sweetness of "auld lang syne." Scarcely a dwelling is there, cottage or hall, in the breadth of all broad Scotland, which has not, time out of mind, on this night of the year witnessed some observance of the ancient and pleasant festival. Alike under gilded ceilings and roofs of thatch there is to be heard then the toasting of old memories and the pledging of health and fortune to the house and its occupants throughout the dawning year. About every village cross, too, as the last moments of the year approach, the young men of the neighbourhood have ever been wont to gather to greet the incoming day with shouts of rejoicing and with the curious traditional custom of "first-footing." A generous festival it is, interesting from its antiquity and dear to most Scotsmen for the personal memories which it recalls. Even in the cities, where contact with the world tends greatly to obliterate such folk-customs, it is curious to see the ancient festival year after year assert itself, its observance the better assured, probably, because it brings back to those who attend it the scenes and memories of earlier, and, perhaps, happier, days.

Ever with the same details the time-honoured proceeding may be witnessed on the night of any 31st day of December at the cross of the ancient city of St. Mungo.

Some time before midnight the roar of the day's traffic has died out of the streets. The great warehouses are closed, and their windows gaze, like sightless eyes, into the deserted thoroughfares. To one imbued with the spirit of the hour, it is as if the city itself were thinking of the past; and the sudden sweep of wind that comes and dies away seems a sigh of regret for its departed glories. Many memories cluster about this ancient heart of Glasgow; and at such an hour and upon such a night it would seem little more than natural if the historic figures of the past should move again abroad. The spot itself, however, has, indeed, changed with time, and but few links are left it to recall bygone days. Even the Saltmarket at hand has been so altered of late years that if worthy Baillie Nicol Jarvie were to step out again on the causeway he would find no trace at all of the narrow, ill-paved, unlighted lane of his day, with its high, rickety houses, and creaking shop-signs. Rather must the city pride herself now upon her glories of the present. Far off, upon the great Clyde artery at Govan, where the nets of the salmon-fishers once hung in the sun to dry, the noise of a myriad hammers has just ceased for the holiday, and the iron skeletons of a hundred ships stand silent in the darkness, spectres not of the past but of the future. Overhead, too, between the high house-roofs, the heaven is very dark, and above the lanterns of the clock the Tron steeple is hidden from sight; but one side of the neighbouring tower—that of the ancient Tolbooth in High-street—reflects the red glare, from a mile away, of iron furnaces at Hutchesontown—those undying vestal fires of the nineteenth century—and the golden vane upon the spire shines, strangely lit, alone in the dark heaven. Significant indications, these, of the strong modern life that throbs in the veins of the ancient city.

But the great gilt hand of the clock overhead is approaching midnight, and along the streets, from the four points of the compass, comes the sound of innumerable hastening feet. It is the crowd gathering to observe this immemorial ceremony of "bringing in the year."

Few of the revellers, probably, reflect upon the antiquity of the custom they are observing; if they did, it might, perhaps, lend the proceeding a deeper interest in their eyes. To survive so many vicissitudes of history, the rite must once have possessed a solemn religious meaning. On the bank of the river below, the rough Norse rover has shouted "Wæs hael" to Thor; on the crest of the hill above, the Roman warrior has poured libations to Jove. Bishops of a feudal church within the storied cathedral walls have said the mass of Christ; and the spires of many a Presbyterian kirk now rise round the ancient cross. But through all changes, through the ebb and flow of Faith and Fear, has come down the relic of an older worship, and in the mistletoe and the New-Year mysteries the Druid lives among us still. These people are gathering now, as for ages their race has gathered, to bid farewell to the old year and welcome to the new, and to pour their mystic sacrifice to Time, not, indeed, as of old, upon the unconscious earth nor within the stone circle of a rude astronomy, but at least under the open sky and with something of the ancient wish-rites of the runes.

Quickly enough the last seconds of the year run out. The hand of the great clock is actually touching the hour. At last it strikes, a single bell—one, two, three—a bold sound in the silence; and immediately it is answered by a bewildering clangour from all the city belfries. Before the last stroke has died away a wild cheer bursts from the throat of the waiting crowd below. There is great commotion among the little groups; and as cheer after cheer rings up into the air, from the belfry overhead the city chimes ring out upon the night their welcome to the New Year.

Meanwhile everyone is drinking the health of everyone else, Celt and Saxon, countryman and citizen; and as no one can pass an acquaintance without hospitality offered and taken, and as, moreover, the dew of Ben Nevis is somewhat potent, the shaking of hands and wishing of good luck soon become fairly exuberant. Presently, however, everyone sets off to first-foot his friends.

The origin of this ceremony it is difficult to suggest, unless it be to represent some priestly visitation, a sacrament assuring to the people throughout the coming year the blessings of food and drink. A door-to-door proceeding, at any rate, it is—accompanied by much eating of cake and drinking of whisky, and it will last well into the morning hours. Lucky, for this performance, are accounted those dark of skin. If the first-footer be fair the tradition runs that it bodes ill-fortune for the year to the house whose threshold he or she has crossed; and often enough a door is shut in the face of such a friend simply because of his complexion. Moreover, the visitor must not come empty-handed; and so the bottle and broken wine-glass which each carries serve as a double introduction.

And now all who sat up till the city bells struck twelve, as well in the crowded tenements here as in the far-off suburbs of the rich, have wished each other a good New Year, and are retiring to rest. Among them, doubtless, there are many thoughts of sadness. Many a widow was a wife last year; many a ruined home was prosperous; many a soiled heart still was pure. But the old year, with its sorrow, has passed away in the night, and with the New Year's dawn a glimmer of hope comes in at the darkest casement. GEO. EYRE-TODD.

ECLIPSES IN THE YEAR 1889.

(From the "Illustrated London Almanack" for 1889.)

In the year 1889 there will be three Eclipses of the Sun, and two of the Moon.

Jan. 1. A Total Eclipse of the Sun, invisible from Europe. The Central Eclipse begins at 24 minutes after 9h p.m., Greenwich mean time, in longitude 179 deg. E. of Greenwich, and north latitude 53 deg. in the North Pacific Ocean. The Central Eclipse at noon, or at 16 minutes after 9h p.m., Greenwich time, will still be in the North Pacific Ocean, some distance west of the coast of North America, in longitude 138 deg. W. of Greenwich, and latitude 36½ deg. N.; and the Central Eclipse will end at 11h 30m p.m., Greenwich time, in North America, in longitude 94 deg. W. of Greenwich, and 52¼ deg. north latitude.

Jan. 17. A Partial Eclipse of the Moon on the morning of this day. It begins at 1 minute before 4h a.m. The middle of the Eclipse will be at 5h 30m a.m., and it will end at 7h a.m. At the time of the middle of the Eclipse about seven-tenths of the Moon's diameter will be hidden. The Moon sets at 8h 8m a.m.

June 28. An Annular Eclipse of the Sun, invisible from Europe. The Central Eclipse begins at 21 minutes after 7h a.m., in longitude 34 deg. W. of Greenwich, and south latitude 32½ deg., a little to the west of Southern Africa. The central line will pass over South Africa a little north of Madagascar, across the Indian Ocean, to a place in 98 deg. east longitude, and south latitude 27¼ deg., where the Central Eclipse will end at 39 minutes after 10h a.m., Greenwich time.

July 12. A Partial Eclipse of the Moon, during the evening. The Eclipse begins at 43 minutes after 7h p.m., but at this time the Moon is below the horizon. She rises at London at 8h 13m p.m., partly eclipsed. The middle of the Eclipse will be at 54 minutes after 8h, at which time rather less than one-half of her diameter will be hidden; and the Eclipse will end at 8 minutes after 10h p.m.

Dec. 22. A Total Eclipse of the Sun, not visible from Europe. The Central Eclipse begins at 13 minutes after 11h a.m., Greenwich time, in longitude 79 deg. west of Greenwich, and 15 deg. north latitude, in the Caribbean Sea; then passes near the northern boundary of South America, crosses the Equator in 30 deg. west longitude, and thence across Southern Africa; and ends at 35 minutes after 2h p.m., in 48 deg. 40 min. east longitude, and 5 deg. 10 min. north latitude. This Eclipse will be visible in the northern half of South America; in Africa, with the exception of the north-west; in Arabia, and in the Atlantic Ocean.

An old woman, Bridget Gallagher, who was arrested at Queenstown, after landing from the Umbria, for smuggling into the country fifty rounds of ammunition, was before the Magistrates on Dec. 19, and was ordered to pay a fine of £2 10s. and costs, or, in default, to go to prison for one month.

Messrs. Hudson and Kearns, of 83, Southwark-street, have issued their practical diaries for 1889, among them being the well-known ones for architects and builders. Their date-indicating blotting-pads are most convenient, and we would call attention especially to Nos. 7 and 8.

The new revised edition of "Dod's Peerage, Baronetage, and Knightage" handbook is now published by Messrs. Whittaker and Co. and Messrs. George Bell and Sons. "Dod," as most people know, differs from other Peerages and Baronetages in the fact that it treats, not of families, but of individuals, so that by the aid of its alphabetical arrangement the question, "Who is Lady Mary Jones or the Hon. John Smith?" may be settled in a moment. The new edition has been compiled with great care.

THE NEW FORCES IN INDIA.

A lecture has been delivered on this topic, at the London Institution, by Sir William Wilson Hunter. He said he proposed to deal with the subject familiarly, as one which had been long on his mind. The new India of which he had to speak was an India easily intelligible to all thinking men and women. No uncouth native names were wanted to explain its conditions and needs. The problems of the new India were the problems of free and growing peoples. They were the same problems which Englishmen had solved for themselves. We had undertaken the solemn task of becoming the earthly Providence to 250 millions of people. We had made them our fellow-subjects, under our beloved Queen, so far, at least, as concerns the educated Hindoos. At the same time we had to deal with dense masses who still thought the old Asiatic thoughts and lived the old Asiatic life. During seven centuries the warring races of Central Asia made India an Aceldama. Some mighty dynasty might at intervals give a breathing space. But the dread of destruction was never long absent from the Indian mind. Not once during the present century did the East India Company's Governors-General—e.g., Lord Metcalfe—feel strong enough to make invasion from without impossible, and to put down the internal predatory races. Her Majesty's forces were needed to grapple with the Mutiny of 1857. The lecturer gave the details of the happy revolution in trade, which by changing its character had so vastly increased its volume. India was no longer a mere maker of nick-nacks and a retailer in luxuries. It had become a great wholesale merchant and manufacturer, working with steam-mills and exporting agricultural products on an enormous scale. The same feeling of certainty and security was the motive power in the social and political as well as in the industrial development of the India of to-day. Having dealt with the industrial and political results of the new forces in India, Sir William Hunter proceeded to consider their social and religious results. With regard to the effect of the new forces upon the religious conceptions of the people, his view of the matter was that a new religion would before long arise in India. The forces at work were so powerful and so certain to produce some result or another that a new religion would arise. But he did not think that new religion would be our modern Christianity, although he believed that the Christian missions were at this moment among the most powerful factors in designing what that new religion should be. He summarised the main facts as to education in India, and exposed the fallacy of estimating the influence of the lettered class by the mere number of university graduates. In conclusion, he said we have thrown open the flood-gates of a new industrial, political, and social life in India. It would be as impossible to arrest the new political activity as to put a stop to the building of the cotton factories at Bombay, or to arrest the new educational activity by shutting up the five Indian universities (as Russia shut up her universities at the beginning of this year), and to close the 122,000 Indian schools and colleges.

ZOOLOGICAL SOCIETY'S GARDENS.

The Zoological Society's series of anthropoid apes has just received an important addition in the shape of a second specimen of the bald-headed chimpanzee (*anthropopithecus calvus*), which has been obtained by purchase of Mr. Cross, of Liverpool. The fine adult female of the same species which has been in the society's collection more than five years, and is commonly known as "Sally," has attracted great attention among naturalists as being the only example of this distinct form of chimpanzee known in captivity; and also on account of its remarkable intelligence. It is, therefore, of much interest to have acquired a second individual of the same form. "Sally's younger sister" has been placed in an adjoining compartment in the apes-house, in company with a young female of the common chimpanzee, brought home from Sierra Leone and presented to the society by Mr. T. J. Alldridge, F.Z.S., in May last. The uniform black face and short-haired, almost bare, forehead of the bald-headed chimpanzee render the two species distinguishable at a glance. Along with these two chimpanzees are associated a young female orang (*Simia satyrus*) and a silver gibbon, lately presented by Captain D. L. Delacherois; so that all the three known genera of anthropoid apes may be now seen represented by living specimens.

It is stated that the National Rifle Association has acquired the Brookwood site, and will hold next year's meeting there.

A brass tablet has been placed in the crypt of St. Paul's Cathedral, in memory of the late Field-Marshal Lord Strathnairn. It was designed by Messrs. Frank Smith and Co., of Southampton-street, Strand.

The last monthly meeting of the Freemasons' Board of Benevolence for the year 1888 was recently held at Freemasons' Hall. Mr. Robert Grey presided. There were forty-seven applicants for assistance, and they were relieved with a total sum of £967. At the close of the meeting it was announced that during the year 1888 the total sum granted by the Board, including that evening's grants, had been £11,468, and that to meet the heavy calls on the fund, stock to the amount of £9000 had been sold out, the annual income of the fund not being sufficient to meet the awards.

"LOVE-&-LUCK" JEWELLERY. REGISTERED BY J.W.BENSON

Regd. No. 104709

"Luck that Love finds ever." Brilliant Brooch, £30. Brilliant Bracelet, £35.

SPECIAL DETAILED LIST POST-FREE.

OXFORD-STREET, W.; AND POULTRY, E.C., LONDON.

MANUFACTORIES AND SHOW-ROOMS:

34, King-street, Covent-garden; and Norfolk-st., Sheffield.

Allen & Hanbury's "Perfected" COD-LIVER OIL.

"Is as nearly tasteless as Cod Liver Oil can be."—Lancet.

"Has almost the delicacy of salad oil."—Brit. Med. Journal.

"No nauseous eructations follow after it is swallowed."—Medical Press.

It can be borne and digested by the most delicate; it is the *only* oil which does not "repeat"; and for these reasons the most efficacious kind in use. In capsuled Bottles only, at 1s. 4d., 2s. 6d., 4s. 9d., and 9s. Sold Everywhere.

BYNIN, LIQUID MALT, forms a valuable adjunct to Cod-Liver Oil, being not only a highly-concentrated and nutritious Food, but a powerful aid to the digestion of all starchy and farinaceous matters, rendering them easy of assimilation by the most enfeebled invalid. BYNIN, being liquid, is entirely free from the inconvenient treacle-like consistence of ordinary Malt Extract; it is very palatable, and possesses the nutritive and peptic properties of malt in perfection. It is a valuable ailment in Consumption and Wasting Diseases. **In Bottles, at 1s. 9d. each.**

THROAT DISEASES.—BROWN'S BRONCHIAL TROCHES, which have proved so successful in America for the cure of coughs, colds, hoarseness, bronchitis, asthma, catarrh, or any irritation or soreness of the throat, are now imported, and sold in this country at 1s. 1½d. per Box. Put up in the form of a lozenge, it is the most convenient, pleasant, safe, and sure remedy for clearing and strengthening the voice in the world.

Cure Irritation in the Throat.

BROWN'S BRONCHIAL TROCHES,
For Public Speakers.

BROWN'S BRONCHIAL TROCHES,
for Singers.

BROWN'S BRONCHIAL TROCHES.
Used by everybody.

BROWN'S BRONCHIAL TROCHES,
Sold by all Medicine Dealers.

BROWN'S BRONCHIAL TROCHES.
Sold at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES
are perfectly safe.

BROWN'S BRONCHIAL TROCHES reach directly the affected parts, and give almost immediate relief. All suffering from irritation of the throat and hoarseness will be agreeably surprised at the almost immediate relief afforded by the use of Brown's Bronchial Troches. The demulcent ingredients allay pulmonary irritation, and after public speaking or singing, when the throat is wearied and weakened by too much exercise, their use will give renewed strength to the vocal organs. For public speakers, singers, and those who overtax the voice, they are useful in relieving an irritated throat, and will render articulation easy. Sold by all Medicine Dealers, at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES.

Sold in Paris.

BROWN'S BRONCHIAL TROCHES.
Sold Everywhere.

BROWN'S BRONCHIAL TROCHES.
Prepared by John I. Brown and Sons, Boston, United States.

BROWN'S BRONCHIAL TROCHES for clergymen's sore throats. Public speakers and singers will find them beneficial in clearing the voice before speaking or singing, and relieving the throat after any unusual exertion of the vocal organs, having a peculiar adaptation to affections which disturb the organs of speech. Few are aware of the importance of checking a cough or "slight cold" in its first stages. That which in the beginning would yield to a mild remedy, if neglected soon attacks the lungs. The Troches give sure and almost immediate relief. They may be had of any Medicine Dealer, at 1s. 1½d. per Box.

BROWN'S BRONCHIAL TROCHES
Cure Coughs.

BROWN'S BRONCHIAL TROCHES
Cure Colds.

BROWN'S BRONCHIAL TROCHES
Cure Hoarseness.

BROWN'S BRONCHIAL TROCHES
Cure Soreness of the Throat.

BROWN'S BRONCHIAL TROCHES
for Irritation of the Throat.

BROWN'S BRONCHIAL TROCHES or COUGH LOZENGES. They are very pleasant to take, contain no opium, and children will find them very beneficial in cases of whooping-cough. People who are troubled with a hacking cough should try them at once; they are a safe and sure remedy. Brown's Bronchial Troches for pulmonary and asthmatic disorders have proved their efficacy by a test of many years, and have received testimonials from eminent men who have used them.

For Wills and Bequests, see page 790; Ladies' Column, page 792; Playhouses, page 794.

WILLS AND BEQUESTS.

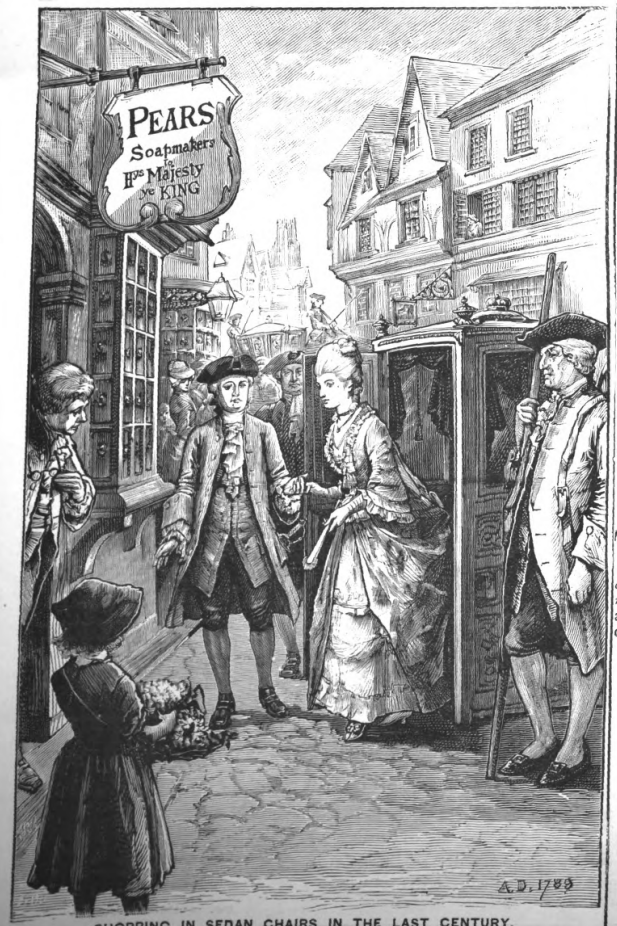
The will (dated June 20, 1884) of Mr. William Quilter, late of No. 5, Moorgate-street, and No. 28, Norfolk-street, Park-lane, a former president of the Institute of Accountants, who died on Nov. 12, was proved on Dec. 13 by William Cuthbert Quilter, M.P., and Edward Frederick Quilter, the sons, and Thomas Abercrombie Welton, the executors, the value of the personal estate amounting to upwards of £575,000. The testator, after stating that his wife, Mrs. Susan Quilter, is well provided for, bequeaths £71,740 to his son, William Cuthbert Quilter; £94,000 to his son, Edward Frederick Quilter; and £96,000 to his son, Harry Quilter, these sums, together with what he has advanced during his lifetime, making up each son's portion to £100,000; £45,000 each, upon trust, for his daughters, Mrs. Eley and Miss Sarah Ellen Quilter, and an additional £5000 to his last-named daughter; £1000 to his niece, Mrs. Slater; an annuity of £200 to his sister, Mrs. Charlotte Abrahams; 500 guineas and £20 per annum for five years to his partner, Thomas Abercrombie Welton; £10 10s. to each of his clerks; £5 5s. to each of his servants; and £10,000 to his son Harry, in lieu of a share of the residue. The residue of his real and personal estate he leaves to his sons, William Cuthbert and Edward Frederick, in equal shares.

The will (dated June 14, 1886) of the Rev. Walter Sneyd, J.P., F.S.A., late of Keele Hall, Staffordshire, and No. 55, Portland-place, W., who died on July 2, was proved on Dec. 14, by Ralph Sneyd, the son, and the Ven. Ernald Lane, the executors, the value of the personal estate being sworn to exceed £235,000. The testator bequeaths £200 to the United Kingdom Beneficent Society; £500 to the North Staffordshire Infirmary, and £100 each to the Convalescent Home and the chaplaincy attached thereto; £100 to the Society for Promoting Christian Knowledge; £100 to the Society for the Propagation of the Gospel in Foreign Parts; and £300 to the Vicar of Cuddesden, upon trust, to apply the income for the benefit of the poor of the hamlet of Denton at Christmas-time; £100 to Lord Bagot; £100 to Lady Bagot; £50 each to Lord Zouche, the Earl of Delamere, and the Hon. Mrs. Charles Bagot; £500 and an annuity of £200 to his sister, Mrs. Wise; £1500, his house, No. 55, Portland-place, with the furniture therein, and the income of a sum of £60,500 to his wife, Mrs. Henrietta Elizabeth Sneyd; his house in Eaton-square, upon trust, to pay the income thereof to such of his unmarried daughters, and, on their marriage or death, to his daughter, Mrs. Louise Georgiana Howard; £2000 to his daughter Mrs. Howard; £3000 to his daughter Isabel Clara; £2000 to his daughter Caroline Henrietta; and £1000 to his daughter Eleanor Frances; three-fourths of a sum of £10,000 Consols and £8000 cash between his last-named three daughters; and other legacies to relatives, friends, and servants. Under the powers contained in the will of his brother, Ralph Sneyd, Esq., he charges Keele Hall, with the manors, lands, &c., in Staffordshire (by the said will settled on him for life, with remainder to his son Ralph, with remainder to his first and other sons in tail male), with the payment of £1800 per annum to his wife during her life, and portions of £6000 each to his four daughters. On the death of his wife, the sum of £60,500 is to be divided between his four daughters; but the share of Mrs. Howard is to be £9500 less than the shares of each of his other daughters, she having had certain sums given her on her marriage. His freehold and copyhold estates, and certain silver and furniture, are to follow the same trusts as those relating to Keele Hall. The residue of his personal estate he leaves to his son Ralph absolutely.

The will (dated Nov. 24, 1887), with a codicil (dated May 25, 1888), of the Right Hon. Sir Richard Baggallay, late of No. 55, Queen's-gate, formerly one of the Lords Justices of the Court of Appeal, who died on Nov. 13, at Hove, was proved on Dec. 18 by Dame Marianne Baggallay, the widow, Henry Charles Baggallay, Ernest Baggallay, and Claude Baggallay, the sons, the executors, the value of the personal estate amounting to upwards of £64,000. The testator gives and devises his freehold estate called "Mapletreuse," at Cowden, Kent, all his shares in certain public companies, and his stock in the English railways and the Indian Three per Cents, and a sum of £17,500, upon trust, to pay the income thereof to his wife, for life; at her death, his estate is to be sold, and the proceeds thereof, and the said stocks and shares, are to be equally divided between his children; and out of the sum of £17,500 he gives £2000 each to his sons, Henry Charles, Claude, Ernest, and Herbert, and the surplus between all his children. He bequeaths £3000, upon trust, for his daughter Gertrude Hilda; and £5500, upon trust, for his daughters, Dora Helen, Marian, and Gertrude Hilda; and he states that he has made advances and settlements to his other children during his lifetime. The residue of his property he leaves to his wife absolutely.

The will (dated Sept. 19, 1885) of Mr. Henry Wilson Demain-Saunders, J.P., late of Fanshaws, Herts, who died on Nov. 11, was proved on Dec. 13 by Mrs. Minnie Demain-Saunders, the widow and sole executrix, the value of the personal estate amounting to upwards of £51,000. The testator leaves all his property, whatsoever and wheresoever, both real and personal, to his wife.

The will (dated Nov. 9, 1882) with a codicil (dated March 24, 1888) of Mr. Felix Vigne, formerly of Tokenhouse-yard, but late of No. 5, Pembridge-place, Bayswater, who died on Oct. 24, was proved on Dec. 7 by Francis Alfred Hawker and John Henry Vigne, the nephew, the executors, the value of the personal estate exceeding £42,000. The testator bequeaths £500 to his brother John, £100 to his brother Frederick, £50 to Mrs. Ada Vigne; an annuity of £50 to his sister, Mrs. Frances Emma Sinclair; £200 each to the Bishop of London's Fund and the Society for the Propagation of the Gospel in Foreign Parts; and annuities to servants. The residue of his real and personal estate he leaves as to one fourth thereof to his brother John, one fourth to the children of his deceased brother Henry Thomas, and one fourth each to his brother Herbert and his brother-in-law, Francis Alfred Hawker.



The will (dated Oct. 6, 1880), with a codicil (dated Oct. 17, 1882), of Mr. Edward Augustus Dearman Brooshooft, late of Kirkella, East Riding, Yorkshire, who died on Nov. 18, was proved on Dec. 13 by Thomas Holden, Vincent Henry Parker, and William Hodgson, the executors, the value of the personal estate exceeding £41,000. The testator bequeaths £3000 to the National Life-Boat Institution, to found three life-boats to be called "The Jonathan Marshall, Sheffield," "The Vincent Wilkinson, Kirkella," and "The Sarah Brooshooft, Kirkella"; £5000 to the Sheffield General Infirmary; £1000 to the Sheffield Dispensary; £1000 to the Hull Dispensary; £5000 to the Hull Seamen's and General Orphan Asylum (Spring Bank, Hull); £800 to the National Artillery Association, for the purpose of presenting his annual prize; £500 each to Edith, Helene, and Amy Holden, and £1500 between the other children of Thomas Holden; £2500, upon trust, for Mrs. Spencer for life, and then to her two daughters; £500 to each executor; £2000 among the children of Mrs. Parker; £2000 between the children of Mrs. Bailey; £1500, and the use, for life, of his furniture, to his wife; and many other large legacies at her death.

The will (dated Dec. 17, 1879), with two codicils (dated June 26, 1884; and Nov. 31, 1886), of Mr. John Leighton Wade Dennett, late of Woodmancote Place, Sussex, who died on Sept. 29, was proved on Dec. 7, by James Warnes Howlett, Arthur Smith, and John Whiteman, the executors, the value of the personal estate exceeding £39,000. The testator bequeaths his house called "Felstead Villa," £1100 and an annuity of £50 to his servant Jane Buckman; £100 to each executor; £1500 to John Whiteman; annuities of £50 each to Mrs. Float and Maria Gorringe, and other legacies. He devises his Woodmancote estate, upon trust, for his eldest or only son, and in default thereof to his eldest or only daughter, and in default thereof to Arthur Smith, his heirs and assigns. The residue of his property he leaves to his children in equal shares, and on failure of issue to Arthur Smith.

Letters of Administration of the personal estate of Mr. Edward John Jones, late of Frongog, in the county of Cardigan, who died on Aug. 23, at Aberystwith, intestate, have just been granted to Mrs. Mary Jones, the widow, the value thereof exceeding £32,000.

BOOKS FOR SHIPS' LIBRARIES, &c.

Mr. W. Evan Franks, secretary of the St. Andrew's Waterside Church Mission, 65, Fenchurch-street, London, E.C., writes as follows:—"It is now twenty years since an appeal was first made through the columns of *The Illustrated London News* for books, magazines, illustrated papers for ships' libraries and for distribution on emigrant and other vessels. Since then 8000 libraries have been supplied free to outgoing ships, besides tons of magazines, illustrated papers, &c., sent to our fishery fleets, sailors' homes, and hospitals, and to foreign stations. If possible, we always put a bound volume of *The Illustrated London News* in each library. Nothing is more appreciated by our sailors. May I appeal again to your readers' kind help in replenishing our stock, now getting low, and on which at this season demands are very great. Any gifts sent addressed to me will be thankfully acknowledged."

SHOPPING IN SEDAN CHAIRS IN THE LAST CENTURY.
Queen Charlotte's visit to PEARS' for Soap for her Complexion *a hundred years ago.*

Good Complexion!
AND Nice Hands!

NOTHING adds so much to personal attractions as a bright, clear complexion, and a soft skin. Without them the handsomest and most regular features are but coldly impressive, whilst with them the plainest become attractive; and yet there is no advantage so easily secured. The regular use of a properly prepared Soap is one of the chief means; but the Public have not the requisite knowledge of the manufacture of Soap to guide them to a proper selection, so a pretty box, a pretty colour, or an agreeable perfume too frequently outweighs the more important consideration, viz.: *the Composition of the Soap itself*, and thus many a good complexion is spoiled which would be enhanced by proper care.

A most Eminent Authority on the Skin,

Professor Sir Erasmus Wilson, F.R.S.,

Writes in the JOURNAL OF CUTANEOUS MEDICINE:—

"THE use of a good Soap is certainly calculated to preserve the Skin in "health, to maintain its complexion and tone, and prevent its falling "into wrinkles. PEARS is a name engraven on the memory of the "oldest inhabitant; and PEARS' Transparent SOAP is an article of the "nicest and most careful manufacture, and one of the most refreshing "and agreeable of balms for the Skin."

TO persons whose skin is delicate or sensitive to changes in the weather, winter or summer, PEARS' TRANSPARENT SOAP is invaluable, as, on account of its emollient, non-irritant character, *Redness, Roughness and Chapping are prevented, and a clear appearance and soft velvety condition maintained, and a good, healthful and attractive complexion ensured.* Its agreeable and lasting perfume, beautiful appearance, and soothing properties, commend it as the greatest luxury and most elegant adjunct to the toilet.

Testimonial from

Madame Adelina Patti.

"I HAVE found PEARS' SOAP matchless for the Hands and Complexion."

Adelina Patti.

PEARS' Transparent SOAP. TABLETS & BALLS: 1s. each. Larger Sizes, 1s. 6d. and 2s. 6d. (*The 2s. 6d. Tablet is perfumed with Otto of Roses.*) A smaller Tablet (unscented) is sold at 6d. PEARS' Transparent SOAP.

COLDS CURED BY
DR. DUNBAR'S ALKARAM, or
Anti-Catarrh Smelling Bottle.
ALKARAM. COLDS.
ALKARAM. COLDS.
ALKARAM. COLDS.

IF inhaled on the first symptoms, ALKARAM will at once arrest them, and cure severe cases in half an hour. Sold by all Chemists, 2s. 9d., a Bottle. Address, Dr. Dunbar, care of Messrs. F. Newbery and Sons, 1, King Edward-st., E.C.

ADVICE TO MOTHERS.—Are you broken in your rest by a sick child, suffering with the pain of cutting teeth? Go at once to a chemist and get a bottle of Mrs. WINSLOW'S SOOTHING SYRUP. It will relieve the poor sufferer immediately; it is perfectly harmless; it produces natural, quiet sleep by relieving the child from pain; and the little cherub awakes "as bright as a button." Be sure and ask for Mrs. Winslow's Soothing Syrup, and see that "Curtis and Perkins, New York and London," is on the outside wrapper. No mother should be without it. Sold by all Medicine Dealers, at 1s. 1½d.

FLORILINE. For the Teeth and Breath. Is the best Liquid Dentifrice in the world. It thoroughly cleanses partially-decayed teeth from all parasites or living animalculæ, leaving them pearly white, imparting a delightful fragrance to the breath. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco smoke; being partly composed of honey, soda, and extracts of sweet herbs and plants, it is perfectly delicious to the taste, and as harmless as sherry. Sold by Chemists and Perfumers every where, at 2s. 6d. per Bottle.

THE LADIES' COLUMN.

Something new in weddings was seen at the City Temple the other day, when an American bridegroom married an English bride, and the ceremony was conducted according to the peculiar customs of a fashionable New York wedding. The bridal party were played into church by the "Wedding March" from "Lohengrin," the bride, who was dressed in white satin, with front of silver brocade and real orange-blossoms, being led, as is usual, by her father. Behind her walked her sister alone, bearing the title of "maid of honour." Such an attendant is essential now at all fashionable American weddings, and her function is to give the bride all needful personal assistance, holding her bouquet and glove, and so on. When bride and bridegroom pass into the chancel to the altar rails, the maid of honour alone accompanies them, and kneels behind the bride. Well, then came the ordinary six bridesmaids, dressed in white cashmere, trimmed with swan'sdown; but instead of their walking in pairs alone, the groomsmen of old days were revived under the American title of "ushers," and six of these young gentlemen matched the six bridesmaids and walked with them up the aisle. The best man and the maid of honour formed another pair in leaving the church. In American weddings, I am told, the "ushers" do not generally walk with the bridesmaids, but lead the way into church and bring up the rear coming out. During the ceremony, the groomsmen formed a semicircle on the right hand of the bridegroom, while the bridesmaids stood in another line at the bride's left.

The recent marriages of the Duke of Marlborough, Mr. Chamberlain, and Mr. Herbert (a son of Lady Herbert of Lea and brother to Lord Pembroke), who have all taken to themselves American wives within the past few months, have aroused something like consternation amongst us. We have no men to spare to these American enchantresses; how do they work their wicked spells to carry off our brethren? The list of women born and "raised" in the States who are holding important places in English society now, because married to Englishmen of position, is something formidable to contemplate, when it is remembered how seriously women outnumber men in England. Individually considered, certain of the English husbands might not be grudged by their own countrywomen to the fair Americans; but, statistically speaking, it is impossible to be satisfied with this new fashion of American invasion of our scantily-supplied preserves. With what ammunition do they come supplied, these fair poachers who make such bags?

That question has been submitted to the famous Mrs. Frank Leslie, who, having spent the last two seasons in London Society, may be presumed to know in what respects American and English women differ from each other in ways and characteristics. Her reply is that we make too much of our men, look up to them too ostentatiously, and simply bore them with too much attention. "English girls are dutiful daughters and sweet, womanly women; but they look up to men too much, are too subservient, coddle and fuss over men till they make them tired. In comes a bright, vivacious American girl. She orders the men about like the queen she is. They find her cool disregard of their superiority refreshing; they admire her vivacity; they like the bright sparkling chatter of American girls better than the serious thoughtful conversation of their own more intellectual countrywomen. English girls are far better educated than American girls; but also less lively and amusing." So says the American lady; and an ex-member of the United States Legation in England who was interviewed expressed much the same opinion. Only he added, what is probably, after all, at the real root of the matter, that American girls (speaking of the daughters of rich men) are generally better dowered than English ones. He observed quite accurately, and not a little severely, on the evils of the custom which prevails in this aristocratic old country of concentrating the money of a family on the eldest son, or, at all events, on the sons, and leaving the daughters comparatively poor. "An Englishman worth 500,000 dollars gives his daughter 10,000 on her marriage and is called very generous; whereas an American father worth the same amount would think 100,000 dollars none too much to bestow on his daughter."

Well, there is the American explanation of the phenomenon. I fear it will not help our girls much. Here women are redundant—that is to say, women with small portions are—and cannot but know it. If the poor, gentle, affectionate, housewifely girl who has no prospect or hope but in marriage, and feels no independence, no "queendom" in her soul, should vainly try to acquire the consequential and self-reliant air of her American sister, her fate would probably be that of the frog who emulated the ox. Because American women are supported in their "independence," not only by the numerical equality of the sexes, but by the favours of fortune. *There* is the secret, I fear. An English heiress, after all, may be as independent and unsubservient as she likes, but she will have her chances of marrying well, never doubt it. But the unwritten Salic law which prevails in our society, postponing the daughters to the sons, makes our heiresses few in number. The whole tone of American society seems to be different from ours. Here, if there is not enough money to give both boys and girls a good education, the girls must go unlearned—the boys will be preferred. Here, if there are not the means at the father's disposal both to start his sons in life and to dower his daughters, again the girls will be the sufferers. Then, on the other hand, as Greville Murray said, "Nearly all the younger sons of noble houses in England are matrimonial adventurers." Brought up with luxurious and extravagant tastes, and with every inducement to be idlers and no notion of real work, they are ultimately obliged to live on what is to them a pittance, unless they can "marry money." In America, on the other hand, hardly any men are without some definite occupation, hardly any boys are brought up to contemplate a life of lounging; and if a father has not a great fortune, so as to give much to all his children, he will give the largest share to the girls on the ground that the young men can work, while the girls should not be obliged to do so. All these things combine to make marriage far from a certainty to well-born young English women, and encourage the introduction in their place of American brides into our upper-class families.

Evidence of the interest felt in the position, work, and capabilities of our sex is supplied by the frequency with which papers discussing these points appear in the magazines and reviews. The frank and scornful rudeness of some of these is not altogether pleasant; but their very existence belies their tone. It has been reserved for that enterprising and original monthly, the *Universal Review*, to focus the opinions of women themselves on the changes in woman's position worked within living memory. A series of articles on "The Progress of Woman" was begun in the November number of the *Review*, the subjects being "In Politics," by Mrs. Fawcett; "In Education," by Miss Clough, Principal of Newnham; "In Literature," by Lucas Malet (the *nom-de-plume* of a daughter of the late Charles Kingsley); and "In Medicine," by Mrs. Scharlieb, M.D. In the December number the series is concluded with "In College Life," by Miss M. Lacey; "In Legal Status," by Mrs. Fenwick-Miller; and "In Business," by Miss Emily Faithfull. The record of alteration in the tone of society and in law and in custom is a most striking one, and will probably startle many not before familiar with the fact that we have lived through a period of noiseless but mighty revolution. "Progress," indeed, there has been in the last five-and-twenty years—progress vast and undeniable; but whitherward—whether to greater happiness, goodness, and influence or whether to the reverse of all these, we cannot certainly know. It will be known by our daughters of centuries hence.—FLORENCE FENWICK-MILLER.

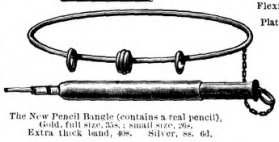
THE BRITISH EMPIRE AND FEDERATION.

At the Bethnal-Green Free Library on Dec. 20 the Earl of Aberdeen gave a lecture on "The British Empire and Federation." Mr. George Howell, M.P., presided. In commencing his lecture Lord Aberdeen said he should divide his subject into two parts—in the first place, treating of federation as a principle and a system; and, secondly, considering the application of that great principle to the British Empire. What was wanted by peoples was not concentration but consolidation. Federation was essentially pacific; it promoted peace and checked war. After tracing the gradual development of the federation principle from the earliest times, and analysing the circumstances connected with that development, Lord Aberdeen brought his remarks to bear on modern times. We never heard talk now, he said, of the Colonies being separated from the mother country, as so frequently happened only a few years ago. On the contrary, the topic of the day was federation. It was a very practical question. The colonists were our own kith and kin, and it was not surprising that any scheme for bringing the Colonies and this country into closer and firmer connection should be popular. Then there was the question of increased security that federation would ensure, thus improving the chances of peace and maintaining the prosperity of the commerce between the Colonies and Great Britain. The concluding portion of the lecture consisted of an interesting account of a recent visit to Australia made by Lord and Lady Aberdeen. The proceedings closed with a hearty vote of thanks to the lecturer.

Two hundred and twenty volumes of the Record Commission's publications have been presented to the Bar Library at the Royal Courts of Justice, which, though only established in June, 1884, now contains over 8000 volumes.

A handsome coffee-house, erected at a cost of about £25,000, was opened at Leicester on Dec. 20 by the Duchess of Rutland. The building has been designed by Mr. Burgess, of London. This is the twelfth house opened at Leicester.

The tenth festival dinner of the friends of the East London Hospital for Children was held at Willis's Rooms on Dec. 20, Mr. C. A. Prescott (vice-chairman of the board of management) in the chair. Subscriptions were announced amounting to nearly £2000.



The marriage of Lord Moreton, son of the Earl of Ducie, with Ada Margarette, eldest daughter of Mr. Dudley Robert Smith, of Pierbright, Surrey, took place in St. Peter's Church, Eaton-square, on Dec. 18. Mr. Nigel Fitzhardinge Kingscote acted as best man; and the bride was attended to the altar by six bridesmaids—the Misses Beatrice, Muriel, and Cicely Smith (her sisters), Miss Oakley and Miss Clara Macdonald Moreton (cousins of the bridegroom), and Miss Leveson Gower. The bride was led to the chancel by her father.

THE PLAYHOUSES.

Dramatic London is on the tip-toe of expectation as to the new readings of Macbeth and Lady Macbeth Mr. Henry Irving and Miss Ellen Terry are to give at the Lyceum revival of Shakspeare's tragedy on the 29th of December. Meanwhile, by a happy arrangement, Covent-Garden and Drury-Lane Theatres are again devoted to different classes of amusement, though each is so exceptionally bright and attractive in its way that hosts of holiday folks are pretty certain to throng both houses throughout the Christmas Holidays, and, in the case of Drury-Lane, long after the little people who rule the roost at this season have gone back to school. At the Theatre Royal Covent Garden, Mr. W. Freeman Thomas and Messrs. Hengler have united to produce a signally grand Circus entertainment, which should be the delight of children for many and many an afternoon and evening to come. In addition to an unusually large number of "goddesses in gauze," the management has engaged those wonderfully docile and well-trained colossal performers, Mr. Lockhart's troupe of acrobatic elephants; an astonishingly novel ursine equestrian; a strong company of diverting clowns, with "Whimsical Walker," one of the very drollest and quaintest of his tribe, at their head; "bare-backed" riders who perform daring acts of equitation; besides masters and mistresses of *la haute école* to witch London with noble horsemanship.

Numerous as have been the pantomimic, or, rather, spectacular successes of Mr. Augustus Harris at Drury-Lane, it will be generally acknowledged that he has capped them all with his tenth and most resplendent, "The Babes in the Wood; and, Robin Hood and his Merry Men," which the enterprising lessee has written and arranged in collaboration with Mr. E. L. Blanchard and Mr. Harry Nicholls. The quaint novelty of the richly-diversified Procession and Ballet of Toys and Games, and the rare beauty and unrivalled magnificence of the Procession and Ballet of Birds demand a longer description than can be given to these charming and alluring *chef d'œuvres* in a necessarily brief first review of the Christmas productions. As feasts of colour, they are unique. Especially bewitching is the marvellous regiment of well-marshalled coryphées garbed as birds with every imaginable kind of plumage. There are seductive pigeons in grey, blue and scarlet parrots, cockatoos in white, lyre birds and birds of paradise whose silks and feathers must be worth a king's ransom, flamingos, ostriches, kingfishers, canaries, blackbirds, and innumerable other specimens of the feathered tribe, attired with a harmony of colour worthy a Chevreuil. It is a delight to watch the manœuvres of this superlatively beautiful array of birds; and there can be little doubt people will go again and again to Drury-Lane to witness this unparallelled Bird Ballet alone. It is in this enchanting scene—after graceful Æneas has indulged in several flights to "the flies"—that the exceedingly droll pair of "Babes," Mr. Harry Nicholls and Mr. Herbert Campbell, dance a mirth-moving *pas de deux* that fills the house with laughter. Where Robin Hood (Miss Harriet Vernon) comes in is in her sweethearting scenes with Maid Marian (Miss Florence Dysart). The songs of this couple, music by that admirable young conductor and composer, Mr. Walter Slaughter, are notably melodious. They have, of course, a Good Fairy to watch over them and make them happy at last. It will be, however, next to the incomparable Ballet of Toys and Ballet of Birds (the masterpieces of Mr. Augustus Harris and Madame Katti Lanner), the humours of Mr. Harry Nicholls and Mr. Herbert Campbell as the grotesquely comic "Babes in the Wood," and to the excellent pantomime of Mr. Charles Lauri, jun., as the nimble and knowing pug-dog, that will afford most gratification to the laughter-loving pit and gallery. Mr. Harry Payne, our most popular clown, remains King of the Harlequinade, and has this year provided fresh food for mirth, especially in "The Clown's Dream," with its rollicking shadow pantomime, and quick transformation to a boat on the ocean. "The Babes in the Wood," upon which Mr. Harris must have spent a small fortune—a great share going to the remarkably expensive plumage dresses in the Bird Ballet—should prove the most potent in attractive power of any spectacle he has produced.

Admirers of pantomime will also find fare to suit their palates in the exceptionally elegant version of "Cinderella," by Mr. Horace Lennard, at the Crystal Palace; in Mr. Geoffrey Thorn's smart edition of the same nursery story at the Grand, rightly called "Sweet Cinderella" there, as the ever-charming heroine is cleverly impersonated by vivacious Dot Mario; in the revival for matinées of Mr. Savile Clarke's delightful fairy piece, "Alice in Wonderland," at the Globe (where Mr. Richard Mansfield has in the evening resumed the performances of "Prince Karl"); and in another winsome children's play, "Little Goody Two-Shoes," given at the Court Christmas matinées. The mirth-inspiring "Faust Up to Date" of Messrs. Sims and Pettitt has been brightened with new songs, and by the addition of Miss Violet Cameron to the cast. The Surrey tells again the tale of "The Forty Thieves"; and at the Britannia Mrs. Lane mounts "The Magic Dragon."

"The Silver Falls" met with a rapturous reception at the Adelphi on Dec. 22; and the adroit joint authors, Mr. George R. Sims and Mr. Henry Pettitt, as well as Messrs. A. and S. Gatti, appeared highly pleased when they were applausively called before the curtain at the close of this remarkably powerful and exciting new melodrama. The redcoats and bluejackets, of whom there had been rather a surfeit at the Adelphi, are not "in it" this time. "The Silver Falls" is, indeed, peculiarly acceptable by reason of the freshness of its picturesque local colour, three of the four acts taking place in Mexico. The strong story opens in England—on the lawn of a pretty riverside villa at Richmond. Hither Eric Normanhurst (Mr. William Terriss) has brought his handsome bride Lola (Miss Olga Nethersole), and the enamoured young husband gallantly defends her reputation against the impeachment of his uncle, Lord Avondale, till Eric is convinced by irrefragable proof that he has married a designing adventuress of the basest character. The audience is let into this secret before the deceived husband, being privileged to witness the stolen interviews the wily Mexican woman of the world has with the false friend of Eric, Dick Redmayne, who levies blackmail from her, and also with her passionate Mexican lover, the refugee embezzler, Marcos Valles, whose mistress she had formerly been. Forsaking Lola and leaving England, Eric Normanhurst seeks a new life in the sunny mining village of Santa Rosa, Mexico, where rough but good-hearted miners of the type of Bret Harte's "Poker Flat," as ready with a kind action as they are with a revolver, foregather at the shanty of that good-humoured "Universal Provider," Jack Slingsby. It is at Santa Rosa that Eric, well-nigh done for by falling over a precipice, is nursed back to life and love by fair and gentle Primrose Easterbrook (Miss Millward), as captivating a heroine as one would wish to see, in her neat green Zouave jacket, pale primrose skirt, and pink sash. Charmingly natural and poetical as are the love-scenes between Eric and Primrose (who are married after Marcos Valles has informed him of Lola's death in New Orleans), these sympathetic episodes are eclipsed by the powerful situation brought about by the sudden appearance of Lola to seek shelter in Eric's new home on the night of his and Primrose's wedding. When Mr. Terriss has thoroughly familiarised himself with the emotional requirements of this strongly-dramatic scene, and the full tide of passion is thoroughly developed between the agonised husband and the woman he had good reason for deserting, the effect of this moving meeting cannot fail to be enhanced. The piece is brought to a stirring close by the murder of Lola by Marcos Valles, and by the happy reunion of Eric and Primrose near the radiantly bright cascade of "The Silver Falls." Miss Olga Nethersole made another step in advance as the fascinating adventuress, Lola; Mr. Charles Cartwright imparted to the romantic character of Marcos Valles a life and fire that materially helped the piece; whilst Mr. Terriss and Miss Millward, Mr. J. D. Beveridge and Mr. J. L. Shine, Mr. Royce Carleton and Miss Clara Jecks, Miss A. Dairolles, Mr. J. Carne, and Mr. James East filled their parts with characteristic ability. The Thames tableau by Mr. Walter Johnstone and the bright Mexican scenes by Mr. Bruce Smith could not be excelled for beauty. "The Silver Falls" is a golden success.

Sir Arthur Sullivan has accepted the office of conductor of the Leeds Musical Festival to be held in October next.

Earl Fitzwilliam has intimated his intention of returning 20 per cent to his agricultural tenants on the Malton estate.

Sir Horace Davey, Liberal, has been returned to Parliament for Stockton-on-Tees by a majority of 395 over Mr. Wrightson, the Conservative candidate.

Dr. Stubbs was on Dec. 24 elected Bishop of Oxford by the Dean and Chapter of Christ Church, after morning service in the cathedral.

The Queen has approved of the appointment of the Earl of Kintore to be Governor of South Australia, on the retirement of Sir William C. F. Robinson, G.C.M.G.; and of the appointment of Sir Henry Arthur Blake, K.C.M.G., to be Governor of Jamaica.

It has been decided in the Court of Appeal that trust money intended for missions to poor heathen, who have no means of getting religious instruction for themselves, is money given for a "charitable purpose," and is, therefore, not subject to income tax.

A two days' conference of the head-masters of public schools was held on Dec. 20 and 21 at Winchester. The conference discussed the subjects of competitive examinations, entrance and other scholarships, the introduction of modern languages and natural science into the Universities, and kindred topics.

Princess Christian, president of the Princess Helena College for Girls, at Ealing, visited the college on Dec. 20 and distributed the prizes gained by the students during the year; and on the same day Princess Mary Adelaide opened a new mission hall at the Victoria Docks, which has been erected at the cost of Louisa Lady Ashburton in connection with her evangelical mission in that populous district.

DEATH.

On Dec. 18, at Oran, Algeria, Lieutenant-Colonel William Laurence Twentyman, late of 1st Royal Dragoons and 18th and 19th Hussars, elder son of the late William Holme Twentyman, J.P. and D.L., of Ravensworth, St. John's-wood-park, N.W., aged 55.

THE "LOUIS" VELVETEEN.
Every yard bears the name "LOUIS," and the wear of every yard, from the cheapest quality to the best, is guaranteed. Ladies should write for Samples of the New Shades to THOS. WALLIS and CO., Holborn-circus, London, E.C., who supply all shades and all qualities at most reasonable prices.

WHY YOU SHOULD USE SCOTT'S EMULSION
OF
COD-LIVER OIL WITH HYPOPHOSPHITES.
IT IS USED AND ENDORSED BY PHYSICIANS BECAUSE IT IS THE BEST.
It is Palatable as Milk.
It is three times as efficacious as plain Cod-Liver Oil.
It is far superior to all other so-called Emulsions.
It is a perfect Emulsion, does not separate or change.
It is wonderful as a Flesh Producer.
It is the best remedy for Consumption, Scrofula, Bronchitis, Wasting Diseases, Chronic Coughs, and Colds.
All Chemists at 2s. 6d. and 4s. 6d.

CAUTION.
BENGER'S Food differs entirely from any other Food obtainable. When mixed with warm milk it forms a delicate nutritious cream, in which the curd is reduced to the same flocculent digestible condition in which it exists in human milk, so that hard indigestible masses cannot form in the stomach.
It may be had of Chemists, &c., everywhere, or will be forwarded free by Parcel Post direct from the Manufacturers.

SCHOOL OUTFITS

TO PARENTS AND GUARDIANS.

Messrs. SAMUEL BROTHERS respectfully invite an inspection of their Show-Rooms by Parents and Guardians who are desirous of Outfitting their juvenile charges for any of the public or private colleges, schools, &c. The requirements of Youths and Boys have for very many years received the closest attention of Messrs. SAMUEL BROTHERS, with the result that this important Department of their business has attained very large dimensions, so that every want in Suits, Overcoats, Hosiery, Boots, &c., is fully met, and durable qualities ensured. The Firm are the originators and sole proprietors of a special material styled the "WEAR-RESISTING FABRIC" (Regd.), that has been especially manufactured to withstand the hard wear given by Youths and Boys to their school and every-day dress.

GENTLEMEN'S OUTFITTING.

SUITINGS. OVERCOATINGS. TROUSERINGS. INVERNESSES. CAPE COATS. BOOTS. SHOES. SHIRTS. HOSIERY. UNDERCLOTHING. GLOVES. HATS. &c., &c.

At the Christmas and New Year Seasons, Messrs. SAMUEL BROTHERS' Windows and Show-Rooms are replete with a unique display of High-Class Novelties, suitable for Evening Dress or Drawing-Room wear, upon such occasions as Juvenile Parties, Balls, &c. The choice and extensive Assortment of Suits, tastefully trimmed and designed in fashionable shades of Plush, Velvet, Velveteens, Superines, &c., is now complete, together with Special Appointments of Lace, Hosiery Hats, Shoes, &c., to accord with any style of suit that may be sel

TWO CHRISTMAS EVES.

At the corner of the market-square in the ancient town of St. Ives, Cornwall, there stands a picturesque old hostelry called the "Golden Lion." Until quite lately it had for its near neighbour an inn equally picturesque, and perhaps even older, the "George and Dragon." Both these ancient houses of entertainment must have witnessed many strange events, besides being the scene of many a jovial drinking bout after the gathering in of the "harvest of the sea," or at the less lawful landing of a contraband cargo, or at the end of a successful privateering expedition. For all these things your Cornish man hath an excellent relish. On this spot was the palladium of the liberties of St. Ives, for here stood the whipping-post, the cage, and the stocks. The George and Dragon must have been the fashionable hostel, for after the Cornish Pilgrimage of Grace the King's Commissioner, Sir Anthony Kingston, lodged here, and entertained at dinner the Portreeve of St. Ives, whom he afterwards politely hanged in the market-square for his treasonable practices. Here, also, the Duke of Bolton, when he visited the town in 1699, "was treated with six bottles of sack." The two houses stood so close together—being divided only by the narrow street leading into the market-square—that the occupants could wish each other good-morning from the windows.

In the days of George II. Peter Hexel was landlord of the George and Dragon, and John Renowden ruled the Golden Lion. They were not only neighbours, but fast friends. There was, perhaps, something in the similarity of the circumstances of these two men that strengthened their friendship. They were both widowers, and each had an only child. Richard Hexel was a handsome, strapping fellow of three-and-twenty. Mary Renowden was nineteen, and the pride of her father's heart. As children they had played together; but there came a time when they only looked and smiled and nodded to each other from the opposite windows. Then Richard would watch for Mary when she went out, and would follow her into the fields or on the seashore; and so it came to be at length another version of the old, old story, which surprised nobody—least of all the landlords of the George and Dragon and the Golden Lion, who looked forward to the time when the interests of both those ancient establishments should become one and indivisible.

But there was one person who watched the growing affection of the lovers with a bitter and jealous heart. This

"Thou chin-scraping scoundrel! how durst thou rake that matter up in my presence? I'll drive my staff down thy throat for prating of matters beyond thy barber's brain!"

TWO CHRISTMAS EVES.—[DRAWN BY A. FORESTIER.]

would not be a true love-story, according to the ancient and regular pattern, had there been nothing to interrupt its smooth and even course. A certain Thomas Champer, the son of a mine-master in the neighbouring parish of Zennor, had long looked with longing eyes on Mary Renowden. His visits were discouraged by the host of the Golden Lion, and Mary herself made it very plain that she disliked his attentions. Nothing could exceed the bitterness of his feelings when Champer found that he was rejected in favour of one who had been his successful rival from boyhood. Richard Hexel had "taken him down" at school—in the wrestling bouts at "Fea-tentide" had thrown him in the "Cornish hug," and had constantly snatched the victory from him in the game of "hurling." All these defeats he had endured with comparative indifference, but to be beaten in the game of love was not so easy to bear. He watched the lovers in their walks, till he felt he could do anything, short of murder, to get his rival out of the way. He thought if Hexel were once removed from the scene, he might yet succeed with Mary, trusting to time and the chapter of accidents. About this time the Government declared war against Spain, and it was certain that men would be wanted for the Navy. If the King's ships could not be manned by other means, the press-gangs would be out, and they would first of all try their luck at the seaports. What if they should visit St. Ives! It was not unlikely—and they would be glad of a hint where good men were to be found. Thomas Champer turned this matter over in his mind till he persuaded himself that he would be doing good service to the State, and furthering his own interests at the same time, if he could lend a helping hand in manning the Navy, provided always he could himself keep out of the way, for he had no desire to serve his country on board a man-of-war. He was full of such thoughts when he made one of his periodical journeys to Falmouth on mining business, and sought out a certain "crimp," or agent for entrapping seamen for the press-gang. What he did there, or what arguments he used to advance his plans, we need not inquire, but the "crimp" was richer by some pounds at the termination of the interview.

* * * * *

It was Christmas Eve, and the good people of St. Ives were preparing to keep the festival with due honour. The usual excitement of the season had been increased in the course of the afternoon by the appearance of a sloop-of-war which anchored in the bay, and it was expected that some of the officers and crew would come ashore to join in the general merrymaking. After dark a band of mummers entered the market-square, and, stopping in front of the George and Dragon, commenced the performance of the Christmas drama of "St. George." Soon a large crowd was collected, and the noise brought to the doors and windows of the houses most of the persons who were within, including the frequenters of a little club which met at the George and Dragon and the Golden Lion alternately.

In the midst of a terrific combat between St. George and the Turkish knight there was a commotion among the crowd, and a party of armed sailors appeared, headed by a tall fellow, who, flourishing a naked cutlass, cried, "In the King's name!" The crowd at once broke away amid the screams of women and cries of "The Press! the Press!" The sailors made a dash at some of the younger men in the crowd, and among those they secured was Richard Hexel, who was standing at his father's door. The party then retreated with their captives, closely followed by the crowd, crying, "Down with the press-gang! Down with them!" More than once the sailors were so hard pressed that those in the rear had to turn and make a stand in the narrow streets, and a serious conflict was threatened. But they reached their boats with the men they had captured, and at daylight next morning the sloop-of-war in the bay had disappeared.

That night there was much wailing among the women of St. Ives, and a fruitful subject of talk was afforded to the club at the George and Dragon. Among the members of this club were Captain Trenwith, a retired officer of the Navy, who had sailed with Admiral Benbow, and had lost a leg in the service of his country; Mr. Matthews, ropemaker and Mayor of St. Ives; old Will Nance, who had once been a smuggler, and who wore a patch over his left eye, which had been knocked out in some encounter with revenue officers; and, lastly, John Tackabird, the town barber, who, although occupying a lower social position, was allowed to associate after business hours with the men whose wigs he dressed in the morning. But the barber was in advance of his time, and held opinions which Captain Trenwith and the Mayor thought little less than treasonable. John Tackabird was, in fact, a Democrat; and on the present occasion he was loud in his denunciation of the press-gang, which he said was contrary to Magna Charta and the Bill of Rights—a tyrannical and unconstitutional violation of the liberty of the subject, and showed that we were a nation of down-trodden slaves, writhing under the iron heel of despotism.

"Where," said he, waving a newspaper he held in his hand, "where are our boasted liberties, when the hirelings of a corrupt Government can thrust themselves into our houses and carry off our sons and brothers, and force them to fight in the unholy quarrels of Kings and their unscrupulous Ministers? How long are we to be chained to the chariot-wheels of a bloodthirsty oligarchy? How long"——

"Tut, tut!" interposed Captain Trenwith with warmth. "Stop thy palaver, John Tackabird. The King must have men for his ships."

"Men for his ships, Captain Trenwith!" retorted the barber; "let the King get them by fair and honest means, and then he will perchance have men who will stick to their colours, and not run away as some of Admiral Benbow's ships did in the West Indies!"

This was a sore subject with Captain Trenwith, who could endure no slur on the British Navy, and who had himself been an officer on board Admiral Benbow's ship at the time referred to. The barber felt he had gone too far, but the mischief was done.

The Captain rose from his seat, his face purple with rage. "Thou d——d chin-scraping scoundrel! how durst thou take that matter up in my presence? I'll drive my staff down thy throat for prating of matters beyond thy barber's brain!"

"Nay, nay, Cap'n," cried Will Nance; "let John Tackabird be. Mayhap he hath spoken unwisely, but 'tis well known Cap'n Wade and Cap'n Kirby were shot at Plymouth for disgracing the Admiral."

"Yes," said Captain Trenwith, resuming his seat, his anger having passed away as suddenly as it came—"yes, and shooting was too good for them. They ought to have been hanged at the yard-arm and so should some others that I wot of!" here he looked hard at the *ci-devant* smuggler.

"Well, but"—resumed the barber, whose tongue must needs wag in spite of his fear of the Captain—"touching this matter of the press-gang"——

"I'll hear no more on 't," cried Captain Trenwith: "'tis no evil fowl's mouth that one volunteer is worth ten pressed men; but I have seen pressed men fight as bravely as the best—and as for Admiral Benbow, he fought his ship like a hero, and died the death of a gallant old sea-dog as he was. If some of his men left him in the lurch, enough remained to save the honour of England. But hark ye, John Tackabird, let me warn thee that there be some matters had better be forgotten."

At that moment, a steaming bowl of punch being brought in, all further unpleasantness disappeared under its soothing influence. The party, which now included Peter Hexel and John Renowden, drew in their chairs, and the former proceeded to fill the glasses of his guests with a silver punch-ladle that had a guinea let into the bottom of it. As it was not yet known that young Hexel was one of the pressed men, there was nothing to cloud their enjoyment. A visit from the press-gang was too common an occurrence in seaport towns in those days to excite much remark, save among those who were the immediate sufferers. Captain Trenwith said he would take upon himself to propose a toast, which he hoped no one present would refuse to drink. The King of England had declared war against Spain, and, as the Spaniards had seized all the British ships in their harbours, he thought the sooner they closed with the enemy the better. He begged to propose the health of King George and success to the British arms. If they lived to see another Christmas Eve he doubted not they would be able to say the honour of England had been well maintained. As the punch was exceeding good, and had put much heart into every man of the company, the toast was drunk with great enthusiasm. Even John Tackabird smacked his lips with satisfaction.

"It hath been reported," said Will Nance, "that Admiral Vernon is gone as Commander-in-Chief to the West Indies, and that he swears to take Portobello on the Spanish Main, even if he hath no more than six ships wherewith to do it."

"I know not how that may be," said the incorrigible barber. "If he has only pressed men to back him, I doubt it."

With an ominous glance at the last speaker, Captain Trenwith cut the matter short. "We shall see," said he. "When 'tis done we shall doubtless hear on 't—but what noise is that outside? What now, Tom Champer? What's amiss?"

"There's much amiss, Captain Trenwith," said young Champer, who now entered the room. "Dick Hexel is among the pressed men. He was seen in the last boat when they put off from the shore."

"What! my son taken by the press-gang!" cried Peter Hexel, starting to his feet. "'Zounds! I'll not believe it—there must be some mistake."

"I fear there is no mistake," said Champer; and there was a gleam of satisfaction on his face, which he tried to conceal with a pretended look of concern. "There be those outside who saw him carried off, and the officer swore he would sink the first boat that dared to go nigh the ship."

Old Hexel hurried out, followed by John Renowden.

"If the lad is really pressed," said Captain Trenwith, "I hope he will remain in the service. Sure I am he won't disgrace it. No lad of spirit should refuse to serve his country when old England's enemies are afoot. But come, sit down, Tom Champer, and help us to finish the punch."

Will Nance, who was already "three sheets in the wind," as he would himself have expressed it, boisterously inquired of Champer how it was that he himself had escaped capture by the press-gang.

"Thou art a likely lad enough," said he, "and would swab a deck as well as another."

"I was not in the town," answered Champer. "I have but now walked over from Zennor."

"Ah!" cried Nance, with a drunken wink at the rest of the company, "trust a Zennor man to take care of himself. They're a wise folk in their gen-er-en-eration. They know why the cow ate the bell-rope."

"Just as St. Ives folk know why they whipped the hake," retorted Champer, angrily.

The Captain interposed. "Come, come," said he, "no more cross words on Christmas Eve. 'Tis near midnight. You and I, Mr. Mayor, must set a good example by appearing in church to-morrow morning, so let us jog homewards."

The Mayor crossed the room with a devious gait. "Your shervant, Cap'n Tren'th. Shervant, Sir—happy to 't'nd you," and the Mayor of St. Ives solemnly staggered after Captain Trenwith, who stumped away on his wooden leg, escorted by his black servant carrying a lantern. The rest of the company also departed, and the George and Dragon was left in solitude and darkness. But lights were burning in the Golden Lion long after midnight. Three anxious hearts were there holding communion, and vainly trying to find a way out of the trouble that had come upon them.

After the first shock of grief for the loss of her lover was over, Mary Renowden dried her tears and reviewed the situation with a strength of mind and a coolness of judgment that astonished her father and Peter Hexel.

"Dick will return after a time," she said; "I am sure he will. He is strong and brave, and has always been lucky. Perhaps he will do something that will make his name famous, and then we shall all be proud of him."

Cheered by this hopeful spirit of hers, the two old men plucked up their hearts, and all three appeared in their usual places at church on Christmas Day. After service, as they stood in the churchyard gazing rather wistfully over the sea, they were joined by Thomas Champer, who wished them a "Merry Christmas!" and uttered some clumsy expressions of condolence about Richard Hexel. He had heard, he said, that the sloop had gone to Falmouth, and if it would be any satisfaction he would write to a friend there, or would even go over himself and make any arrangements they pleased for helping Dick; but he feared there was little hope of his release now that war had broken out.

These friendly overtures rather softened the hearts of the two fathers; but Mary felt sure that Champer was insincere. His hypocrisy was not proof against her woman's instinct. She turned coldly away, and he left them, racking his brain for some means of presenting his suit in a favourable light.

Day after day Thomas Champer came to the Golden Lion and sought every possible opportunity of addressing Mary; but his perseverance was useless. She would not listen to him. He saw that his suit was hopeless, and that he had gained nothing by the absence of Richard Hexel. Yet he continued to haunt the neighbourhood of the Golden Lion, until one night he encountered the press-gang, which had made another descent on St. Ives, and he was caught in the same trap he had set for his rival. In the meantime, letters had come from Richard Hexel. He wrote that he was well, and only unhappy because he was parted from Mary. He had joined the West Indian Squadron under Admiral Vernon, and expected he would soon be able to tell them something about the war. So time passed on, and the spring came.

The club had assembled one Saturday evening in the parlour of the Golden Lion. The customary bowl of punch was on the table; but Captain Trenwith had not arrived, and the serious business of the evening could not begin without him. To pass the time, Will Nance stirred the fire, and, lighting a pipe, remarked that the evenings were something chilly, though the spring had come, in spite of the men of Towednack.

"What have the men of Towednack to do with the spring?" said the Mayor of St. Ives.

"Why, know you not," replied Nance, "that the men of Towednack built a hedge round the cuckoo to keep the spring back? But what's this news from the fleet? 'Tis rumoured Portobello is taken."

"'Tis true," said John Renowden; "my daughter hath a letter from Richard Hexel, who was on board the Hampton Court, and engaged in the fight."

"What? Dick Hexel hath smelt gunpowder, then, in a real battle? Hurrah for old England and beloved St. Ives!"

"Amen!" cried Captain Trenwith, who came stumping into the room. "Yes, friends, 'tis all true. Here is a copy of the *Daily Post*, dated March 29, wherein is an account of the battle, writ by a gentleman on board the Burford, the Admiral's own ship. Fill the glasses, and John Tackabird shall read out the narrative."

Under the combined attractions of the punch and the newspaper, all eagerly drew round the table, and the barber, after cleaning his throat, commenced:—

"On the afternoon of the 21st, about two o'clock, we came up with Portobello Harbour, where the Spaniards had hoisted upon the Iron Castle the flag of defiance. They welcomed us with a terrible volley, which, being at so short a distance, took place with almost every shot. One struck away the stern of our barge; another broke a large gun upon our upper deck; a third went through our foretop-mast; and a fourth, passing through the arming within two inches of our mainmast, broke down the barricado of our quarter-deck very near the Admiral, and killed three men in a moment, wounding five others who stood by them. This looked as if we should have bloody work, but was far from discouraging our brave fellows."

The barber continued to read how the Spaniards were driven from their guns, and the English landed: "One man set himself close under an embrasure whilst another climbed upon his shoulders and entered under the mouth of a great gun. This so dismayed the Spaniards that they threw down their arms and fled for their lives"——

"I would give a guinea to know 'twas a Cornish man who did that," cried Captain Trenwith; "'twas a brave action."

"Set your heart at rest, then, Captain," said Peter Hexel, "'twas Richard Hexel who did it. I have a letter from my son wherein he recounts this very same adventure."

"Then your son is a credit to Cornwall, and we'll drink his health, my friend," and the Captain got up and heartily shook Peter Hexel by the hand. "Compound us another bowl of punch, John Renowden; and see that it be worthy of the occasion."

That night the rafters of the Golden Lion rang with the cheers which greeted the toasts of "The British Navy" and "The Hero of St. Ives"—as Captain Trenwith was pleased to call Richard Hexel.

It was doubtless the darkness that made it so difficult for the Mayor and the Captain to find their way home that night, though they were escorted as usual by the black servant with a lighted lantern. The Mayor accounted to his wife for a headache which oppressed him next morning by the extreme exertion he had been obliged to use in supporting Captain Trenwith, who, poor man! having only one leg, could not be expected to walk as firmly as other people.

You may be sure the heart of Mary Renowden was gladdened by the news that had come about her lover; but months passed away, and nothing more was heard of him. At length there came a letter, stating that he had been severely wounded in an action with a Spanish ship in the West Indies, had been discharged, and was then lying in hospital at Falmouth. Old Hexel at once started for that place, and found poor Dick pale and thin from wounds and fever, but in good spirits and anxious to return home. The doctors, however, would not hear of it, and ordered the patient to lay up a week or two longer; and then, perhaps, he might be allowed to go. His father was, therefore, compelled to leave him and return to St. Ives, where he was eagerly expected by John Renowden and his daughter. When two weeks had passed, they all three went over to Falmouth, when the finishing touch was put to Dick's recovery by the embraces of his happy sweetheart.

* * * * *

"Time, though old, is strong in flight," says the old song; and he has brought us once more to Christmas Eve. The club is assembled at the George and Dragon; there is a brimming punch-bowl on the board, and the silver ladle with the golden guinea is in active operation. The talk is of the war, and John Tackabird has been reading aloud an account of a battle in the Bay of Biscay, where a large Spanish ship had been taken, and where the name of Tom Champer figured among the killed.

The mummers, having finished their Christmas play, have departed on their rounds; but suddenly they are heard returning, with cheers and shouts. The clatter of horses' hoofs is heard on the paved streets.

"'Tis Dick Hexel come back," cries the barber, looking out of the window.

"Let us give him welcome," said Captain Trenwith. "He is a brave lad, and hath fought and bled for the British flag!"

"Hurrah!" cried the crowd outside.

"Hurrah! hurrah!" shouted the Captain and his companions as they hurried to the door; and there, sure enough, was Dick Hexel, on horseback, with Mary Renowden seated on a pillion behind him, while Peter Hexel and John Renowden had already dismounted, and were undergoing a vigorous handshaking among the crowd. The club sat late in session that night, and Captain Trenwith would fain have had Dick in to tell how he had scaled the ramparts of Portobello; but Dick excused himself on the plea of fatigue, and he spent the evening much more to his liking in the company of Mary Renowden. "I do suppose," said Will Nance, "Dick Hexel will have a considerable sum in the way of prize-money coming to him?"

"If he lives to be an old man it may, perhaps, come to him," said John Tackabird; "but the tyrannical abuse of power under an oligarchy"——

"D—n your hard words!" cried Captain Trenwith; "they would break any man's jaw but yours. I tell ye, a true man will do his duty whether he is paid for it or no; and may I never live to see the day when a British tar will think more of profit than of honour."

This sentiment of the good old Captain ought, according to the usual custom of the stage, to bring down the curtain on our little drama; but, to satisfy the reader, we beg to state that in the early spring Richard Hexel espoused Mary Renowden in the parish church of St. Ives, and Captain Trenwith proposed the health of the young couple in the parlour of the Golden Lion, which ancient hostelry is still standing in evidence of the entire truth of this narrative.

M. J.

PAUL JONES'S ALIAS.

BY DAVID CHRISTIE MURRAY,

AUTHOR OF "JOSEPH'S COAT," "AUNT RACHEL," "CYNIC FORTUNE," &c.

In the afternoon of a very bitter and winterly day in Paris, Captain Harley Medhurst entered his hotel, and asked for letters. The concierge was occupied, and did not seem to hear him. A young Colossus, who looked very picturesquely handsome, laughed in an embarrassed way at his own failure, and the concierge, with slightly lifted shoulders and a head bent deprecatingly on one side, smiled respectful encouragement.

"What do you want to say?" Captain Medhurst asked. "Perhaps I can help you."

The handsome Rufus turned with an immediate smile.

"I want," he said, "to make this man understand that somebody must go to the North Station and get my traps for me, and that this is the ticket for them."

He had a full, deep voice, which was in excellent keeping with his great chest and shoulders, and in rather comic keeping with an unusually pronounced New England tone. Medhurst translated, the concierge took the slip of paper, and the handsome American, with a smile of great sweetness and candour, thanked his helper, and rushed up-stairs three steps at a time.

"Have you any letters for me?" Medhurst asked. The concierge searched gravely amongst a pile of letters on the table of his own little room, and shook his head.

"There is nothing but this, Sir."

"This" was the hotel bill, and Medhurst, coldly accepting it, turned away and walked slowly and deliberately up-stairs. Arrived at his room, he broke open the envelope in which the bill was enclosed, and found it accompanied by a note requesting immediate payment. The caissier informed him that it was the custom of the house to ask payment of its clientèle every eight days, and added that fifteen days had expired since Captain Harley Medhurst's arrival at the hotel. An immediate response would oblige. He read this, thrusting his moustache into his mouth meanwhile, and biting at it with an angry perplexity.

"Confound the fellow!" he muttered. "Infernal impertinence! Tell him so, begad!"

His hands strayed forlornly to his pockets, groped there, and came out again, empty. He took a cigarette-case from his overcoat and opened it. That was empty also; and he returned it slowly, looking downward intently at the pattern of the carpet. Then he "confounded" the fellow's impertinence again, and sat down in an arm-chair beside a handful of wood fire which lingered on the hearth. By-and-by, he rang the bell, and, one of the hotel servants appearing in answer, he bade him bring a carafe of cognac, a syphon of seltzer-water, and half-a-dozen cigars. The man bowed with perfect respectfulness and went away, but, after a lengthy pause, returned, furtive and ashamed. Would Monsieur have the obligingness to descend? The manager would be honoured if Monsieur would speak with him.

Captain Medhurst replied that if the manager had anything to say, he might come there and say it. The embarrassed waiter bowed and tried to smile as he edged himself out of the room. He would deliver Monsieur's message, he replied, and without doubt the manager would at once ascend. In effect, he presented himself a minute later. He was very polite, very respectful and regretful, but inexorable. Captain Harley Medhurst was unknown in the hotel: it was his first visit there. Doubtless his remittances would arrive. The manager devoutly hoped so, and was utterly desolate at the thought of submitting him to inconvenience. But without money nothing more could be found for the Captain in that house.

Captain Medhurst was wrathful, and stood upon his dignity. He made certain statements about his family, his connections by marriage, and his friends, which might perhaps have sounded a little piteous if any other English gentleman had been there to listen to them. It was all true, no doubt, said the unmoved manager; but people who kept an hotel kept it to make a profit. It was their misfortune not to know Captain Medhurst more intimately. Monsieur spoke so perfect a French that without doubt he had many acquaintances in Paris. His room was in absolute requisition: a lady was even now waiting to inspect it, and, in short, there was apparently nothing for it but for Captain Harley Medhurst to retire.

The Captain was naturally and bitterly indignant. He gave the manager to understand that his enormous social influence in England would be devoted for the rest of his days to keeping travellers away from a house in which he had received so little consideration. The manager said, over and over again, that he was desolate, but did not look it in the least.

But, sacred Heaven! the Captain demanded to know what was he to do? He expected remittances by the next post. He had not a franc in his purse; he did not know a single person at that hour in Paris. Did they mean to thrust him—an English gentleman, an officer in her Britannic Majesty's service, a cousin of Lord this and Lady that—into the streets?

"Désolé, Monsieur!" returned the manager, and was simply incredulous and unmoved.

Why was he treated in this way? the Captain asked. Surely it was not an unheard-of thing that a gentleman should be without money for a few days in a foreign capital? He was careless about his financial arrangements, and the thing had happened to him before, though he must confess that on that occasion he had met with widely different treatment. At this the manager, with an assumed air of sudden recollection, drew forth a pocket-book, and from it produced a little rose-coloured ticket from the national pawnshop. It related, as the hapless Captain knew perfectly well, to a watch confided to the care of *ma tante* ten days ago.

Monsieur had had the ill-fortune to drop that in the hall of the hotel an hour before, on leaving.

"Some thief of a waiter," said the Captain, shamefacedly, "felt in my pockets when he brushed my clothes."

The manager shrugged his shoulders, and would have nothing to say to that accusation, and the unfortunate Captain, with the accusing ticket in his hand—evidence of nearly a fortnight's absolute poverty—stared blankly before him. At this moment a knock sounded at the door, and the manager, opening it, revealed an ostentatious Briton, in a gorgeous fur coat, frogged all down the front, and an offensively brilliant hat cocked jauntily on one side of his head.

"For God's sake, Daisy!" said the Captain, feebly, "have you got the money about you? They're talking about turning me out here, and I haven't a cent."

"Money, my boy?" responded the timely Daisy, swaggering into the room, and pulling off his fur-rimmed gloves as if he were a boxer getting rid of the mufflers after a victorious encounter. "What's the damage? Anything up to fifty thousand francs I'm game for."

He opened his furred overcoat with a rollicking swagger, and thrusting an over-jewelled hand into an inner pocket, threw a swollen pocket-book upon the bed-room table.

"Help yourself, my boy. Pay the blackguard. Like the impudence of these damned foreigners! Pay him, begad, and slang him."

The fat pocket-book was actually crammed with bank-notes for a thousand francs. The Captain's eye, which had naturally a frozen look, glittered as he saw this; but he selected one note from the bulky roll with perfect quiet, and handed it with a silent dignity to the manager. Then never was man more abashed, more humiliated, more desolate, or more fluent in declaration of these sentiments. Monsieur le Capitaine would confess himself that the circumstances had looked strange. If he (the manager) had been the proprietor of the hotel it was simply inconceivable that he could have acted as he had done; but he was a salaried servant, responsible to a company, and had only followed instructions from which he had no power to depart.

"I see," said the Captain, "that you have made out my bill for the whole day. I will dine here, therefore, and after dinner shall leave your house. Where are you staying, Daisy?"

"I'm not staying anywhere. I've just come up from the sunny South by the train of luxury. I'll dine here with you. It's snowing like the very devil."

"I have told this fellow," said Captain Medhurst, "that I leave the hotel to-night."

"Should think so, by Jingo! Beastly impertinence! English gentleman! All damn fine! Why don't you slang the fellow? Give him a tongue-walking. I would, begad, if I spoke the lingo as you do."

"I have expressed my opinion of him already," said Medhurst, with dignity. "You can send up the receipted bill and the change," he added to the manager, who withdrew with an air of deference, and offered no further excuses.

"What's it mean, Daisy?" the Captain asked when they were alone. The man in the fur coat sat on the bed, and majestically twirled his moustaches and his glittering rings, smiling and wagging his head with mingled pride and cunning. By-and-by he hooked a finger at the pocket-book which still lay on the table, and gave a leary wink. The Captain, readily translating these signs, handed him the wealthy volume. His fingers lingered on it as the owner accepted it, and the two looked at each other—Medhurst puzzled and curious, and the other man beaming with complacency. "How did you get hold of all that pile?"

"Aha! my boy," responded the new-comer, returning his property to his pocket, "how do you think I got hold of it? I'll tell you what it is, Medhurst. The Martingale is as good as gold. I've tried it, and that's the result of one night's work. I don't say you can do it every day, because there are times when the luck runs against the best system in the world."

"You've been at Monte Carlo?" said the other; "you've been playing at the tables there?"

"That's it, my boy. That's where I've been, and that's what I've been doing."

"Of all the incurable asses I ever met," cried Medhurst, "you're the stupidest! You risked my hundred as well as your own, I know. It's not a bit of use telling me that you didn't. I wouldn't believe you if you gave me your oath about it."

The Daisy, who had been satirically christened by the name of the wee, modest, crimson-tippit flower in compliment to his general efflorescence, wagged his head with a completely satisfied air, and winked at his companion.

"You keep your hair on, old man. I'm all right, and I'm going to do the square thing by you. I put twenty-five of yours to twenty-five of my own, and I went with a capital of fifty. I had to lie low at first, and skirmish about with five-franc pieces; but I hit 'em for the maximum over and over again before I'd done. If I'd lost your twenty-five I should simply have made you a present of it; but I knew jolly well I shouldn't lose it."

"You're an ass, Daisy!" said the Captain; but he said it in a softer tone than before, and in a little while so far subdued his virtuous indignation as to ask—"How much did you hit 'em for?"

"I've landed over a couple of thousand pounds. It's all there," he tapped the pocket in which the notes reposed. Medhurst advanced a hand, as if he were going to ask for his share of the spoil. "Wait a bit," said the beaming Daisy; "I want a square understanding first. I'm going back again, and I want you to come with me." Medhurst shook his head with great decision. "There you are," said the Daisy, "and that's why I don't hand the coin over at once. Now, mind you, you've got no more claim over half my winnings than you have on the ground-rent of St. Paul's Cathedral, if there is such a thing. I played for you just to show you what the system was; and I put a pony of yours into it because I knew you'd profit by it, and because I knew I should want you afterwards. If the system had broken down, you'd never have heard anything about it. I should have pocketed my losses and have said nothing."

"Well," said Medhurst, fixing his frozen eye upon him, "what do you want me to do?"

"I want you to come to Monty with me, and I want you to keep me cool and straight. I've got enough to play a great game now, and I'm going to play it. I'm going to bust that bank sky high. They've got a capital of millions sterling. They'll fight to the last gasp and bleed to the last drop before they'll give in. They can't afford to be beaten. They think they can't be beaten in the long run; and they won't stop a man who has once won heavily. They're game, my boy, and so am I; they're keen set, my boy, and so am I. Don't you think you're going to keep me away from it, Medhurst. I've heard all your lectures till I'm sick of 'em, and if you were to jaw from now to doomsday it wouldn't make a pennyworth of difference."

"Now, look here, Daisy," said Captain Medhurst, pulling off his overcoat and seating himself.

"You can go it, if you like," said the Daisy; "but it'll be in at one ear and out at the other. I'm thirsty: ring that blooming bell."

As the Captain turned to obey this request, a waiter knocked at the door, and brought in the receipted bill and the balance of the thousand-franc note.

"Here, I say, you!" began the Daisy. "Donny maw—— Here, you try the lingo on him, Medhurst. Order a bottle of fizz. I can't get my tongue round this language a little bit. 'Donny,'" he pursued reflectively: "they used to call your fists your donnies, when I was at school. 'Maw' means 'me,' of course. 'Donny maw'—'hand me.' I suppose, when you come to know it, there's a bit of resemblance between French and English after all?"

Into the brilliant philological vista opened by this suggestion Captain Medhurst declined to enter.

"Give me a cigar," he said, "and I'll talk to you."

"You can save yourself the trouble," said the Daisy, doggedly. "Look here!" He drew out his pocket-book again, when he had thrown over his cigar-case to his companion, and fell to counting the notes it contained. "You've had one of them, and I made 'em fifty-eight this morning." He counted them carefully. "There you are! That's twenty-eight to you, and twenty-nine to me. Now, do you see that bundle? That's one thousand one hundred and twenty pounds! Do you see it?" Medhurst looked very hard at it indeed, and evidently saw it clearly. "Now, if you'll hold your jaw, and do what I want you, that's yours!"

"What do you want?"

"I want you to come back to Monty with me; I want you to master the system thoroughly, before you go; and I want you to come and see me play it. I get wild; I lose my head. I could have had a couple of hundred thousand the other night instead of this miserable handful; but I felt in such vein I dropped the system, and dropped a pretty tidy handful of money with it, too. I believe that if the tables hadn't closed they could have cleaned me out. Now, that's my weakness, and I know it. The system's all right, but I don't stick to it. Now, I want you to *make* me stick to it. If you see me going on anything else I shall authorise you to take the money off the table."

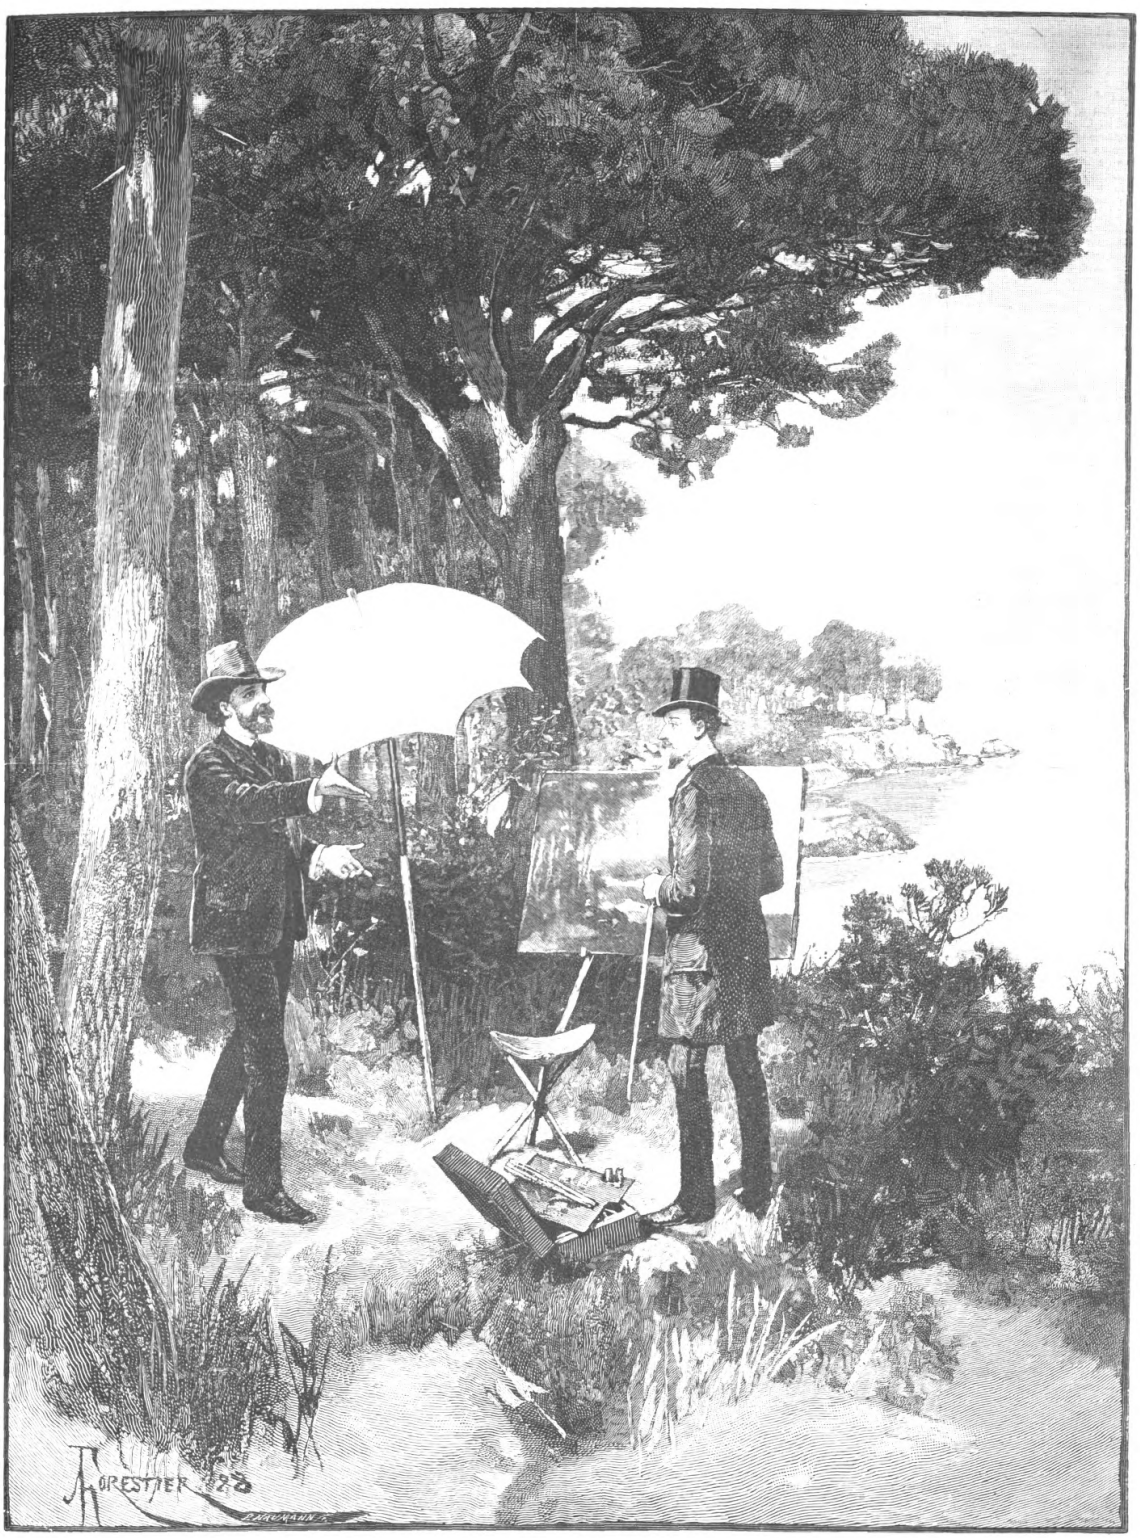
"I know what it will come to," said Medhurst, "if I consent. You'll lose your own money on your system, and then you'll borrow this, and neither you nor I will be a penny better for the luck you've had."

The Daisy took off his hat for the first time since entering the room.

"As true as God's my judge, Medhurst," he said solemnly, "I'll never ask you for a penny."

"If I take it," said Medhurst, "I shall do what I undertake to do; but no more. I sha'n't lend the money to be thrown away, and I'll have nothing to do with the tables except to watch your play there."

The Daisy rose and handed to his companion the bundle of notes.



Dumb Crambo is a pastime prime
For little folk at Christmas-time.
Its ins and outs I need not tell,
For all young people know it well;
The rhyme-word chosen now is *pat*,
And many words chime well with that.

DUMB CRAMBO.

Drawn by Lucien Davis.

The Outs act well, and yet are hissed
For being wrong, with scorn dismissed;
Is isn't bat, gnat, hat, or rat—
Then mewing comes a made-up *cat*,
As here you see; and laughter bright
And clapping hands proclaim them right.

"Hillo! You come down here?"

PAUL JONES'S ALIAS.

Drawn by A. Forestier.

"There you are," he said. "You're enlisted. That's the Queen's shilling. Ring that thundering bell. I'm dying for a drink."

Now, Captain Harley Medhurst, though he had something of the air of a roué, and looked rather hard-bitten and world-worn, was one of those people who have an evident right to the conventional title of gentleman. There was no doubting that he was a man of good family, or that he had been gently bred and accustomed to mix with good society. No observer of men would have been very much surprised to know that society of late years had fought shy of him. There is something which no art of description can clearly define which marks the *déclassé* with a badge so patent that a very simple wayfarer may read it. Captain Medhurst wore that badge, and showed his consciousness of it in his own chill and shifty eye. He had been a gentleman in something more than the conventional sense once upon a time, and was not quite a gentleman any longer.

The Daisy, who answered to the title of Major De Vere when he could induce people to address him by it, was a person of altogether another stamp. If a rare good heart, coupled with an intimate knowledge of all forms of scoundrelism and all grades of scoundrel life in England, could have made a man a gentleman, the Daisy might have taken rank with dukes and princes. He had lived on his wits for the last five-and-twenty years, and, for the most part, had lived well. Outside the sphere of the gaming-table or the betting-ring the Major's wits were not particularly brilliant; but on his own ground he was more than respectable—he was redoubtable. A better-hearted brigand never breathed. He lived by the most equivocal means conceivable, and his hand was constantly in his pocket for the relief of distress. He had a happy audacity, born of a profound belief that no living soul could doubt the distinction of his manner, speech, and aspect. He ticketed himself "snob" from head to feet, and conscientiously believed himself to impress all and sundry with the belief that he was a gentleman of the first water. He was utterly pitiless to people who had money, and regarded them as his natural prey. He and Medhurst had formed themselves into a gambling partnership at a time when both were very much under the water, and the Captain's social cachet not being quite obliterated at that moment, he had been able to introduce his confederate into places where he would otherwise have had little chance of obtaining a foothold. The partnership floated both of them, in a financial sense; but it ended in Medhurst's social shipwreck. He had played pigeon for a good many years, and the rooks had stripped him of a handsome fortune. Now, like hundreds of men who had gone before him, he had turned rook, and was ready to feather anything defenceless that might come in his way.

He had an almost pious horror for the public tables, and he thought that Monte Carlo was quite a sink of iniquity. He felt in respect to the great gambling institution there as a man who shot for the pot over a few bare acres of his own might feel if the birds upon his ground with one consent betook themselves to the preserves of some wealthy, princely neighbour. The existence of Monte Carlo was inimical to private, professional enterprise. He had been feathered there himself, the poor Medhurst!—he had been feathered everywhere—and he was grieved and indignant to find his partner so incurably smitten by the seductions of the place. A professional man, he urged, should only play where his experience, skill, and coolness gave him the advantage. No experience, skill, or coolness could help the best-trained gambler in the world against that inconscient wheel which could never get excited or tired, or run away from its own system of fortuitous eccentricity.

The Captain had already thrown a billet or two of wood on the decaying fire, and it now burned up again very brightly. The two sat on either side of it, sipping their wine and smoking.

"I've got a tenner on the Association Cup tie," said Major De Vere. "I suppose one can get an English paper here? The game should have been played off yesterday."

"You can get the *New York Herald*," said Medhurst. "Shall I ring and ask for it?"

The journal came in answer to Medhurst's demand, and the Major turned it over.

"I've pulled that off, anyway," he said; "though it doesn't matter much now. Hillo! You've got a millionaire staying here!"

"That's likely enough," Medhurst answered, uninterestedly; "who is he?"

"Mr. Paul Jones, of New York," the Major answered. "I remember reading about him last year. His father died. He was something in petroleum or a corn-ring—I don't know what all. He's worth about ten millions, English money."

"He 'd be better worth going at than your Monte Carlo."

"D' ye think so? Those Yankees are deuced sharp, my boy. I've been had by one or two of them; but I never landed one myself yet." All Americans were Yankees to Major De Vere. "Monte Carlo's got as much as he has, and Monte Carlo won't shy; and even if you were to ruin Monte Carlo, you could hold your head up with the best. If the Archbishop of Canterbury or the Pope of Rome went and smashed up Monte all the good Christians would approve of him; but if you and me went and cleaned out a private millionaire, we should get hooted at. Not that I should mind that much," the Major added philosophically, "so long as I collared the pieces."

"Father died a year ago, did he?" said Medhurst. "He's likely to be pretty young, then?"

"That depends," returned the Major. "My old governor's alive somewhere. At least, I've never heard to the contrary, and I'm no chicken. Anybody who counted on picking me up because he heard that my governor fell off the hooks last year would have his work cut out."

But he selected one note from the bulky roll with perfect quiet.

The Major went back to his paper, and Medhurst sipped and smoked. Once he murmured inwardly, to himself, and the Major catching the words—"ten millions, English money"—looked up and smiled. The snow whirled against the window, and the wind howled in the chimney. The streets on such a day were only for those who had imperative business, and the Major, with a view to killing time, proposed a hand at cards. Medhurst assented, and they played until the dressing-bell sounded, and in due time they went down to dinner. The hotel was full, and the long tables of the table-d'hôte were crowded. Medhurst found himself side by side with his Colossus of the early afternoon, who edged away his chair to make room for him with a smile of friendly recognition.

"Rough weather outside, Sir," he said cheerfully. "I've got but very little time in Paris; I'm off down South to-morrow, and I've been tearing around with an interpreter to get a few things ready—purchases of one sort and another."

He was a cheery, amiable, open-hearted young fellow, not in the least afraid of the sound of that big voice of his, but agreeably and wholesomely natural, and without a trace of affectation. Medhurst made some politely indifferent reply, and the Daisy spoke across him. The young New Englander, who wore a scarlet necktie and a coat of bronze-coloured velvet, quite lit up the table with these colours and his auburn mane and coppery beard, and his frank, jolly blue eyes. The Daisy was as loud and as *sans gêne* as he; and when Medhurst, seeing that they wished to talk together, changed seats with his companion, the two got on as if they had been made for one another.

Right opposite to Major De Vere sat a refined-looking, shrinking man of seven or eight-and-twenty, who looked in a curious way at once shy and distinguished. Whilst the Daisy and his new-found companion were talking rather noisily to each other, Medhurst caught this gentleman's eye, and observed a look and an almost imperceptible gesture of distaste. A moment later a neighbour offered to this gentleman some little table courtesy, to which he responded by a "Thank you."

"He's an American, too," thought Medhurst to himself; "and doesn't like the way in which his young countryman is proclaiming himself."

He himself did not altogether like the Daisy either, and knew how over-pronounced all his airs seemed to well-bred people, but he was used to him by this time; and as to the average British cad who makes himself objectionable on the Continent, Captain Medhurst would have thought so little in his better days of allying himself in other peoples' fancy with that loud and vulgar personage that the quiet American's silently expressed displeasure was droll to him.

The American gentleman had not the faintest intention in the world of betraying to any stranger's eye his disapproval of the loud pair opposite; but Medhurst, watching him, saw it peep out in a score of signs which were only just visible to a close observation. He ate his dinner silently, or, if addressed, contented himself with a reply which was purely formal.

About midway through the dinner a waiter stole up to Major De Vere and handed him a telegram on a salver.

"Not for me," said the Major, in his brassy voice. "Mossoo Paul Jones; not me."

"Ah!" said the young American, "that's mine."

The Major handed it to him, and kicked Medhurst under the table. The quiet gentleman on the other side looked up with a quick and startled glance as the name was pronounced, and did not remove his regard from the owner of it until the latter had opened and read his telegram and bestowed it in a waistcoat-pocket.

So this, thought Medhurst, was Paul Jones, was it? He was evidently a greenhorn—amiable, friendly, unguarded, as likely to afford good and profitable sport as anybody he had ever beheld in his life. Ten millions sterling in that young man's possession! It was an inspiring thought that perhaps a thousand per million might be drawn from him. It would do *him* no harm, and he would have to learn his life-lesson somewhere, unless the whole ten millions were to fall ruinously through his fingers. Medhurst noticed with satisfaction how perfectly the handsome young giant and the Major were getting on together, and how well they suited each other. With the Daisy as his jovial companion and Medhurst as his social and moral mentor, a good deal might be done with him. If it had been that other fellow, now—that quiet and shyly dignified young man on the opposite side of the table—the Major would have had but the poorest chance in the world. It was lucky that the American millionaire should have turned out to be a man of this noisy bonhomie, this evidently unsuspicious and unworldly good-nature, and it was a splendid chance which had dropped them at his side at dinner.

"You 're going down South, you say, Sir?" said the Major.

"Yes," said Paul; "I'm going down to Juan-les-Pins. I'm going to paint there. I've never seen the place; but I'm told it's full of very elegant stuff, and I reckon on getting half-a-dozen pictures out of it."

"You paint, Sir?" said the Major.

"I've got to," said the American. Again Major De Vere kicked Captain Medhurst's foot beneath the table.

"You are an artist, Sir?" said Medhurst, leaning a little across the efflorescent figure of the Daisy to address him. The handsome young Rufus blushed.

"I don't know that I can quite say that," he answered; "but if I aint in a year or two it sha'n't be for want of trying."

Medhurst trod upon the Daisy's toes this time, and continued with a smile of interest,

"An amateur?"

"No, no," said Paul Jones seriously, shaking his auburn mane; "solid business, Sir."

Medhurst retired and left him to the Major's care. After dinner Rufus and the Daisy smoked a cigar together in the billiard-room. Medhurst found opportunity for a moment's interview with his collaborateur.

"That young fellow," he said, "is playing at an incognito. He doesn't fancy that he 's known to be rich. Don't let him

suspect you know it. He's going down to-morrow. We'll go with him. Stick to him to-night, and be as chummy with him as you can. We may as well stop in the house to-night. You've got a portmanteau here?"—the Major nodded—"All right. I'll engage a room for you as I go out. But not a word about the dollars."

"Leave me alone for that," said the Major; and Captain Medhurst drove off to the little theatre in the Palais Royal, and left the intended victim in his companion's hands with perfect confidence. His vis-à-vis of the evening was his neighbour in the stalls. They both laughed with great heartiness at the harmless drolleries of "La Cagnotte," and exchanged a word or two. When the performance was over the quiet American wrapped himself up with great care, and even drew on a pair of goloshes before venturing into the street. Medhurst remarked these precautions against the weather, and helped the stranger, who was struggling rather feebly with a heavy overcoat.

"If you are going back to the hotel, Sir," the grave young stranger said, "I may perhaps offer you a seat?"

The Captain was always willing to economise, and consented. The stranger had a well-appointed hired carriage at the door, which, to Captain Medhurst's taste, was a little overheated, even for so cold a night.

"I hope," said the young stranger, "that you will not find the warmth oppressive. My doctors warn me that there is something here"—he tapped his chest lightly with his fingers.

"You should go South," Medhurst answered.

"I am going to-morrow," said the stranger. "I am advised to try Mentone."

Medhurst, finding on inquiry that his companion was a stranger to the Riviera, gave him certain sage counsels as to the dangers of its seductive climate, and the two parted on excellent terms with each other. The solemn young consumptive was not useful in Captain Medhurst's way of business; but he was a gentleman, and the society of a gentleman made a pleasant change. Medhurst carried with him enough of that lost soil from which he fell to be able still to rear a flower or two. If he could have afforded to be a man of spotless honour, he would have been glad of any chance to go back to his old ways and to his old society; but he had no patrimony left to him but his wits, and must needs live upon them.

Paul Jones had gone to bed when Medhurst re-entered the hotel, but the Major was in great form. He had fallen into the society of two or three gentlemen of his own kidney, and was calling liberally for champagne, under the impression that the waiters were deeply sensible of his wealth, his social status, and his general tone. When he was in funds, it was the Daisy's simple dream that everybody imagined him to be some high and mighty person, the geniality of whose temper forbade him to abash the world with his title. He lived happy in the serene conviction that nobody could look at him or listen to him without knowing him to be a gentleman; and in his confidential and expansive moments, he would brag of this gift of Nature to his confederate until Medhurst actually groaned under him. That liberality with champagne among strangers was a splendid trait, to the generous brigand's own way of thinking. When he paid in the presence of other people, he took out all the money he had, and threw it about with a lordly indifference. These characteristics were of a piece with his brassy, good-humoured voice, his raking hat, his happy and audacious swagger, the size and brilliancy of his breast-pin, and the multitude of his glittering rings.

Medhurst got him away from his companions without difficulty, for the Major was usually placable to his companion's touch.

"Where's the millionaire?"

"He's gone to bed," said the Major. "He's a gay youngster enough, but he won't take his liquor. Says he never drinks, except at meals, and very little then. That's one of those confounded Yankee institutions. 'Good wine is a good familiar creature'—that's all the Scripture I know, my boy; but it's a damn good text, though I never heard a parson preach from it."

"You'd better turn in," said Medhurst. "You'll be having a headache to-morrow."

"Headache?" said the Daisy, smiling uncertainly, but with complete friendliness, at his own reflection in the mirror, which he took for a third person. "Pommery Greno doesn't give you a headache—not when it's the right sort. It is here, my boy. Twenty-three francs the bottle."

Medhurst succeeded in getting him into bed, and then went to his own apartment. He was always scrupulously sober; but he had been compelled to drink a little with the Major for form's sake before he could withdraw him from his boon companions. He set candles on either side his mirror, and, producing a pack of cards, sat down there to deal and cut and shuffle before the looking-glass, with his eyes intently fixed on the reflection of his own fingers. He satisfied himself that he was in perfect form, and so undressed and went to bed. It was an odd thing, perhaps, that he should have searched in the breast-pocket of his coat before he lay down, and should have taken from it the photograph of an innocent-looking child of eight or nine; that he should have carried this to bed with him, and have looked at the little short-frocked, innocent figure so tenderly and so long; and that he should have kissed the picture and placed it under his pillow before he blew out his candle for the night. But, then, human nature is full of oddities, and Captain Medhurst is not the only man whose profession and practices are contradictory.

The weather was wild next morning, and a heavy snow was driven so violently about the streets that few but those who were compelled to do it ventured abroad at all that day in Paris. But notwithstanding the severity of the weather, Paul Jones was out and about all morning and afternoon, returning to the hotel at intervals, stamping the snow from his shoes and laughing in the entrance-hall, and dashing up-stairs to his apartment and down again with prodigious strides. He was back to luncheon with a face which glowed so from the wind and cold that he looked as jolly as a rising sun. The Daisy was to the full as florid; but his was a glow less invigorating and wholesome to look at. He was a little puffy about the eyes, and his temper, as he himself admitted, broke off short like a carrot. The pale, phthisical young American was there also, and Medhurst changed his place to sit beside him—partly with a view to leave a clear field for the Major's operations, and partly because he preferred the quieter companionship. The Major was not much in the mood to operate at first; but as the meal progressed and the champagne bottle at his elbow grew rapidly towards emptiness, he announced that he and his friend, Captain Harley Medhurst, were going down to Monte Carlo by the *rapide* of that evening. Paul Jones was unaffectedly pleased at this intelligence, and showed it. The Major's bluff, noisy ways, his swagger and laughter, suited Paul excellently. He thought the Major eminently British, as, indeed, in some respects, he was.

"I've been making inquiries," said Paul, "and I find it's most agreeable to get to the station early and dine there. That's what I'm going to do. You wouldn't think it, by the look of things at present," he added: "but I'm going out now to buy a sun umbrella."

With that he rose from the table and shook hands with the Major. It was one of his habits to shake hands with a man whenever he met with him or parted from him, if it was half-a-score times a day, and he always went through that friendly operation with great heartiness and solemnity.

That evening the whole *personnel* of the hotel hung about the entrance hall and the corridors through which everybody had to pass in quitting the house. Everybody knew about the fifty millions of dollars, and cold hearts warmed in the gleam of that splendid fortune. Paul, who was unaware of the newspaper paragraph which had heralded the arrival of the man with the dollars, was surprised to notice how considerable a stir his departure made. He put it down to French politeness, of which he had heard a good deal; but he was not accustomed to this sort of leave-taking at home, and was embarrassed by the general *empressement*. He, Medhurst, and the Major dined together at the railway station, and afterwards found a disengaged compartment in one of the carriages of the *rapide*. At this time of day the Major was naturally in his gayest form; the young Paul, with his new-found friends, had taken a glass or two more wine than usual, and was gay at heart with the pleasant excitement of the journey; and Medhurst opened a quieter convivial vein than the Major's, but made himself a bright and amusing companion.

"Just for the fun of the thing," the Major produced a pack of playing cards and a travelling-lamp, with artfully-arranged reflectors which gave a clear and mellow light. The three got together, with a travelling-rug about their knees, and played napoleon at half-franc points in the most innocent, friendly way in the world. Paul Jones won five or six louis, and the Major grew sleepy, and proposed to stop. He and Medhurst would take their revenge later on, perhaps, and if they didn't get it—why, perhaps, it didn't greatly matter; and with this and a laugh, which ended in a yawn, Major De Vere packed himself in a corner, drew his travelling cap over his eyes, and disposed himself to slumber. His companions followed his lead; but Paul, with the best desire to sleep in the world, lay awake for a long time, his big form occupying the whole of one side of the compartment. He was full of enthusiasms and hopes, for some of which his artistic face seemed to give better warrant than the boyish bravado of his manner. He thought of violet seas with the light of the southern sun upon them, of palms and aloes, and of grey olives foaming up the mountain side; and every now and again, with an unconscious gesture, his right hand would move as if it held a brush, and were working freely at a canvas. Half-a-dozen times he lifted himself upon his elbow and tried to thaw the frozen snow upon the window-pane. He failed in this; but once rising and cautiously lowering the window an inch or two, he heard the wind go by with a scream, and saw the wild snow-flakes fleeting past in the black night, reddened for a mere second by the flash of the furnace fire. Little promise of the sunny South as yet. He closed the window with a comfortable shiver, and lay down again; and, by-and-by, palms and olives, and soft glittering seas, and purple headlands of fancy slid into his dreams, and he was asleep before he knew it.

The Major was very grumpy again from Avignon—where he awoke and partook of a bowl of coffee and a roll upon the icy, wind-swept, open platform—to Marseilles, where breakfast and a wash restored him. But Paul, with youth and sobriety on his side, was as gay as a colt from the moment of his waking, and was quite impassioned by the landscape.

"Saints alive!" he said to Medhurst, "look at the colour of the gashes in that ground! Look at the reds and browns! Look at the green of that turf! It's as tender as young lamb, and as bright as a candle flame. The grey on them old olives—eh, Sir? I guess I'll tickle that in before I'm much older."

"You seem to be an enthusiast about painting," said Medhurst.

"Well, Sir," returned Paul, deliberately, "I believe you. I wouldn't give up paintin' for a million a year. I don't think it would be worth my while to give it up for anything I've ever seen or heard about. It's one of those things that's just meat and drink and life and sunlight if you once cotton to it properly. If there wasn't such a thing as colour in the world I'd just die, and make no bones about it."

This enthusiasm appeared just a little strained to Captain Medhurst, who had never had many enthusiasms of his own, and had parted with most of them a long time ago. He smiled, however, and said that no doubt that sort of warmth of feeling gave life a certain fullness.

"I'm afraid," he said, following the smile with a sigh which was probably more real, "that the lives of most of us are a little barren."

"I'm inclined to think," said the young fellow, with loud, cheerful optimism, "that it's about our own fault if they are. I can understand a poor devil who hasn't got one cent to clink against another, or a forlorn wretch who's got no lungs or who's in want of a liver or a circulation, being down in the mouth and thinking that the world is a pretty dark place. Or I can understand a man who's had such hard lines as to lose the folks he cares for, sitting down and making up his mind he won't care for anything a:.y more. But I can't understand a live man asking to be buried anywhere. What a man's got to do in this world is to take hold of something, and never be contented till he's got it up by the roots. He'll never get it up, Sir, not if it's worth getting; but he'll find a pretty considerable pleasure in tugging at it, and he'll have his heart full, and his mind full, and his hands full, and that's a mighty comfortable thing, according to my way of looking at it, Sir."

Paul, in spite of his Parisian purchases, had but little luggage with him. He carried a rather old-fashioned silver watch at the end of a broad silk ribbon; he wore no jewellery, and his raiment, though it was a little bright and loud, was precisely such as any working artist might have worn. His plain ways and water-drinking habits, taken in conjunction with these things, fully reconciled Medhurst to the idea of fleecing the young man ever so little, and making his own hard nest softer with the proceeds. If a millionaire had no expensive tastes, of what use were his millions to him, and why should not a part of his superabundance flow over upon others less blessed by fortune, but more blessed by Nature with the power of using money?

As the winter sun rose into the pure sky, Paul Jones ceased to talk and devoted himself altogether to a rapt contemplation of the landscape. They had long since left the falling snow behind; but after it, for miles, the country had been powdered like the figures on a Twelfth Night cake. Then came the glorious fresh green, ringed with wild sterile hills, and at last the sea, soaked full of light and colour, like some prodigious gem. The great Rufus sat eager and thoughtful, staring out of window as picture after picture rolled past him, and his right hand was pretty often busy with the imaginary brush. If either of his companions spoke to him he answered, but in an absorbed way, as if his thoughts were elsewhere, as indeed they were. At Cannes he gathered his traps together.

"As sure as life," he said, "I'll catch something before this sun goes down. I shall have an hour or two of it, anyhow."

He knew beforehand the name of the hotel he was going to, and gave his new-found friends his address at the Château de la Pinède, Juan-les-Pins. Medhurst and the Major gave him their cards in turn.

"You'll find us at the Hôtel de Paris, Monte Carlo," said the Major. "The season's in full swing there, and of course you'll come out of your shell at times and take a walk over? Come and dine." Paul Jones was on the railway platform, and the Captain was handing out a strapped, battered old easel which had anything but an amateur air about it.

"Come now," said the Major. "Say to-morrow. There's a train reaches us a little after half-past seven. Say dinner for a quarter to eight." Paul hesitated. "Come, man," said the Major, "you can't work after daylight, I suppose. Hillo! we're off. That's a bargain? To-morrow. Quarter to eight sharp. Good-bye."

The train steamed slowly out of the station, and Paul and the Major waved hats at each other until the latter withdrew his head into the carriage, when he looked slily across at Medhurst.

"You left me most of that, old man," he said, with a jaunty air of self-satisfaction, as if he were pleased to have negotiated the preliminaries so ably.

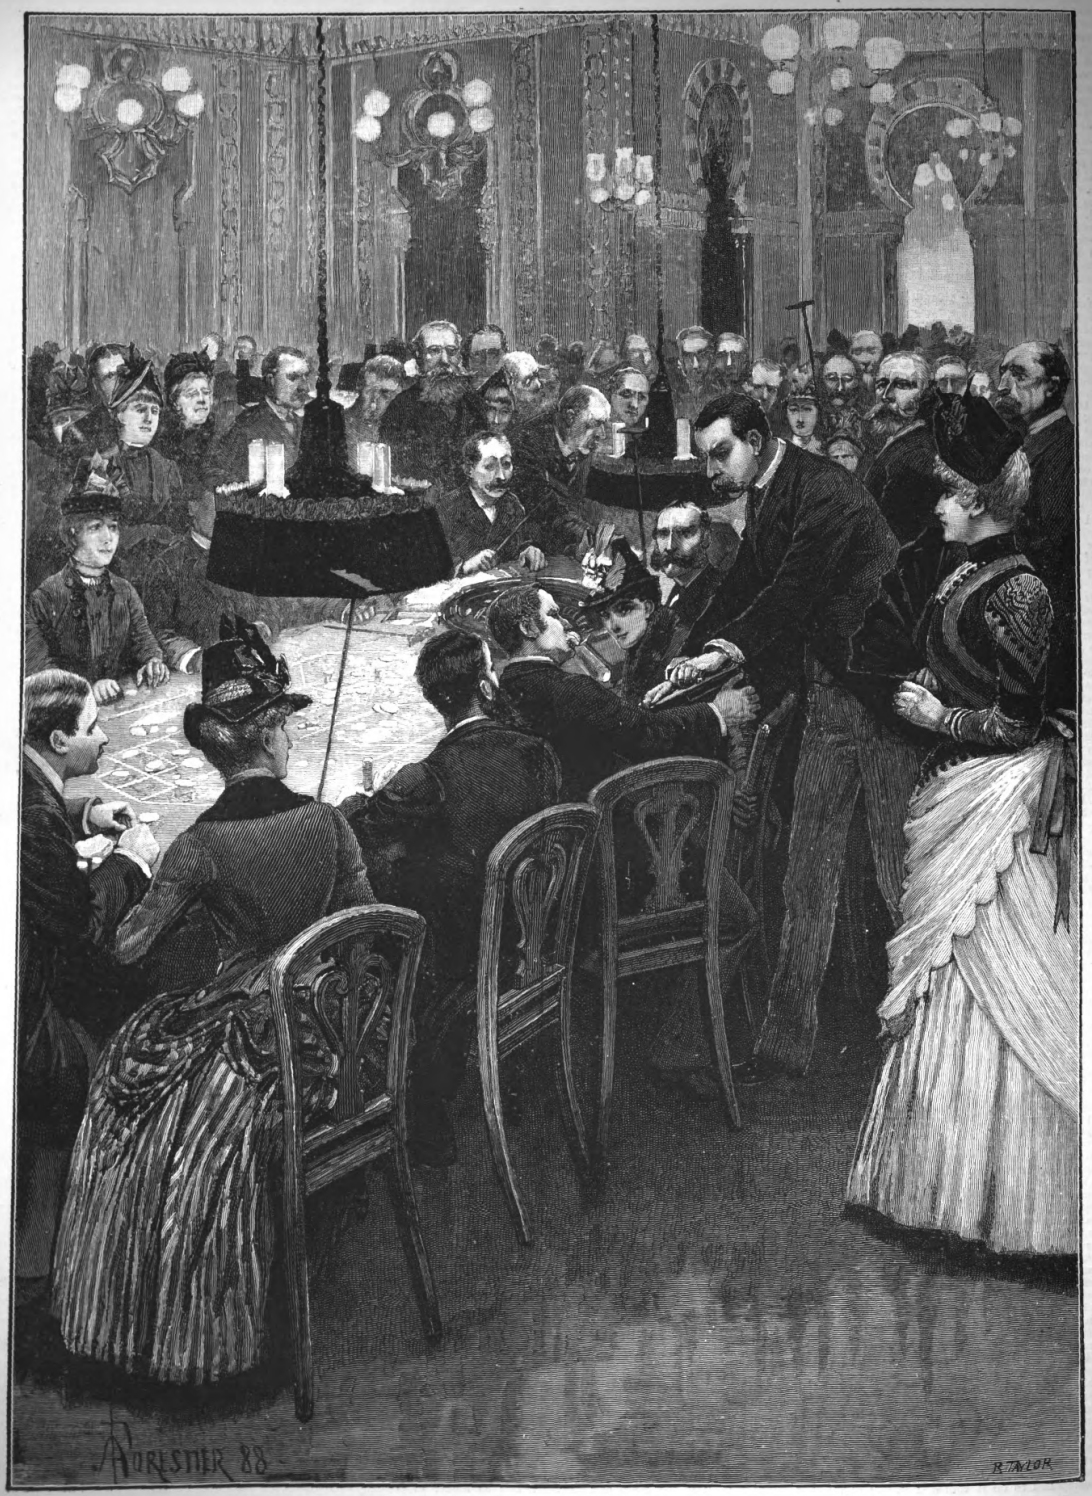
"You didn't want my help there," said Medhurst. "Don't drink to-morrow, Daisy."

"Now, did you ever know me to, when there's been business on hand?"

"Sometimes," Medhurst answered. "Don't do it to-morrow. We've got a big thing on."

"That's all as it may turn out," the Major replied, "so far as the young 'un goes. But he may turn tail and bolt at any minute. What I like about Monte Carlo is they 'll fight you there until your head drops off. There's no backing out there. Skin 'em over night, and they 'll be up to time, fresh and smiling, in the morning. They 'll fight as long as they can raise a dollar."

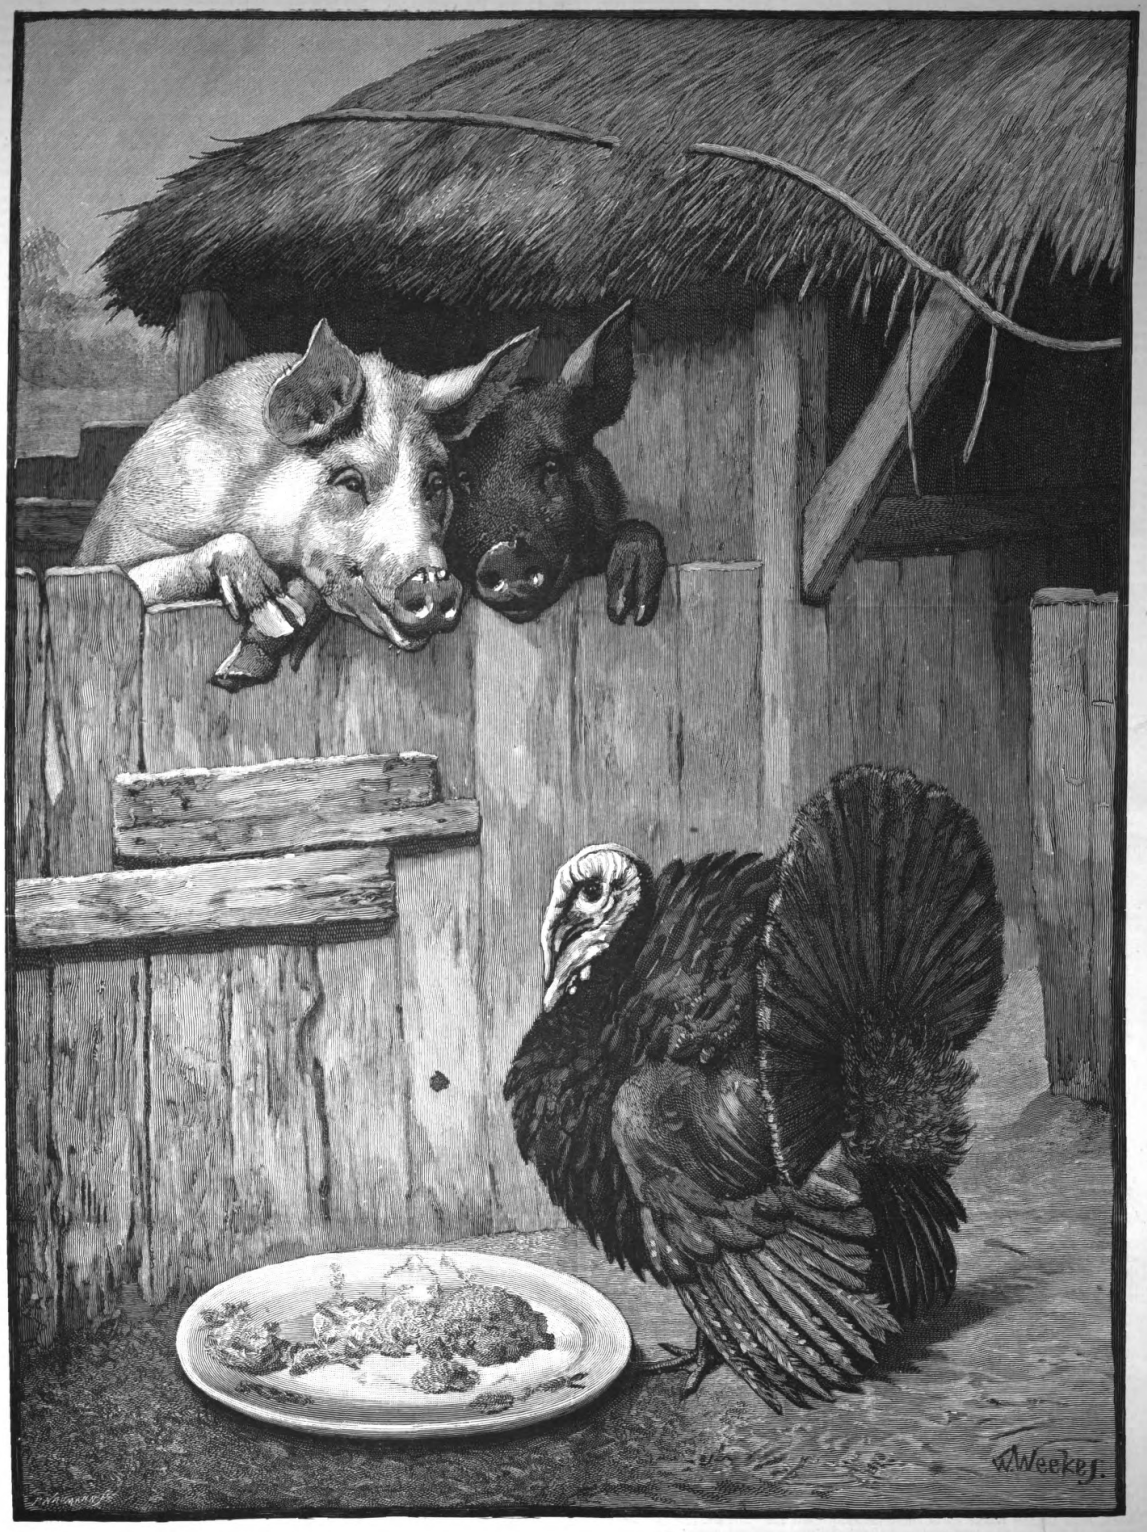
"As long as *you* can," Medhurst answered scornfully. "He's a fool who plays unless he can make sure of winning, or unless it doesn't matter to him whether he wins or loses."



But the Major was not to be shaken, and went on in a superb confidence in the system—a confidence no whit less fixed and sure because he had known a score of men who had gone out with infallible systems before him and had seen them one by one come home broken. But all the other infallible systems had the one essential drawback, that they were not of the Major's own creation; whilst this particular system had the supreme advantage of having been discovered and perfected by himself.

During the quarter of an hour's wait at Nice they stretched their cramped limbs a little by walking up and down the platform, and there they passed and repassed their quiet vis-à-vis of the hotel at Paris. Medhurst exchanged a word or two with him, and discovered for the first time that he was accompanied by a man-servant. The man came to ask some questions about the luggage, and, being answered, touched his hat and retired. The Major, nothing doubting the fascinating powers of his own manners and converse, came swaggering up at this moment, and the quiet man at once withdrew to his carriage, and took his seat there behind a sulphur-coloured novel.

Medhurst and the Major alighted at Monte Carlo, and the



"Not for me," said the Major, in his brassy voice. "Mossoo Paul Jones; not me."

The Major turned in his chair, and, seizing the cashbox violently with both hands, dragged it out of Medhurst's grasp.

PAUL JONES'S ALIAS.

Drawn by A. Forestier.

FOOD FOR REFLECTION.

Drawn by W. Weekes.

Yes, Mister Turkey-cock, I own
You make a gallant show,
As in full fig you strut about
Majestically slow.

But would it, in your puffed-out state,
Give you too great a shock
To know e'en swine look down on you,
Vain Mister Turkey-cock?

Yet so it is; for by their eyes,
And guttural parts of speech,
I know they scold you for your pride,
And humbler thoughts would teach.

"You silly bird (they seem to say),
Pray don't make such a clatter,
You're kept so well that you may look
Well on a Christmas platter."

grave young American went on to Mentone. A grave and elderly American, with a benevolent, mild face and a shrewd eye, met him there upon the platform, with both hands extended.

"My dear Paul," he said, "I'm glad to see you. Wrap yourself up warmly, my dear boy, for these chill airs are very dangerous after the day's heat. You ought not to be abroad at this hour, but it can't be helped this time. The carriage is waiting outside, and will have you home in ten minutes. Grimes will see to your luggage."

The elderly man hovered round the younger like a hen with one chicken until he had seen him through the little station and into a well-appointed close carriage that waited at the door.

"Now, what is the meaning," he asked, "of this singular disguise? I don't think that curiosity is one of my foibles, but ever since I got your letter I have been wondering. I have done little else than wonder. Is the vendetta acclimatised in New York? Are you flying from vengeance, Paul?"

"The fact is," the young man answered, "that two or three weeks in London sickened me. Mr. Jones with his ten millions sterling—Mr. Jones with his fifty millions of dollars—was, to my mind, so vulgar an attraction that I resolved to drop him, and to go about alone; and a Jones in France with millions of francs, a quarter of a million in number, seems likely to be such a colossal bore that I resolved to drop *him*. So I took my mother's maiden name and sank the dollars altogether. Paul *Morton* is as good a name as Paul Jones, and Paul Morton will not be stared at and pointed out, and sponged upon and run after by the whole great armies of the needy and the greedy, as Paul *Jones* would be. To tell you the truth, Doctor, I am a little tired and peevish; and out of sorts with the world. I want to be let alone, and an alias was my only chance."

"I understand," the old man answered, with an air of humorous burlesque, "and will keep your dread secret inviolate. It shall be enshrouded in the clouds of night."

"An odd thing happened in Paris," said the traveller. "The *New York Herald* there, to my great disgust, announced my arrival at the very hotel I had put up at. I wondered how they had found me out; but I discovered that there was a Paul Jones there—though, why two people of the same generation should have thought fit to ticket an innocent child with that piratical name I do not know. But there he was, and they took him for me, or, at least, they took him for the owner of the dollars, and sent up incense to the pile until the young man must have felt choked with it. There was an Englishman of the beef-fed breed, a man with the manners of a friendly bison and the voice of a trombone, who bullied him with amities, and stormed an invitation to dinner at him as we left the station at Cannes. The other Paul Jones got a telegram at table, and the big Englishman roared his name out so that everybody heard it, and all the world stared at him as if resolved to put him out of countenance."

"It's a little unfair, Paul," said the elderly man, "to leave a man who can't afford it to bear a reputation of that kind."

"I suppose it is," the other answered; "I never thought of that. I only had time to anathematise the *New York Herald* before I became thankful that there was a real man to take my place, for the satisfaction of those easily curious people who are interested in other people's money; and the unknown Paul Jones is not a shy man. I fancy that no amount of pointing and staring will hurt him much."

In a very little while the carriage pulled up before a villa, which by this time it was too dark to see with any approach to clearness. As the millionaire alighted he could hear the vague murmur of the Mediterranean surge, and he stood for a mere instant, muffling his mouth with a scarf as a precaution against the keen evening air, to look about him. He could dimly make out a great shield of quiet sea over the tree-tops and house-roofs of the hill-side which sloped away at his feet, and here and there a light twinkling in street or window. But the door of the villa opening, and revealing a hall full of light and flowers and half-tropical plants, the Doctor took him by the elbow, and led him indoors. There he shook hands anew, and bade the arrival once more welcome.

"You will see very little of me," he said, "for the next three or four days. The great work is already advertised, and the date fixed for its publication. I am at work on the final batch of proofs, and I have quite a collection of words that I want to save for the appendix."

"The dictionary?" said the new arrival, smiling. "It is actually on its way to print?"

"It is actually in print, Sir," cried the other. "The dialects of the Riviera are classified for the first time. The philological bridge between France and Italy is complete to its last arch. Nothing remains but to pass the roller over its macadam; and that, Paul, will be my business for perhaps a week. In the meantime, you will have to amuse yourself for the most part, and I give you *carte blanche* for the daytime, but I will never have you out a minute after sunset. In the evenings I shall always be at your service, partly because I am by nature compassionate and social, and partly because these old eyes of mine will not stand close work by lamplight."

The millionaire, Paul Jones, had found a pleasanter home than money could have bought for him, and as good a physician as any fees, however extravagant, could have paid for. In the daytime he drove or rambled or made brief railway excursions, and in the evenings he sat at home, playing chess or holding pleasant converse with Doctor Morris. He visited Monte Carlo, and there saw our friend the Major, playing a tremendous game with amazing fortune, and Captain Medhurst sitting by him, calm and quiet, risking no money of his own, but pencilling a card for his companion. The millionaire watched the game, unseen by either of his chance acquaintances, for half an hour. When the Major's luck turned and he began to lose a little heavily, he rose from the table at which he had been sitting and carried his system to another. The crowd which had stood by to watch his play followed him, and the Daisy talked loud and swaggered here as he had talked loud and swaggered in Paris, and was obviously delighted to afford such a sensation to the *habitués* of the place. Neither he nor Medhurst observed the valetudinarian, who was glad enough to slip away in his own retiring manner without a recognition.

That afternoon in the railway carriage, as he rode homewards, some English people spoke enthusiastically about the beauties of Juan-les-Pins, and next morning, being in some doubt as to how to pass the day, he decided to go there. It was a very pearl of days when he started. The sea lay in such malachites, violets, blues, and greys as he had never until then beheld. The January sun shone hot and bright, and a cool playful breeze tempered the heat with no severity. He was alone, as he chiefly cared to be, and alighting at the road-side station, the sole passenger left by the train, he questioned the amiable functionary who unites in his own person the offices of station-master, ticket-clerk, ticket-collector, and signalman, and was by him directed to the hotel. Everybody who knows Juan-les-Pins remembers the glorious clumps of trees from which the place takes its name. The millionaire diverged from the path and turned into the shadow of a lordly, natural cathedral of tree-stems to the right. His steps went completely silent on the brown carpet of shed fir-needles, the ungathered harvest of many scores of years. The sunlight fell in patches through the rifts of foliage overhead, lying golden on the closely-matted carpet of the fir-needles, and shining in vivid reds and siennas and rich browns on the great trunks of the trees. The calm sea lay beyond, with as many colours in it as there are in an opal—the tones to the full as delicate and pure.

The solitude and the beauty of the place drew him on, and he fell into a reverie. Walking with his eyes bent towards the ground, he started suddenly to find himself in the act of marching into an empty camp-stool; and, looking up, he saw, only two or three yards before him, a painter's umbrella and an easel with a picture mounted upon it. The paint was still wet in places, and from where he stood he could make out nothing of the work but a glare of variously-coloured light. He moved a step or two to the left, and secured a perfect view of it. The artist had evidently left his work for a while, and not a human creature was in sight. There was a dim sound of voices somewhere, two or three hundred yards away; but that and the artistic belongings before him were the only evidences of humanity he could discover. The work upon the easel, though yet unfinished, charmed him so much that he stood to look at it until he became altogether forgetful of his whereabouts. It was painted with a wonderful *brio*, as the art-slang goes—a sort of happy impetuosity and careless surety;

And the child, rushing impetuously towards him, gave an actual leap into his arms.

and it looked like what it was—an impassioned, single-minded, and simple-hearted reproduction of Nature's self. To the observer's mind, the salt of the sea and the odour of the pines were in it, and it had one rare and excellent virtue—it held sunlight.

The millionaire Paul Jones stood so enrapt—for he was by nature and cultivation a lover of pictures, and had been a wide-awake dreamer all his days—that he did not hear the step of the artistic Paul until it was almost upon him. Then he turned, and found himself confronted by that jolly and burly presence. The younger Paul recognised him at once, and addressed him with boisterous frankness.

"Hillo! You come down here? Lovely country, aint it? Don't let me drive you away"—for the shy millionaire made a motion as if he would go. "It don't fret me a bit to have folks around while I'm working. Fact, I rather like it."

The millionaire had something of a sense of shame upon him. One of his commonest forms of sadness took its rise in the opinion that he was good at nothing. He had tried most of the arts in his day, and had surrendered each in turn with an abortive sense of want of power over it. He had painted and modelled and played and had written verses, and had never got beyond the amateur stage in the pursuit of any one of those delightful arts. He called himself one of those microscopic Michael Angelos who infest idle and moneyed societies, and, at times, believed that he had no spur at all towards any one of the pursuits he had adopted save such as were afforded by idleness and vanity. He thought poorly indeed of the dollars he owned as a claim to distinction, and he reverenced, with an almost boyish enthusiasm, those people who could do what he had failed in doing. A painter, a musician, a sculptor, a poet, was a man before whom he could have knelt if he had not been altogether too shy to make such a proclamation of enthusiasm. And now, in this rufous-haired and noisy young giant whom he had contemned and disliked from the first word he had heard him utter, he found an actual artist—a man capable of understanding the sweet and complex speech of Nature and of translating it for the charming of his fellow-men. He hardly knew enough how to be ashamed of himself.

The artistic Paul, knowing nothing of these self-upbraidings, and perfectly at home and at ease with himself and with all the world, seated himself upon his camp-stool, and drawing from one pocket a cake of tobacco of a deep golden colour and from another a murderous-looking clasp-knife, shredded enough of the weed to fill a pipe, whistling melodiously meanwhile, with his head on one side, and cocking a loving yet critical eye at his canvas.

"Smoke?" he said. "No? That's a pity. Strikes me that Columbia's one title to pride is that she gave this to the world. When I got to Paris I never was more surprised in my life. I found there was a duty on tobacco in France, and I'd brought twelve pounds over with me and never declared it. There's no tobacco like this in Europe, and I should have had to pay a little fortune on it. A little ignorance is a blessed thing. Saved me, most likely, fifty or sixty dollars."

The millionaire saw a chance for something like an epigram about the sweetness of profiting by a sin innocently committed. He tried to say it, but in his shyness he boggled over it and left it unfinished, feeling newly awkward and ill at ease. The artist caught the idea, however, and being in himself curiously happy, laughed, and said, "Good!" and then, having filled and lit his pipe, stooped for his palette and the sheaf of brushes and went comfortably to work. As he worked, he boasted a great deal, less to his companion than to himself, half in cheerful certainty of success, and half in encouragement of his own imagination.

"Just you see me tickle that rock in! Aint it lovely? That," mixing the colours on his palette with tender care, "that's the tone to the millionth part of a hair's breadth, and the man that says it aint, I scoff at. Don't that little bit of weed come pretty! Look at the light on it. Nature's the prettiest lady yet, and so I tell you. There's nothing to beat her. Just catch her when she's smiling, and she's real nice. I call this country elegant. It aint like home. It's softer and more civilised. We haven't had time to polish up this. It's no wonder people get polite and amiable in their manners living here. They've got to be, and that's all about it. If you took the biggest hell-raiser out of Texas, and kept him here a year, and made him look at this"—indicating the landscape with a swift wave of the brush, which did not keep him from his work a second—"two hours a day, you might shave him, put him in petticoats, and send him home to keep a lady's school at the finish, and he'd do justice to the situation."

After this, his work absorbed him, and he went quiet for a time, painting away with an assiduity and enjoyment which were delightful to look at. Then he began to sing to a tune of his own, and not a particularly good one either. His singing voice was as harsh and intractable as his whistle was mellow and tuneful. By-and-by, words got into the muffled ditty, and the millionaire overheard a version of Youth's smooth ocean, smiling to betray.

"You read Shelley?" he asked. He was doubly ashamed of himself after the question, for the tone sounded patronising and astonished in his own sensitive ears. Why could he not be like other men, easy and unembarrassed with his kind? or why, since that might not be, could he not at least find the sense to hide himself and hold his tongue? Perhaps, as a matter of fact, neither the surprise nor the patronage was there, except to his own fancy. At any rate, the young artist felt neither of them, but answered with a touch of the embarrassment his companion experienced.

"Yes, Sir. There's nobody got more of it inside him than that young man, I reckon, not since Shakspeare's time, anyhow. I don't paint the figger, but if I did there's one thing of Shelley's I'd have on canvas before a year was over, and I'd just get remembered along with Michael and Peter Paul, and the whole of that crowd."

"What is the passage?" the little millionaire asked. The artist turned solemnly on his camp-stool, and declaimed the immortal lines vilely, waving his right hand up and down to mark the metre he murdered in delivery—

> "Trampling the slant winds on high,
> With golden-sandalled feet that glow
> Under plumes of purple dye
> Like rose-ensanguined ivory,
> A shape comes now!"

The accent of Marblehead nosed and droned through the words, but the artist was solemnly and beautifully in earnest. His handsome face beamed, and his blue eyes looked at the splendid vision as if they actually saw it speeding downward over the translucent sea beyond the tree-stems.

The listener wondered how he had come to form so disparaging a judgment of this pleasing young man. He had a self-conscious habit of reading lessons to himself continually, and he made a memorandum now to the effect that he was in future to judge men less by mere manner than he had done. He knew all the while that if they were in any public place together he would feel uncomfortable, that he would be vicariously guilty of the crimson tie and the overgrown auburn mane, the roaring voice and the Marblehead accent.

For the time being very little more was said between them. The artist worked away with love and vigour, and the millionaire looked on for an hour or more, until finally the worker put down his tools upon the grass, and, after taking a rejoicing stretch with his feet wide apart and his hands in the air, he began to study his picture from various distances, sometimes with a shade of disparagement in his face, but, on the whole, with a pretty obvious contentment.

"I guess she'll do," he said at last. "I shall find out by-and-by something I don't like, of course; but, for the time being, she'll do. And now, Sir," he continued, beginning to pack up his effects, "I'm going to stoke the engine."

"You stay at the hotel here?" asked the millionaire.

"At the Château, as they call it? Yes."

"Perhaps you will be good enough to show me the way. I have already been directed, but I am afraid I have lost my bearings. Can I help you in carrying any of your things?"

"Lord, no!" said the other; "we're only three or four hundred yards away. The weight's nothing."

They set out together, side by side, and the young painter talked as he strode along. He had chosen, he said, a scene for his afternoon's work which whipped the other hollow.

"There's some of the gaudiest kind of cloud structure around here you ever saw, Sir. I've only been here four or five days, and I've seen some effects that have just been real rippin' lovely. I've got a sort of rapid study of one of 'em, and if you care for that sort of thing I'll show it you. It's all as quiet as sleep—dove greys, silver greys; but it's as pretty as anything."

The millionaire said he would have the greatest pleasure in looking at the work if he might be allowed; and when the

artist had conducted him to the hotel, and had led him upstairs into a bed-room, he said something about having begun to form a collection of pictures, and murmured of the desire to add to it.

"Oh, if we've got a patron here," said the painter, with humorously simulated bustle, "we must move around. You're one of the men that buy pictures, Sir? I have heard about the species, and I've heard some men talk as if they ran in shoals. You shall see the whole bag of tricks, Sir, if you like. There's the thing I spoke about. If you stand over here you'll miss the glaze on the surface. It's a bit rough, but it's just about where I meant it, and it's just got the old lady's smile, nice and tranquil and young motherly!"

Paul, the painter, had no shyness, but praised his own work where he thought it deserved it with as innocent an enthusiasm as he would have offered to the work of another. The moneyed man stood where he was placed, and looked at the sketch—a mere expanse of pearly sky and sea, the sky piled with soft clouds and the sea fretted by a catspaw. It was absolutely simple, and very near to being absolutely true.

"That is very beautiful," the little man said shyly. "It seems quite abominable to ask what do you want for it; but I should like to have that, if you are disposed to sell it."

The artist pulled his beard, and looked from the intending purchaser to his canvas and back again, uncertain.

"Well, that," he said, "I do' no. What do you think it's worth?"

The bidder felt inclined to offer a somewhat extravagant price for it; but he controlled himself. He had learned long ago that it was easy to do so much damage with his money. He was not absolutely certain of his own judgment, and if he were to offer a great deal more than the work was worth in the opinion of better judges than himself he might spoil the happiness of the artist's life for years. There could be few things bitterer, he thought, than to find an enthusiastic believer once, and never to discover him again. In his anxiety not to spoil the painter in that way, and not to offer a price which should seem an insult to the delicate beauty of the work, he felt his position to be almost painful.

"If you would fix a price," he said nervously.

"Well!" returned the artist, lingering on the word, "I don't rightly know what to say, and that's a fact. It's a trifle, and if I could afford it I'd be inclined to say to a man who took a fancy to it 'You can have it.' But I can't afford to say that, and you shall have it for what you think a decent, reasonable price."

"A hundred dollars?" said the millionaire.

"Sir," said the painter with enthusiasm, "it is yours. If you like to pamper art in my person I will supply you with two of them a week, at the same price, for a twelvemonth."

"You think that a fair price?" the other asked.

"'T aint fair to ask me that," the artist answered, laughing; "I'm contented with it. If you are as contented as I am, we're a pair of happy people."

"I will give you a draft on the Crédit Lyonnais at Nice," said the other, and being provided with pen and ink, the bargain was then and there ratified by the delivery of the cheque. "If you wish to utilise that sketch for your finished picture, pray keep it for a little while. I am settled here for the whole winter, and if you will let me know when I can send for it my man can call."

"You're very good, Sir," said the painter, gravely. "You've got my name all right," glancing at the draft he held in his hand. "May I ask how you knew it?"

"I heard it called out pretty loudly at table one night."

"Oh, ah! yes—Major De Vere. I remember. You sat opposite, didn't you? Mr. Paul Morton," he continued, reading the signature on the document he held with a sort of fondness in his tone. Then he sighed, like a man well pleased, folded the paper, and placed it in his waistcoat pocket. At this moment a bell rang below. "There's feeding time; we'd best get down. If you'd like a wash beforehand there are the materials."

The millionaire accepted this invitation, and the young giant having rinsed himself afterwards, with a good deal of unnecessary splashing, they went down-stairs together, and took their seats at table. The painter's plate and table-napkin were set quite apart from those of the other guests.

"These folks fog me," he said. "I can't talk their lingo, and so I like to be by myself. It would be a bit dull in the evenings, too, if one could never get away. You spoke about Major De Vere just now. He's a fine sort, that. I had a kin of notion—I don't mind confessing it—when I set out from New York, that if it happened to be my luck to fall across any specimen of the real tip-top British aristocrat, I should have to rile up against him and feel very shirty, and American, and Republican, and all that. He's the first I've met, and he's quite a nice disappointment."

"Major De Vere," the millionaire said in a questioning tone, "is a man of good family?"

"Lord, yes! Came over with the Conqueror. All his blood relations are earls and dukes, and that sort of people. He's a flyer, Major De Vere is. There's only one thing I don't like about him. I wish he wouldn't play so nasty high; but he says he likes the excitement of it. I do *that;* but I should like winning better than losing, and I reckon that the British aristocrat can afford to lose better than a Yankee canvas-spoiler. It's a good berth, British aristocrat; and I fancy there's a bit of envy in the feeling of some of our fellows. Maybe, when our Jay Gould and Vanderbilt fellows have been there for a thousand years, they'll feel just as safe and cocky as the others."

"You have played with Major De Vere?" asked the millionaire. The artist nodded only, but contrived to put a considerable meaning into the gesture. "You have"——

He was going to say "lost," but checked himself, thinking that the question would sound like an impertinence. The artist finished the sentence for him.

"Lost? Well, yes, I should say I had."

The confidence seemed a little sudden, but then the painter was so very harum-scarum in his ways, so very free and easy and boyish, that his new patron found nothing surprising in it. But he recalled the old doctor's suggestion, and began to think that it might not be kindly to leave a poor man to bear the burden of a millionaire's reputation among people who gambled heavily, even though they might play with perfect fairness. Somehow, he was not inclined altogether to believe that Major De Vere would play with perfect fairness. He doubted the Major's claims to social distinction; he doubted strongly his being a gentleman in any sense, and was inclined to appraise him as a mere pretender. He put Medhurst into a different category, and, therefore, being at least as shrewd as he was shy, suspected the apparent partner-ship between the two a little more than ever. He began to see that it was his duty to guard the young fellow from the possible result of a possible error on the part of Messrs. De Vere and Medhurst. This consideration sent him out with the painter on his afternoon expedition, although he had almost determined to take the next train homeward.

"You tell me," he said, bent upon offering the purposed enlightenment as naturally as possible, "that you are not disturbed by an onlooker?"

"Not an atom," Paul protested. "I like it, so long as a man has the sense to hold his jaw at the right times."

"And you think I may have?" asked the millionaire.

"I think," said Paul, with the candour which distinguished him, "that you'd do it if I asked you to; and I think I should ask you pretty smart if you wanted it."

There was a good humour mingled with this brutal outspokenness which seemed to indicate a certain surety of being understood in a friendly fashion, and disarmed it of all offensiveness.

"In that case," said the millionaire, who was growing more at home every minute, "I will come with you. I am a painter myself, in a clumsy, amateur kind of way."

"If you'd like to work," said Paul, "there are lots of tools here, and you can take a turn at it. If I saw another fellow painting anything half as ripping as the scene I'm at I should get real mad if I couldn't daub as well."

But this invitation was declined, the amateur having no heart to set his crudities side by side with the work of an accomplished artist. The two sipped their coffee together, and the painter smoked a leisurely pipe, and then they set out again.

"You seemed a little astonished just now," said the millionaire, bent upon the fulfilment of the duty he had set before himself, "that I should remember your name. It happens to be the name of a rather intimate friend of mine."

"Oh?" said Paul, indifferently.

"He is said," the millionaire continued, with a ghastly, uncomfortable sense that he was boasting of his own despised dollars, or, at the very least, was bragging of his association with their owner, "he is said to be an immensely wealthy man. He is the last man in the world, I am sure, to think that the money makes him personally considerable."

He felt that he was floundering, and paused. His companion did not seem to be particularly interested in the wealth of the man who bore his name.

"It is quite possible," the millionaire went on, speaking more abruptly, in his nervousness, than he could have done if he had been entirely self-possessed, "that, bearing the same name, and being, like him, an American, you may sometimes be taken for him."

But he saw quite clearly the sunlit gardens of Monte Carlo, with himself and the child, both irreproachably attired, strolling there hand in hand.

The painter let out a great laugh at this, and stopped in his swinging walk to have his laugh out with the more convenience. When it was over, he went on again, with an expression suddenly grown thoughtful.

"Do you know," he said, swinging round upon his companion and bringing himself to a dead stand, "I'm half inclined to think that that has happened; I'm really more than half inclined to think that it has happened. Upon my soul and body, now! I am very much inclined to think that that has happened."

His voice grew introspective and thoughtful, and when he turned to go on again, he went slowly, and with occasional reflective pauses in his walk.

"Where does he hail from, this Paul Jones?" he asked, after an interval.

"New York."

"Why; so do I, for the last twelve months past. Is he supposed to be on his travels round here?"

"I saw his name in a newspaper in Paris, when we were both there, saying that he stayed in the same hotel with us."

"Great Jupiter!" said Paul, speaking more than half to himself. "I wonder if that accounts for everything. It's odd you have struck on that, now. But then, you knew about the names, and I didn't. What's he reckoned to be worth, this Paul Jones?"

"I should be puzzled to tell you," the millionaire answered lamely, with the shame-faced braggart sensation returning stronger than before. "I have heard him quoted often as a fifty-million man."

"Scott!" said the painter. "D' ye think it's true?"

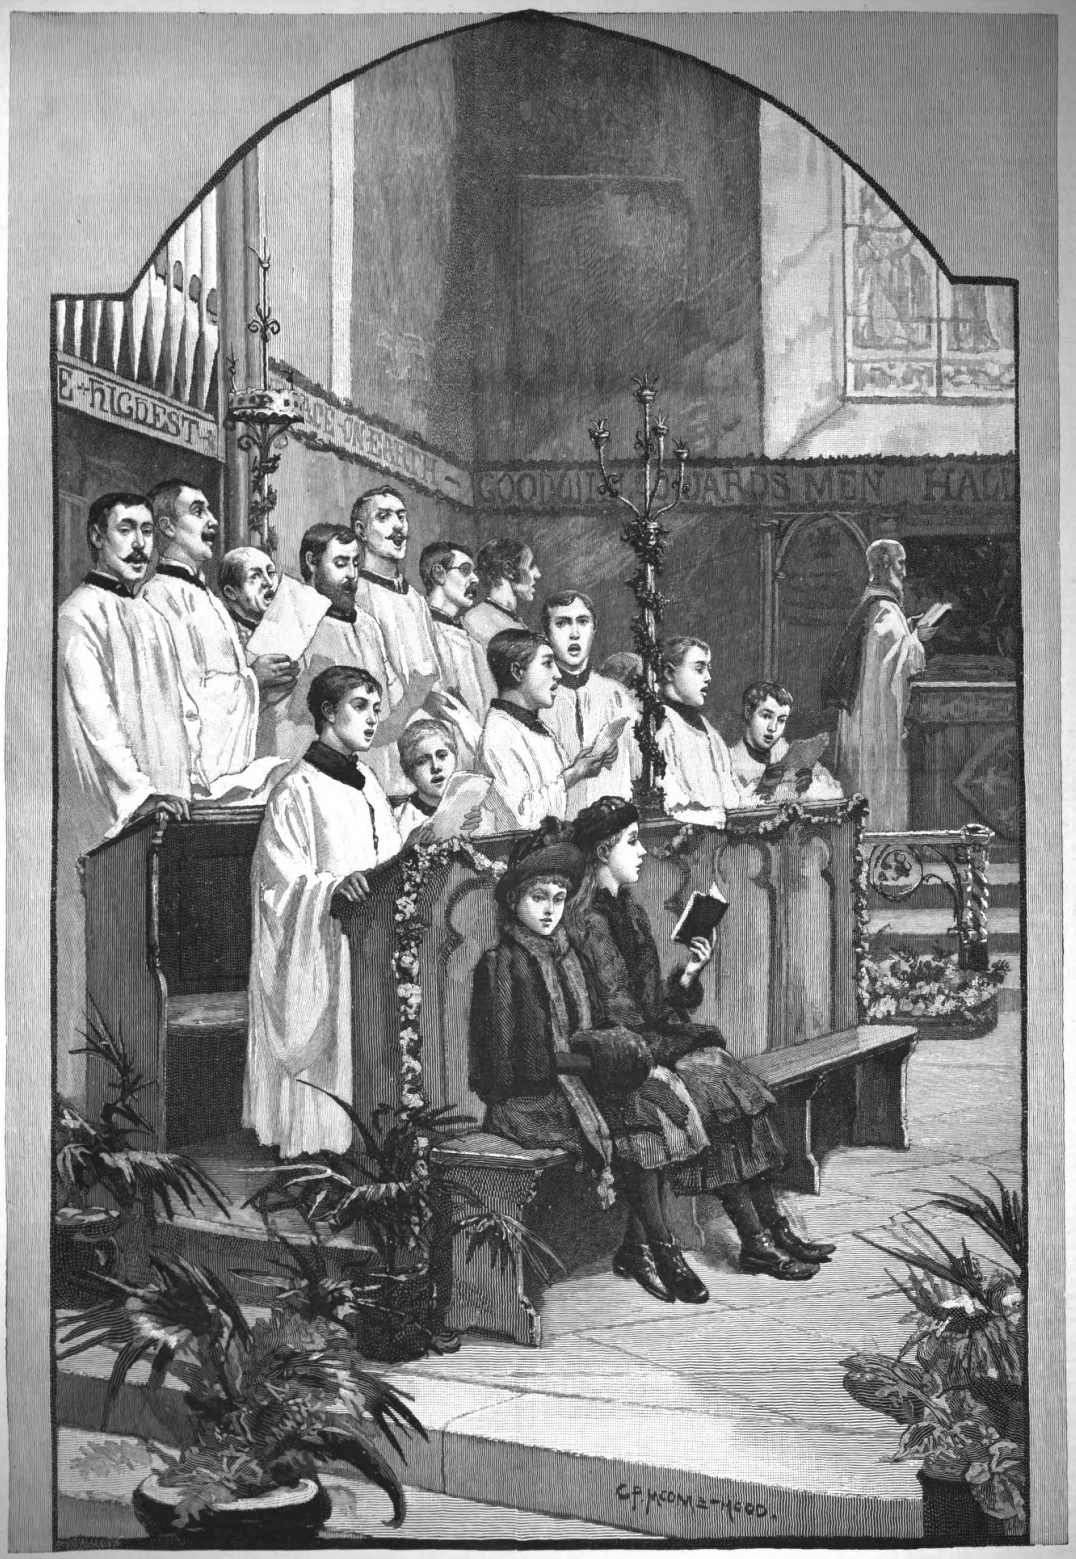
"I—I believe so."

"Well; he ought to be crucified! No man 's got the right to own a heap like that and never offer to split it with his namesakes. I thought I was the only 'Paul Jones' going—since the pirate's day—and I reckon there can't be many of us. A million a-piece couldn't hurt him much, among us. Anyway, if I fall across him I'll put in my claim first, before the other Joneses have time to get loafing round. First come, first served." He laughed there, and then went on again, more seriously: "I couldn't think it, of course, because I didn't know it; but I wonder if it 's that what makes those British swells so complacent with me? The Major 's a very gleeful bird; but Captain Medhurst is another sort, and he's been just as smooth as cream, all along. I don't blame 'em, mind you," he added, with hearty honesty. "If I found a fellow nice and smooth and agreeable to get along with, I shouldn't like him any the less for having fifty millions. I do'no' why, for I shouldn't want any of his money; but I reckon it'd put a kind of halo round his hat, too. Do you know, Sir, I'm almost certain those two chaps take me for that millionaire. They cleaned me out three nights ago, pretty nearly; and for a while I was real put to it to know what to do. A fellow-citizen turned up, by good hap, this morning, and offered me three hundred dollars for the thing I was working on, and promised to send the possibles over to-morrow. But when I seemed a bit hit about being cleaned out—and I don't mind confessing that I was—the Major laughed, and took it like a joke."

The millionaire began to feel that his alias had cost the young man dear.

"Did you lose heavily?" he asked. "Excuse me—I hope you don't think I ask from any impertinent curiosity."

"I lost pretty near three thousand francs," said the painter, simply; "and I did not like the look of things at all. But when I came back to my work this morning I had just struck a bargain, and it lifted a weight off my shoulders, I can tell you. I was real gay when I came back and found you looking at that picture."



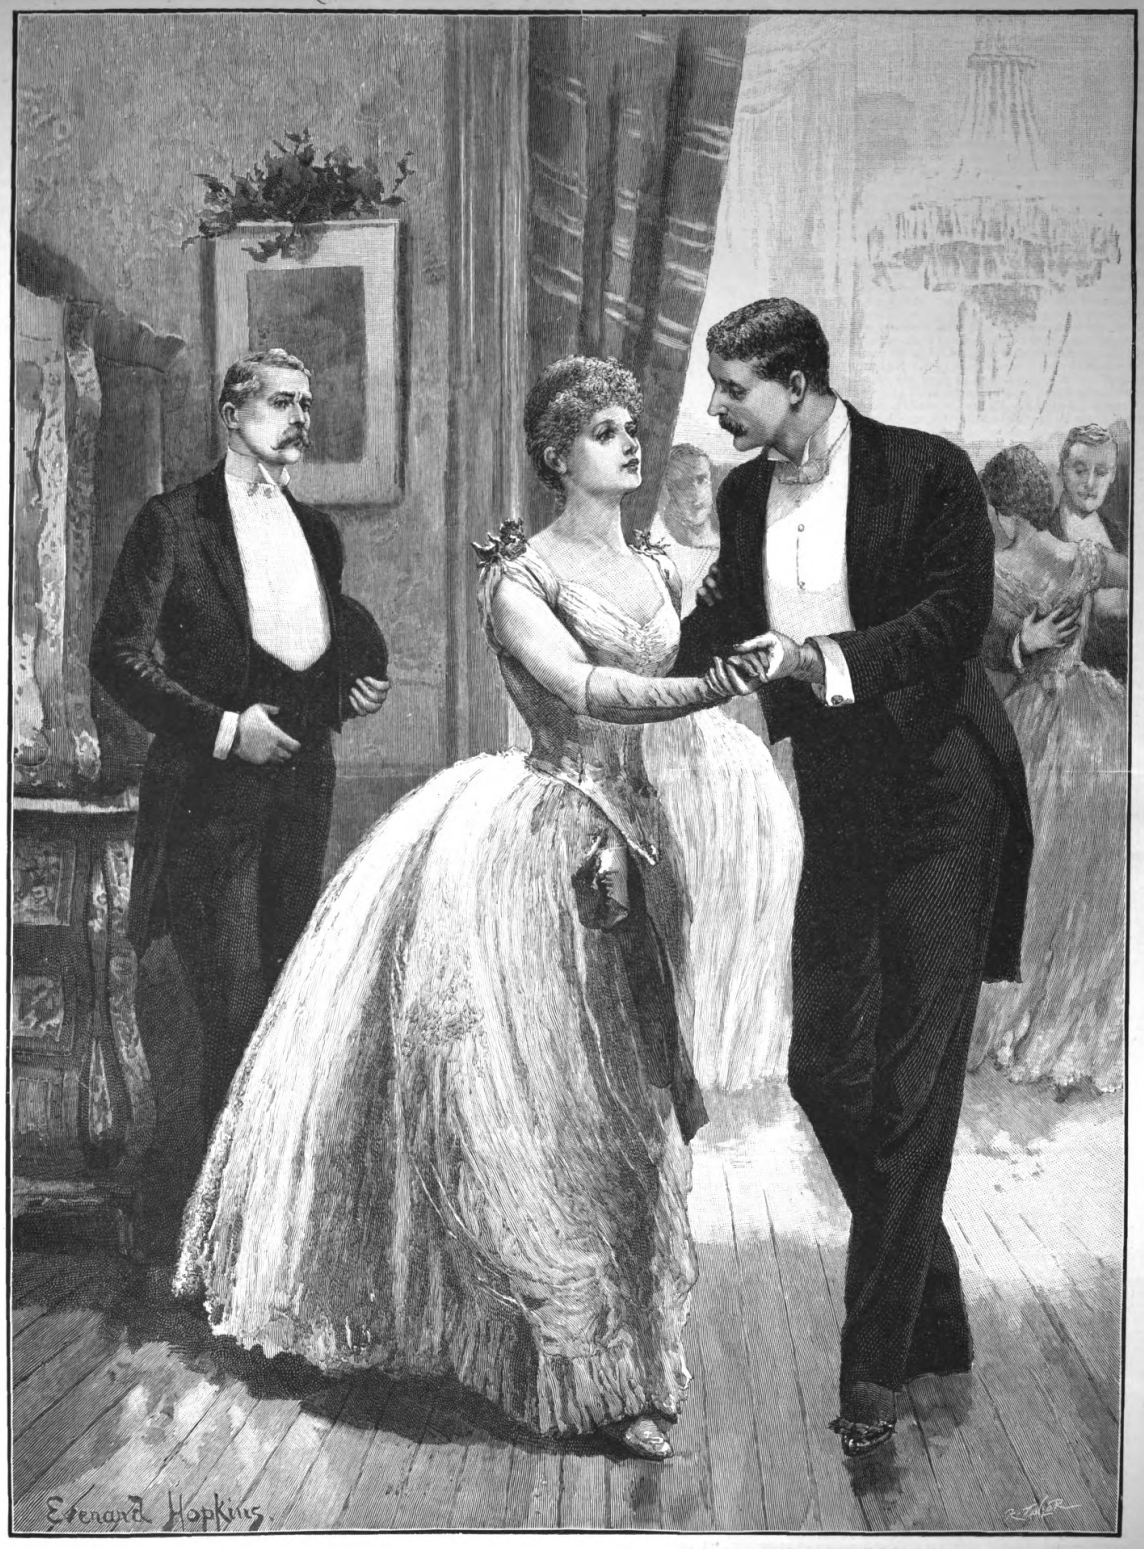
"I think," said the millionaire, feeling bound to lecture the young man a little, "that there are few vices which give so poor a return for the pain they cost as gambling."

"That may be so," returned the artist; "but there are points about it, too. But if those chaps take me for that millionaire I shall take the dust out of their eyes. I aint hungry for the credit, and I'm hanged if I'm hungry for the danger. I can't afford to have fellows taking me for a fifty million dollar man; I wish I could."

"You are a great deal better off as you are," said the millionaire, rather seriously and sadly. "You have youth and enthusiasm, and an art in which you hope to excel."

"I shouldn't sink to Methusaleh's time of life on a sudden if anybody made me a present of a fortune, should I? And as for enthusiasm and art, I'll trouble all the capitalists in creation to buy me up from painting. I wouldn't stop painting to be President of the United States, and have the freehold of every acre, from Greenland down to Terra del Fuego. I suppose other fellows feel the same about other things; but if I couldn't paint I'd want to die."

Whilst these two were in the peaceful country, the enthusiastic Daisy was sweating over his system at Monte Carlo, watched and guarded by his more phlegmatic companion. There was no denying that up to date the Major's invention had acted wonderfully, and he was the lion of the place. Those dreary croupiers and wearily wary *chefs de parti* have seen so many lions in their time that the biggest and loudest of the species can hardly wake them to interest any more. But the gallery is always new, at least, in its sympathies, and the most war-hardened veteran of them all felt some remembrance of the thrill of his first battle at the sight of the Major's heroic plunges. Do all he could, Medhurst could not hold the efflorescent Daisy back. The system, of course, depended upon a series of progressions, but the Major, intoxicated by success, doubled and then quadrupled his initial stakes, so that he left himself no reasonable chance of recouping for a loss before the maximum of the bank was reached. As fortune had it, the rashness paid, and the Major raked in money hand over hand. He fee'd a man to go beforehand, and supplied him with a little money to punt cautiously for small stakes until such time as he appeared. He had his sheaf of thousand-franc notes in his hand before he had entered the gaming-room, and when his subordinate resigned his place to him he set his money down in a pile with a noble ostentation, and won or lost with as splendid a carelessness to look at as if he had been a Cræsus. When Medhurst could secure



Hearts and voices in accord,
Let us sing Thy praises, Lord;
With our anthem full and clear
Blend our souls with faith sincere,
So that both like incense rise
Of sweet odour to the skies,
Calling many a blessing down,
Our frail erring selves to crown.

THE CHRISTMAS ANTHEM.

Drawn by G. P. Jacomb-Hood.

Let our lives blest anthems be,
Full, harmonious, Lord, to Thee;
Permeated through and through
With the grace of heavenly dew,
So that no false note be heard,
Nor one jangling string be stirred;
Keep our judgments clearly bright,
Fill our hearts with heavenly light!

As the gay dance was in full sway
Miss Grace was captured by the way,
Held for a while in solemn parley
By her glum second cousin Charley.
Of one thing only could he tell,
And that was how he loved her well:
Could she take pity on his woe?
She shook her head and sighed out "No."

FAVOURED AND FLOUTED.

Drawn by Everard Hopkins.

But in an instant cleared her glance,
A partner claimed her for the dance—
One who had gained her maiden vows
To be to him a loving spouse:
So, hearts in tune, as well as feet,
They mingled with the dancers fleet,
Careering blissfully around
To love's as well as music's sound.

a seat beside him he did so, and if that were impossible he stood behind his chair, marking the game, and occasionally stooping for a whispered consultation. The table was always lined three or four deep whenever the pair were settled to their work.

Those writers who have described the little world of public play—and their name is legion—have all insisted upon the extent and variety of emotion visible in the faces of the players, though, as a matter of fact, it would be difficult to find any collection of people who look more flat and ordinary. Here and there, no doubt, a face is memorable for its concentration, its fatigue, its avarice, its blazon of success or failure. But on the whole you can find nowhere a set of men and women more commonplace in expression than a set of gamblers; and it is only because men see so readily what they expect to see that the legend of facial emotion ever sprang into life, or, at all events, it is only because of that curious faculty that the legend lives to-day. The people who show the real breathless interest, the genuine devouring sympathy, are the lookers-on, whose fate is not influenced by the turning of the wheel to the extent of one centime. Ixion bound to the wheel grows accustomed in a minute or two, and begins to look as impassive as a whirling dervish, but the spectator of his gyrations holds his breath absorbed.

The Major drew in the murmurs of the gallery as if they had been incense. He played his five or six thousand francs at a *coup*, and, confident in the revenge his martingale would afford him by-and-by, saw it go under the croupier's rake with a smile of pure indifference. When he hit the bank, and the glittering rouleaux were pushed towards him and the crisp leaves of bank-paper doubled on the croupier's rake were dangled below his rubicund nose, his calm had something majestic in it. He used a handful of gold for a paper-weight to press his growing pile of bank-notes down, and felt a tranquil glory of financial strength as he did it. Money had really never meant very much to the Major. To be without it, as he knew by experience, was deucedly uncomfortable; but when he had it the coins were only a sort of counter, or token, not in the least valuable in themselves, but merely symbolical of the power, consideration, and splendour of the owner. This philosophic frame of mind made losing comparatively easy, whilst it took but little from the sweets of gain.

By-and-by the chances of war set in against the Major, and he responded with great gallantry to Fortune's challenge. *Coup* by *coup* he mounted to the maximum, and lost. He played the maximum again, and lost; again, and lost. Medhurst stooped with a murmur of warning, but the Major was not to be daunted or dismayed. He fluttered his diminished bank of notes, looked down at the two or three louis d'or which feebly represented the glorious pile of five minutes back, and went for the maximum again with an unmoved countenance. There was an actual sway and murmur in the watching crowd, and, as sometimes happens, the ball refused to drop. Second after second went by, the wheel spun slower and slower, and the marble deviated hither and thither so provokingly that even the Major grew nervous under the influence of suspense. The ball clicked at last, the croupier called, and he had won his *coup*. He took his payment and left his stakes, and won again; and from that moment forward the system had it all its own way, until there hung before its inventor's dazzled eyes the near prospect of breaking the bank. It was his hope, his dream. He would sooner have done it than have won the Derby. It would have served him to brag about for ever, and would have afforded him a lively consolation, even in poverty, for the rest of his days. But it was not to be: the chances veered again, and went floating to and fro so indeterminately that the indefatigable one grew tired, and rose, still serene and unshaken, the winner of some six or seven thousand pounds. A little German Jew, with very bright and beady eyes, and a face bathed in an oily perspiration from his interest in this heroic game, addressed him in terms of admiration.

"Ah, M'zieu, z'édait gollozal, fodre cheu!"

"What's the little beggar say?" inquired the Major, turning to his companion.

"He says your play was colossal," Medhurst answered.

The Daisy's swagger was always a thing to see, but it is probable that in all his life it never became so gloriously assured as after that simple tribute.

They had the best rooms the hotel afforded, and the Major was ready to spend his money like an Eastern prince. In their joint sitting-room the two got out all the winnings of the campaign and counted them. They amounted to nearly twenty thousand pounds, and Medhurst was almost passionate in advising the Major to content himself with that surprising sum and go away from the chance of losing it.

"Rot!" said the Major, "there's about as much chance of losing it as there is of the Grand Stand at Epsom walking over here. I tell you, it's the system, my boy. I don't say I mightn't have got hit earlier; but now, with a capital like this to back me, failure isn't on the cards. Here's the fifth day since we got down, and I had one day at 'em before. Here I am with an actual average of more than three thousand pounds a day, and you advise me to leave the course when I've just got into my stride and can do the distance without turning a hair! It's all rubbish, Medhurst. I'm not to be had in that way. I tell you I'm going to bust up the establishment, and nothing less will satisfy me. I shall be a millionaire, Medhurst."

He made this proclamation with perfect sincerity, and seemed for the moment so impressed by it that he dropped his customary swagger altogether, and became solemnly impressive.

"You won't lose by it, old chap," he went on. "Isn't there a song or a tune somewhere, 'Lilla's a lady'? By gad, she shall be! I like you, Medhurst. You're a good fellow. You've stuck to me more than once when I've been down and you've been up. I've done the same by you when the tables have been turned, and we know one another, don't we?"

This kind of sentimentalism was not Captain Medhurst's forte at all.

"Well, that's true enough," he answered drily; "but what about it?"

"There's this about it," responded the Daisy; "you stick to me, keep me from getting too hot, just simply stand by and give me the tip if I show any sign of going wild, and when I've reached the hundred thousand there's a quarter of it tied hard and fast on little Lilla. She sha'n't be able to touch the principal till she's of age, and you shall have the management of it in her behalf till then. If anything should happen to her before that—and God forbid it should!—it'll come to you. Shake hands on that, old chap."

The Major was genuinely and deeply moved by his own generosity and the sense of the importance of the favour he was conferring on his friend. He was even a little surprised to find Medhurst apparently so unmoved by this aerial offer. It was just as real to the Major as if the speculative hundred thousand had lain on the table there before him; but Medhurst's mind was of a less poetic and more practical cast, and so far, though he did full justice to the other's intent, he experienced no especial call to gratitude.

A second later he rose with some sign of agitation from his camp-stool, signing her back, and shouting to her "Take care!"

"I mean it, Medhurst!" cried the Major. "By God, I mean it!"

"I've no doubt you mean it," Medhurst answered, with even an increased dryness; "but you haven't got it, Daisy, and it isn't the moral certainty you fancy that you ever will have it. I don't believe there ever was a man with a system who didn't get his head turned by it, more or less. Mark my words—you'll lose in the long run. Every penny of that money will go back to the bank; every penny, that is, that isn't spent in the meanwhile. How many men have tried the game before you? How many men have come here with their systems, with more than twenty thousand pounds to back them, and have gone back paupers? Who built those halls of dazzling light where you've been flourishing this last day or two? Who made the roads and laid out the gardens? Who pays those scores and scores of impassive devils who relieve each other at the table? Who pays for the band that gives you a concert twice a day?"

"I don't," said the Major, stolidly.

"The fools who come here with their systems," said Medhurst, waxing parliamentary in tone and gesture. "The benighted asses who think that all human experience is going to contradict itself for their sakes! Every one of 'em comes with this proverb running in his head—'The many fail, the one succeeds.' They come poor, and go back poorer; they come full, and go back empty. One in a hundred thousand wins, and goes away to spread the news of victory. The people who have really lost heavily hide their losses, either in shame or in fear of damaging their credit."

"They haven't got my system, my boy," responded the invincible Major.

"Your system!" scoffed Medhurst. "There are runs on record which would smash your system like a house of cards, and smash you with them."

The Major had ordered a bottle of his favourite Pommery Greno, and had lit a cigar of the choicest brand to be had in that quarter of the world for love or money. He sipped and smoked in luxurious contentment, and waved a hand towards the table where his winnings still lay exposed.

"You've got a craze, Medhurst," he said tranquilly. "You're like those teetotal coves who preach against drink, or the Gospel fellows who think that everybody who sets foot on a race-course is going to the Devil. They've got the right on their side in the main. Drink's a bad thing, a confounded bad thing"—the Major emptied and refilled his glass—"but it's only bad when a man aint moderate, and a jolly good, comforting, cheerful thing when he is. Racing would be a pretty bad thing if all the world went in for it and did nothing else. You've got right on your side, too. A lot of chaps have come here with systems, and have gone to the bad with 'em—a set of rotters," the Major added with quiet and rooted scorn, "who didn't know that three and three make six. Now, look here, my boy, it comes to this: I came here on my system"—

"Oh, confound your system!" broke in Medhurst. "It's no use talking to you."

"Not a bit of use," replied the Major, cheerfully. "I come here on my system, and I play low first day and win, roughly, a couple of thousand pounds. I leave the place, and I come back to it two or three days later; I play a bit more boldly, and I win three thousand. Next day I launch out still more and I win over four. Next day, over five. To-day, over six. Now, each time the winnings increase—not because the sitting's longer, but because the stakes are higher, and they go on in—what do you call it?—geometrical progression."

"All right," said Medhurst; "if wilful will to water, wilful must drink."

"Drink," replied the Major, sipping gaily at his glass, "I should think so, and drink the best there is into the bargain."

"I'm going to Mentone," said Medhurst, gloomily, after a pause. "I have been here four days, and have never seen the child. I shall bring her over here with me, and have her somewhere near. She's too young to get any harm out of the place, and I want to see more of her than I have done."

"I say, Medhurst," said the Major, "I don't think you're as fond of the kid as you ought to be."

"No?" said Medhurst, glancing sidelong at him, and beginning to pace up and down the room.

"No," said the Major. "She's a pretty, jolly little creature, and if she were mine, begad, I'd take jolly good care to have her with me wherever I went."

"I daresay," Medhurst answered, in a tone which he tried to make indifferent. "But, for my part, I think she's a little better where she is." He looked at his watch. "There's a train in a quarter of an hour from now. Daisy, promise me one thing—promise me you won't play while I'm away. You won't dream of going back before dinner, of course, and I shall be here again a little after nine. You won't play?"

"No," said the Major; "I won't play till you come back again." He bundled the money together, with the exception of two or three notes, which he slipped into his pocket-book, and put the mass of it into a cash-box, which he sealed. "I'll leave that," he said, "with the manager. It's safer in his hands than here. Finish your wine, Medhurst, and I'll walk down to the station with you."

It was dusk already, and the evening chill had fallen. Medhurst found a carriage to himself when the train steamed up to the platform, and as it bore him away, solitary, he sat in gloomy thought with his hat tilted over his eyes, and his hands thrust deep into his pockets. By-and-by he took out from his breast-pocket a small portfolio, and selecting from its contents the same portrait he had kissed in Paris, he stood up with it and, steadying himself with one hand upon the hat-rail of the carriage, looked at it long and earnestly. The light of the lamp shook constantly as the train jolted along, and the wash of oil in the glass basin every now and then obscured the face he gazed at, so that it assumed many likenesses to him, looking gay one moment and grave the next, and running in a flickering interchange from youth to age. The train slackened as it approached an intermediate station, and, putting back the photograph, he resumed his seat.

"Lilla's a lady!" said he. "It'll be no fault of hers, poor little thing, if she isn't, though it may be some of mine."

He was left alone until the conclusion of his journey, and at the door where he surrendered his ticket found himself rubbing shoulders with his shy acquaintance of Paris. He was too full of his own thoughts to notice it at the moment, but it occurred to him afterwards that even remembering how slight their knowledge of each other was, the American's manner had been somewhat unnecessarily iced. There are some things in respect to which it is not true that the hand of less employment hath the daintier sense. Medhurst had been shown the cold-shoulder so often that he had got to look out for it, and had become sensitive to the merest hint of its presentation. His face gloomed and clouded as he walked, and when at some five minutes' distance from the railway-station he paused in the street to make sure of the house he sought, he made a conscious effort to change his facial expression.

He rang a little doubtfully, and stepped back into the street to watch for the movement of some answering light. No light appeared, but a footstep sounding withindoors, he

moved once more towards the entrance. The door opened, and a shrill voice, speaking in the local *patois*, asked his business. He had no sooner opened his lips in answer than the voice lost its tone of acerbity.

"Give yourself the trouble to enter, M. le Capitaine; I will find a light in a moment." A footstep went shuffling along the darkened corridor, and the voice shrilled, "*Mademoiselle Leela, voici Monsieur, votre papa qui arrive!*" At this there was a joyous shriek from some upper apartment of the house, and a child's steps came flying down the stairs.

"Pa, Pa! Where are you, Pa?"

"Here, my darling," said Medhurst from the doorway: and the child, rushing impetuously towards him, gave an actual leap into his arms, and hugged him by the neck in an ebullition of joy which was almost wild in its intensity. When the woman who had opened the door returned with a candle, Medhurst was still nursing the child in his arms: and she, clipping him with both hands, was leaning a flushed face over his shoulder.

"This way, Monsieur," said the woman: and he followed her up-stairs, carrying the child, who took his hat off with a laugh, and hugged him closer afterwards. Up-stairs, he was shown into a sort of room, where there was a smell of garlic in the air. The floor was paved with hexagonal tiles, not peculiarly clean, and was unearpeted. The scattered furniture was shabbily pretentious, and the wood fire very meagre. A girl of one or two and twenty, sallow complexioned, but not unhandsome, stood in a waiting attitude by the table, with a piece of embroidery in her hand. She was dressed in decent black, and had a dependent and care-worn aspect. She curtseyed to Medhurst on his entrance, and then, seeing herself unnoticed, resumed her seat.

Medhurst, dropping down on to a sofa, took the child upon his knee, and possessed himself of both her hands.

"You didn't expect to see me, Lilla?" he asked.

"No," she said, pouting. "You haven't written for a fortnight. Madame has been nasty again. She was horrid this afternoon, and neither Mademoiselle nor I could eat our dinner. All oil and garlic!" She gave a shudder, half real and half mimicry; and Medhurst looked disturbed.

"Never mind, darling," he said. "You sha'n't stay here any longer. We're going to Monte Carlo together, and there you shall stay at an hotel."

"When shall we go?" cried the child, springing to the ground, and seizing him by both lappels of the coat.

"As soon as you can get ready," her father answered. "There is a train in an hour and a half."

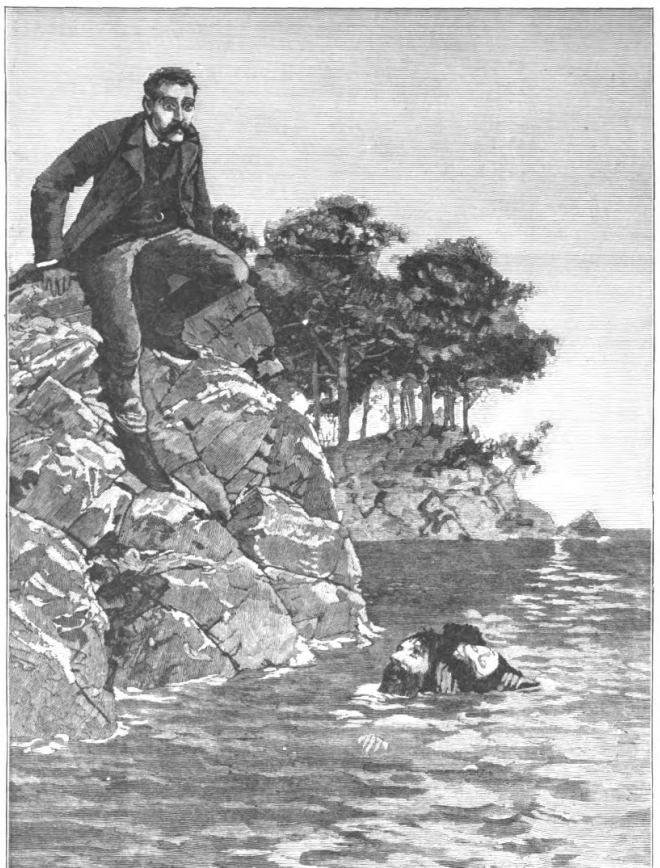
"Will Mademoiselle go, too?"

"Certainly."

The child turned excitedly upon her governess and poured out the news upon her in voluble French.

"Come away!" she cried. "Come at once! Let us pack up. We shall miss the train."

"I suppose you have not much luggage, Mademoiselle?" said Medhurst. The young lady shook her head with a rather sad and meaning smile. "Run away, Lilla," said the Captain; "and begin to pack. Mademoiselle will follow in a moment. I have some business to do with her, and you can be getting ready the while."



The child reaching out her arms to him, he stooped and kissed her, and she raced enthusiastically from the room.

"I owe you a year's salary," said Medhurst. "I will pay you now, and you can give me a receipt to-morrow. I think I owe you something for your patience and forbearance, and if you will accept this I shall be obliged." He offered her a bank-note for five hundred francs, and she accepted it as if she were too much dazzled by this unexpected good fortune to be yet quite clear about it. "Will you go to Nice to-morrow," he continued, "and buy whatever may be requisite for Lilla and yourself? I want you both to make a good appearance. If you can tell me when you will be ready I will be back in time for you. In the meantime, I shall be obliged if you will send the landlady to me."

The governess withdrew, and the landlady shortly afterwards appearing, had her claim settled and gave a receipt for it. Then Medhurst betook himself to the street, and wandered to and fro for a time, within hearing of the murmur of the sea upon the beach. He was not conscious of his immediate surroundings; but he saw quite clearly the sunlit gardens of Monte Carlo, with himself and the child, both irreproachably attired, strolling there hand in hand, with the governess, also irreproachably attired, coming on at a little distance in the rear. There was something in this picture altogether delightful to the fatherly affections; but there was something more than that. The group looked eminently reputable. The British father with the pretty daughter and the sedately respectable young governess in the neighbourhood looked very little dangerous, indeed. He was likelier to make acquaintances so, who might be of use to him. He caught himself at this mental exercise with such a sudden swiftness that he gave a groan of shame and anger, and, turning abruptly on his heel, he began to walk rapidly, as if to carry himself away from the sphere of that reflection. But he had never used himself to scout his worse or to encourage his better moods, and by-and-by he resigned himself.

"Am I to be without the child because I shall look the more respectable with her? Was it my intention in coming here to make a decoy of her?"

She would make a sort of decoy, all the same, and in a minute or two he had reconciled himself to the picture which at the first glance had so horrified him. Before the time drew near for their departure he found a carriage plying for hire, and was driven back to the house. The child, already dressed for the journey, and full of impatience to begin it, fluttered round him with a restless and excited energy, sometimes seizing him round the neck from behind his chair, and impetuously kissing him, and sometimes seating herself on his knee and sitting quietly for about a minute at a time with her head upon his breast. Since his wife's death, eight years ago, Captain Medhurst had been very little accustomed to give or receive caresses. He felt awkward in his manifestations of affection now; but more than once the child's abandonment of joy touched him with an unexpected keenness. They would never part again, he told himself. He would make some sort of fight with the world, and would rehabilitate himself in the eyes of those who knew him. In a very few years the little girl would be a woman, and then there would be no hiding from her the equivocal position he occupied, or the disdain in which he was held by people who still lived in the circle he had left. After all, he had only done on very little money what many people did who had a great deal. He had never been detected in sharp practice, and no man could lay a finger on any known episode of his life and say, "Herein thou art a rogue." If he, in his own interior knowledge of himself, could have guided the accusing finger pretty often, it made no difference. If the people of his own set were shy of him it was because they thought him dangerous, and not because they ever proved him so. Give him money enough to be respectable, and he would keep his hands so clean that no man would dare to hint that he had ever soiled them.

He looked up at Medhurst and sang out cheerily—"She's all right, old man!"

That harebrained vision of the Major's got somehow into his mind and stuck there. The obstinate, good-hearted fool might win, if not so much as he dreamt of, enough to make good his promise; and if that *should* happen, his word was as good as his bond. Medhurst had no faith in the success of the Major's scheme, and yet the hold this fancy took upon him was remarkable. He caught himself declaring with an inward stress, at which he laughed mockingly a second later, that the money should be tied so tightly on the child that he should be unable to rob her of a penny of it in the Major's interest.

It was not a pretty thing to think of, with that pretty little girl clinging affectionately round his neck; but had they not tinkered with that American fellow long enough, and wasn't it time to begin seriously with him? To let him win next time and make the stakes higher while he was winning, and then to sweep the board? Even after that he might come back again if he were keen set enough, and nothing they were likely to get out of him would hurt him much.

"Papa!" The childish voice recalled him with a pretty imperiousness. "I don't want you to go away again."

"No, my dear," he answered. "But I have had to travel about a great deal, and I could not take you with me away from your lessons. I shall not have to travel so much now, and we are going to be together always."

She gave him a vivid kiss at that, and he dropped back into his fancies, until the governess warned him that it was time to start. Lilla was excited beyond measure at the carriage-drive, and the prospect of the brief railway journey beyond it.

"It is the season at Monte Carlo, papa," she said. "Madame says so. She says that everybody is there. Everybody who is anybody. But everybody is somebody, isn't he, papa?"

How pretty, fresh, innocent and mirthful the childish prattle seemed! The little mouth was like a surprise-box, from which something new and pleasing perpetually issued; touches of naïveté, at which he would have yawned dismally if they had been recounted of anybody else's child, made him bubble with sudden merriment, and sayings, nowise wonderful or profound, made him start to think how wise and observant Lilla was growing. He had always kept a tender place for her; but he wondered, more and more, how it was that he had never known how much he loved her! Before they reached the hotel he was overflowing with paternal tenderness, and felt himself even fluttered and disturbed by it. When he commanded a bed-room for her at the hotel he said to the head-waiter, "This is my little daughter!" with a proud fondness which quite pleased that stately personage, who had little daughters of his own. The Captain inspected the room in which she was to sleep, saw a fire lighted on the hearth, groped with his hands about the bed to assure himself that the linen was well aired, and generally pottered about with an old-bachelor kind of care for her until he completely enlisted the sympathies of the *femme-de-chambre*. He commanded sweet biscuits and Malaga-and-water, and fed the child with those dainties as she sat upon his knee. He bade her "Good-bye" for the night very tenderly, and then went to the rooms the Major and he occupied in common, in the hope of finding his companion there. Not finding him, he strolled back, ten minutes later, to his Lilla, as she lay in bed, and sat chatting with her for some ten minutes before he could tear himself away again.

This touch of youth and innocence shed a sort of reflex of youth and innocence upon his own spirit, and he went downstairs gaily to renew his inquiries for the Major. That gentleman, he was informed, had finished dinner half an hour ago, had left the hotel, and had been seen to cross towards the Casino. Medhurst, having lighted an excellent cigar, was loth to part with it, and so wandered up and down in the atrium, weaving his way through and through the crowd disgorged by the music-room at the close of the first half of the nightly concert. There was no Daisy to be seen there, nor yet in the reading-room. He could hardly have gone back to play again after his solemn promise to the contrary; and yet Medhurst was a little uneasy. He was not quite uneasy enough to surrender his unfinished cigar, but his doubts spoiled its flavour, and he walked discontentedly to the head of the outer steps and stood there surveying the comers and goers, and vainly striving to make out the Major's stalwart swagger amongst them.

Had he but gone straight into the play-room he might have averted the catastrophe of the night. For at the moment at which Medhurst had entered the atrium the Major was guilty of a folly and a breach of faith in one. It was the Daisy's habit to take a little more wine than was actually good for him at dinner, and to-day the cheerful brigand had exceeded even his ordinary potations. He felt that the splendid fortunes of the afternoon afforded the best of excuses for another bottle. Another bottle needed such slim excuses at the worst that the tempter prevailed with him, and up the other bottle came—cuvee réservée extra sec, with a longish price facing its name on the list. The Major was willing to pay the longish price, but if, over and above the sum set down upon the hotel wine-carte, he had known that that second bottle would cost him, in round figures, twenty thousand sterling, he would have heaved it through the plate-glass window and have paid the damage with a light heart rather than have uncorked it. The vision before the Major's gaze revealed anything but loss or the danger of loss; and when he had finished his bottle he made the waiter help him on with his furred overcoat and present him with his hat and cane and gloves, and so sallied forth magnificent. He had but a mere handful of money in his pocket, a wretched three or four thousand francs or so, and he meant to go over and try a little variation of his system on a small scale by way of an experiment. He left his outer adornments in the cloak-room, and after a minute or two of waiting found a place at one of the tables. Then he began to punt quietly with such good fortune that it seemed absurd in view of it to play a timid game. He launched out therefore, and almost before he knew it, found himself changing his last note into napoleons. By this time he was eager for the battle, and drawing out his card-case and jewelled pencil he wrote and signed a line or two of command to the hotel manager and whispered the *chef de partie*, who spoke an excellent foreign English. A trustworthy person from the Casino crossed to the hotel, and a moment or two later the manager and the trustworthy person returned together, the former bearing in his hands the cash-box entrusted to him, and politely surrendering it to the owner's care.

The poor Major! It was almost the last moment of splendour for many and many a day; but he had never looked or felt so truly, so imperially noble, as he did when he unlocked that box, and the gallery gaped and gasped to see it crammed almost to the top with bank paper and thickly sown above with louis d'or. The Major took a heap of the notes, without counting, and rolled out the gold upon the green cloth. Then with his scented cambric he brushed away the fragments of wax which had fallen from the broken seals, diffusing the perfume of ylang-ylang to all nostrils. Next, he handed the box, relocked, to the care of the chef, and began to play in earnest. He was as sober as a judge to look at, but within-doors he was as irresponsible as a child. He began well enough, dropped the variation he had tested, and ruled

Sweet maid, some fairy's magic wand
Has surely in a roguish freak,
Transformed the roses in thy hand
And made them bloom upon thy cheek.

ROSEBUDS.

From the Picture by C. D. Leslie, R.A.

[Copyright Reserved.]

'Tis said that Cupid often lies
In ambush hid among the roses.
Ah, then, beware! lest his bright eyes
Should find you when you gather posies.

RUINED.

Drawn by A. Quinton.

Sure, none who knew it in its prime would recognise The Grange:
Ten years ago I saw the place—and now, O what a change!
For then a fair and gracious dame, with girls, the county's boast,
And stalwart lads, a genial band, were clustered round our host;
Then on their closely-shaven lawn, throughout the summer day,
Was gathered many a jocund throng, in sports and pastimes gay;
For thither flocked, in eager haste, the neighbours all around,
By ties of cordial friendship knit, as in one family bound.

But soon a change came o'er the scene—clouds gathered in a trice;
For how can any home survive the rattle of the dice?
Our host, alas! poor, simple man, plunged heavily in play,
And quickly squandered all his wealth in gambling dens away:
So, Squire Hawthorne, who erewhile looked all men in the face,
Slunk from his family and friends, to hide his dire disgrace;
The Grange no longer holds its head in patrimonial pride,
And his sweet wife and children dear are scattered far and wide

METZLER and CO.'S LIST.
NEW and POPULAR DANCE MUSIC.

entirely upon his system. He gave that a fair chance, too, beginning at the beginning, and mounting in due progression to the maximum which guards the bank, but, losing that, he went for the gloves, and lost at a pace which was no less than frightful. At length he deserted his plan recklessly and went for the simple chances, the columns, and the dozens. He set down maximums on each and all—four-and-twenty thousand francs—and awaited the turn of the wheel. He had a seat in front of the red diamond, and backed his side of the table, rouge, impair, manque, first dozen, and last column. He was hit hard already, and his heart knocked busily against his ribs as he watched the wheel. Even if he won at this stupendous play it would take him half-a-dozen *coups* to bring himself back to the point from which he started; and he had a sort of dreadful premonition that the result of this one chance was charged with fate. If he won, he would break the bank; and, if he lost, he knew, as only superstitious people, who have no grounds for their belief, know anything, that he would rise a ruined man.

The ivory marble gave its first warning click.

"Rien ne va plus!"

It fell.

"Vingt-huit. Noir, pair, et passe."

The fateful rake gathered up the Major's twenty-four thousand francs, and he began, with fingers that trembled in spite of himself, to count for a new stake. He held out his hand for the box, and it was a work of some little difficulty to open it. He couldn't find the keyhole readily until the thought of the crowded observers steadied him. Then he took out a second great sheaf of notes, relocked the box, returned it to the chef, and completed his stake. At this moment Medhurst entered the room, and seeing that all the idlers of the place were drawn to one table, uneasily suspected the Major there. He would not believe his own suspicions all at once, and pretending to himself that he had discarded them entirely, he strolled to the table, and found himself staring point-blank at his companion between the heads of half-a-dozen rows of people. There was nothing to indicate the inward riot in the Major's mind beyond the fact that he looked flushed and sulky, and that he wore a sort of bull-dog expression which was new in Medhurst's knowledge of him.

"Trois," said the croupier's voice. "Rouge, impair, et manque."

The gallery moved, and sent up a cry which was for all the world like a miniature copy of that which mounts from a crowd at the sight of a bouquet of fireworks. Medhurst rounded the table, and pushed eagerly to where the Major sat. One or two who had remarked his association with the player made willing way for him; but others, who were strange to him, resented his attempt to pass. There was a little scuffle, and at the end of it Medhurst was standing at the back of the Major's chair.

The croupier was counting out thirty thousand francs for payment to the Major, and for an instant Medhurst did not quite see what had happened, though, with the stakes still upon the table, and the money passing to his comrade's hands, the position of affairs needed little explanation.

"This isn't the system, Major," Medhurst whispered, bending above him. It never crossed his mind that the Major had broken into the cash-box. He supposed him to have begun with the contents of his pocket-book, and to have risen to this daring play by sheer luck and audacity. The Major answered nothing, but left his stakes upon the table. The game went on, and the next two or three turns of the wheel made great inroads on the second pile of notes.

"That'll do for to-night, Daisy," Medhurst whispered again. "Be content with what you've done already. Now, be persuaded, there's a good fellow. You know," he went on, seeing that the Major preserved an obdurate silence, "that you authorised me to stop you if I found you going outside the system. You seem to have done pretty well as things stand, but you'll spoil it all if you go on at this pace."

The tone was measured carefully enough to reach the Major's ears only. The words had no more effect upon him than if they had remained unspoken. Medhurst became charged with a cold anger at the other's obstinacy, and stood by to watch whilst the Major's money melted at an average of some five hundred pounds for each turn of the wheel. At last there were but two or three notes of the second pile left, and Medhurst tried again.

"Come," he whispered, "you're where you started now, or thereabouts. Give it up for to-night."

For sole answer the Major turned towards the chef and extended his hand. The chef held the cash-box towards him, and Medhurst, with a start and an inarticulate groan of anger, which was audible to all the table, intercepted it. The Major turned in his chair, and, seizing the cash-box violently with both hands, dragged it out of Medhurst's grasp, set it upon the table, and unlocked it. At that, the whole truth flashing upon Medhurst's mind in a second, he seized the Major's burly shoulders as if he would tear him from his seat.

"You unmitigated ass!" he said, forgetting to measure his tone this time. "You have squandered fourteen or fifteen thousand pounds! Didn't you give me your solemn word of honour not to play to-night? Give me that cash-box. You sha'n't throw the rest away."

"Go to the devil, Sir!" cried the Major, wrathfully. "Mind your own business."

"This is my business," Medhurst answered.

"I'll be hanged if it is, though!" said the Major.

At the noise of the strong voices people ran from all parts of the room.

"I have done," said Medhurst, loudly, but with a self-possession in the midst of his anger which the Major could not command; "I have done what you yourself besought me to do. You told me that you were a fool, and not fit to be trusted at the tables after dinner. You begged me to keep you away, and authorised me to take the money from the table if you played wildly. I have done my duty, and I wash my hands of you. You may take your idiotic course alone!"

"I am glad," responded the Major, calling after him as he forced his way through the crowd, "I am glad to be rid of your damned impertinent interference on any terms, Sir!"

And having delivered himself thus, he turned back with foolish, fruitless valour to the tables, and did not rise till his last bank-note was gone. He had seen that it was going, and had reconciled himself so perfectly for the moment in that irresponsible, happy-go-lucky mind of his that he laughed with unfeigned good-humour when it was all over. He had still a double handful of gold pieces left, but he was not going to fall to stakes which anybody might play after that superb losing game, so he swaggered with perfect seeming tranquillity to the *vestiaire*, secured his stick and hat and overcoat, and, returning to the hotel, went to his rooms and ordered wine. As he sat drinking alone he laughed with great enjoyment once or twice at the recollection of certain small episodes in the history of the evening, but he began to feel that there was a cloud above him. Little by little it descended, until he was saturated with its gloom. He ordered more wine, and the waiter brought his bill. He paid it with lordly oaths, demanding to know why a gentleman should be insulted by the proffer of his account before he asked for it, and threatening to quit the house next morning. But the news of the Major's prodigious losses had reached the hotel before him, and the manager was not unnaturally anxious to secure his money. Perhaps the waiter had heard the like objurgations before. People keep hotels under unusual conditions at Monte Carlo, and the gay-hearted, loud, and lordly person for whom nothing is good enough on Monday is pretty often a mournful hanger-on on hope and sufferance by the Saturday. What Crœsuses there are there for a day or two! what holders of the Fortunatus' purse for an hour! How they shine and swell and burgeon, and, oh! how they wither and diminish! The experienced host knows these gentlemen in all their stages. He must have curious views of the world.

The Major in his convivial hours was wont to give vent to certain old-fashioned toasts or sentiments, and one of these was "May the evening's amusement bear the morning's reflection." There were few who had greater need to offer up that petition than the Major. His evening's amusement had failed to bear the morning's reflection pretty constantly, and, sagely accepting the fact, he had met the trouble by refusing to reflect. But after that historic night at the tables the sturdiest refusal was of no avail. Medhurst found him very ill in bed. He was drinking champagne and seltzer, and his red face was so swollen that his eyes seemed half obliterated.

"Medhurst, old boy," groaned the Major, "do you want to hear my opinion of myself?"

"I have my own," Medhurst answered.

"You've got a right to it. I'm the biggest fool out of Hanwell. I ought to be harnessed to a sand-cart. There isn't such another ass alive. If I had to go and play, why couldn't I stick to the system? To have twenty thousand pounds, and jack it that way! Twen—ty thousand pounds! Think of the unlimited spree a fellow might have had with it! Go out!" he cried, struggling upright in his wrath and scorn, "go out and hire some able-bodied scoundrel to come here and kick me! Go and tell 'em that the Daisy"—he smote himself resoundingly upon the breast—"the Daisy is nothing but a blooming Juggins!"

The reflection was too bitter for him. He fell back upon his pillow and groaned.

"I told you how it would be," said Medhurst. "You were better off than ever you had been in your life before; and you must needs throw away everything that chance had given you, and insult the man who tried to save you, into the bargain."

"I was a madman," said the Major. "You ought to have punched my head, Medhurst."

"I anticipated this," Medhurst answered; for he was by no means the man to let an error go unemphasised. He had thought people very unreasonably and cruelly bitter in his own case; but his own were the only blunders ever made for which he was prepared to find excuse. "I expected to be told that I had not made my remonstrance strong enough. I endured to be told publicly that I was a meddlesome impertinent. You were good enough to tell me that you were glad to be rid of my impertinent interference at any price."

"I beg your pardon, old chap," said the Major. "I was an ungrateful ass. I deserve to be kicked. You can take it out of me now, and I won't retaliate. I think," he added plaintively, "that it would do me good."

But in spite of all humiliation on the one side, and all wrathful contempt upon the other, the twenty thousand pounds were gone, and there was no way to conjure them back again.

"After what happened last night," said Medhurst, with a certain harsh and cold dignity, which never failed to have its effect upon the Major, "I do not see what you and I have to do with each other. I do not propose to leave you stranded"——

"Good Lord! Medhurst!" ejaculated the Daisy. "You're not talking about leaving me for a hasty word?"

"After the occurrences of last night," returned Medhurst, "and the public scandal you were pleased to put upon me, I do not see what remains but that."

"I was screwed last night, old chap," he said piteously. "I didn't know what I was saying. I beg your pardon, with all my heart. Hang it, old man, pitch into me as much as ever you like, but don't cut me! And we've got such a plant on between us with that Yankee that we may be just as well off again in a week. I made him promise to come and dine to-night, and we've fiddled about with him quite long enough, in all conscience!"

It had never been Medhurst's intention to part company with his colleague, so that when he had fully asserted his own wrongs, and the Major had sufficiently humiliated himself, he consented to be partly reconciled.

"I agree," he said, "on one condition. You have cleaned yourself out completely, of course: so long as we are here together I must have charge of our joint belongings. I shall not allow you more than a hundred francs at a time, and if you like to fool that away at the tables, you may—though I don't suppose that such a capital will tempt you."

The Major, for the sake of peace, was willing to accede to anything, and would have accepted much harder conditions than those imposed upon him.

"You want money now?" asked Medhurst.

"No," said the Daisy; "I've got a louis or two."

He spoke with no intent to deceive; but when, an hour or two later, he got up and languidly dressed himself, he discovered that he had considerably underrated his belongings, and overhauling all his garments he contrived to gather together nearly as much as the sum which had sufficed him for the beginning of his campaign against the bank. At this discovery, hope rose anew within his spirit. His bath had done something for him, and breakfast—begun with extreme distaste and languor, but finally accomplished with some semblance of energy, did more. By two o'clock he felt himself his own man again, and learning on inquiry that Medhurst had left the hotel until half-past seven, the Major walked towards the Casino. He was, to be sure, a little shaky in his gait, and a little guilty in his thoughts; but his habitual swagger hid his perturbation from the public eye, and when he strolled into the *salle-de-jeu* he looked so little moved by last night's catastrophe that the few who recognised him resolved either that he was a cool hand indeed, or that he must be quite a Rothschild.

Finding a seat at his accustomed table he went back humbly to his system, and to his original method of playing it. Fortune, less kind to him than at the beginning, yet relented a little, and he prospered so far that before it was time to make ready for dinner he was playing pretty high again, and was once more the chief centre of interest at the table.

In the meantime Medhurst, after his domiciliary visit, had sent for his little daughter, and had set out with her upon a rural excursion for the day. He would have been in better trim for it if the Major's behaviour had been different, but he had had to reconcile himself to so many losses of his own that he found it comparatively easy to forget another's. And though he was on pleasure bent, he had a frugal mind. He would give himself a day of fatherly intercourse with his child, and would, at the same time, make sure that the American millionaire should keep his appointment for dinner. This mingling of the domestic and the vulpine was a little *bizarre*, perhaps; but Captain Medhurst did not feel it to be so. He bowled off to Juan-les-Pins with the child, and allowed his fluttered spirits to be gradually calmed by her gay and innocent talk. Arriving there in time for luncheon, he met the young artist at table.

"I am giving my little daughter a day's holiday," he said. "We spoke of your painting last time you did us the pleasure to dine with Major De Vere and myself, and I thought you might not consider me impudent if I ask leave to look at one or two of your drawings."

Paul, scenting a possible patron, assented immediately. He would have said "Yes" to anybody, for his work was his one pride and joy; but he said it more readily when he thought he saw a chance of doing business. It was on the tip of his tongue half-a-dozen times to ask if Medhurst had taken him for the millionaire; but, candid and outspoken as his manners were, he was not without delicacy. It was not easy to hint that this courteous and hospitable acquaintance had only been willing to know him because he had thought him enormously rich, and without some suggestion of that kind Paul hardly saw his way to the inquiry. He kept silence, therefore, with respect to that topic; though Medhurst once gave him an actual chance. It was when they were in the painter's bed-room together, and Paul was displaying his work.

"Really," said the Captain, settling his pince-nez and surveying the canvas before him with some signs of surprise, "this is very remarkable work!" He did not know much about pictures, but he knew enough to be able to make some distinction between the ordinary inefficiency of the amateur and this bold yet subtle delineation of Nature. "I suppose," he went on, "that it would be unfair to ask you, considering how short a time you have been here, if you have anything more to show me?"

"I work pretty fast," said Paul. "I have done three other things, but they have gone away."

He could have said, easily enough, that he had sold them; but he shrank somehow from that declaration.

When he went out to resume his afternoon's labours, Medhurst walked with him, and stood by to watch the progress of the work. But this was not very much in his line, and in a while he began to yawn behind his gloved fingers. By-and-by, with some profession of admiration for the beauties of the landscape, and his desire to see more of them, he strolled away with Lilla's hand in his. Short as their acquaintance had been, the child and the artist were already excellent friends, and she called out to him in her clear treble that they would not be long away, and he turned to nod smilingly at her and to wave his broad-brimmed sombrero. They had not gone far when, rounding a little rocky headland, the child found a natural chair, formed in its side, and shrilled the intelligence of this wonderful discovery at papa.

"Come and look, papa!" she cried ecstatically. "There is room for two."

She insisted on sitting down with him, and he was obedient for that day, at least, to all her whims.

"You have not smoked since luncheon," she said, with a pretty assumption of being elderly. "That is because you are out with a lady. But she does not object to the smell of tobacco in the open air, and you can have your cigar."

With that she rummaged in his pockets for his cigar-case and the little silver box in which he carried his wax matches. Then, having struck a light for him, she arranged his hat in an idly rakish posture, and disposed his hands until he looked sufficiently restful to her fancy.

"Now," she said, holding up a warning finger to him, "you will stay like that until you are strong enough to go on again. I am going to see if there are any shells. There are not nearly so many here as there used to be at Hastings. Now, stay like that, and be good. For if you move away I shall lose you, and how you would get back to Monte Carlo without me, goodness gracious knows!"

"Ah, my dear," he answered, putting his arms about her, "it would be very hard to have to go without you."

She kissed him with a swift vivacity, but immediately reproved his breach of orders.

"You are to stay like that"—rearranging him, and giving his hat a more languidly rakish cock than before. "You are not to over-exert yourself; and you are not to move till I come back again."

"Very well," her father answered, with a keener delight in all this childish fun than he would have thought possible the day before. The child clambered down the rocks, turning every now and then to see that he retained the posture in which she had placed him; and his eyes followed her with a tender and affectionate complacence.

Until within half an hour, the warm winter sun had been shining full upon the place he occupied, so that there was no sense of chilliness in the stone. He was in shadow now, and something in the attitude in which his little daughter had placed him coincided so completely with the dreamy stillness of the scene, and with his own pleasant, idle, after-luncheon sensations, that he was within an ace of falling into a doze, when a strange voice pronounced his name, almost in his ear.

"This—what do you call him?—Captain Medhurst. What is he?"

Captain Medhurst had never been more wide awake in his life, but he felt a sort of dreamlike sensation still, and sat quite silent, hidden, as he knew very well, by the overhanging rocks amidst which he sat. The voice he had heard sounded elderly, and was unmistakably American, smooth, agreeable, and cultured, and Bostonian in every tone.

"I don't know what to make of him," said another voice, which Medhurst recognised immediately. "He's a gentleman unmistakably, or, rather, I should be inclined to say that unmistakably he has been."

Medhurst was nine-tenths inclined to rise and reveal himself. It is proverbial that listeners rarely hear good of themselves. The speakers had paused, and, as he guessed, had sat down out of sight above him. They seemed disposed to discuss him with some candour, and he hardly cared to be present unseen at a candid handling of his own character.

"He has rather the look of a roué," the second voice went on, "and yet there are certain marks of distinction about him."

"And the other man—what do you call him?—De Vere?"

"Vulgar from head to foot. Of course one would not like to say on such slender evidence, that practically it is no evidence at all, that they are anything but honourable and high-minded men, but I don't like the fact that the young fellow has fallen into his hands. They think him prodigiously rich, they have induced him already to play for high stakes, and when I bought the sketch from him the other day he confessed to me that they had almost cleaned him out already. But for the fact that he had sold a picture that morning he told me that he would not have known where to turn. He is a gold medalist, and has a three years' travelling allowance; but with all he can earn he cannot afford such associates as Major De Vere and Captain Medhurst."

This was very curious matter for Medhurst's hearing, and he was so surprised and so eager to hear more that he sat still

Mothers who regard Health and Beauty in your Children!

Read This!!! It will Repay you a Thousand-Fold!!!

THE delicate Skin of Infants and Children is particularly liable to injury from coarse and unrefined Toilet Soap, which is commonly adulterated with the most pernicious ingredients; hence frequently, the irritability, redness, and blotchy appearance of the Skin, from which many Children suffer. It should be remembered that **ARTIFICIALLY COLOURED SOAPS ARE FREQUENTLY POISONOUS**, particularly the Red, Blue and Green varieties; and nearly all Toilet Soaps contain an excess of Soda. Very White Soaps, such as "Curd," usually contain much more Soda than others, owing to the use of Cocoa Nut Oil, which makes a bad, strongly alkaline Soap, very injurious to the Skin, besides leaving a disagreeable odour on it. The serious injury to Children resulting from these Soaps often remains unsuspected in spite of nature's warnings, until the unhealthy and irritable condition of the Skin has developed into some unsightly disease, not infrequently baffling the skill of the most eminent Dermatologists

ITS DEEP BROWN AMBER COLOUR IS NATURAL TO IT, AND ACQUIRED BY AGE ALONE.

PEARS' SOAP

FOR THE TOILET, NURSERY, AND SHAVING. PURE, FRAGRANT, AND DURABLE.

A careful perusal of the following Reports of the most Eminent Analytical Chemists, together with the Testimonials of the élite of the Medical Authorities on the Skin, will convince the most sceptical of the immense Superiority of PEARS' SOAP.

REPORTS OF EMINENT ANALYSTS.

From Dr. REDWOOD, Ph.D., F.C.S., F.I.C., &c.; Professor of Chemistry and Pharmacy to the Pharmaceutical Society of Great Britain.

"MESSRS. **Pears** have long been celebrated for their **Transparent Soap** (Transparent Soap was invented by them), and from frequent examinations and analyses of it during a period of thirty years, I can certify that it possesses the properties of an efficient yet mild detergent, without any of the objectionable properties of ordinary Soaps, which usually contain free fatty acid or caustic alkali, or alkaline salts, giving them a greasy, acrid, or irritating character. It is quite free from Cocoa Nut Oil and artificial colouring matter, and may be relied upon for great purity, uniformity of composition, and agreeable perfume. It may be represented as a perfect Toilet Soap."

From CHARLES R. C. TICHBORNE, Esq., LL.D., F.I.C., F.C.S., &c.; Lecturer on Chemistry at Carmichael College of Medicine, Dublin, and Chemist to the Apothecaries' Hall of Ireland.

"I HAVE made three separate and independent analyses of **Pears' Transparent Soap**, the samples being procured by myself at ordinary Retail Shops, and from these examinations I am enabled to certify to its purity. It is made in the most perfect manner, and is free from any causticity—to persons of delicate skin a question of vital importance. Being free from all adulteration with water its durability is really remarkable. I cannot speak too highly of it, for it strikingly illustrates the perfection of Toilet Soap. Within the last few years a great number of Transparent Soaps, imitations of Messrs. **Pears'** invention, have appeared in the market of a most inferior and injurious character, consisting of Cocoa Nut Oil, Glycerine, and a large addition of water, and I have found in them over five per cent. of free caustic soda, and *nearly one-third water*. I need hardly say that such Soaps are necessarily most hurtful."

From Professor JOHN ATTFIELD, F.R.S., Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain; Author of a Manual of General, Medical, and Pharmaceutical Chemistry.

"I HAVE annually, for the past ten years, made an independent analysis of your **Transparent Soap**, and have not found it to vary in quality or in composition. It contains neither excess of alkali nor of moisture, and it is free from artificial colouring matter. **A better, purer, or more usefully durable Soap cannot be made.**"

From Professor CHARLES A. CAMERON, M.D., F.R.C.S.I., S.Sc. Camb. Univ.; Professor of Chemistry and Hygiene in the Royal College of Surgeons, Ireland; Medical Officer of Health & Analyst for Dublin.

"I HAVE analysed Samples of **Pears' Soap**, purchased by myself in Dublin. I find it remarkably good—prepared from pure materials, combined in the proper proportions, and free from Cocoa Nut Oil and from artificial colouring. It may safely be used upon the skin of the tenderest infant."

From STEVENSON McADAM, Esq., Ph.D., &c.; Lecturer on Chemistry, Surgeons' Hall, Edinburgh.

"I HAVE made careful analyses of several tablets of **Pears' Transparent Soap**, which I obtained indiscriminately at different shops in Edinburgh, and I can certify to its being a pure and genuine Soap, free from admixture with any foreign substances, and practically devoid of causticity. It combines detergent with emollient properties in a high degree, and it may therefore be used with great advantage for toilet and bath purposes, especially in the case of children and others whose skin is soft and delicate, and liable to be affected by the impure and caustic nature of ordinary Soaps."

MEDICAL TESTIMONIALS.

From Professor Sir ERASMUS WILSON, Professor of Dermatology, Royal College of Surgeons of England [in the "Journal of Cutaneous Medicine."]

"THE use of a good Soap is certainly calculated to preserve the skin in health, to maintain its complexion and tone, and prevent its falling into wrinkles. **PEARS** is a name engraven on the memory of the 'oldest inhabitants'; and **Pears' Transparent Soap** is an article of the nicest and most careful manufacture, and the most refreshing and agreeable of balms for the skin."

Dr. TILBURY-FOX, late Physician to the Skin Department, University College Hospital, London.

"PEARS' Soap is the best Soap made."—*Vide* Tilbury-Fox on the "SKIN," p. 509.

Mr. JOHN L. MILTON, Senior Surgeon, St. John's Hospital for the Skin, London. From the "Hygiene of the Skin."

"FROM time to time I have tried many different Soaps, and I have now, after Fifteen Years careful trial in many hundreds of cases, both in Hospital and Private Practice, no hesitation in giving my verdict to the effect that nothing has answered so well, or proved so beneficial to the skin, as **Pears' Transparent Soap.**"

From "The Bath in Health and Disease," by the same Author.

"PEARS' Soap is unrivalled for purity, and is really the most economical of Soaps, as it contains scarcely any water, as Professor Attfield's analysis incontestibly demonstrates."

Dr. BARR MEADOWS, Physician to the National Institution for the Skin, London.

"PEARS' Soap is, in my estimation, greatly superior to any other form of Soap with which I am acquainted, and my best testimony to the fact is—always using it myself."

Mr. JOHN STARTIN, late Physician to St. John's Hospital for the Skin, London.

"FOR many years I have had pleasure in recommending and using **Pears' Soap** *in preference to every other*, as being perfectly free from those impurities so prejudicial to the skin, found in most Soaps."

Mr. JAMES STARTIN, Surgeon and Lecturer at St. John's Hospital for the Skin, London, Successor to the late Mr. John Startin.

"AS to the Soap you should use: Having made innumerable experiments with all the best known Toilet Soaps, both of English and Continental Makers, my experience as regards **Pears' Soap** endorses that of the late Mr. James Startin, Professor Erasmus Wilson, Dr. Tilbury-Fox, and similar writers; I have invariably found it perfectly pure, and the most efficacious in health and disease, and hence I recommend it to patients in preference to all others."

H. S. PURDON, M.D., Physician to the Belfast Skin Hospital.

"THE best Soap I know is **Pears' Transparent Soap**, and I recommend it to patients and friends."

PEARS' SOAP HAS BEEN AWARDED FIFTEEN INTERNATIONAL HONOURS FOR COMPLEXION SOAP.

FOR WASHING.

Tablets & Balls, 1s. each. Larger Sizes, 1/6 & 2/6

(The 2/6 Tablet is perfumed with Otto of Roses). A Smaller Tablet (unscented) is sold at 6d.

FOR SHAVING.

Stick (In Neat Case / No Dish Required) **or Round Cake** (To Fit the / Shaving Dish) **Price 1s.**

SUFFICIENT FOR TWELVE MONTHS' AVERAGE CONSUMPTION.

Larger Sizes of each Shape, 1/6 and 2/6 each.

IMPORTANT NOTICE TO CONSUMERS OF PEARS' SOAP.

PEARS' SOAP IS SOLD EVERYWHERE.

IF any obstacle is thrown in the way of its purchase by dishonest Dealers, the Proprietors will supply it direct at the following prices, on receipt of P.O.O., but they prefer and recommend that the Public obtain the Soap through the trade. This Notice is necessary, as vilely injurious imitations are often substituted for extra profit, even by dealers who would be thought "respectable," some of whom attract you into their shops or stores by marking PEARS' SOAP, as a bait, at *less than cost price*, and then recommend you to take some rubbish on which they get a large profit. Consumers have simply to insist on having PEARS' SOAP, remembering that any substitute is offered for the advantage of the Seller.

Retail.	Per Single doz.	Per Case of 12 doz. Case free, and Carriage paid in Gt. Britain.
6d. (unscented)	5/-	£2 12/6
1/-	10/-	£5

Retail.	Per Single doz.	Per case of 12 doz. Case free, and Carriage paid in Gt. Britain.

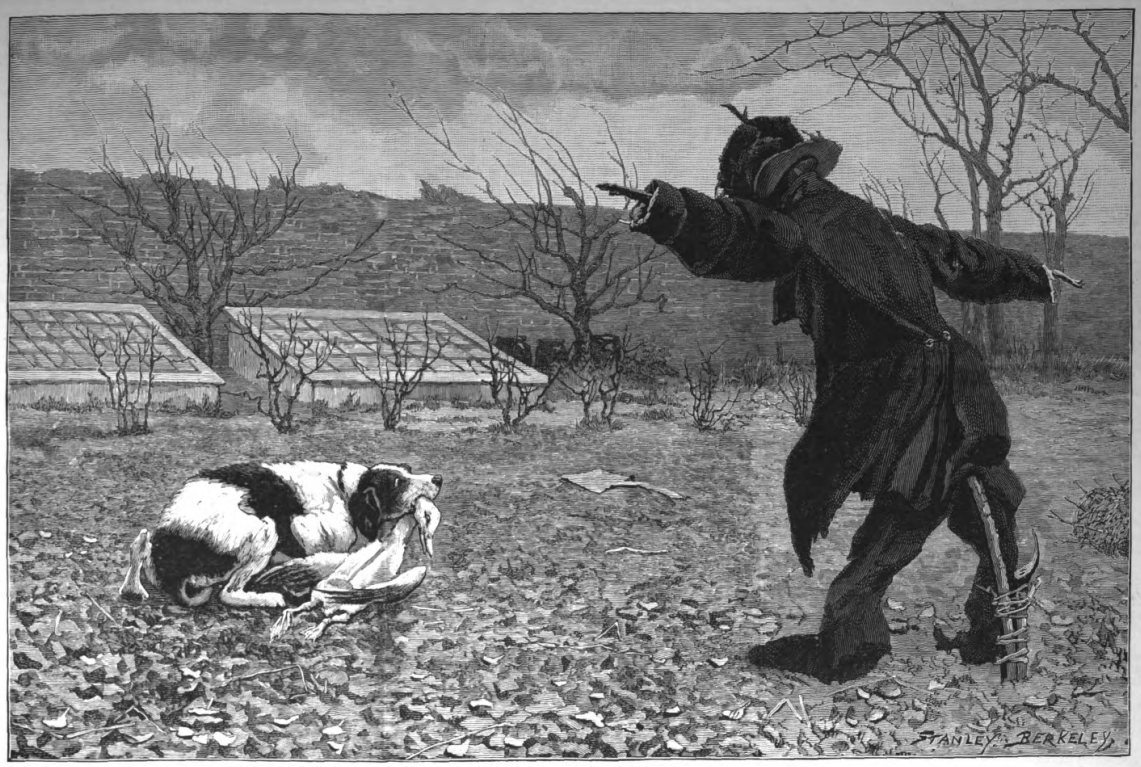
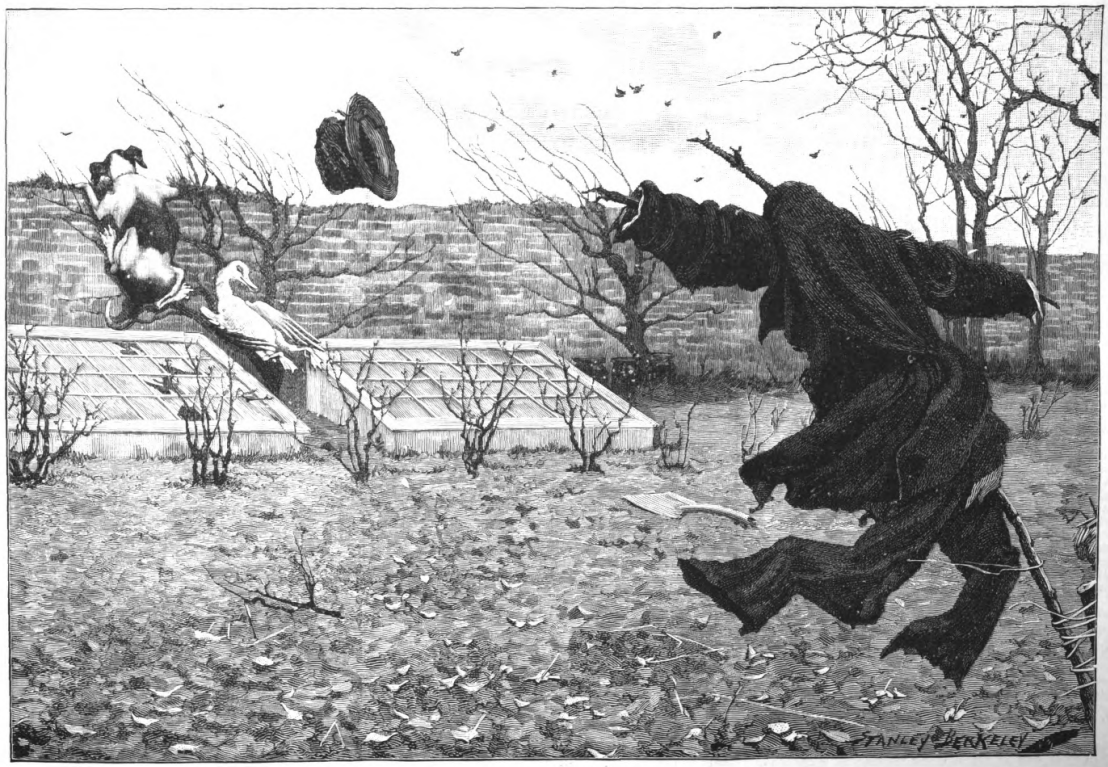
A. & F. PEARS,

Soap Makers by Appointment to



H.R.H. The Prince of Wales.



71, 73, 75, NEW OXFORD-ST.

(Late 38 & 91, Great Russell-street),

LONDON, W.C.

"CONSCIENCE —

Our greedy Ponto, inly chuckling,
Nips by the neck a dainty duckling:
And would have stifled its last quack,
But sudden pauses—there, alack!
Before him stands a goblin creature,
Half man, yet lacking form and feature;
His arms stick out, his garments wave,
But he is silent as the grave.

"DOES MAKE COWARDS OF US ALL."

Drawn by Stanley Berkeley.

What can the ragamuffin mean?
Such monster Ponto ne'er had seen;
And, trembling more and more, he sees
The figure, caught by sudden breeze,
Cut such queer capers, round and round
Fast whirling, though securely bound;
That Ponto scampers off in dread,
And leaves his duckling prey half dead.

as a stone and listened intently, with no lingering idea of proclaiming himself.

"You warned the young fellow?" said the elder voice.

"I put it to him that he might be taken for a certain very wealthy person of the same name as himself. I could not warn him against these English military people, to whose disadvantage I know absolutely nothing."

"That warning alone should have been enough for him, surely?"

"It does not seem to have been so. He told me yesterday that he had an engagement to dine with them this evening at Monte Carlo, and said that he was going to try to win back his losses."

"Really, my dear Paul, I don't see that you have any need to concern yourself further about the matter. You are not Paul Jones' keeper, and you have done what you could."

"It is that stupid alias of mine that has done the whole mischief. The boy is perfectly frank and open. He tells me he never played in his life before, except for the simplest stakes, and he talks about the splendid excitement of the game in a way which makes me think him likely to be betrayed into mischief."

"You seem to be pretty sure that these two Englishmen fastened upon him because they supposed him to be yourself?"

"Because they supposed him to have my money?—yes. I haven't the slightest doubt about that. But in spite of that they may be very decent people. We all know men who have money whom we would not know at all in poverty, and do not vastly care to know even as things are."

There was a pause at this point, and after it the elder man asked—

"You take an interest in the boy?"

"Yes. He seems likely to put a feather in the cap of American art. I think he has a real genius for his work, and I know that it was my alias which put him into danger. These are reasons enough for interest, surely?"

"Ample, my dear Paul; ample," returned the elder.

Then there was another pause.

"There are two or three things very well worth painting in the neighbourhood of Mentone. We might get him over there, and keep him a little out of the way of these people. It will seem quite natural in Americans to offer him hospitality, and I want him to paint me a picture or two."

"You know where he is at work now?" asked the elder.

"I think I can find him. Shall we go?"

There was a sound of footsteps grating on the rough stones of the hill-side walk, and they and the voices gradually faded out of hearing together. Medhurst sat still and wondered rather disconsolately. Fortune had seemed to cast a great prize in his way, and when he had made actually sure of it had suddenly struck it worthless between his thumb and finger. He had been so shrewdly certain that the painter was playing at poverty that the memory of his own confidence humiliated him, and made him feel like a foolish dupe. The young fellow had never disguised anything, and had behaved with perfect naturalness from first to last. He had even told Medhurst and the Major—in language as plain as any man need employ for such a purpose—that he was poor, and had to work for his living. In sweet enjoyment of their acumen they had chuckled over this as a piece of Yankee shrewdness, and had thought how unavailing it was by the side of the paragraph in the Paris edition of the *New York Herald* which blazoned the millionaire's arrival. Medhurst had reconciled himself to the Major's losses, partly because they were the Major's, and not his own, but partly also because he had seen a veritable Golconda ahead, and had meant to be in port no later than that evening.

It had never been a superstition of Captain Medhurst's to pay his debts with any unseemly hurry. But with that unexpected windfall from the Major's early winnings he had, to the great surprise of half-a-dozen creditors, scattered as many hundreds abroad. He had likewise made some expensive purchases, for he was a believer in Mr. Wemmick's theory of "portable property," and liked to utilise good fortune in that way. It was his mode of provision against the inevitable rainy day to buy articles of value upon which his Aunt or his Uncle—according to his residence in France or England—would advance him money if need were. Now, what with his incautious payment of old debts and his extravagant purchases, he found himself within two or three hundred pounds of poverty, and the land of Golconda had turned out to be no better than a mirage. The real owner of ten millions sterling was as little likely to come to his call as any man alive. It was really bitter to awake from such a dream, and even people who do not make a precarious living by experiment on the vices and follies of his fellow-men may have a sympathetic understanding of Captain Medhurst's situation.

Lilla had scrambled out of sight, and he was so absorbed in his own reflections that he had forgotten her. The child had found at the bottom of the headland an imposing precipice of some six feet in depth between her and the pebbly strand, and, not being disposed to face this, had wandered on in search of an easier descent. The road she hit upon led upward rather than downward, and in a while she found herself upon a small promontory of rock, which jutted out into clear water, and, somewhat to her surprise, commanded a view of the artist. She signalled him with a laugh of artless triumph, as if she had been successful in a game of hide-and-seek; and he, looking up at this gay burst of childish music, waved his hand to her. A second later he rose with some sign of agitation from his camp-stool, signing her back, and shouting to her "Take care!" Whether this energetic warning precipitated the accident it might be difficult to say. Perhaps the child's perch, foreshortened from the artist's point of view, looked less tenable than it really was; but, at the cry, she felt a sudden insecurity, and looked about her for a way of return. Almost immediately upon the artist's shout her father cried "Lilla!" in a voice of alarm; and, seeming swiftly to realise a danger she had not felt till then, she made a false step, lost her foothold, and plunged backward with a shriek of terror into the water. Medhurst was already afoot when the cry of the failing child reached his ears. He scrambled madly down the rock, bruising his limbs and tearing his clothes in his progress. In a minute he stood on the spot from which his child had fallen, and realised with a thrill of hopeless horror that the water below him was full twenty feet in depth. To attempt a rescue was to go to certain death, for he could not swim a yard; but at the very instant when this horror attacked him he caught a flash of something white in the water, and realised the fact that Paul Jones was there, swimming at a prodigious pace towards the spot where Lilla had fallen. The painter had thrown off his coat in running, and the flash of white came from his shirt-sleeves. He swam like a seal or an otter, for he had many a time spent the third part of a long summer day a mile or two out from the cliffs of his native place, wallowing in the waves of the salt Atlantic, and was almost as much at home in the water as upon the land. The wretched father, wringing his hands together, stood helplessly to watch. Lilla had sunk, and his agonised gaze sought her in vain; but Paul Jones knew her whereabouts, and, arriving just as she came to the surface, put one mighty arm about her, and held her there in safety. He looked up at Medhurst and sang out cheerily—

"She's all right, old man! It's nothing more than a ducking. Don't be frightened, darling; you're all right now. No danger. Nothing but a dip and out again."

He rolled over like some monster native to the deep, and swam in shore, bearing his light burden easily. As he waded to the land, he took the child in both arms, and saw that she had fainted from the shock of fear.

"Come on to the hotel!" he bellowed to Medhurst. "There's no harm done. She'll be all right in half an hour!"

He ran to where he had left his jacket on the beach, and, folding it tightly about the child, he raced off towards the hotel with her, leaving a shining track of moisture behind him as he went. The millionaire and Dr Morris, who had arrived in time to witness the rescue, hurried after him; and Medhurst, climbing back to the footway in wild excitement, shot past them at racing speed in pursuit of the painter and his burden. They arrived at the hotel almost together.

"She's all right, the little darling," said Paul, as Medhurst came up panting. "Look at her. There's them pretty little violets opening again, and the roses coming back. Scared, wasn't you, pretty? No wonder neither. Send one of the women-folk up," he added to Medhurst, "to get these wet things off her. I'll carry her up to my own room."

The house was in a bustle for a moment, but it was soon over. Five minutes later Medhurst was seated by the artist's bed, and the child, warm and dry, and safe and sound, was lying in it beside him. He was very strongly moved, and felt that if he had tried to speak he must needs have broken into tears. Somebody had carried out Paul's portmanteau, and the young fellow, when he had changed his garments in another room, came and rapped gently at the door of his own chamber. Medhurst, rising to open the door, took him by the hand and wrung it hard, without saying a word.

"All right, old man," said Paul, himself more moved by the sight of the father's emotion than he cared to show. "How are we now? Nice and warm? That's well. I'm no great believer in wine for children as a general rule, Captain; but I don't think a little drop of port with hot water and, maybe, just half an hour's nap after it, would do any harm in this case. Shall I send it up?"

Medhurst, not yet able to trust himself to speak, nodded in assent, and Paul slipped away.

"A gallant rescue, Sir," said the old doctor, warmly, as the painter appeared upon the stairs. Paul gave his order before replying, and the old gentleman repeated his encomium, and was even so far carried from that repose which stamps the high-bred Bostonian as to pat the young Hercules on the back.

"Well, no," said Paul; "it don't take much gallantry to swim fifty yards and back in smooth water."

"It was a most providential thing," said Paul, the millionaire, "that a strong swimmer happened to be so near at hand."

"I am with you, Sir," Paul, the painter, answered. "That's another pair of shoes. That poor father's in a state!"

The recollection of Medhurst's emotion was too much for him, and he had either to be silent or to break down. He chose to be silent, and the doctor insisted upon ordering a bottle of wine and made him partake of it, though he laughed at the precaution.

Medhurst administered the port negus by the spoonful with some confused recollection of the danger of taking nourishment too rapidly after a long period of hunger. Every now and again he set the glass down to kiss the child, and altogether he experienced more emotion and became aware of a tenderer affection than any man who had known him would have given him credit for. When all the negus was consumed, he closed the jalousies at the window, and drew the curtains.

"Try to go to sleep for a little while, my darling," he whispered, "and you will wake up quite strong and well."

He took his seat by the bedside again, and, waiting there in the darkness, was struck upon a sudden by one curious and unpleasant thought. This same Paul Jones, who was *not* a millionaire, had saved his child's life, and he had won a hundred and twenty pounds from him, which the young man could ill, indeed, afford to lose. The Major had lost everything. There was a pretty heavy bill to meet at the hotel. Without that hundred and twenty pounds, the firm would be very near poverty again, and yet it began to look base to keep it. It was, of course, impossible to return it openly.

Captain Medhurst had certain natural qualifications which would have allowed him to shine as a card-conjuror, if he had cared for the sort of fame which is to be earned in that direction. He preferred to employ his cultivated gift in coaxing Fortune, whose proverbial fickleness of regard grows stable when she is courted after a certain manner. Vulgarly, to interfere with chance in a game of chance is said to be to cheat; and people who cheat at cards are held up to universal disapprobation, even by other people who cheat at cards and have not yet been detected. The only plea on which Medhurst could surrender the money was that he had won it unfairly—an altogether impossible confession. Medhurst was not a very delicate man; but everybody has his limitations, whether in the way of virtue or its opposite; and he did not like to rob poor people. Against the wealthy his method of war had a certain aspect of fairness. If a rich man risked a little money which was of no great value to him, Medhurst risked a reputation, without which he was doubly and trebly ruined. The intellectual ways of most people are full of crookedness, and to think straight is one of the rarest of human gifts. But when a man's morals have gone crooked, and his intellectual part gives itself over to the task of proving that they keep the just right line of rectitude, the sinuosities of the mental way grow curious indeed.

He thought of sending Paul the money anonymously, and could find no means of doing it which would quite divert suspicion from himself. He would be seeming to pay the painter for the child's life, and that did not look like a chivalrous thing in the circumstances. He thought of giving him a commission to paint a picture, but that would be only to get value for the money. One thing only he resolved upon—the lad should not suffer at his hands.

He thought it rather hard lines that the Major should have had his share of the winnings, and have got rid of them in so insensate a fashion. The burden would fall entirely upon himself, and when he had devised the means of taking it up he meant to bear it. Somehow, in the later years of his career, he was always beginning life anew. He felt half a spite at Paul for not being the personage he had been taken for, in which case Generosity herself could have asked no more than that he should be allowed to go scot-free for the future.

"I shall be on the hard pan again," mused the Captain. "It's deuced hard lines, as it turns out, that I never learned to swim."

Three hours later, Medhurst, Paul, and Lilla were rolling smoothly along by train towards Monte Carlo, the child surveying her own personal appearance oddly, and being subdued, and perhaps a little frightened, by the fact that she was dressed in mourning. A widow lady staying at the hotel, with a daughter of the child's age, had volunteered to Medhurst to supply a change of dress, and the offer had been gratefully accepted. The Major was at the hotel to receive them, and was so marvellously recovered from his miseries of the morning that even Medhurst was surprised, though years of intimacy had made him familiar with that transformation. There were very few mornings on which the Major had not a fit of repentance for something or other, and very few evenings on which he had not forgotten his troubles; but his remorse of that morning and his gaiety of that evening were quite phenomenal in comparison with each other.

As has already been related, the Major had been successful again at the tables, and that fact, of course, was of service to him. Beyond that, this was the evening for opening operations in earnest against Paul Jones's millions, and the splendour of his hopes illumined the Major's spirits.

Medhurst, attributing the amiable brigand's jollity to one cause alone, was all the more sombre and solemn because of it. The partnership, as he knew full well, was not going to win anything from Paul Jones that evening; and even if he had had the best will in the world to exploit his guest there was so little to win that the game would not have been worth the candle. Half-a-dozen times he resolved to take the Major out and tell him all about it, but he put off the evil moment. It would be time enough by-and-by.

Paul and the Major had never been such admirable companions as they were that evening. They told stories against one another, and roared at each other's jokes until the very waiters, to whom their conversation was a foreign mystery, could not refrain from smiling. Medhurst sat very gloomy and silent through it all, until upon a sudden he likewise brightened up.

When the table was cleared it was Medhurst who made the first allusion to the cards.

"Come," said he to Paul, "you must have your revenge."

Paul, nothing loth, drew up to the table, produced his handful of money, and prepared for the combat. The Major was an excellent confederate, but Medhurst was the master spirit of the two, and the Daisy followed his lead with the most implicit confidence. The leader was relieved to see the Major pull out a small handful of gold from his pocket. At least, he thought, there would be a little left to begin the world anew upon.

There was one peculiarity in the game on which Paul Jones had not counted. If he had known it he might, possibly, have decided not to play with these two extremely dexterous gentlemen. The peculiarity was simply that when Medhurst dealt he knew every card Paul and the Major held, and that when the Major dealt he occupied the same position of advantage.

Medhurst dealt the first hand, doling out worthless cards to himself and the Major, and giving Paul a hand of unusual excellence. The Major immediately followed his colleague's tactics. They pleased him well, because they made it evident to him that Medhurst was going to make his great splash that evening, and was simply paving the way to an increase of the stakes. Paul had never had such luck in his life, and he and the Major roared with laughter over one particular deal, when at the conclusion of a hand the cards were exposed. On a sudden, to the Major's intense astonishment, Medhurst pushed back his chair from the table, and arose.

"That will do," he said, "I am out of sorts to-night, and I shall play no more."

"What on earth's the matter with you?" cried the Major.

"I'm out of sorts," said Medhurst, "I shall play no more."

"Oh! very well," said the Major, sulkily. "If you like to break up the party"——

"Yes," said Medhurst: "if you put it that way, I like to break up the party."

But that this was plainly equivalent to a command, the Major would have challenged his supposed millionaire to a single encounter. As it was he left the room grumpily, and Medhurst, resuming his seat at the table, addressed Paul, who was a little astonished at the sudden cessation of play. When Medhurst chose he could be very dignified and suave, and he put on his best manner now.

"I daresay," he began, "that I shall surprise you by what I am going to say, but I shall beg you not to be hurt by it. I am a good deal older than yourself, and, if I may say so without offence, more of a man of the world. My friend, Major De Vere, is one of the richest men in England, and one of the heaviest and most daring gamblers in the world. For example, he lost twenty thousand pounds last night at the tables here, and set everybody talking about his *sangfroid* and the tremendous character of his play. Now, Major De Vere made an odd little mistake about you, which I discovered only yesterday. Do you happen to know that there is a person of your own name now in the Riviera, and, like yourself, an American, who is said to be one of the richest men in the States?"

"I know there is such a man; I didn't know that he was in the Riviera."

"I have met him here," said Medhurst, gravely, "and so have you."

"The dooce I have!" said Paul, staring.

"Unless I am very much mistaken," answered Medhurst, "he is travelling under the name of Morton, and he stayed at the same hotel with us in Paris." At this announcement Paul fell back into his chair and emitted a long whistle of astonishment. "He has probably assumed the name for the sake of privacy. Whatever his motive may be, we are justified in presuming it to be honourable and blameless. And now comes my explanation. When my friend Major De Vere learned yesterday, for the first time, that Mr. Paul Jones the millionaire had stayed in the same hotel with us in Paris, he leaped naturally to the conclusion that you were that fortunate personage, and in his reckless and jovial way, which by this time you know so well, he said to me that here was an opponent worthy of his steel, and that he would take such a game with you as should set the whole confederation of cardplayers in England and America quite agog. I believe," said Medhurst, with an unmoved countenance, "that he has ordered a hundred thousand pounds to be set to his credit here in order that he might meet you. I did not undeceive him, though I had a rather distinct memory of the millionaire, who was pointed out to me at a reception of Mr. Vanderbilt's in New York last year. And now, perhaps, you may see why I stopped the game when Fortune had restored to you something like the sum you had already lost to us. I hoped for that chance to happen; and I will tell my friend De Vere the facts of the case—or will keep them between ourselves, just as you choose."

"Tell him, by all means!" said Paul. "*I* don't want to pass for a millionaire: I can't afford it!"

"And, will you, my dear Jones," continued Medhurst with an almost fatherly air, "permit me to offer you a word of advice? Don't gamble. De Vere and I play high; and for me to preach against gambling is very like the Devil reproving sin; but our incomes are assured, and our lives are empty of interest. You, with your delightful art and your splendid talents, have a great career before you. Don't run any risk of losing it by getting absorbed in the mad excitement of the gaming-table. I have seen more promising young men ruined in that fashion than I care to say. I need not tell you how

THE INTERNATIONAL FUR STORE,

Fashionable Furriers,

FRY'S PURE COCOA

38 PRIZE MEDALS

AWARDED TO THE FIRM.

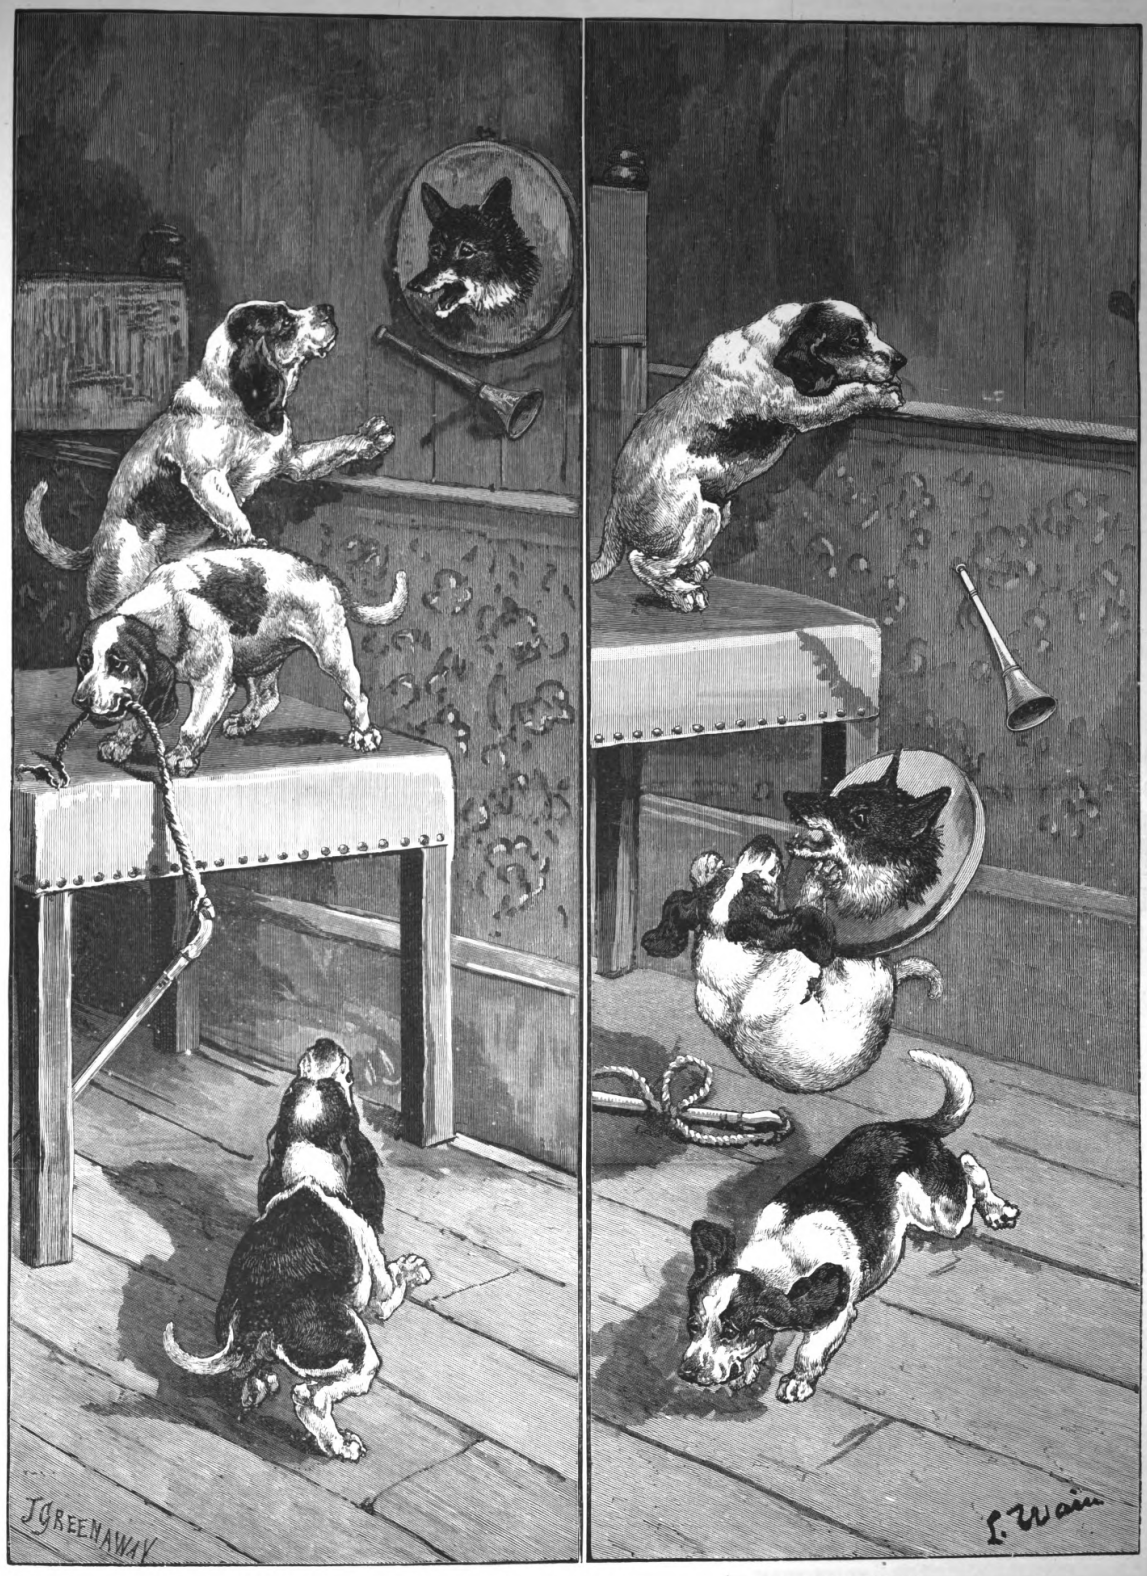
PURE CONCENTRATED COCOA.

Prepared by a new and special scientific process, securing extreme solubility, and developing the finest flavour of the Cocoa.

Sir C. A. CAMERON, M.D., President of the Royal College of Surgeons, Ireland, &c.—"I have never tasted Cocoa that I like so well, and I strongly recommend it as a substitute for tea for young persons."

J. WYBRANTS OLPHERTS, M.D.—"I find it the most agreeable beverage of the kind I have ever tasted, delicious both in flavour and odour, most wholesome and easy of digestion."

Dr. N. C. WHYTE, Coroner for the City of Dublin.—"There are innumerable varieties of Cocoa, but to my mind incomparably the best is Fry's Pure Concentrated Cocoa. I have been using it myself for some time with manifest advantage."



W. H. R. STANLEY, M.D.—"I consider it a very rich, delicious Cocoa. It is highly Concentrated, and therefore economical as a family food. It is the drink *par excellence* for children, and gives no trouble in making."

HALF A TEA-SPOONFUL IS SUFFICIENT TO MAKE A CUP OF MOST DELICIOUS COCOA.

This choice preparation of Cocoa makes a delightful beverage for Breakfast or Supper. Being exceedingly nutritious, easily digested and assimilated, it forms a valuable food for invalids and children.

J. S. FRY & SONS, BRISTOL, LONDON, AND SYDNEY, N.S.W., MAKERS TO THE QUEEN AND PRINCE OF WALES.

☛ BE CAREFUL TO ASK FOR "FRY'S PURE CONCENTRATED COCOA."

Drawn by Louis Wain.

TALLY-HO!

As three young hounds sniffed round the hall,
One caught a glimpse of Reynard's head,
Placed as a trophy 'gainst the wall;
And so, not knowing it was dead,
True to his breed, he gave a bound,
And brought the fox-head to the ground.

GONE AWAY!

Yea, down the huntsman's trophy came,
And down his horn came rattling too;
In such a racket small the blame
Young hounds some trepidation knew.
Scared by the sight they yelping fled,
Whom foxes soon will flee with dread.

much the interest I originally felt in you has been deepened by the event of this afternoon."

He had been lying like a Trojan, and I suppose that at his best in these days he was pretty much of a knave, taking him by and large, as the seafaring folk say. But here he was genuinely moved, and his voice stuck in his throat so that he had to "hem" and "ha" considerably before he could make way for it.

"If I could induce you to promise," he went on, "that you would never touch a card again, I should believe myself almost to have repaid you to-day's inestimable service."

The young Paul was easily moved at any time, and both on account of the service he had done, and the kindness he had received, his heart warmed to his adviser.

"That 's a bargain, Captain Medhurst," he said, holding out his hand.

"I am very much obliged to you," Medhurst answered, simply, and almost at that moment the Major re-entered.

"I say, Major De Vere," cried Paul, "you 'll have to find somebody else to spend that hundred thousand pounds sterling on. It won't come into my pockets."

The Major looked with a transient bewilderment at Medhurst, who telegraphed him by a wink and a nod of the head from behind Paul's shoulder.

"That 's a bit of a pity for you, isn't it?" said the Major.

"Well, yes," said Paul. "And it 's even a bit more of a pity than it would have been if I'd been the man you took me for."

Medhurst slid in with a smooth explanation, and Paul, catching the humorous side of it and going off into a great shout of laughter, the Major, by an heroic effort, found presence of mind to start another, and being once started he laughed almost hysterically, until he and Paul sat opposite to each other exhausted, and with tears in their eyes.

So the firm's credit was saved, and young Paul was saved, and the confederates were at least no worse off than they had been. But so curiously is the human mind constructed that when the Major heard the story at full he almost worshipped Medhurst for his self-abnegation. There was only one regret in his mind about the whole matter. Captain Medhurst's honour was upon occasion impeached in his hearing, and there were circumstances even in this heroic self-surrender which made it impossible to clear him by relating t.

FINIS.

Our Coloured Illustrations.

"A DAUGHTER OF EVE."

You brown-eyed beauty, so sedate,
There sitting still, in simple state,
What are you thinking of, I wonder?
What knotty problem do you ponder?
Is it of some tough rule of grammar,
That you into your head would hammer?
Perhaps a sum in Rule-of-three
Just puzzles you as it did me?
Or is it of that dress, span new,
Which dear Mamma has promised you,
For that grand party where you 're going?
Whate'er your thoughts, there is no knowing
What the most simple one may be,
Unless you hand us o'er the key—
Not so secure the secret hid
Within old Cheops' pyramid.
Open your heart for but a minute,
That we may see what 's stirring in it.
No feelings there find dwelling place,
I 'm sure, save those of tenderest grace;
For don't your features just express
The spirit's inner loveliness?

But though we cannot guess one thought
Within your fancy's meshes caught,
Yet know we what your life will be,
Without the gift of prophecy:
For, being Eve's fair daughter, you
Must feel life's joys and sorrows too.
Yes, you will have strange fluctuations
Of tranquil joys and tribulations;
Despondent moods and hopes elastic,
Grave sober bliss and thoughts fantastic.
Time now with feet of lead will creep,
Anon with soaring pinions sweep.
Thick darkness, like a funeral pall,
At times will gather, blackening all;
And then life's sun, in the ascendant,
Will flash his glorious rays resplendent.

Eve's daughter fair, we wish for you
Friends in abundance, warm and true—
The primest blessing here below,
Save one, that mortals e'er can know;
And may that one be yours as well
When you a few more years can tell:
Enchant some faithful heart, and give
Your own—Love's joy superlative.
Thus blest and blessing, you shall feel
The choicest bliss life can reveal.

JOHN LASH LATEY.

"A-HUNTING WE WILL GO."

"Hark forrard! Yoicks! Tally-ho!
This morn a-hunting we will go!"
Thus sang or shouted out young Golder,
With his pet niece upon his shoulder;
And she, transported, waved his whip,
Loud shouting in companionship.
They chatted gaily as they went,
Discussing this and that event;
She from her elevated sphere
Whispering her thanks into his ear.
"Dear Uncle Joe, you are so kind;
You 'll spoil me, if you do not mind.
Why that dear pony which you gave—
Only, you said, my neck to save—
It is the sweetest, quietest,
And of all ponies quite the best.
And now you say, when I am grown
You 'll give a hunter, all my own,
With which the hounds I then may follow—
Oh, won't I beat Miss Tallant hollow?
I 'll take the hedges as I 've seen
You clear them on your Beauty Queen.
Oh, thanks, dear Uncle! Will you see
What brother Tom has given me—
Such funny things—a guinea-pig,
That dances oft the queerest jig;
Two hedgehogs, with their prickly hides;
A ferret, and a lot besides?
You can't come now! Well, never mind;
Good-bye! You mustn't be behind.

Oh, there they are, and what a sight!
The men so gay and ladies bright;
And there, at last, comes Uncle Joe—
The very bravest of the show.
They 're off: hurray! with three times three!
Dear Uncle, bring the brush to me!"—J. L. L.

"CHARMING KATE."

A ball-room belle was charming Kate, who took the town by storm;
In her first heyday, quite elate, and with affections warm,
She ran the round of youthful joys in gaiety of soul,
And gladly saw her name inscribed on Fashion's muster-roll.
Beaux fluttered round her, so that she could pick and choose at will;
But soon the gay scene palled on her, and left her craving still.
She looked around upon the world, saw the vast misery there,
And soon, by gaiety oppressed, shrank back from Pleasure's glare.
So, throwing off her gay attire, and drest in sober guise,
She seeks the homes of poverty, and many a want supplies;
But most by gentle courtesy of sympathising care,
And tending sick-beds tenderly, she lightens anguish there.
Sweet was the admiration she in ball-rooms gained before,
But sweeter far the reverent love of her devoted poor.—J. L. L.

DINING-ROOM FURNITURE.

DINING-ROOM FURNITURE.

MAPLE and CO., Manufacturers of DINING-ROOM FURNITURE. The largest assortment to choose from, as well as the best possible value. Three more houses have been added to this important department. Half a century's reputation.—Illustrated Catalogues post-free.

MAPLE & CO., London, Paris, Smyrna, and Calle Florida, Buenos Ayres.

SPECIMEN DINING-ROOMS.

SPECIMEN DINING-ROOMS.

MAPLE and CO.'S NEW SPECIMEN DINING-ROOMS, decorated and fully appointed with furniture in pollard oak, brown oak, Chippendale mahogany, antique carved oak, American walnut, and other woods, are now open to the public, and should be seen by all intending purchasers.

THIRTY SPECIMEN ROOMS.

THE SPECIMEN ROOMS at Messrs. MAPLE and CO.'S are good examples of HIGH-CLASS DECORATIVE FURNISHING, carried out in perfect taste, without extravagant expenditure. Everyone about to furnish or rearrange their residences, should by all means inspect these apartments.

THESE ROOMS are not only helpful as showing the effect of the furniture when arranged in an apartment, but also most suggestive as regards decorative treatment, as well as a guide to the entire cost of furnishing in any selected style.—MAPLE and CO., Decorators and Furnishers.

DECORATIONS.

EXHIBITION of DECORATIVE ART. EXAMPLES of ART DECORATIONS in Carton-pierre, Tynecastle Tapestry, Lincrusta, Japanese and Flock Papers, Silk, Tapestry, and Japanese Embroidered Panels, Cretonne, Eastern Rugs and Mattings, Hand-painted Friezes, and Interior woodwork. Thirty Specimen-rooms, constituting a unique exhibition of Decorative Art, are now open to visitors.

MAPLE and CO.'S CARPETS.

MAPLE and CO.'S BRUSSELS CARPETS.—MAPLE and CO. have always in stock Brussels Carpets made to stand the test of daily use, both as regards texture and colourings. In fact, their carpets for hard, street-like wear have become almost proverbial.

CARPETS for HARD, STREET-LIKE WEAR.—MAPLE and CO.'S No. 4 quality is an extra stout Brussels Carpet, suitable for rooms where there is constant tread, and woven with regard to durability rather than elaboration of design. A bordered Carpet of this grade, 9 ft. by 9 ft., can be had for forty shillings.

CARPETS for HARD, STREET-LIKE WEAR.—The "Maple" Brand Brussels Carpet is a special extra quality, made of selected yarns, and in all the designs and colourings for 1888, including some most wonderful replications of famous Eastern Carpets. This quality cannot fail to afford permanent satisfaction in use.

TURKEY CARPETS.

A TURKEY CARPET is, above all others, the most suitable for the dining-room, its agreeable warmth of colouring enhancing the effect of the furniture and decorations, and indicating alike the good taste and comfortable circumstances of its possessor.

TURKEY CARPETS.—MAPLE and CO. are the very largest importers of Turkey Carpets; and having a Branch House at Smyrna, with agency at Ouchak, the centre of the weaving district, are able to exercise close supervision over the whole process of manufacture, which is the only way in which excellence of colouring and workmanship can be guaranteed.

NO MORE SLAMMING OF DOORS.

"THE COLUMBIA"
DOOR CHECK & SPRING.

This invention might appropriately be called the
"PHANTOM DOOR CLOSER,"
for it is almost supernatural in its action, and never fails to close a door silently as if guided by the human hand.

INDISPENSABLE WHERE QUIET IS NECESSARY.
ALL DRAUGHTS AVOIDED.
INDISPENSABLE for the DOORS OF
Hotels, Churches, Theatres, Banking Houses, Law Courts, Post Offices, School-houses, Hospitals, Public Buildings of all kinds, Shops, Warehouses, Counting-houses, Private Dwellings, Railway Waiting-rooms, Railway Carriages, Steam-ships, &c., and in fact for all doors, large or small, which are liable to slam. Send for Illustrated Circular. Chief Dépôt in Great Britain: 46, HOLBORN VIADUCT, LONDON, E.C.

HIMROD'S
CURE FOR ASTHMA.

MISS EMILY FAITHFULL, in "THREE VISITS TO AMERICA," thus writes respecting an interview with OLIVER WENDELL HOLMES:—"As a fellow-sufferer from Asthma, we had early found a bond of sympathy in discussing a complaint which had hitherto baffled the science of the whole world, though America must have the credit of the discovery of the best palliative I know—viz.,

HIMROD'S ASTHMA POWDER,

from the fumes of which I have invariably derived the greatest possible relief. Some years ago I gave it to Dr. Morell Mackenzie, of London, who has found it of inestimable value to suffering from that painful malady here. I have tried every remedy ever invented, and HIMROD'S CURE is the only one in which I have absolute confidence." HIMROD'S CURE, per Tin, 4s.; or, post-free, 4s. 3d. British Depot: 46, Holborn Viaduct, London, E.C. Samples free by post.

This Food should be tried wherever other nourishment has not proved entirely satisfactory.
It is already Cooked—Requires neither boiling nor straining—Is made in a minute.

MONTSERRAT TRADE MARK.
PURE LIME-FRUIT JUICE.

It can be had everywhere, in Imperial Quarts and Pints, can be diluted and sweetened to taste, and is far stronger than any other. See name of Sole Consignees, EVANS, SONS, and CO., is on the capsule and label of each Bottle.

The "Lancet" says:—"We counsel the public to drink their Lime-juice, a far more wholesome drink than any form of alcohol. We have subjected the samples of the 'Lime-Fruit Juice' of the Montserrat Company to a full analysis, with a view to test its quality and purity. We have found it to be in SOUND CONDITION, and ENTIRELY FREE FROM ADULTERATION."

HARNESS'

ELECTROPATHIC BATTERY BELT

Can only be obtained from HARNESS' Electropathic Establishment, 52, OXFORD-STREET, London, W.

The only Guaranteed Genuine Galvanic Curative Appliance recommended by the Leading Medical and Scientific Authorities.

LADIES
Suffering from Diseases peculiar to their sex, should read Mr. HARNESS' new Pamphlet, entitled "Electricity," gratis and POST FREE.

IF YOU ARE SUFFERING from any slight derangement, with the cause of which you are acquainted, you will find that HARNESS' ELECTROPATHIC BELT affords a perfect means for the self-application of Curative Electricity. It is comfortable to wear, produces no shock, and is absolutely certain to do good in every case. The thousands of testimonials in favour of HARNESS' ELECTROPATHIC BELT speak for themselves. A large number of them are published in "HARNESS' GUIDE TO HEALTH," gratis and post-free; but sufferers are invited to call, if possible, at 52, OXFORD-STREET, London, W. (corner of Rathbone-place), and personally examine the testimonials respecting the cases. IF YOU HAVE ANY REASON to fear that your sufferings are serious or complicated, you are recommended to call; or, if you reside at a distance, to write for a private "Advice Form," which will be sent you by post (with Pamphlet), free of charge.

ALL IN SEARCH OF HEALTH should wear Harness' world-famed Electropathic Belt.

MR. C. B. HARNESS, Consulting Medical Electrician (President of the British Association of Medical Electricians), attends daily at 52, OXFORD-STREET, London, W., and gives ADVICE FREE OF CHARGE on all matters relating to Health and the application of Curative Electricity. If you cannot call, write for Private Advice Form, and full particulars of Mr. HARNESS' Celebrated

"ELECTROPATHIC" TREATMENT.

GENTLEMEN
Suffering from BRAIN-FAG and Nervous Disorders, Impaired Vitality, &c., should read Mr. HARNESS' new Pamphlet, entitled "Galvanic Electricity," gratis and POST FREE.

Mr. HARNESS should be consulted at once, either personally or by letter, by all who suffer from

Rheumatism,	Kidney Diseases,	Neuralgia,
Lumbago,	Epilepsy,	Female Disorders,
Sciatica, Gout,	Paralysis,	Liver Complaint,
Nervous Exhaustion,	Spinal Weakness,	Consumption,
Sleeplessness,	Indigestion,	General and Local Debility,
Brain Fag,	Constipation,	Functional Disorders, &c.

HARNESS' ELECTROPATHIC APPLIANCES
Promptly, Absolutely, and Permanently CURE.

MEN AND WOMEN
Who wear HARNESS' world-famed ELECTROPATHIC BELT find that it promptly Restores Impaired Vital Energy, Invigorates the Debilitated Constitution, Stimulates the Organic Actions, Promotes the Circulation, Assists Digestion, and promptly Renews that Vital Energy, the loss of which is the first symptom of decay. Healthy Properties are Multiplied; it Stimulates the Functions of Various Organs, increases their secretions, Gives Tone to Muscles and Nerves, Relaxes Morbid Contractions, Improves Nutrition, and Renews Exhausted Nerve Force. Acting Directly on the System, it Sustains and Assists its Various Functions, and thus Promotes the Health and Vigour of the entire Frame.

HARD FACTS. Every advertised article is not a fraud and a delusion. Thousands of Patients gratefully remember the day they saw our advertisement, and gave the natural and rational system of ELECTROPATHY a trial.

HARD FACTS. The few Testimonials in favour of Electropathy published herewith are not written to order nor by a few personal friends—they are from utter strangers, and are taken indiscriminately from thousands of unsolicited reports received, which may be seen by anyone interested at Mr. C. B. HARNESS' Consulting Rooms, 52, OXFORD-STREET, London, W.

HARD FACTS. Electricity is not simply something to make the muscles contract and jump. The healing properties of Electricity, as exhibited under Harness' world-famed "Electropathic" Treatment, are multifarious.

Pamphlet and Advice Free, personally or by Letter.

NOTE ONLY ADDRESS; and if you want to be permanently and speedily Cured, without medicine, DISCARD PREJUDICE; call and inspect the original testimonials, and personally examine Mr. HARNESS' numerous Curative Electrical Appliances, all of which are guaranteed genuine.

THE FOLLOWING ARE A FEW EXTRACTS from the thousands of unsolicited

TESTIMONIALS

received by Mr. Harness. The public are invited to call and inspect the Originals at the Electropathic Consulting Rooms, 52, Oxford-street, W.:—

"BETTER IN EVERY WAY."

CONSTIPATION & LADIES' AILMENTS.—"Portmore House, Weybridge.—Dear Sir,—Since wearing Harness' Electropathic Belt my health has been better in every way, and I would not like to be without it. Before I wore the Belt I suffered such pain every month from my waist to the knees, which often went to my head and affected my eyesight for a little time; but I am happy to say these pains have never returned. I tried all sorts of medicine with no good results, but from wearing your Electropathic Belt I am now in the best of health, and cannot thank you too much for it.—Yours truly, H. JONES."

"HAVE EVERY CONFIDENCE."

NERVOUS DERANGEMENT.—"5, New Steine, Brighton.—Dear Sir,—I beg to acknowledge with many thanks the benefit I have derived from wearing your Electropathic Belt. I have every confidence in recommending your appliances and treatment whenever I have an opportunity.—Yours truly, M. GREEN."

"DISEASE ENTIRELY LEFT ME."

EPILEPSY.—ARTHUR HEPWELL, Esq., Wood-road, Geddington, Kettering, June 4, 1888, writes:—"I cannot speak too highly of your Electropathic treatment, it has been a great boon to me. I used to have fits several times a day, but now I have none, and the peculiar sensations incidental to this distressing disease entirely left me after wearing your appliances."

"COMPLETELY CURED."

SCIATICA.—Mr. R. J. WATSON, Proprietor, *Harwich Free Press*, 13, Market-street, Harwich, writes:—"Harness' Electropathic Belt has completely cured me of sciatica. After wearing it for a week I got relief, and have gradually been getting better, and am now quite free from pain."

"NERVOUS ENERGY AUGMENTED."

PAINS IN THE BACK.—The Rev. R. ANTRIM, Vicar of Slapton, King's Bridge, South Devon, writes:—"The pain across the loins has quite left me. My nervous energy is greatly augmented since wearing Harness' Electropathic Belt."

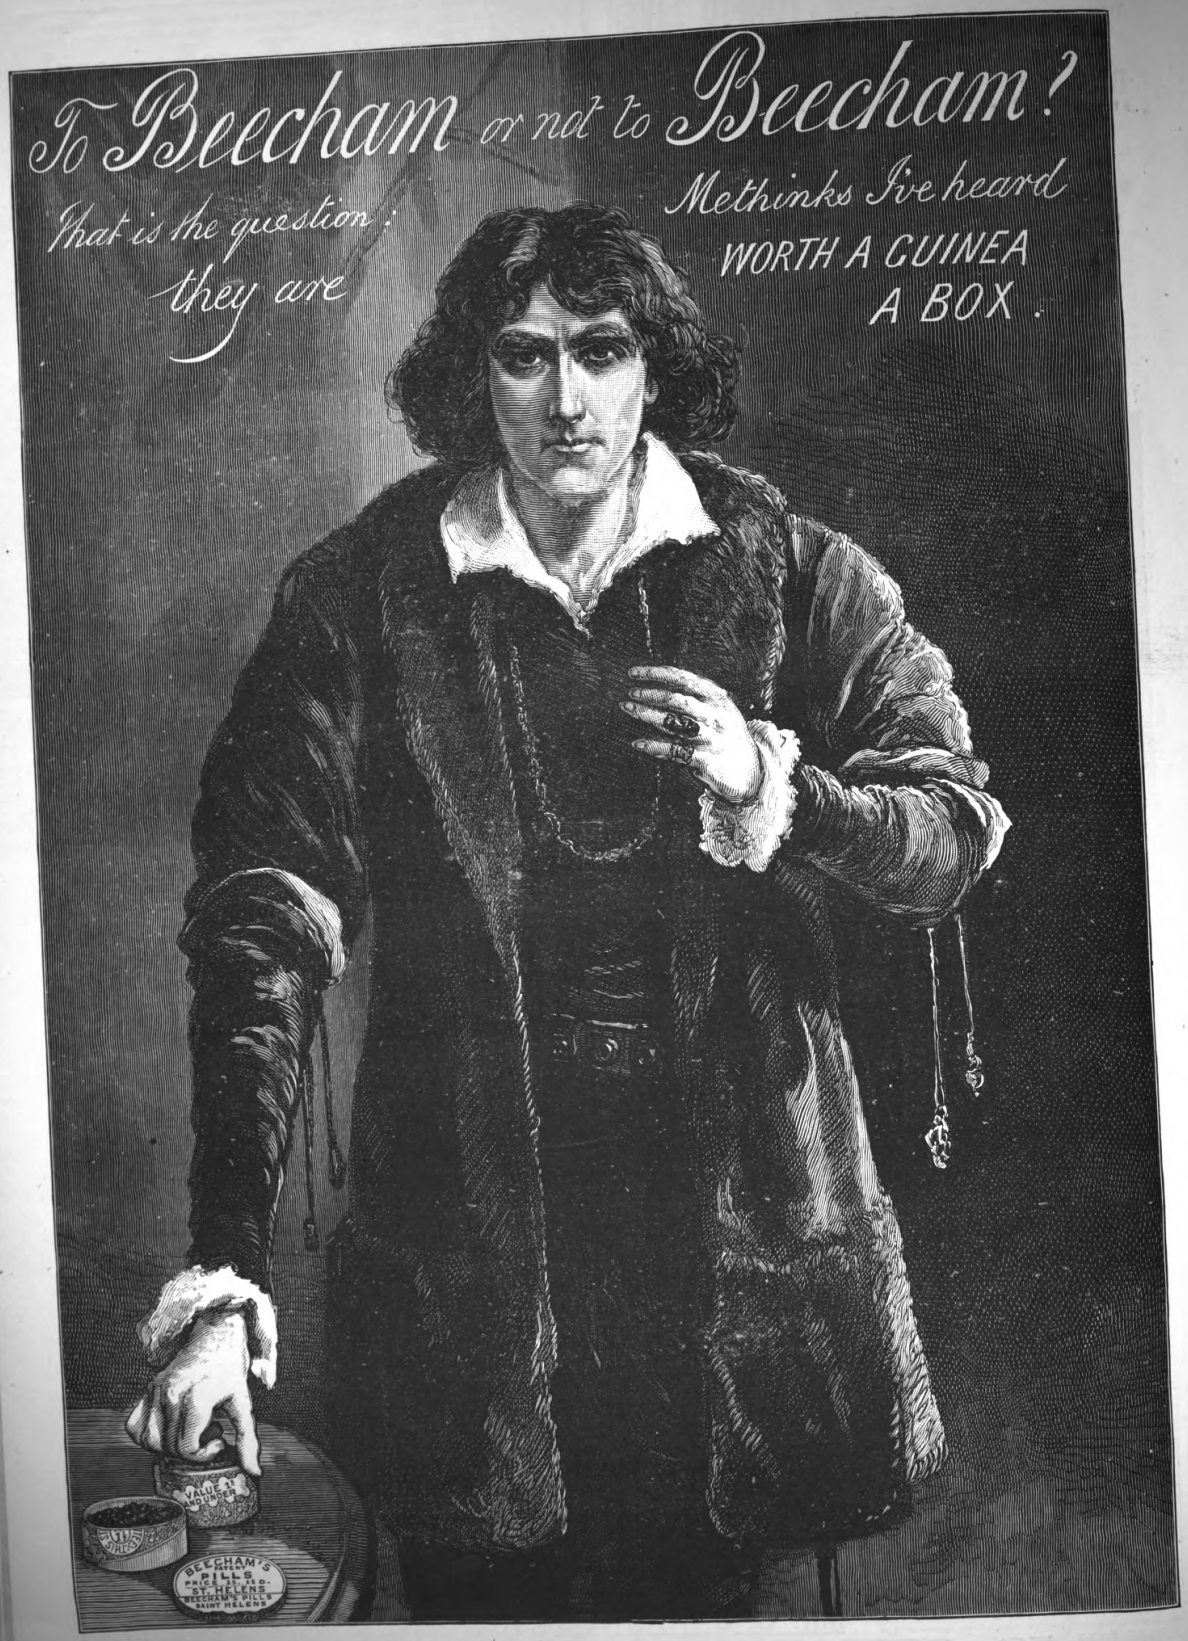
"INVALUABLE."

NERVOUS PROSTRATION.—Mrs. POWELL, 4, Dulwich-road, London, S.E., writes:—"All my ailments are gradually yielding to your invaluable Electropathic appliances."

"BETTER IN EVERY WAY."

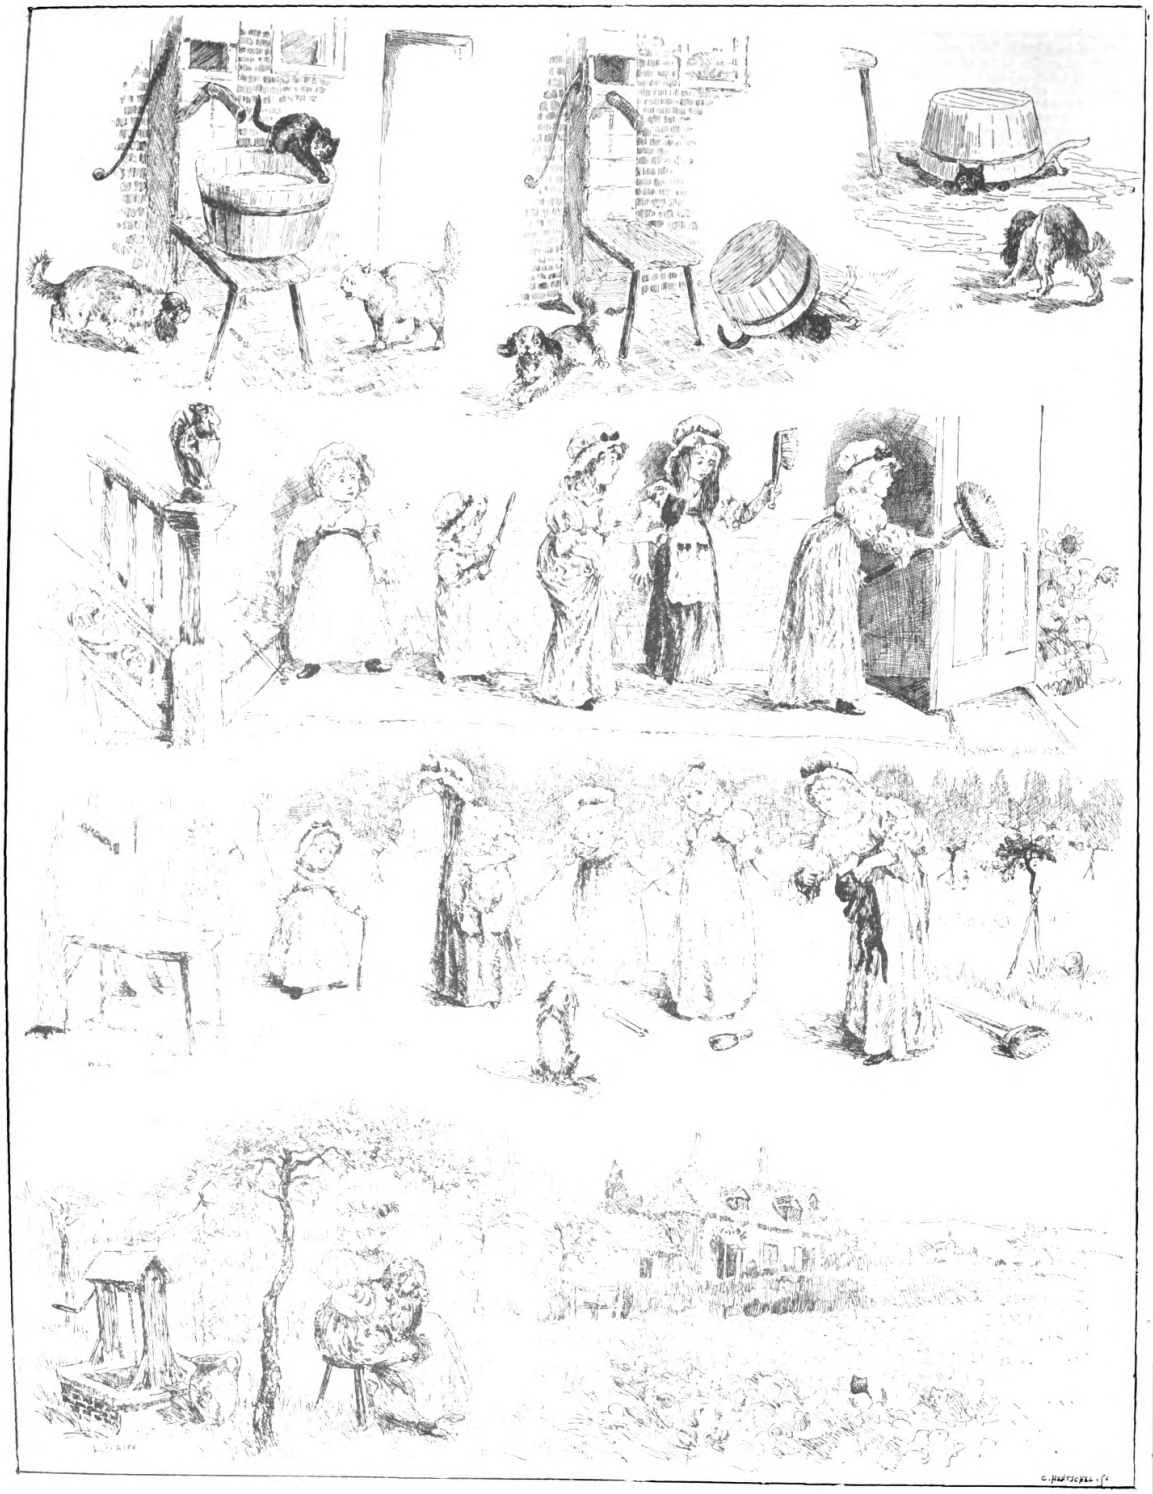
SLUGGISH LIVER.—Mrs. M. ANDERSON, Mortimer-street, Herne Bay, Kent, writes:—"I was suffering from a *torpid, inactive* liver, accompanied by *Constipation* and *Indigestion*. After wearing the Electropathic Belt I am much better in every way; the functions are regular, my appetite has improved, and the wretched depressed feeling I used constantly to have has completely passed away."

"A NEW MAN."



PARALYSIS.—ROBERT ROTHWELL, Esq., 9, Cooke-st., Hulme, Manchester, June 8, 1888, writes:—"The Electropathic Belt my father purchased for *loss of nerve power* and *paralysis* has made a new man of him, and it was only the other day that he told me he would have been in his grave long ago if it had not been for your valuable Electropathic treatment."

RESIDENTS AT A DISTANCE, and those unable to call, should write for "Private Advice Form," which will be sent, together with Pamphlet and Copies of Testimonials, post-free to any address on application to



MR. C. B. HARNESS,

NOTE ONLY ADDRESS— 52, OXFORD-STREET, LONDON, W.

Consulting Medical Electrician, THE MEDICAL BATTERY CO., LIMITED.
(CORNER OF RATHBONE-PLACE.)

(With apologies to our greatest Poet, and our most renowned Actor.)

O the barking and the mewing!
Some dire mischief sure is brewing.
Five fair girls go to find out
What the hubbub is about;
Armed with household weapons, they
Grope with fear their trembling way.

A DOMESTIC TROUBLE.

Drawn by Louis Wain.

Stops at once the running fight
As the maidens come in sight.
First the doggie has a scolding,
While two girls the cats are holding;
Then one maid, the rest departed,
Nurses doggie, broken-hearted.

CHRISTMAS VOICES.

That "roar of voices" which goes up from our mighty metropolis with so tremendous a sound has in it nothing so profoundly impressive to the mind as those more various and significant voices which break in upon the solitude of the thinker as he sits, alone, by the Christmas fire. It was well that the Christian Church, by seizing on the pagan festival, and consecrating it with a new and holy interest which its members could not but joyfully recognise, provided us with an opportunity of resting from our sordid pursuits—from "the weariness, the fever, and the fret" of the struggling, grasping world—and thus of taking stock, as it were, of the things of the past; for these pauses in the battle of life, when for ever so brief an interval the clang of the chariots and the contentions of the armed men cease from the land, must needs refresh and invigorate the soul, and keep alive in it those purer sensibilities, those higher impulses, which might otherwise desert us altogether, as the fragrance fades from the flower which is shut up always in the darkness. Are not all of us the better for the voyages which Memory on such occasions makes across the gulf of the years, bringing back from the shores that are constantly receding further and further from us much happy spoil and treasures of the days gone by? But it is then, too, that the voices swell tumultuously, as it were, upon the breeze, and haunt us in our still and solitary hours. To those who have reached the term of middle age—whose lives lie mainly in the past, it is, indeed and in truth, "a roar of voices!" How numerous they are—how conflicting, how varied in their tones—how diversified in their meaning! Listen, listen, to them with patience and fortitude, and you may separate and distinguish each from the other; for no two are alike—the refrain is never, never the same.

Can you not, for instance, single out the voices of those bright ambitions which filled your youth with their radiant illusions? Those bold, buoyant ambitions which went forth so cheerily into the future, and counted so securely on accomplishing their aims? And those golden hopes, which floated before your enchanted vision as thick as the motes i' the sunbeam, rising gaily above the mean earth, like Ariosto's hippogriff, that great and marvellous bird (*grande e strano augello*) into "the higher regions"—can you not hear the doleful voices which remind you of their speedy disappointment? The sound is like that of moaning waves round shattered wrecks, cruel waves that toss to and fro the broken spars to which despairing castaways no longer cling. Alas! you sigh, as you hearken; you sigh over that unfulfilled promise, over that crop of thistles—*spem mentita seges*, as Horace puts it—the barren harvest which so cruelly falsified your expectations! And next your straining ear catches the sorrowful voices which breathe the dirge of parted friendships; and the sweeter, tenderer, though sadder, voices which come from the graves of those you have loved and lost—lost only for a while, however, as Faith whispers in tones of consolation—the father, the mother, the sister, or, perhaps, the wife whom you treasured as "the other half of your soul," the complement of your being, the light and joy of your existence; or, it may be, the fair young girl who was snatched from your fond embrace even before the orange-blossoms had been woven in her bridal wreath. These are voices which, perhaps, are never wholly absent from you; but in the Christmas time they seem, I think, to draw closer, and to thrill us with a deeper consciousness, as if some beloved presence were mysteriously watching and waiting by our side—as if we felt the passing touch of angel-wings. And they travel to us from afar, those sweet, sad, tender voices! The chances and changes of life separate us from the scenes of our early years; separate us from the graves in which we have buried so much that was nearest and dearest and most precious; but no distance can keep back the voices of love and affection when the heart, touched by the magic of immortal memories, is prepared to open to them.

Sometimes with the Christmas voices mingles a glad noise of laughter; for, happily, life is not all made up of partings and passions, of disappointments and failures. It has its moments—and, thank God, there are many of them!—its moments of happiness, when skies are blue, and birds sing on the bough, and our human sympathies are kindled into quick life by the ecstasy of the sunshine. So the holidays of life send their mirthful voices to blend with the deeper and more serious sounds that compose, in our later age, the burden of our Christmas song. The blithe voices of our school-days, of our merry-makings, of our early Christmases; and then the voices of the bright hopeful days of our young manhood; the lively echoes of the crowded theatre; the strains that floated round gay ball-rooms; the jests of the masquers and the mummers; the lilt of the old, old songs and the rhythm of the favourite dance—all these voices of frank cheerfulness and innocent gaiety enliven us with a sudden sense of enjoyment.

But it may be that voices of ominous import will insist upon blurring this felicitous harmony with their pitiful discords; the follies of the past, its errors and its sins—the recollections of wrong said and thought and done—these, in the Christmas silence, you cannot stifle. Sharp and clear, their accusing accents pierce the heart, awakening there the keen pangs of regret, and, let us hope, of repentance. These are voices which surely none of us can hear unmoved; their echoes seem to reverberate round about, like thunder among the mountains, and to roll onward into the awful spaces of eternity. As we sow, my friend, so must we reap. They are voices of our own making; and it is part of our punishment that they should break through our everyday indifference, and, in our sessions of silent thought, compel us to hear them, and to ponder over the tales they tell. Hushed into oblivion they will not be; like the ghost of murdered Banquo they suddenly start up to affright us; but, at least, we may learn to bear their solemn reproaches with resignation by lifting up our hearts to the lofty voices of sweet promise which ring out from the sanctuary, and bear a comforting assurance of the measurelessness of the Divine love!

Of all the Christmas voices audible now—he that hath ears to hear, let him hear!—it is difficult to compute the sum; but I fancy that many of us will not least eagerly welcome those which descend, "like showers of golden rain," from the heights where sit enthroned the master minstrels and the famous singing-men; the bland, deep, universal tones of Shakspeare; the solemn organ-notes of Milton; the grave, full harmonics of Dante; the intense fervent strains of Calderon; and Spenser's subtly melodious song. With these we may gather up the passion and the pathos, the grandeur and the awe and the devotion of the kings of music from Purcell to Beethoven; the simple, unpretending strains of the carol singers; the silver-sounding chimes of the Christmas bells; the pure, sweet hymns of the children—for all are part and parcel of the Christmas-time, and help to swell the volume of our Christmas voices.

To the young, the voices of the Christmas are neither so numerous nor so full of emotion. Their contact with life has been so limited; they have seen so little and felt so little; they stand as yet upon the threshold only of the battlefield; they can scarcely hear the ring of contending weapons, nor the sounds of anger and strife, and breathless, rapid action—their ways have been ways of pleasantness, and their paths have been paths of peace. The voice of hope is theirs, joyous and fresh as the lark's song in the azure solitudes of heaven; the voice of young ambition, defiant and exultant, like the sound of a trumpet; the voice of high endeavour, ringing as clearly and as blithely as a clarion! Ah, happy, happy youth! No sad voices from the graveyard, no accusing voices from the scenes of folly, no melancholy voices of failure and disappointment, mar for you the sweetness of the Christmas music. If you did but know for how much you have to be grateful! If you did but know all the opportunities of the days which are gliding by so swiftly! Ah, me! why does experience teach us its bitter lessons when it is too late for us to profit by them? The young mother, the young husband, the young lover, the young scholar, the young adventurer, what glorious voices ring in their charmed ears as the light from the Yule log flickers over their happy faces; and how little they think of those more solemn voices which the years must bring to them as to all the sons and daughters of men! But for both young and old there are other voices to which, while the merry Christmas bells are clashing from spire and steeple, we must not refuse to listen—the wail, the lament of the poor and suffering; the sighs of the half-starved outcast; the groans of those who have gone down in the battle, and are lying on the lost field, bleeding from many wounds. The poor, it is true, are always with us; but surely the cry of Poverty comes upon the ear with the sharpest force when we feel its contrast to the laughter and song and jest of the Christmas of the well-to-do. Let us not be deaf, my friends, to those sorrowful, sorrowing voices! Each, in his degree and measure, can do something towards lessening their exceeding bitterness. Each one of us, perhaps, can bind up the wounds of at least one unfortunate straggler, and carry a word of consolation and hope to at least one aching heart. And as we give of what we have to those who have not, I can imagine that the Christmas voices which tell of gloom, and pain, and death will be overpassed by the cheerfuller voices which breathe the strains of faith and hope, and that high above them all will rise once more the celestial music of those angel-voices, which of old pealed, strong and clear, through the "starry silences" their message of eternal love—"Glory to God on high; on earth peace, and goodwill among men."

W. H. D.-A.

POSTAGE OF THE CHRISTMAS NUMBER.

INLAND.

By Parcel Post, *Threepence*; by Book Post, *Fourpence*.

ABROAD.

For the whole of Europe, Baghdad, Beyrout, Canada, Egypt, Jerusalem, Morocco, Newfoundland, Nova Scotia, Persia, Smyrna, Syria, Tahiti, and the United States of America: *Fourpence*.

For Bechuanaland: *One Shilling and Eightpence*.

For countries in the Postal Union the Number must be packed so as not to exceed eighteen inches in length; for other countries, a length of two feet is a low'.

A NEW DEPARTURE.

The publishers of one of the leading society papers of London have taken to analysing some of the leading patent medicines, also to investigating their published testimonials, with the result of creating quite a commotion among certain proprietors. Injurious effects likely to follow the use of patent medicines, published testimonials given from addresses which only exist in the mind of a clever writer in the company's employ, are fully exposed. Suits for heavy damages have been threatened by the proprietors of the remedies thus exposed. Injured innocence puts on a bold front, but the publishers of the paper in question do not frighten easily; they have taken up a question of vital interest to the public, and they propose to turn on the full light of intelligent investigation. One most excellent feature of this exposure is, that the public are enabled to discriminate between worthless nostrums and those really good remedies. The publishers evidently take this view of the question, for their last investigation is a most flattering one for the proprietors of that noted remedy St. Jacobs Oil. The following is the report, headed—"The Verdict of the People of London on St. Jacobs Oil." :—

Mr. William Howes, civil engineer, 66, Red Lion-street, High Holborn, W.C., was afflicted with rheumatism for twenty years. Sometimes his hands swelled to twice their natural size; his joints were so stiff that he could not walk, and his feet so sore that he could not bear any weight on them. Nothing relieved him till he applied St. Jacobs Oil. The result was marvellous. Before using the contents of two bottles all pain left him, and he is now in perfect health.

Mr. C. H. Palmer, Secretary of the Conservative Defence Association, and Overseer of the District of Islington, said:—"For a long time I have been a great sufferer from neuralgia in my face and head, and rheumatism in my limbs. After trying various remedies without obtaining relief, I procured a bottle of St. Jacobs Oil, the use of which completely removed every trace of pain."

Mr. Edward Peterson, electric-light engineer, of 36, Whetstone Park, W.C., said:—"There can be no two opinions respecting the value of St. Jacobs Oil. I was completely used up with rheumatism in my arms and shoulders; a few good rubbings with that famous Oil drove all pain away."

Mr. Henry John Barlow, of 4, Staples' Inn-buildings, Holborn Bars, W.C., said:—"I had rheumatism in my feet and legs, which became so bad that I was hardly able to walk. St. Jacobs Oil removed all pain and completely cured me."

Mrs. Wolfsberger, matron of Moore-street Home for Poor, Crippled, and Orphan Boys, 17, Queen-street, Edgware-road, said:—"That St. Jacobs Oil had been used in the Home, and that it is powerful in relieving neuralgia and general rheumatism."

Mr. Charles Cartwright, of No. 7, Alfred-place, Bedford-square, W.C., said:—"Having for years been a great sufferer from rheumatism in my limbs, I used St. Jacobs Oil, which cured me directly, after other remedies had signally failed."

Henry and Ann Brighton, superintendents of the North London Home for Aged Christian Blind Women, say:—"That St. Jacobs Oil has proved unfailing; that rheumatism and neuralgia have in every case been removed by using the Oil, and many old ladies, some of them ninety years old, instead of tossing about in agony, now enjoy good nights' rest through its influence."

Mr. N. Price, of 14, Tabernacle-square, Finsbury, E.C., said:—"My wrist, that I had sprained two years before, and which had given me pain without intermission, yielded like magic to the application of St. Jacobs Oil."

Mr. J. Clark, of 21, South Island-place, Brixton-road, London, said:—"Although I was not able to rise from a sitting position without the aid of a chair, I was able to stand and walk after the application of St. Jacobs Oil."

Robert George Watts, M.A., M.D., M.R.C.S., of Albion House, Quadrant-road, Canonbury, N., said:—"I cannot refrain from testifying to the very great efficacy of St. Jacobs Oil in all cases of chronic rheumatism, sciatica, and neuralgia."

Rev. Edward Singleton, M.A., 30, Bournevue-road, Streatham, said:—"St. Jacobs Oil removed all pain directly."

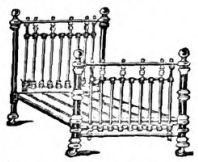
Rev. W. J. Caulfield Browne, M.A., Rector, Kittsford Rectory, said:—"My parishioners use St. Jacobs Oil."

This journal concludes its article as follows:—"It is a source of the greatest satisfaction to us, in conducting these investigations, to be able to report a medicine which is so highly endorsed as the above-mentioned."

Perhaps there is no preparation in the world which enjoys the same degree of success and popularity as St. Jacobs Oil. Its sale far exceeds that of any other Proprietary Medicine, and exceeds by ten times that of all other liniments and embrocations combined. This wonderful success rests on the solid foundation of merit which St. Jacobs Oil possesses, combined with original, dignified, and systematic advertising, which has always characterised the announcements of the Proprietors. The name of St. Jacobs Oil has become a household word in every civilised country in the world. The great success and popularity of the Oil has become the subject of comment by almost the entire Press of the country. In many instances the leading articles of large and influential papers have been devoted to the details of what seem to be almost magical cures effected by the use of St. Jacobs Oil in local cases coming under the immediate attention of the publishers. St. Jacobs Oil is endorsed by Statesmen, Judges, the Clergy, the Medical profession, and people in every walk of life.

The curative powers of St. Jacobs Oil are simply marvellous. It is wholly an outward application. It conquers pain quickly and surely. It acts like magic. It penetrates to the seat of the disease. It cures, even when everything else has failed. A single trial will convince the most incredulous. It has cured thousands of cases of rheumatism and neuralgia, which had resisted treatment for the greater part of a lifetime. It has cured people who have been crippled with pain for more than twenty years. After the most thorough and practical test, St. Jacobs Oil has received Six Gold Medals at different International Exhibitions, for its marvellous power to conquer pain. It is used extensively in the leading hospitals and dispensaries of the metropolis and provincial cities, and also on board her Majesty's troop-ships and the Cunard Steam-ship Company's fleet. Put up in white wrappers for human use, and in yellow wrappers for veterinary purposes, price 2s. 6d. per Bottle, of all Dealers in Medicine throughout the world; or, sent post-free by the Proprietors, 45, Farringdon-road, London, E.C.

St. Jacobs Oil in Yellow Wrappers is altogether and totally different from that in the White Wrappers, insomuch as ingredients, which long years of experience have taught us are particularly valuable as an outward application for animals, are added to the St. Jacobs Oil in the Yellow Wrappers, and said ingredients are not contained in the St. Jacobs Oil in White Wrappers.



FURNISH THROUGHOUT (Regd.)

"Perfected"
Cod Liver Oil
"Is as nearly tasteless as Cod-Liver Oil can be."—Lancet.
"Has almost the delicacy of salad oil."—Brit. Med. Journal.
"No nauseous eructations follow after it is swallowed."—Medical Press.
It can be borne and digested by the most delicate; it is the only oil which does not "repeat"; and for these reasons the most efficacious kind in use. In capsuled Bottles only, at 1s. 4d., 2s. 6d., 4s. 9d., and 9s. Sold Everywhere.
BYNIN, LIQUID MALT, forms a valuable adjunct to Cod-Liver Oil, being not only a highly concentrated and nutritious Food, but a powerful aid to the digestion. BYNIN, being liquid, is entirely free from the inconvenient treacle-like consistence of ordinary Malt Extract; it is very palatable, and possesses the nutritive and peptic properties of malt in perfection. It is a valuable ailment in Consumption and Wasting Diseases.
In Bottles, at 1s. 9d. each.

DURABLE and PROCURABLE.
AT
SANGSTER AND COMPANY'S,
140, Regent-street; 75, Cheapside;
94, Fleet-street; 10, Royal Exchange.
N.B.—CHILDREN'S UMBRELLAS FOR PRESENTS.

HEALTH-STRENGTH
VIGOUR
·LONG·LIFE·
Guaranteed by the use of HUNT'S FAMILY PILLS. Large numbers of people in robust health can testify to the truth of this assertion, having regulated themselves entirely by these Pills for over 50 years. One pill will invariably relieve, and a little perseverance radically cure, either a Torpid Liver, Costiveness, Indigestion, Pains in the Back or Head, Influenza or Feverish Cold, Rheumatism, Lumbago, Flatulency, or Giddiness. THEY RESTORE BRIGHTNESS TO THE EYE, CLEARNESS TO THE COMPLEXION, SHARPNESS TO THE INTELLECT, AND ENERGY TO BOTH MIND AND BODY. To Ladies they are invaluable. Sold everywhere, in boxes, 1s. 1½d. and 2s. 9d. Wholesale Agents, WILCOX and Co., 239, Oxford-street, London. Post-free.

Allen & Hanburys'
Castor Oil
Tasteless. Pure. Active.
Sold everywhere at 6d., 1/, 1/9 & 3/.
"It possesses all the advantages claimed for it."—Lancet.

BENSON'S BOND-ST. NOVELTIES.

XMAS AND OTHER PRESENTS.

Gold — Enamelled

Pearl and Diamond Centre, £3 10s.

A Large Selection of the New Enamelled Jewellery, exquisite Reproductions of Natural Flowers.

"Illustrated London News" Christmas Number, 1888.

MR. RIDER HAGGARD'S NEW WORK,

THE MOST IMPORTANT YET PUBLISHED,

ENTITLED

CLEOPATRA:

Being an Account of the Fall and Vengeance of Harmachis, the Royal Egyptian, as set forth by his own hand on the papyrus rolls found in the mummy-cloths wherewith he was wound about,

WILL BE COMMENCED IN THE

ILLUSTRATED LONDON NEWS,

JANUARY 5, 1889.

AND WILL BE CONTINUED WEEKLY UNTIL COMPLETED.

ILLUSTRATIONS BY R. CATON WOODVILLE

The following is a portion of the first week's issue:—

INTRODUCTION.

In the recesses of the desolate Libyan mountains that lie behind the temple and city of Abydos, the supposed burying-place of the Holy Osiris, a tomb was recently discovered, among the contents of which were the papyrus rolls containing this history. The tomb itself is spacious, but otherwise remarkable only for the depth of the shaft which descends vertically from the rock-hewn cave, that once served as the mortuary chapel of the friends and relatives of the departed, to the coffin-chamber beneath. This shaft is no less than eighty-nine feet in depth. The chamber at its foot was found to contain three coffins only, though it is large enough for many more. Two of these, which in all probability inclosed the bodies of the High Priest, Amenemhat, and of his wife, father and mother of Harmachis, the hero of this history, the shameless Arabs who discovered them there and then broke up.

The Arabs broke the bodies up. With unhallowed hands they tore the holy Amenemhat and the frame of her who had, as it is written, been filled with the spirit of the Hathors—tore them limb from limb, searching for treasure amidst their bones—perhaps, as is their custom, selling the very bones for a few piastres to the last ignorant tourist who came their way, seeking what he might destroy. For in Egypt the accursed, the living find their bread in the tombs of the great men who were before them.

But, as it chanced, some little while afterwards, one who is known to this writer, and a doctor by profession, passed up the Nile to Abydos, and became acquainted with the men who had done this thing. They revealed to him the secret of the place, telling him that one coffin yet remained entombed. It seemed to be the coffin of a poor person, they said, and therefore, being pressed for time, they had left it unviolated. Moved by curiosity to explore the recesses of a tomb as yet unprofaned by tourists, my friend bribed the Arabs to reveal its secret to him. What ensued I will give in his own words, exactly as he wrote it to me:—

I slept that night near the Temple of Seti, and started before daybreak on the following morning. With me were a cross-eyed rascal called Ali—Ali Baba I named him—the man from whom I got the ring which I am sending you, and a small but choice assortment of his fellow-thieves. Within an hour after sunrise we reached the valley where the tomb is. It is a desolate place, into which the sun pours his scorching heat all the long day through, till the huge brown boulders which are strewn about become so hot that one can scarcely bear to touch them, and the sand scorches the feet. We rode on donkeys, for it was already too hot to walk, some way up the valley — where a vulture floating far in the blue overhead was the only other visitor—till we came to an enormous boulder polished by centuries of the action of sun and sand. Here Ali halted, saying that the tomb was under the stone. Accordingly we dismounted, and, leaving the donkeys in charge of a fellah boy, went up to the rock. Beneath it was a small hole, barely large enough for a man to creep through; indeed, it had been dug by jackals, for the doorway and some part of the cave were entirely silted up, and it was by means of this jackal hole that the tomb had been discovered. Ali crept in on his hands and knees, and I followed, to find myself in a place cold after the hot outside air, and, in contrast with the light, filled with a dazzling darkness. We lit our candles, and the select body of thieves having arrived, I made an examination. We were in a cave the size of a large room, and hollowed by hand, the further part of the cave being almost free from drift-dust. On the walls are religious paintings of the usual Ptolemaic character, and among them one of a majestic old man with a long white beard, who is seated in a carved chair holding a wand in his hand. Before him are passing a procession of priests bearing sacred images.* In the far corner of the tomb on the right hand from the door is the shaft of the mummy-pit, a great square-mouthed well cut in the black rock. We had brought a beam of thorn-wood, and this was now laid across the pit and a rope made fast to it. Then Ali—who, to do him justice, is a courageous thief—took hold of the rope, and, putting some candles into the breast of his robe, placed his bare feet against the smooth sides of the well, and began to descend with great rapidity. Very soon he had vanished into the blackness, and the agitation of the rope alone told us that anything was going on below. At last the rope ceased shaking, and a faint shout came rumbling up the well, announcing Ali's safe arrival. Then, far below, a tiny star of light appeared. He had lit the candle, thereby disturbing hundreds of bats that flittered up in an endless stream and as silently as spirits. The rope was hauled up again, and now it was my turn; but, as I declined to trust my neck to the hand-over-hand method of descent, the end of the cord was made fast round my middle, and I was lowered bodily into those sacred depths. Nor was it a pleasant journey, for if the masters of the situation above had made any mistake I should have been dashed to pieces. Also, the bats continually flew into my face and clung to my hair, and I have a great dislike of bats. At last, after some minutes of jerking and dangling, I found myself standing in a narrow passage by the side of the worthy Ali, covered with bats and perspiration, and with the skin rubbed off my knees and knuckles. Then another man came down, hand over hand, like a sailor, and as the rest were going to stop above we were ready to go on. Ali went first with his candle—of course we each had a candle—leading the way down a long passage about five feet high. At length the passage widened out and we were in the tomb-chamber: I think the hottest and most silent place that I ever entered. It was simply stifling. This tomb-chamber is a square room cut in the rock and totally devoid of paintings or sculpture. I held up the candles and looked round. About the place were strewn the coffin-lids and the mummied remains of the two bodies that the Arabs had previously violated. The paintings on the former were, I noticed, of great beauty, though, having no knowledge of hieroglyphics, I could not decipher them. Beads and spicy wrappings lay around the remains, which, I saw, were those of a man and a woman.† The head had been broken off the body of the man. I took it up and looked at it. It had been closely shaved, after death, I should say, from the general indications, and the features were disfigured with gold leaf. But, notwithstanding this, and the shrinkage of the flesh, I think the face was one of the most imposing and beautiful that I ever saw. It was that of a very old man, and his dead countenance still wore so calm and solemn, indeed, so awful a look, that I grew quite superstitious (though, as you know, I am pretty well accustomed to dead people), and put the head down in a hurry. There were still some wrappings left upon the face of the second body, and I did not remove them; but she must have been a fine large woman in her day.

"There the other mummy," said Ali, pointing to a large and solid case that had the appearance of having been carelessly thrown down in a corner, for it was lying on its side.

I went up to it and examined it. It was well made, but of perfectly plain cedar-wood—not an inscription, not a solitary god on it.

"Never see one like him before," said Ali. "Bury great hurry, he no 'mafish,' no 'fineesh.' Throw him down there on side."

I looked at the plain case till at last my interest was thoroughly aroused. I had been so shocked by the sight of the scattered dust of the departed that I had made up my mind not to touch the remaining coffin—but now my curiosity overcame me and we set to work.

Ali had brought a mallet and a cold chisel with him, and having set the coffin straight he began upon it with all the zeal of an experienced tomb-breaker. And then he pointed out another thing. Most mummy cases are fastened by four little tongues of wood, two on either side, which are fixed in the upper half, and, passing into mortices cut to receive them in the thickness of the lower half, are there held fast by pegs of hard wood. But this mummy-case had eight such tongues. Evidently it had been thought well to secure it firmly. At last, with great difficulty, we raised the massive lid, which was nearly three inches thick, and there, covered over with a deep layer of loose spices (a very unusual thing), was the body.

Ali looked at it with open eyes—and no wonder. For this mummy was not as other mummies are. Mummies in general lie upon their backs, as stiff and calm as though they were cut from wood; but this mummy lay upon its side, and, the wrappings notwithstanding, its knees were slightly bent. More than that, indeed, the gold mask, which, after the fashion of the Ptolemaic period, had been set upon the face, had

* This, I take it, is a portrait of Amenemhat himself.—EDITOR.

† Doubtless Amenemhat and his wife.—ED.

worked down, and was literally pounded up beneath the hooded head.

It was impossible, seeing these things, to avoid the conclusion that the mummy before us had moved with violence *since it was put in the coffin*.

"Him very funny mummy. Him not 'mafish' when him go in there," said Ali.

"Nonsense!" I said. "Who ever heard of a live mummy?"

We lifted the body out of the coffin, nearly choking ourselves with mummy dust in the process, and there beneath it, half hidden among the spices, we made our first find. It was a roll of papyrus, carelessly fastened and wrapped in a piece of mummy cloth, having to all appearance been thrown into the coffin at the moment of closing.*

Ali eyed the papyrus greedily, but I seized it and put it in my pocket, for it was agreed that I was to have all that might be discovered. Then we began to unwrap the body. It was covered with very broad strong bandages, thickly wound and roughly tied, sometimes by means of simple knots, the whole work bearing the appearance of having been executed in great haste and with difficulty. Just over the head was a large lump. Presently, the bandages covering it were off, and there, on the face, lay a second roll of papyrus. I put down my hand to lift it, but it would not come away. It appeared to be fixed to the stout seamless shroud which was drawn over the whole body and tied beneath the feet—as a farmer ties sacks. This shroud, which was also thickly waxed, was in one piece, being made to fit the form like a garment. I took a candle and examined the roll, and then I saw why it was fast. The spices had congealed and glued it to the sacklike shroud. It was impossible to get it away without tearing the outer sheets of papyrus.†

At last, however, I wrenched it loose and put it with the other in my pocket.

Then in silence we went on with our dreadful task. With much care we ripped loose the sacklike garment, and at last the body of a man lay before us. Between his knees was a third roll of papyrus. I secured it, and then held down the lights and looked at him. Being a doctor, one glance at his face was enough to tell me how he had died.

This body was not so much dried up as are those that have passed the allotted seventy days in natron, which it evidently had not, and therefore the expression and likeness were better preserved than is usual. Without entering into particulars, I will only say that I hope I shall never see such another look as that which was frozen on this dead man's face. Even the Arabs recoiled from it in horror and began to mutter prayers.

For the rest, the usual opening on the left side through which the embalmers did their work was absent; the finely-cut features were those of a person of middle age, although the hair was already grey, and the frame that of a very powerful man, the shoulders being of an extraordinary width. I had not time to examine very closely, however, for within a few seconds from the time of its uncovering, the body, being unembalmed, now that it was exposed to the action of the air, began to crumble. In five or six minutes there was literally nothing left of it but a wisp of hair, the skull, and a few of the larger bones. I noticed that one of the tibiæ—I forget if it was the right or the left—had been fractured and very badly set. It must have been quite an inch shorter than the other.

Well, there was nothing more to find, and now that the excitement was over, what between the heat, the exertion, and the smell of mummy dust and spices, I felt more dead than alive.

I am tired of writing, and the ship rolls. This letter, of course, goes overland, and I am coming by "long sea," but I hope to be in London within ten days after you get it. Then I will tell you of my pleasing experiences in the course of the ascent from the tomb-chamber, and of how that prince of rascals, Ali Baba, and his thieves tried to frighten me into handing over the papyri, and how I worsted them. Then, too, we will get the rolls deciphered. I expect that they only contain the usual thing, copies of the Book of the Dead, but there *may* be something else in them. Needless to say, I did not narrate this little adventure in Egypt, as I should have had the Boulac Museum people on my track. Good-bye, "Mafish Fineesh," as Ali Baba always said.

In due course, my friend, the writer of the letter from which I have quoted, arrived in London, and on the very next day we paid a visit to a mutual acquaintance well versed in hieroglyphics and demotic writing. With what anxiety we watched him skilfully damping and unfolding one of the rolls, and peering through his gold-rimmed glasses at the mysterious characters, may well be imagined.

"Hum," he said, "whatever it is, this is *not* a copy of the 'Book of the Dead.' By George, what's this? Cle—Cleo—Cleopatra—— Why, my dear Sirs, as I am a living man, this is the history of somebody who lived in the days of Cleopatra! Well, there's six months' work before me here—six months', at the very least!" And in that joyful prospect he fairly lost control of himself, and skipped about the room, shaking hands with us at intervals, and saying, "I'll translate—I'll translate it if it kills me, and we will publish it; and, by the living Osiris, it will take the town—and drive every Egyptologist in Europe mad with envy! Oh, what a find! what a most glorious find!"

And O you whose eyes shall fall upon these pages, see, they have been translated, and they have been printed, and here they lie before you—an undiscovered land wherein you are free to travel!

Harmachis speaks to you from his forgotten tomb. The walls of Time fall down, and, as at the lightning's leap, a picture from the past starts sudden on your view, framed in the gathered darkness of the ages.

He shows you those two Egypts that the silent pyramids looked down upon long centuries ago—the Egypt of the Greek, the Roman, and the Ptolemy, and that other outworn Egypt of the Hierophant, hoary with years, heavy with the legends of antiquity and the memory of long-lost honours.

He tells you how the smouldering loyalty of Khem (Egypt) burnt up before it died, and how fiercely the old Time-consecrated Faith struggled against the conquering tide of the New Idea, that, drawn ever by the mystery of Mind, rose, like the Nile at flood, and drowned the ancient gods of Egypt.

Here, in his pages, you shall learn the glory of Isis the Many-shaped, the Executor of Decrees. Here you shall make acquaintance with Cleopatra, that "Thing of Flame" whose passion-breathing beauty shaped the destiny of Empires, and read how the soul of Charmion was slain of the sword her vengeance smithied.

Here Harmachis, the doomed Egyptian, being about to die, salutes you who follow on the path he trod. In the story of his broken years he shows to you what may in its own degree be the story of your own. Crying aloud from that dim Amenti where to-day he wears out his long atoning time, he, in the history of his fall, most eloquently tells the fate of him who, however sorely tried, forgets his God, his honour, and his country.

CHAPTER I.

OF THE BIRTH OF HARMACHIS; THE PROPHECY OF THE HATHORS; AND THE SLAYING OF THE INNOCENT CHILD.

By him who sleeps at Abouthis, I write the truth. I, Harmachis, hereditary priest of the Temple, reared by the divine Sethi, aforetime a Pharaoh of Egypt, and now justified in Osiris and ruling in Amenti. I, Harmachis, by right Divine and by true descent of blood King of the Double Crown, and Pharaoh of the Upper and Lower Land. I, Harmachis, who cast aside the opening flower of our hope, who turned him from the glorious path, who forgot the voice of God in hearkening to the voice of woman. I, Harmachis, the fallen, in whom are gathered up all woes as the waters are gathered in a desert well, who have tasted of every shame, who by betrayal have betrayed, who in losing the glory that is here have lost of the glory that is there, who am utterly undone and rent by miserable remorse—I write, and, by him who sleeps at Abouthis, I write the truth.

O Egypt! Egypt!—dear land of Khem, whose black soil nourished up my mortal part—land that I have betrayed—O ye Gods!—Osiris!—Isis!—Horus!—ye Gods of Egypt whom I have betrayed!—O ye temples whose pylons strike the sky; ye temples whose faith I have betrayed!—O Royal blood of the Pharaohs of Eld, that yet runs within these withered veins—whose virtue I have betrayed!—O Right divine of Kings betrayed by me!—O Father Sihor (Nile)!—O Invisible Essence of all Good! and O Fate, whose balance rested on my head—hear me! and, to the last day of utter doom, bear me witness that I write the truth.

What, then, is a man? He is a feather, but a feather blown by the wind. He is a fire, but a fire born of the fuel. He is a spirit, but a spirit having wings wherewith to sail to either destiny. He may choose the good, and on him doth rest the evil that he does. He is the helm unto the boat of Fate; he is the shadow that goes before the sword; he is the dream that presages the truth. There is no chance; for man in his circumstance doth direct the chance, and as with a stylus doth map upon the tablet of the world the thing that he caused to be. So hath the Invisible decreed, and so for ever to ever shall it be. And woe to him who faileth!

* * * * *

Even as I write, beyond the fertile fields, the Nile is running red, as though with blood. Bright before me strikes the light upon the far Arabian hills, and bright it falls upon the piles of Abouthis. At Abouthis, within the temples, still do the priests make orison, but they know me no more; still the sacrifice is offered, and the stony roofs echo down the prayers of those who pray. Still from here, from this lone cell within my prison-tower, I, the Word of Shame, watch thy fluttering banners, O Abouthis, flaunting from thy pylon walls, and hear the chants as the long procession winds from sanctuary to sanctuary.

O Abouthis, lost Abouthis! my heart goes out toward thee! For the day comes when the desert sands shall fill thy Holy places! Thy Gods are doomed, O Abouthis! New faiths shall make a mock of all thy Holies, and centurion shall call unto centurion across thy fortress-walls. I weep—I weep tears of blood: for mine is the weakness that brought about these evils and mine for ever is their shame.

Behold, it is written hereafter:—

Here in Abouthis was I born, I, Harmachis, and my father, the justified in Osiris, was High Priest of the Temple of Sethi. And on that same day of my birth was born also Cleopatra, the Queen of Egypt. In those fields I passed my youth watching the baser people at their labours and going in and out at will among the great courts of the temples. Of my mother I knew naught, for she died when I yet hung at the breast. But ere she died, so the old wife, Atoua, told to me, she took from a coffer of ivory an uraeus‡ of pure gold and laid it on my infant brow. And those who saw her do this thing believed that she was distraught of the Divinity, and that in her madness she foreshadowed that the day of the Macedonian Lagidæ was ended—for Ptolemy Auletes (the Piper) then wore the double crown—and that Egypt's sceptre should once again pass to the hand of one of Egypt's true and Royal race. But when my father, the High Priest Amenemhat, who even then was full of years, for I was his only child and the child of his age, she who was his wife before my mother having been, for what crime I know not, cursed by Sekhet with the curse of barrenness; I say when my father came in and saw what the dying woman had done, he lifted up his hands towards the vault of heaven and adored the Invisible, because of the sign that had been sent. And even as he adored, behold! the Hathors filled my dying mother with the Spirit of Prophecy, and she rose in strength from the couch and thrice prostrated herself before the cradle where I lay asleep, the Royal asp upon my brow, and cried aloud—

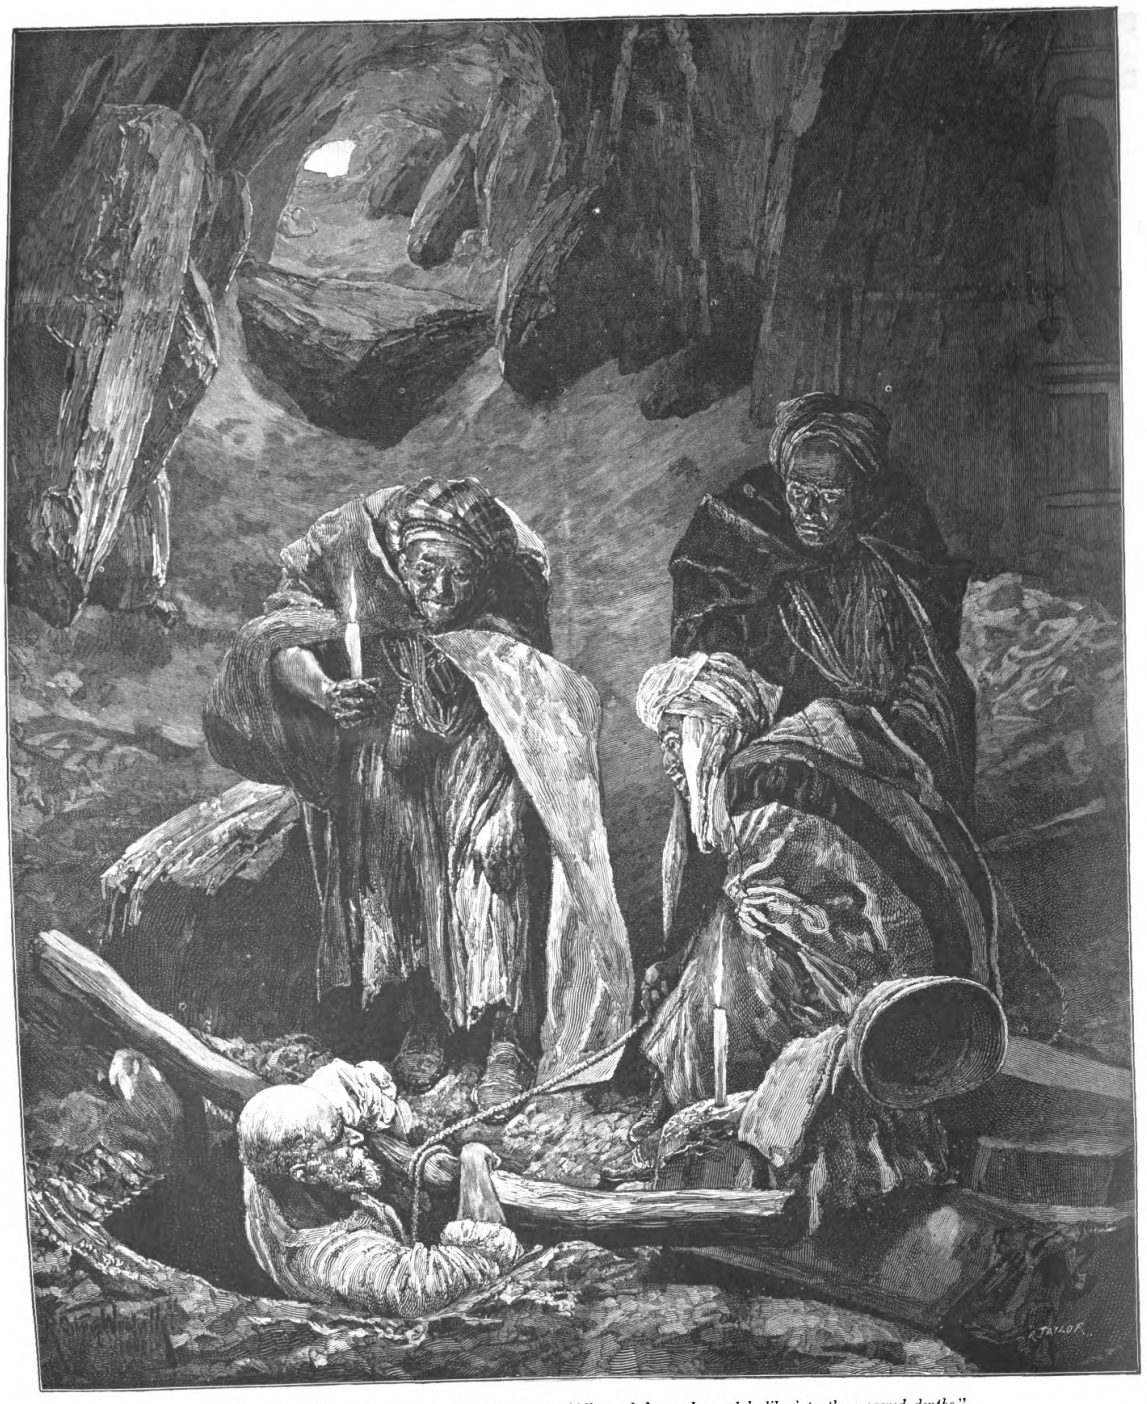
"Hail to thee, fruit of my womb! Hail to thee, Royal child! Hail to that Pharaoh that shall be! Hail to thee, God that shall purge the land, Divine seed of Nekt-nebf, the Osirian.§ Keep thou pure, and thou shalt rule and deliver Egypt and not be broken. But if in the hour of trial thou dost fail, then may the curse of all the Gods of Egypt rest upon thee, and the curse of thy Royal forefathers, the justified, who ruled the land before thee, even from the age of Horus; then in life mayest thou be wretched, and after death may Osiris refuse thee, and the judges of Amenti give judgment against thee, and Set and Sekhet torment thee, even till such time as thy sin is purged, and the Gods of Egypt, called by strange names, once more are worshipped in the Temples of Egypt, and the staff of the Oppressor is broken, and the footsteps of the foreigner are swept clean, and the thing is accomplished as thou in thy weakness shalt cause it to be done."

And when she had spoken thus, the Spirit of Prophecy went out of her, and she fell dead across the cradle where I slept, so that I awoke with a cry.

But my father, Amenemhat, the High Priest, trembled, and was very fearful both because of the words which had been said by the Spirit of the Hathors through the mouth of my mother, and because what had been uttered was treason against Ptolemy. For he knew that if the matter should come to the ears of Ptolemy, Pharaoh would send his guards to destroy the life of the child of whom such things were prophesied. Therefore, my father shut the doors, and caused all those who were there to swear upon the holy symbol of his office, and by the name of the Divine Three, and by the soul of her who lay dead upon the stones beside them, that naught of what they had seen and heard should pass their lips.

But among the company was the old wife, Atoua, who had been the nurse of my mother, and loved her well: and in these days, though I know not how it hath been in the past, nor how it shall be in the future, there is no oath that can bind a woman's tongue. And so it came about, that, by-and-by, when the matter had become homely in her mind, and her fear had fallen from her, she spoke of the prophecy to her daughter, who nursed me at the breast now that my mother was dead, as they walked together in the desert carrying food to the husband of the daughter, who was a sculptor; and shaped the pictures of the holy Gods in the tombs that are fashioned in the rock—telling the daughter, my nurse, how great should be her care and love toward the child that should one day be Pharaoh, and drive the Ptolemies from Egypt. But the daughter, my nurse, was so filled with wonder at what she heard that she could not keep the tale locked within her breast, and in the night she awoke her husband, and, in her turn, whispered of it to him, and thereby compassed her own destruction, and the destruction of her child, my foster-brother. For the man told his friend, and the friend was a spy of Ptolemy's, and thus the tale came to Pharaoh's ears. And Pharaoh was much troubled thereat, for though when he was full of wine he would make a mock of the Gods of the Egyptians, and swear that the Roman Senate was the only God to whom he bowed the knee, yet in his heart was he terribly afraid, as I have learned from one who was his physician: for when he was alone at night he would scream and cry aloud to the great Serapis, who indeed is no true God, and to other Gods, fearing lest he should be murdered and his soul handed over to the tormentors. Also, when he felt his throne tremble under him, he would send large presents to the temples, and ask a message from the oracles, and more especially from the oracle that is at Philæ. Therefore, when it came to his ears that the wife of the High Priest

* This roll contained the third unfinished book of the history. The other two rolls were neatly fastened in the usual fashion. All three are written by one hand in the demotic character.—Ed.



† This accounts for the gaps in the last sheets of the second roll.—Ed.

of the great and ancient temple of Abouthis had, ere she died, been filled with the Spirit of Prophecy, and prophesied that her son should be Pharaoh, he was much afraid, and summoning some trusty guards—who, being Greeks, feared not to do sacrilege—he dispatched them by boat up the Nile, with orders to come to Abouthis and cut off the head of the child of the High Priest and bring it to him in a basket.

But as it chanced, the boat wherein the guards came being of deep draught, and the time of their coming being at the lowest ebb of the river, it struck and remained fast upon a bank of mud that is opposite the mouth of the road that runs across to the plains of Abouthis, and as the north wind was blowing very fiercely it was like to sink. Thereon the guards of Pharaoh called out to the common people who laboured at lifting water along the banks of the river, to come with boats and take them off; but seeing that they were Greeks of Alexandria, the people would not, for the Egyptians love not the Greeks. Then they cried that they were on Pharaoh's business, and still the people would not, asking what was the business. Whereon a Eunuch among them who had made himself drunken in his fear, told them that they came

"The end of the rope was made fast round my middle, and I was lowered bodily into those sacred depths."

to slay the child of Amenemhat, the High Priest, of whom it was prophesied that he should be Pharaoh, and sweep the Greeks from Egypt. And thereon the people feared to stand longer in doubt, but brought boats, not knowing what might be meant by the man's words. But one there was among them—a farmer and an overseer of canals—who was a kinsman of my mother's and had been present when she prophesied; and he turned and ran swiftly for three parts of an hour, till he came to where I lay in the house that is without the north wall of the great temple. Now, as it chanced, my father was away in that part of the Place of Tombs which is to the left of the large fortress, and Pharaoh's guards, mounted on asses, were hard upon us. Then the messenger cried to the old wife, Atoua, whose tongue had brought about the evil, and told how the soldiers drew near to slay me. And they looked at each other, not knowing what to do; for, had they hid me, the guards would not have stayed their search till I was found. And the man, gazing through the doorway, perceived a little child at play.

"Woman," he said, "whose is that child?"

"It is my grandchild," she answered, "the foster-brother of the Prince Harmachis; the child to whose

WEDDING PRESENTS.

COMPLIMENTARY PRESENTS.

CAUTION.—**The Company regret** to find that many of their Designs are being copied in a very inferior quality, charged at higher prices, and inserted in a similar form of advertisement, which is calculated to mislead the public.

They beg to notify that their only London retail address is 112, REGENT-STREET, W.

"A SUCCESSFUL BUSINESS."—"We know of no enterprise of recent years which has been crowned with greater success than the Goldsmiths' and Silversmiths' Company, of 112, Regent-street, who, just eight years ago, opened their show-rooms to place the productions of their workshops direct before the public, thus saving purchasers the numerous intermediate profits which are obtained by 'middle-men' on high-class goods. Such has been the appreciation by the public that the Company have now the largest business in England, and are quite supplanting the old-fashioned houses that pride themselves upon having been established so many decades, but have utterly failed to keep pace with the times, and find it impossible to depart from their long credit system, entailing bad debts, for which cash buyers have to compensate."—Court Journal.

DIAMOND ORNAMENTS.—A magnificent assortment of Rings, Stars, Sprays, Flies, Necklaces, &c., composed of the finest White Diamonds, mounted in special and original designs, and sold direct to the public at merchants' cash prices.

SAPPHIRES from Ceylon, but with London cutting, mounted alone, or with Diamonds, in a great variety of ornaments.

NOVELTIES.—A succession of Novelties by the Company's own artists and designers is constantly being produced to anticipate the requirements of purchasers.

CASH PRICES.—The Company, conducting their business both in buying and selling for cash, are enabled to offer purchasers great advantages over the usual credit houses. All goods are marked in plain figures for cash without discount.

APPROBATION.—Selected parcels of goods forwarded to the country on approval when desired. Correspondents, not being customers, should send a London reference or deposit.

COUNTRY CUSTOMERS have, through this means, the advantage of being supplied *direct* from an immense London stock, containing all the latest novelties, and which are not obtainable in provincial towns.

COLONIAL AND FOREIGN Orders executed with the utmost care and faithfulness under the immediate supervision of a member of the Company. Where the selection is left to the firm, customers may rely upon good taste and discretion being used, and the prices being exactly the same as if a personal selection were made.

TESTIMONIALS.—The numerous recommendations with which the Goldsmiths' Company have been favoured by customers, is a pleasing testimony to the excellence and durability of their manufactures.

OLD JEWELLERY, Diamonds, and Plate taken in exchange or bought for cash.

MEDALS.—Awarded Seven Gold and Prize Medals and the Legion of Honour, a special distinction conferred on this Firm for the excellence of their manufactures.

CATALOGUE, containing thousands of designs, beautifully illustrated, sent post-free to all parts of the world.

GOLDSMITHS' AND SILVERSMITHS' COMPANY, 112, REGENT-STREET. CATALOGUE POST-FREE.

"Cease, every joy to glimmer on my mind,
But leave, oh! leave the light of hope behind!"

"Oh! who would pique himself on mind, whose use
Depends so much upon the gastric juice?"

THE STUDY OF THE STOMACH IS THE STUDY OF MORALIT

THE

FESTIVE

SEASON.

Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies are all apt to disagree, while light white wines, and gin or whisky largely diluted with soda-water, will be found the least objectionable. **ENO'S "FRUIT SALT"** is particularly adapted for any constitutional weakness of the liver; it possesses the power of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woe is avoided by those who keep **ENO'S "FRUIT SALT"** and **ENO'S "VEGETABLE MOTO,"** therefore no family should ever be without them.

THE

FESTI

SEASON

How to enjoy food, which ot wise disorders digestive org causing bili headaches and pure blood — **ENO'S "FRU SALT"** and **EN**

may require. A as a refreshing, c ing, and invigor ing beverage, **ENO'S "FRU SALT."** It is best preventive a cure for bilio ness, sick hea ache, skin eru tions, impure blo pimples on the fa giddiness, feveris ness, mental d pression, want appetite, sourne of the stomac vomiting, thir &c., and a means remove the effec of errors of eatir and drinking.

"The goose and apple-sauce is orf, Sir."

He had been looking forward to a dainty little dinner, and now a frost—a killing frost—has come upon his hopes.

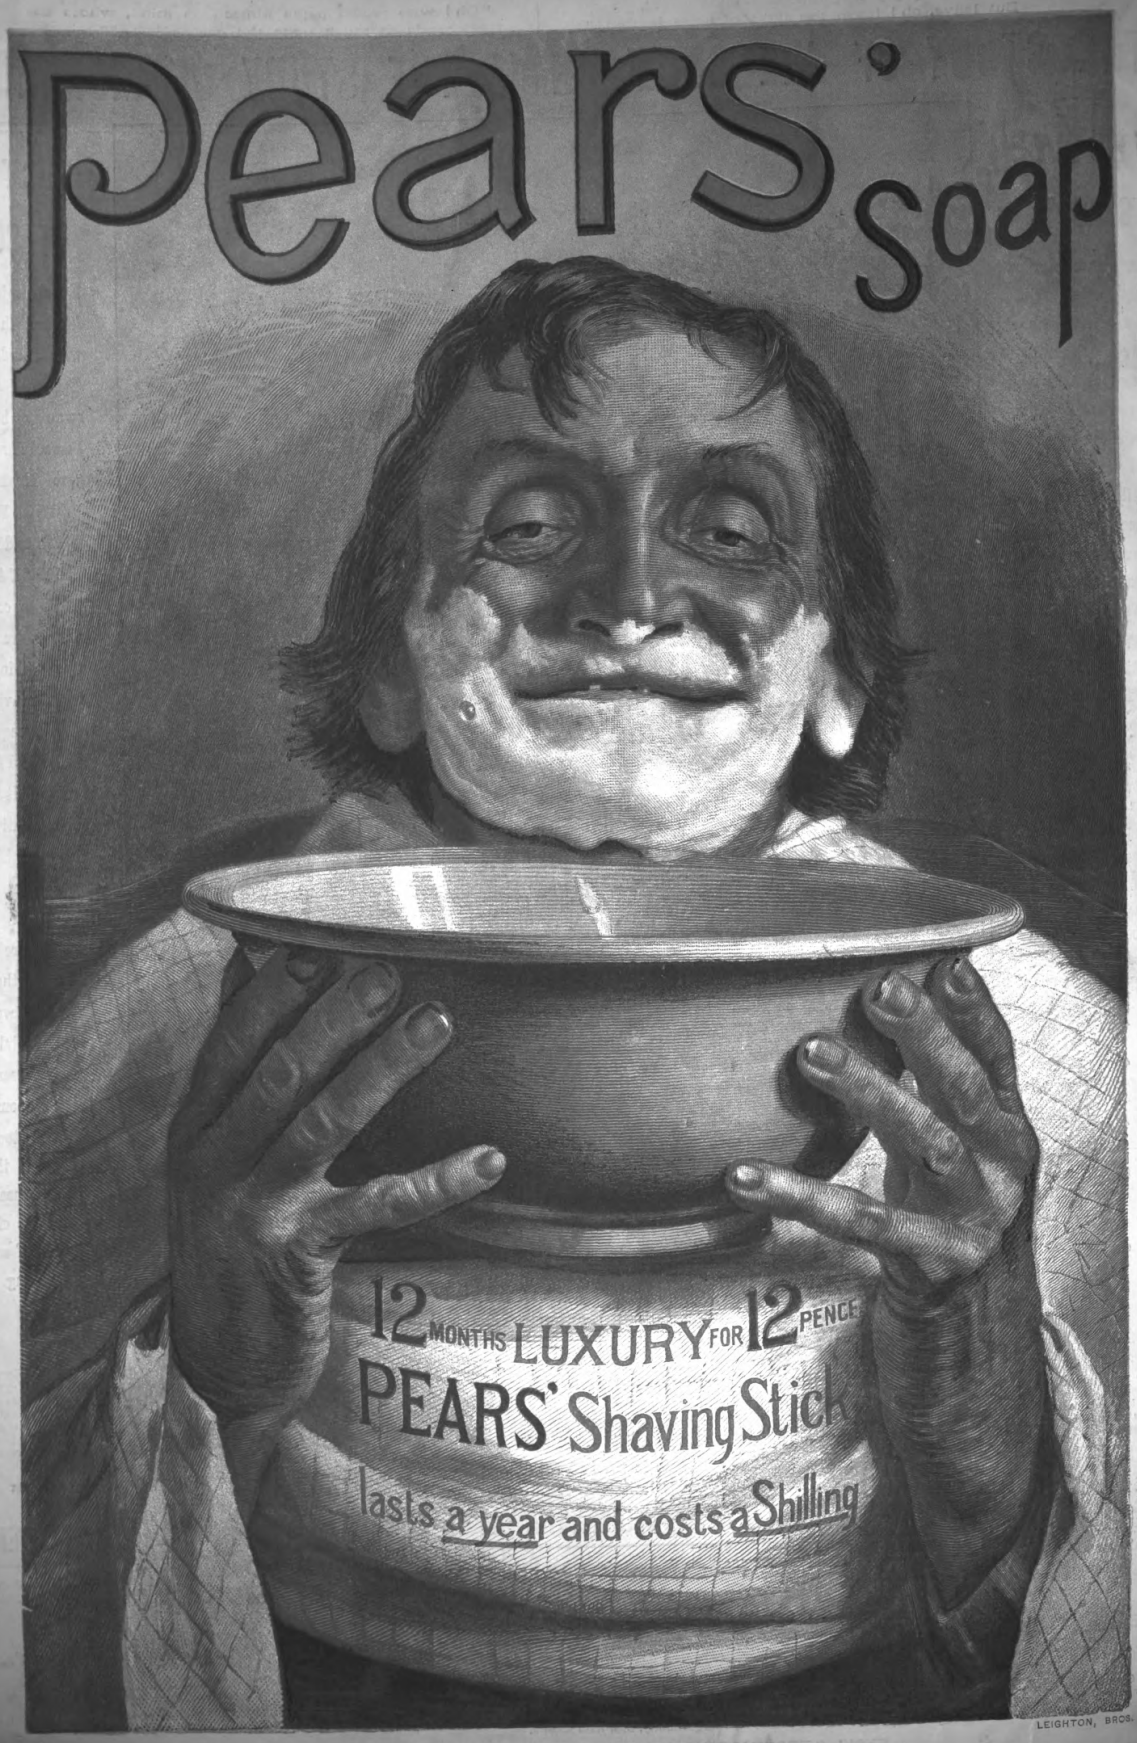
"MODERATION IS THE SILKEN STRING RUNNING THROUGH THE PEARL CHAIN OF ALL VIRTUES."—BISHOP HALL.

IMPORTANT TO TRAVELLERS.—"We, the undersigned, have for the last four years used ENO'S 'FRUIT SALT' during several important Survey Expeditions in the Malay Peninsula, Siam, ar Cambodia, and have undoubtedly derived very great benefit from it. In one instance only was one of our party attacked with fever during that period, and that happened after our supply of your 'FRUI SALT' had run out. When making long marches under the powerful rays of a vertical sun, or travelling through swampy districts, the undersigned have used ENO'S 'FRUIT SALT' two or three times a da in the following manner and proportions:—At daybreak, two teaspoonfuls mixed with the juice of a raw lime, and a little sugar, in a tumbler of water; shortly afterwards a light meal of tea or coffee, bre and fruit; about mid-day, one small spoonful with raw lime-juice and water; and before retiring for the night another teaspoonful in water. Your 'FRUIT SALT,' used as aforesaid, acts as a gentle aperier keeps the blood cool and healthy, and wards off fever. The undersigned have pleasure in voluntarily testifying to the value of your preparation, and our firm belief in its efficacy. We never go into th jungle without it, and have also recommended it to others.—Yours truly, Commander A. J. LOFTUS, F.R.G.S., his Siamese Majesty's Hydrographer; E. C. DAVIDSON, Superintendent Siamese Governmer Telegraphs.—Bangkok, Siam, May, 1883.—*J. C. ENO, Esq., London.*

CAUTION.—Examine each Bottle, and see that the Capsule is marked ENO'S "FRUIT SALT." Without it, you have been imposed on by a worthless imitation. Sold by all Chemists.

PREPARED ONLY AT ENO'S "FRUIT SALT" WORKS, HATCHAM, LONDON, S.E., BY J. C. ENO'S PATENT

TO AID NATURE in CHILDHOOD, MIDDLE AGE, or ADVANCED LIFE, without force or strain, use **ENO'S "VEGETABLE MOTO"** (a simple Vegetable Extract), occasionally a desirabl adjunct to **ENO'S "FRUIT SALT."** They perform their work "silently as the twilight comes when the day is done"; and the patient is much astonished to find his bilious attack, &c., ha completely fled before the simple and natural onslaught of the MOTO. You cannot overstate their great value in keeping the Blood pure and preventing disease.



ENO'S "VEGETABLE MOTO." [TRADE MARK.]

IMPORTANT TO ALL LEAVING HOME FOR A CHANGE.—ENO'S "FRUIT SALT" AND ENO'S "VEGETABLE MOTO" ought to be kept in every house and every travelling trunk, in readiness for any emergency.

DISORDERED STOMACH, SEASIDE AND BILIOUS ATTACKS

A GENTLEMAN writes: "Dec. 27, 1887.—After twelve months' experi value of the 'VEGETABLE MOTO,' I unhesitatingly recommend their use in preference to any other medicine, mor particularly in bilious attacks; their action is so gentle and yet so effectiv ing equals them in my opinion. They have never failed to give the wished-for relief. I take them at any hour, an frequently in conjunction with a small glass of ENO'S 'FRUIT SALT.'—Y ully, ONE WHO KNOWS."

ENO'S "VEGETAL TO" of all Chemists, price 1s. 1½d.; post free, 1s. 3d.

PEARS' SOAP—The Shaver's Delight.
